LETTERS

Students agree: Tent Party should be left alone

Seniors should not be punished for underage drinking at the Gala

TO THE EDITOR:

This is an open latter to President Adams:

I write this letter for you and the University to read in response to your decision to make Commencement tent party alcohol-free for the Class of '97. I am firmly against your decision, for many reasons. However, let me emphasize that I am NOT against your decision simply because of the alcohol. Those who know me on this campus know how I am not a big consumer of alcoholic beverages. There are many underlying issues that your decision has raised, and this is what I emphasize:

Your decision was made in response to three underage students who had to go to the hospital for severe alcohol intoxication after the Gala. Removing alcohol at the tent party for college seniors, the majority, if not all, of whom are 21 years of age, is an incomprehensible consequence. The Gala was a school-wide event; tent party is for college seniors and their families. With the large number of people who attended the Gala, there were bound to be a few mistakes. Why should I be punished for something that occurred with three people who are not even members of my own class? You are taking a school-wide problem and punishing 21-year old college seniors for it, when we have but one day left of being college seniors.

On one level, your decision is extremely insulting to me, a responsible 21-year-old college senior about to enter the world beyond Bucknell, which we students call the "real world". After four years here, of growing and learning, you do not have any faith in me being responsible for myself. I am sure many of my classmates feel the same way.

Every student here has heard of the "Bucknell Bubble". It is the idea that Bucknell is ideally sheltering us from the real world. What you are doing is only strengthening the "Bubble" and sheltering us even more from reality. As college seniors about to enter that reality, do you think this will really benefit us? How will this encourage us, and the rest of the student body, to take responsibility for ourselves? As you said in your letter to the Class of '97, abuse of alcohol is a national problem, not a local one. If it is a national problem, why are you trying to shelter us from it? Isn't a university supposed to prepare its students for, and expose them to, the real world? Stop trying to make Bucknell perfect. It is not perfect, nor do I want it to be perfect. I want it to be real.

The way in which you made your decision clearly indicates that you have no concern with preparing us for life beyond Bucknell. As members of society, we need to be able to work to solve such problems as abuse of alcohol. What we don't need is the problem "solved" for us. We should have been given the opportunity to work together to solve this problem of alcohol abuse at Bucknell, and we should have been given the chance to pose alternate solutions to the poisoning at our tent party. Instead, you make the decision yourself; I quote from your letter: "I have therefore decided to alter the language of Bucknell's alcohol policy in such a way to preclude the University from serving alcohol at these kinds of events". We had no input into your decision. I would feel better if the quote above read, "A committee of students, faculty, staff, and myself have therefore decided..." President Adams, I appreciate your faith in the intelligence and problem-solving skills of your students.

I also feel that you made your decision in a manner that contradicts the notion of democracy. You mentioned in your letter to the Class of '97 that you spoke to various people, including the Bucknell Student Government, about your concerns and your decision. Yet, as I mentioned above, you yourself made the decision. As I understand, there was no committee formed, no voting, no compromising or negotiating. You made your decision and you implemented it. This method of dealing with issues scares me, because I feel that the students, faculty, and staff at Bucknell, and even our families, are at the mercy of decisions made by one person.

On a practical level, consider your decision. It will not work. People will still drink alcohol, whether they have to pay for it themselves or whether it is being provided by the University. Your decision is simply going to privatize the parties. In fact, this places the focus of the parties right back on the Greek system. In this case, underage drinking will probably occur even more than at the usual tent party. There will also be more drinking off-campus, which I am sure the residents of Lewisburg will not be happy about. Graduation is a time to celebrate, and alcohol will be involved in the celebration. Alcohol has been, across time and culture, a component of celebrations. It is tradition. Simply having an alcohol-free tent party will not make the problems associated with alcohol disappear.

I firmly feel that there are other ways of dealing with the problem rather than removing the superficial cause. Alcohol is not the problem. The problem is the abuse of alcohol. If a graduating student irresponsibly chooses to get smashingly drunk the night before graduation, when the next morning he or she will need to be up early, sitting in the sun with friends and family all around, then that is not the University's problem. That is reality, with which the student must deal.

I understand you are concerned with legal responsibility, yet there are other solutions than simply removing the alcohol. Wristbands obviously don't work. Why not require people to show a form of identification, such as a driver's license, to the bartender? This is how it is conveniently done. Yes, it will take longer for people to get their drinks, and even this fact may make people think twice about that drink. I would even support imposing a limit on the number of drinks we can consume at tent party.

I believe that you need to reconsider your decision, I also believe that you need to reconsider the way in which you made that decision. I had no notion that an alcohol-free tent party was being considered until I received your letter. I do no think that Bucknell students appreciate being left in the dark about such issues, and I do not think they appreciate having no input into the solution. If a decision is being made that will directly affect my family, friends, and me, as your decision does, than I want to be a part of the decision. That is what a democracy is.

I had looked forward to tent party as a final time for my classmates and I to spend a good time together. Now, as a result of your decision, I wouldn't be surprised if many of them did not show up. This is a response to your letter that I have already heard. Or, my classmates might show up drunk, more so than at past tent parties, as a means of retaliation. It would not surprise me.

AMY DECRISTOFER '97

Commencement is a time for celebration and merriment for the Class of 1997

TO THE EDITOR:

As a member of the Class of 1997, I have some concerns regarding the new alcohol policy that would affect tent party this year.

In President Adams' open letter, he cited health risks and the liability of underage drinking as reasons for discontinuing the provision of alcohol at events where a large number of students would be in attendance. While these are legitimate concerns, the decision to cease serving alcohol at all university functions for students is not warranted.

President Adams stated that his interest in the university's occasional practice of serving alcohol was aroused by events that occurred during the Sesquicentennial Gala. It is imperative to consider the brate Bucknell's sesquicentennial. The next time an event of that proportion will be held will be in another 50 years. Of course a grandiose event like that of the Gala would have more liability associated with it. Therefore, I do not see a legitimate comparison being made with tent party, an event held annually.

Additionally, the participants in the events should be considered. The Gala was open to the entire student body during a period where classes were in session. Thus, the students who attended represented all four classes. Graduation, while open to members of all classes, is not held during the normal school year. Due to the scheduling of graduation a week after finals, the majority of the students who return for the event are graduating seniors and juniors who are friends of those graduating. By this time in the year, nearly all of the seniors are of age to consume alcohol and a majority of the juniors have also reached their 21st birthday. Therefore, as can be seen in the behavior of students in past years of tent parties, the participating individuals are of a higher maturity level and have reached the age where they are more responsible for their alcohol consumption.

My suggestion for President Adams is to study events at past tent parties. If there have been significant numbers of incidents like those that he witnessed as a result of university alcohol provision at the Gala, then I will deem his ban of alcohol at tent party warranted. However, I suspect that this will not be the case and will continue to view the logic behind his decision with skepticism.

Beyond the flaws in the logic of this decision, I do not believe that it is fair to punish the seniors, who are of age to consume alcoholic beverages, because of the actions of some underage students who used poor judgment. As Adams said in his letter, we are "in many ways the symbolic leaders and representatives" of the student body-we should be treated as such. As seniors, we have been responsible enough either to find a job and begin a promising career or to convince a graduate school that we are worthy of continuing our education. I think by now we can decide upon our limits. Additionally, if friends (regardless of class) are becoming abusive in their consumption, I believe we are responsible enough to stop them. The last thing anyone wants to do on the eve of their graduation is accompany a friend to the hospital.

Finally, I'd like to end on a practical note. Memories from graduation and tent party will form our final impressions of Bucknell University. The decision to make tent party dry has upset many members of the class of 1997. As Bucknell tries to improve its endowment status, more and more contributions from alumni are going to be requested. I predict that leaving the seniors with a sour impression of Bucknell due to a simple event like tent party could seriously jeopardize their future contributions to the University. While I do not wish for this to come across as a threat, I do believe that final impressions have long term effects and I want to be sure that this had been considered in their decision.

I hope that President Adams investigates the behavior of students at past parties and events of similar size (rather than a magnanimous event like the Gala) to define a basis for revising Bucknell's alcohol policy.

COZETTE CUPPETT '97

Student Government Representative attacks the logic behind Adams' decree

TO THE EDITOR:

This is an open letter to President Adams:

I take the unusual step of writing this open letter to share with you a significant concern and to explain a strong reservation I (and many others) have regarding a decision that has been made.

In my nearly three and a half years as a Bucknell student, I have been positively impressed by many things. This is a place of numerous and special strengths, including a wonderfully able administration, and staff, of which you are now in many ways the symbolic and official leader.

Of course, I have also observed a few things during the past three and a half years that cause me concern. One of these is the increasing presence of the "in loco parentis" philosophy guiding the administration. Bucknell may or may not be different from other very good schools in this respect, and all of us recognize that the abuse of this system is a national, not just local problem. But these facts should not cause us to be any less concerned about our own circumstances.

My interest in this matter was aroused recently following an open letter from you, the President and head of the administration, regarding the alcohol policy on this campus. The decision was in almost for me, for the worse, upon realizing that there were serious problems within the logic and the consistency of the argument behind the decision. The decision states that the problems with the underage drinking at the Gala are likely to be repeated at the Commencement tent party and the tailgate at Homecoming because the system for identification of legal drinkers is the same.

That logic caused me to reflect upon the University's occasional practice of serving alcohol at open events designed primarily for students, or where there are large numbers of students present. I realized upon reflection, and in the light of the alarming case I have just mentioned, that this decision is seriously flawed and poses a serious risk to the ability of the University to produce mature adults able to handle normal social situations. As I think you know alcohol will be encountered by many Bucknell graduates (over the age of 21) in many post-college encounters, and they will need to have the maturity to deal appropriately with those encounters.

So I began to talk with people about my concern, beginning with members of the student government, and other students, I then reached out to the faculty and some staff. I spoke at length with these people. In all of these meetings I tried to explain my concerns and to listen carefully to the responses they evoked.

One of the things I learned through these conversations is that students, particularly seniors, are strongly attached to those few primarily student events_the Tent Party at Commencement and the tailgate at Homecoming—where the University is both the host of the event or the primary provider of alcohol, or both. I understand the attachment, and I share it. I also understand the Administration's desire to eliminate these events and the illegal and sometimes abusive drinking that does occur at these events on a significant scale. I appreciated the candor of the faculty and staff when questioned about this. The answers I received did not lessen my concern; indeed, they increased it.

I have spent a good deal of time since the end of the President's letter thinking about this matter (to the detriment of my schoolwork). Reluctantly but surely, I have come to the conclusion that the decision to stop serving alcoholic beverages at the University-sponsored and hosted events designed primarily for students or where there are a very large numbers of students present is wrong and should be rescinded. The risk of illegal consumption, while a problem and a liability, poses no more of a significant risk than many other activities sponsored by the University. The fact that other aspects of the alcohol policy, including those governing student organizations, remain unchanged is a horrible double standard and unintentionally hypocritical at best.

I depart from my parody at his point to drive my point home.

You used the incidents at the Gala, a once-every-century-and-a-half event, as a reasonable assumption of what would happen at this year's tent party or next year's Homecoming tailgate. Instead of using incidents from a once in a lifetime event you should have used data from last year's tent party, or this year's Homecoming tailgate. The fact that you didn't use these two events to support your decision can only leave us assuming that these two events don't have any data to support your theory. Therefore, your decision is based upon faulty data from the start. You use the inadequacies of the student identification system to supply you with further cause for your decision. Wrong move again. Why not use a different method of identification (such as differently colored stamps that don't wash off easily) to distinguish between legal drinkers and underage people? Furthermore, the fact that underage drinkers were able to get into the alcohol tent goes to show that there are better places to put your alcohol other than in an easily accessible (from the outside) tent.

You then discuss the liability such underage drinking imposes. What about the liability from people who sue Bucknell because they slip on the unsanded and unsalted sidewalks during the first three weeks of the spring semester? What about the significant number of (varsity, club, and intramural) sports injuries on Bucknell's fields? Most people know that the owner of the property is legally liable for injuries received on their property, or caused by institutional negligence. The conclusion one must draw from the obvious lack of concern about these two other examples means that the University must significantly insure itself from such liabilities, or else these areas should be addressed by another open letter. Ban sports? Sand the sidewalks? Interesting, but I digress. Therefore, if there is good insurance coverage than the liability from the more minor issue of underage consumption is probably covered. In the words of one of my professors, approximately, "if the University wants to avoid liability then it should dismiss all of its students and fire all of its employees and not let anybody onto the campus."

Lastly, your decision bans alcohol at events open to students where the University is the host, or provider. What about fraternity parties? What about the art gallery's "open" events? What about the Bucknell Campaign Kickoff Dinner (many students attended)? The parties are on University grounds, and/or policed by the University. Therefore, isn't the University the "host" or liable in these cases? As for the other two cases, it is clear whom the host and provider of alcohol is, the University. So, your decision to include tional double standard. I am horrified to think that it would be anything other than unintentional, so I won't even go there.

I cannot and do not expect that you will agree with my logic or argument in this letter. All the same, I do hope that you will try to understand my reasons for publicly countering your decisions, which in no way suggests a lack of confidence or trust in you as an individual or as President. I also hope that you will ultimately conclude, with me (as well as many faculty members and the majority of students), that the arguments I have made for the rescinding of your decision is the best one, and that it will be necessary to assist the student in dealing with alcohol in a mature setting such as Commencement.

I have assured the senior class officers that I, as a student and one of their constituents, will support their efforts to have you rescind your decision. As a Class of 1997 Representative, I promise that I will also fight for the presence of alcohol at certain University events, in order to provide more opportunities for legal drinkers to learn how to deal with alcohol in a more mature setting. You will be hearing more about this as Commencement planning goes forward, of that I have no doubt.

Let me close by saying that I would welcome the opportunity to have direct discussions about these decisions, in venues that you might suggest. I hope that you will write me with your thoughts or share them through email (tandersn@bucknell.edu).

Thank you for taking the time to read this letter and for your understanding.

Poet-in-residence is more than what meets the eye

BY ERIN MCCALLISTER
Bucknellian Staff Writer

"What I'd like to give students is the chance to see how poetry has worked in my life and how it is a vehicle, a mechanism, for them to use through the rest of their lives," said Michael Weaver, who views his position as this semester's poet-in-residence as an opportunity to influence students, as well as a time to work on his own poetry.

With his work published in numerous anthologies, journals, nationally read newspapers and his own books, including a new collection of poems due out in 1998, Weaver, a professor at Rutgers, brings his varied writing and teaching experiences to campus.

"I'm looking forward to the opportunity to meet people very much interested in poetry," he said. By teaching creative writing, giving poetry readings, visiting area high schols and teaching at the annual Bucknell Seminar for Younger Poets, he may find that opportunity.

Much of Weaver's poetry is free verse, although he also works with traditional forms of meter and rhyme. The fourth section of his latest book *Timber and Prayer* employs these traditional forms. Some of the recurrent themes in his poetry include love, family and the great migration of African American people from the south to the north.

Weaver was familiar with the University even before Cynthia Hogue, director of the University's Stadler Center for Poetry, invited him to be the poet-in-residence. When he was choosing colleges, he considered attending the University, since at the time he was an engineering major.

Although Weaver has always loved to write, it was not until 1969, his sophomore year at the University of Maryland, that he began to seriously consider writing. His composition teacher John Wood, a graduate student at the time, encouraged Weaver to pursue writing.

Along the way, there have been a number of encouraging friends including the poet E. Ethhelerbert Miller, who is the director of the Afro-American Research Center at Howard University. There are also a number of contemporary poets Weaver cites as his favorites: Jay Wright, Ed Hirsh and Gwendolyn Brooks, who in 1950 was the first black writer to win the Pulitzer Prize. He also admires the work of his colleagues at Rutgers University. Two of his colleagues, Toi Derricotte and Cornelius Eady, founded a creative writing summer program which is a retreat for African American poets with which Weaver is also involved. Called Cave Canen, the retreat is a four week stay in a castle that was actually a monastery on the Hudson River in Poughkeepsie, New York.

Michael Weaver lends his talent to our campus in his poetry readings. His combination of African-American history, love and family is heard throughout his works, creating inspiration in aspiring poets, teachers and playwrights alike.

In addition to writing poetic verse, Weaver also writes plays. Two of his plays, *Rosa* and *Elvira and the Lost Prince* have been produced professionally. *Talisman,* the most recent of his plays, and *Candy Lips & Hallelujah* are now in their second draft in a playwright development program in Philadelphia. Weaver sends drafts to his dramateur in Philadelphia, who makes suggestions for the next draft. Plans for a stage draft, where actors read with script in hand, are also set.

Weaver's greatest play-writing experience occurred at the ETA theatre on the south side of Chicago. The performance exceeded his expectations, and he described it as "magical." Weaver described the 25-year-old theatre as "a really enlightening, energizing, vital center."

One of the theatre's projects is of great importance to Weaver is the Playwright Discovery/Development Initiative. This functioning project's purpose is to draw "African- American playwrights and to help African- American people affirm their tradition and to transcend the condition of their lives. It is the only play development project in black theatre that has this kind of viability," said Weaver.

As one of the project's administrators, Weaver is part of a panel that selects three or four plays for production at ETA each year.

Weaver comes to Lewisburg with a B.A. from Regents College of the Universitry of the State of New York, an M.A. in creative writing from Brown University, and teaching experience from New York University, Seton Hall Law School and Brooklyn College.

After serving in many roles, Weaver has chosen to focus on poetry this spring. He will give two poetry readings during this semester. The first will be at 8 p.m. Sunday in Bucknell Hall, and the second will be at 8 p.m. on April 20 in Bucknell Hall.

> *"What I'd like to give students is the chance to see how poetry has worked in my life and how it is a vehicle, a mechanism, for them to use throughout the rest of their lives."*
> *—Michael Weaver*

Activities Council plans events to target student interests

BY ROBIN REITZES AND MARNI HARRIMAN
Bucknellian Staff Writers

The Bucknell Activities Council has traditionally introduced and organized various events for the Bucknell community. This semester, the organization is concentrating on meeting more of the students' interests.

Mark Armatrucola, president of BAC, says that the council is diversifying its programs in order to get more students involved. He suggested that "he best way to influence what entertainment and programs are brought to campus is to join the organization." BAC has over 50 active members.

Audrey Jaeger, assistant director of Student Activities and the advisor to BAC, supports "more purposeful programming" in response to various themes that Bucknell promotes.

One way BAC will be more active in promoting student organization's themes is through co-sponsoring events with other student clubs. For example, during Women's Week, movies that portray positive images of women such as *Fried Green Tomatoes, Thelma and Louise,* and *Courage Under Fire,* will be shown.

During Asian American Week, BAC will be co-sponsoring a theatrical performance with SAAB that will concentrate on audience participation. They will also be working with the Flag & B and LGB office as sponsors of the a cappella concert starring *The Flirtations.*

> *"We got a lot of feedback from the students. They felt that Come and Play Weekend was for kids and not for students, so BAC decided to aim Come and Play Weekend solely for the students."*
> *—Mark Armatrucola,*
> *president of BAC*

BAC is also currently working on coordinating an all-campus service day that will involve a collaboration with other campus organizations including BSG, RHA, Intrafraternity Council and the Panhellenic Council.

In reaction to the students' interest in comedians, BAC has decided to promote comedy in a different light. Jaeger described the new routines as "upbeat," where these comedians offer original styles in addition to their humor. To meet students' interest, BAC has already organized a sketch comedy troupe, an African American comedian and a lesbian comedienne for this semester.

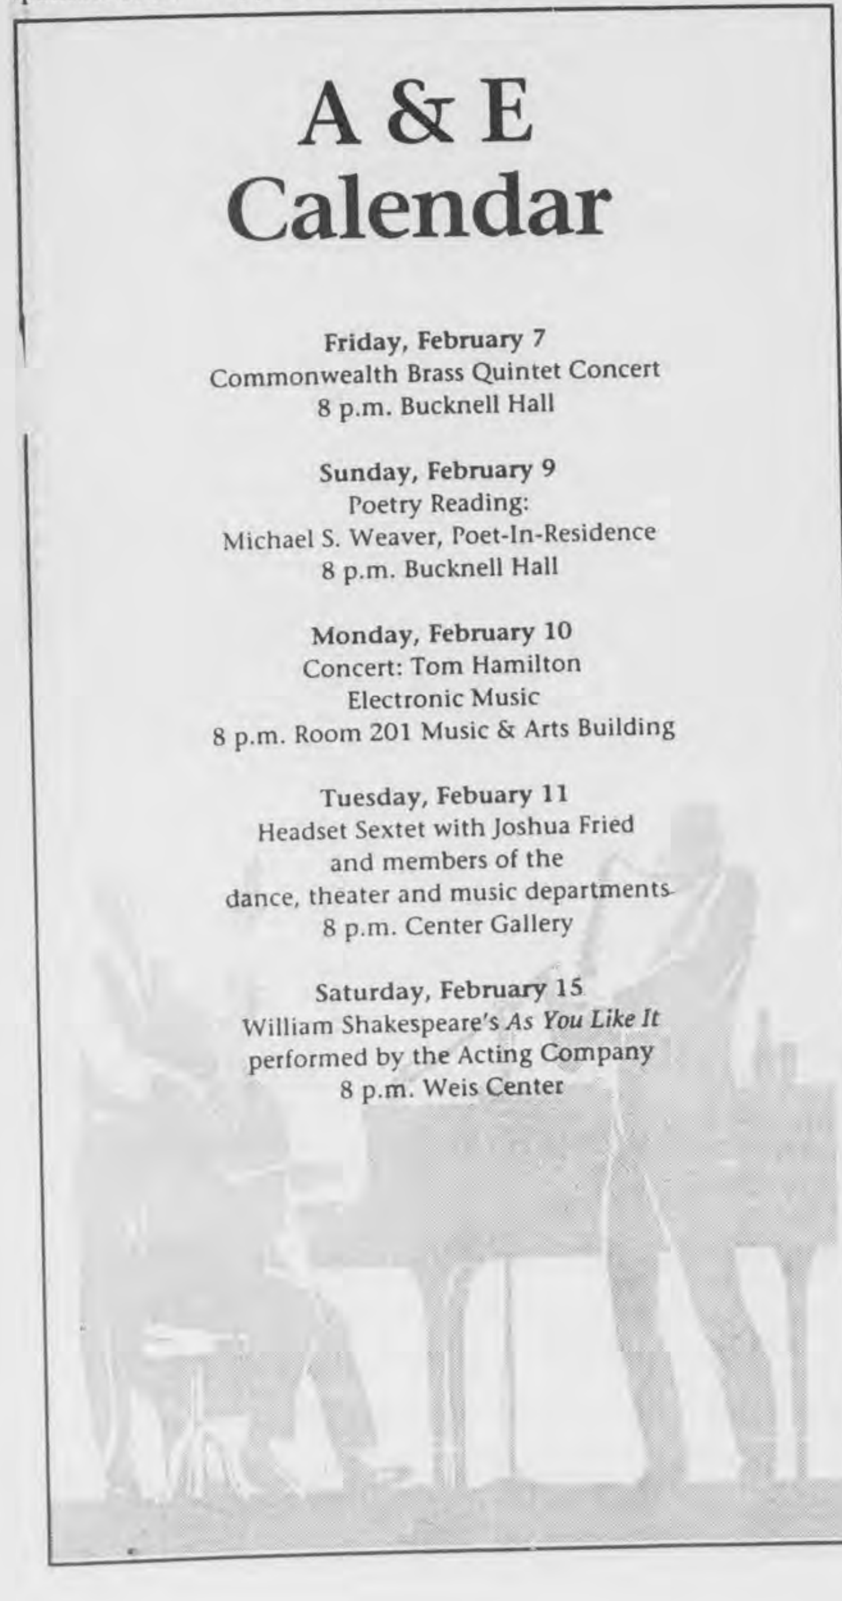
In addition to new and original events, there will be more in-house entertainment which has proven to be successful in the past. In response to the popular event of BAC Bingo that many students attended last semester, BAC Bingo will be offered again this semester.

Come and Play Weekend is another popular BAC event. It traditionally has been on the same weekend as Siblings Weekend but this year it will be an entirely separate event.

"We got a lot of feedback from the students. They felt that Come and Play Weekend was for kids and not for students, so BAC decided to aim Come and Play Weekend solely for the students. We will bring in more entertainment and comedians, but still keep the games and the moonbounce," Amatrucola said.

BAC was responsible for bringing the popular band, the Badlees, to the University at the beginning of the school year. To promote diverse types of music, they have booked a reggae band to play outdoors in the Freshmen Quad this spring.

The goal of BAC is to respond to the students' interests and offer activities and entertainment that the campus will attend and enjoy. BAC relies heavily on student feedback. There are many ways to voice opinions about BAC events and future plans. BAC has a Web page and an email address at Feedback@bucknell.edu. In addition, one has the opportunity at all BAC events to fill out a comment card.



A & E Calendar

Friday, February 7
Commonwealth Brass Quintet Concert
8 p.m. Bucknell Hall

Sunday, February 9
Poetry Reading:
Michael S. Weaver, Poet-In-Residence
8 p.m. Bucknell Hall

Monday, February 10
Concert: Tom Hamilton
Electronic Music
8 p.m. Room 201 Music & Arts Building

Tuesday, Febuary 11

and members of the
dance, theater and music departments
8 p.m. Center Gallery

Saturday, February 15
William Shakespeare's *As You Like It*
performed by the Acting Company
8 p.m. Weis Center

Movie Reviews: Star Wars and Metro

BY CHRIS NICHOLS

Star Wars (Special Edition) *****
Starring Harrison Ford, Carrie Fisher, and Mark Hamill

Absolutely amazing. If you haven't had a chance to ever see this film in the theaters, you really need to. If you have seen it in the theaters, you better go again. There are some amazing special effects. There were a lot of things questionable about George Lucas remaking one of the greatest movies of all times. Most, if not all, of those complaints have been pushed aside in the amazement over the re-release. The film is able to keep intact the things that made it so spectacular in the first place, while allowing Lucas to finally fix a few things that had always bothered him. I've had the chance to follow along in the past months and see some of the footage as it's been released in raw form. What was seen in the final product was absolutely incredible. Considering these remakes will be a test run for the planned prequels in the Star Wars saga, there are great things coming to the theaters probably in 1999. I urge everyone to see this movie on the big screen. This was my first time seeing it in this format (I was able to see *Empire* and *Jedi* when I was younger, but missed the first), and I was astounded. Many of the subtle little jokes and dialogue don't totally click when seen on a small screen. When you're in a theater in front of such a huge screen, your attention is demanded in such a way that you see much more of what is going on. The experience is irreplaceable. What I'm so impressed with is the way in which the movie is still so entertaining despite its 20 year old age. This past weekend it broke the previous record for movies in January with sales around $36 million. Interestingly enough, this placed its total earnings near $360 million, unseating Jurassic park from the second highest grossing film of all times seat. To capture the no.1 place, Star Wars must simply gross more that $399 million, the record held by E.T. Given this weekend's sales and the market for these movies, it should have no problem ascending to the No.1 place. It deserves it.

Metro ***
Starring Eddie Murphy

With his recent comeback with last year's very successful *Nutty Professor* remake, all eyes are on Eddie Murphy to see if his luck (or more specifically, his acting) can hold out. I'll have to admit that I went into this movie with an open mind but a little pessimistic. Seeing Murphy play a cop again was a relief, since it's one of the roles that he's managed to do the best. Placing him in the role of a hostage negotiator was another really wise choice since there are very few things in this world as funny as watching Murphy argue and communicate with people in very sticky situations. Originally I felt like this movie was billed as a comedy, but it seems to have since been remarketed as an action movie. In reality, it is a lot of different things. As would be expected, there are some very funny scenes. Likewise, there is some excellent action which is particularly well directed. On top of that there is really some quality dramatic acting on the part of Murphy and his supporting actors/actresses. By far one of the most clever elements is the suspense. Murphy gets on the bad side of one mean criminal and nothing is safe once this has happened. The directing gives audience members the impression that they know exactly what is about to happen and does something totally different happens. One second you're biting your nails worried about something, and it turns out not to happen or to happen totally differently than expected. It's a very cleaver scheme, and it's pulled off very effectively several times in the movie. I predict this movie will do pretty well. Murphy still has a strong body of fans out there, and the few he lost during his bad years will start to come back if he keeps up acting on this caliber.

Acting Company's "As You Like It" to bring Shakespeare to light

A unique touring company makes the immortal words of Shakespeare come to life in its production of this classic play

DAVID CARPENTER
Bucknellian Staff Writer

Returning for its third time to the Weis Center for the Performing Arts, The Acting Company, will bring William Shakespeare's, "As You Like it," for a one night performance.

"With its national and international reputation for vibrant live theatre, this exciting touring troupe returns to the Weis Center with yet another of its outstanding Shakespearean production," said Bill Boswell, director of cultural events.

The Acting Company is a unique, professional touring company that uses the talents of some of the best young American actors to practice their art in a, "repertory of classic plays and new works," says an excerpt from the program of the upcoming show.

Because of the need to schedule events in the Weis Center one to two years in advance, touring shows are sometimes not even cast when the Weis Center is creating its tentative schedule. Boswell commented, "The problem with booking so far in advance is that you never know the quality. The Acting Company has always been consistent with giving high quality productions with any of its shows."

Formed in 1972 by Margot Harley, late John Houseman, and the first graduating class of the Drama Division at Julliard, The Acting Company not only performs classic plays, but contemporary also. In its lineup this year, along with "As You Like It," is "The Glass Menagerie" by Tennessee William's, but Boswell decided to host the Shakespeare piece for a particular reason. "When you see Shakespeare onstage, it makes a difference to the students. Somewhere in the school a professor is teaching a work during the year. We bring in The Acting Company,so the students can hear the words they are studying. They see the living play."

"Hearing Shakespeare from a trained actor, who says the words as the character can make a difference from just reading the words on a page." Mr. Boswell goes on to comment that along with such famous starts as Kevin Kline and Patti LuPone, the University's own alumnus, Edward Herrmann, has performed in the troupe.

Newly arrived in the Forest of Arden, Celia/Aliena, Touchstone, and Rosalind/Ganymede ponder what is to become of their futures, in a scene from their performance of "As You Like It," The Acting Company's newest production. This one night show will be performed in the Weis Center Sat., Feb. 15

Each Acting Company performance is built around the idea that the company will come into a theatre, construct the set, have the show and be gone that night. The members travel with all of the gear and are on their way to the next location directly after each performance.

Venues such as the Weis Center are sent the light plot of the show in advance. The University's light technicians will set up the lights in advance, in preparation for the set's arrival oon February 15, the day of the show.

One final note about the show: Boswell commented, "What schools like Bucknell, that are off the beaten path, get is a chance to see these types of shows which have the next generation of superstars. Some of the people in the show, will most likely be major stars someday. In ten years you can pick up the program from this show and say, 'I saw this person before anyone knew who they were.' "

The play will be presented on February 15 at 8 p.m. Tickets are on sale in the Weis Center Box Office Tuesday through Friday of this week and next week from 11:30 am to 5:30 pm. Tickets are $15 and reservations can be made by calling 717-524-1000.

Headset Sesxet puts on its headphones in an imitation of sounds

Performers speak an "alien language," as they try to convey words they are hearing for the first time

BY SHETAL MITHANI
Bucknellian Staff Writer

Headset Sextet doesn't fit the normal conception of performance which often includes rehearsals, memorization, blocking, set designs,... the list goes on. According to composer Joshua Fried, "[This performance] is not about interpretation. I want my performers to convey the words and sounds as they hear it." Along with *Headset Sextet,* a solo act, *Travelogue,* will be performed.

Headset Sextet employs a technique in which the performer puts on a pair of headphones and tries to imitate what he or she hears. The result is the creation of something like an alien language, as it is nearly impossible to imitate every word or sound exactly without memorizing it.

The catch to this performance is that each performer will not hear the piece he/she is going to perform until he/she performs it.

Composer Joshua Fried has put both the actors and audience in the same position-- both will not know what will happen during the show until the performers vocalize the sounds they hear through their headphones.

"In a sense, the audience and the performers are in the same boat, because neither of them really know what's going to happen. However, at the same time the audience and performers are both in their separate boxes because the performers are focused on conveying what they hear and the audience is focused on the result of the performer's work," Fried said.

Fried composed both *Headset Sextet* and *Travelogue* using processed electronic sounds and voices.

"People think that these pieces are random, but I worked over the pieces so it is very precise, although it may seem random." Fried said.

The performers in *Headset Sextet* are Megan Charles'96, Gary Grant, professor of theater, Angela Kahn'00, Susan Minsavage'97, Taryn Ritacco'98 and Federica Ronchini'00. John Danneker'98 will perform *Travelogue.*

Kyle Gann, music critic for *The Village Voice,* said of Fried's performances in his article, "Singing in Tongues," that "some composers astonish musicians by brilliantly defining new compositional problems. Others zap the audience with displays of raw emotion. For a composer to do both at the same time is a rare epiphany, a sign that he or she has received gifts from two of the gods at once."

Headset Sextet will begin at 8p.m. on Tuesday in the Center Gallery

Poet-in-residence is more than what meets the eye

BY ERIN MCCALLISTER
Bucknellian Staff Writer

"What I'd like to give students is the chance to see how poetry has worked in my life and how it is a vehicle, a mechanism, for them to use through the rest of their lives," said Michael Weaver, who views his position as this semester's poet-in-residence as an opportunity to influence students, as well as a time to work on his own poetry.

With his work published in numerous anthologies, journals, nationally read newspapers and his own books, including a new collection of poems due out in 1998, Weaver, a professor at Rutgers, brings his varied writing and teaching experiences to campus.

"I'm looking forward to the opportunity to meet people very much interested in poetry," he said. By teaching creative writing, giving poetry readings, visiting area high schols and teaching at the annual Bucknell Seminar for Younger Poets, he may find that opportunity.

Much of Weaver's poetry is free verse, although he also works with traditional forms of meter and rhyme. The fourth section of his latest book *Timber and Prayer* employs these traditional forms. Some of the recurrent themes in his poetry include love, family and the great migration of African American people from the south to the north.

Weaver was familiar with the University even before Cynthia Hogue, director of the University's Stadler Center for Poetry, invited him to be the poet-in-residence. When he was choosing colleges, he considered attending the University, since at the time he was an engineering major.

Although Weaver has always loved to write, it was not until 1969, his sophomore year at the University of Maryland, that he began to seriously consider writing. His composition teacher John Wood, a graduate student at the time, encouraged Weaver to pursue writing.

Michael Weaver lends his talent to our campus in his poetry readings. His combination of African-American history, love and family is heard throughout his works, creating inspiration in aspiring poets, teachers and playwrights alike.

Along the way, there have been a number of encouraging friends including the poet E. Ethhelerbert Miller, who is the director of the Afro-American Research Center at Howard University. There are also a number of contemporary poets Weaver cites as his favorites: Jay Wright, Ed Hirsh and Gwendolyn Brooks, who in 1950 was the first black writer to win the Pulitzer Prize. He also admires the work of his colleagues at Rutgers University. Two of his colleagues, Toi Derricotte and Cornelius Eady, founded a creative writing summer program which is a retreat for African American poets with which Weaver is also involved. Called Cave Canen, the retreat is a four week stay in a castle that was actually a monastery on the Hudson River in Poughkeepsie, New York.

In addition to writing poetic verse, Weaver also writes plays. Two of his plays, *Rosa* and *Elvira and the Lost Prince* have been produced professionally. *Talisman*, the most recent of his plays, and *Candy Lips & Hallelujah* are now in their second draft in a playwright development program in Philadelphia. Weaver sends drafts to his dramateur in Philadelphia, who makes suggestions for the next draft. Plans for a stage draft, where actors read with script in hand, are also set.

Weaver's greatest play-writing experience occurred at the ETA theatre on the south side of Chicago. The performance exceeded his expectations, and he described it as "magical." Weaver described the 25-year-old theatre as "a really enlightening, energizing, vital center."

One of the theatre's projects is of great importance to Weaver is the Playwright Discovery/Development Initiative. This functioning project's purpose is to draw "African- American playwrights and to help African- American people affirm their tradition and to transcend the condition of their lives. It is the only play development project in black theatre that has this kind of viability," said Weaver.

As one of the project's administrators, Weaver is part of a panel that selects three or four plays for production at ETA each year.

Weaver comes to Lewisburg with a B.A. from Regents College of the Universitry of the State of New York, an M.A. in creative writing from Brown University, and teaching experience from New York University, Seton Hall Law School and Brooklyn College.

After serving in many roles, Weaver has chosen to focus on poetry this spring. He will give two poetry readings during this semester. The first will be at 8 p.m. Sunday in Bucknell Hall, and the second will be at 8 p.m. on April 20 in Bucknell Hall.

> *"What I'd like to give students is the chance to see how poetry has worked in my life and how it is a vehicle, a mechanism, for them to use throughout the rest of their lives."*

Activities Council plans events to target student interests

BY ROBIN REITZES AND MARNI HARRIMAN
Bucknellian Staff Writers

The Bucknell Activities Council has traditionally introduced and organized various events for the Bucknell community. This semester, the organization is concentrating on meeting more of the students' interests.

Mark Armatrucola, president of BAC, says that the council is diversifying its programs in order to get more students involved. He suggested that "he best way to influence what entertainment and programs are brought to campus is to join the organization." BAC has over 50 active members.

Audrey Jaeger, assistant director of Student Activities and the advisor to BAC, supports "more purposeful programming" in response to various themes that Bucknell promotes.

One way BAC will be more active in promoting student organization's themes is through co-sponsoring events with other student clubs. For example, during Women's Week, movies that portray positive images of women such as *Fried Green Tomatoes, Thelma and Louise*, and *Courage Under Fire*, will be shown.

During Asian American Week, BAC will be co-sponsoring a theatrical performance with SAAB that will concentrate on audience participation. They will also be working with the Flag & B and LGB office as sponsors of the a cappella concert starring *The Flirtations*.

BAC is also currently working on coordinating an all-campus service day that will involve a collaboration with other campus organizations including BSG, RHA, Intrafraternity Council and the Panhellenic Council.

In reaction to the students' interest in comedians, BAC has decided to promote comedy in a different light. Jaeger described the new routines as "upbeat," where these comedians offer original styles in addition to their humor. To meet students' interest, BAC has already organized a sketch comedy troupe, an African American comedian and a lesbian comedienne for this semester.

In addition to new and original events, there will be more in-house entertainment which has proven to be successful in the past. In response to the popular event of BAC Bingo that many students attended last semester, BAC Bingo will be offered again this semester.

Come and Play Weekend is another popular BAC event. It traditionally has been on the same weekend as Siblings Weekend but this year it will be an entirely separate event.

"We got a lot of feedback from the students. They felt that Come and Play Weekend was for kids and not for students, so BAC decided to aim Come and Play Weekend solely for the students. We will bring in more entertainment and comedians, but still keep the games and the moonbounce," Amatrucola said.

BAC was responsible for bringing the popular band, the Badlees, to the University at the beginning of the school year. To promote diverse types of music, they have booked a reggae band to play outdoors in the Freshmen Quad this spring.

The goal of BAC is to respond to the students' interests and offer activities and entertainment that the campus will attend and enjoy. BAC relies heavily on student feedback. There are many ways to voice opinions about BAC events and future plans. BAC has a Web page and an email address at Feedback@bucknell.edu. In addition, one has the opportunity at all BAC events to fill out a comment card.

> *"We got a lot of feedback from the students. They felt that Come and Play Weekend was for kids and not for students, so BAC decided to aim Come and Play Weekend solely for the students."*

Movie Reviews: Star Wars and Metro

BY CHRIS NICHOLS

Star Wars (Special Edition) *****
Starring Harrison Ford, Carrie Fisher, and Mark Hamill

Absolutely amazing. If you haven't had a chance to ever see this film in the theaters, you really need to. If you have seen it in the theaters, you better go again. There are some amazing special effects. There were a lot of things questionable about George Lucas remaking one of the greatest movies of all times. Most, if not all, of those complaints have been pushed aside in the amazement over the re-release. The film is able to keep intact the things that made it so spectacular in the first place, while allowing Lucas to finally fix a few things that had always bothered him. I've had the chance to follow along in the past months and see some of the footage as it's been released in raw form. What was seen in the final product was absolutely incredible. Considering these remakes will be a test run for the planned prequels in the Star Wars saga, there are great things coming to the theaters probably in 1999. I urge everyone to see this movie on the big screen. This was my first time seeing it in this format (I was able to see *Empire* and *Jedi* when I was younger, but missed the first), and I was astounded. Many of the subtle little jokes and dialogue don't totally click when seen on a small screen. When you're in a theater in front of such a huge screen, your attention is demanded in such a way that you see much more of what is going on. The experience is irreplaceable. What I'm so impressed with is the way in which the movie is still so entertaining despite its 20 year old age. This past weekend it broke the previous record for movies in January with sales around $36 million. Interestingly enough, this placed its total earnings near $360 million, unseating Jurassic park from the second highest grossing film of all times seat. To capture the no.1 place, Star Wars must simply gross more that $399 million, the record held by E.T. Given this weekend's sales and the market for these movies, it should have no problem ascending to the No.1 place. It deserves it.

Metro ***
Starring Eddie Murphy

With his recent comeback with last year's very successful *Nutty Professor* remake, all eyes are on Eddie Murphy to see if his luck (or more specifically, his acting) can hold out. I'll have to admit that I went into this movie with an open mind but a little pessimistic. Seeing Murphy play a cop again was a relief, since it's one of the roles that he's managed to do the best. Placing him in the role of a hostage negotiator was another really wise choice since there are very few things in this world as funny as watching Murphy argue and communicate with people in very sticky situations. Originally I felt like this movie was billed as a comedy, but it seems to have since been remarketed as an action movie. In reality, it is a lot of different things. As would be expected, there are some very funny scenes. Likewise, there is some excellent action which is particularly well directed. On top of that there is really some quality dramatic acting on the part of Murphy and his supporting actors/actresses. By far one of the most clever elements is the suspense. Murphy gets on the bad side of one mean criminal and nothing is safe once this has happened. The directing gives audience members the impression that they know exactly what is about to happen and does something totally different happens. One second you're biting your nails worried about something, and it turns out not to happen or to happen totally differently than expected. It's a very cleaver scheme, and it's pulled off very effectively several times in the movie. I predict this movie will do pretty well. Murphy still has a strong body of fans out there, and the few he lost during his bad years will start to come back if he keeps up acting on this caliber.

Acting Company's "As You Like It" to bring Shakespeare to light

A unique touring company makes the immortal words of Shakespeare come to life in its production of this classic play

DAVID CARPENTER
Bucknellian Staff Writer

Returning for its third time to the Weis Center for the Performing Arts, The Acting Company, will bring William Shakespeare's, "As You Like it," for a one night performance.

"With its national and international reputation for vibrant live theatre, this exciting touring troupe returns to the Weis Center with yet another of its outstanding Shakespearean production," said Bill Boswell, director of cultural events.

The Acting Company is a unique, professional touring company that uses the talents of some of the best young American actors to practice their art in a, "repertory of classic plays and new works," says an excerpt from the program of the upcoming show.

Because of the need to schedule events in the Weis Center one to two years in advance, touring shows are sometimes not even cast when the Weis Center is creating its tentative schedule. Boswell commented, "The problem with booking so far in advance is that you never know the quality. The Acting Company has always been consistent with giving high quality productions with any of its shows."

Formed in 1972 by Margot Harley, late John Houseman, and the first graduating class of the Drama Division at Julliard, The Acting Company not only performs classic plays, but contemporary also. In its lineup this year, along with "As You Like It," is "The Glass Menagerie" by Tennessee William's, but Boswell decided to host the Shakespeare piece for a particular reason. "When you see Shakespeare onstage, it makes a difference to the students. Somewhere in the school a professor is teaching a work during the year. We bring in The Acting Company,so the students can hear the words they are studying. They see the living play."

"Hearing Shakespeare from a trained actor, who says the words as the character can make a difference from just reading the words on a page." Mr. Boswell goes on to comment that along with such famous starts as Kevin Kline and Patti LuPone, the University's own alumnus, Edward Herrmann, has performed in the troupe.

Newly arrived in the Forest of Arden, Celia/Aliena, Touchstone, and Rosalind/Ganymede ponder what is to become of their futures, in a scene from their performance of "As You Like It," The Acting Company's newest production. This one night show will be performed in the Weis Center Sat., Feb. 15

Each Acting Company performance is built around the idea that the company will come into a theatre, construct the set, have the show and be gone that night. The members travel with all of the gear and are on their way to the next location directly after each performance.

Venues such as the Weis Center are sent the light plot of the show in advance. The University's light technicians will set up the lights in advance, in preparation for the set's arrival oon February 15, the day of the show.

One final note about the show: Boswell commented, "What schools like Bucknell, that are off the beaten path, get is a chance to see these types of shows which have the next generation of superstars. Some of the people in the show, will most likely be major stars someday. In ten years you can pick up the program from this show and say, 'I saw this person before anyone knew who they were.' "

The play will be presented on February 15 at 8 p.m. Tickets are on sale in the Weis Center Box Office Tuesday through Friday of this week and next week from 11:30 am to 5:30 pm. Tickets are $15 and reservations can be made by calling 717-524-1000.

Headset Sesxet puts on its headphones in an imitation of sounds

Performers speak an "alien language," as they try to convey words they are hearing for the first time

BY SHETAL MITHANI
Bucknellian Staff Writer

Headset Sextet doesn't fit the normal conception of performance which often includes rehearsals, memorization, blocking, set designs,... the list goes on. According to composer Joshua Fried, "[This performance] is not about interpretation. I want my performers to convey the words and sounds as they hear it." Along with *Headset Sextet*, a solo act, *Travelogue*, will be performed.

Headset Sextet employs a technique in which the performer puts on a pair of headphones and tries to imitate what he or she hears. The result is the creation of something like an alien language, as it is nearly impossible to imitate every word or sound exactly without memorizing it.

The catch to this performance is that each performer will not hear the piece he/she is going to perform until he/she performs it.

Composer Joshua Fried has put both the actors and audience in the same position-- both will not know what will happen during the show until the performers vocalize the sounds they hear through their headphones.

"In a sense, the audience and the performers are in the same boat, because neither of them really know what's going to happen. However, at the same time the audience and performers are both in their separate boxes because the performers are focused on conveying what they hear and the audience is focused on the result of the performer's work," Fried said.

Fried composed both *Headset Sextet* and *Travelogue* using processed electronic sounds and voices.

"People think that these pieces are random, but I worked over the pieces so it is very precise, although it may seem random." Fried said.

The performers in *Headset Sextet* are Megan Charles'96, Gary Grant, professor of theater, Angela Kahn'00, Susan Minsavage'97, Taryn Ritacco'98 and Federica Ronchini'00. John Danneker'98 will perform *Travelogue*.

Kyle Gann, music critic for *The Village Voice*, said of Fried's performances in his article, "Singing in Tongues," that "some composers astonish musicians by brilliantly defining new compositional problems. Others zap the audience with displays of raw emotion. For a composer to do both at the same time is a rare epiphany, a sign that he or she has received gifts from two of the gods at once."

Headset Sextet will begin at 8p.m. on Tuesday in the Center Gallery

SCIENCE AND TECHNOLOGY

First-generation students may experience more stress

BY ERIC AFFSPRUNG
STAFF PSYCHOLOGIST
PSYCHOLOGICAL SERVICES

Many students experience the Bucknell Community as a place where everyone is alike. They may assume that every student is from an upper-income family or that they all make A's. In other words, there are a number of stereotypical assumptions that students often make about their peers. Often these assumptions are accompanied by a strong desire to fit in, a sense that one must try to be like everyone else in order to belong.

Although there is some truth to the idea that our community is relatively homogenous, the University is more diverse than one might think. For example, there are many students who come to the University with very little money, and it is certainly not the case that everyone is a "straight A" student.

One group, often overlooked, is comprised of students we might call "first generation" college students. These are students whose parents did not graduate from college; their experience is often unique in some important ways.

First generation students often feel that their parents and other important people at home simply cannot understand what it is like to be in college. The difficulty of this experience may be compounded by a sense of having no role models at home for how one operates in college.

First generation students may also feel that their peers at the University cannot understand the world from which they come. These students may have strongly ambivalent feelings about home and college, sometimes experiencing the temptation to pull away from their parents' world or the temptation to leave school and return to a life with which they feel more familiar.

The struggle common to virtually all undergraduates, that of finding a stable sense of self as a young adult, may be all the more difficult due to the considerable emotional strain of living in two worlds.

Despite doing well in high school and being accepted at the University, first generation students may also feel they do not really belong in college. Although they may love their parents very much, they may also sometimes feel that their parents, their upbringing, their hometown or neighborhood are somehow inadequate. Some students react in the opposite manner, dismissing everyone else as being "stuck-up" or spoiled.

Unfortunately, these students' sense of isolation is sometimes increased because they do not share their thoughts and feelings about their college experience with others.

This stress may be compounded by the fear that one's parents, former teachers, etc. are watching to see if the student will succeed. This feeling can be a tremendous burden especially if the student feels that his or her parents have sacrificed greatly to send their child to college.

If you are a first generation college student there are several important points to keep in mind. First of all, you are not alone. There are a good number of students whose parents did not graduate from college.

Second, you are not here by mistake; you are not an impostor. If you were accepted it was because the University wanted you here and you have what it takes to succeed.

Third, your feelings and your experience are important. Consider talking with family and friends about how it feels to be "the first."

Jonah Half–The Bucknellian

Eric Affsprung, Ph.D., is a staff psychologist at Psychological Services and will be writing a series of articles for the S&T section.

Finally, remember that students who come from different backgrounds have much to share with and offer to their peers and professors in the way of unique life experiences, values, and perspectives.

Everyone has something important to contribute to the the University community.

Zero tolerance law will not affect Public Safety procedures

BY ALISON DUGAN
Bucknellian Staff Writer

Although the Zero Tolerance Law calls for stricter regulations of underage drinking, this law will have little impact here on campus. Most students under the age of 21 realize that drinking has serious consequences, but what they may not know is that the restrictions of these laws have just gotten stricter.

The Zero Tolerance Law makes it illegal for anyone under 21 to drive with small amounts of alcohol in their system. The provisions of Pennsylvania's new law state that a Blood Alcohol Content of only .02 percent is needed to be charged with Driving Under the Influence.

The Zero Tolerance law reduced the BAC level required to charge minors with DUI from .10 percent to .02 percent.

A BAC of .02 percent can be reached within an hour with just one 12 ounce beer, one five ounce glass of wine, or one shot of 80 proof liquor by both males and females.

If charged with DUI, persons can receive up to one year driver's license suspension, a drug and alcohol evaluation, orders to participate in highway safety programs, as well as costly fines and restitution.

Public safety officials first evaluate an individual suspected of underage drinking by assessing their behavior, according to Vincent DeCerchio, Director of Public Safety. If there is an indication that these persons are under the influence of alcohol or if there is possession of alcohol in a vehicle, these cases are then turned over to the police.

Because the administration does not require public safety to conduct sobriety tests, this law "will have no bearing on the way we do business," said Gerald Commerford, associate dean of students.

He advised, however, that students "should be aware" of this law when consuming alcohol off campus.

Bob Thomas, coordinator of drug and alcohol programs, hopes that this law will help to "assist and identify anyone with an alcohol problem earlier."

In effect, Thomas sees this law helping individuals recognize their drinking problems earlier and to seek counseling before their problem gets more serious.

Caught in the Web: student home pages

BY CURRAN FILER
Bucknellian Staff Columnist

Ever since I got my computer working, I spend hours every week browsing the World Wide Web. If there is one thing that is cool about the Web, it's that there is a ton of information out there. A lot of it is stupid, but not all of it. Listed are some of the sites that I found interesting and are currently bookmarked on my computer. To find these pages I use Netscape 3.0 Gold, so if you aren't using it then you might not get the same results. I suggest this browser, it's neat.

Category #3: Bucknell Student Homepages

Lo-Phat Comics Homepage
`http://www.bucknell.edu/~bussler`

This is Lo-Phat Comics, official webpage of Mark Bussler '98. Bussler is the only person on campus consistently bringing actual controversy to the masses. His "Captain Bucknell" comic strip, which can be seen weekly in *The Bucknellian*, is highly charged with controversial campus topics. See some of his other projects on his homepage too.

Michael Arrison's Bucknell Homepage
`http://www.bucknell.edu/~arrison`

This is Mike Arrison's '00 web page. Mike's a first-year student who's into computer games (Doom-esque ones) and music. The neat thing about his page is his MIDI music. Listen to his original compositions if your browser/computer can handle it. Also, somebody write him and ask him why he put a link to the *library* on his homepage.

Clifford E. Barneman's Homepage
`http://www.bucknell.edu/~barneman`

Clifford E. Barneman's GR homepage is pretty plain except for a picture of him in the audience of the Late Show with David Letterman. He's the one in the hat (Is that a Bucknell hat?) right behind the woman getting a ham from Dave.

Brian Bronson's Homepage
`http://www.bucknell.edu/~bronson`

Brian Bronson's '99 homepage has apparently become the unofficial Rolling Rock homepage at Bucknell. Here you can find out a little about the mystery of the "33," the history of the Latrobe Brewing Company, and even something about Rolling Rock's ingredients.

A Page in the Book of Life
`http://www.bucknell.edu/~buletza`

I don't normally put a page in my article just because of neat links but Jared Buletza's '99 homepage has some of the best links I've seen on any personal homepage, let alone a Bucknell homepage. Be sure to check out the "Entertainment" section, and find a Ukrainian bride in the "Love" section.

w.w.'s Homepage
`http://www.bucknell.edu/~tuengu`

This is Wu Kuen Wei's '97 homepage, mostly related to Asian entertainment topics. From the "China" section you can go to links where you can learn about Chinese art or history. Also check out the Japan and Hong Kong entertainment sections.

Ryoga's Homepage
`http://www.bucknell.edu/~dajohnsn`

Duane Johnson's '98 homepage is the best place I can think of to start learning about Anime, Japan's version of animated movies. Anime is a much more advanced art form than its American counterpart, and unlike Disney films, Japanese animation movies don't suck. If you happen to like "Ranma 1/2" (Koko wa doko?) you are in luck, because Duane likes it too and is Bucknell's Ranma expert. If you like the Dragonball films/TV shows check out ~**jgreene**, or ~**jegreene**.

Bucknell athletes tops in academia

BY E.J. CRAWFORD
Bucknellian Staff Writer

The Patriot League recently announced its Fall Sports Academic Honor Roll to "recognize those student-athletes who are earning a varsity letter in an intercollegiate sport, and at the same time, are excelling in the classroom."

Of the 389 honorees Bucknell had 95 named, the most of any Patriot League school. In addition, Bucknell also had 10 players named to both All-Academic and All-Athletic teams, the second-most of any Patriot League school (Colgate had 13).

The 10 Bucknell students are Megan Bossuyt '97—Field Hockey, George Howanitz '97—Football, Dani Johnston '97—Field Hockey, Matt Kodak '99—Cross Country, Blakely Lauria '00—tennis, Mariusz Misiec '98—Football, Jaime Paldin '98—Field Hockey, Emily Pomeroy '99—Volleyball, Julie Sweitzer '99—Cross Country, and Brendon Whitworth '98—soccer.

To qualify for the Honor Roll, an athlete must receive a varsity letter in his/her respective sport, while amassing a minimum grade-point average of a 3.2.

Said athletic director Rick Hartzell, "The success of our athletes is truly a reflection of the whole campus... as well as the young people we have here at Bucknell. Honestly, I'm as proud of [the number of Academic Honor Roll athletes] as I am of any victory Bucknell's ever had."

Bison stampede Red Raiders

Gilliard '99 returns from injury, sparks Bucknell to a win over Colgate, Adonal Foyle

BY BRETT TOMLINSON
Bucknellian Staff Writer

One look at the box score for Saturday's men's basketball win over Colgate would tend to indicate that the game was a clash of titans. In reality, it was the role players who made the difference as the Bison picked up an 82-78 win in front of a sellout crowd at Davis Gym to stay alive in the regular season Patriot League title race.

As expected, Colgate superstar Adonal Foyle showed flashes of the dominant athletic style which has pro scouts on the edge of their seats, pouring in 20 second half points. Bucknell's backcourt tandem of Gordon Mboya '97 and J.R. Holden '98 countered with aggressive drives and sharp outside shooting to combine for 38 points.

Down the stretch, however, a pair of young Bison players stepped up into the spotlight to preserve the victory.

Martin Gilliard '99 had a modest 10 points, but his timing was impeccable and his defense extraordinary. With 2:39 remaining in the game, Gilliard put an end to a Colgate run with a turnaround jumper that put Bucknell ahead by five.

The sophomore then calmly sank two free throws with less than a minute remaining, extending the lead to seven, and sealed the game with a fast break lay-up with ten seconds left.

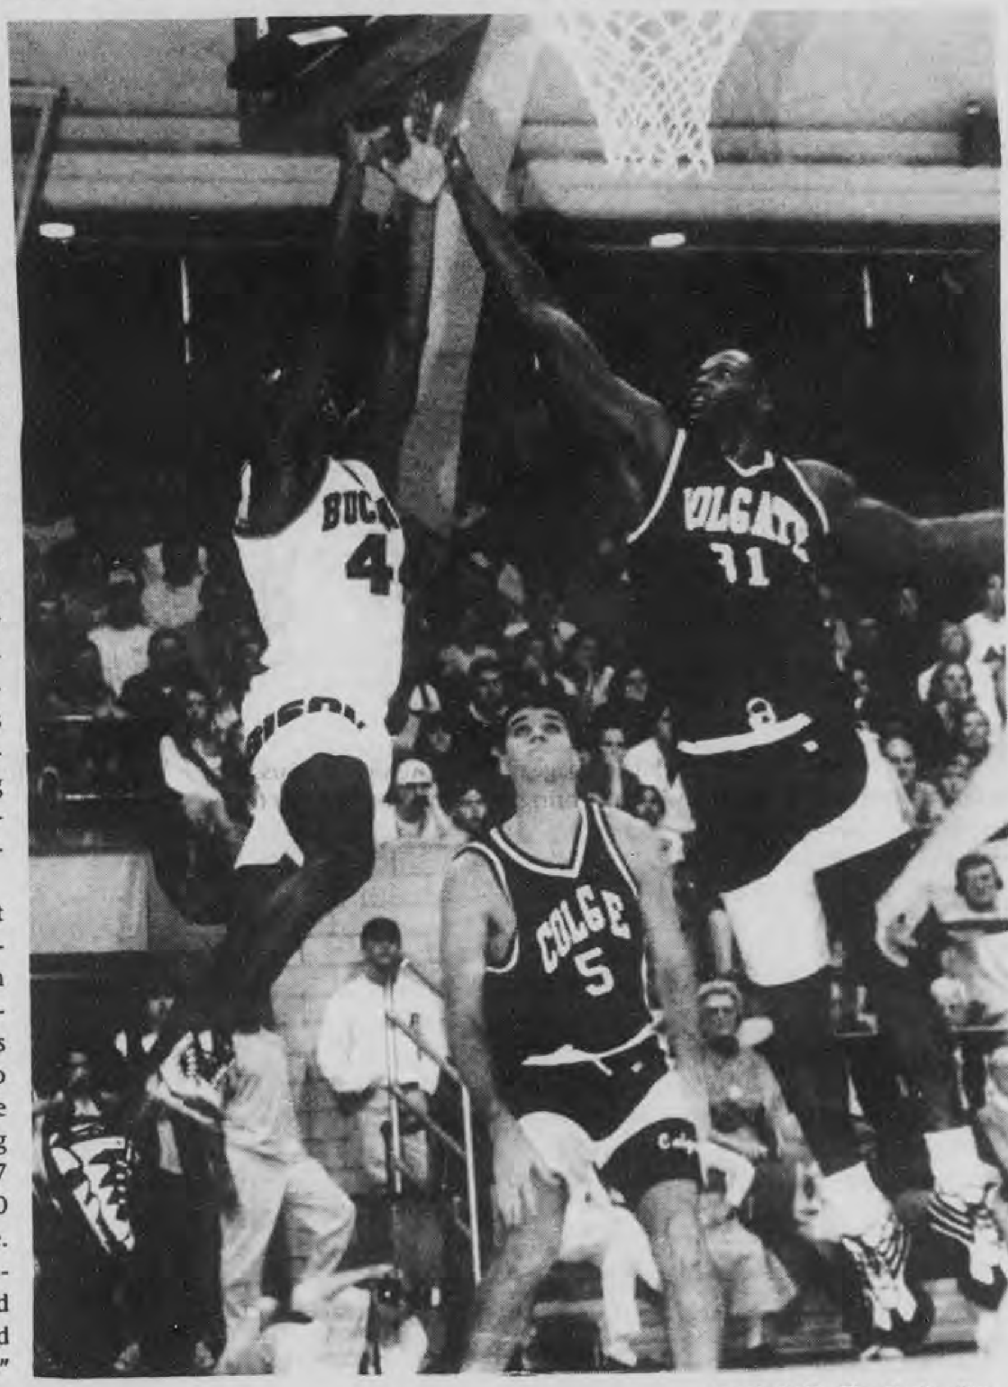
"Martin is a tenacious defender," Holden said. "He may not score a lot for us, but he does intangibles. He screens, he hits big baskets when we need them and he plays great defense."

Defensively, Gilliard shut down Colgate guard Seth Schaeffer in the second half, holding him to only three points after a red hot 13 point first half.

Gilliard's performance had Bison coach Pat Flannery wondering if Wednesday night's loss to Army would have played out differently if Gilliard had not been sick with a stomach flu.

"The other night after the [Army] game, I said 'I wonder how much Martin Gilliard's intensity defensively brings to this table' and I think tonight there was a big answer, because he really does give us a different dimension."

The Bison also got a late lift from an unlikely hero, freshman forward Dyrika Cameron. Cameron was sent into the game to try to outmuscle Foyle inside after Bison big men Tom Welch '97 and Dan Bowen '00 got into foul trouble. Both Welch and Bowen eventually fouled out, which put added pressure on the 6' 6" freshman, but he responded, limiting Foyle's production in Colgate's comeback attempt.



Jonah Half—The Bucknellian

Martin Gilliard '99 and the Bucknell men's basketball team took it to Adonal Foyle (#31) and the Colgate Red Raiders in handing Colgate its first conference loss of the season. The win pushes Bucknell's record to 5-2 in the league.

The Bison were fairly successful scoring inside, but they failed to get Foyle in foul trouble. Meanwhile, the star center was drawing a plethora of Bucknell fouls on the offensive end of the court.

"It seems like it's a lot different with [Foyle]. [Referees] give Colgate too much respect, but on a positive note... Dy Cameron forced [Foyle] off the block, which was what was important," Flannery said.

"I don't think they were protecting [Foyle]," Mboya commented. "I just wish that at times they would ease up on the calls because he's so big... that we have to be tough with him."

According to Mboya, the Bison players were anxious to take the ball in strong against Foyle. "I don't want him to think that he intimidates us in there," Mboya said.

With the win, Bucknell improves to 5-2 in the league, which keeps their hopes alive for a possible top seed at the league tournament. Colgate (9-12, 6-2) lost to Navy (14-8, 6-2) to put Bucknell into a three-way tie for first place.

In Monday's action, 13 different players scored for the Bison as they cruised to an easy 86-49 victory over Division III Western Maryland. J.R. Holden led the Bison with 12 points, and Willie Callahan and Martin Gilliard each added 11.

Fast Fact:
In last night's loss to Navy, Colgate's Adonal Foyle broke the NCAA record for career shot blocks formerly held by Alonzo Mourning.

Women's sports day commemorated

BY E.J. CRAWFORD
Bucknellian Staff Writer

Today Bucknell celebrates National Girls and Women in Sports Day. This day, which was declared by the United States Congress, was commemorated with a celebration by the Department of Athletics and Recreation along with the Women's Resource Center. In addition to the commemoration, there was a prize given to the first member of the Bucknell community to answer correctly all the questions of a trivia quiz on women in athletics.

The commemoration was held in The Cave of the Langone Center from noon to 2 p.m.

Also, author/athlete Mariah Burton Nelson is coming to the LC Forum Thursday for her presentation of *Pretty Powerful: Images of Women Athletes in the Media* at 7:30 p.m.

Coverage of both events will appear in next week's issue.

Flannery to stay despite rumors

BY E.J. CRAWFORD
Bucknellian Staff Writer

Men's basketball head coach Pat Flannery has no intention of leaving Bucknell, despite reports from both *The Harrisburg Report* and *The Daily Item*. The two papers reported that Flannery might possibly leave as a result of the Patriot League allowing full athletic scholarships for men's and women's basketball.

However, in an interview with Flannery, he said, "[Bucknell] is a great place to coach, and I have no intention of leaving."

According to Flannery, during his interview with *The Harrisburg Report* he was speaking about "a purely hypothetical situation," and he was speaking in terms of the entire league giving scholarships, with Bucknell being left to play in an "unlevel playing field."

As to the reality of Flannery departing, he reiterated the fact that he has no present intention of leaving, but "if all the rules change I would re-evaluate along with President Adams and [director of athletics] Rick Hartzell."

Added Hartzell, "If everyone [else] in the league decides to give scholarships, we all have to consider our professional options."

Flannery was very much opposed to Holy Cross being granted scholarships, saying that "Holy Cross did something they felt they had to do," but that the "ramifications for their institution could be catastrophic."

As for Bucknell, Flannery said he loves to coach at an institution where "the rules are pure," and clearly stated that he is not going anywhere soon. "I enjoy being a coach here," he said.

Flash in the Pan

The Coaching Carousel: In a peculiar turn of events, the New England Patriots have named the 49ers defensive coordinator Pete Carroll as their new head coach, while Bill Parcells will become a consultant to the Jets for a year, and then will take over as head coach and head of football operations. During Parcells' absence, Bill Belichick will take over the duties of running the Jets.

Carroll was formerly the Jets head coach for one season, going 6-10 before being succeeded by Rich Kotite. Carroll fills the vacancy left by Parcells, who will assume the duties, as of Feb. 1, 1998, of Jets head coach and head of football operations. As for the 1997 season, Belichick, the former Browns head coach and last year's assistant head coach of the Patriots, will assume full control of the Jets before giving way to Parcells next year—at that time, Belichick will become the Jets assistant head coach. In addition, as part of the contract, Belichick will assume full control of the Jets whenever Parcells decides to step down.

Another wrinkle in this complex plan is that the Patriots will receive compensation from the Jets for hiring Parcells in such a capacity, but the deal will not involve the Jets no. 1 pick—got it!

AFC Wins Pro Bowl: Cary Blanchard's field goal gave the AFC a 26-23 victory over the NFC in the 1997 Pro Bowl in Honolulu, Hawaii. John Kasay had a chance to win the game earlier but badly shanked a 37 yard field goal. The NFC was 3-8 on field goal chances for the day. Jaguars quarterback Mark Brunell was named the game's MVP after throwing for two touchdowns and over 200 yards in leading the comeback victory.

Super Mario: Tuesday night Mario Lemieux etched his already famous name further into the NHL history book, as he became only the fifth player in NHL history to record 600 career goals and assists. Lemieux, last year's NHL MVP, scored his 600th goal of his career on an empty-netter in a 6-4 victory over the Vancouver Canucks. Lemieux joins an exclusive club that includes Wayne Gretzky, Gordie Howe, Phil Esposito, and Marcel Dionne.

Nearing 1,000: Detroit Red Wings coach Scotty Bowman, already the winningest coach in NHL history, is only one victory away from reaching the unparalleled 1,000 victory plateau. He had a chance to break 1,000 wins on Tuesday night, but the Red Wings tied the St. Louis Blues 1-1.

Worming His Way Back In: The NBA, led by commissioner David Stern, have cleared the Chicago Bulls' Dennis Rodman to rejoin the team. Rodman was suspended indefinitely after kicking an on-court cameraman during a game. The incident was one of many recent problems the NBA has had with Rodman.

College Basketball Top 10

1. Kansas 22-0

SCIENCE AND TECHNOLOGY

First-generation students may experience more stress

By Eric Affsprung
Staff Psychologist
Psychological Services

Many students experience the Bucknell Community as a place where everyone is alike. They may assume that every student is from an upper-income family or that they all make A's. In other words, there are a number of stereotypical assumptions that students often make about their peers. Often these assumptions are accompanied by a strong desire to fit in, a sense that one must try to be like everyone else in order to belong.

Although there is some truth to the idea that our community is relatively homogenous, the University is more diverse than one might think. For example, there are many students who come to the University with very little money, and it is certainly not the case that everyone is a "straight A" student.

One group, often overlooked, is comprised of students we might call "first generation" college students. These are students whose parents did not graduate from college; their experience is often unique in some important ways.

First generation students often feel that their parents and other important people at home simply cannot understand what it is like to be in college. The difficulty of this experience may be compounded by a sense of having no role models at home for how one operates in college.

First generation students may also feel that their peers at the University cannot understand the world from which they come. These students may have strongly ambivalent feelings about home and college, sometimes experiencing the temptation to pull away from their parents' world or the temptation to leave school and return to a life with which they feel more familiar.

The struggle common to virtually all undergraduates, that of finding a stable sense of self as a young adult, may be all the more difficult due to the considerable emotional strain of living in two worlds.

Despite doing well in high school and being accepted at the University, first generation students may also feel they do not really belong in college. Although they may love their parents very much, they may also sometimes feel that their parents, their upbringing, their hometown or neighborhood are somehow inadequate. Some students react in the opposite manner, dismissing everyone else as being "stuck-up" or spoiled.

Unfortunately, these students' sense of isolation is sometimes increased because they do not share their thoughts and feelings about their college experience with others.

This stress may be compounded by the fear that one's parents, former teachers, etc. are watching to see if the student will succeed. This feeling can be a tremendous burden especially if the student feels that his or her parents have sacrificed greatly to send their child to college.

If you are a first generation college student there are several important points to keep in mind. First of all, you are not alone. There are a good number of students whose parents did not graduate from college.

Second, you are not here by mistake; you are not an impostor. If you were accepted it was because the University wanted you here and you have what it takes to succeed.

Third, your feelings and your experience are important. Consider talking with family and friends about how it feels to be "the first."

Jonah Half–The Bucknellian

Eric Affsprung, Ph.D., is a staff psychologist at Psychological Services and will be writing a series of articles for the S&T section.

Finally, remember that students who come from different backgrounds have much to share with and offer to their peers and professors in the way of unique life experiences, values, and perspectives.

Everyone has something important to contribute to the the University community.

Zero tolerance law will not affect Public Safety procedures

By Alison Dugan
Bucknellian Staff Writer

Although the Zero Tolerance Law calls for stricter regulations of underage drinking, this law will have little impact here on campus. Most students under the age of 21 realize that drinking has serious consequences, but what they may not know is that the restrictions of these laws have just gotten stricter.

The Zero Tolerance Law makes it illegal for anyone under 21 to drive with small amounts of alcohol in their system. The provisions of Pennsylvania's new law state that a Blood Alcohol Content of only .02 percent is needed to be charged with Driving Under the Influence.

The Zero Tolerance law reduced the BAC level required to charge minors with DUI from .10 percent to .02 percent.

A BAC of .02 percent can be reached within an hour with just one 12 ounce beer, one five ounce glass of wine, or one shot of 80 proof liquor by both males and females.

If charged with DUI, persons can receive up to one year driver's license suspension, a drug and alcohol evaluation, orders to participate in highway safety programs, as well as costly fines and restitution.

Public safety officials first evaluate an individual suspected of underage drinking by assessing their behavior, according to Vincent DeCerchio, Director of Public Safety. If there is an indication that these persons are under the influence of alcohol or if there is possession of alcohol in a vehicle, these cases are then turned over to the police.

Because the administration does not require public safety to conduct sobriety tests, this law "will have no bearing on the way we do business," said Gerald Commerford, associate dean of students.

He advised, however, that students "should be aware" of this law when consuming alcohol off campus.

Bob Thomas, coordinator of drug and alcohol programs, hopes that this law will help to "assist and identify anyone with an alcohol problem earlier."

In effect, Thomas sees this law helping individuals recognize their drinking problems earlier and to seek counseling before their problem gets more serious.

Bucknell athletes tops in academia

By E.J. Crawford
Bucknellian Staff Writer

The Patriot League recently announced its Fall Sports Academic Honor Roll to "recognize those student-athletes who are earning a varsity letter in an intercollegiate sport, and at the same time, are excelling in the classroom."

Of the 389 honorees Bucknell had 95 named, the most of any Patriot League school. In addition, Bucknell also had 10 players named to both All-Academic and All-Athletic teams, the second-most of any Patriot League school (Colgate had 13).

The 10 Bucknell students are Megan Bossuyt '97—Field Hockey, George Howanitz '97—Football, Dani Johnston '97—Field Hockey, Matt Kodak '99—Cross Country, Blakely Lauria '00—tennis, Mariusz Misiec '98—Football, Jaime Paldin '98—Field Hockey, Emily Pomeroy '99—Volleyball, Julie Sweitzer '99—Cross Country, and Brendon Whitworth '98—soccer.

To qualify for the Honor Roll, an athlete must receive a varsity letter in his/her respective sport, while amassing a minimum grade-point average of a 3.2.

Said athletic director Rick Hartzell, "The success of our athletes is truly a reflection of the whole campus... as well as the young people we have here at Bucknell. Honestly, I'm as proud of [the number of Academic Honor Roll athletes] as I am of any victory Bucknell's ever had."

Bison stampede Red Raiders

Gilliard '99 returns from injury, sparks Bucknell to a win over Colgate, Adonal Foyle

By Brett Tomlinson
Bucknellian Staff Writer

One look at the box score for Saturday's men's basketball win over Colgate would tend to indicate that the game was a clash of titans. In reality, it was the role players who made the difference as the Bison picked up an 82-78 win in front of a sellout crowd at Davis Gym to stay alive in the regular season Patriot League title race.

As expected, Colgate superstar Adonal Foyle showed flashes of the dominant athletic style which has pro scouts on the edge of their seats, pouring in 20 second half points. Bucknell's backcourt tandem of Gordon Mboya '97 and J.R. Holden '98 countered with aggressive drives and sharp outside shooting to combine for 38 points.

Down the stretch, however, a pair of young Bison players stepped up into the spotlight to preserve the victory.

Martin Gilliard '99 had a modest 10 points, but his timing was impeccable and his defense extraordinary. With 2:39 remaining in the game, Gilliard put an end to a Colgate run with a turnaround jumper that put Bucknell ahead by five.

The sophomore then calmly sank two free throws with less than a minute remaining, extending the lead to seven, and sealed the game with a fast break lay-up with ten seconds left.

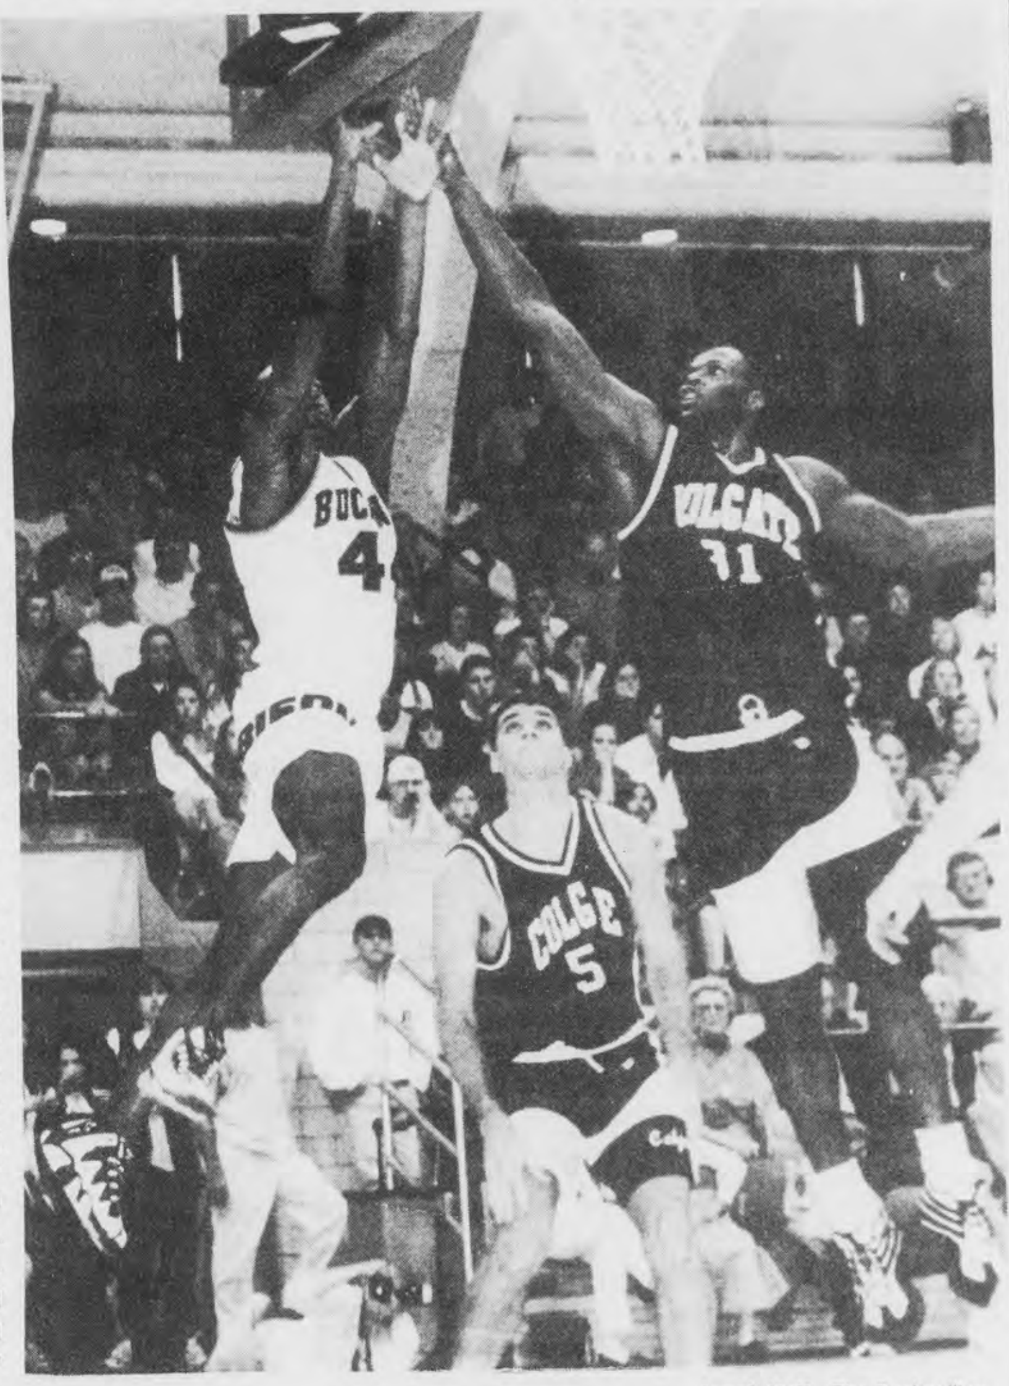
"Martin is a tenacious defender," Holden said. "He may not score a lot for us, but he does intangibles. He screens, he hits big baskets when we need them and he plays great defense."

Defensively, Gilliard shut down Colgate guard Seth Schaeffer in the second half, holding him to only three points after a red hot 13 point first half.

Gilliard's performance had Bison coach Pat Flannery wondering if Wednesday night's loss to Army would have played out differently if Gilliard had not been sick with a stomach flu.

"The other night after the [Army] game, I said 'I wonder how much Martin Gilliard's intensity defensively brings to this table' and I think tonight there was a big answer, because he really does give us a different dimension."

The Bison also got a late lift from an unlikely hero, freshman forward Dyrika Cameron. Cameron was sent into the game to try to outmuscle Foyle inside after Bison big men Tom Welch '97 and Dan Bowen '00 got into foul trouble. Both Welch and Bowen eventually fouled out, which put added pressure on the 6' 6" freshman, but he responded, limiting Foyle's production in Colgate's comeback attempt.



Jonah Half—The Bucknellian

Martin Gilliard '99 and the Bucknell men's basketball team took it to Adonal Foyle (#31) and the Colgate Red Raiders in handing Colgate its first conference loss of the season. The win pushes Bucknell's record to 5-2 in the league.

The Bison were fairly successful scoring inside, but they failed to get Foyle in foul trouble. Meanwhile, the star center was drawing a plethora of Bucknell fouls on the offensive end of the court.

"It seems like it's a lot different with [Foyle]. [Referees] give Colgate too much respect, but on a positive note... Dy Cameron forced [Foyle] off the block, which was what was important," Flannery said.

"I don't think they were protecting [Foyle]," Mboya commented. "I just wish that at times they would ease up on the calls because he's so big... that we have to be tough with him."

According to Mboya, the Bison players were anxious to take the ball in strong against Foyle. "I don't want him to think that he intimidates us in there," Mboya said.

With the win, Bucknell improves to 5-2 in the league, which keeps their hopes alive for a possible top seed at the league tournament. Colgate (9-12, 6-2) lost to Navy (14-8, 6-2) to put Bucknell into a three-way tie for first place.

In Monday's action, 13 different players scored for the Bison as they cruised to an easy 86-49 victory over Division III Western Maryland. J.R. Holden led the Bison with 12 points, and Willie Callahan and Martin Gilliard each added 11.

Fast Fact:
In last night's loss to Navy, Colgate's Adonal Foyle broke the NCAA record for career shot blocks formerly held by Alonzo Mourning.

Women's sports day commemorated

By E.J. Crawford
Bucknellian Staff Writer

Today Bucknell celebrates National Girls and Women in Sports Day. This day, which was declared by the United States Congress, was commemorated with a celebration by the Department of Athletics and Recreation along with the Women's Resource Center. In addition to the commemoration, there was a prize given to the first member of the Bucknell community to answer correctly all the questions of a trivia quiz on women in athletics.

The commemoration was held in The Cave of the Langone Center from noon to 2 p.m.

Also, author/athlete Mariah Burton Nelson is coming to the LC Forum Thursday for her presentation of *Pretty Powerful: Images of Women Athletes in the Media* at 7:30 p.m.

Coverage of both events will appear in next week's issue.

Flannery to stay despite rumors

By E.J. Crawford
Bucknellian Staff Writer

Men's basketball head coach Pat Flannery has no intention of leaving Bucknell, despite reports from both *The Harrisburg Report* and *The Daily Item*. The two papers reported that Flannery might possibly leave as a result of the Patriot League allowing full athletic scholarships for men's and women's basketball.

However, in an interview with Flannery, he said, "[Bucknell] is a great place to coach, and I have no intention of leaving."

According to Flannery, during his interview with *The Harrisburg Report* he was speaking about "a purely hypothetical situation," and he was speaking in terms of the entire league giving scholarships, with Bucknell being left to play in an "unlevel playing field."

As to the reality of Flannery departing, he reiterated the fact that he has no present intention of leaving, but "if all the rules change I would re-evaluate along with President Adams and [director of athletics] Rick Hartzell."

Added Hartzell, "If everyone [else] in the league decides to give scholarships, we all have to consider our professional options."

Flannery was very much opposed to Holy Cross being granted scholarships, saying that "Holy Cross did something they felt they had to do," but that the "ramifications for their institution could be catastrophic."

As for Bucknell, Flannery said he loves to coach at an institution where "the rules are pure," and clearly stated that he is not going anywhere soon. "I enjoy being a coach here," he said.

Flash in the Pan

The Coaching Carousel: In a peculiar turn of events, the New England Patriots have named the 49ers defensive coordinator Pete Carroll as their new head coach, while Bill Parcells will become a consultant to the Jets for a year, and then will take over as head coach and head of football operations. During Parcells' absence, Bill Belichick will take over the duties of running the Jets.

Carroll was formerly the Jets head coach for one season, going 6-10 before being succeeded by Rich Kotite. Carroll fills the vacancy left by Parcells, who will assume the duties, as of Feb. 1, 1998, of Jets head coach and head of football operations. As for the 1997 season, Belichick, the former Browns head coach and last year's assistant head coach of the Patriots, will assume full control of the Jets before giving way to Parcells next year—at that time, Belichick will become the Jets assistant head coach. In addition, as part of the contract, Belichick will assume full control of the Jets whenever Parcells decides to step down.

Another wrinkle in this complex plan is that the Patriots will receive compensation from the Jets for hiring Parcells in such a capacity, but the deal will not involve the Jets no. 1 pick—got it!

AFC Wins Pro Bowl: Cary Blanchard's field goal gave the AFC a 26-23 victory over the NFC in the 1997 Pro Bowl in Honolulu, Hawaii. John Kasay had a chance to win the game earlier but badly shanked a 37 yard field goal. The NFC was 3-8 on field goal chances for the day. Jaguars quarterback Mark Brunell was named the game's MVP after throwing for two touchdowns and over 200 yards in leading the comeback victory.

Super Mario: Tuesday night Mario Lemieux etched his already famous name further into the NHL history book, as he became only the fifth player in NHL history to record 600 career goals and assists. Lemieux, last year's NHL MVP, scored his 600th goal of his career on an empty-netter in a 6-4 victory over the Vancouver Canucks. Lemieux joins an exclusive club that includes Wayne Gretzky, Gordie Howe, Phil Esposito, and Marcel Dionne.

Nearing 1,000: Detroit Red Wings coach Scotty Bowman, already the winningest coach in NHL history, is only one victory away from reaching the unparalleled 1,000 victory plateau. He had a chance to break 1,000 wins on Tuesday night, but the Red Wings tied the St. Louis Blues 1-1.

Worming His Way Back In: The NBA, led by commissioner David Stern, have cleared the Chicago Bulls' Dennis Rodman to rejoin the team. Rodman was suspended indefinitely after kicking an on-court cameraman during a game. The incident was one of many recent problems the NBA has had with Rodman.

College Basketball Top 10

1. Kansas 22-0
2. Wake Forest 18-1
3. Kentucky 20-2
4. Minnesota 19-2
5. Louisville 18-3

CAMPUS CALENDAR

Friday, February 7

Noon—Hillel lunch, 241C Langone Center

4 p.m.—Psychology Colloquy Series, "Young Children's Understanding of Ownership and Property rights," Eileen England from Ursinus College, Gallery Theatre, Langone Center.

4 p.m.—Biology Seminar Series, "Energy Metabolism of Callitrichids: Consequences of Small Body Size," Michael Power from The National Zoological Park in Washington D.C., Rooke Chemistry Auditorium

6:30 p.m.—Outing Club general meeting, Forum, Langone Center

7:30 p.m.—JV Men's Basketball vs. Fork Union Military Academy

8 p.m.—Commonwealth Brass Quintet Concert, Bucknell Hall

9 p.m.—Acoustic jazz musician, K.J. James, Bison

Saturday, February 8

8:30 a.m.—JV Men's Basketball vs. Fork Union Military Academy

11 a.m.—Track and Field, Bucknell Winter Classic

Noon-3 p.m.—Chinese New Year celebration, sponsored by the Chinese Culture Association, 7th Street Cafe

1 p.m.—Women's Basketball vs. Lafayette

3:15 p.m.—Men's Basketball vs. Lafayette

7:30 p.m.—Wrestling vs. Buffalo

9 p.m.—Acoustic guitar performance, Chris Williams, Terrace Room

10:30 p.m.— Movie, *The Truth About Cats and Dogs*, sponsored by BAC, $1 admission, Forum, Langone Center

11:45 p.m.-1:45 a.m.—Ice Skating at Sunbury Ice Rink, sponsored by CALVIN&HOBBES, meet by 11:20 p.m., downhill Langone Center

Sunday, February 9

6:30 p.m.—Ayid celebration, sponsored by Middle East Association, Arches Lounge

8 p.m.—Poetry reading, Michael S. Weaver, poet-in-residence, Bucknell Hall

Monday, February 10

8 p.m.—Electronic music concert, Tom Hamilton, 201 Music & Arts Building

Tuesday, Febuary 11

11 a.m.-12:30 p.m.— Study abroad program with Mary Laver, representative from The Philadelphia Center of Great Lakes Colleges Association, to discuss a semester interning while earning full credit, 217 Langone Center

11 a.m.-1 p.m.—Original hand-drawn Valentine's Day cards, Paul Kleba, sponsered by BAC, Lagone Center Mall

Noon—Physics coffee talk, "How to Make an Anti-Matter Beam," given by David Schoepf, 263 Olin Science

Noon—Religious Studies Forum series, "Journeys of Urban Native Americans after Relocation," Sid Jamieson, Haudenosaunee Nation, Ona Fleming, Pottawatomi Nation, and John Grim, Walls Lounge, Langone Center

Noon-1:30 p.m.—Study abroad program to discuss fall internship possibilities in London and Sydney and programs in Spain, Russia, Ecuador, Germany and Niger with representative from Boston University, 223 Langone Center

7:30 p.m.—Slide show, *Pretty Powerful: Images of Women Athletes in the Media*, Mariah Burton Nelson, sponsored by Women's Resource Center, Forum, Langone Center

8 p.m.—Headset Sextet concert with Joshua and members of the dance, theater, and music departments, Center Gallery

8 p.m.—Study abroad program about *Bucknell En France*, 105 Vaughan Literature Auditorium

9-11 p.m.—Kappa Alpha Psi Fraternity fundraiser, "Dinners and Dates," Bison

Wednesday, February 12

Noon—Women's Resource Center's Well Women's Series, "Herbal Wonders for Women," Susan Renkel, RN, Walls Lounge, Langone Center

Noon—Ash Wednesday Service, Rooke Chapel

1-3 p.m.—Chess Club meeting, The Niche

2-4 p.m.—Study abroad program with Don Nunes, director of Advanced Studies in England, to discuss his program that provides coursework in English Studies, 233 Langone Center

Thursday, February 13

Noon—Mathematics lunch talk, "Babylonian Mathematics," first of a two-part talk, Suzzanne Sherrick, sponsored by Phi Mu Epsilon and MAA, Terrace Room, Langone Center

4 p.m.— Third World Film Series, *Sugar Cane Alley*, 120 Coleman

5-6 p.m.—Writing Center workshop, "Writing Personal Statements, Writing Center, 200G Roberts Hall

7 p.m.— Third World Film Series, *Sugar Cane Alley*, 120 Coleman

Saturday February 15

8 p.m.—William Shakespeare's *As You Like It*, performed by the Acting Company, Weis Center

News Analysis: Expansion and the Patriot League

Can Bucknell survive expansion?

Rutgers the latest school to express interest in Patriot League

E.J. CRAWFORD
Bucknellian Staff Writer

In the aftermath of the Holy Cross decision there is added interest about the expansion of the Patriot League, and now Rutgers has thrown its hat into the ring.

In a recent letter written by Professor J.C. Dowling of the Rutgers' English department, he encouraged the athletic department "to, on the grounds that Rutgers, given its traditions and values... [should] withdraw from the 'Big East' conference and from division I-A."

> *"People long for the good old days... when sports were truly amateur, and the Patriot League still does things that way. What we're doing in this league is the right thing."*
> *-Athletic Director Rick Hartzell*

In a different letter sent to *The Bucknellian*, Dowling furthered that sentiment, saying that his campaign—called the "1,000 Men and Women of Rutgers," which includes students, faculty and staff—wanted the Rutgers's administration to "get out of the Big East [and] apply for membership in the Patriot League."

The campaign has been established as an attempt to preserve the academic excellence of colleges in an era of "professionalized sports in American higher education," as Dowling stated.

The fact that Dowling cites the Patriot League as such a place of "American higher education" is quite a compliment, in fact prompting director of athletics Rick Hartzell to flatly state, "hey, we'd welcome Rutgers."

Continued Hartzell, "People long for the good old days... when sports were truly 'amateur,' and [the Patriot League] still does things that way. What we're doing in this league is the right thing."

But despite the praise heaped on the league, and even Hartzell's "welcome," it is highly unlikely that Rutgers would ever join the Patriot League. In fact, neither Hartzell nor head men's basketball coach Pat Flannery had ever heard of the "1,000 Men and Women of Rutgers" campaign, prompting Flannery to say "that's news to me."

It is also probably news to most of the Rutgers athletics department (the athletic director could not be contacted), who would hardly forsake the revenue that Rutgers gets playing football against the likes of Syracuse and Miami, and basketball against such established powers like Georgetown or Villanova. Also, Rutgers would hardly be ready to give up scholarships in every sport, except for now basketball, to join the league.

So where does that leave the league in terms of expansion? As of now the Patriot League has the bare minimum (seven teams) to be a football conference, and borders on or near that minimum in every other sport. Even Hartzell, who adamantly supports Bucknell's current system of only need-based scholarships, admits that "the Patriot League needs to expand," while in the same breath adding that the "focus needs to be on academics first and foremost."

This is not an easy task. Members of the coaching staff at Bucknell and most league schools, for the most part, largely support the present no scholarship system, preferring that the league and its athletes should stay, as coach Flannery put it, "pure."

However, at most division I schools, athletics are a major source of revenue, and in many cases serve the good of the total institution. The success of the athletic programs at most big-time schools enables them to keep tuition lower and even provide scholarships to non-athletes.

But are the benefits of such as system worth the costs? Up until recently the Patriot League has not thought so, believing that along with such benefits come the corruption of the academic institution, in effect turning their student-athletes into more athlete than student with the results being the "professionalization" that Rutgers' Dowling referred to.

So that again brings up the question of what can Bucknell do, and where does all this leave the Patriot League in terms of expansion? As unfortunate as the Holy Cross decision was, it does open up many more avenues in terms of league expansion, as Hartzell reluctantly admitted: "Some schools might look into the League since the introduction of scholarships."

Such schools include Fairfield, Ursinus and Towson State, which compete in the Patriot League in other sports, as well as such schools such as Boston University or Richmond. In fact, Richmond has been long-rumored to be interested in joining the Patriot League, but was reluctant to give up its basketball scholarships.

But unfortunately more answers only beg more questions. If the league were to expand with the continuation of scholarships, the league may thrive, but non-scholarship schools such as Bucknell, Colgate and Lafayette would be left at a distinct disadvantage. Ideally the league would expand with non-scholarship schools, but this seems to be a near-impossible task.

The key questions are whether schools such as Holy Cross will demand scholarships in sports other than basketball, and whether schools such as Bucknell can remain competitive without scholarships. Unfortunately only time will provide both answers, and only in hindsight can one determine if expansion is a positive for the continuation and advancement of the Patriot League, or a necessity.

Bison women slam Colgate

BY JEFF CAMPAGNA
Bucknellian Staff Writer

As the Patriot League Tournament draws closer, the women's basketball team has turned up the heat.

With consecutive victories over the last-place conference-members Army and Colgate, Bucknell has moved into third place in the league with a 4-3 record, 9-10 overall, as of Tuesday. Big games are approaching, as league-rival Lafayette visits Davis Gym on Saturday, and the Bison take on the second place Midshipmen at the Naval Academy next week. But the prime time match-up comes on February 18th, when Holy Cross brings its undefeated Patriot League record to town.

Although Navy is the second place team in the conference, the other Patriot League service academy is not quite as strong. The last-place Cadets of Army surrendered after a 73-56 defeat at the hands of the Bison last Wednesday night.

Bucknell utilized a balanced attack, with four scorers reaching double figures. Senior guard Chiara Sockel turned in another superb all-around effort, leading the Bison with 19 points, eight rebounds, and five steals.

As the only senior on the team, Sockel brings the oft-mentioned phrase, "veteran leadership" to the younger players. "I try to lead by example and go out and play with all the heart I have. Hopefully they'll follow my lead."

Sophomore Kim Delfs, back in the starting lineup after battling a broken finger, added 16 points of her own while dishing out six assists.

The Bison kept up the pressure the following Saturday against Colgate in front of one of their largest crowds of the season, most of whom were there to see NBA-prospect Adonal Foyle.

Jonah Half—The Bucknellian
Kim Delfs '99 scored 16 points.

The presence of Foyle in the Davis Gym, however, did not improve the abilities of Red Raider women, as Bucknell dealt their league-rival a resounding 65-48 loss. The Red Raiders were unable to overcome Bucknell's intense defense and strong play under the boards.

On the other end of the court, the Bison were quite accurate, shooting 50 percent from the floor. Commented Bucknell's coach Simpson, "Our defense has been the key to our offense. The harder we play defense, the more patient we are on offense."

The Bison led from the beginning and did not let go, allowing only a brief run by Colgate at the end of the first half. Jessica Mathieson '98 led all scorers with 18 pts., while Delfs pulled down eight rebounds to lead the team.

A tip for the NFL to tackle free agency and the salary cap

Commentary

E.J. Crawford
Sports Co-Editor

Desmond Howard, you were just named the MVP of Super Bowl XXXI, what are you going to do next? "I'm going to... a different team!?"

That's right folks, welcome to the modern world of free agency and the salary cap, where Desmond Howard will most likely become the second straight NFL MVP to jump ship to a different team thanks to free agency (you remember Larry Brown, now-Raiders cornerback who is backing up 88-year-old Albert Lewis for 2.5 million dollars a year thanks to the precision passing of now-Jet qb Neil O' Donnell).

Also likely to depart are feel-good stories Don Beebe and Sean Jones because the Packers will run out of money signing integral team members Frank Winters, one of the most underrated centers in the league, and Gilbert "tons of fun" Brown, one of the most oversized defensive lineman in football.

But don't blame the Packers for these decisions, they're just doing what they have to do to stay afloat in the complicated world of the salary cap. About five years ago the brains-that-be in the NFL decided to open up the game to free agency, much like baseball had done many years before. The idea that a player is not stuck with a team for life is a good one, but to have players ping-ponging around the NFL like they do in baseball will eventually destroy the credibility and fan-base of the league, until football becomes as forgotten as... well baseball.

Let us just look at baseball for a second. "America's sport" has become less-and-less appealing to fans as player loyalty has dwindled away to such a state that even die-hard fans rarely know who's on their team. This is a sad state of affairs. Older fans have started to tune out and reminisce about the good old days of Mays and Maris (hell, I'm only 19 and I reminisce about the good old days of Mookie Wilson and Phil "that's not vasoline under my cap" Niekro). But seriously, kids today identify with players, not teams, and thus all allegiance is nearly dead. Really, nowadays even a fan has declared free agency, is that what football wants?

I do not mean to overlook basketball during this rant either. Basketball has had its share of problems with free agency as well (see Juwan Howard and Shaquille O'Neal), but at least basketball allows teams to go over the salary cap to resign players, which has led to some fan loyalty.

(By the way, while we're on basketball, what in the name of Michael Jordan is Christian Laettner doing on the All-Star team while Chris Webber sits at home—who's making these decisions, Barney Fife?)

Obviously I do not like free agency, but I do see some merits in the system, it's just that the system has been so badly abused. If the NFL wants to save itself it needs to implement a type of free agency more like restricted free agency, where the player's current team has the right to match any offer made, and will receive compensation if they do lose that player.

Under this system if some team really wants to get a certain player they still can, but the home-team fans won't get screwed by some money hungry punk (see Deion Sanders) who could care less about loyalty. Also, this way the team losing the player won't be left in a lurch with its best player gone.

In addition, this will not affect many smaller-name players, as they will be able to switch teams and make a name for themselves because their present teams will most likely not put up much of a fight for them, nor receive much compensation if they leave.

Teams should also be allowed to go over the salary cap to resign their own players if need be. I think it's a shame that so many veterans get squeezed out in favor of younger players simply because a team always has to plan for the long run. I realize that people out there are saying that is unfair because a big-name player can sign for a small amount for one season, and then resign with that same team for a big balloon payment, but this never-to-rarely happens in the NBA. First of all, the only real controversy of this sort in the NBA was over Chris Dudley, and the Nets are actually better off without him (although it hard to believe that the Nets could be much worse than they are). Secondly, a precious few players will sign for a small contract because the risk of injury in professional sports today is too great.

Sports today have become such big business it is just sad to see fans get screwed over because of money. What is really more unfair, Deion Sanders making five million instead of six, or a four-year-old wearing a Desmond Howard Packers jersey while he watches his hero play for the Buccaneers?

Bucknell track tripped up by Yale, Cornell

BY ERIC KEBER
Bucknellian Staff Writer

In a pivotal tri-meet against Yale and Cornell, the Bucknell women's track team finished second behind Cornell and the men came in a disappointing third. The Bucknell women scored 69 points to beat Yale, which finished with 21.5, but did not perform well enough to overcome Cornell's 79.5 points. Despite the second place finish to Cornell, a team expected to win the Ivy League, Head Coach Art Gulden was "pleased with the women's performance."

For the second week in a row, Tundé Daniels '00 won two events. Saturday, she won the 200m dash and the 400m dash. Kim McGrath '00 won the 55m dash and tri-captain Lisa Allen '97 outdistanced the competition in the 20lb weight throw with a toss of 52'-9-1/2". The women's team also cruised to victory in the 4x800 relay.

Cornell won the men's meet with a score of 77 while Yale and Bucknell scored 64.5 and 50.0, respectively. The men won five events, including a big win in the 4x800 relay. Tri-captain Michael Pistella '97 ran the 55m dash in 6.53 seconds to claim victory while fellow runners Brian Torres '98 and Matthew Kodak '99 won the 800m run and 3000m run. Bryan Schiding '00 won the long jump with a jump of 23'-1/4", a new meet record.

"We're disappointed," Gulden said about the meet. "Cornell had a good team, but we shouldn't have lost to Yale. We should have beaten Yale but Cornell took away points we could have gotten to beat them."

"The interesting thing about athletics is you don't have your best performances, but you have to bounce back from that," Gulden said. "The true test of a strong athlete is how well he or she can bounce back."

Gulden expects his team to do just that this coming weekend when Bucknell hosts the Bucknell Winter Classic. He sees this meet as more of an individual contest than a team effort. Since there are no team scores kept because of the number of schools participating, (15 as of February 3rd), it is a meet to prepare for the Patriot League Championship next weekend at Colgate.

The Bison men are 100 percent healthy, and the women are in near perfect health except for Julie Sweitzer '99 who is sick.

"We still need to step it up a phase," Gulden adds. "We need a little more confidence. We've gone to new levels, but we don't have the confidence to realize that we're really that good."

Swimmers look to make waves at leagues

BY ERICA FRIEDLANDER
Bucknellian Staff Writer

Jonah Half—The Bucknellian

The swim team heads to Army next week for the league tournament.

Bucknell's men's and women's swim teams had their winning streaks snapped on Saturday afternoon as they fell to Lehigh at the Freas-Rooke Pool. Despite three wins each by Ethan Buckley '97 and Scott Fitzpatrick '98 for the men, as well as by Jen Myers '98 and Kate Wood '00 for the women, the firsts were not enough to hold back the power of the Mountain Hawks.

The final scores were 136-105 for the men (7-3 overall), and 145-95 for the typically strong women's team (8-3 overall).

Saturday's meet began with a heartfelt dedication by Coach Lyn Katchmarik to the team's seniors. The fans applauded as they watched Buckley, John Zanella, Justin Ganz and Sarah Cranston prepare for their final competition. Team captain, and fellow senior Jay O'Neil watched the meet from behind the starting blocks due to a serious back injury that ended his final season prematurely. The five seniors have all been key members of Bucknell's swim team, helping to post a 64-16 dual-meet record over the past four years.

The Bison men came on strong, taking a first place win in the first event of the afternoon—the 400-yard medley relay, which was swum by Scott Woodworth '98, Vadim Turkoglu '98, Buckley and Doug Hill '00, who finished only .9 seconds ahead of the second place contender from Lehigh.

Buckley continued to dominate during the meet by taking first place in the 200-yard freestyle (1:45.19), followed by a third win of the afternoon in the 500-yard freestyle (4:48.17).

Fitzpatrick also brought Bucknell a series of wins beginning with his swim in the 50-yard freestyle. His time of 21.8 seconds posted as one of his top times for the season. He continued his streak of wins when he posted another top time in the 100-yard freestyle (48.38).

Mike Malloure '98 was also a winner on Saturday with his first place in the three meter diving competition. He took first by scoring an incredible 248.925 points.

The men's team finished up the afternoon with a final win in the 400-yard freestyle relay which was swum by Hill, Fitzpatrick, Antonio Lannes '98 and Alex Johnson '99. The relay team's time of 3:13.49 brought in the final points for Bucknell's men for the meet.

The women's team also began the meet with power as the 400-yard medley relay team composed of Myers, Wilson '00, Nicole Brandemarti '00 and Molly Ellis '98 took the first win of the competition. The team's time of 4:07.86 was two seconds faster than the 2nd place finishers from Lehigh.

Myers showed her strength and speed during the meet by taking two more wins in the 200-yard individual medley (2:12.83) and the 200-yard backstroke (2:07.15).

Freshman powerhouse Wood swam to victories in the 1000-yard freestyle (10:38.08), the 200-yard fly (2:10.4) and the 500-yard free (5:14.63).

"We all work really well together," Myers said after the meet. "This team has been the closest and best to compete with since I've been at Bucknell."

Listen to the groundhog; hit the slopes now

Snow What

A semi-weekly column for the winter sports enthusiast

By Chris Runnells and Brian Mazzei

It is early February, and we find ourselves in the heart of the ski season. Unfortunately for those of us who enjoy the winter, Punxatawney Phil has predicted an early spring, as if the weather wasn't already resembling the muddy not-so-terra-firma of late March and April. As our hearts sink in the mud wishing we had more days on the snow, we remember that there is a whole country of snow to be discovered.

Road trips are to the skier as wine is to Dionysis. The key to making a road trip successful is planning and preparation. I am not saying that you must have an itinerary that resembles one of Clark Griswold, but it is a good idea to have a general idea of where you are going and where you are going to stay. We've tried the "pick up and go" method and more times than not it has worked out. However those few times we've slept in the car have left enough of an impression to make planning a habit.

When planning a trip, money will determine where you go. The greatest expenses will be travel and lift tickets. Most major resorts charge 40 dollars per lift ticket. Of course, this is absurd because a ticket in Vail, one of the worlds biggest and best ski areas, costs only four dollars more than a ticket at Camel Back in the Poconos.

But, such is the case. The other greatest expense will be travel. If you fly there is obviously airfare, and if you drive there is gas money. The rest of the trip can be inexpensive if you are there to ski.

The resort you choose is very important. There are many resorts like the big ones out West such as Vail, Aspen and Steamboat, that are great ski areas but they are more centered around socializing. Don't get us wrong, it is fun to go to these places, but they are grossly over priced. If you want to ski, you are safer to go to a "skier's resort". A skiers resort will definitely lack nightlife, but if you go with good friends you'll have fun anyway, and hopefully you will be too tired from skiing to go out, anyway

Some good resorts that fit this profile are Jackson Hole, Big Sky and Snowbird/Alta. These mountains are considered expert mountains and we would not recommend them if you are not going to ski all day, everyday. Make the most of your ticket.

Another way to economize is to bring your own food. As soon as you settle in your abode for the trip go to the local food store and get some good eats. Bring food to the mountain, because mountain food in general is not that good, and it is always too expensive. Also it is fun to cook your own dinner rather than going out to dinner.

The clothing you bring is important. Ski equipment is bulky and extensive. But it is also a necessity, so keep track of it. Other clothing should be comfortable and simple. It is a vacation, but do not overpack, because you have to carry what you bring.

So in this time of drizzle and muck, find some time to pack your bags and head out and find the snow, and remember to keep your boots dry.

Sports Trivia

1. Who holds the NHL record for most goals in one game?
2. Before Martina Hingis did it last week, name the last woman to win both the singles and doubles of the Australian Open.
3. Name the winningest coaches in the 4 respective major sports.
4. How many field goals did the NFC miss in their 26-23 loss to the AFC?
5. How many Pebble Beach Pro-Am titles has Mark O' Meara won?

Answers:

1. Joe Malone-7, 1920 2. Martina Navratilova 3. hockey—Scotty Bowman; basketball—Lenny Wilkins; football—Don Shula; baseball—Connie Mack 4. five 5. five (not a mistake)

The Purity Candy Company has a variety of sweets for you and your sweet in the season of love.

Valentine's day means big business for local candy store

BY KATHRYN ARDINGER

Bucknellian Staff Writer

Chocolate, peppermint hearts and assorted truffles are just some of the tasty Valentine treats shoppers will find at the Purity Candy Company, located at its new Market Street location.

The candy company, which has been in business for 90 years, recently closed its North Eighth Street shop and opened its doors on Market Street on Jan. 6.

Sharon Weiser, manager, said that the "increase in seeing Bucknell people is more than 100 percent," since the shop moved to Market Street.

Students, presenting Bucknell identification will get a 10 percent discount on their purchase all year round.

"There's a real surge for business on Valentine's Day" which usually lasts for four to five days, Weiser said. Thursday and Friday will be the store's big days, she said.

Weiser explained that "Christmas and Easter are a lot bigger and they are a lot longer holiday times."

Purity Candy Company was started by Ford Birchard in 1907. Starting out on Market Street, Purity was located where the Dollar General Store is located today.

Margaret Burfeindt presently owns the company, while her son, John Jr. is the president.

Purity has three candy shops, located in Williamsport, Allenwood and Lewisburg. The factory in Allenwood is situated on Route 15, between Lewisburg and Williamsport.

Columbia U. president to speak at commencement

KATHRYN ARDINGER

Bucknellian Staff Writer

The search for this year's commencement speaker has finally come to a close. George Rupp, president of Columbia University, accepted the offer to speak at the University's 147th commencement on May 24.

Rupp has been the president of Columbia University since 1993 and was the president of Rice University for the eight years prior to assuming his present position.

"Dr. Rupp is a distinguished theologian and intellectual, as well as a widely admired educational leader," said President William D. Adams in his announcement that will be released to the faculty in Friday's Notes and Notices.

The search committee was looking for an individual with "intellectual or artistic merit... and possibly someone with an academic focus," Camille Brennan, director of special events and chair of the search committee said yesterday in a phone interview. They sought "someone who could provide a substantive message," Brennan also said.

Rupp graduated with high honors from Princeton University in 1964. Shortly thereafter, he received a bachelor of divinity degree magna cum laude from Yale University in 1967.

In 1972, Rupp received a Ph.D. in religion from Harvard. He has taught at the University of California, served as the department chair at Harvard Divinity School, and as the dean for academic affairs and professor of humanistic studies at the University of Wisconsin, according to Adams' release.

According to Brennan, Rupp was highly recommended by people on the committee who had heard him speak before.

"He could provide a very good message to graduates that exemplifies Bucknell's mission of providing an excellent Liberal Arts education that prepares students to compete successfully in the world," Brennan said.

The committee was composed of Brennan; the senior class officers, Glen Henderson '97, David Hyle '97 and Thomas Chang '97; Sharon Poff, director of Public Relations and Publications; Jim Rice, assistant vice president for academic affairs; Mary Evelyn Tucker, associate professor of religion; Teresa Amott, associate professor and chair of economics; Michael Payne, professor of English; Gerald Commerford, associate dean of students; Kim Verstandig, director of alumni and constituent relations; and Reginald Clark, special assistant to the president.

"The students on the committee were in favor of someone who was president of a college or university," Brennan said. "The students had a lot of input."

Brennan said that the University has a very limited budget for honorarium and, therefore, could not afford some other very good speakers due to the fees that they charge.

Other speakers, considered by the committee, were interested in honorary degrees for speaking at commencement, which the University does not offer.

Brennan confirmed that other speakers were considered, but were unavailable.

Janice Butler, director of the women's resource center, spoke at the 10th annual "National Girls and Women in Sports Day" celebration last Thursday.

Campus celebrates 25 years of title IX

BY E.J. CRAWFORD

Bucknellian Staff Writer

Last Thursday Bucknell and the rest of the country celebrated "National Girls and Women in Sports Day," which was started by a resolution from Congress in 1987 to stress the importance of athletics in shaping the lives of women, and also to commemorate female athletes of the past. It is celebrated on the first Thursday of every February.

This year celebrated both the commemoration's own 10th anniversary, but more importantly the 25th anniversary of Title IX, which pledged equality for men's and women's college athletics. Janice Butler, the director of the

SAM rescued by large pledge class

BY BETH MARTIN
Bucknellian Staff Writer

Thirteen men were initiated into the University's Sigma Phi chapter of Sigma Alpha Mu fraternity this Monday, rescuing SAM's fraternity house. The University had threatened to take the house if fraternity members did not occupy at least 80 percent of it by February 28.

SAM has to guarantee that 23 brothers will reside in its house next fall to meet the University's minimum 80 percent occupancy requirement for a house to be specifically reserved for a fraternity. In addition to the 13 new brothers, the other 12 members will return in the fall. The fraternity presently has 32 members.

According to Kevin Barron '97, former president of SAM, the fraternity has had low membership since at least November 1994 when he was a pledge.

During the 1994-95 school year the University issued SAM a two-year grace period as an opportunity to increase its membership to meet the University requirement.

Stephen Griffee, Greek Life Assistant, said that SAM has "successfully met all the requirements to keep their house, and is functioning as an active chapter in the Interfraternity Counsel."

Griffee added that the administration is "happy that they're increasing numbers and will support their future endeavors."

James Adlam '98, one of SAM's new members and the president of the fraternity, said that he and some friends decided to pledge SAM in October, because "it was open for progress. So many fraternities on campus are already established, and with Sigma Alpha Mu we could take our own direction."

Adlam said another reason that they pledged was because "we clicked with the brothers. Many of our interests lie in the same place; we have a lot of the same ideas for the future of the fraternity."

Adlam added, "The history of our fraternity on campus is unique. We're the only fraternity on campus who has had a significant amount of minorities for a long time." SAM currently has a large percentage of minority brothers, including Asian, African-American, and Hispanic brothers.

Barron attributes the fraternity's successful recruitment of new brothers to "two reasons: diversity—we have every walk of life at Sigma Alpha Mu allowing for different points of view; and its strength of brotherhood—of course the brothers here don't always agree on everything but we would do anything for each other."

Barron said that the recruitment efforts of Devon Wilson '98, a SAM brother since the spring of 1996, was one of the main reasons for SAM's increase in members. "In October, Devon started talking to a lot of his friends about Sigma Alpha Mu. After that we worked out some details, and soon after that they became pledges," Barron said.

Wilson said that he decided to pledge the fraternity when a friend, who was thinking about joining, introduced the idea that many of their friends join together. Wilson said, "I like the idea of a personal fraternity."

Nevertheless, Wilson was the only one of his friends who became a SAM brother last spring. However in the fall, as co-rush chair, Wilson urged his friends to pledge SAM. He said, "I don't think I was the only reason they joined. I played a sometimes active and sometimes inactive role of getting them here."

Wilson said he enjoys being in the fraternity, though "Sigma Alpha Mu is not the typical fraternity, and I am not your typical fraternity brother."

As president, Adlam said he would like SAM to "see more involvement on campus, not just on a social level, but programs like a rape workshop, Tae Kwon Do classes, and diversity programs."

Barron said in some ways he will miss being SAM president, but he has confidence that Adlam will be a successful president. "We've talked a lot about the role, and this transition period. He's one of the most qualified [to assume this position]."

SAM is one of the strongest national fraternities at the University. Barron said, "We have upwards of 80 chapters, and the last time I remember hearing anything it was the second largest national fraternity."

The University's Sigma Phi Chapter was started in January 1932 and reinstalled in 1987.

Physical Plant conversion begins

Jonah Half—The Bucknellian

Chris Peters, acting foreman, with Contractors Group, Inc. works to put in gas lines for the University power plant. The job will be completed in about six weeks, said Tony Pasquarello, District Supervisor for CGI. The gas line installation is a step in the project to convert the Power Plant from coal to natural gas. This project is the reason parts of River Road have been inaccessible recently.

Business blooms for Valentine's Day

Dogwood Hill on Market Street offers several Valentine's Day arrangements. Owner Michael Brody said that flower sales are highest on Valentine's Day, and many Bucknell students purchase them, especially "right in the end." He said that spring flowers, such as tulips, are more popular than traditional roses.

Ali Dwyer—The Bucknellian

BUCKNELL SEMINAR FOR YOUNGER POETS

From June 2 to 28, Bucknell will conduct its thirteenth annual Seminar for Younger Poets. The Seminar provides an extended opportunity for undergraduates to write and to be guided by established poets. It balances private time for writing, disciplined learning, and exchange among the students. The Stadler Center for Poetry is the campus headquarters for the program.

Staff poets conduct two workshops each week and are available for tutorials. Weekly readings by the students provide opportunities for Seminar poets to hear and be heard by their peers.

This year, thanks to the fund-raising efforts of Gary Sojka on behalf of the Center, THREE BUCKNELL STUDENTS will be chosen to participate in the Seminar with students from other universities. Students who have completed their sophomore, junior, or senior year may apply. Bucknell will provide room, board, and spaces for writing. Students are responsible for their own transportation.

THE STAFF

This year's Poet-in-Residence, Michael S. Weaver, will be a member of the Seminar staff. Mr. Weaver is the author of five books of poetry, most recently *Timber & Prayer*. His first book *Water Song* was a finalist for the Walt Whitman Award in 1983. He has had two plays, *Rosa* and *Elvira & the Lost Prince*, produced professionally, and he has received fellowships from the NEA and the Pa. Arts Council. Other staff members are: director Cynthia Hogue, associate professor of English; co-director Karl Patten, professor of English; Deirdre O'Connor, tutor in the Writing Center; and Steve Styers, assistant to the director, Center for Poetry.

APPLICATIONS should include:

1. 10-12 page portfolio
2. An academic transcript
3. A letter of self-presentation (a brief autobiography stressing commitment to poetry writing, experience, and any publications)
4. If the student has not taken an advanced creative writing course (EN 308) at Bucknell, include a letter of recommendation from a writing teacher elsewhere.

Send to:
Cynthia Hogue, Director
Bucknell Seminar for Younger Poets
Stadler Center for Poetry

DEADLINE for receiving materials: March 10, 1997
Letters of notification will be sent by April 7.

If the applicant wishes to have the portfolio returned, a self-addressed envelope should be enclosed. For more information, call the Center for Poetry at 1853.

PUBLIC SAFETY LOG

February 2, 1997

INFORMATION/SUSPICIOUS MALE— A Public Safety Officer responded to Larison Hall for concerns about a suspicious male. A search of the interior of the building and the Freshman Quad met with negative results.

February 5, 1997

INFORMATION— A University student reported to a Public Safety Officer that food items were placed on the vehicle's windshield while the car was parked in the Kappa Delta Rho parking lot. The investigation is continuing.

February 6, 1997

VANDALISM— A Public Safety Officer responded to the area between Sigma Chi and Swartz Hall for a burning couch. A fire extinguisher was used to put out the fire. East Buffalo Township Police Department responded and are investigating the incident.

MEDICAL TRANSPORT— A University student contacted Public Safety Dispatch to request transportation to the Evangelical Hospital Emergency room for treatment of an eye injury. A Student Health Service driver provided the escort.

MEDICAL ASSIST—A Public Safety Officer responded to Larison Hall for a University student experiencing abdominal pains. The student was transported to Evangelical Hospital Emergency Room by ambulance.

February 8, 1997

MEDICAL ASSIST— A Public Safety Officer responded to Hunt Hall for a University student with a fall victim. A Student Health Service driver transported the student to Evangelical Hospital Emergency room for treatment.

INFORMATION/MISSING VEHICLE— A University student reported to a Public Safety Officer that a vehicle, parked in the Bucknell West area was missing. East Buffalo Township Police issued an "attempt to locate" notice. While on routine patrol, a Public Safety Officer located the vehicle on Loomis Street.

INFORMATION— A Public Safety Officer responded to Hunt Hall to recover a fire extinguisher found in the building.

ASSIST- A Public Safety Officer assisted East Buffalo Township Police with traffic control for a 2 vehicle accident at the intersection of Rt. 15 and Moore Ave. No University students were involved.

MEDICAL TRANSPORT— A University student requested transportation to Evangelical Hospital Emergency Room for treatment of a skin irritation. A Student Health Service driver provided the escort.

VANDALISM - A Public Safety Officer and the Lewisburg Police Department responded to a University owned property on University Ave. for broken windows. The windows were repaired and the investigation is continuing.

INFORMATION—A Public Safety Officer received a report that a visitor had tripped in the Fieldhouse. The victim, who was contacted by a Public Safety Officer, reported only minor injuries.

February 9, 1997

ASSIST LOCAL POLICE/DISORDERLY CONDUCT— Sigma Alpha Epsilon Fraternity was cited by Lewisburg Police Department for disorderly conduct resulting from a noise complaint.

VANDALISM/CRIMINAL MISCHIEF— A University student reported to a Public Safety Officer that his vehicle was damaged while parked in Swartz lot. East Buffalo Township Police Department was notified and the investigation is continuing.

MEDICAL TRANSPORT— A University student requested transportation to Evangelical Hospital Emergency Room for treatment of abdominal pains. A Student Health Services driver provided the escort.

February 10, 1997

TAMPERING WITH FIRE EQUIPMENT/DISCHARGED FIRE EXTINGUISHERS— Public Safety Officer responded to the exterior of Roberts Hall for a discharged fire extinguisher. The investigation is continuing.

UNIVERSITY PROPERTY DAMAGE— A Public Safety Officer responded to Trax Hall for a broken stairwell window. A work order was placed for the repair of the window and the investigation is continuing.

February 11, 1997

INFORMATION/SUSPICIOUS MALE— A Public Safety Officer responded to the area of Larison Hall for the report of a suspicious male. The individual was located and identified as a guest of the Ward House.

INFORMATION/FIRE— A Public Safety Officer responded to an alarm activation at Phi Kappa Psi Fraternity. The alarm was caused by cloth falling on a halogen light. The material was removed and the light turned over to the BU Safety Manager.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

Top North Korean official defects

SEOUL, South Korea — A close aide to North Korean leader Kim Jong Il apparently defected yesterday, becoming the highest-ranking North Korean official ever to ask South Korea for asylum.

Hwang Jang Yop, a secretary of North Korea's powerful Workers' Party, and an aide have asked for political asylum at the South Korean embassy in Beijing, said Chung Jong-wook, South Korea's ambassador to China.

A North Korean Foreign Ministry spokesman said it was "inconceivable and impossible" that Hwang had asked for asylum, and said if Hwang was in the South Korean embassy at Beijing, it meant "that he has been kidnapped by the enemy."

The spokesman threatened "due countermeasures" if Pyongyang determines that Hwang was kidnapped.

China is North Korea's closest ally, and a 1978 treaty requires it to return to the North any North Koreans found without valid travel documents.

Alarcon named Ecuadorean president 2nd time in 5 days after former president leaves country

QUITO, Ecuador — While Congress met Tuesday to name Fabian Alarcon president of Ecuador for the second time in five days, acting president Rosalia Arteaga submitted her resignation and last week's president, Abdala Bucaram, left the country.

In a day that summons memories of banana republic politics, Ecuadorean politicians set about resolving a situation they fear is making them the laughingstock of Latin America.

An unusual session of Congress met Tuesday to select a president to replace vice president Rosalia Arteaga, who has been filling in for the popularly elected president Abdala Bucaram, who was removed last Thursday for "mental incapacity."

She urged that a national referendum be held to choose a new president, and said she would return to the vice-presidency when Congress picked a new president.

Congress has already named Alarcon president once, shortly after Bucaram was removed, but Arteaga claimed she was the rightful president, according to the constitution, and had herself sworn into office.

Loan scandal shakes South Korean government

SEOUL, South Korea — One cabinet member has resigned, and the prime minister has said he is prepared to do so, as a loan scandal continued to rock South Korea's government yesterday.

Prime Minister Lee Soo-sung said through a spokesman that he holds himself morally responsible for the scandal, although he said he was not directly involved. New Korea Party chairman Lee Hong-koo has also offered to resign.

"I believe the prime minister must take responsibility," spokesman Ahn Kwan-ki quotes prime minister Lee as saying.

Home Affairs Minister Kim Woo-suk tendered his resignation yesterday, the same day prosecutors summoned him for questioning in the rapidly expanding scandal.

Two top ruling party lawmakers have been arrested and charged with accepting kickbacks in connection with loans for Hanbo Steel, which collapsed in January under a $6 billion debt. Allegations almost immediately surfaced that government influence had made possible millions of dollars in bank loans.

Bus shelter spritz causing a stink in Australia

SYDNEY, Australia — Alcohol abuse activists are raising a stink over posters that emit a whiff of lemon-scented liquor as people enter bus shelters.

The Bacardi-Martini Pacific company has scent-dispensers in 90 bus shelters in Sydney, Adelaide, Melbourne and Brisbane to advertise Bacardi Limon, an alcohol drink with a lemon fragrance.

They spritz a non-alcoholic lemon smell in bursts of 20 seconds every three minutes when activated by motion detectors as people enter the shelters.

But Victoria state's transport authorities are already moving to ban the campaign in Melbourne.

Youth and Community Services Minister Denis Napthine said the promotion would affect youths and people recovering from alcohol problems.

The dispensers spray only the lemon scent, not any alcohol odor.

National News

New allegations against Sgt.. Major of the Army

WASHINGTON — The Army is investigating two additional allegations of sexual harassment against its highest-ranked enlisted man, a Pentagon source said Tuesday.

One of the newly-reported allegations against Army Sgt. Maj. Gene McKinney came from a complaint to the Army's sexual harassment hotline. In the other case, a Navy sailor told her commanders about the incident. Her case was passed on to the Army.

McKinney was suspended Monday pending the results of an investigation into an allegation of sexual harassment filed by retired Army Sgt. Maj. Brenda L. Hoster. The decision came a day after Hoster complained of a "different system of justice" for the service's upper tier.

McKinney had been the senior adviser to the Army's chief of staff since June 1995. The post is an elite one, considered appropriate for role models. In fact, McKinney appears on an Army-produced videotape explaining rules against sexual harassment.

CNN to have first U.S. news bureau in Cuba

WASHINGTON — The Clinton administration cleared the way yesterday for CNN to become the first U.S.-based news organization in nearly 30 years with a bureau in Cuba.

The White House also granted licenses to nine other news organizations to open offices in the Cuban capital, Havana.

White House spokesman Mike McCurry said the decision was in keeping with President Bill Clinton's stated policy to support an "increased flow of accurate information to and from and within Cuba itself."

In its announcement, the White House granted permission for Cuba bureaus to CNN, The Associated Press, ABC, CBS, Univision, The Miami Herald, Dow Jones News Services, Cuba Info, the Chicago Tribune and the Sun-Sentinel of Fort Lauderdale.

Currently, CNN is the only U.S.-based news organization to have been given the go-ahead from Cuba. The other organizations must now gain permission from the Cuban government.

American Airlines, pilots exchange new stances

WASHINGTON — American Airlines and its pilot union have exchanged new contract proposals as talks continue in hopes of averting a weekend strike at the nation's largest domestic airline.

Airline officials and the Allied Pilots Association offered letters outlining their new stances late Tuesday after a day that was characterized as "frustrating" by the union.

The union and the company have been battling over the contract for more than two years, but now they have only a few days to end their stalemate before the promised pilot strike Friday midnight.

If the union walks, the airline won't fly, putting about 90,000 employees on unpaid furlough, grounding the fleet and throwing the nation's air travel system into turmoil.

Several lawmakers have asked President Clinton to intervene, and some of them were to meet on the issue yesterday with White House Chief of Staff Erskine Bowles.

Court denies man right to have assisted suicide

TALLAHASSEE, Florida — A Florida man who is dying of AIDS and wants the right to commit suicide with his doctor's help must wait at least several more months now that the state Supreme Court reinstated a stay Tuesday.

Charles Hall, 35, is the lone survivor in a 1996 lawsuit seeking the right to have a doctor prescribe him a lethal dose of drugs without interference from the state. The other men died before a ruling.

Hall, who says he suffers persistent pain, won a ruling January 31 that said he had the right to doctor-assisted suicide. The state's immediate appeal automatically triggered a stay, which another judge lifted last week.

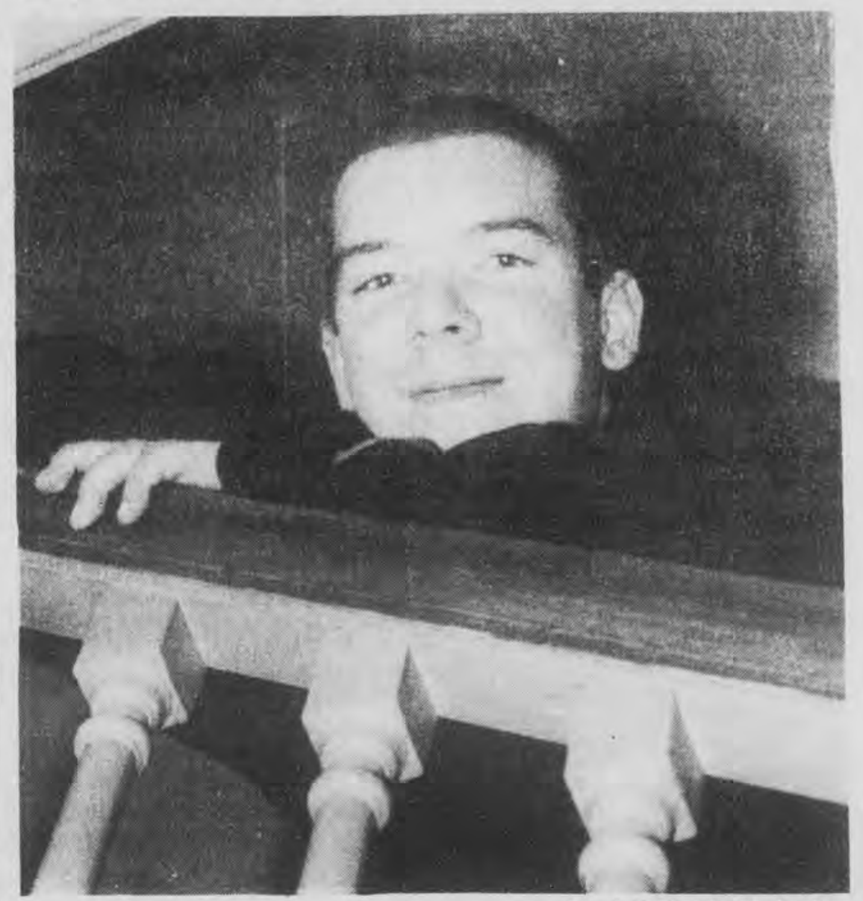
Student wins $1000



Jonah Half—The Bucknellian

Todd Zeranski '99 won first place in a national OpEd contest sponsored by the Annapolis Group, an organization representing 70 liberal arts colleges. Zeranski will receive $1000 for his winning editorial, "China Policy Miserable in Clinton's First Term." "It's a little overwhelming, but it is really great to be recognized," Zeranski said. Zeranski is currently the Opinions Editor for The Bucknellian.

Task force formed to promote HIV/AIDS awareness

BY ARGUN ULGEN
Bucknellian Staff Writer

"For most students, listening about the AIDS virus is almost like listening to a repeated oldie on the radio", said Donald Stechschulte Jr., medical director of Ziegler Health Center.

To increase student awareness of the AIDS virus, Stechschulte has started an AIDS awareness program at the University. The program will sponsor a series of talks and lectures that deal with certain aspects of the virus.

"Students at Bucknell are not respecting the AIDS virus," Stechschulte said.

There are many aspects of college life that make the AIDS virus a serious threat to the typical college student, according to Stechschulte. These aspects include casual sex and sex under the influence of alcohol.

The focus of the AIDS awareness program will be to inform students about the affects of the AIDS virus in society. These discussions will include the history of the virus, public policy towards the virus, and how the virus has affected our culture over the past 20 years.

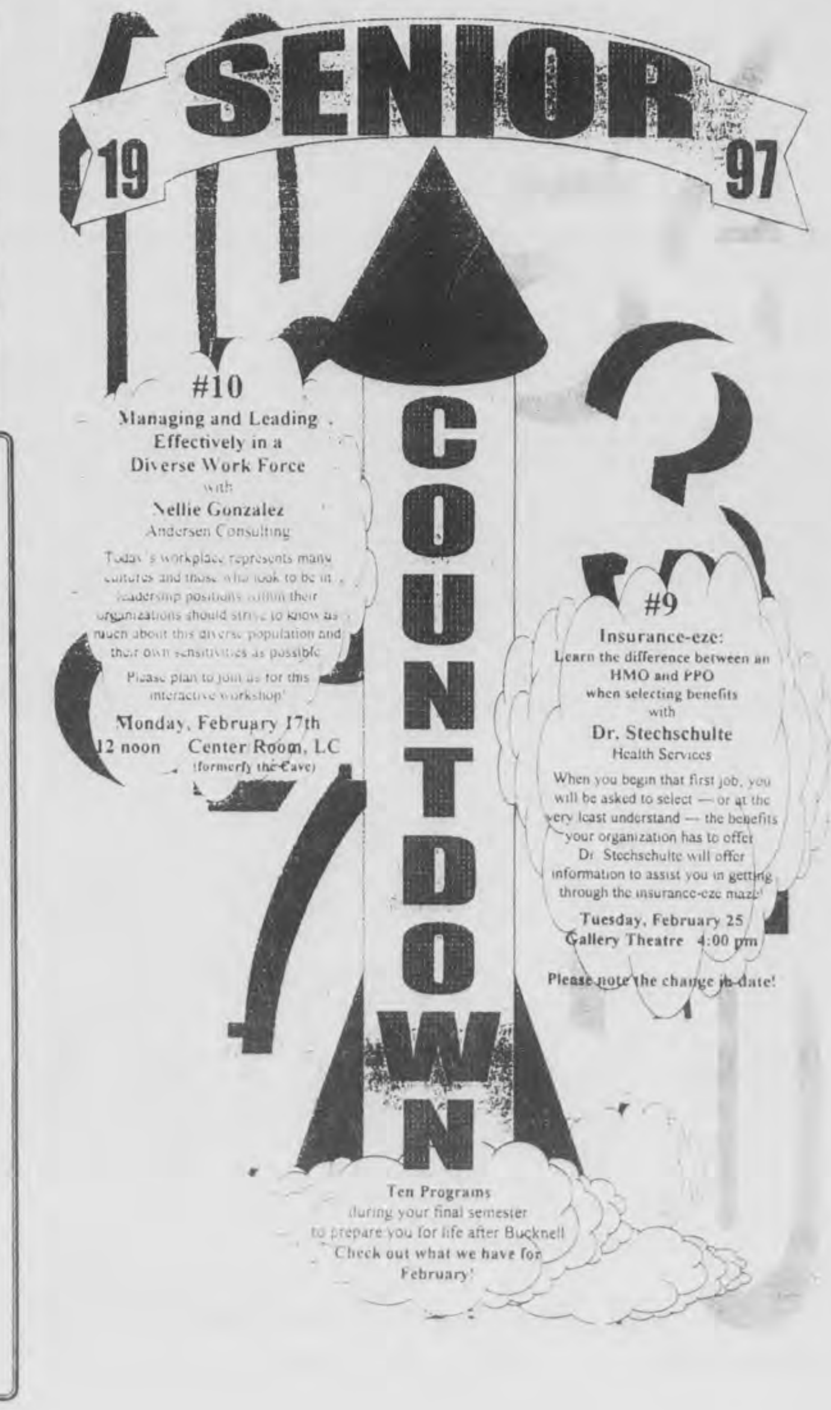
Stechschulte has already received a positive response towards his program. Faculty members, as well as students have shown an interest in this program by responding to his campus e-mail message describing the program.

As Stechschulte said, "Although we don't have a budget, we have a lot of home grown talent. Faculty members have shown interest in giving lectures about the virus."

The AIDS awareness program will host its first lecture on Feb. 20 in the Langone Center Forum. A doctor from Evangelical Hospital will be giving a speech on the history of the virus.

"This speech, as I have heard it before, is like a very interesting investigation. And you need not be a biology major to understand the lecture," Stechschulte said.

Students who are interested in participating in this program should talk to or email Stechschulte.



SENIOR 19 97 COUNTDOWN

#10
Managing and Leading Effectively in a Diverse Work Force
with
Nellie Gonzalez
Andersen Consulting
Today's workplace represents many cultures and those who look to be in leadership positions within their organizations should strive to know as much about this diverse population and their own sensitivities as possible.
Please plan to join us for this interactive workshop!
Monday, February 17th
12 noon Center Room, LC
(formerly the Cave)

during your final semester
to prepare you for life after Bucknell
Check out what we have for February!

SAM rescued by large pledge class

By Beth Martin

Bucknellian Staff Writer

Thirteen men were initiated into the University's Sigma Phi chapter of Sigma Alpha Mu fraternity this Monday, rescuing SAM's fraternity house. The University had threatened to take the house if fraternity members did not occupy at least 80 percent of it by February 28.

SAM has to guarantee that 23 brothers will reside in its house next fall to meet the University's minimum 80 percent occupancy requirement for a house to be specifically reserved for a fraternity.

In addition to the 13 new brothers, the other 12 members will return in the fall. The fraternity presently has 32 members.

According to Kevin Barron '97, former president of SAM, the fraternity has had low membership since at least November 1994 when he was a pledge.

During the 1994-95 school year the University issued SAM a two-year grace period as an opportunity to increase its membership to meet the University requirement.

Stephen Griffee, Greek Life Assistant, said that SAM has "successfully met all the requirements to keep their house, and is functioning as an active chapter in the Interfraternity Counsel."

Griffee added that the administration is "happy that they're increasing numbers and will support their future endeavors."

James Adlam '98, one of SAM's new members and the president of the fraternity, said that he and some friends decided to pledge SAM in October, because "it was open for progress. So many fraternities on campus are already established, and with Sigma Alpha Mu we could take our own direction."

Adlam said another reason that they pledged was because "we clicked with the brothers. Many of our interests lie in the same place; we have a lot of the same ideas for the future of the fraternity."

Adlam added, "The history of our fraternity on campus is unique. We're the only fraternity on campus who has had a significant amount of minorities for a long time." SAM currently has a large percentage of minority brothers, including Asian, African-American, and Hispanic brothers.

Barron attributes the fraternity's successful recruitment of new brothers to "two reasons: diversity—we have every walk of life at Sigma Alpha Mu allowing for different points of view; and its strength of brotherhood—of course the brothers here don't always agree on everything but we would do anything for each other."

Barron said that the recruitment efforts of Devon Wilson '98, a SAM brother since the spring of 1996, was one of the main reasons for SAM's increase in members. "In October, Devon started talking to a lot of his friends about Sigma Alpha Mu. After that we worked out some details, and soon after that they became pledges," Barron said.

Wilson said that he decided to pledge the fraternity when a friend, who was thinking about joining, introduced the idea that many of their friends join together. Wilson said, "I like the idea of a personal fraternity."

Nevertheless, Wilson was the only one of his friends who became a SAM brother last spring. However in the fall, as co-rush chair, Wilson urged his friends to pledge SAM. He said, "I don't think I was the only reason they joined. I played a sometimes active and sometimes inactive role of getting them here."

Wilson said he enjoys being in the fraternity, though "Sigma Alpha Mu is not the typical fraternity, and I am not your typical fraternity brother."

As president, Adlam said he would like SAM to "see more involvement on campus, not just on a social level, but programs like a rape workshop, Tae Kwon Do classes, and diversity programs."

Barron said in some ways he will miss being SAM president, but he has confidence that Adlam will be a successful president. "We've talked a lot about the role, and this transition period. He's one of the most qualified [to assume this position]."

SAM is one of the strongest national fraternities at the University. Barron said, "We have upwards of 80 chapters, and the last time I remember hearing anything it was the second largest national fraternity."

The University's Sigma Phi Chapter was started in January 1932 and reinstalled in 1987

Physical Plant conversion begins

Jonah Half—The Bucknellian

Chris Peters, acting foreman, with Contractors Group, Inc. works to put in gas lines for the University power plant. The job will be completed in about six weeks, said Tony Pasquarello, District Supervisor for CGI. The gas line installation is a step in the project to convert the Power Plant from coal to natural gas. This project is the reason parts of River Road have been inaccessible recently.

Business blooms for Valentine's Day

Dogwood Hill on Market Street offers several Valentine's Day arrangements. Owner Michael Brody said that flower sales are highest on Valentine's Day, and many Bucknell students purchase them, especially "right in the end." He said that spring flowers, such as tulips, are more popular than traditional roses.

Ali Dwyer—The Bucknellian

BUCKNELL SEMINAR FOR YOUNGER POETS

From June 2 to 28, Bucknell will conduct its thirteenth annual Seminar for Younger Poets. The Seminar provides an extended opportunity for undergraduates to write and to be guided by established poets. It balances private time for writing, disciplined learning, and exchange among the students. The Stadler Center for Poetry is the campus headquarters for the program.

Staff poets conduct two workshops each week and are available for tutorials. Weekly readings by the students provide opportunities for Seminar poets to hear and be heard by their peers.

This year, thanks to the fund-raising efforts of Gary Sojka on behalf of the Center, THREE BUCKNELL STUDENTS will be chosen to participate in the Seminar with students from other universities. Students who have completed their sophomore, junior, or senior year may apply. Bucknell will provide room, board, and spaces for writing. Students are responsible for their own transportation.

THE STAFF

This year's Poet-in-Residence, Michael S. Weaver, will be a member of the Seminar staff. Mr. Weaver is the author of five books of poetry, most recently *Timber & Prayer*. His first book *Water Song* was a finalist for the Walt Whitman Award in 1983. He has had two plays, *Rosa* and *Elvira & the Lost Prince*, produced professionally, and he has received fellowships from the NEA and the Pa. Arts Council. Other staff members are: director Cynthia Hogue, associate professor of English; co-director Karl Patten, professor of English; Deirdre O'Connor, tutor in the Writing Center; and Steve Styers, assistant to the director, Center for Poetry.

APPLICATIONS should include:

1. 10-12 page portfolio
2. An academic transcript
3. A letter of self-presentation (a brief autobiography stressing commitment to poetry writing, experience, and any publications)
4. If the student has not taken an advanced creative writing course (EN 308) at Bucknell, include a letter of recommendation from a writing teacher elsewhere.

Send to:
Cynthia Hogue, Director
Bucknell Seminar for Younger Poets
Stadler Center for Poetry

DEADLINE for receiving materials: March 10, 1997
Letters of notification will be sent by April 7.

If the applicant wishes to have the portfolio returned, a self-addressed envelope should be enclosed. For more information, call the Center for Poetry at 1853.

PUBLIC SAFETY LOG

February 2, 1997

INFORMATION/SUSPICIOUS MALE— A Public Safety Officer responded to Larison Hall for concerns about a suspicious male. A search of the interior of the building and the Freshman Quad met with negative results.

February 5, 1997

INFORMATION— A University student reported to a Public Safety Officer that food items were placed on the vehicle's windshield while the car was parked in the Kappa Delta Rho parking lot. The investigation is continuing.

February 6, 1997

VANDALISM— A Public Safety Officer responded to the area between Sigma Chi and Swartz Hall for a burning couch. A fire extinguisher was used to put out the fire. East Buffalo Township Police Department responded and are investigating the incident.

MEDICAL TRANSPORT— A University student contacted Public Safety Dispatch to request transportation to the Evangelical Hospital Emergency room for treatment of an eye injury. A Student Health Service driver provided the escort.

MEDICAL ASSIST—A Public Safety Officer responded to Larison Hall for a University student experiencing abdominal pains. The student was transported to Evangelical Hospital Emergency Room by ambulance.

February 8, 1997

MEDICAL ASSIST— A Public Safety Officer responded to Hunt Hall for a University student with a fall victim. A Student Health Service driver transported the student to Evangelical Hospital Emergency room for treatment.

INFORMATION/MISSING VEHICLE— A University student reported to a Public Safety Officer that a vehicle, parked in the Bucknell West area was missing. East Buffalo Township Police issued an "attempt to locate" notice. While on routine patrol, a Public Safety Officer located the vehicle on Loomis Street.

INFORMATION— A Public Safety Officer responded to Hunt Hall to recover a fire extinguisher found in the building.

ASSIST- A Public Safety Officer assisted East Buffalo Township Police with traffic control for a 2 vehicle accident at the intersection of Rt. 15 and Moore Ave. No University students were involved.

MEDICAL TRANSPORT— A University student requested transportation to Evangelical Hospital Emergency Room for treatment of a skin irritation. A Student Health Service driver provided the escort.

VANDALISM - A Public Safety Officer and the Lewisburg Police Department responded to a University owned property on University Ave. for broken windows. The windows were repaired and the investigation is continuing.

INFORMATION—A Public Safety Officer received a report that a visitor had tripped in the Fieldhouse. The victim, who was contacted by a Public Safety Officer, reported only minor injuries.

February 9, 1997

ASSIST LOCAL POLICE/DISORDERLY CONDUCT— Sigma Alpha Epsilon Fraternity was cited by Lewisburg Police Department for disorderly conduct resulting from a noise complaint.

VANDALISM/CRIMINAL MISCHIEF— A University student reported to a Public Safety Officer that his vehicle was damaged while parked in Swartz lot. East Buffalo Township Police Department was notified and the investigation is continuing.

MEDICAL TRANSPORT— A University student requested transportation to Evangelical Hospital Emergency Room for treatment of abdominal pains. A Student Health Services driver provided the escort.

February 10, 1997

TAMPERING WITH FIRE EQUIPMENT/DISCHARGED FIRE EXTINGUISHERS— Public Safety Officer responded to the exterior of Roberts Hall for a discharged fire extinguisher. The investigation is continuing.

UNIVERSITY PROPERTY DAMAGE— A Public Safety Officer responded to Trax Hall for a broken stairwell window. A work order was placed for the repair of the window and the investigation is continuing.

February 11, 1997

INFORMATION/SUSPICIOUS MALE— A Public Safety Officer responded to the area of Larison Hall for the report of a suspicious male. The individual was located and identified as a guest of the Ward House.

INFORMATION/FIRE— A Public Safety Officer responded to an alarm activation at Phi Kappa Psi Fraternity. The alarm was caused by cloth falling on a halogen light. The material was removed and the light turned over to the BU Safety Manager.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

Top North Korean official defects

SEOUL, South Korea — A close aide to North Korean leader Kim Jong Il apparently defected yesterday, becoming the highest-ranking North Korean official ever to ask South Korea for asylum.

Hwang Jang Yop, a secretary of North Korea's powerful Workers' Party, and an aide have asked for political asylum at the South Korean embassy in Beijing, said Chung Jong-wook, South Korea's ambassador to China.

A North Korean Foreign Ministry spokesman said it was "inconceivable and impossible" that Hwang had asked for asylum, and said if Hwang was in the South Korean embassy at Beijing, it meant "that he has been kidnapped by the enemy."

The spokesman threatened "due countermeasures" if Pyongyang determines that Hwang was kidnapped.

China is North Korea's closest ally, and a 1978 treaty requires it to return to the North any North Koreans found without valid travel documents.

Alarcon named Ecuadorean president 2nd time in 5 days after former president leaves country

QUITO, Ecuador — While Congress met Tuesday to name Fabian Alarcon president of Ecuador for the second time in five days, acting president Rosalia Arteaga submitted her resignation and last week's president, Abdala Bucaram, left the country.

In a day that summons memories of banana republic politics, Ecuadorean politicians set about resolving a situation they fear is making them the laughingstock of Latin America.

An unusual session of Congress met Tuesday to select a president to replace vice president Rosalia Arteaga, who has been filling in for the popularly elected president Abdala Bucaram, who was removed last Thursday for "mental incapacity."

She urged that a national referendum be held to choose a new president, and said she would return to the vice-presidency when Congress picked a new president.

Congress has already named Alarcon president once, shortly after Bucaram was removed, but Arteaga claimed she was the rightful president, according to the constitution, and had herself sworn into office.

Loan scandal shakes South Korean government

SEOUL, South Korea — One cabinet member has resigned, and the prime minister has said he is prepared to do so, as a loan scandal continued to rock South Korea's government yesterday.

Prime Minister Lee Soo-sung said through a spokesman that he holds himself morally responsible for the scandal, although he said he was not directly involved. New Korea Party chairman Lee Hong-koo has also offered to resign.

"I believe the prime minister must take responsibility," spokesman Ahn Kwan-ki quotes prime minister Lee as saying.

Home Affairs Minister Kim Woo-suk tendered his resignation yesterday, the same day prosecutors summoned him for questioning in the rapidly expanding scandal.

Two top ruling party lawmakers have been arrested and charged with accepting kickbacks in connection with loans for Hanbo Steel, which collapsed in January under a $6 billion debt. Allegations almost immediately surfaced that government influence had made possible millions of dollars in bank loans.

Bus shelter spritz causing a stink in Australia

SYDNEY, Australia — Alcohol abuse activists are raising a stink over posters that emit a whiff of lemon-scented liquor as people enter bus shelters.

The Bacardi-Martini Pacific company has scent-dispensers in 90 bus shelters in Sydney, Adelaide, Melbourne and Brisbane to advertise Bacardi Limon, an alcohol drink with a lemon fragrance.

They spritz a non-alcoholic lemon smell in bursts of 20 seconds every three minutes when activated by motion detectors as people enter the shelters.

But Victoria state's transport authorities are already moving to ban the campaign in Melbourne.

Youth and Community Services Minister Denis Napthine said the promotion would affect youths and people recovering from alcohol problems.

The dispensers spray only the lemon scent, not any alcohol odor.

National News

New allegations against Sgt.. Major of the Army

WASHINGTON — The Army is investigating two additional allegations of sexual harassment against its highest-ranked enlisted man, a Pentagon source said Tuesday.

One of the newly-reported allegations against Army Sgt. Maj. Gene McKinney came from a complaint to the Army's sexual harassment hotline. In the other case, a Navy sailor told her commanders about the incident. Her case was passed on to the Army.

McKinney was suspended Monday pending the results of an investigation into an allegation of sexual harassment filed by retired Army Sgt. Maj. Brenda L. Hoster. The decision came a day after Hoster complained of a "different system of justice" for the service's upper tier.

McKinney had been the senior adviser to the Army's chief of staff since June 1995. The post is an elite one, considered appropriate for role models. In fact, McKinney appears on an Army-produced videotape explaining rules against sexual harassment.

CNN to have first U.S. news bureau in Cuba

WASHINGTON — The Clinton administration cleared the way yesterday for CNN to become the first U.S.-based news organization in nearly 30 years with a bureau in Cuba.

The White House also granted licenses to nine other news organizations to open offices in the Cuban capital, Havana.

White House spokesman Mike McCurry said the decision was in keeping with President Bill Clinton's stated policy to support an "increased flow of accurate information to and from and within Cuba itself."

In its announcement, the White House granted permission for Cuba bureaus to CNN, The Associated Press, ABC, CBS, Univision, The Miami Herald, Dow Jones News Services, Cuba Info, the Chicago Tribune and the Sun-Sentinel of Fort Lauderdale.

Currently, CNN is the only U.S.-based news organization to have been given the go-ahead from Cuba. The other organizations must now gain permission from the Cuban government.

American Airlines, pilots exchange new stances

WASHINGTON — American Airlines and its pilot union have exchanged new contract proposals as talks continue in hopes of averting a weekend strike at the nation's largest domestic airline.

Airline officials and the Allied Pilots Association offered letters outlining their new stances late Tuesday after a day that was characterized as "frustrating" by the union.

The union and the company have been battling over the contract for more than two years, but now they have only a few days to end their stalemate before the promised pilot strike Friday midnight.

If the union walks, the airline won't fly, putting about 90,000 employees on unpaid furlough, grounding the fleet and throwing the nation's air travel system into turmoil.

Several lawmakers have asked President Clinton to intervene, and some of them were to meet on the issue yesterday with White House Chief of Staff Erskine Bowles.

Court denies man right to have assisted suicide

TALLAHASSEE, Florida — A Florida man who is dying of AIDS and wants the right to commit suicide with his doctor's help must wait at least several more months now that the state Supreme Court reinstated a stay Tuesday.

Charles Hall, 35, is the lone survivor in a 1996 lawsuit seeking the right to have a doctor prescribe him a lethal dose of drugs without interference from the state. The other men died before a ruling.

Hall, who says he suffers persistent pain, won a ruling January 31 that said he had the right to doctor-assisted suicide. The state's immediate appeal automatically triggered a stay, which another judge lifted last week.

Student wins $1000

Jonah Half—The Bucknellian

Todd Zeranski '99 won first place in a national OpEd contest sponsored by the Annapolis Group, an organization representing 70 liberal arts colleges. Zeranski will receive $1000 for his winning editorial, "China Policy Miserable in Clinton's First Term." "It's a little overwhelming, but it is really great to be recognized," Zeranski said. Zeranski is currently the Opinions Editor for The Bucknellian.

Task force formed to promote HIV/AIDS awareness

By Argun Ulgen

Bucknellian Staff Writer

"For most students, listening about the AIDS virus is almost like listening to a repeated oldie on the radio", said Donald Stechschulte Jr., medical director of Ziegler Health Center.

To increase student awareness of the AIDS virus, Stechschulte has started an AIDS awareness program at the University. The program will sponsor a series of talks and lectures that deal with certain aspects of the virus.

"Students at Bucknell are not respecting the AIDS virus," Stechschulte said.

There are many aspects of college life that make the AIDS virus a serious threat to the typical college student, according to Stechschulte. These aspects include casual sex and sex under the influence of alcohol.

The focus of the AIDS awareness program will be to inform students about the affects of the AIDS virus in society. These discussions will include the history of the virus, public policy towards the virus, and how the virus has affected our culture over the past 20 years.

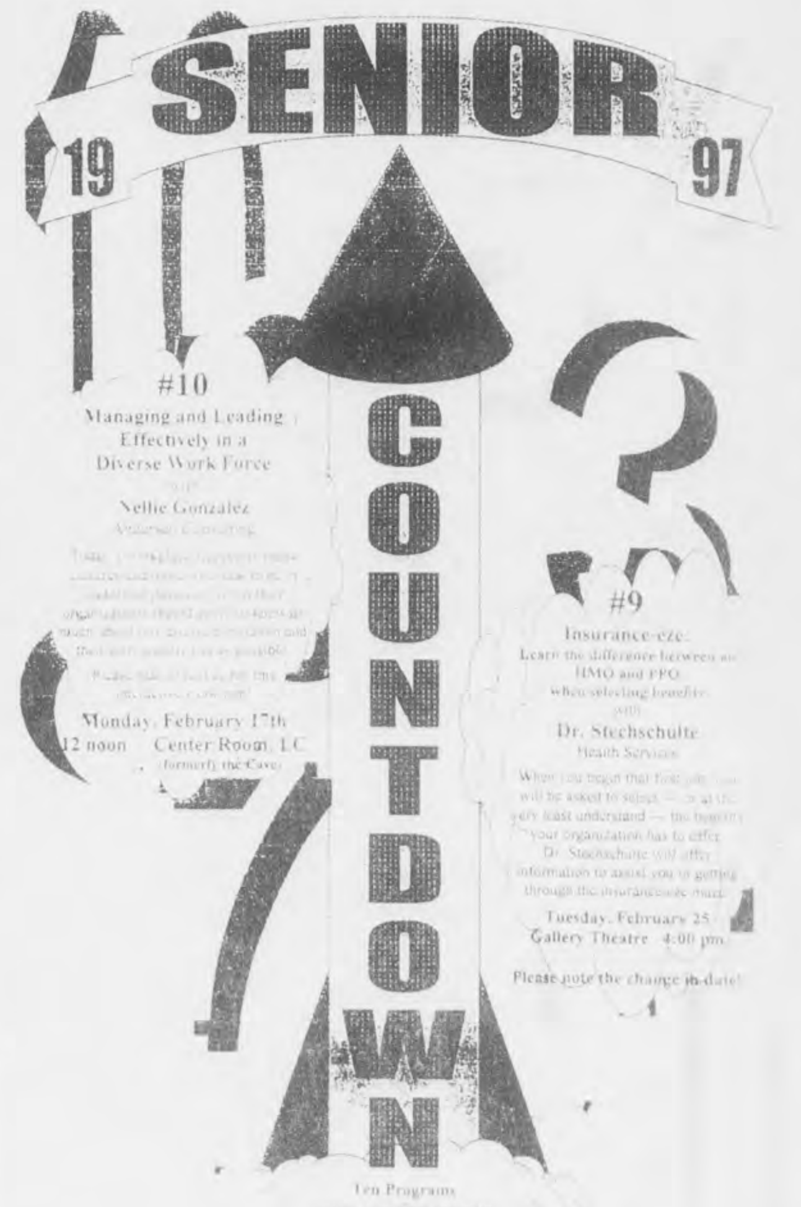
Stechschulte has already received a positive response towards his program. Faculty members, as well as students have shown an interest in this program by responding to his campus e-mail message describing the program.

As Stechschulte said, "Although we don't have a budget, we have a lot of home grown talent. Faculty members have shown interest in giving lectures about the virus."

The AIDS awareness program will host its first lecture on Feb. 20 in the Langone Center Forum. A doctor from Evangelical Hospital will be giving a speech on the history of the virus.

"This speech, as I have heard it before, is like a very interesting investigation. And you need not be a biology major to understand the lecture," Stechschulte said.

Students who are interested in participating in this program should talk to or email Stechschulte.



EDITORIAL

Female athletic prowess not reflected in celebration number

National Girls and Women in Sports Day was started with a resolution from Congress in 1987 to stress the importance of athletics in shaping the lives of women and also to commemorate female athletes of the past. Ten years later, we can see the difference.

There are now two women's basketball leagues. There was increased coverage of women's sports in the 1996 summer Olympics in Atlanta. And female athletes are frequently pictured in magazine advertisements.

These visible changes are echoed by the nation's celebration of National Girls and Women in Sports Day. The festivities centered in Washington D.C. were extensive, with crowds of people gathering to take part in the two-mile fitness walk around the Washington Mall and to support the guest speakers.

The sheer numbers and support for the program sponsored by the University last week was not a mirror image of the nation's celebration. But perhaps the reason for the less than overwhelming response is the type of event chosen to commemorate this important day. Maybe if Tuesday's speaker could have been combined with last week's ceremony there would have been a greater turnout as time did not have to be divided between two important events.

Although it is unfortunate that the enthusiasm at the nation's capital was not present en masse at the University's celebration, it is important to recognize that women's athletics are an integral part of this campus and their absence would be greatly felt by the community. To emphasize this point, women participating in athletic activities may be so second nature that people in the community found no reason to bring particular attention to the phenomenon.

It is a relief to be a part of a society and community in which women are a welcomed aspect of the sports community. It's nice to know that we are no longer part of a society in need of founding a special day to acknowledge and celebrate women in athletics because female participation in sports is mainstream. The challenge is to continue to integrate women and girls into mainstream athletics and to increase the value placed on them there.

In the meantime, kudos to the organizers of the University's celebration of National Girls and Women in Sports Day and an even greater applause to the women and men who have made female athletes a common reality.

LETTERS

Local women set piggery facts straight

TO THE EDITOR:

We are writing in response to the article *Local farmer fills air with foul smell*, by Argun Ulgen appearing in your February 6th, 1997 issue. We want to make very clear that the article has nothing to do with what we said in our interviews and even less to do with the truth. The article is full of glaring inaccuracies and gross exaggerations. The most obvious mistake is that the piggery in question is not even in operation at this time; it has not even been constructed, and therefore, certainly cannot be the source of the "pungent odor hovering over the campus..."

Among the many other errors is the statement that the land in question is south of the campus (it is to your west) and the ridiculous statement that a stench can be detected 10 to 50 miles away from its source. In addition, we were grossly misquoted. The most basic of demands on a reporter is to tell the truth. This criteria was most disregarded in your article! Get your facts straight!

In Kelly Township, we are struggling to understand and balance the needs of farmers and residents. We greatly respect the difficult and extremely important work that farmers do and the changing environment in which they work. As their neighbors, we hope to find ways to work together to preserve the family farms and the appropriate use of the land. In a volatile situation such as this, with strong feelings on both sides of a difficult issue, an article such as Mr. Ulgen's serves to only fan the flames of misunderstanding.

KATHRYN LESSLIE
BETSY QUANT
LEWISBURG, PA.

Other campus issues exist besides Tent Party

TO THE EDITOR:

As the class of '97 faces a new beginning with the advent of graduation, we must ask ourselves where our priorities lie. Are we a generation of concerned individuals or a generation of substance dependent mindless drones? Does Bro Adams' decision to prohibit alcohol at our graduation tent party warrant the overwhelming response of whining and bitching over a few lousy cups of beer as morons scribble into the paper complaining about how no one will show up for a party without alcohol? Is drinking the only means by which we understand how to socialize and unify? Our class is willing to speak out in protest concerning our right to drink, yet every day we passively accept atrocities that occur on our own campus. We watch while women are drugged and raped at our Frat parties and we remain silent. We regret to inform you that there are no signs reading "Down with Rape" across campus—Bro Adams' decision seems to be the only issue worth of response. Is this really a campus of the intelligent, elite and a symbol of the future, when the only time we have spoken out is over our right to alcohol at a tent party? Is Bro Adams' decision totally fair? No, not really. If this decision is that distressing, then why aren't there petitions, some organization and intelligent arguments, rather that the sniveling and griping that has, thus far, been our only response? Just for a minute, stop and think about what our priorities are and how we intend to approach the future. Will it be as responsible adults or as a bunch of whining alcoholics reaching for another cup of Natty Bro?

KYLE HOLLOMAN '97
GILLIAN KIRSTEL '97

Tent Party alcohol controversy continues

TO THE EDITOR:

Many horrible things have happened at Bucknell over the past four years. The extreme number of sexual assaults reported last semester might come to mind. Or we might think of other hateful incidents that take place at Bucknell almost daily. Unfortunately, the only thing members of the Class of 1997 seem to care about is whether or not they are going to get alcohol at Tent Party. This is a tragedy. It is the only thing our class has ever taken a stand for.

Of course, this united stand isn't as united as it might seem. Not every senior is going to boycott Tent Party. Not every senior is going to revoke his/her pledge from the senior gift drive. Not every senior was at Skips to yell "Boo" when asked what he/she thought of President Adam's decision. Not every senior feels that the only way to celebrate is to get drunk. Some seniors support President Adams' decision and some don't care either way.

In her letter, Amy DeCristopher said she had looked forward to Tent Party as a final time for [her] classmates and [she] to spend a good time together. There is no reason that the Class of 1997 shouldn't get together at Tent Party and have a good time. (Unless, of course, consuming alcohol is the only way to have a good time.)

Most students opposed to President Adam's decision seem bothered that one of his reasons was the underage drinking at the Gala, an event Cozette Cuppett reminds us was open to the entire student body and thus, students who attended represented all four classes. Underage drinking goes on at Bucknell every weekend. And it happens at Tent Party, an event which isn't restricted to seniors and their families. Past experience has proven that you don't have to be 21 to get a bracelet. If past procedures haven't worked, then perhaps it's time to change them. Maybe making Tent Party dry isn't going to change the alcohol problem at Bucknell, but at least it is a start in recognizing the problem.

As for the idea that we will be faced with drinking in the real world beyond Bucknell, at office parties and so forth, what are you going to tell your employer if the office party is going to be alcohol free? Being mature enough to drink also means being mature enough to not need to drink.

Miss Cuppett stated that memories from graduation and Tent Party will form our final impressions of Bucknell University. We agree. So why not go to Tent Party, enjoy the time with your friends and classmates, and remember Bucknell for what it offered you—personal and academic learning experiences?

OPINIONS

Money's influence on death penalty must be restrained

BY NICOLE MAESTRI
Bucknellian Staff Columnist

Money buys justice. That is a persistent criticism of our judicial system. Sadly, it seems to be true at the moment.

On February 3rd, the American Bar Association voted to seek a moratorium on the death penalty, despite opposition voiced by the President of the ABA and the Clinton Administration.

Why was the moratorium ordered if there was so much opposition towards it? Was it ordered because the ABA had a sudden realization that an eye-for-an-eye justice is not fair in our civilized, democratic society? Is it because they realized that executing violent criminals has not been proven to deter crime? Or perhaps it all boils down to money and the fact that most criminals on death row are minorities who could not afford a brand-name defense.

The ABA wants this moratorium because it believes the way in which the death penalty is currently administered is characterized by "a haphazard maze of unfair practices." The ABA had previously developed policies designed to ensure fair capital punishment trials. These policies included calling for competent counsel for all capital defendants, efforts to eliminate racial discrimination in capital sentencing, no executions of mentally retarded defendants or those under 18 and availability of federal court review of state prosecutions. In truth, these policies have not been consistently implemented and many defendants are going into court with defense lawyers who have only been paid $800 to represent them.

Ultimately, this means that defendants with no means to finance a competent, dedicated defense are being represented by a lawyer who is being paid practically nothing and who would rather be someplace else. Meanwhile, the prosecution has every resource imaginable at its disposal. After all, a successful prosecution means accolades for the police department, the mayor, the governor and anyone else who could possibly reap rewards. Who benefits when the prosecution loses?

The ABA might sight unfairness and haphazardness as the reason for the moratorium but in all honesty, its true cause is money. If every one on death row had been able to purchase the defense team of OJ, would this moratorium be called?

There will always be a debate as to whether or not the death penalty should exist. But the death penalty, whether morally right or wrong, cannot work in our society because its justice is sought through financial, not factual, means.

Can we justify killing one human to avenge the death of another? I don't know. But until money fails to buy justice, the death penalty will never be fair.

EDITORIAL POLICY

The editorials of The Bucknellian *reflect the consensus of the Editorial Board as to the topics and general position. If a consensus could not be reached, the opinions expressed are those of the Editor in Chief.*

All other opinion material represents the views of the author and not necessarily those of The Bucknellian.

PUBLISHING POLICY

The Bucknellian *is written, edited, and published each Thursday during the academic year entirely by Bucknell University students.* The Bucknellian's *fiscal affairs are overseen by an Advisory Board comprised of faculty, staff, and administrators. All published material is chosen by the paper's Editorial Board without any prior review by its advisors, the University, or the Bucknell Student Government.*

The editorial content of The Bucknellian *does not necessarily reflect the opinions and attitudes of Bucknell University's administration, faculty, or trustees.*

The Bucknellian *is produced using Aldus PageMaker version 5.0a on Apple Macintosh computers. ITC Stone Sans and ITC Stone Serif are the paper's principal typefaces. Page mechanicals are printed on a Imager Plus 12, NewGen Systems Corporation laser printer at 1200 x 1200 dots per inch.* The Bucknellian *is reproduced at the Milton Standard, Milton, Pennsylvania.*

ADVERTISING POLICY

The Editorial Board of The Bucknellian *reserves the right to deny advertisements if offensive, illegal, or in bad taste. For advertising rates, please contact the advertising manager at (717) 524-1085.*

LETTERS POLICY

The Bucknellian *welcomes readers' comments on important campus, national, and international issues. Letters must be submitted by 5 p. m. Tuesday to appear in Thursday's issue. All letters must be typewritten in 12 point New York font and signed by the author. Letters must contain less than 750 words. We reserve the right to edit letters for length or libel. We attempt to publish all responsible material, but we reserve the right not to publish due to spacing, technical, legal, or other problems.*

Authors wishing to remain anonymous must make arrangements with the advisor to The Bucknellian, *Katherine Wheatcroft.*

Address letters to The Bucknellian, *Box C–3952, Bucknell University, Lewisburg, PA 17837, bring them to our offices in the basement of the central wing of Roberts Hall, or submit them electronically to bucknellian@bucknell.edu. On campus submissions by Macintosh users may also be placed in* The Bucknellian *"drop box," accessible by guest login to the computer "Schubert" in the "Acad" AppleTalk zone.*

SUBSCRIPTIONS POLICY

Subscriptions are available at $45 per year, $30 per semester. To subscribe, send payment and address to The Bucknellian *Subscriptions, Box C–3952, Lewisburg, PA 17837. Subscriptions are mailed first-class on the Friday following publication. Please send change-of-address information to the above location as well.*

QUESTIONS AND COMMENTS

To register questions or comments, please call our offices at (717) 524-1551 or (717) 524-1520, write to us at Box C-3952, or send a facsimile to us at (717) 524-1176. Internet-savvy writers can contact us via email at bucknellian@bucknell.edu.

OPINIONS

State of the Union speech disappoints

BY BRIAN J. WALSH

Like millions of Americans, not including those waiting anxiously for a certain verdict, I found myself in front of the television last night watching the annual rite of pomp and circumstance known as the State of the Union Address. As Mr. Clinton's recent Inaugural Address has provided little, if any, insights into his goals and visions for the next four years, it was my hope that some tangible answers would be forthcoming. Unfortunately, after breaking through a surface lined with rhetoric and mindless "calls to action," one thing became increasingly clear: for the time being, or at least until Al Gore's 2000 Presidential bid, the era of big government is back.

With the election behind him, Mr. Clinton is now able to dispense with his centrist facade and attempt to push forth with Hillary's, I mean his, vision of a "Great Society." A society where government or at least a village takes the place of a family. A society in which nationally-recognized family "experts" rather than parents take charge of value and citizenship education for our children.

In a recent nationally-conducted survey, a group of Americans were asked what they considered to be the greatest problem in America today. Not surprisingly, the overwhelming answer was a "poverty of values." Well, my fellow Americans, in his speech last night Mr. Clinton told us that we can all rest assured, for in the coming months the White House will be holding a national conference on "new scientific findings that children have the ability to learn at an early age." But wait, the good news for America doesn't stop there because in addition to this historic meeting, vice-president Gore will also be holding his Annual Family Conference that will examine how to get more parents involved in their children's education.

While I am confident that the results of these conferences will achieve historic steps, reversing the increasing decline of values and change the face of our nation forever, could there perhaps be a better way of dealing with the problems of our youth? Apparently not in Mr. Clinton's America, as he pledged a record of $51 billion for education in his new budget. While that may play well in the polls, doesn't he ever wonder why America outspends every other country in education by almost 3-1, but, continues to fall behind its competitors?

What I find most intriguing about Mr. Clinton, however, is that he continually attempts to make the American electorate believe they are against an issue, that poll after poll has shown they favor. One of his most shining examples came early on last night when Mr. Clinton made an allusion similar to one reported in the press several weeks ago, which is that Social Security checks might be stopped, or at least cut, if a Balanced Budget Amendment was passed. That's right, if such an amendment is passed by those radical Republicans on the Hill, hard-working Americans might not receive their due benefits. Knowing that such a ridiculous charge would never be challenged by the liberal media, Clinton once again successfully exploited the elderly to circumvent the true political reason.

The real reason why Mr. Clinton does not support a Balanced Budget Amendment is that if one did exist, he would be forced to make difficult decisions between the big government programs he supports and a tangible level of fiscal accountability. It would force him to be a leader rather than a spin-doctor. This is an unacceptable proposition to Mr. Clinton, and therefore, he continues to preach his support for a balanced budget, but conveniently manages to change the year each time. I believe 2002 was the target date of last night, which like all of the others, just happens to be after he is out of office.

A final major domestic issue that Mr. Clinton addressed last night dealt with campaign finance reform and more specifically, his support for the McCain-Feingold Bill which would achieve that end to some extent. Fortunately this is an issue that on general principle is supported by both Democrats and Republicans. However, while I applaud his support of this bill, I am somewhat curious to see if in the coming months, Mr. Clinton asks for exemptions for Asian businessmen. Remember, Al Gore has a campaign coming up in a few years.

O.J. trial reveals the price of modern justice

BETH HAGGERTY
Bucknellian Staff Columnist

The verdict to the Trial of The Century, Take Two, was finally delivered on last Tuesday. Nationwide anticipation has been mounting as everyone wondered if O.J. Simpson would be found guilty in his civil trial. The plaintiffs, the families of Ronald Goldman and Nicole Brown Simpson, after having endured more pain than any two families should ever have to, have finally been vindicated in the accusations they made after the murders.

Court analysts agree that the two main reasons Simpson was found guilty were the facts that he could not maintain his credibility on the witness stand when he testified and the introduction of evidence not permitted or not used in the criminal trial.

> ***Isn't it sad that it has taken since June 12, 1994, over two years, to finally produce the truth? The evidence is undeniable and Simpson should be in jail, but due to this country's weak and faltering legal system, all that will happen is that Simpson will pay huge amounts of money but will never be committed to prison.***

Jury analyst Robert Hirschorn explained that the jury simply did not believe Simpson's testimony as he repeatedly contradicted himself first by claiming he couldn't remember how he got cuts on his hand on the night of the murders and then saying he had never cut himself at all. Furthermore, he said that he had never hit his ex-wife Nicole Brown Simpson.

The introduction of evidence not permitted or not used in the criminal trial helped the prosecution immeasurably. The use of Nicole's diaries and letters explaining that O.J. beat her and was threatening to kill her, O.J.'s suicide letter, his slow speed car chase, and the 31 pictures of O.J. wearing the size 12 Bruno Magli shoes that matched the bloody footprints found near the bodies all contributed immensely to the guilty verdict.

USA Today maintains that "Simpson will never be a murderer" because that was decided in the criminal case, but he has been found "responsible for the fatal attack on Ronald Goldman and Nicole Brown Simpson." Sounds like the same thing to me. During the trial, prosecuting attorney Daniel Petrocelli shouted at Simpson, calling him a "liar," "cheater" and "murderer." And then the jury, by finding Simpson "responsible for the fatal attack" on Goldman and Nicole Simpson and guilty of all seven accounts, basically said that they agreed.

But isn't it sad that it has taken since June 12, 1994, over two years, to finally produce the truth? The evidence is undeniable and Simpson should be in jail, but due to this country's weak and faltering legal system, all that will happen is that Simpson will pay huge amounts of money but will never be committed to prison.

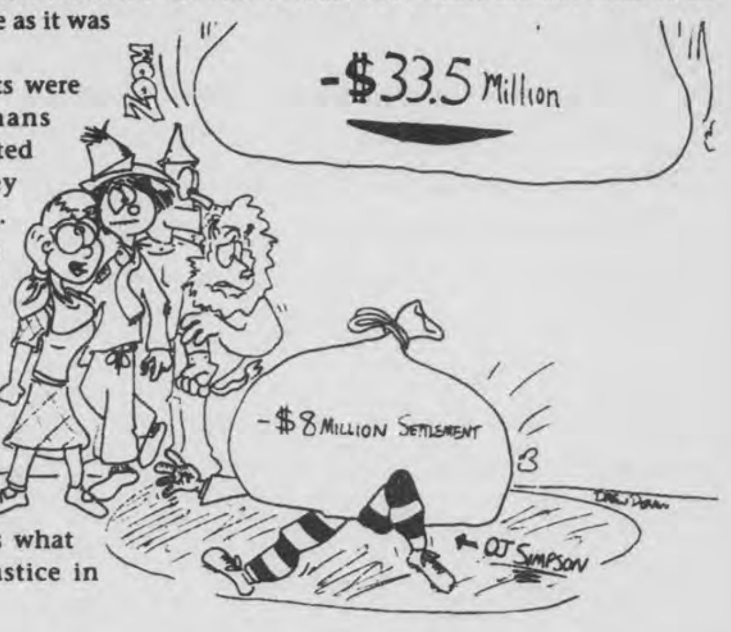
It almost seems as though this trial was an attempt to make up for the fact that they were wrong the first time. After all, when someone fails a polygraph test, as Simpson did with the worst possible score, he is guilty. This trial just have to be chalked up as new evidence produced a new verdict, what should have happened the first time.

Just imagine if all the evidence that Judge Ito would not allow in the court had been used the first time. Just imagine if Ito had not given in to the media and allowed the trial to become a three ring circus. Maybe, just maybe, there could have been a sense of closure for the victims' families a long time ago. Maybe we could have saved precious dollars of taxpayers' money that could have been used for something worthwhile and positive for the community. Maybe more Americans would not have lost all faith in the legal system if justice could have been served the first time around.

I applaud Judge Hiroshi Fujisaki for not giving in to the media, who if given the opportunity, would certainly have turned this trial into another hysterical mess. Judge Fujisaki ran his courtroom efficiently, and finally, someone stood up to the issues of race and money and power. He refused to allow Simpson to get off because he was once a professional football star and an actor. And the fact that he was an African American and the victims were white did not seem to be as much of an issue as it was last time.

As the verdicts were read, the Goldmans and Browns erupted with joy, as they well should have. Yes, they will get a lot of money, but that really isn't the point. The point is, as Fred Goldman made clear as he left the courthouse, "Justice."

I guess this is what it takes to get justice in 1997.



Female sports at Bucknell deserve more student attention

BY E.J. CRAWFORD
Bucknellian Staff Columnist

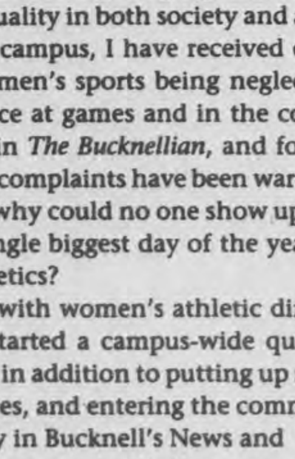
Apathy has long been a complaint on this campus, and while some of our sporting events have not always been well attended, I have never thought of Bucknell as a completely apathetic campus, and certainly not worse than most schools. However, last Thursday something happened to change my mind.

As millions descended on Washington D.C. to celebrate National Girls and Women in Sports Day, hardly anyone came to the Cave in the Langone Center to commemorate the day on our campus, prompting an otherwise enthusiastic Janice Butler, director of the Women's Resource Center, to admit that she was "a little disappointed in the turnout."

Other than five students reading about famous female athletes, Bucknellian photographer Jonah Half and myself, there was only one student. In addition, by my rough estimation, there were only two or three coaches that showed up, and maybe 25 people overall.

For an event that symbolizes and promotes women's athletics and the steps that women have made and are still attempting to make in modern-day society, I find it shocking that more people (particularly women) on this campus did not make it to this event.

Women have been long campaigning, and rightly so, for more equality in both society and athletics. Even on this campus, I have received complaints about women's sports being neglected, in both attendance at games and in the coverage they receive in *The Bucknellian*, and for the most part the complaints have been warranted. But then why could no one show up to support the single biggest day of the year for women's athletics?



Butler, along with women's athletic director Rose Ewan, started a campus-wide quiz to generate interest, in addition to putting up signs, mailing out notices, and entering the commemoration of the day in Bucknell's News and Notes. In addition, an invitation was mailed out to every coach and female athlete in the University, so there is no reason to justify the turnout.

I do understand that many people are busy and have class, and that the Cave is not the most well-known or accessible place on this campus, but the plain fact is that neither the coaches or the students gave much support to a very important event.

I do not want to focus just on the women on campus. There is no reason that men could not support women's athletics, but I'd be lying if I was to say that I expected to see a lot of men in attendance.

Women in sports have made great strides since the times of Flo Hyman and Billie Jean King and are now a major force in the world of sports. Hopefully the same can be said of the strides women have made on this campus. But there is still much for women, both nationally and locally, to accomplish. This may be a sad fact, but it is true nonetheless. And while it is very easy to complain about equality and to say that women do not get a fair shot, it is actions that matter. So if actions truly do speak louder than words, very little was said in support of women's athletics by this campus Thursday.

Cooking with Katie

Toasted Almond Swirl Tart

For those seeking to fall in love, or for that insatiable chocolate lover, this tart is the one. *It's composed of white and dark chocolate ganache, swirled together in a flaky almond crust, and is intensified with generous infusions of kahlua and amaretto liqueurs. The finale to this sweetest indulgence is a fine layer of red raspberry jam between the crust and the filling, which exhibits that extra thrill so easily derived by combining* anything *chocolate with* anything *raspberry.*

- *1/2 cup whole roasted almonds*
- *1 and 1/4 cup unbleached flour*
- *2 T sugar*
- *tiny pinch of salt*
- *1 and 1/2 T cold unsalted butter*
- *1/2 cup canola oil*
- *3-5 T salted ice water*
- *1 cup heavy cream*
- *8 oz. fine quality dark chocolate, chopped*
- *8 oz. fine quality white chocolate, chopped*
- *1/4 cup kahlua*
- *1/4 cup amaretto*
- *5 T red raspberry jam (not seedless)*

Make tart crust:

1. *In a mini-prep or food processor, grind almonds finely.*
2. *Combine ground almonds, flour, sugar and salt in a large bowl.*
3. *Brown butter over medium high heat; remove from heat and whisk in canola oil.*
4. *Cut butter into the dry ingredients with a fork.*
5. *Add the water 1 tablespoon at a time, until the dough holds together on its own.*
6. *Roll out to a 14" disk between two sheets of plastic wrap.*
7. *Place into 10" tart pan, carefully molding the sides.*
8. *Bake at 350°, approximately 15-20 minutes, or until dry and golden brown.*

Assemble tart:

1. *Carefully heat the raspberry jam over low heat. Spread gently over the bottom of the tart crust.*
2. *Heat 1/2 cup of heavy cream to a simmer over medium high heat.*
3. *Remove from heat and whisk in chopped dark chocolate and kahlua.*
4. *Pour into the cooled crust.*
5. *Repeat step 3 with the white chocolate and the amaretto.*
6. *On a level surface, pour white chocolate in a steady spiral into the dark chocolate.*
7. *With the point of a toothpick, swirl the white and dark chocolates.*
8. *Refrigerate for 2 hours or until set. The tart may be refrigerated for a few days.*

To accentuate the indulgence of this dessert, serve with fresh raspberries and a dash of freshly whipped cream. Paired with an armful of pink roses, you might just win the heart of your valentine.

Looking past Valentine's Day

Engaged students share their stories and excitement

BY TED BURNES

Bucknellian Staff Writer

So, tomorrow is Valentine's Day. Flowers will overflow from the Switchboard, couples will be holding hands all over campus, and romance will be in the air. For some students, however, romance has been in the air for quite some time, and they have a bigger event than February 14th in their future.

Cara Mickelsen—The Bucknellian

Lisa Allen '97 spends much of her free time planning for her November wedding.

In addition to their studies, Greek life and extra-curricular activies, they have to deal with white dresses, photographers and living situations. But it's well worth it: they're getting married. In honor of Valentine's Day, engaged students talk about love, with a little ring on the side...

Do you wonder where and when you're going to meet that special someone? Sometimes, it's the last place you think of. "I met my fiancé at a summer picnic," says Lisa Allen '97. Allen and her fiancé, Steve Hawken, a senior at Corning University, met at a party held by Lisa's friend, who happened to be Steve's cousin. They dated for three years before getting engaged, and they have plans to be married in early November.

Others met their fiancés through Bucknell itself. "My fiancé and I were both part of Bucknell's swim team," says Sarah Cranston '97. Sarah's fiancé, Stewart Harris '95, proposed to Cranston this past Superbowl...and what a proposal it was. While watching the Superbowl, Sarah popped a video in the VCR that her boyfriend had given her and began watching it during the commercials. The video showed Harris and his dog playing fetch. One time when the dog went back to catch the ball, he came back with a ring box in his mouth. At this point, Harris got down on one knee and proposed to Sarah on tape.

"I knew my fiancé since my freshman year," says Eustacia Muir '97. "We were both in the Environmental College, and we began dating later that year." Muir and her fiancee, Rob Jacob '97, got engaged at Rickett's Glen, a waterfall that they had been to while dating. "We had been there freshman year and gone mountain climbing. It was beautiful, and Rob took me there and asked me to marry him... I said yes right away."

Think it's hard making plans to see your significant other this Valentine's Day weekend? Well, for some of our engaged students, schedule-juggling for a sweetheart is a weekly deal. "My fiancé lives about two hours away, and he comes to see me every weekend," Allen said. Cranston, who has only been engaged for a short time, says her fiancé took off a week of work to come and stay with her after they got engaged.

"I think the hardest part is making time to see one another," says Jacob. "I mean, Eustacia and I both work and have classes and things on our minds. It's a struggle, but it's important that we see one another a lot, have dinner together, etc."

For other students, schedule-juggling is not an option. "My fiancé is a CPA, and he's working through the busiest time of his year. I probably won't see him for quite a while," says Pam Warner '97 whose fiancee, CJ Rhoades '96, is working in southern Maryland. "It's not as hard as people think it is," Warner said. "I mean, he lives in Maryland and I'm from New York, so we've dealt with the long distance thing for a long time."

So, wondering how these students are planning a wedding and handling their work? "It's hard," Allen said. "I have so much to do, and every chance I get, I go home so I can work on planning the wedding." Allen says her wedding will be big. "It will be about 200 people. I have seven bridesmaids and Steve has seven ushers. Some of my friends from Bucknell are going to be in the wedding party, and some of them are coming to sing for the service." Cranston says her wedding is taking place at the United States Navel Academy, and will also feature about 200 people.

Many people wonder if it's hard being engaged on a college campus when all your friends are out meeting people and partying, but the soon-to-be-married students I talked to said no. "My fiancé and I lead very separate lives," says Warner. "I think it's important to keep one's individualism in a relationship. I'm a senior, and my fiancé knows what that was like. He wants to give me the chance to enjoy being a senior. I think the only hard part is sometimes missing him. I mean, both my roommates have boyfriends, and I don't want to be a fifth wheel."

Cara Mickelsen—The Bucknellian

Stewart Harris '95 and his dog Sela proposed on video to Sarah Cranston '97 during a Super Bowl commercial.

"I love being engaged," Allen said. "My roommates all are good friends with my fiancé; you could say he was 'one of the girls'. We all go out and have a good time together." Muir and Jacob agree. "We both have a lot of the same friends," says Jacob, "and even though Eustacia has stuff to do with her sorority, that makes no difference. We both lead our own lives."

Do these couples have any plans for the future? "Eustacia's applying to medical school, so I'm going where she gets accepted," Jacob said. "After that, who knows? I'm a Geology major, and I would love to get some mission work in Africa."

Warner says that her fiancé's job as a CPA has already determined her future whereabouts; she plans to move to Maryland sometime after graduation.

Allen says that she and her fiancé hope to move to northeastern Pennsylvania. "It really depends where one of us gets a job; we want to be able to live where we want to, but you never know."

Despite the pressures of matrimony, everyone I talked to seemed to be excited about getting married. "There aren't really any down sides," Warner said. "I guess I'm a bit overwhelmed because it really hasn't hit me yet. I've dreamed about getting married since I was a little girl, and now it's really happening. I'm very excited, though."

Cara Mickelsen—The Bucknellian

Pam Warner '97 knows what it is like to have a long distance relationship during her engagement.

Just How Often Does Cupid Strike?

Were you sure you'd marry that special someone in your 8 a.m. class? Rooke Chapel weddings happen less often than you might have heard...

BY LUCY HANCOCK

Have you ever heard the rumors that 60, 70, or even 80 percent of Bucknell's students marry someone else from the University? I remember hearing this for the first time during orientation, looking around my freshman hall, and practically going into shock.

That was not the last I heard of such statistics. As a junior, I have heard many people confidently throw these numbers about as if they were set in stone. But just how close *are* they?

With Valentine's Day fast approaching, I decided to see what other students had to say, and if I could get definitive proof of Cupid running rampant across campus.

It turns out that many students have heard rumors that up to 80 percent of us will marry someone else from this University. However, the trust in such numbers is rather varied.

Morgan Moran '97 said, "I've heard it's a pretty high percentage. I'm not sure what the numbers are, but I think that most people here marry other Bucknellians."

Scott Schiller '98 heard the same rumors as Moran. "Before I came to Bucknell, I heard that it was pretty high, about 80 percent." However, Schiller now questions this high of a number because "I don't see it happening that often."

Molly Depner '97 is the daughter of two Bucknell alumni. She too is surprised by the rumors. "I'm a senior and I don't really know of many couples who are getting engaged," Depner said.

These rumors do not exist only among the students. Many faculty and staff are also aware of the claims. Kim Verstandig, Director of the Alumni House, stated, "I don't know the official statistics, but it would be interesting to find out. There's always the rumors that it's somewhere around 50 or 60 percent."

Well, enough suspense...here's the real percentage. Out of the 39,000 alumni on record (dating back at least 45 years), there are 2,862 couples who went to Bucknell. That is 5,724 alumni or (drum roll please) a whopping . . . 15 percent? Yes, it turns out that only 15 percent of the University's graduates have married someone else from the school.

To get the official statistics, Alumni Relations consulted the University's database of alumni and friends which they use to keep track of Bucknell alumni and important events in their lives, such as weddings. The information is gathered through a clipping service that scans various newspapers across the country, as well as through class notes, union questionnaires and calls to the Alumni Office.

So now we all know that the rumors were, well, slightly off target. Although there is a rather large difference, 15 percent is not an insignificant number. When you look around your Chemistry lab or English class this Valentine's Day, just think: one out of every seven of you will probably marry someone on this campus.

Rob Jacob '97 and Eustacia Muir '97 are joining the Bucknellians who have decided to share their lives with one another. Photo by Cara Mickelsen.

Internet site offers virtual match-maker

BY MELISSA RENZI

Bucknellian Staff Writer

This Valentine's Day, there's more than love in the air, there's a world of virtuality and cyberspace that may demand some attention.

It's been said that the three most important things that everyone knows are their name, their phone number and their Zodiac sign. If you've got this information under control, then check out www.astrology.net for a virtual tour of your relationship possibilities.

While we've all heard horror stories about virtual romance, we can use the World Wide Web to our advantage without taking the risk of a typed-in love connection. So, single or not, Valentine's Day may be the perfect excuse to get your very own computerized astrological forecast.

Here's the scene: You're sitting in the computer lab on Valentine's Day and just haven't yet received that long awaited "will you be my Valentine" message. Never fear, astrology.net's here.

Feel like a quick compatibility check for you and the "someone" you've been interested in? Astrology.net is equipped with a simple chart that will rate your relationship. With yet another click, this site will offer more of an explanation.

Still skeptical? While the web does lack Chuck Woolery to lead us through the trends of modern relationships, www.astrology.net gives us at least a chance to compare our own lives and observations with those forecast by our sign and planetary alignments.

If we enter without the hope of having our lives being mapped out for us right on the screen, we have nothing to lose. Like most astrology sources, this site is intended for entertainment purposes only.

How about branching beyond love to those relationships that are also inherent to our lives? With the sign of a friend or family member, you can check out their forecasts and characteristics in relation to your own.

Astrology.net also gives breakdowns of earth, fire, water and air signs. "All of my closest friends are water signs, it kind of freaks me out," said Robyn Dillon '99.

Dillon has the advantage of knowing that water signs are compatible, yet astrology.net might offer further analysis of these relationships.

Curious about the astrological rating of your sign's caring, romantic, jealousy or daring characteristics? Astrology.net offers yet another chart rating these factors.

While we realize the entertainment value of such a site, it's interesting when the stars align with our relationships. "My best friend is a Pisces and I'm a Cancer, they are known to be the best match," said Emily Okie '00.

In honor of Valentine's Day, read on for your 1997 love horoscopes:

Aquarius (January 21-February 19)

With your own elusive ruler right at home in the sign of Aquarius, you are harder than ever to pin down. Indeed, while a host of sexy hopefuls will give chase, you'll feel uncomfortably like prey at times. Which only goes to show how head-over-heels you could be for the one who manages to bag you.

Pisces (February 20-March 20)

Fish have a rather atypical yen for freedom now, and here's another flash: Suitors are irresistibly drawn to the new, more independent you. The harder you try to evade commitment, the more determined they are to hook you for life! Still, you've a mind to drift, preferring a series of sexy liaisons to a single grand amour.

Aries (March 21-April 20)

Though wanna-bes abound, the Ram makes several false starts before finding just the right squeeze. Still, you're never lacking for playmates. By December, contender number three proves themself a most worthy front-runner.

Taurus (April 21-May 20)

A distinguished professional contact, dashing holiday romance, and darling old pal tug at Taurus' heartstrings, and frankly, the outcome is by no means predestined. Settling on one just one of these charming, eminently eligible individuals may be the hardest challenge you'll face, in fact. If only every year could be so tough!

Gemini (May 22-June 21)

Casual flings are Gemini's forte, naturally, but this year, one could lead to awkward complications unless you're careful—which you probably won't be (caution is not your strong suit). Still, you have a stimulating time of it, and there's more excitement to follow, as several attempt to track you down. Enjoy!

Cancer (June 22-July 23)

Normally, prickly Crabs are prone to imagine slights—but not this time! Instead, a sulky inamorato plays the injured party—an unlikely role reversal that drives you straight into the arms of a wonderful replacement. The rest of the year is heaven—provided you've learned your lesson well: To flourish, romance must be nourished by trust.

Leo (July 24-August 23)

In February, a pal plays fairy godmother by introducing you to someone who's smart, funny and stunningly sexy. So what if it doesn't proceed to a storybook ending? In view of that Leo flair for drama, you'd get bored without a little suspense.

Virgo (August 24-September 23)

An impassioned ex, intriguing career contact and former inamorato are just a few of those after you, but they haven't a hope fending off a Scorpio who turns your heart all fluttery without even trying.

Libra (September 24-October 23)

There's barely a month this year when you aren't involved, hardly an attractive person in your orbit who doesn't want your affections.

Not surprisingly, the problem will be in narrowing the field—never easy for you, as you well know.

Scorpio (October 24-November 22)

Expect to feel atypically scattered as stellar forces pull you in conflicting directions. On the one hand, you yearn for a steady and have no shortage of willing candidates. On the other, you're strongly drawn to one with whom the potential for permanence may not be there.

Sagittarius (November 23-December 21)

Always in tune with the latest trends, you have your technological interests to thank for a promising new paramour now. Footloose Sagittarius are ready to mend their rambling ways!

Capricorn (December 22-January 20)

With so many appealing prospects, purposeful Saturn could wind up playing the field almost in spite of themselves. Still, your preference is for permanence, and December sees you launching into a relationship with real potential.

As appeared in Cosmopolitan's Bedside Astrologer

New doctors arrive at the health center

BY TIM PARROTT
Bucknellian Staff Writer

The Ziegler Health Center has recently added two new physicians, Dr. Colleen Flaherty and Dr. Jim Zola, to its ranks of medical service providers.

Colleen Flaherty, the new associate physician at the Ziegler Health Center, has come to Bucknell directly after working as a physician for Muncy Correctional Institute.

Since Muncy Correctional Institute is an all-female institution, Flaherty was able to work with a large patient population where she could familiarize herself with medical problems that arise mainly in females.

Flaherty graduated from medical school in 1984 and moved from Philadelphia to our neighboring township of Milton where she began a private practice with her husband.

Seeing the necessity to spend more time with her two children, in 1994 Flaherty and her husband left their private practice to begin a private nursing home which offered involvement with less hours.

Flaherty had the opportunity to lead instructive clinics at the correctional institute, which will now allow her to more effectively educate Bucknell students about medical issues. Although Flaherty mainly deals with acute medical problems associated with walk-in patients, she is extremely excited about building a regular patient base in which she can relate to her patients on a personal level.

Because of the diverse groups of patients she has been able to deal with, Flaherty is thoroughly equipped to deal with the medical problems of any student here on the Bucknell University campus.

Although she realizes that college students are usually a very healthy population, Flaherty also looks forward to educating students in the area of preventative medicine in relation to problems the student body run into on a daily basis.

Outside of her family, Flaherty's permanent position at Ziegler Health Center is her primary responsibility; she can offer undivided attention to the student patients whom she encounters on a daily basis.

As the new associate physician, Flaherty brings quite a bit of knowledge and experience to the Bucknell University campus. She is excited about sharing this with the student body at this University, along with giving each student exceptional medical service at each visit, whether they have a common cold or a complicated medical condition.

In much the same way, Jim Zola hopes to be able to share his knowledge and expertise with the students here at Bucknell.

Zola is a resident intern for the month of February. and is a fully trained, fully licensed physician. He is currently completing his fourth year of residence by spending time dealing with a college-age patient population.

Zola has knowledge which could be very helpful to those Bucknell students wishing to pursue medical school after graduation.

He is in a Med-Peds program which is a cross-discipline study program in which a student spends two years studying internal medicine and two years studying pediatrics through residence at many different medical institutions.

Although he has other responsibilities and meetings on campus, any student wishing to see Zola could find him at the Ziegler Health Center during normal operating hours on a walk-in basis.

New faces are constantly flowing into the Bucknell campus and this applies just as strongly to the health center.

The physicians at the Ziegler Health Center are energetic, and are waiting to interact with the students—Flaherty and Zola are no exception. Although they may seem unfamiliar, these two physicians want to share their knowledge and services with students on this campus, as well as develop personal relationships.

Flaherty is available for appointments or walk-ins from 9 a.m. to 12 p.m., and Zola is available on most days during normal service hours at the Ziegler Health Center. Student's questions and/or appointments can be dealt with at the Ziegler Health Center by calling 523-1401.

Ben Buckley—The Bucknellian

Colleen Flaherty is one of the new doctors working at the health center. The other new doctor, not pictured, is Jim Zola.

Caught in the Web: Cars!

BY CURRAN FILER
Bucknellian Staff Columnist

Ever since I got my computer working, I spend hours every week browsing the World Wide Web. If there is one thing that is cool about the Web, it's that there is a ton of information out there. A lot of it is stupid, but not all of it. Listed are some of the sites that I found interesting and are currently bookmarked on my computer. To find these pages I use Netscape 3.0 Gold, so if you aren't using it then you might not get the same results. I suggest this browser, it's neat!

Category ZPN1640-9600BAUD : Car Web pages

Ford Motor Company
`http://www.ford.com/us/index.html`

The Ford site is pretty basic. It has information on all the different Ford cars, as well as a dealer locator so you can find out where to buy one. If you want to buy a Ford you might check it out.

Chevy Spot - Chevrolet Home Page
`http://www.chevrolet.com/index.htm`

The Chevy/Geo site has model information and a dealer list as well. Don't bother looking in the "Cool links" section unless you're really bored or you're a real Chevy nut.

Welcome to the Saturn Web Site
`http://www.saturncars.com/index.html`

Pretty much the same as the Ford and Chevy sites, with information on all the Saturns, a dealer locator and information on Saturn in general. They also have a sneak preview of General Motor's new electric car.

Jeep Unpaved
`http://www.jeepunpaved.com`

The Jeep site is the same in general as the above sites. It has information on the Jeep models, a dealer list and information about buying incentives.

Welcome to @Toyota
`http://www.toyota.com`

Again, the same general stuff but the Toyota site also has information about Toyota Motorsports.

The Honda Web Site
`http://www.honda.com`

Landrover WWW
`http://www.landrover.com`

These two sites are roughly the same as all the other car manufacturers' sites. The thing that sets them apart is their model information pages. The Landrover site allows you to choose the color, interior, wheel type and other options and then shows you the resulting car so you know what it will look like. The Honda site lets you choose the color and shows you what each color looks like, and even has Quicktime movies of the interiors.

Car and Driver
`http://www.caranddriver.com/hfm/index.html`
Autoweek Online
`http://www.autoweek.com`
Motor Trend ONLINE
`http://www.motortrend.com`

These are the online versions of some of the major car magazines. If you have a favorite then look for that one. If not, check them all out and see which you like best.

Kelley Blue Book Web Site
`http://www.kbb.com`

This is the online version of the Kelley Blue Book. The Kelley Blue Book is the standard reference for used car prices. If you are shopping for a used car, or trying to sell one, check this site out to see how much it's worth. An important note: The KBB doesn't set the market price, it only reports the market price. You may not find exactly the same thing when you're shopping but it's a good measure.

Edmund's Automobile Buyer's Guides
`http://www.edmunds.com`

The Edmund's guide has been around since 1966, reviewing new cars so consumers can have some real information before they shop. They review new cars and trucks, as well as used cars. They also provide prices and car care information.

The WWW Speedtrap Registry
`http://www.speedtrap.com/speedtrap`

This site is for all those people who like to speed and don't like to get caught. The WWW speedtrap archive is full of descriptions of speedtraps across the country. Look up your state and use the "find" command on your browser (if it has it) to find a specific road. Most of the entries are submitted by visitors to the site.

Fight Your Speeding Tickets Page
`http://engsoc.carleton.ca/%7Eiscwong`

If the site above didn't save you from a speeding ticket, this is the site for you. The site is written with Canadian residents in mind but some of the tips might be helpful. If you have a speeding ticket you want to take to court check out this site first.

Coyotes prowl the Pennsylvanian wilds

BY TRACY THIFFAULT
Bucknellian Staff Writer

The coyote population in Lewisburg and the surrounding area has been increasing steadily over the past decade. The howling predatory animals feared by youngsters in storybooks for years have been slowly accumulating in the Pennsylvania area for the past 20 years.

These white, gray, black and brown animals with bright yellow eyes have traveled from Canada and the northeast since the 1970s to fill a void left by Mother Nature in the Pennsylvania area. Coyotes are known to travel long distances together.

The Eastern Coyote, common to this area, is an adaptable species prevalent in other areas of Pennsylvania and the northeast.

In 1974 there were less than 100 coyotes in the state of Pennsylvania. By 1982, there were 1,000. Today an abundance of between 20,000-25,000 coyotes roam the Pennsylvania area in search of habitation.

The influx of coyotes is a balance to the gap left by Mother Nature. "Mother Nature does not like to have a void," says Arnold Hayden from the National Audobon Society. After the void is filled, the population matures, levels out, and moves to fill a new area.

While coyotes are generally known to Americans as cartoon animals, in some cultures they do serve an important purpose. Indians hold coyotes in high esteem; they believe coyotes contain past spirits and are thus considered sacred.

Because few people have encountered coyotes, humans are sometimes afraid of these creatures. However, according to Hayden, there is no reason for this concern. Like most animals, if you leave them alone, they will not bother you.

Coyotes mostly roam at night. They tend to like rural areas near farms, but do feed on sheep and felines. They are not common in backyards. The best way to ensure the protection of your pets is to keep them inside at night and put up a fence.

Coyotes are usually seen with their tail down at a 45 degree angle, and the average male weight in Pennsylvania is 50 pounds.

According to Hayden, Pennsylvania has reached its peak coyote concentration. "The numbers won't go any higher and should begin to decline in the coming years," Hayden said.

Despite the increase of coyotes in Pennsylvania, few have been spotted in the populated area surrounding Bucknell.

Residents of the University have little reason to be worried; it is likely that the next time somone runs into a coyote, it will be a cartoon animal in a story.

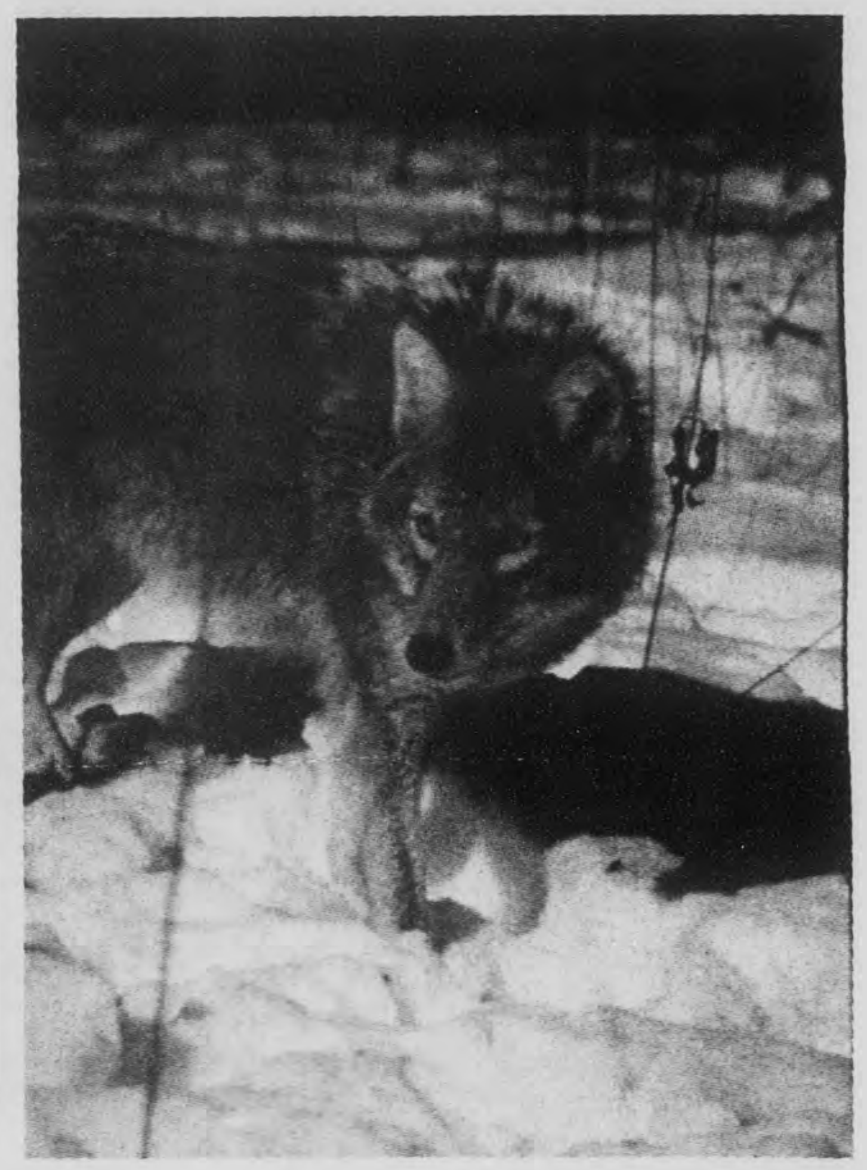
More likely than not, you will hear a coyote rather than see one. A coyote's characteristic lonely howl can be heard at a great distance. Coyotes use their howls to communicate to other coyotes as well as other animals.

Coyotes produce a litter of one to 12 pups. At about three weeks of age, the young leave the den under the watch of their parents. At eight to twelve weeks, the pups are taught hunting skills. Female coyotes are cited as being exceptional mothers. If her pups aaare in danger, the mother will seek out a new den and move the pups immediately.

Coyote

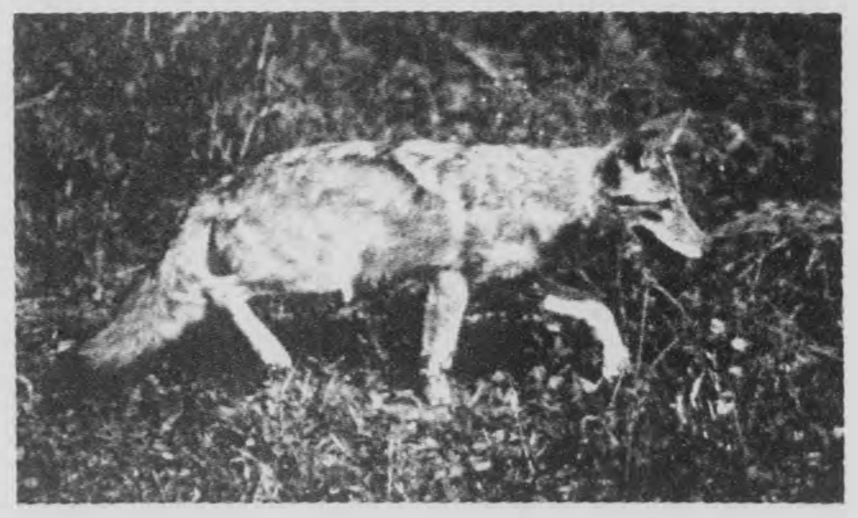
FAST

Facts



Coyotes are monogamous, meaning that they pair for life with one mate. The breeding season lasts from January to March.

As a coyote travels from place to place, and as its habitat becomes smaller due to human development, the coyote adapts to its new surroundings. This strength is what allows the coyote to survive and exploit any advantage its surroundings might provide.



The coyote, a smaller cousin of the wolf, stands about two feet tall and is between 41-53 inches in length. It weighs between 20-50 pounds. A coyote generally lives between three to 10 years.

Poet, professor and activist: Joy Harjo brings her influence into the classroom as part of this semester's focus seminar

Joy Harjo "honors the Earth" in her poetry about religion and nature mixed with personal narratives and political statements

BY ANNE PUTNAM
Bucknellian Staff Writer

Harjo, a Muskogee tribal member, represents her connection to the earth in her poetry. The maintainance of her heritage throughout her work has led to her becoming an activist in the Native American cause.

"I could have lied/ and not seen my own death/ dancing in the streets, the main shady/ character forcing me to live," writes Joy Harjo, a well known Native American poet, in her poem, *Fury of Rain*. This talented artist does not only write, but is also an activist for the Native American cause, being a Muskogee tribal member herself, and is a member of the band "Poetic Justice."

What lies at the heart of these talents is a Native American woman with a lot to say. She will be visiting the Bucknell campus to address these ideas in a poetry reading.

Harjo was born a member of the Creek Nation. She cultivated her art at the Institute of American Indian Arts, a boarding school in New Mexico. From there Harjo experimented in several fields before fully realizing her attraction to art, which led to her transition into poetry. Currently, Harjo continues to creatively influence others as a professor of English at the University of New Mexico.

Harjo has written five books of poetry to complement her fame. In each work, she "honors the Earth," commented Cynthia Hogue, the director of the Stadler Poetry Center. Harjo's most recent publication, *The Woman Who Fell From The Sky*, is representative of this connection to the Earth.

Harjo writes about the natural world and its cycle, in addition to the traditional religion of the aboriginal people. Her style incorporates personal narratives as well as taking on a political stance. She stated her cause as "'the struggles of my Indian peoples to maintain a place and culture in this precarious age,'" in the 1993 summer edition of *Poets and Writers Magazine*. Her fight echoes through her poetry with words.

Harjo is continually writing. Her forthcoming book will be a compilation of essays based upon her life experiences. *The Anthology of Native Women's Writing*, "Reinventing the Enemies' Language," contains pieces of her work as well.

In addition to the poetry reading Harjo is to give, she will be visiting English classes throughout the day on Friday. A special luncheon is scheduled in the Women's Resource Center at noon as well.

In participation with the Native American focus semester, the Stadler Center for Poetry, the Association for the Arts, the University Lectureship Committee and the Women's Resource Center invite the Bucknell community to come and take part in Harjo's poetry reading at 8 p.m. next Thursday in Bucknell Hall.

Joy Harjo states that her cause is "the struggles of my Indian peoples to maintain a place and culture in this precarious age." Come hear her read her works and speak of her cultural influences at 8 p.m. next Thursday in Bucknell Hall.

BAC invites us to "Come and Play" in a weekend of activities

This weekend offers an array of events like rock climbing and laser tag for students to escape from college anxieties

BY ERIN MCCALLISTER
Bucknellian Staff Writer

There is a saying which history teachers, business leaders and truck drivers often assert: "To know where you're going, you have to know where you've been." This is the premise behind Come and Play weekend. The annual student event is a regression, a rejuvenation and a renewed sense of awareness, all rolled into one.

Although it is only February, stress-inducing questions already circulate. "What do you want to do after graduation?" seems the most commonly heard phrase for seniors these days. For underclassmen, futuristic concerns also surface: "Have you applied for summer internships yet?"; "Are you going abroad?"; "Can you fit in your course requirements now that you've changed your major — again?" Anyone experiencing these and other forms of anxiety can benefit from Come and Play weekend. Hosting a variety of events, the weekend's focus is different than it has been in recent years.

A planning committee has organized events to appeal to anyone. "It's a fun day to relax, get away from studying, and bond with friends," says committee chairperson Ali Wright '99.

Where does the play part come in? In the form of laser tag, a rock climbing wall, a derby bungee run, sumo bellies, the spider web rider and a button factory. There will also be a caricature artist, and all those who have not yet discovered their future employment plans can consult Wilma Carroll who works with numerology, the Tarot and palmistry.

The cafeteria will be closed on Saturday, meaning that meal-plan holders, as well as others, will be migrating to the fieldhouse to get many foods not often offered at the typical Saturday cafeteria brunch. There will be funnel cake, snow cones, cotton candy, fruit smoothies, popcorn, french fries, subs and a hot dog stand providing all the trimmings. Healthy food, such as fresh fruit, fruit salad, and pasta salad will also be served. Based on previous years, Audrey Jaeger, assistant director of student activities, expects between 1,300 and 1,500 students to show up for the carnival.

The perennial act of musician Dave Binder will be from 9-11 p.m. Saturday in the Terrace Room. Performing "any reasonable request," Binder consistently overflows the Terrace Room with students as well as his own talent, humor and James Taylor impersonations.

When Come and Play Weekend began in March of 1989, it was originally organized to provide a break for students during the stressful mid-term period. "It was an avenue for students to vent frustrations," said Mark Amatrucola 97, president of Bucknell Activities Council.

Two years ago, BAC and RHA decided to combine Come and Play weekend with Siblings' weekend, since the themes were similar. Combining resources for one big weekend was successful, but students without siblings did not always participate, and the weekend needed to include activities appropriate for younger individuals. Since the joining of the two took away from Come and Play's original purpose, BAC decided to return to two separate weekends.

While many weekends at the University are devoted to specific non-University student groups, such as alumni, parents, prospective students or siblings, the original focus of Come and Play was the student body, and it is for this group that Come and Play weekend continues, Jaeger explained.

"The admissions administration tries to get good, quality students, and alumni and constituent relations try to get good alumni relations, but in between there are the students who are here for four years, and it's important to let them know they're incredibly valuable and to recognize them while they're here, as opposed to after they've gone," Jaeger said.

Unlike many community carnivals and entertainment events, all of the events are free because they are funded by the University and student activity fees. Since dining services provide the food, BAC uses all the funds for entertainment.

With the various entertainment choices, students can acceptably act like children, harmlessly express frustrations and gain an awareness that Jaeger articulated: "This is college; I'm getting a good education; My life will continue no matter what, so live for today."

Come and Play weekend begins with a carnival from 11 a.m. to 3 p.m. on Saturday in the fieldhouse.

Womyn's flight to power is portrayed in choreopoem

Issues facing women today and their increasing strive for power are addressed by the poignant performance Womyn With Wings

BY RACHEL DOEBBER
Bucknellian Staff Writer

The cast of Womyn With Wings takes a look at different female issues from the perspectives of black women through a choreopoem focused upon making women realize that they have the abilities to rise to the top, overcome society's obstacles and gain power.

Rape, racism, abortion...these are just some of the many issues that black women have to face in today's world.

Womyn With Wings, a choreopoem, addresses many of the dilemas that black women experience, and will be presented in celebration of Black History Month. It is sponsored by Greek Advancement for Multicultural Education (GAME), Essential, the student organization that studies African and Latino women, and the Multicultural Center.

Written and directed by J.H. Coleman, this choreopoem features three actresses who portray several women and through the telling of their life stories and the hardships they have faced, addresses many issues with which the modern woman must deal.

According to Joyce Bylander, director of the Multicultural Center, "A choreopoem is a spoken theatrical piece where there are many stories within one story that are linked by a common theme. The theme of this choreopoem is womyn with wings which is about the empowerment of women. Each actress will set the mood through the telling of their story. Each story is a strong, solo theatrical piece."

Why is "womyn" spelled with a "y" and not with "a" or "e"?

"This is the feminist spelling of woman, which takes the word man out of the word woman. This way of spelling womyn symbolizes the absence of man from the center of womyn's consciousness," says Bylander.

Coleen Powell, treasurer of Essential, adds "women's lives are composed of many things and not everything focuses around men. The spelling of womyn with a 'y' symbolizes that womyn can stand alone and have power on their own. [Women] don't need a man to be a woman."

When asked how Essential and GAME heard of *Womyn With Wings*, Powell said that last year during Black History Month, a choreopoem entitled *Black Men Rising* was presented, which was also written by Coleman. "We [members of Essential] approached Coleman who had also starred in *Black Man Rising* and were talking with him about the performance, and he mentioned that he had written a female counterpart, *Womyn With Wings*. This choreopoem interested us because it not only portrayed the different issues that the black community has to face, which is not seen here in Lewisburg and the University, but portrayed them from a black woman's perspective. Even in the cities, plays and choreopoems tend to focus on black men and their struggles while ignoring women's life stories," says Powell.

There is not much stage set and design for *Womyn With Wings* but the bareness exists for a reason. It "forces you to look at the message of the scene to get more of the full effect of the story," comments Powell.

Womyn With Wings starts at 7:30 p.m. Friday in the University Theater in Coleman Hall. This event is free and open to the public.

> ***"This is the feminist spelling of woman [womyn] which takes the word man out of the word woman. This way of spelling womyn symbolizes the absence of man from the center of womyn's consciousness."***

Movie Review: The (Nanny...ooops!) Beautician and the Beast

BY CHRIS NICHOLS

The Beautician and the Beast ★★★
Starring Fran Drescher and Timothy Dalton

It's always interesting to see what happens when a TV character is brought to the big screen. Such is the case for Fran Drescher in "Beautician and the Beast." Now, of course it's not the exact same character as on "The Nanny" but she's playing practically the same character, this time in the shoes of Joy Miller, a nighttime beauty school instructor. This character gets a better job than Drescher's cgaracter on the t.v. show. Instead of being any old nanny in the city, she gets a job as a science teacher for the Royal children in the eastern European country of Slovakia. Of course, she's not really a science teacher, but little obstacles like that can be overcome. The country's ruler is a heavy handed once dictator now "president," that everyone still calls His Excellence. Dalton actually does a really good job portraying this character, though the role itself is a little silly. Of course "His Excellence" is the beast and Ms. Miller is the Beautician. So what happens when East meets West? It's not all fun and games from the start. Since his country has recently adopted democracy, the President believes that his children need Western influences. However, he didn't know what he was getting himself into when he brought this New Yorker to his small country. Of course she infuriates him with her talking back, and he is even more enraged when she passes her habits along to his children. But that's what she was hired to do, right? Well, as you would expect, she is able to pacify the beast and bring out the best in him. This film was actually more serious than I expected. And surprisingly enough, it is entertaining as a comedy with some good dramatic moments. Coming from a person who's not a big "Nanny" fan, I was impressed by how well Drescher carried the movie.

Duran Duran
WHAT'S THE MATTER CAPTAIN, JEALOUS OF A FEW SQUIRRELS?
WELL, YEAH. THIS IS LIKE SOMEONE TRYING TO SHOW THE SUPERBOWL WITH AN OPEN BAR DURING YOUR WEDDING.
WHY DON'T WE JUST OPEN A CASE OF WINE COOLERS AND WATCH MELROSE THEN?
OH HOW SWEET!
MELROSE PLACE
ZIMA
THIS SUCKS, I'VE BEEN DREAMING OF THIS SINCE I WAS FIVE AND ITS BEEN RUINED BY STUPID SQUIRRELS.
WHERE AM I ANYWAY? I SHOULD BE ON EARTH. WAIT... OH MY GOD!
!
NOOOOOOOO!!!!...

BUCKNELL UNIVERSITY SPORTS THURSDAY

Athlete of the week: Tria Tyler '99 broke the 17 year-old school record in the shot-put during Saturday's Bucknell Winter Classic.

Grapplers' streak halted by JMU, Buffalo

BY E.J. CRAWFORD
Bucknellian Staff Writer

Losing three key starters and a schedule that involves all scholarship schools can start to wear on a program. The Bucknell wrestling team began to show this type of exhaustion in the past week as they dropped meets to both James Madison and the University of Buffalo.

The squad is now 4-4 overall, and 2-3 in the East Coast Wrestling Association.

In what Coach Bob Ferraro called "our worst performance of the year," the Bison were easily defeated by a tough James Madison squad 30-11 in the week's first meet. Victors for the Bison included Solomon Webb '98 and Jeff Fisher '98, while Jeff Fazio '98 won by a technical fall.

"We came out flat against JMU. A lot of alumni were here for the celebration of Bucknell's 50th year of wrestling, and possibly [the team] was more preoccupied with the events surrounding the event," Ferraro remarked.

The grapplers fared better against Buffalo, but losses in four close matches doomed their chances of upsetting the 8-2-2 Bulls. Said Ferraro, "We just didn't win the close matches... if we had won just two of the four tight matches, we would have won the meet."

Winners included Todd Boerner '99, Matt Mittman '98, Fazio and Jason Bellis '99.

Despite the three match losing streak, Ferraro vowed that the team will "continue to work hard, and build off last year."

The Bison finished off last season strong, finishing fifth (out of 10 teams) in the conference despite finishing dead last during the regular season. However, their strong finish, coupled with the fact that the majority of the team was sophomores and freshman, seemed to promise good things for this year.

The team started strong this year, jumping out to a 4-1 start. However, they have suffered since, as they lost Ryan Gardner '00 and Dan Weaver '98 to injury, while Mike Garcia '98, who last year was one match away from being an All-American, has been declared ineligible by the school. Ferraro is "hopeful" that he will return before the league tournament.

Regardless, many of the team members continue to excel, as Boerner, Webb, Fazio, Garcia and Brian Pitzer '00 all will be seeded in the top three for the league tournament.

The Bison next travel to Hofstra tomorrow, and then to Wagner on Saturday before returning home to face league-rival Rider on the 22nd.

Alexis Engelhardt—The Bucknellian

Ryan Stephenson '98 (dark) dropped a 6-4 decision in Bucknell's 20-11 loss to Buffalo. The loss evened Bucknell's record at 4-4.

School records topple at Bucknell Winter Classic

Dave Pomfret '00, Tria Tyler '99 and relay team all break school records in meet

BY ERIC KEBER
Bucknellian Staff Writer

Three school records were broken by Bucknell athletes when the Bison hosted the ninth annual Bucknell Winter Track Classic in the fieldhouse last Saturday.

The Bucknell men's track team (7-2) was responsible for two of the four Bison victories. Ron Hess '00 outran his competition in the 800-meter run with a time of 1:55.7, while teammate Mike Plunkett '98 won the 1000-meter run in 2:33.6. A school record was broken in the pole vault by Dave Pomfret '00 who cleared 15' 9" topping the old record of 15' 5". This vault qualified Pomfret for the IC4A Championships.

"The guys improved quite a bit after last week's performance against Yale," stated Head Coach Art Gulden, "But that's what athletics are all about."

In order to better prepare for the Patriot League Championship, Gulden sent the men's 4x800 team to a meet at George Mason were there was better competition. Mark Beaver '97, Steve Roeser '97, Brian Torres '98, and Peter Kelly '98 ran the 4x800 in 7:40.92 to beat their competition.

However, the entire women's team stayed home and subsequently broke two school records.

Shot-putter Tria Tyler '99 won her event and broke a 17-year old school record with her toss of 43' 4 3/4".

The second school record was set by 4x800-meter relay runners Pamela Richardson '99, Julie Sweitzer '99, and sisters Connie and Annie Hamilton '99 who finished in 9:07.49. Their time qualified them for the upcoming ECAC Championships.

In addition, Yetunde Daniels '00, undefeated in the 200-meters, sprinted to victory with a time of 25.33. Her time was the second fastest time in school history.

Although no team scores were kept because of the number of teams, Gulden was pleased with the performances of the individual competitors.

The meet ran very smoothly despite the number of teams and

See CLASSIC, page 15

Jackie Debicella—The Bucknellian

Twenty indoor track and field teams competed in last week's Bucknell Winter Track Classic. Bison athletes broke three school records at the ninth annual indoor track meet.

WOMEN

FROM PAGE 1

women's resource center, said that "With our 10th anniversary and the 25th year of Title IX, this year is particularly special and significant."

"National Girls and Women in Sports Day" To celebrate the day, Butler, along with women's athletic director Rose Ewan, set up a series of quotations, commemorations, and profiles of past female Bucknell athletes. Such Bison athletes that were celebrated included seven Bucknellians inducted into the Bucknell Women's Hall of Fame.

They included Kathy Kline '80 for field hockey and lacrosse; Lonnie Fertnik '83, the first-ever Bucknell entry into the women's track and field championships; Stacey Spitko '87 for softball and basketball; Marjorie Delk '73, who played soccer in addition to going undefeated for her career in tennis; Kathy Frazier '82, an All-American swimmer; Jill Henry '81, who was a three-sport star in field hockey, basketball and softball; and Margaret "Peg" Bryan, who retired in 1981 after serving the school under numerous capacities which included director of women's athletics.

In addition, four members of the University's Educational Theater Company performed speeches from flying pioneer Amelia Earhardt (performed by Hannah Burke '97), tennis star and humanitarian Althea Gibson (Tamika Harding '00), Supreme Court Justice Sandra Day O' Connor (Lisa Molinelli '00), and astronaut Sally Ride (Wendy Coltaire '99), all of whom used high school and college athletics as a springboard to a successful future. "It is important for us to understand that participating in high school and college athletics... can lead to making dreams come true," Butler said.

Nationally the celebration is particularly strong, and this year the festivities were centered in Washington D.C. Athletes and members of Congress took part in a two-mile fitness walk around the Washington Mall, and then traveled to Capitol Hill to discuss gender equity in athletics with lawmakers.

Also, tennis great and founder of the Women's Sports Foundation Billie Jean King gave a news conference reflecting on Title IX. King then was named this year's recipient of the annual Flo Hyman Award, named in honor of volleyball great Flo Hyman, who made great efforts and strides in equality for women in athletics before dying in 1986 of Marfan syndrome.

Jonah Half- The Bucknellian

Tamika Harding '00, Lisa Molinelli '00, and Theodore Burnes '00 performed in skits to help Bucknell celebrate the 10th anniversary of National Girls and Women in Sports Day.

Flash in ~~the~~ Pan

Rice heats up at the All-Star game: Glen Rice took home MVP of the All-Star game as his 26 points, coupled with the first-ever All-Star triple-double by Michael Jordan, rallied the East from a 23-point second-quarter deficit to defeat the West 132-120. Rice's 20 third quarter and 24 second half points both set All-Star records in the Hornet swingman's second All-Star game. Other standouts included the Bucks' Vin Baker who had 19 points and 12 rebounds, while Latrell Sprewell and Gary Payton paced the West with 19 and 17 points, respectively. Payton added 10 assists.

More All-Star Action: In additional All-Star festivities, the East completed the sweep as MVP Allen Iverson, of the 76ers, put up 19 points and nine assists to overcome the Lakers' Kobe Bryant, who put up a rookie game record 32 points, and the West squad 96-91. The Celtics' Antoine Walker led the East with 20 points.

Bryant continued to shine, as the 18 year-old phenom narrowly defeated the Timberwolves' Chris Carr to take the slam-dunk contest, while the Bulls' Steve Kerr edged out last year's champion Tim Legler to win the three-point contest.

The Tuna's Afloat in the Big Apple: The Bill Parcells/Bob Kraft/Jets/Patriots fiasco was finally resolved this week by NFL commisioner Paul Tagliabue, as Parcells will become the Jets' head coach immediately, while the Patriots will receive compensation that amounts to the Jets' third and fourth round picks this year, a second-round pick in 1998, and a first-round pick in 1999. Interim coach Bill Belichick will now become the assistant coach in charge of defense.

USA Nets Davis Cup Victory: Jim Courier posted two tough singles wins in front of a hostile Brazilian crowd to boost the USA to a 4-1 victory over Brazil in the first-round of the Davis Cup. The USA, champions two years ago, hope to reassert its world dominance with a victory over the Netherlands in the next round.

McCall Drug Free: Oliver McCall, after one of the strangest boxing performances in years, tested negative for a drug test this past week. During his bout against Lennox Lewis McCall appeared disoriented, often not defending himself at all, refusing to go to his corner between rounds, and visibly crying in the middle of the ring. Lewis went on to win the fight in five rounds.

Bowe's in the Army Now: Former heavyweight champion of the world officially reported to marine boot camp this week, fulfilling what he called a "life-long dream." Bowe, who still holds the WBO title, will complete a 12-week bootcamp before offi-

CAMPUS CALENDAR

Thursday, February 13

7 p.m.—Third World Film Series, *Sugar Cane Alley*, 120 Coleman Hall

Friday, February 14

Noon—Hillel lunch, 241 Langone Center

11 a.m.-1 p.m.—WVBU sign-up to send a Valentine's Day message to your special someone, $1, mall, Langone Center

4:30 and 8 p.m.—Hilltop Film Series, *Atlantic City*, Vaughan Literature Auditorium

7:30 p.m.—Choreopoem, "Womyn With Wings," University Theater, Coleman Hall

9 p.m.—Comedian, Kivi Rogers, Bison, Langone Center

10 p.m.-1 a.m.—First-year Semi-Formal Valentine's Day Dance, Larison

Saturday, February 15 (Come & Play Weekend)

11 a.m.-3 p.m.—Picnic and carnival, Fieldhouse

1-3 p.m.—Chess Club meeting, The Niche

8 p.m.—William Shakespeare's *As You Like It*, performed by The Acting Company, Weis Center

8 p.m.— Taste of Africa, sponsored by the Multicultural Center, Larison Dining Hall

9 p.m.—Concert, Dave Binder, Terrace Room, Langone Center

10:30 p.m.— Movie, *Ransom*, sponsored by BAC, $1 admission, Forum, Langone Center

Monday, February 17

Noon—Career Development Senior Countdown workshop, "Managing and Leading Effectively in a Diverse Work Force," Nellie Gonzalez, national diversity recruiting leader with Anderson Consulting, Center Room, Langone Center

6 p.m.—Phi Sigma Pi National Honor Fraternity interest meeting, at least a 3.0 cumulative GPA required, Forum, Langone Center

Tuesday, February 18

Noon—Informational meeting for participating in International Women's Day on March 7, Arches Lounge, Langone Center

2-3 p.m.—WVBU interview with President Adams about alcohol policy, with specific reference to Tent Party

5:15 p.m.—Women's Basketball vs. Holy Cross

6:30-8 p.m.—Outdoor education short course about the cold, sponsored by Bucknell Outdoor Adventure, in cooperation with Bucknell Outing Club, Outing Club offices, Tustin Gym Building

7:30 p.m.—Geology lecture, "The Groundwater Hydrology That Sustains the Montandon Marsh Ecosystem," Craig Kohl, professor of Geology, Chemistry Auditorium

7:30 p.m.—Men's Basketball vs. Holy Cross

Wednesday, February 19

6-8 p.m.—Chess Club meeting, The Niche

10:30 p.m.— Movie, *Ransom*, sponsored by BAC, $1 admission, Forum, Langone Center

Thursday, February 20

Noon—Math lunch talk about the role of mathematics in economics and economic modeling, Professor Kinnaman, 302 Langone Center

1:30-3 p.m.—Study abroad program, Lorna Stern, associate director from Beaver College Center for Education Abroad, and Susan Harte, administrative officer in the International Liason Office at Queen's University, 233 Langone Center

4 and 7 p.m.—Third World Film Series, *Burn*, 120 Coleman Hall

8 p.m.—Poetry reading, Joy Harjo, Bucknell Hall

Friday, February 21

6 p.m.—Latin Dance Social and Dinner with the Ballet Hispanico company, reservations required (x3700), sponsored by the Weis Center for Performing Arts, Terrace Room, Langone Center

BUCKNELL UNIVERSITY SPORTS THURSDAY

***Athlete of the week:** Tria Tyler '99 broke the 17 year-old school record in the shot-put during Saturday's Bucknell Winter Classic.*

Grapplers' streak halted by JMU, Buffalo

By E.J. Crawford
Bucknellian Staff Writer

Losing three key starters and a schedule that involves all scholarship schools can start to wear on a program. The Bucknell wrestling team began to show this type of exhaustion in the past week as they dropped meets to both James Madison and the University of Buffalo.

The squad is now 4-4 overall, and 2-3 in the East Coast Wrestling Association.

In what Coach Bob Ferraro called "our worst performance of the year," the Bison were easily defeated by a tough James Madison squad 30-11 in the week's first meet. Victors for the Bison included Solomon Webb '98 and Jeff Fisher '98, while Jeff Fazio '98 won by a technical fall.

"We came out flat against JMU. A lot of alumni were here for the celebration of Bucknell's 50th year of wrestling, and possibly [the team] was more preoccupied with the events surrounding the event," Ferraro remarked.

The grapplers fared better against Buffalo, but losses in four close matches doomed their chances of upsetting the 8-2-2 Bulls. Said Ferraro, "We just didn't win the close matches... if we had won just two of the four tight matches, we would have won the meet."

Winners included Todd Boerner '99, Matt Mittman '98, Fazio and Jason Bellis '99.

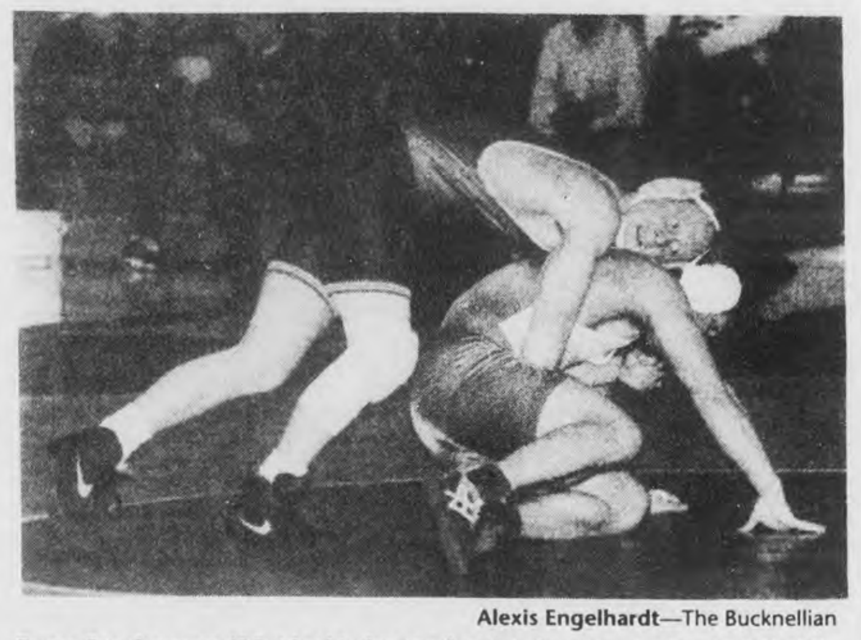
Despite the three match losing streak, Ferraro vowed that the team will "continue to work hard, and build off last year."

The Bison finished off last season strong, finishing fifth (out of 10 teams) in the conference despite finishing dead last during the regular season. However, their strong finish, coupled with the fact that the majority of the team was sophomores and freshman, seemed to promise good things for this year.

The team started strong this year, jumping out to a 4-1 start. However, they have suffered since, as they lost Ryan Gardner '00 and Dan Weaver '98 to injury, while Mike Garcia '98, who last year was one match away from being an All-American, has been declared ineligible by the school. Ferraro is "hopeful" that he will return before the league tournament.

Regardless, many of the team members continue to excel, as Boerner, Webb, Fazio, Garcia and Brian Pitzer '00 all will be seeded in the top three for the league tournament.

The Bison next travel to Hofstra tomorrow, and then to Wagner on Saturday before returning home to face league-rival Rider on the 22nd.



Alexis Engelhardt—The Bucknellian

Ryan Stephenson '98 (dark) dropped a 6-4 decision in Bucknell's 20-11 loss to Buffalo. The loss evened Bucknell's record at 4-4.

School records topple at Bucknell Winter Classic

Dave Pomfret '00, Tria Tyler '99 and relay team all break school records in meet

By Eric Keber
Bucknellian Staff Writer

Three school records were broken by Bucknell athletes when the Bison hosted the ninth annual Bucknell Winter Track Classic in the fieldhouse last Saturday.

The Bucknell men's track team (7-2) was responsible for two of the four Bison victories. Ron Hess '00 outran his competition in the 800-meter run with a time of 1:55.7, while teammate Mike Plunkett '98 won the 1000-meter run in 2:33.6. A school record was broken in the pole vault by Dave Pomfret '00 who cleared 15' 9" topping the old record of 15' 5". This vault qualified Pomfret for the IC4A Championships.

"The guys improved quite a bit after last week's performance against Yale," stated Head Coach Art Gulden, "But that's what athletics are all about."

In order to better prepare for the Patriot League Championship, Gulden sent the men's 4x800 team to a meet at George Mason were there was better competition. Mark Beaver '97, Steve Roeser '97, Brian Torres '98, and Peter Kelly '98 ran the 4x800 in 7:40.92 to beat their competition.

However, the entire women's team stayed home and subsequently broke two school records.

Shot-putter Tria Tyler '99 won her event and broke a 17-year old school record with her toss of 43' 4 3/4".

The second school record was set by 4x800-meter relay runners Pamela Richardson '99, Julie Sweitzer '99, and sisters Connie and Annie Hamilton '99 who finished in 9:07.49. Their time qualified them for the upcoming ECAC Championships.

In addition, Yetunde Daniels '00, undefeated in the 200-meters, sprinted to victory with a time of 25.33. Her time was the second fastest time in school history.

Although no team scores were kept because of the number of teams, Gulden was pleased with the performances of the individual competitors.

The meet ran very smoothly despite the number of teams and

See CLASSIC, page 15

Jackie Debicella—The Bucknellian

Twenty indoor track and field teams competed in last week's Bucknell Winter Track Classic. Bison athletes broke three school records at the ninth annual indoor track meet.

WOMEN

FROM PAGE 1

women's resource center, said that "With our 10th anniversary and the 25th year of Title IX, this year is particularly special and significant."

"National Girls and Women in Sports Day" To celebrate the day, Butler, along with women's athletic director Rose Ewan, set up a series of quotations, commemorations, and profiles of past female Bucknell athletes. Such Bison athletes that were celebrated included seven Bucknellians inducted into the Bucknell Women's Hall of Fame.

They included Kathy Kline '80 for field hockey and lacrosse; Lonnie Fertnik '83, the first-ever Bucknell entry into the women's track and field championships; Stacey Spitko '87 for softball and basketball; Marjorie Delk '73, who played soccer in addition to going undefeated for her career in tennis; Kathy Frazier '82, an All-American swimmer; Jill Henry '81, who was a three-sport star in field hockey, basketball and softball; and Margaret "Peg" Bryan, who retired in 1981 after serving the school under numerous capacities which included director of women's athletics.

In addition, four members of the University's Educational Theater Company performed speeches from flying pioneer Amelia Earhardt (performed by Hannah Burke '97), tennis star and humanitarian Althea Gibson (Tamika Harding '00), Supreme Court Justice Sandra Day O' Connor (Lisa Molinelli '00), and astronaut Sally Ride (Wendy Coltaire '99), all of whom used high school and college athletics as a springboard to a successful future. "It is important for us to understand that participating in high school and college athletics... can lead to making dreams come true," Butler said.

Nationally the celebration is particularly strong, and this year the festivities were centered in Washington D.C. Athletes and members of Congress took part in a two-mile fitness walk around the Washington Mall, and then traveled to Capitol Hill to discuss gender equity in athletics with lawmakers.

Also, tennis great and founder of the Women's Sports Foundation Billie Jean King gave a news conference reflecting on Title IX. King then was named this year's recipient of the annual Flo Hyman Award, named in honor of volleyball great Flo Hyman, who made great efforts and strides in equality for women in athletics before dying in 1986 of Marfan syndrome.

Jonah Half- The Bucknellian

Tamika Harding '00, Lisa Molinelli '00, and Theodore Burnes '00 performed in skits to help Bucknell celebrate the 10th anniversary of National Girls and Women in Sports Day.

Flash in the Pan

Rice heats up at the All-Star game: Glen Rice took home MVP of the All-Star game as his 26 points, coupled with the first-ever All-Star triple-double by Michael Jordan, rallied the East from a 23-point second-quarter deficit to defeat the West 132-120. Rice's 20 third quarter and 24 second half points both set All-Star records in the Hornet swingman's second All-Star game. Other standouts included the Bucks' Vin Baker who had 19 points and 12 rebounds, while Latrell Sprewell and Gary Payton paced the West with 19 and 17 points, respectiveiy. Payton added 10 assists.

More All-Star Action: In additional All-Star festivities, the East completed the sweep as MVP Allen Iverson, of the 76ers, put up 19 points and nine assists to overcome the Lakers' Kobe Bryant, who put up a rookie game record 32 points, and the West squad 96-91. The Celtics' Antoine Walker led the East with 20 points.

Bryant continued to shine, as the 18 year-old phenom narrowly defeated the Timberwolves' Chris Carr to take the slam-dunk contest, while the Bulls' Steve Kerr edged out last year's champion Tim Legler to win the three-point contest.

The Tuna's Afloat in the Big Apple: The Bill Parcells/Bob Kraft/Jets/Patriots fiasco was finally resolved this week by NFL commisioner Paul Tagliabue, as Parcells will become the Jets' head coach immediately, while the Patriots will receive compensation that amounts to the Jets' third and fourth round picks this year, a second-round pick in 1998, and a first-round pick in 1999. Interim coach Bill Belichick will now become the assistant coach in charge of defense.

USA Nets Davis Cup Victory: Jim Courier posted two tough singles wins in front of a hostile Brazilian crowd to boost the USA to a 4-1 victory over Brazil in the first-round of the Davis Cup. The USA, champions two years ago, hope to reassert its world dominance with a victory over the Netherlands in the next round.

McCall Drug Free: Oliver McCall, after one of the strangest boxing performances in years, tested negative for a drug test this past week. During his bout against Lennox Lewis McCall appeared disoriented, often not defending himself at all, refusing to go to his corner between rounds, and visibly crying in the middle of the ring. Lewis went on to win the fight in five rounds.

Bowe's in the Army Now: Former heavyweight champion of the world officially reported to marine boot camp this week, fulfilling what he called a "life-long dream." Bowe, who still holds the WBO title, will complete a 12-week bootcamp before offi-

Club Sport Report: Ice Hockey

Ice hockey routs Loyola, remains unbeaten

By Chris Ellis
Bucknellian Staff Writer

Going into last Saturday's game with Loyola, the Bucknell ice hockey team stood even with the Greyhounds atop the Mason-Dixon league northern division standings. Both had identical 3-0-1 records, and had tied 5-5 in their last meeting. On Saturday, though, it took the Bison just seconds to prove who the league favorite was.

With only nine seconds elapsed on the first-period clock, Bucknell's Eric Mastroianni '98 took a pass from Eric Hidy '97 flipped a 15-foot wrist shot past Loyola goaltender Shawn Brzoska to give Bucknell a lead they would never lose. Mastroianni's early tally paved the way for a 5-0 win and continued hope of an undefeated season.

"That early goal was extremely important for us," Hidy said. "It put Loyola back on their heels and got us relaxed."

Bucknell's first line of Mastroianni, Hidy and Jim Taubner '98 struck again just six minutes into the game, as Taubner scored on assists from his two linemates to give Bucknell a two-goal edge.

The Bison onslaught continued four minutes later, when William Holligan lifted a wrist shot over Brzoska to stretch the lead to 3-0. Bucknell outshot the Greyhounds 21-2 in the first period and ended the stanza with an insurmountable three-goal lead.

"We seem to always jump on teams early and force them to come from behind," Hidy said. "We put ourselves in the position we want to be."

The Bison opened the second period sloppily, taking a series of penalties that allowed Loyola to have three separate 5-on-3 opportunities, but goaltender Bill Gubing '98 turned aside each one. Gubing finished with 14 saves in the scoreless second period.

Loyola continued to press the attack to start the third, but Gubing shined again, making three spectacular saves to keep the shutout intact.

Loyola's assault on the Bucknell net continued until midway through the third period, when an innocent point shot from defenseman J.P. McFadden '98 found its way behind Brzoska and took the wind out of Loyola's sails. Ramsey Wilcox '00 finished the scoring with a wristshot minutes later.

The Bison pounded the Loyola net with 52 shots on goal, Gubing recorded 25 saves en route to posting his first shutout of the season, and Taubner earned two assists in addition to his first-period goal.

The win, combined with a pair of forfeit victories over Shippensburg on Sunday, improved the Bison's record to 6-0-1 and gave them a clear run to the Mason-Dixon northern division title. A win against Dickinson this Saturday would give Bucknell home-ice advantage through the Northern Division playoffs.

"This win puts us in good shape as far as the playoffs are concerned," Hidy said. "We have some things to work on, but right now, we're right where we want to be."

NAVY

from page 16

score 12 points and grabbed seven rebounds en route to being named Patriot League rookie of the week.

Saturday, the Bison returned home to face Lafayette, a team the Bison edged 59-58 on the road early in the season. There would be no suspense in this game, though, as the Bison broke open a 34-28 halftime lead with 19-4 run early in the second to rout the Leopards 77-59. Gordon Mboya scored 22 points to lead Bucknell.

Navy kept pace with the Bison, though, recording convincing wins over Colgate (79-56) and Lehigh (109-73) to remain tied atop the League at 7-2, setting up a showdown in Annapolis this weekend.

In the two teams' last meeting, Jan. 22 at Davis Gym, Bucknell took Navy out of the game seemingly before it started, forcing the usually physical Midshipmen to rely on their outside shooting to stay in the contest. Navy didn't connect regularly, though, until late in the second half, after the game was all but decided. Holden scored a career high 30 points, and the Bison pounded Navy, 69-55. Navy's Alumni Hall should prove to be a much friendlier setting for the Middies. Navy has gone 11-1 there this season, including resounding victories over Pittsburgh and Colgate.

"It will be a different game than it was here," Flannery said. "They always come after you, and they'll be extremely physical. I know we can handle that."

"We know what they're about, and they know what we're about," Flannery said. "You work all year to be able to play in big games like this. It'll be an old-fashioned backyard brawl."

Bucknell, Navy, Colgate go to the wire

By Chris Ellis
Bucknellian Staff Writer

Saturday's Bucknell-Navy game will go a long way in determining the Patriot League regular season champion, but if either team should trip up during the rest of the season, Colgate would have a strong possibility of tying for the league crown.

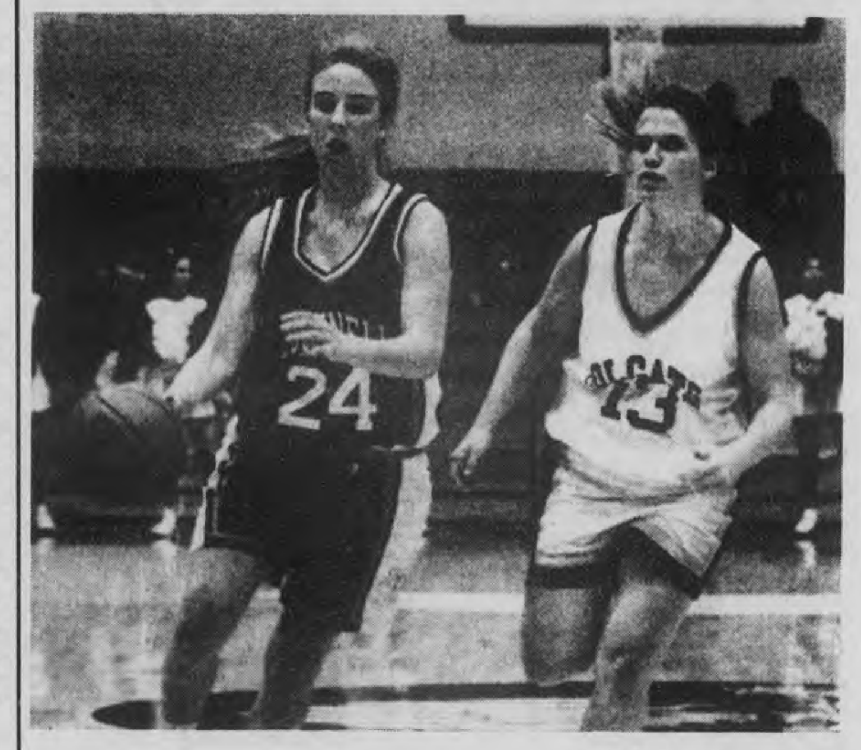
Saturday's winner will improve to 8-2 in the conference and will control its own destiny—win its final two conference games and claim sole possession of first place.

Colgate has the easiest schedule of the three top teams remaining, as the Red Raiders will face the Patriot League's two worst teams to close the season, finishing with Lehigh (1-8,1-21) and Lafayette (3-5, 8-14).

Bucknell has games remaining vs. Holy Cross (3-5, 6-16) and at Army (3-5, 9-12).

Navy closes out the season with a Feb. 22 date, also against Holy Cross.

Women hoopsters stay hot; even record



Eric Shortz- The Bucknellian

Chiara Sockel '97 (#24) and the Bucknell women look to improve on their 11-11 record during the final weeks of the league season.

By Jeff Campagna
Bucknellian Staff Writer

Bucknell women's basketball laced together two wins in a row this past week to pull to .500 overall, at 11-11 (5-4 in the Patriot League). Although the week started slowly, with a loss against Lehigh last Wednesday, the Bison finished strong with wins against Cornell and Lafayette.

Bucknell kept the crowd on the edge of its seats against Lafayette on Saturday, as guard Lori Houck '00 blocked a three-point attempt with 12-seconds left, and then connected on a three of her own to clinch the 59-52 victory.

Houck, a two-time Patriot League Rookie of the Week this year, was ecstatic after locking up the victory, "It was the best feeling... I couldn't get the smile off my face," she said

However, only three nights before, Bucknell suffered a convincing 72-52 defeat at the hands of Lehigh, which pushed the Bison back into fourth place in the Patriot League. Momentum swung back and forth between the two teams for most of the first half, with Lehigh taking advantage of a late nine-point run to take a 30-27 halftime lead. Bucknell, plagued by poor shooting throughout the night, managed to keep it close for the early part of the second half, but soon faltered. The Bison could only watch as the Mountain Hawks strung together another scoring run to ring up a resounding 72-52 triumph.

On a brighter note, senior guard Chiara Sockel added her name to the Bucknell record books by sinking three 3-pointers to break Lauren Wagner's career mark of 90. Sockel went 3-7 from behind the arc while leading the Bison in scoring with 13 points.

Bucknell got back on track several days later, capturing a satisfying 59-52 win over league-rival Lafayette. Defense was not in short supply, as the Leopards' defensive press pounced on the Bison offense, throwing a variety of defenses at Bucknell.

"Lafayette was changing defenses—full and half-court, man-to-man and zone—after we made our first pass going down the court. It was difficult to determine which defense they were running," Head Coach Juliene Simpson commented, "but we made adjustments at halftime and responded well in the second half."

The teams remained close throughout a turnover-plagued first half, and the score was tied several times. The Bison got in the last word before halftime, using a Lyndsay Earhart '00 layup to take a precarious 32-31 lead at the half. Bucknell turned the tables on the Leopards to open the second half, showing defensive pressure of their own. The Bison's tenacious defense, coupled with Chiara Sockel's eight points, helped them build a 56-52 lead with 30 seconds left. After the inbound pass, Lafayette guard Sara Allen went up to attempt a three-pointer, only to have her shot rudely rejected by Bucknell's Houck. Houck was immediately fouled, but missed her free throw. Bucknell came up with the rebound, kicked it out to Houck, and she drained the three to seal a 59-52 win.

Bucknell showed its mettle outside of the conference on Tuesday, picking up a "W" against the Ivy League with a 64-53 dismantling of Cornell.

The Bison broke out early, with forward Kim Delfs '99 leading the charge, and banged out nine points in the first five minutes. This 9-2 run was developed into to an eventual 34-26 lead by the end of the first half. Bucknell stayed in command the rest of the way, as the tough Bison defense kept the Cornell shooters firing blanks from the outside. Delfs finished with a team-high 18 points, while Houck added 12.

Bucknell will have their hands full this week, as they face the top two teams in the Patriot League. The Bison travel to the Naval Academy to face the second-place Mids on Saturday, and then host first-place Holy Cross in the team's home finale on Tuesday.

SPORTS

Nelson speaks out against stereotypes

By Chris Ellis
Bucknellian Staff Writer

In conjunction with Bucknell's celebration of National Girls and Women in Sports Day, Mariah Burton Nelson, an accomplished athlete, scholar and writer, spoke in the LC Forum Tuesday about images of women in media.

Nelson, the leading scorer in her four years on the Stanford women's basketball team, has appeared on such programs as *Good Morning America, Larry King Live* and the *Today Show*. Her columns have been read in the New York Times, Washington Post, USA Today, and other major newspapers. Her commentaries made up the first nationally-syndicated women's sports column in the United States.

In her hour-long speech, which relied heavily on slides and other visual media, Nelson discussed the role of sexuality of female athletes in the popular media. Through use of a slideshow program, she showed the progression of the images of women in the media from the 1920's to the present. Although stereotypes are slowly being vaporized, Nelson said, women are still viewed more as sex objects than athletes by the press.

"Women still are asked to do things, both in advertisements and sport, that men do not have to," she explained.

Nelson encouraged all audience members, both men and women, to expand their definition of "athlete" to incorporate those who simply wish to work out for enjoyment, rather than competition.

Ben Buckley—The Bucknellian

Mariah Burton Nelson stressed the importance of self-confidence for women in sports.

"A person who plays tennis, swims, bikes or does aerobics should still consider themselves to be an athlete," Nelson said. "The use of the word shouldn't be restricted to college or professional players."

The speech, sponsored by the Bucknell Department of Athletics and Recreation and FLAG&B, coincided with the 25th anniversary of Title IX, the governmental act that made it illegal for colleges to have a disproportionate number of male athletes.

CHAMPIONS!!!!

Jonah Half—The Bucknellian

The Bucknell football team, during halftime of last week's Colgate game, received their trophy for winning the Patriot League title this past season. The title is the first-ever for the Bucknell team in Patriot League history and came on a dramatic stop of a two-point conversion during their season finale against Colgate. In the forefront, Rich Lemon '97 (holding smaller trophy) was honored after breaking numerous school and Patriot League records.

CLASSIC

from page 13

competitors. Gulden attributes this to the officials and the athletes who didn't compete but helped anyway. "It was very well run for as many people as were here. The job they (the officials) did was extraordinary," he said.

Gulden ascribes the rise in numbers from the previous years to the fact that schools are having to add more women to their teams in order to be equal with the men's teams. He points out that this does not necessarily raise the quality. In future years the number of teams invited will have to be decreased but "it is hard to cut teams out," Gulden commented.

Right now the team is preparing for the Patriot League Championship at Colgate. "We're in a lot better situation than we were last year," Gulden stated. "I've really been impressed with how hard we've been working and trying. Hopefully it will translate to the rest of the season. The team is prepared mentally and physically and they are almost completely healthy."

Tri-captain Lisa Allen '97 summed up the feelings of the team. "I think since the first meet, people have been improving and getting better. We're a new team with a new attitude. People are more excited this year and I hope they channel their excitement in the right direction."

Club Sport Report: Ice Hockey

Ice hockey routs Loyola, remains unbeaten

BY CHRIS ELLIS
Bucknellian Staff Writer

Going into last Saturday's game with Loyola, the Bucknell ice hockey team stood even with the Greyhounds atop the Mason-Dixon league northern division standings. Both had identical 3-0-1 records, and had tied 5-5 in their last meeting. On Saturday, though, it took the Bison just seconds to prove who the league favorite was.

With only nine seconds elapsed on the first-period clock, Bucknell's Eric Mastroianni '98 took a pass from Eric Hidy '97 flipped a 15-foot wrist shot past Loyola goaltender Shawn Brzoska to give Bucknell a lead they would never lose. Mastroianni's early tally paved the way for a 5-0 win and continued hope of an undefeated season.

"That early goal was extremely important for us," Hidy said. "It put Loyola back on their heels and got us relaxed."

Bucknell's first line of Mastroianni, Hidy and Jim Taubner '98 struck again just six minutes into the game, as Taubner scored on assists from his two linemates to give Bucknell a two-goal edge.

The Bison onslaught continued four minutes later, when William Holligan lifted a wrist shot over Brzoska to stretch the lead to 3-0. Bucknell outshot the Greyhounds 21-2 in the first period and ended the stanza with an insurmountable three-goal lead.

"We seem to always jump on teams early and force them to come from behind," Hidy said. "We put ourselves in the position we want to be."

The Bison opened the second period sloppily, taking a series of penalties that allowed Loyola to have three separate 5-on-3 opportunities, but goaltender Bill Gubing '98 turned aside each one. Gubing finished with 14 saves in the scoreless second period.

Loyola continued to press the attack to start the third, but Gubing shined again, making three spectacular saves to keep the shutout intact.

Loyola's assault on the Bucknell net continued until midway through the third period, when an innocent point shot from defenseman J.P. McFadden '98 found its way behind Brzoska and took the wind out of Loyola's sails. Ramsey Wilcox '00 finished the scoring with a wristshot minutes later.

The Bison pounded the Loyola net with 52 shots on goal, Gubing recorded 25 saves en route to posting his first shutout of the season, and Taubner earned two assists in addition to his first-period goal.

The win, combined with a pair of forfeit victories over Shippensburg on Sunday, improved the Bison's record to 6-0-1 and gave them a clear run to the Mason-Dixon northern division title. A win against Dickinson this Saturday would give Bucknell home-ice advantage through the Northern Division playoffs.

"This win puts us in good shape as far as the playoffs are concerned," Hidy said. "We have some things to work on, but right now, we're right where we want to be."

NAVY

from page 16

score 12 points and grabbed seven rebounds en route to being named Patriot League rookie of the week.

Saturday, the Bison returned home to face Lafayette, a team the Bison edged 59-58 on the road early in the season. There would be no suspense in this game, though, as the Bison broke open a 34-28 halftime lead with 19-4 run early in the second to rout the Leopards 77-59. Gordon Mboya scored 22 points to lead Bucknell.

Navy kept pace with the Bison, though, recording convincing wins over Colgate (79-56) and Lehigh (109-73) to remain tied atop the League at 7-2, setting up a showdown in Annapolis this weekend.

In the two teams' last meeting, Jan. 22 at Davis Gym, Bucknell took Navy out of the game seemingly before it started, forcing the usually physical Midshipmen to rely on their outside shooting to stay in the contest. Navy didn't connect regularly, though, until late in the second half, after the game was all but decided. Holden scored a career high 30 points, and the Bison pounded Navy, 69-55. Navy's Alumni Hall should prove to be a much friendlier setting for the Middies. Navy has gone 11-1 there this season, including resounding victories over Pittsburgh and Colgate.

"It will be a different game than it was here," Flannery said. "They always come after you, and they'll be extremely physical. I know we can handle that."

"We know what they're about, and they know what we're about," Flannery said. "You work all year to be able to play in big games like this. It'll be an old-fashioned backyard brawl."

Bucknell, Navy, Colgate go to the wire

BY CHRIS ELLIS
Bucknellian Staff Writer

Saturday's Bucknell-Navy game will go a long way in determining the Patriot League regular season champion, but if either team should trip up during the rest of the season, Colgate would have a strong possibility of tying for the league crown.

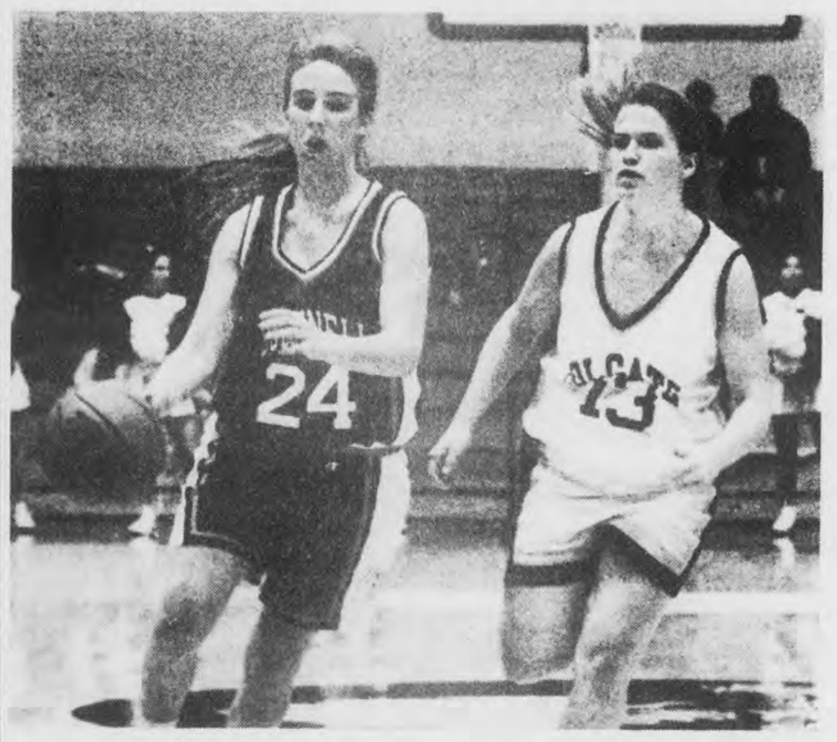
Saturday's winner will improve to 8-2 in the conference and will control its own destiny—win its final two conference games and claim sole possession of first place.

Colgate has the easiest schedule of the three top teams remaining, as the Red Raiders will face the Patriot League's two worst teams to close the season, finishing with Lehigh (1-8,1-21) and Lafayette (3-5, 8-14).

Bucknell has games remaining vs. Holy Cross (3-5, 6-16) and at Army (3-5, 9-12).

Navy closes out the season with a Feb. 22 date, also against Holy Cross.

Women hoopsters stay hot; even record



Eric Shortz- The Bucknellian

Chiara Sockel '97 (#24) and the Bucknell women look to improve on their 11-11 record during the final weeks of the league season.

BY JEFF CAMPAGNA
Bucknellian Staff Writer

Bucknell women's basketball laced together two wins in a row this past week to pull to .500 overall, at 11-11 (5-4 in the Patriot League). Although the week started slowly, with a loss against Lehigh last Wednesday, the Bison finished strong with wins against Cornell and Lafayette.

Bucknell kept the crowd on the edge of its seats against Lafayette on Saturday, as guard Lori Houck '00 blocked a three-point attempt with 12-seconds left, and then connected on a three of her own to clinch the 59-52 victory.

Houck, a two-time Patriot League Rookie of the Week this year, was ecstatic after locking up the victory, "It was the best feeling... I couldn't get the smile off my face," she said

However, only three nights before, Bucknell suffered a convincing 72-52 defeat at the hands of Lehigh, which pushed the Bison back into fourth place in the Patriot League. Momentum swung back and forth between the two teams for most of the first half, with Lehigh taking advantage of a late nine-point run to take a 30-27 halftime lead. Bucknell, plagued by poor shooting throughout the night, managed to keep it close for the early part of the second half, but soon faltered. The Bison could only watch as the Mountain Hawks strung together another scoring run to ring up a resounding 72-52 triumph.

On a brighter note, senior guard Chiara Sockel added her name to the Bucknell record books by sinking three 3-pointers to break Lauren Wagner's career mark of 90. Sockel went 3-7 from behind the arc while leading the Bison in scoring with 13 points.

Bucknell got back on track several days later, capturing a satisfying 59-52 win over league-rival Lafayette. Defense was not in short supply, as the Leopards' defensive press pounced on the Bison offense, throwing a variety of defenses at Bucknell.

"Lafayette was changing defenses—full and half-court, man-to-man and zone—after we made our first pass going down the court. It was difficult to determine which defense they were running," Head Coach Juliene Simpson commented, "but we made adjustments at halftime and responded well in the second half."

The teams remained close throughout a turnover-plagued first half, and the score was tied several times. The Bison got in the last word before halftime, using a Lyndsay Earhart '00 layup to take a precarious 32-31 lead at the half. Bucknell turned the tables on the Leopards to open the second half, showing defensive pressure of their own. The Bison's tenacious defense, coupled with Chiara Sockel's eight points, helped them build a 56-52 lead with 30 seconds left. After the inbound pass, Lafayette guard Sara Allen went up to attempt a three-pointer, only to have her shot rudely rejected by Bucknell's Houck. Houck was immediately fouled, but missed her free throw. Bucknell came up with the rebound, kicked it out to Houck, and she drained the three to seal a 59-52 win.

Bucknell showed its mettle outside of the conference on Tuesday, picking up a "W" against the Ivy League with a 64-53 dismantling of Cornell.

The Bison broke out early, with forward Kim Delfs '99 leading the charge, and banged out nine points in the first five minutes. This 9-2 run was developed into to an eventual 34-26 lead by the end of the first half. Bucknell stayed in command the rest of the way, as the tough Bison defense kept the Cornell shooters firing blanks from the outside. Delfs finished with a team-high 18 points, while Houck added 12.

Bucknell will have their hands full this week, as they face the top two teams in the Patriot League. The Bison travel to the Naval Academy to face the second-place Mids on Saturday, and then host first-place Holy Cross in the team's home finale on Tuesday.

SPORTS

Say it ain't so, Mario

Feeling that there is nothing more to accomplish in his NHL career that has spanned parts of 13 seasons, the Pittsburgh Penguins' Mario Lemieux has repeatedly stated that this will be his final year in the NHL. Lemieux who, despite being in his physical prime, has begun talking about his career in the past tense and uses phrases like "a lot of golf" to describe his 1998 plans, has given no indication that he is even considering returning to the Penguins for another season. His retirement would lend itself to many questions: Why is a man in the prime of his physical life giving up the sport he loves? Why would he leave a team that is just approaching its collective peak? Lemieux's retirement would leave a lot unanswered, but Mario is right about one thing: he has absolutely nothing else to prove.

The 1996-97 season, after a rocky start, has been the land of milk and honey for Lemieux, as he is playing on a line with his heir as the NHL's best, Jaromir Jagr, and one of hockey's best pressure players, Ron Francis— the three are scoring at will. But Lemieux's greatness as a player will not be proven by what he's done with one year of great players; it was already established by what he did without them.

It was 1984, and a young Lemieux had just been signed by the Penguins, entrusted with the task of single-handedly reviving one of the most embarrassing franchises in all of sport. Pittsburgh's patience with the Penguins was wearing very thin, and fans (what few there were) not about to show the least bit of tolerance for an unproven primadonna who didn't even speak fluent English.

Commentary

Chris Ellis
Sports Co-Editor

It took several years for Lemieux to perfect his English, but only seconds to show he had a firm grasp of the language spoken in the NHL. He scored on his very first shift in the NHL, and recorded 100 points in his first full season. No doubt about it—from day one, Lemieux was ready for prime time. Problem was, his teammates weren't.

A Pittsburgh sports columnist once quipped that *Murder She Wrote's* Angela Lansbury could score 30 goals in a season if put on a line with Lemieux. While the femme fatale probably has a lot to learn about playing tight defensive hockey, the analogy wasn't without some basis in the truth. Until this season, Lemieux rarely had the luxury of playing with players that were starts in their own right. Phil Bourque, John Cullen and Bob Errey were marginally-skilled, semi-talented players that all magically lost their scoring touch after departing Lemieux's line for another city. And if you've heard of Lemieux linemates Richard Zemlak, Greg Andrusak or Jock Callander, then you probably need a break from sports.

But each one of these players benefited in incredible ways from Lemieux's benevolence. He made Cullen an All-Star. He made Bourque and Errey millionaires. And he gave countless others the impression that they could play NHL Hockey, a chance they would never have without Lemieux. Anyone heard from Rod Buskas lately?

Even during Pittsburgh's Stanley Cup years, Lemieux was relegated to playing with second-rate payers while talented teammates were put together on a line. Coach Bob Johnson's rationale was rather simple— "Even if he played all by himself, Mario Lemieux would be one of the best lines in all of hockey."

Even last year, Petr Nedved got the honors of playing with Francis and Jagr, while Lemieux centered the Penguins' "first" line with hard-working but untalented names like Dave Roche and Glen Murray.

Lemieux has received standing ovations from packed houses in Montreal, Philadelphia and New York's Madison Square Garden, not exactly the three friendliest places for visiting teams to play. He recovered in a miraculous time period from Hodgkin's disease, receiving a #1 star and leading his team to victory on the same day that he received his final radiation treatment. He resurrected hockey on every level in the city of Pittsburgh. In the days before Lemieux's arrival, crowds of 3,000 or less to see the Penguins play were not uncommon. Now, the city's 17,000-plus seat Civic Arena is regularly sold out, even at exorbitant ticket prices of up to $70. Before Lemieux wore the Penguins' sweater, the Pittsburgh area boasted four ice rinks that catered to youth hockey. Today, the city has over 40, and high school hockey is bigger than ever in Western Pennsylvania.

And, maybe most amazing of all, he has done all of this while fighting through back pain that sometimes makes him uncertain whether he'll be able to wake up and be able to tie his skates, let alone use them. Back problems have ripped no less than three major gaps into Lemieux's career, and has affected him in ways that won't appear on scoresheets.

In less than five months, Lemieux's career will most likely will be over. He holds dozens of NHL records, and has practically rewritten the Penguins' team record book. If it is time for Lemieux to go, though, then the time is right. He is back on top of his game, and his Penguins are once again favorites to contend for the Stanley cup. If he can lead Pittsburgh back to the promised land again, his legacy would be complete. But if fate determines that 1997 is someone else's year, Lemieux will still most likely retire with another scoring title, another MVP and, most importantly, the knowledge that he will leave the league as the same player he was when he entered it 13 years ago. What player? In Super Mario's native French, only one word, inhumanly appropriate, would apply.

—*Le Mieux (adj)*: The Best.

Freshman swimmer breathes easy as she swims her way to victory at Bucknell

By Erica Friedlander
Bucknellian Staff Writer

For Kate Wood '00, a childhood desire to spend time with her friends has blossomed into a record-setting season as a member of Bucknell's swim team.

She began to swim at the young age of five, but it was only when she observed her friends taking part in competition that she quickly gained interest. "When I was seven, all of my friends were swimming and doing sets. I wanted to spend time with them so, I started to swim too."

Since her arrival at Bucknell this fall, the Texas native has already achieved what many athletes dream of. She has set six records, including one in the 1000-yard freestyle and one in the 200-yard butterfly.

However, as a child, Wood never believed that winning would come this easily. Due to her severe asthma, doctors informed the freshman sensation that she should take part in athletic activity, and by swimming regularly, her breathing would become more comfortable. With some persuasion from family members, Wood continued to practice at the sport that would later make her so well known.

And she practiced hard.

The record-breaking swimmer competed for two teams during her high school career, as she was both a member of her school's team, in addition to a private club team. "We swam about four hours every day, plus running and weight lifting. The [club] team was really competitive because of where I was from."

During her senior year, Wood's high school team won the State Championship for Texas, but this was simply a foreshadowing of the victories to come.

Mike Nicolella—The Bucknellian

Kate Wood has set six school records in her first season at Bucknell.

As the time came to decide on a college, Wood decided that she did not want to attend a large university, where athletes focused primarily on sports instead of education. She was interested in enrolling in a smaller school where athletics would take up less time. "I really wanted to concentrate on my education. I didn't want my main focus to be on swimming," she said.

Several members of Wood's family had come north to Bucknell to attend college. On a suggestion from her mother, the swimmer wrote a letter to the Bison swimming coach, Lyn Katchmarik. She set up an interview with the University and came for a visit. "It was everything that I expected a college to look like as a child. It was so green and beautiful. I knew right away that I wanted to come here."

The Texas native came to swim for the Bison soon after. Despite the fact that many of Wood's close friends from high school attended college in Texas, she adjusted quickly to the new atmosphere and the new team. "We all get along really well together. It's a great bunch of people. I like the fact that we are all able to practice together as well. It really keeps the team strong."

Wood also seemed to strengthen her skills. Within the first two weeks of the season, the freshman swimmer had already begun to make a name for herself at Bucknell. She set several records and was gaining speed and endurance. "It all happened so fast. I beat the records so quickly that I thought that I would have to keep beating them every week. It was a little bit of pressure for me that made me work harder."

Outside of the pool, Wood spends time with friends as well as studying. An aspiring history major, the swimmer is presently taking classes in the humanities department. She is also planning on playing water polo for the women's club team. Although she has not played in the past, the freshman feels that, "it is a great way to stay in shape and stay in the pool."

Wood's goals are not limited merely to swimming and water polo. After her graduation she plans to attend law school. When asked about the possibility of her continuing to swim after her career at Bucknell, Wood smiled and stated, "maybe I'll swim when I get out of college... I don't know what I would do without it."

Bison cruise toward showdown at Navy

Resounding wins over Lehigh, Lafayette set up Saturday's battle of league leaders

By Chris Ellis
Bucknellian Staff Writer

What a difference four months makes.

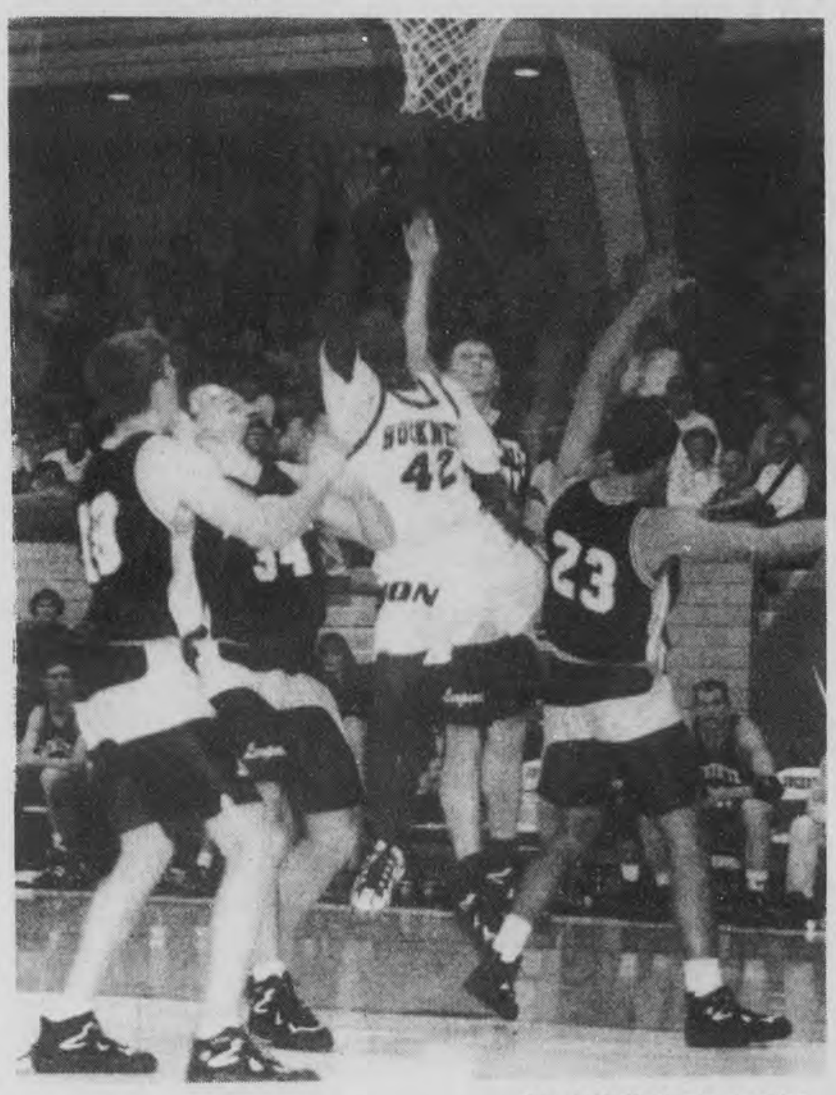
It was the beginning of November, and Bucknell men's basketball coach Pat Flannery was pouring over stacks of Patriot League previews that saw his team finishing in the bottom tier of the league. Instead of talking up his team's postseason hopes, Flannery used phrases like "we'll be competitive every night" or "we won't back down from anyone" to describe his team's possible fortunes.

But now, just weeks removed from March madness, Flannery's Bison men are heading to Annapolis for a matchup with Navy that most likely will determine the league champion. Both teams currently stand 7-2 in league play.

"After losing five starters, this team was left with a lot of uncertainties going into this season," Flannery said. "We lost almost all of our production from last season, so people were going to have doubts about our ability.

Throughout the season's first 22 games, though, the Bison have proved the doubters wrong. Nearly every uncertain commodity has worked out in Bucknell's favor, and the team has more stars—and more balance—than league experts thought possible.

"J.R. Holden came into this season as an uncertain commodity—he hadn't started on a regular basis in this league before," Flannery said. "In my opinion, he's become the best guard in this league. His confidence level is so high, he's encouraged us that our progress is heading us in the right direction."



Jonah Half- The Bucknellian

Gordon Mboya '97 led all scorers with 22 points, helping Bucknell rout Lafayette, 77-59. The Bison travel to Navy this Saturday.

Holden's heroics haven't been the only story for Bucknell this season. Guard Gordon Mboya '97 has become one of the Patriot League's premier players as well, averaging 15 points and 6.5 rebounds while leading the Bison offense. Martin Gilliard '99 has started all but one game for the Bison, averaging seven points per game and helping to key the decisive rally in last week's important win over Colgate. And freshman Dan Bowen has started all 22 games, and is second only to Colgate's Adonal Foyle in the Patriot League with 1.4 blocks per game.

"Going into the season, we thought we had a lot of potential, but we also had a lot of questions,'' Flannery said. "I think we've answered a lot of questions pretty thoroughly."

The Bison continued to cruise toward their Saturday date with the Midshipmen by recording two impressive wins this week.

On Wednesday, Bucknell opened the game on a 29-9 run and went on to pound hapless Lehigh 80-65. Holden led all scorers with 19 points in the game, and freshman Dyrika Cameron, making his first start of the season

Campus mourns death of a coach

BY BRETT TOMLINSON AND E.J. CRAWFORD
Bucknellian Staff Writers

Hundreds of people from Bucknell and the Lewisburg community gathered yesterday at Rooke Chapel to pay their final respects to Mike O'Connor, but the healing process is just beginning for the community, which remains in shock after the death of the 42-year old assistant football coach.

O'Connor's body was found at approximately 1 p.m. Sunday afternoon in the coaches lounge at Christy Mathewson Memorial Stadium by fellow assistant coach Norries Wilson. Police pronounced O'Connor dead at the scene from asphyxiation in an apparent suicide.

For Bucknell football coaches and players, the news was an unbelievable shock. O'Connor, who had been an assistant coach for 14 years and the wide receiver coach for the past two seasons, was a widely respected coach and caring mentor.

"He was definitely a favorite of all players, not just receivers," said Paul Lima '99, who worked closely with O'Connor for the past two seasons.

"He was concerned with the players, not just with football, but with our families... and how we were doing in the classroom. It just shocked the heck out of everyone," Lima commented.

Head Coach Tom Gadd echoed Lima's sentiments. "We are obviously stunned and shocked," Gadd said. "Our hearts go out to [his wife] Peggy and his kids. I hope they can find some resolution for this. It's one of those things you are never prepared for and have no answer for."

The University has provided counselors for players and coaches to talk to throughout this difficult time, and according to Lima, the players are working through their pain.

"I think the team's dealing

Beetna Kim—The Bucknellian

Professor Paul Dietz is the object of a student petition to reverse the decision not to retain him.

Students protest decision to end professor's employment

BY KATHRYN ARDINGER
Bucknellian Staff Writer

Eighty-one electrical engineering students have tested the power of petition by signing a letter that expressed their disapproval of the recent decision made by the University Review Committee to not renew the contract of Paul Dietz, assistant professor of electrical engineering.

Dietz is in his second year at the University and has been described by students as "devoted, innovative and inspirational."

Upset by the future loss of an endeared professor, students are not passively watching this happen without letting their feelings be known.

Several students chose to make comments at the bottom of the letter about the impact Dietz has had on their educational experience at the University.

For instance, Patrick Malloy '97 wrote: "I have had numerous positive experiences with Professor Dietz. I can honestly say that he puts in more time with students out of all professors I have had. He is extremely student oriented and is able to inspire and motivate students to accomplish tasks that they would otherwise find impossible..."

Laura Tilton '98 wrote: "I have learned more about electrical engineering from Paul Dietz than from any other professor. I have never been more disappointed in this University. As a student, I see this decision as a self-destructive act on the part of the department. I was under the impression that the primary goal of this school was to teach students. If that was the case, there would be no question about retaining Professor Dietz."

Michael Toth '98 wrote: "In his class he taught me the fundamentals of electrical engineering in a fun and practical way."

The letter, drafted through the students' "own initiative," requests that the University Review Committee, "please recognize the mistake that has been made and reverse your decision."

However, Dietz, who had submitted an appeal to the committee last week, received confirmation in a letter on Tuesday from Margaret Kastner, chair of the URC and professor of chemistry, that the committee has denied his appeal.

When asked what he thought about the petition, Dietz said, "I was very appreciative of it. This whole incident has been very difficult on me and my family... this has been one of the few bright spots."

Senator Santorum speaks to students

BY BETH MARTIN
Bucknellian Staff Writer

United States Republican Senator Richard Santorum gave a speech to the campus community yesterday in the Terrace Room.

Approximately 100 people including students, faculty and administrators attended the event, sponsored by the University College Republican Club.

President William Adams, who introduced the senator, said, "It isn't every day that a U.S. senator comes to this campus."

Derek Walker '97, president of the College Republicans was enthusiastic about the event. "This is a once in four year event. I've been working on getting him to come here since my sophomore year."

Christie Coyle '99, vice president of the club, was also impressed by the senator. After the speech, she said, "I liked how he addressed controversial issues and wasn't afraid to state his opinion on things like the Balanced Budget Amendment."

Santorum gave a 30 minute speech before opening the floor to questions. He cited the "very critical" balanced budget amendment, "restoring integrity" to Medicare and social security, reducing taxes and "a sound family structure," as "all very, very important issues and ones that we have been working on."

Santorum also talked about the last presidential election. He said, "One of the reasons we saw such a low voter turnout was that the presidential candidates really weren't talking about the things you were talking about... I advised Bob Dole many a time to talk about these issues, talk about the things that you talk about... But

Debate team ranks well in competition

BY ERIC BLOEM
Bucknellian Staff Writer

The Bucknell University Debate Team recently placed 12th in the North American Championships held at Johns Hopkins University from January 31 through February 2.

Among the 98 schools represented at the tournament, were Williams College, Bates College, Colgate University, various Ivy League universities, and some Canadian schools. The schools present were members of the American Parliamentary Debate Team which Bucknell belongs to, or CUSID, the Canadian league.

Bucknell's team sent six members to the North American Championships. Those members formed three teams, each with two per-

It premiers on next Friday at 8 p.m. Other shows are Saturday, March 1, Sunday, March 2, and Monday, March 3.***

Athletic values questioned at Rutgers

BY CHRIS ELLIS
Bucknellian Staff Writer

At Boston College, football players were suspended for gambling on college sports, possibly against their own team. At Texas Tech, two players—including All-American Byron Hanspard, finished the first semester with grade-point averages of a clean 0.00. And at places like Nebraska and Virginia Tech, football programs are seemingly churning out as many convicted rapists as they are NFL prospects. Is there a conflict between big-time collegiate sports and genuine higher education? One influential professor at Rutgers thinks so, and he's committed to doing something about it.

Dr. W.C. Dowling, professor of English, anchors the oft-publicized "1000 men and women of Rutgers" campaign, a grassroots plan to force Rutgers President Francis Lawrence to confront the possible conflict of values in what Dowling terms to be "professionalized" collegiate sports.

In an open letter to Lawrence, Dowling asks his university to withdraw from the Big East athletic conference, and place its programs in the Patriot League, a league that, in the words of Dowling, allows "intellectual values to occupy the center of institutional life."

Dowling's concern for the future of Rutgers, and his desire to remove his university from the realm of large-scale college athletics, comes from a deep-seated desire to see Rutgers regain the level of intellectual esteem it had before the days of Big East athletics. He sees a disturbing trend in the nation as a whole, and at his university specificaly, toward the coddling of "pay-for-hire" athletes rather than top-notch students.

"My own position is that the deepest affinities of Rutgers are with older, more 'traditional' institutions... and that the current attempt to turn Rutgers in the direction of such places as UNLV or the University of Nebraska is a very grievous error," his letter stated.

Dowling took interest in the Patriot League after the league voted two months ago to begin awarding athletic scholarships to basketball players based on ability, not on financial need.

Proponents of athletic scholarships, including many Holy Cross officials, who initiated the scholarship debate to the league presidents, cite institutional "visibility" as a reason for offering athletic-based grants. The argument seems clear—Patriot League schools, even though they compete on a Division I level, do not gain anywhere near the measure of popular notoriety as, for example, Kentucky, Nebraska or even Rutgers, because of a lack of high-quality athletic programs. In Dowling's eyes, though, this notoriety is actually the beginning of the problem. If a Patriot League school decides to give athletic scholarships, its esteem as an institution will fall dramatically.

"Bucknell's possible efforts to build a "big time" sports program to increase its visibility seems to me to beg the question— visibility among whom?" Dowling said. "There is an indiscriminate 'publicity hunger' rampant in America that always fails to make this distinction, but at certain schools and intellectual circles this discrimination is made."

The addition of scholarships to the Patriot League would, to a certain degree, make it impossible for the schools involved to keep the same level of intellectual credibility that previously reigned, Dowling feels. Maybe no Byron Hanspards would be traipsing the campus of Holy Cross, but allowing "pay-for-hire" athletes would open the door to students whose classroom abilities are a far cry from those expected at Patriot League schools. In true academic circles, the addition of scholarship athletes would lead to widespread criticism.

"I think institutions where the teams are made up of actual stu-

DEBATE

sons. Team A members Paula Zimmerman '97 and Mike Kochkodin '97 were ranked 12th out of all schools present.

Mandy Walker '99, President of the Debate Team, explained the ranking process; "When you compete in a round, everyone gets speaker points. The team with the highest speaker points wins." Before a round, the teams debating are given a topic. Walker stated that "topics are based on what the average college student would know." Topics include policy-oriented or philosophical arguments.

Once team members are told whether they will be the government team, which argues for the issue present, or the opposition team, which argues against the topic, the teams have 10 minutes to collect their thoughts. Walker said, "It takes practice. You need to try to find the most convincing points that you can think of within that time."

Walker said that the team competes all semester long. The North American Championships is one of the most competitive tournaments. For the rest of this semester, the debate team will be competing in some smaller tournaments trying to qualify for the National Championships. In order to do so the team will have to rank in the top two of any tournament. Regardless of whether they fulfill this requirement, Bucknell has a free spot at Nationals, because they belong to APDA. Nationals will be held between April 18 and April 20.

When you compete in a round, everyone gets speaker points. The team with the highest speaker points wins.
—Mandy Walker '99

Calvin and Hobbes keep house

CALVIN and HOBBES will retain the former Sigma Phi Epsilon fraternity house until at least August, 1998, despite rumors that Sig Ep will have the house next fall when the fraternity is expected to recolonize.

"According to the contract, Sig Ep doesn't have the house for next year. Their rush is after formal rush next fall, after Residential Life has already decided on rooms for the year," said Tim Horne '98, president of CALVIN and HOBBES.

Horne is not sure where CALVIN and HOBBES will be placed after August 1998, but said "Dean Cummerford says there is a high priority on placing us somewhere."

CALVIN and HOBBES, a substance-free organization which celebrated its three-year anniversary this fall, has occupied the house since 1995. The organization currently has 35-40 members.

Sigma Phi Epsilon, the fraternity formerly known as SPE, will make an effort to recolonize at the University next fall after being shut down by its national chapter in the fall of 1993, due to many problems, including financial mismanagement and substance abuse.

SANTORUM from page 1

he didn't listen."

Santorum said, "What I see as sort of the problem that we have in our country is the breakdowns of the institution of the family... the breakdown of communities and organizations... those institutions that bring us together and promote values."

He said "Some of the statements I hear from young people are really frightening—first off that they are kind of tuned out, and they don't think that what they think matters."

He continued "Well, everyone always says we have to do something about crime, or we need more cops, more this, we need to spend this. No we don't, we need more Dads... Now that's a hard move, that's a tall order for the federal government, what can we do?"

Santorum responded to his own question, "We've done part of the job with welfare—we've done some very tough things on welfare. But, more importantly, a lot of organizations are trying to focus on the issue of poverty—volunteer, non-profit organizations." Santorum is in favor of granting tax credits to people who give money to these organizations.

Santorum offered advice on how University students can help out, "in focusing on those kind of activities that help a young child who has grown up without a father... [such as] Big Brothers/Big Sisters."

President Adams asked a question about Santorum's feelings concerning Clinton's Educational proposal that offers tax credits to families that send their children to private school.

Santorum responded, "I find it interesting that the president talked mostly about problems with primary and secondary education. But look at where he put the money. He put it into higher education where we acknowledge that these are the leaders of the world... So having said that, do I support the tax credits? No, I don't. And the reason I don't support them is that I think it's Washington's way of saying 'We'll give you a tax credit if you need it.' My feeling is that we should give families a tax break, and if they want to spend the money sending their kids to school, great."

We've done part of the job with welfare—we've done some very tough things on welfare. But, more importantly, a lot of organizations are trying to focus on the issue of poverty—volunteer, non-profit organizations.

BUCKNELL SEMINAR FOR YOUNGER POETS

From June 2 to 28, Bucknell will conduct its thirteenth annual Seminar for Younger Poets. The Seminar provides an extended opportunity for undergraduates to write and to be guided by established poets. It balances private time for writing, disciplined learning, and exchange among the students. The Stadler Center for Poetry is the campus headquarters for the program.

Staff poets conduct two workshops each week and are available for tutorials. Weekly readings by the students provide opportunities for Seminar poets to hear and be heard by their peers.

This year, thanks to the fund-raising efforts of Gary Sojka on behalf of the Center, THREE BUCKNELL STUDENTS will be chosen to participate in the Seminar with students from other universities. Students who have completed their sophomore, junior, or senior year may apply. Bucknell will provide room, board, and spaces for writing. Students are responsible for their own transportation.

THE STAFF

This year's Poet-in-Residence, Michael S. Weaver, will be a member of the Seminar staff. Mr. Weaver is the author of five books of poetry, most recently *Timber & Prayer*. His first book *Water Song* was a finalist for the Walt Whitman Award in 1983. He has had two plays, *Rosa* and *Elvira & the Lost Prince*, produced professionally, and he has received fellowships from the NEA and the Pa. Arts Council. Other staff members are: director Cynthia Hogue, associate professor of English; co-director Karl Patten, professor of English; Deirdre O'Connor, tutor in the Writing Center; and Steve Styers, assistant to the director, Center for Poetry.

APPLICATIONS should include:

1. 10-12 page portfolio
2. An academic transcript
3. A letter of self-presentation (a brief autobiography stressing commitment to poetry writing, experience, and any publications)
4. If the student has not taken an advanced creative writing course (EN 308) at Bucknell, include a letter of recommendation from a writing teacher elsewhere.

Send to:
Cynthia Hogue, Director
Bucknell Seminar for Younger Poets
Stadler Center for Poetry

DEADLINE for receiving materials: March 10, 1997
Letters of notification will be sent by April 7.

If the applicant wishes to have the portfolio returned, a self-addressed envelope should be enclosed. For more information, call the Center for Poetry at 1853.

Do you know what is going on on campus? Do you want to know? Well, then take a look at the campus calendar on page 12.

PUBLIC SAFETY LOG

February 12, 1997

INFORMATION/LOST PROPERTY—Public Safety Officers received a student report regarding a missing wallet.

February 13, 1997

VEHICLE VANDALISM—The Office of Public Safety received a report that vehicles were being smeared with food in the CALVIN and HOBBES parking lot.

INFORMATION—The Office of Public Safety responded to Chi Phi Fraternity for a fire alarm activation caused by an item falling on a halogen light.

MISSING PROPERTY—The Public Safety Office received a report of course information being removed from a bulletin board in Olin Science building.

February 14, 1997

AIDED STUDENT HEALTH SERVICE TRANSPORT—The Office of Public Safety dispatched a Student Health Service driver to transport an employee to Evangelical Hospital Emergency Room for treatment.

VANDALISM—Public Safety Officers responded to Vedder hall for a broken window pane. The window was repaired and the investigation is continuing.

DISORDERLY CONDUCT—While responding to Vedder Hall, Public Safety Officers were advised that unknown person(s) had urinated on a student's room door. A custodian cleaned the door and the investigation is continuing.

February 15, 1997

VANDALISM/TAMPERING WITH FIRE EQUIPMENT—Public Safety Officers responded to a fire alarm activation at Larison Hall. Unknown person(s) had activated a pull station for no apparent reason. The investigation is continuing.

UNIVERSITY PROPERTY DAMAGE—Public Safety Officers responded to Swartz Hall for a report of a broken window. A work order was filed for the repairs and the investigation is continuing.

INFORMATION—Public Safety Officers responded to Larison Hall for an alarm activation. A problem was located with the alarm panel and the electricians were notified.

VANDALISM—Public Safety Officers responded to Roberts Hall for the report of damage to the men's and women's bathrooms. The Lewisburg Police Department was contacted and the investigation is continuing.

VANDALISM—Public Safety Officers responded to Dana Engineering for the report of a broken glass pane in a door. The door was repaired and the investigation is continuing.

INFORMATION—Public Safety Officers responded to the Fieldhouse for the report of juveniles jumping off the catwalk. One of the juvenile's parents responded to transport the youths from the property.

BROKEN WINDOW—Public Safety Officers responded to Swartz Hall for the report of a broken window. Witnesses advised that the window had been damaged by snowballs.

VANDALISM/BROKEN WINDOW PANE—A Public Safety Officer responded to the Langone Center for the report of a window broken when unknown person(s) threw a brick through it. East Buffalo Township Police Department responded and the investigation is continuing.

INFORMATION/ACCIDENTAL TRASH CAN FIRE—Public Safety Officers responded to Swartz Hall for a fire alarm activation caused by a fire in a plastic trash can. East Buffalo Township Police responded. A cigarette left in the can may have caused the fire.

February 16, 1997

MEDICAL TRANSPORT/ALLEGED ALCOHOL OVERDOSE—Public Safety Officers responded to Swartz Hall for an unresponsive student. The student was transported to Evangelical Hospital Emergency Room by ambulance.

FIRE/TRASH CAN—Public Safety Officers responded to Gateway Silberman for a fire alarm activation caused by fire in a trash can. The resident of the room advised having put cigar ashes in the can.

ASSIST LOCAL POLICE—While on routine patrol Public Safety Officers observed East Buffalo Township Police conducting a traffic stop involving a University student. The student was cited for a stoplight violation and Driving Under the Influence of alcohol.

MEDICAL TRANSPORT—Student Health Service requested an ambulance to transport a student to Evangelical Hospital for treatment.

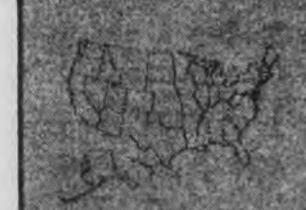
LARCENY/THEFT BY UNLAWFUL TAKING—A University student reported to Public Safety that a hockey bag and equipment was taken from a room in Vedder Hall. The investigation is continuing.

ATTEMPT TO PURCHASE TOBACCO PRODUCT BY MINORS—A Public Safety Officer responded to the Langone Center for the report of four juveniles attempting to purchase cigarettes. The youths were gone on the officer's arrival and a search of the area met with negative results.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

News rocks my world

News Briefs



National News

Court broadens rights for abortion protesters

WASHINGTON— The U.S. Supreme Court handed anti-abortion protesters a partial victory yesterday, striking down part of a judge's order creating buffer zones around individuals and clinics during protests.

The justices struck down the part of U.S. District Judge Richard J. Arcara's order creating "floating buffer zones" around individuals leaving or entering women's clinics where abortions are performed. That ban, the court said, violated constitutional guarantees of free speech.

The judges left intact a fixed buffer zone keeping demonstrators 15 feet away from the clinic buildings, citing it as a reasonable restraint to preserve public order.

Justice Stephen G. Breyer was the sole dissension in striking down the floating buffer zones. The court voted 6-3 to uphold as constitutional the fixed 15-foot zone around clinics. Justices Antonin Scalia, Anthony M. Kennedy and Clarence Thomas voted to strike down Arcara's entire order.

Doctor to test theory for Gulf War Syndrome

NEW ORLEANS— After a four-year battle, Congress has allocated $3 million to a New Orleans doctor who believes he can help solve the mystery of the Gulf War Syndrome.

Dr. Edward Hyman testified before Congress and wrote and phoned the Pentagon urging for funding to test his theory that veterans with the syndrome are actually suffering from a severe bacterial infection. But the Pentagon blocked his requests, despite evidence that he'd had some success treating ten Gulf War vets and their wives with large infusions of antibiotics.

Although the Department of Defense has recently conceded that thousands of soldiers may have been exposed to chemical weapons in the Gulf, Hyman does not believe chemicals— or biological warfare— are the cause of their illness.

"I think the better bet is that we went into a geographical area that has a variant of these germs, that we're not familiar with, that we don't have any inherited immunity to," Hyman said.

JonBenet's dad to submit third writing sample

BOULDER, Colorado — The father of JonBenet Ramsey has been asked to submit a third handwriting sample to police investigating the murder of the six-year-old girl, a family spokesman confirmed.

The spokesman, Pat Korten, said Tuesday that investigators made the request last week, but he said he could not say whether John Ramsey had submitted the new writing sample.

JonBenet, the 1995 Little Miss Colorado, was found strangled in the basement of her family's home on Dec. 26. A partial autopsy released last week indicated she had been severely beaten and could have been sexually assaulted.

Before the latest police request, family members and others with access to the victim voluntarily had given handwriting, hair and blood samples.

The girl's body was found eight hours after her mother said she found a handwritten note demanding a ransom for her return. Police are comparing the writing in the note to the handwriting samples they've collected.

McVeigh was seen before Oklahoma bombing

DENVER — A gas station cashier at a truck stop north of Oklahoma City has identified bombing suspect Timothy McVeigh as the man who stopped to fill up his Ryder truck only hours before the blast that killed 168 people.

Fred Skrdla testified Tuesday that he realized it was McVeigh as soon as he saw him on television when he was taken into custody after the bombing of the Alfred P. Murrah federal building.

"He was the person I had seen in the store," Skrdla said during a pretrial hearing, which resumed yesterday.

McVeigh and Terry Nichols are charged with murder, conspiracy and weapons-related counts in the bombing. McVeigh's trial is scheduled to begin March 31. Nichols will be tried later.

Skrdla was unable to say whether there was anyone else in the vehicle. Prosecutors contend that McVeigh rented a Ryder truck April 17, 1995, two days before the bombing that also injured 500 people.

World News

Chinese leader Deng Xiaoping dies

BEIJING— Chinese leader Deng Xiaoping, who opened China's economy to the world while maintaining strict ideological control, died yesterday at age 92.

China's state-run Xinhua News Agency said Deng died from complications from Parkinson's disease and a lung infection.

It was Deng who first initiated the process of broad changes that later swept the communist world, yet even when challenged in the streets, Deng never abandoned his commitment to Communist Party rule in China.

Deng joined the Chinese Communist Party when he was 20, and rose to prominence with the triumph of Chairman Mao Tse-tung's revolution. But Deng's pragmatism brought him into repeated conflict with Party ideologues. Twice he was purged from the ruling hierarchy, and twice he was rehabilitated.

Following Mao's death in 1976, Deng emerged as China's paramount leader and set the People's Republic on a course of reform and liberalization that would change the face of China and the world.

Zaire cool to U.N. peace plan

KINSHASA, Zaire— Zaire said yesterday that the U.N. Security Council's resolution for a truce in its civil war was too timid because it failed to condemn aggressors in the five-month conflict.

Meanwhile, South Africa said it would host talks this week between Zairian rebel leader Laurent Kabila and an envoy for President Mobutu Sese Seko's government.

"Representatives of the contesting parties have made a request that they would like to meet in South Africa... to be able to discuss their problems," President Nelson Mandela told reporters.

He said he hoped the talks could begin on Thursday. There was no immediate Zairian government confirmation of any meeting.

Zaire accuses Rwanda, Uganda and Burundi of invading the eastern portion of the vast Central African country to fight alongside rebels.

Reacting to the U.N. resolution, Zairian Foreign Minister Kamanda wa Kamanda said there could be no cessation of hostilities without a withdrawal of all international troops.

Ten indicted in S. Korean loan scandal

SEOUL, South Korea— After a nearly month-long investigation, South Korean prosecutors have indicted ten men on charges of bribery and corruption in connection with the collapse of Hanbo Steel.

Chief prosecutor Choi Byung-kuk said those indicted included three close aides of President Kim Young-sam, heads of leading banks and the founder of the Hanbo Group, Chung Tae-soo.

Hanbo Steel collapsed under the weight of a $6 billion debt, much of it from loans for which Hanbo had put up with only $105 million in collateral. Critics alleged government influence peddling, and Kim ordered an investigation.

"So far we've had a hard time finding truth behind the case that would clear up all suspicions," Choi said. "We had to rely mostly on Chung's testimony, and he has insisted he didn't have to bribe many government officials because bankers and politicians did the job."

Albright to offer weapons cuts to Russia

LONDON— U.S. Secretary of State Madeleine Albright plans to offer to Russia a reduction in conventional Western forces in Europe, in part to ease Russian concerns over NATO's proposed expansion into former Warsaw Pact nations.

Some Russian weaponry is outnumbered by as much as a four-to-one margin under the current Conventional Forces in Europe (CFE) treaty. The proposals Albright will bring to Moscow on Thursday offer unilateral conventional weapons cuts and impose ceilings on the number of weapons deployed, according to senior U.S. officials.

Talks on the CFE treaty revisions are expected in Vienna later this year.

The deal would not limit the West's ability to modernize weapons. It also would leave open the possibility of restoring the forces in the event of a Russian buildup.

O'CONNOR from page 1

with it well," Lima said. "At first, it left everybody speechless... What's happening now is the players are talking with other players and we're talking through it."

O'Connor is survived by his wife Peggy, and three children, Meghann, 16, Michael, 14, and Patrick, 9, as well as his father-in-law Tom Pender, a former head football coach at Bucknell from 1969-1974.

Athletic director Rick Hartzell said, "We are deeply saddened by the loss of Mike O' Connor. My most heartfelt condolences go out to his wonderful family. He had a great impact on this university and this community, and he will be dearly, dearly missed."

Police are still investigating the death, and the reports of an autopsy are still pending.

In lieu of flowers, it is requested that donations to the O'Connor children's trust fund be made to the Mifflinburg Bank & Trust Company, 343 Chestnut Street, Mifflinburg, PA 17844.

DIETZ from page 1

The Departmental Review Committee apparently voted to renew his contract. However, it was when his case went to the URC, which is the next step in the review process, that the decision was made not to renew his contract. An "unsolicited letter" was submitted to the URC, which apparently played a big part in the URC's decision.

Dietz only learned that faculty composed the "unsolicited letter" through a clerical error and said that "to this day I still do not know who authored it."

Nor does Dietz know the specifics of the accusations made in this letter, which gives him nothing to respond to, he said.

"Even though they [the committee] found that many of those things [accusations] are unfounded, that did not impact the overall credibility [of the 'unsolicited letter," he said.

Dietz was informed that he has a terminal contract, which means that his contract will not be renewed after one year from now. In order to give professors enough notice to search for a job, there is a University policy stating that if a professor has been at the institution for more than two years, they have to be given one year's notice.

Thomas Rich, dean of the college of engineering, like many of his colleagues, explained that, "The general policy on personnel matters is that they are confidential. It really would be inappropriate for me to comment."

Likewise, Kastner said, "I am not allowed to respond to such questions. All of those deliberations of the committee are confidential."

Trudy Cunningham, associate dean of the college of engineering, was unable to answer questions about the decision-making process not to renew Dietz's contract. "I am not involved in the review process at all," Cunningham said.

According to Dietz, the review committee rejected his appeal on the basis that he was "uncollegial."

Dietz paraphrased what he understood to be the key piece of evidence that makes him not collegial—the letter says that he was disrespectful to other faculty, for example, by denigrating them in front of students. He said, however, the letter fails to cite an example, and none has subsequently surfaced.

The three criteria on which the committee evaluates a candidate for retention and tenure are teaching effectiveness, scholarship and university service. While "collegiality" does not clearly appear to be one of the three criteria, Rich said that "collegiality is a component of service."

"The total quality of a given program is the sum of all its parts... it's the way the team members pull together for the benefit of the program," Rich said.

An electrical engineer, who wished to remain anonymous, strongly vocalized that there are larger problems in the electrical engineering department that need to be addressed.

In an interview yesterday he said, "Since professor Aburdene [professor of electrical engineering and departmental chair] has held the position as chair, at least four highly qualified professors have left the school and two of them were tenured."

He mentioned Muhammed H. Rashid, currently at Purdue University and Tom Sloan as the two tenured professors who left the electrical engineering department in the last five years.

The same anonymous source explained that not only has the electrical engineering department had a problem with high turnover, but unsmooth turn-overs.

Furthermore, an electrical engineering professor who was led to believe that his contract would be renewed for the 1996-97 academic year spoke about his situation in an interview yesterday. The visiting professor was under the impression that his contract would be extended. However, the verbal contract which had been made in a departmental faculty meeting, was dismissed as late as May 22, leaving him without a job for this academic year.

Several attempts were made to contact Aburdene; however, he was unable to be reached for comment.

The anonymous electrical engineer characterized Dietz as "a brilliant professor and a brilliant person who has brilliant ideas to improve the existing electrical engineering program." Dietz has "expressed these ideas on several occasions within the departmental meeting and communicated with the departmental faculty through email," he said.

"Because he [Dietz] is so outspoken about these ideas, Professor Aburdene... instead of being a responsive chairman and responsive professionally, he always reacted negatively... like he was offended," the anonymous source added.

Dietz said "I honestly feel that I unwittingly stepped on some toes and that is where this comes from."

Dietz voiced several problems that he saw in this whole review process. He said, "One of the things that is most frustrating to me is that the URC makes the final decision without any firsthand knowledge of the situation."

DEBATE

sons. Team A members Paula Zimmerman '97 and Mike Kochkodin '97 were ranked 12th out of all schools present.

Mandy Walker '99, President of the Debate Team, explained the ranking process; "When you compete in a round, everyone gets speaker points. The team with the highest speaker points wins." Before a round, the teams debating are given a topic. Walker stated that "topics are based on what the average college student would know." Topics include policy-oriented or philosophical arguments.

Once team members are told whether they will be the government team, which argues for the issue present, or the opposition team, which argues against the topic, the teams have 10 minutes to collect their thoughts. Walker said, "It takes practice. You need to try to find the most convincing points that you can think of within that time."

Walker said that the team competes all semester long. The North American Championships is one of the most competitive tournaments. For the rest of this semester, the debate team will be competing in some smaller tournaments trying to qualify for the National Championships. In order to do so the team will have to rank in the top two of any tournament. Regardless of whether they fulfill this requirement, Bucknell has a free spot at Nationals, because they belong to APDA. Nationals will be held between April 18 and April 20.

> ***When you compete in a round, everyone gets speaker points. The team with the highest speaker points wins.***

Calvin and Hobbes keep house

CALVIN and HOBBES will retain the former Sigma Phi Epsilon fraternity house until at least August, 1998, despite rumors that Sig Ep will have the house next fall when the fraternity is expected to recolonize.

"According to the contract, Sig Ep doesn't have the house for next year. Their rush is after formal rush next fall, after Residential Life has already decided on rooms for the year," said Tim Horne '98, president of CALVIN and HOBBES.

Horne is not sure where CALVIN and HOBBES will be placed after August 1998, but said "Dean Cummerford says there is a high priority on placing us somewhere."

CALVIN and HOBBES, a substance-free organization which celebrated its three-year anniversary this fall, has occupied the house since 1995. The organization currently has 35-40 members.

Sigma Phi Epsilon, the fraternity formerly known as SPE, will make an effort to recolonize at the University next fall after being shut down by its national chapter in the fall of 1993, due to many problems, including financial mismanagement and substance abuse.

SANTORUM from page 1

he didn't listen."

Santorum said, "What I see as sort of the problem that we have in our country is the breakdowns of the institution of the family... the breakdown of communities and organizations... those institutions that bring us together and promote values."

He said "Some of the statements I hear from young people are really frightening—first off that they are kind of tuned out, and they don't think that what they think matters."

He continued "Well, everyone always says we have to do something about crime, or we need more cops, more this, we need to spend this. No we don't, we need more Dads... Now that's a hard move, that's a tall order for the federal government, what can we do?"

Santorum responded to his own question, "We've done part of the job with welfare—we've done some very tough things on welfare. But, more importantly, a lot of organizations are trying to focus on the issue of poverty—volunteer, non-profit organizations." Santorum is in favor of granting tax credits to people who give money to these organizations.

> ***We've done part of the job with welfare—we've done some very tough things on welfare. But, more importantly, a lot of organizations are trying to focus on the issue of poverty—volunteer, non-profit organizations.***
>
> *—Senator Rick Santorum*

Santorum offered advice on how University students can help out, "in focusing on those kind of activities that help a young child who has grown up without a father... [such as] Big Brothers/Big Sisters."

President Adams asked a question about Santorum's feelings concerning Clinton's Educational proposal that offers tax credits to families that send their children to private school.

Santorum responded, "I find it interesting that the president talked mostly about problems with primary and secondary education. But look at where he put the money. He put it into higher education where we acknowledge that these are the leaders of the world... So having said that, do I support the tax credits? No, I don't. And the reason I don't support them is that I think it's Washington's way of saying 'We'll give you a tax credit if you need it.' My feeling is that we should give families a tax break, and if they want to spend the money sending their kids to school, great."

Do you know what is going on on campus? Do you want to know? Well, then take a look at the campus calendar on page 12.

PUBLIC SAFETY LOG

February 12, 1997

INFORMATION/LOST PROPERTY—Public Safety Officers received a student report regarding a missing wallet.

February 13, 1997

VEHICLE VANDALISM—The Office of Public Safety received a report that vehicles were being smeared with food in the CALVIN and HOBBES parking lot.

INFORMATION—The Office of Public Safety responded to Chi Phi Fraternity for a fire alarm activation caused by an item falling on a halogen light.

MISSING PROPERTY—The Public Safety Office received a report of course information being removed from a bulletin board in Olin Science building.

February 14, 1997

AIDED STUDENT HEALTH SERVICE TRANSPORT—The Office of Public Safety dispatched a Student Health Service driver to transport an employee to Evangelical Hospital Emergency Room for treatment.

VANDALISM—Public Safety Officers responded to Vedder hall for a broken window pane. The window was repaired and the investigation is continuing.

DISORDERLY CONDUCT—While responding to Vedder Hall, Public Safety Officers were advised that unknown person(s) had urinated on a student's room door. A custodian cleaned the door and the investigation is continuing.

February 15, 1997

VANDALISM/TAMPERING WITH FIRE EQUIPMENT—Public Safety Officers responded to a fire alarm activation at Larison Hall. Unknown person(s) had activated a pull station for no apparent reason. The investigation is continuing.

UNIVERSITY PROPERTY DAMAGE—Public Safety Officers responded to Swartz Hall for a report of a broken window. A work order was filed for the repairs and the investigation is continuing.

INFORMATION—Public Safety Officers responded to Larison Hall for an alarm activation. A problem was located with the alarm panel and the electricians were notified.

VANDALISM—Public Safety Officers responded to Roberts Hall for the report of damage to the men's and women's bathrooms. The Lewisburg Police Department was contacted and the investigation is continuing.

VANDALISM—Public Safety Officers responded to Dana Engineering for the report of a broken glass pane in a door. The door was repaired and the investigation is continuing.

INFORMATION—Public Safety Officers responded to the Fieldhouse for the report of juveniles jumping off the catwalk. One of the juvenile's parents responded to transport the youths from the property.

BROKEN WINDOW—Public Safety Officers responded to Swartz Hall for the report of a broken window. Witnesses advised that the window had been damaged by snowballs.

VANDALISM/BROKEN WINDOW PANE—A Public Safety Officer responded to the Langone Center for the report of a window broken when unknown person(s) threw a brick through it. East Buffalo Township Police Department responded and the investigation is continuing.

INFORMATION/ACCIDENTAL TRASH CAN FIRE—Public Safety Officers responded to Swartz Hall for a fire alarm activation caused by a fire in a plastic trash can. East Buffalo Township Police responded. A cigarette left in the can may have caused the fire.

February 16, 1997

MEDICAL TRANSPORT/ALLEGED ALCOHOL OVERDOSE—Public Safety Officers responded to Swartz Hall for an unresponsive student. The student was transported to Evangelical Hospital Emergency Room by ambulance.

FIRE/TRASH CAN—Public Safety Officers responded to Gateway Silberman for a fire alarm activation caused by fire in a trash can. The resident of the room advised having put cigar ashes in the can.

ASSIST LOCAL POLICE—While on routine patrol Public Safety Officers observed East Buffalo Township Police conducting a traffic stop involving a University student. The student was cited for a stoplight violation and Driving Under the Influence of alcohol.

MEDICAL TRANSPORT—Student Health Service requested an ambulance to transport a student to Evangelical Hospital for treatment.

LARCENY/THEFT BY UNLAWFUL TAKING—A University student reported to Public Safety that a hockey bag and equipment was taken from a room in Vedder Hall. The investigation is continuing.

ATTEMPT TO PURCHASE TOBACCO PRODUCT BY MINORS—A Public Safety Officer responded to the Langone Center for the report of four juveniles attempting to purchase cigarettes. The youths were gone on the officer's arrival and a search of the area met with negative results.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

News rocks my world

BUCKNELL SEMINAR FOR YOUNGER POETS

From June 2 to 28, Bucknell will conduct its thirteenth annual Seminar for Younger Poets. The Seminar provides an extended opportunity for undergraduates to write and to be guided by established poets. It balances private time for writing, disciplined learning, and exchange among the students. The Stadler Center for Poetry is the campus headquarters for the program.

Staff poets conduct two workshops each week and are available for tutorials. Weekly readings by the students provide opportunities for Seminar poets to hear and be heard by their peers.

This year, thanks to the fund-raising efforts of Gary Sojka on behalf of the Center, THREE BUCKNELL STUDENTS will be chosen to participate in the Seminar with students from other universities. Students who have completed their sophomore, junior, or senior year may apply. Bucknell will provide room, board, and spaces for writing. Students are responsible for their own transportation.

THE STAFF

This year's Poet-in-Residence, Michael S. Weaver, will be a member of the Seminar staff. Mr. Weaver is the author of five books of poetry, most recently *Timber & Prayer*. His first book *Water Song* was a finalist for the Walt Whitman Award in 1983. He has had two plays, *Rosa* and *Elvira & the Lost Prince*, produced professionally, and he has received fellowships from the NEA and the Pa. Arts Council. Other staff members are: director Cynthia Hogue, associate professor of English; co-director Karl Patten, professor of English; Deirdre O'Connor, tutor in the Writing Center; and Steve Styers, assistant to the director, Center for Poetry.

APPLICATIONS should include:

1. 10-12 page portfolio
2. An academic transcript
3. A letter of self-presentation (a brief autobiography stressing commitment to poetry writing, experience, and any publications)
4. If the student has not taken an advanced creative writing course (EN 308) at Bucknell, include a letter of recommendation from a writing teacher elsewhere.

Send to:
Cynthia Hogue, Director
Bucknell Seminar for Younger Poets
Stadler Center for Poetry

DEADLINE for receiving materials: March 10, 1997
Letters of notification will be sent by April 7.

If the applicant wishes to have the portfolio returned, a self-addressed envelope should be enclosed. For more information, call the Center for Poetry at 1853.

News Briefs

National News

Court broadens rights for abortion protesters

WASHINGTON— The U.S. Supreme Court handed anti-abortion protesters a partial victory yesterday, striking down part of a judge's order creating buffer zones around individuals and clinics during protests.

The justices struck down the part of U.S. District Judge Richard J. Arcara's order creating "floating buffer zones" around individuals leaving or entering women's clinics where abortions are performed. That ban, the court said, violated constitutional guarantees of free speech.

The judges left intact a fixed buffer zone keeping demonstrators 15 feet away from the clinic buildings, citing it as a reasonable restraint to preserve public order.

Justice Stephen G. Breyer was the sole dissension in striking down the floating buffer zones. The court voted 6-3 to uphold as constitutional the fixed 15-foot zone around clinics. Justices Antonin Scalia, Anthony M. Kennedy and Clarence Thomas voted to strike down Arcara's entire order.

Doctor to test theory for Gulf War Syndrome

NEW ORLEANS— After a four-year battle, Congress has allocated $3 million to a New Orleans doctor who believes he can help solve the mystery of the Gulf War Syndrome.

Dr. Edward Hyman testified before Congress and wrote and phoned the Pentagon urging for funding to test his theory that veterans with the syndrome are actually suffering from a severe bacterial infection. But the Pentagon blocked his requests, despite evidence that he'd had some success treating ten Gulf War vets and their wives with large infusions of antibiotics.

Although the Department of Defense has recently conceded that thousands of soldiers may have been exposed to chemical weapons in the Gulf, Hyman does not believe chemicals— or biological warfare— are the cause of their illness.

"I think the better bet is that we went into a geographical area that has a variant of these germs, that we're not familiar with, that we don't have any inherited immunity to," Hyman said.

JonBenet's dad to submit third writing sample

BOULDER, Colorado — The father of JonBenet Ramsey has been asked to submit a third handwriting sample to police investigating the murder of the six-year-old girl, a family spokesman confirmed.

The spokesman, Pat Korten, said Tuesday that investigators made the request last week, but he said he could not say whether John Ramsey had submitted the new writing sample.

JonBenet, the 1995 Little Miss Colorado, was found strangled in the basement of her family's home on Dec. 26. A partial autopsy released last week indicated she had been severely beaten and could have been sexually assaulted.

Before the latest police request, family members and others with access to the victim voluntarily had given handwriting, hair and blood samples.

The girl's body was found eight hours after her mother said she found a handwritten note demanding a ransom for her return. Police are comparing the writing in the note to the handwriting samples they've collected.

McVeigh was seen before Oklahoma bombing

DENVER — A gas station cashier at a truck stop north of Oklahoma City has identified bombing suspect Timothy McVeigh as the man who stopped to fill up his Ryder truck only hours before the blast that killed 168 people.

Fred Skrdla testified Tuesday that he realized it was McVeigh as soon as he saw him on television when he was taken into custody after the bombing of the Alfred P. Murrah federal building.

"He was the person I had seen in the store," Skrdla said during a pretrial hearing, which resumed yesterday.

McVeigh and Terry Nichols are charged with murder, conspiracy and weapons-related counts in the bombing. McVeigh's trial is scheduled to begin March 31. Nichols will be tried later.

Skrdla was unable to say whether there was anyone else in the vehicle. Prosecutors contend that McVeigh rented a Ryder truck April 17, 1995, two days before the bombing that also injured 500 people.

World News

Chinese leader Deng Xiaoping dies

BEIJING— Chinese leader Deng Xiaoping, who opened China's economy to the world while maintaining strict ideological control, died yesterday at age 92.

China's state-run Xinhua News Agency said Deng died from complications from Parkinson's disease and a lung infection.

It was Deng who first initiated the process of broad changes that later swept the communist world, yet even when challenged in the streets, Deng never abandoned his commitment to Communist Party rule in China.

Deng joined the Chinese Communist Party when he was 20, and rose to prominence with the triumph of Chairman Mao Tse-tung's revolution. But Deng's pragmatism brought him into repeated conflict with Party ideologues. Twice he was purged from the ruling hierarchy, and twice he was rehabilitated.

Following Mao's death in 1976, Deng emerged as China's paramount leader and set the People's Republic on a course of reform and liberalization that would change the face of China and the world.

Zaire cool to U.N. peace plan

KINSHASA, Zaire— Zaire said yesterday that the U.N. Security Council's resolution for a truce in its civil war was too timid because it failed to condemn aggressors in the five-month conflict.

Meanwhile, South Africa said it would host talks this week between Zairian rebel leader Laurent Kabila and an envoy for President Mobutu Sese Seko's government.

"Representatives of the contesting parties have made a request that they would like to meet in South Africa... to be able to discuss their problems," President Nelson Mandela told reporters.

He said he hoped the talks could begin on Thursday. There was no immediate Zairian government confirmation of any meeting.

Zaire accuses Rwanda, Uganda and Burundi of invading the eastern portion of the vast Central African country to fight alongside rebels.

Reacting to the U.N. resolution, Zairian Foreign Minister Kamanda wa Kamanda said there could be no cessation of hostilities without a withdrawal of all international troops.

Ten indicted in S. Korean loan scandal

SEOUL, South Korea— After a nearly month-long investigation, South Korean prosecutors have indicted ten men on charges of bribery and corruption in connection with the collapse of Hanbo Steel.

Chief prosecutor Choi Byung-kuk said those indicted included three close aides of President Kim Young-sam, heads of leading banks and the founder of the Hanbo Group, Chung Tae-soo.

Hanbo Steel collapsed under the weight of a $6 billion debt, much of it from loans for which Hanbo had put up with only $105 million in collateral. Critics alleged government influence peddling, and Kim ordered an investigation.

"So far we've had a hard time finding truth behind the case that would clear up all suspicions," Choi said. "We had to rely mostly on Chung's testimony, and he has insisted he didn't have to bribe many government officials because bankers and politicians did the job."

Albright to offer weapons cuts to Russia

LONDON— U.S. Secretary of State Madeleine Albright plans to offer to Russia a reduction in conventional Western forces in Europe, in part to ease Russian concerns over NATO's proposed expansion into former Warsaw Pact nations.

Some Russian weaponry is outnumbered by as much as a four-to-one margin under the current Conventional Forces in Europe (CFE) treaty. The proposals Albright will bring to Moscow on Thursday offer unilateral conventional weapons cuts and impose ceilings on the number of weapons deployed, according to senior U.S. officials.

Talks on the CFE treaty revisions are expected in Vienna later this year.

The deal would not limit the West's ability to modernize weapons. It also would leave open the possibility of restoring the forces in the event of a Russian buildup.

EDITORIAL

Administrative negligence of student concerns breeds apathy

The number of student petitions circulating around campus this year echoes of the 60s, when university students across the country protested whatever cause they deemed important. While the wild clothes and dramatic sit-ins have transformed into pressed khakis and polite petitions, students still seek the same thing. They want to be heard.

Except there's one crucial difference. Thirty years ago, students were able to make a difference. Today, student opinion at this University means virtually nothing.

Just look at the petitions that have circulated within the past year. When students discovered that a well-liked professors' contract was not being renewed, they thought maybe their opinion might count for something. Several electrical engineering students spent the time writing a petition and circulating it around campus, so they could voice support for the professor in question, Paul Dietz, assistant professor of electrical engineer. The 81 signatures obviously had no or little impact on the final decision, as Dietz' appeal for reconsideration was refused by University Review Committee.

Many seniors have recently signed a petition in an attempt to bring back the tradition of serving beer at Tent Party, but President Adams has made it clear that his decision to make the even dry is final.

Swartz residents circulated and submitted to the Deans' Office a petition last semester for the removal of the statue in front of their dormitory, claiming that it doesn't complement the architecture. The statue is still there, although Victor Arcelus, resident director, said that he thinks the University is planning to remove it. He has yet to receive a direct response to the petition.

With all the complaints about student apathy, administrators should be ecstatic when students finally raise their voices. But in every case cited above, student opinion counted for almost nothing. Not one petition made a clear impact. This pattern can only mean one thing—that the students' point of view is not considered worthwhile and important. With this type of encouragement, it's no wonder students opt to sit back and let everything happen, instead of trying to make things happen. The administration's overwhelming tendency to ignore and trivialize student input can only breed apathy.

Students are most impacted by the decisions that are made, yet they have the least amount of weight in these decisions. While administrators, faculty and staff live and work here long after individual students have come and gone, the student body as a whole will always exist. Students should have more say in what happens with their University.

Of course, there will always be decisions that disagree with popular student opinion. No one is claiming that students should have the final say. But administrators should have some method of determining and incorporating student input into their decisions, a practice which obviously does not exist today.

This University is a place where different people coexist, whether it be students or faculty, administrators or staff. A community does not and will not exist until everyone's point of view is considered valuable.

Everyone has something important to say. It's high time that student voices are heard.

OPINIONS

Native American excels as speaker

Russell Means, cofounder of the American Indian Movement, enthralls capacity crowd

BY AMY YOUNGGREN
Bucknellian Staff Columnist

On February 3rd, in celebration of this semester's focus on Native American Peoples, the University had the privilege of having Russell Means share some thoughts about his experiences of his Lakota culture and his work as an Indian activist. First of all, I really was impressed and excited by the turnout at the lecture. Many faculty members and students attended, as well as many members from around the Bucknell community. I was pleasantly surprised by the interest that was expressed. I managed to find one of the last seats in the auditorium (although it appeared to be standing room only), and as I sat and listened to the introduction, I was shocked by the length of his bio. After hearing everything from being his director of the American Indian Rights Movement to being hounded by the government and representing himself in twelve trials while also serving time in prison in Sioux Falls, I had to give his perspective much credit. It was quite obvious that this man had not lived an anonymous life.

> ***The Lakota culture, Means explained, does not even have a word for the concept of war because they neither condone nor believe in this force on society.***

I was thoroughly affected by his radical ideas and views which were displayed in the two hours I was there. However, some of the things which were conveyed were, none the less, difficult for me to swallow. He began by explaining the matriarchal nature of his Lakota culture, where they follow the strength and wisdom of the women. He contrasted this with our seemingly patriarchal American society where everything is centered around men and the fear of the unknown. In condemning our present society in the United States, Means explained that our society is one based on fear and the need to control anything around us which is different. In an effort to control these "variables" in society, we have developed the novel idea of political correctness. Means believes that this has only succeeded in keeping us apart and emphasizing the separateness instead of the unity of this American society.

At this point in his lecture I was very moved and impressed. These were all fresh ideas and perspectives to which I had never been exposed before and it gave me a new outlook, which made a lot of sense. He pointed out the irony in the concept of war within our society. The Lakota culture, Means explained, does not even have a word for the concept of war because they neither condone nor believe in this force on society. America, however, fights all the things it is afraid of with war. The "War on Drugs" and "War on Crime" are two of the major oxymorons we hear politicians screaming day after day. However, isn't it ridiculous to fight violence with violence? I suppose it is, but in this real world we live in have we been given a choice? Yes, Russell Means is correct in the statement that this society fears their children, possibly because they are better armed than the police themselves. Although his proposition of a culture and a society with no concept of war and no fear of its inhabitants is admirable, I can't justify this as a realistic conviction to maintain at this present day.

I sincerely enjoyed and agreed with many components of his argument. Many of his radical ideas I have used to think more about the diversity all around us, even here at the University. I do believe that the political correctness of our society is presently emphasizing the separateness of different cultures and minorities. Do we in fact fear criticism and those things which are different so much that we end up criminalizing dissent? Do we destroy what we fear? I think these are important questions to ponder especially as a student or faculty member on this campus. The University has been criticized for it homogenous student body, however, I would beg this campus to search for "variables" and dissent in this small culture. As Russell Means pointed out at the end of his lecture, "we may be brothers after all... we shall see." We may all be headed for a common destiny. Therefore, isn't it a waste of time and much needed energy to concentrate on keeping so many minorities separate and quiet? I would encourage everyone to speak up, and make all the colors of diversity show and captivate this nation... instead of making us afraid and restrained.

Penn State misinterprets meaning of diversity

Charter denial for anti-homosexual group at State College violates basic tenet of diversity

BY NORA DANIELS
Bucknellian Staff Columnist

Celebrate diversity. It's supposed to be such a good thing, and many colleges and universities consider a diverse student body to be of strong benefit for the school. With such diversity, though, comes campus-based organizations that focus on each group's uniqueness, which is often beneficial for the members of that group, but not for the school as a whole. This has happened at Bucknell to some extent, but for Penn State, just about 50 miles to the west, it has split the student body.

Students Reinforcing Adherence In General Heterosexual Tradition, or STRAIGHT, is a group of students who reject homosexual activities and wish to express their disagreement with such a lifestyle in a nonviolent lifestyle. Their attempt to gain a charter from Penn State University at State College was denied last Sunday night. The Undergraduate Student Government Supreme Court cited inconsistencies between the Policies and Rules, along with the school's Statement of Intolerance in their denial of the charter request. STRAIGHT will likely appeal to the Student Organization Appeal Board in making their organization official.

This is interesting in itself, but its impact on college students everywhere is perhaps more important. Heterosexuality or homosexuality is a choice everyone makes, either consciously or unconsciously, and this decision has denied those who reject homosexuality to form a group on their large university campus. People who made a similar choice about their lives, the Undergraduate Student Government Supreme Court of Penn State University, cannot form an organization to provide a forum for their ideals.

Think about it: Bucknell has not been faced with such a decision about an organization for the "straight" student population, but there is an organization here for people who support the other side of the issue. Would a STRAIGHT-type organization be denied approval here?

Moving away from the sexuality question, though, think about other campus organizations. There are groups for people of many different faiths, from Catholic to Jewish to Zen Buddhist, but what would the reaction be to a Satanic group? It's a choice, and most people agree that it's a bad choice, but would such an organization be denied its right to form? What about ethnic groups... there are those for Asian Americans and for African Americans on campus, but there aren't any for White Americans. Race isn't a choice, it's an unquestionable, unchangeable inheritance. So is one group, even if it's a majority, less special and thus not allowed to have an organization?

We are supposed to be celebrating diversity, and to do so, we must accept people for who they are. Most people need support, and in college, campus organizations are important in providing this service. At State College, STRAIGHT would have been an organization that united a group of students and provided a place for them to encourage each other to stand firm in their choice. The diversity that is already there would have continued. The possibility of intolerance is one of the reasons, apparently, that the organization was denied its charter, but isn't it intolerance—in a different form—that rejects an organization like STRAIGHT? And it is intolerance that allows us to have problems accepting things like a White American Students Organization or a Satanic religious group.

Today, in this diverse world, where we celebrate our diversity in college, we have to learn not to judge others, to let them meet together however they wish, and to accept people's needs for support in all their decisions, wise or unwise.

LETTER

Students unite to protest contract decision

TO THE EDITOR,

Many of us have heard stories of teachers who make differences in the lives of their students. These rare, special individuals have not only the ability to convey knowledge to their students, but also to inspire them, challenge them and help them grow. They exceed the confines of treating education as just another manner of employment: instead, they teach out of a love for learning itself. For the past three years Bucknell University has been extremely fortunate to have had one of these individuals as a member of its faculty — Prof. Paul Dietz.

During his time here as a member of the department of Electrical Engineering, Prof. Dietz has been a model for service to the University, personal scholarship and service to students. He has acted as a member of numerous committees, published several relevant papers, acted as the advisor to student organizations and written a textbook. He founded and continues to advise the highly successful B.E.A.S.T. project, which in involving electrical, mechanical, and computer science engineers is the only interdisciplinary engineering senior design project at Bucknell.

His devotion to his students is legendary, with stories of him watching the sun both set and rise while working with his students being normal. His teaching methods have been both innovative and modern, fusing both theory and current industry practice into an experience which maximizes learning and enjoyment. He is a unique in that although his assignments are very difficult, his students still approach them willingly and happily, knowing not only that they will learn, but also that they will even enjoy the learning. He also has played an important role in trying to modernize the Electrical Engineering curriculum through attempting to introduce current industry practices and standards and enrich the curriculum with additional computer science material. His devotion has always been to the students, with it being far more common to see him eating in the Bison with his students than in the faculty dining room with his fellow professors.

Despite all of this, and despite the recommendation of his departmental review committee, the University Tenure Review recently decided not to renew Prof. Dietz's contract.

We, the students, have always taken pride in the fact that here at Bucknell our voices do make a difference. We have taken pride in the fact that the main focus of our school has been to give us the best education possible. We now ask that the faculty and administration to please not betray our respect and pride in what forms the core of this university. When looking at Prof. Dietz not getting his contract renewed, we can only take notice of the fact that the Electrical Engineering department here at Bucknell has had a history of retaining newly hired professors for only short periods of time. We would like to be able to look back on our alma mater and see a department that retains the professors of high quality that we have found vital to our development and education. Please recognize the mistake that has been made and reverse your decision.

This letter is being written by the students of Prof. Dietz at their own initiative. We hope that in standing together we can make a difference for someone who has made a tremendous difference to us.

OPINIONS

Clinton's focus on education ignores harsh political realities

THOUGHTS...

AND RAMBLINGS

by Todd Zeranski

With the ever-present desires of grandeur President Clinton maintains, coupled with the historically poor performance of second-term Chief Executives as lame ducks, the prospects of a successful second term equal to the domestic victories of Clinton's first—the passing of NAFTA, strong crime legislation and the rollback of regressive Republican environmental policy overhauls—appear muted.

In an otherwise lackluster State of the Union speech (although saddening, it is no wonder many networks devoted primary attention to the O.J. trial verdict), President Clinton announced that education will be the primary focus of his Administration over the next four years. Although laudable and politically expedient, since, along with environmental protection, Medicare and Medicaid, an internationally competitive American educational system resonates deeply in the minds of the polity (especially the infamous "soccer Moms" of the 1996 election), I contend that Clinton's wishes of achieving bona fide educational progress will detract attention from enacting genuine reform in other areas sorely in need of innovative thinking—entitlement reform coming immediately to mind.

Educational reform has lately sprung forth from state government experimentation, rather than from Washington, D.C. Witness Georgia's HOPE (Helping Outstanding Pupils Educationally) scholarship program. Any student who graduates from high school with a "B" average qualifies for free college tuition at Georgia's state schools, along with a book allowance. At Georgia Tech and the University of Georgia, 97% of this year's freshman class are not paying any tuition. This program costs Georgia $190 million annually, paid through the state lottery. Clinton has picked up on Governor Zell Miller's plan, calling for a six year, $42 billion program consisting of a $1500 tax credit and a $10,000 tax deduction for college costs.

The devolution of educational reform away from the Federal Government is due partially to the incongruities of educational performance between states, which begs for policy introspection on a case by case basis. State governments require greater flexibility in pursuing educational improvement than the Federal Government can currently provide. At the same time, the Beltway's past proclivity of merely setting educational standards while pumping money into those tired education programs that required reform by the states (due to their parochial nature) has damaged its resolve. Educational reform for Clinton,then, will be an uphill battle.

Conversely, Republican demands for fiscal austerity, along with Clinton's recalcitrant defense of the elderly (to a fault I think), will hamper any genuine entitlement reform. Look for the knee-jerk establishment of a bipartisan committee to investigate the problem. As usual, one of the most pernicious problems facing this country will be delayed for at least another term. As projected Federal expenditures continue to balloon for Social Security and Medicare at the expense of our generation, not to mention this country's future fiscal solvency, John F. Kennedy would be hard pressed to write *Profiles In Courage* in today's stagnant political environment.

Court decision denies societal benefits of investigative journalism

BY ALLISON PRICE
Bucknellian Staff Columnist

Geraldo Rivera occupies an odd place in American popular culture. We all remember the highly suspenseful Al Capone's vault special and the neo-Nazi border skirmishes. Geraldo has become a catch phrase for the sleazy tabloid journalism of the 1980s which remains with us today, even as Rivera nearly redeems himself with a pretty respectable show on CNBC (I mean, come on, Geraldo was the first journalist O.J. planned to sue when he got acquitted for libel).

In the end, no one remembers Geraldo Rivera in his prime as he leapt over the fence of a corrupt mental hospital to expose its atrocities and reached closure after the experience by adopting one of the former patients.

I thought of this in light of the recent court decision which made it illegal to procure employment in the airline industry under false premises. This was intended to curtail the muckraking activities of journalists who expose indiscretions in the airline industry, namely the folks from *Dateline NBC* who proved how easy it is to tamper with baggage that had been approved for safety.

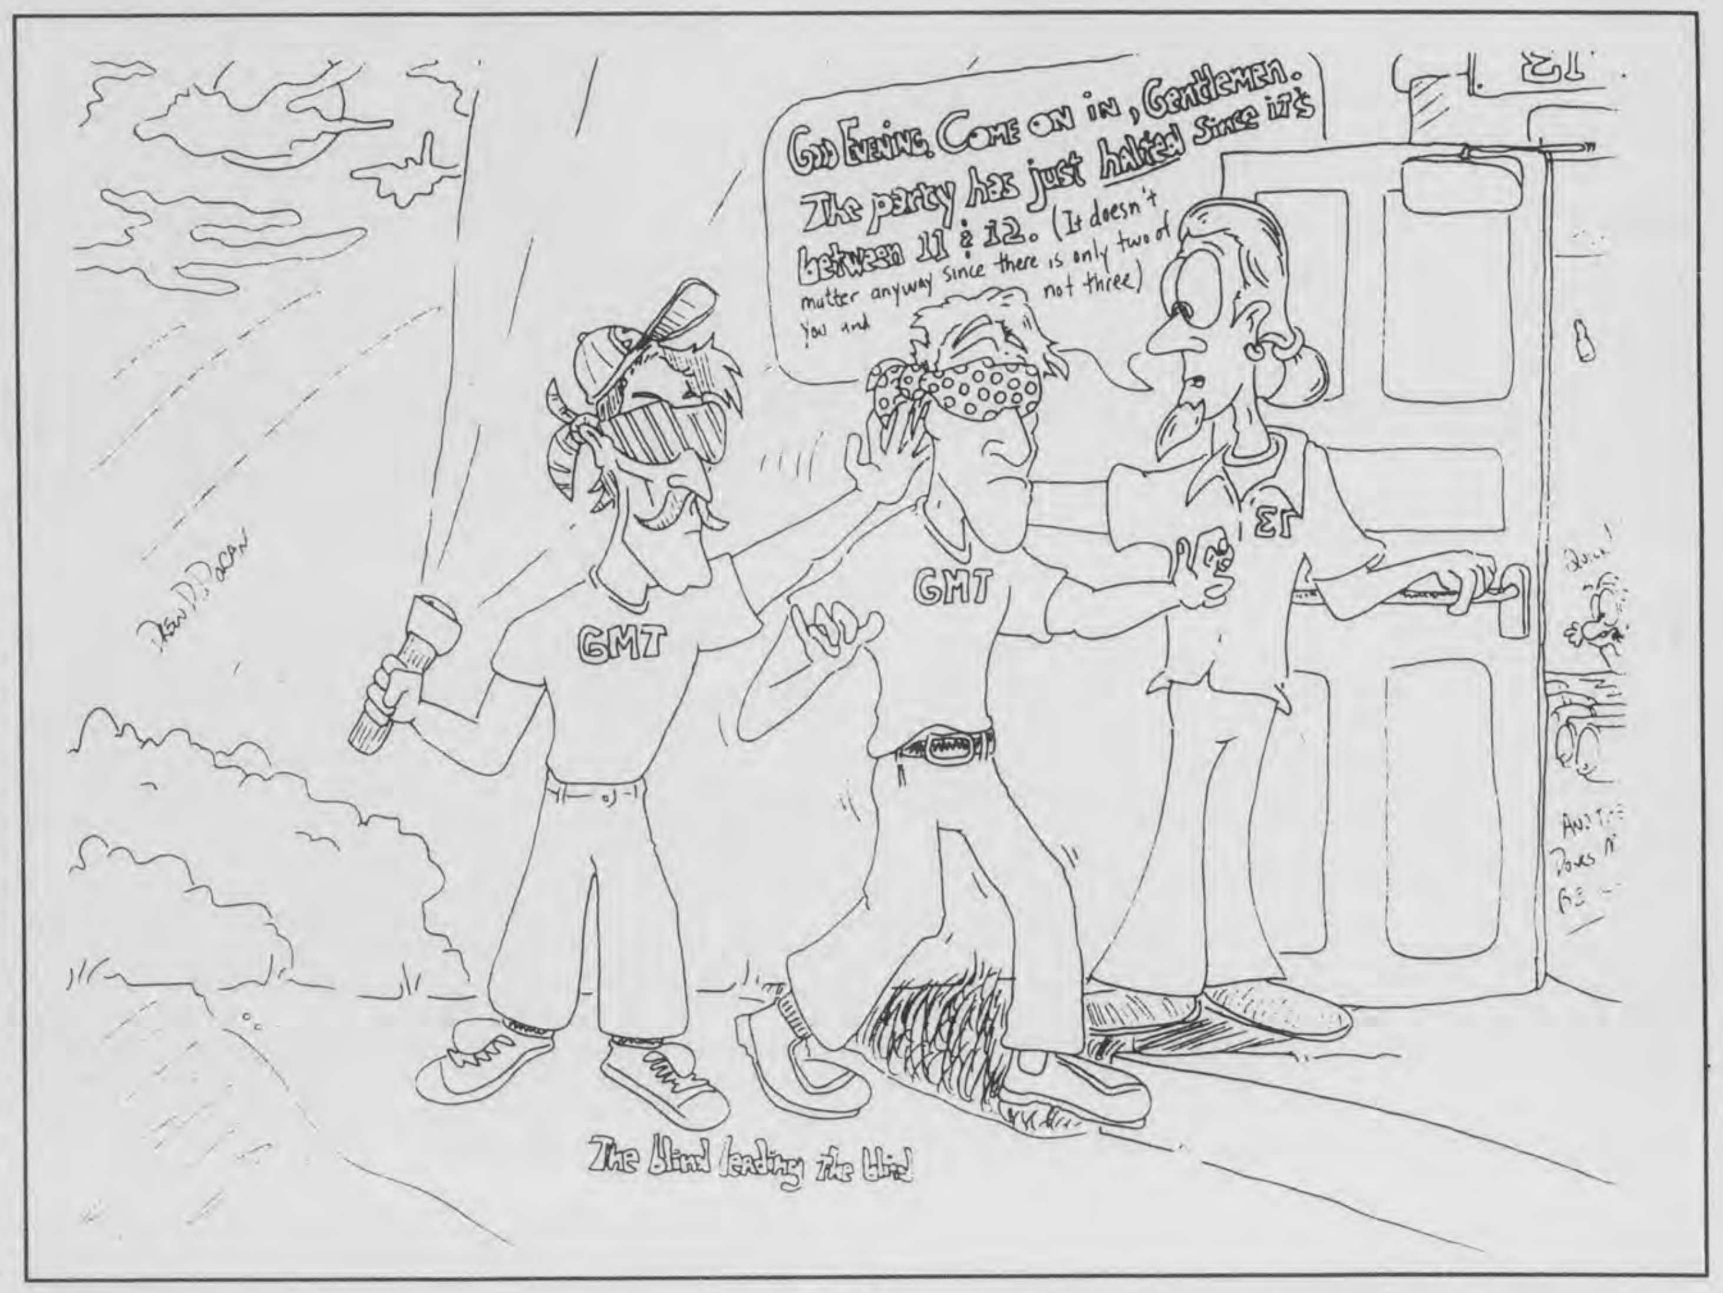
Journalism is a peculiar profession, and when executed in its purest, best form combines the interest of the news organizations, which are out to make a profit or earn ratings, and the interests of the people, who are empowered by investigative journalism. And we are all empowered.

> ***Journalism is a peculiar profession, and when executed in its purest, best form combines the interests of the news organizations, which are out to make a profit or earn ratings, and the interests of the people, who are empowered by investigative journalism***

One of the earliest of my many disconcerting moments at Bucknell came in a first year political science course as most of my fellow classmates were expressing their disgust with the investigative journalists, in that case reporters who uncovered environmental crimes. It is a singular offense against American democracy to be that passive and accepting in the clutches of corporate America. I am not certain if this phenomenon of submissiveness is due to the fear of economic insecurity or because we have come to worship the almighty buck over the imperatives of humanity.

Simply put, whose side are we on, as the United States becomes a nation of sides along a massive gulf between the haves and have-nots of the U.S.? This gulf is not necessarily about money; there are staggering inequalities in terms of technology and means. If done well, investigative journalism does and must compensate for these inequalities. Journalism must be unencumbered by a legal system that often reinforces the inequalities among Americans from the start.

Those who support limiting the rights of journalists often point to the *Dateline NBC* debacle a couple of years ago, wherein *Dateline* overexerted itself and used incendiary devices on pickup trucks to prove how unsafe they were. This was deplorable journalism without a doubt and was resolved in the courts. In the end, the decision to curtail investigative journalism has taken issues of accountability out of the hands of the people. In the realm of accountability, the truth owes no one.



Good Evening, Come on in, Gentlemen. The party has just halted since it's between 11 & 12. (It doesn't mutter anyway since there is only two of you and not three)

EDITORIAL

Administrative negligence of student concerns breeds apathy

The number of student petitions circulating around campus this year echoes of the 60s, when university students across the country protested whatever cause they deemed important. While the wild clothes and dramatic sit-ins have transformed into pressed khakis and polite petitions, students still seek the same thing. They want to be heard.

Except there's one crucial difference. Thirty years ago, students were able to make a difference. Today, student opinion at this University means virtually nothing.

Just look at the petitions that have circulated within the past year. When students discovered that a well-liked professors' contract was not being renewed, they thought maybe their opinion might count for something. Several electrical engineering students spent the time writing a petition and circulating it around campus, so they could voice support for the professor in question, Paul Dietz, assistant professor of electrical engineer. The 81 signatures obviously had no or little impact on the final decision, as Dietz' appeal for reconsideration was refused by University Review Committee.

Many seniors have recently signed a petition in an attempt to bring back the tradition of serving beer at Tent Party, but President Adams has made it clear that his decision to make the even dry is final.

Swartz residents circulated and submitted to the Deans' Office a petition last semester for the removal of the statue in front of their dormitory, claiming that it doesn't complement the architecture. The statue is still there, although Victor Arcelus, resident director, said that he thinks the University is planning to remove it. He has yet to receive a direct response to the petition.

With all the complaints about student apathy, administrators should be ecstatic when students finally raise their voices. But in every case cited above, student opinion counted for almost nothing. Not one petition made a clear impact. This pattern can only mean one thing—that the students' point of view is not considered worthwhile and important. With this type of encouragement, it's no wonder students opt to sit back and let everything happen, instead of trying to make things happen. The administration's overwhelming tendency to ignore and trivialize student input can only breed apathy.

Students are most impacted by the decisions that are made, yet they have the least amount of weight in these decisions. While administrators, faculty and staff live and work here long after individual students have come and gone, the student body as a whole will always exist. Students should have more say in what happens with their University.

Of course, there will always be decisions that disagree with popular student opinion. No one is claiming that students should have the final say. But administrators should have some method of determining and incorporating student input into their decisions, a practice which obviously does not exist today.

This University is a place where different people coexist, whether it be students or faculty, administrators or staff. A community does not and will not exist until everyone's point of view is considered valuable.

Everyone has something important to say. It's high time that student voices are heard.

It was quite obvious that this man had not lived an anonymous life.

> ***The Lakota culture, Means explained, does not even have a word for the concept of war because they neither condone nor believe in this force on society.***

I was thoroughly affected by his radical ideas and views which were displayed in the two hours I was there. However, some of the things which were conveyed were, none the less, difficult for me to swallow. He began by explaining the matriarchal nature of his Lakota culture, where they follow the strength and wisdom of the women. He contrasted this with our seemingly patriarchal American society where everything is centered around men and the fear of the unknown. In condemning our present society in the United States, Means explained that our society is one based on fear and the need to control anything around us which is different. In an effort to control these "variables" in society, we have developed the novel idea of political correctness. Means believes that this has only succeeded in keeping us apart and emphasizing the separateness instead of the unity of this American society.

At this point in his lecture I was very moved and impressed. These were all fresh ideas and perspectives to which I had never been exposed before and it gave me a new outlook, which made a lot of sense. He pointed out the irony in the concept of war within our society. The Lakota culture, Means explained, does not even have a word for the concept of war because they neither condone nor believe in this force on society. America, however, fights all the things it is afraid of with war. The "War on Drugs" and "War on Crime" are two of the major oxymorons we hear politicians screaming day after day. However, isn't it ridiculous to fight violence with violence? I suppose it is, but in this real world we live in have we been given a choice? Yes, Russell Means is correct in the statement that this society fears their children, possibly because they are better armed than the police themselves. Although his proposition of a culture and a society with no concept of war and no fear of its inhabitants is admirable, I can't justify this as a realistic conviction to maintain at this present day.

I sincerely enjoyed and agreed with many components of his argument. Many of his radical ideas I have used to think more about the diversity all around us, even here at the University. I do believe that the political correctness of our society is presently emphasizing the separateness of different cultures and minorities. Do we in fact fear criticism and those things which are different so much that we end up criminalizing dissent? Do we destroy what we fear? I think these are important questions to ponder especially as a student or faculty member on this campus. The University has been criticized for it homogenous student body, however, I would beg this campus to search for "variables" and dissent in this small culture. As Russell Means pointed out at the end of his lecture, "we may be brothers after all... we shall see." We may all be headed for a common destiny. Therefore, isn't it a waste of time and much needed energy to concentrate on keeping so many minorities separate and quiet? I would encourage everyone to speak up, and make all the colors of diversity show and captivate this nation... instead of making us afraid and restrained.

Penn State misinterprets meaning of diversity

Charter denial for anti-homosexual group at State College violates basic tenet of diversity

BY NORA DANIELS

Bucknellian Staff Columnist

Celebrate diversity. It's supposed to be such a good thing, and many colleges and universities consider a diverse student body to be of strong benefit for the school. With such diversity, though, comes campus-based organizations that focus on each group's uniqueness, which is often beneficial for the members of that group, but not for the school as a whole. This has happened at Bucknell to some extent, but for Penn State, just about 50 miles to the west, it has split the student body.

Students Reinforcing Adherence In General Heterosexual Tradition, or STRAIGHT, is a group of students who reject homosexual activities and wish to express their disagreement with such a lifestyle in a nonviolent lifestyle. Their attempt to gain a charter from Penn State University at State College was denied last Sunday night. The Undergraduate Student Government Supreme Court cited inconsistencies between the Policies and Rules, along with the school's Statement of Intolerance in their denial of the charter request. STRAIGHT will likely appeal to the Student Organization Appeal Board in making their organization official.

This is interesting in itself, but its impact on college students everywhere is perhaps more important. Heterosexuality or homosexuality is a choice everyone makes, either consciously or unconsciously, and this decision has denied those who reject homosexuality to form a group on their large university campus. People who made a similar choice about their lives, the Undergraduate Student Government Supreme Court of Penn State University, cannot form an organization to provide a forum for their ideals.

Think about it: Bucknell has not been faced with such a decision about an organization for the "straight" student population, but there is an organization here for people who support the other side of the issue. Would a STRAIGHT-type organization be denied approval here?

Moving away from the sexuality question, though, think about other campus organizations. There are groups for people of many different faiths, from Catholic to Jewish to Zen Buddhist, but what would the reaction be to a Satanic group? It's a choice, and most people agree that it's a bad choice, but would such an organization be denied its right to form? What about ethnic groups... there are those for Asian Americans and for African Americans on campus, but there aren't any for White Americans. Race isn't a choice, it's an unquestionable, unchangeable inheritance. So is one group, even if it's a majority, less special and thus not allowed to have an organization?

We are supposed to be celebrating diversity, and to do so, we must accept people for who they are. Most people need support, and in college, campus organizations are important in providing this service. At State College, STRAIGHT would have been an organization that united a group of students and provided a place for them to encourage each other to stand firm in their choice. The diversity that is already there would have continued. The possibility of intolerance is one of the reasons, apparently, that the organization was denied its charter, but isn't it intolerance—in a different form—that rejects an organization like STRAIGHT? And it is intolerance that allows us to have problems accepting things like a White American Students Organization or a Satanic religious group.

Today, in this diverse world, where we celebrate our diversity in college, we have to learn not to judge others, to let them meet together however they wish, and to accept people's needs for support in all their decisions, wise or unwise.

LETTER

Students unite to protest contract decision

TO THE EDITOR,

Many of us have heard stories of teachers who make differences in the lives of their students. These rare, special individuals have not only the ability to convey knowledge to their students, but also to inspire them, challenge them and help them grow. They exceed the confines of treating education as just another manner of employment: instead, they teach out of a love for learning itself. For the past three years Bucknell University has been extremely fortunate to have had one of these individuals as a member of its faculty — Prof. Paul Dietz.

During his time here as a member of the department of Electrical Engineering, Prof. Dietz has been a model for service to the University, personal scholarship and service to students. He has acted as a member of numerous committees, published several relevant papers, acted as the advisor to student organizations and written a textbook. He founded and continues to advise the highly successful B.E.A.S.T. project, which in involving electrical, mechanical, and computer science engineers is the only interdisciplinary engineering senior design project at Bucknell.

His devotion to his students is legendary, with stories of him watching the sun both set and rise while working with his students being normal. His teaching methods have been both innovative and modern, fusing both theory and current industry practice into an experience which maximizes learning and enjoyment. He is a unique in that although his assignments are very difficult, his students still approach them willingly and happily, knowing not only that they will learn, but also that they will even enjoy the learning. He also has played an important role in trying to modernize the Electrical Engineering curriculum through attempting to introduce current industry practices and standards and enrich the curriculum with additional computer science material. His devotion has always been to the students, with it being far more common to see him eating in the Bison with his students than in the faculty dining room with his fellow professors.

Despite all of this, and despite the recommendation of his departmental review committee, the University Tenure Review recently decided not to renew Prof. Dietz's contract.

We, the students, have always taken pride in the fact that here at Bucknell our voices do make a difference. We have taken pride in the fact that the main focus of our school has been to give us the best education possible. We now ask that the faculty and administration to please not betray our respect and pride in what forms the core of this university. When looking at Prof. Dietz not getting his contract renewed, we can only take notice of the fact that the Electrical Engineering department here at Bucknell has had a history of retaining newly hired professors for only short periods of time. We would like to be able to look back on our alma mater and see a department that retains the professors of high quality that we have found vital to our development and education. Please recognize the mistake that has been made and reverse your decision.

This letter is being written by the students of Prof. Dietz at their own initiative. We hope that in standing together we can make a difference for someone who has made a tremendous difference to us.

OPINIONS

Clinton's focus on education ignores harsh political realities

With the ever-present desires of grandeur President Clinton maintains, coupled with the historically poor performance of second-term Chief Executives as lame ducks, the prospects of a successful second term equal to the domestic victories of Clinton's first—the passing of NAFTA, strong crime legislation and the rollback of regressive Republican environmental policy overhauls—appear muted.

THOUGHTS...

AND RAMBLINGS

by Todd Zeranski

In an otherwise lackluster State of the Union speech (although saddening, it is no wonder many networks devoted primary attention to the O.J. trial verdict), President Clinton announced that education will be the primary focus of his Administration over the next four years. Although laudable and politically expedient, since, along with environmental protection, Medicare and Medicaid, an internationally competitive American educational system resonates deeply in the minds of the polity (especially the infamous "soccer Moms" of the 1996 election), I contend that Clinton's wishes of achieving bona fide educational progress will detract attention from enacting genuine reform in other areas sorely in need of innovative thinking—entitlement reform coming immediately to mind.

Educational reform has lately sprung forth from state government experimentation, rather than from Washington, D.C. Witness Georgia's HOPE (Helping Outstanding Pupils Educationally) scholarship program. Any student who graduates from high school with a "B" average qualifies for free college tuition at Georgia's state schools, along with a book allowance. At Georgia Tech and the University of Georgia, 97% of this year's freshman class are not paying any tuition. This program costs Georgia $190 million annually, paid through the state lottery. Clinton has picked up on Governor Zell Miller's plan, calling for a six year, $42 billion program consisting of a $1500 tax credit and a $10,000 tax deduction for college costs.

The devolution of educational reform away from the Federal Government is due partially to the incongruities of educational performance between states, which begs for policy introspection on a case by case basis. State governments require greater flexibility in pursuing educational improvement than the Federal Government can currently provide. At the same time, the Beltway's past proclivity of merely setting educational standards while pumping money into those tired education programs that required reform by the states (due to their parochial nature) has damaged its resolve. Educational reform for Clinton,then, will be an uphill battle.

Conversely, Republican demands for fiscal austerity, along with Clinton's recalcitrant defense of the elderly (to a fault I think), will hamper any genuine entitlement reform. Look for the knee-jerk establishment of a bipartisan committee to investigate the problem. As usual, one of the most pernicious problems facing this country will be delayed for at least another term. As projected Federal expenditures continue to balloon for Social Security and Medicare at the expense of our generation, not to mention this country's future fiscal solvency, John F. Kennedy would be hard pressed to write *Profiles In Courage* in today's stagnant political environment.

The Pres.
Drew Doran

Court decision denies societal benefits of investigative journalism

BY ALLISON PRICE

Bucknellian Staff Columnist

Geraldo Rivera occupies an odd place in American popular culture. We all remember the highly suspenseful Al Capone's vault special and the neo-Nazi border skirmishes. Geraldo has become a catch phrase for the sleazy tabloid journalism of the 1980s which remains with us today, even as Rivera nearly redeems himself with a pretty respectable show on CNBC (I mean, come on, Geraldo was the first journalist O.J. planned to sue when he got acquitted for libel).

In the end, no one remembers Geraldo Rivera in his prime as he leapt over the fence of a corrupt mental hospital to expose its atrocities and reached closure after the experience by adopting one of the former patients.

I thought of this in light of the recent court decision which made it illegal to procure employment in the airline industry under false premises. This was intended to curtail the muckraking activities of journalists who expose indiscretions in the airline industry, namely the folks from *Dateline NBC* who proved how easy it is to tamper with baggage that had been approved for safety.

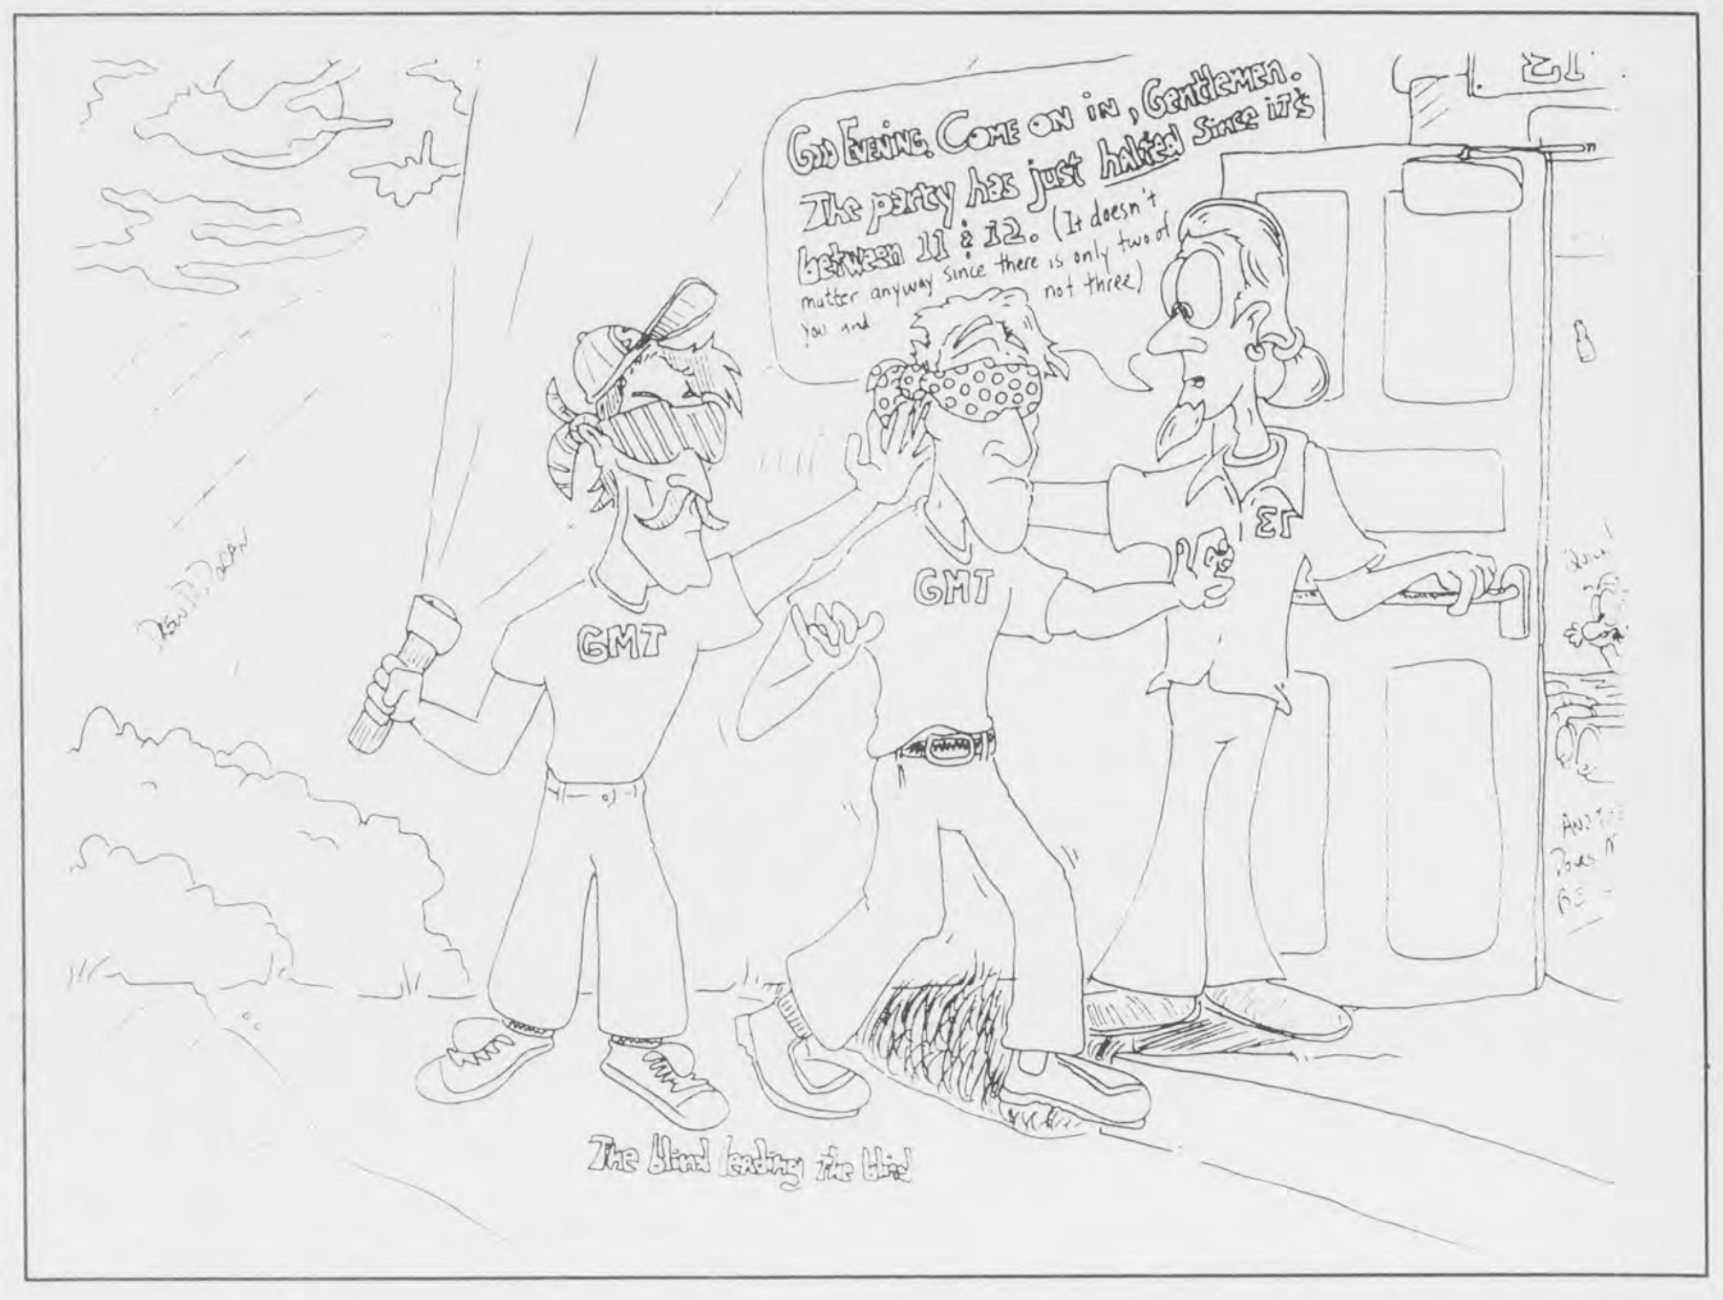
Journalism is a peculiar profession, and when executed in its purest, best form combines the interest of the news organizations, which are out to make a profit or earn ratings, and the interests of the people, who are empowered by investigative journalism. And we are all empowered.

> ***Journalism is a peculiar profession, and when executed in its purest, best form combines the interests of the news organizations, which are out to make a profit or earn ratings, and the interests of the people, who are empowered by investigative journalism***

One of the earliest of my many disconcerting moments at Bucknell came in a first year political science course as most of my fellow classmates were expressing their disgust with the investigative journalists, in that case reporters who uncovered environmental crimes. It is a singular offense against American democracy to be that passive and accepting in the clutches of corporate America. I am not certain if this phenomenon of submissiveness is due to the fear of economic insecurity or because we have come to worship the almighty buck over the imperatives of humanity.

Simply put, whose side are we on, as the United States becomes a nation of sides along a massive gulf between the haves and have-nots of the U.S.? This gulf is not necessarily about money; there are staggering inequalities in terms of technology and means. If done well, investigative journalism does and must compensate for these inequalities. Journalism must be unencumbered by a legal system that often reinforces the inequalities among Americans from the start.

Those who support limiting the rights of journalists often point to the *Dateline NBC* debacle a couple of years ago, wherein *Dateline* overexerted itself and used incendiary devices on pickup trucks to prove how unsafe they were. This was deplorable journalism without a doubt and was resolved in the courts. In the end, the decision to curtail investigative journalism has taken issues of accountability out of the hands of the people. In the realm of accountability, the truth owes no one.



Good Evening, Come on in, Gentlemen. The party has just halted since it's between 11 & 12.

Ballet Hispanico tangos into Weis Center

BY RACHEL DOEBBER

Bucknellian Staff Writer

The merengue, salsa, samba, lambada... just a few of the many dances to be taught this Friday at the Latin Social Dance party by Ballet Hispanico Company as a preview for its Saturday night performance.

Founded by artistic director, Tina Ramirez in 1970, Ballet Hispanico will perform several pieces, including*Idol Obsession* which is based on the life and death of pop star Selena. Performed to the music of Selena, this dance incorporates religious symbols of the Southwest and stories of Mexican folklore.

When Dreams Explores tells the desires and yearnings of those who have emigrated from their native lands in order to survive. One of the final pieces, *Batucada Fantastica,* features the energetic dances of the Carnival in Rio which are driven by the beat of the Brazilian percussion instruments known as batuques.

Ballet Hispanico will arrive tonight to the Univerisity for the last performance of their tour. Tomorrow will be a full day for the 12-member New York City based dance company, a day that includes teaching ballet and modern dance to classes in the departments of theater and dance. The night continues with the company members teaching several dances which play an integral role in their Hispanic culture.

> ***"[The company is] ballet influenced with hispanic experience, whether it's Spanish or South American."***
>
> *—Bill Boswell*
> *director of multicultural affairs*

Bill Boswell, director of multicultural affairs, who has seen the company perform in New York, said this is the last event of the Hispanic Focus Semester that took place this past fall semester. It is a standard ballet company in that all of the dancers are professionals, Boswell explained, "[but the company is] ballet influenced with Hispanic experience, whether it's Spanish or South American."

Ballet Hispanico members rehearse El Banquine , a piece choreographed by Vicente Nebrada.

Also under Ramirez's direction is the Ballet Hispanico School of Dance, which offers year-round professional training in ballet and Hispanic dance to over 750 New York inner-city children ranging from age four up to high school age. Many alumni of the school have gone on to careers in the area of the performing arts, specifically in dance.

In addition, Ramirez is in charge of Primeros Pesos ("First Steps"), which is a program where the company travels to participating schools to perform various dances and host workshops in dance instruction. This program educates students and teachers about Hispanic culture, including its dances, music and folklore.

Sponsored by the Mid-Atlantic Arts Foundation, the performance of Ballet Hispanico will begin at 8 p.m. on Saturday in the Weis Center. Tickets are $20 and can be purchased from the Weis Center Box Office Tuesday through Friday, 11:30 a.m. till 5:30 p.m. or by calling 524-1000. The Latin Social Dance party is open to the first 150 people, however at the time of writing, there were only 10 tickets left. This free event begins tomorrow night at 6 p.m. in the Terrace Room.

From heart of Chicago, fiction of Native America arrives with great spirit

A member of the Sioux, Susan Power provides insight into life on the reservations through many generations with her work

BY ANNE PUTNAM

Bucknellian Staff Writer

Out of the heart of Chicago comes a Native American fiction writer, Susan Power. Power, a Sioux who is currently a freelance writer through the Alfred Hodder Fellowship in Humanities at Princeton University, stands out from other fiction writers. What is most tantalizing about her writings are the new insights portrayed, adding a different dimension to the fiction found today.

In her novel, *The Grass Dancer,* Power documents life in heart and spirit on a Sioux reservation throughout a multitude of generations. Power comes to Bucknell to read excerpts from her newest novel, *Strong Heart Society*.

An American Indian community in Chicago is the backbone of the novel and is portrayed to incorporate American Indian's adaptation to the different circumstances of today in continuation of the cultural cornerstones. The material of the novel highlights important historical moments from the Native American perspective. As the story is set in Chicago, her home town, biographical elements help create the tale. Personal experience is the basis of her writing.

Power's upbringing encapsulated several aspects of her writing. Her love of literature stemmed from her parents' influences, both being avid readers themselves. Other writers, such as Louise Erdich, a Chippawa, inspired her creative writing. However, Power's ambition as a writer was smothered when professional sensibility overcame her desires to write. She succumbed by attending Harvard, where she earned degrees, graduating from Harvard Law School.

Susan Power, author of Strong Heart Society, makes a connection between the heart and mind with her tales of Native American life.

> ***"It was important for me to move back and forth between the two worlds that also exist within me, to nurture both spirits"***
>
> *—Susan Power*
> *fiction writer*

Fortunately, change was headed in her direction. An impulse led her to the Iowa Writers' Workshop. For two years of her life she felt as though she, "lived, ate, slept, dreamed, breathed fiction."

Behind the scenes of her ascent to success, Power remains strongly attached to the Native American movement. She began her involvement through the American Indian Center in Chicago during high school. Additionally, she established contact with the Indian community in Iowa.

Power identifies with the difficulties of Native American views. "It's hard to explain how you identify as a part of who you are is raised with a certain world view as well as an Indian world view," she said in a telephone interview.

Her present focus, although she is community oriented and avoids materialism, is more of global politics than on Native Americans. The distinction here is that while Power identifies with Native Americans she addresses politics on a larger scale .

"We're living in a larger world, not just an Indian world," she said.

Her concerns target Native Americans although she considers global issues, breaking from overt activism.

Power said, "It was important for me to move back and forth between the two worlds that also exist within me, to nurture both spirits." It is in this manner that Power writes. Her stories highlight the connection between "heart, mind and spirit" to "power, sacred and profane." Her tales allow the "understanding of the hopes, dreams, values and attitudes that inform people and a culture across the generations," states the background excerpt to *The Grass Dancer*.

Power will read her fiction at 8 p.m. this Sunday in Bucknell Hall. A reception will follow, coordinated by the Stadler Center for Poetry, the Department of English, the Race/ Gender Resource Center, the Association for the Arts and the University Lectureship Committee.

Movie Reviews: The English Patient triumphs

BY CHRIS NICHOLS

★★★★★

The English Patient
Starring Juliette Binoche, Ralph Fiennes, Kristin Scott Thomas
Directed By Anthony Minghella

I knew it would be excellent, but I had to see it to know for certain. This is one of the few movies that I really was worried that I hadn't seen over the holiday season. If the Academy Award Nominations (and they are in some respects and not in others) are any indication of a film's worth, this year's winner in number of nominations is not to be missed. I think it has a nominee in each of the categories that it is eligible in. This Miramax release is yet another example of the quality films that this studio has been releasing. It's an excellent film in every respect of the words.

The story is part of what is so great about this film. Set surrounding World War II, Fiennes plays the part of a man found badly burnt and suffering from amnesia after a plane accident in Africa. Binoche plays a nurse who takes the time to care for the pilot while he is recuperating. Much of the story is shown through flashbacks as Fiennes remembers his past. He recalls having a wife (Thomas) and his love for her. The story is actually very complicated and much of the movie is spent figuring out how he came to be shot down in the plane with his wife. Meanwhile Binoche's character takes care of him in an old abandoned house in Italy where they are left alone for a short time. Before long though, more soldiers arrive along with a mysterious man (who admits to being a thief) who is in search of someone from his past. The way in which these characters lives intermingle is one of the best features of this film. They are each unique, yet work well with every other character. Likewise, they all seem to perform well with one another. The on-screen chemistry is astounding given the mixture of roles and actors playing them.

The script is flawless, the acting phenomenonal, the directing beautiful, and I could go on. Juliette Binoche is amazing as could be expected after the incredible performance in Krzysztof Kieslowski's *Blue*. Fiennes delivers a performance that will give Geoffrey Rush a run for his money at the Oscars. Kristin Scott Thomas is great as well, though she's probably the weakest link in this chain of fantastic actors and actresses. Still, she is impressive. The whole film comes together beautifully. It's a perfect example of fine film making. Even though it's long (two and a half + hours) it's still thoroughly entertaining. I recommend it for everyone over the age of 15. It's a serious film but still enjoyable to watch.

Student directed play sheds light upon flowers on the moon

Shannon Kearns's '97 Effect of Gamma Rays on Man in the Moon Marigolds crash lands on Tustin Studio Theatre stage

BY RACHEL DOEBBER

Bucknellian Staff Writer

"All right, let's do the scene of Ruth fighting with her mother about going out to a party," says director, Shannon Kearns '97 as I walk into Tustin Studio Theater, where rehearsal for *Effect of Gamma Rays on Man in the Moon Marigolds* is going on.

Flashes go off as the photographers hurry to finish up their photo shoot. "Good job. Don't worry about the missed lines, they will come with practice," Kearns says encouragingly as the actresses run off to change costumes for the last few scenes.

Sweta Shah—The Bucknellian

Carla Conover '99 rehearses her part of Tillie for the upcoming production which focuses upon relationships and each character's interactions with one

Seeing that Kearns is still busy with the photo shoot, I approach two of the cast members who are sitting off to the side of the stage. "I heard about this play through Ken Urban, director of *In the Presence of Nothing* which I was in last semester," says Jenn Gombos '97, while fixing her pink chiffon 70s style prom dress. "I was really attracted to this play because of its incorporation of signs into the way people live. It also has a very small cast, a cast of just women."

Cathy Fahey '97 plays Nanny, the 100-year-old border. "I really began to like this play when I read all the parts of the interesting characters. The audition process was also very exciting and inspiring," she says.

Fahey had to do a lot of research on older women in order to take on her role of Nanny. "I watched old women as they walked around and also in films. I also worked with a movement coach to get down the slow, painful stride. But most of it was mental work where I had to remind myself that I was portraying someone who is in pain with every step they take," she explains.

After giving a few last minute directions to the cast and crew members, Kearns finally comes over to the wooden bleachers.

Explaining that this is her senior honors thesis, she says, "I read through so many plays but could not find the right one. Then all of sudden, that is it." She gestures with a wave of her arms, "It hits you."

It refers to Paul Zindel's 1968 hit, *Effect of Gamma Rays on Man in the Moon Marigolds*.

This play centers around a mother who is stuck in her life, and her two daughters, 14 year-old Tillie and 16-year-old Ruth, who are also stuck in their ways. Liz Maccie '97 plays Beatrice Hunsdorfer, the mother, Carla Conover '99 is Tillie and Gina Lucido, GR plays Ruth. Gombos is Janice Vickery, a character with one scene, who serves as a breath of fresh air and experiences life differently than Beatrice, who follows her same old routine.

Why did Kearns choose this play as the one to direct and present?

"I saw very strong relationships within this play. It's about how each character becomes affected by each other. It shows how what we do as parents to our children. The hang-ups we experience and manifest in ourselves, we pass onto our children. It happens to all of us. This play is clear, poetic and harsh all in one," she explains.

Kearns began to work on this thesis over a year ago. She analyzed the script so she knew the play and what the characters were supposed to do. "If you know everything about the play it turns out much better. The job of the director is to guide the actors and to let them find out for themselves what their role is about. But in order to guide the actors, you must know the play within yourself."

Sweta Shah—The Bucknellian

Carla Conover '99, Gina Lucido GR and Cathy Fahey '97 had to practice seven hours a day for one week before classes started. Their auditions consisted of reading selections, acting as the actors believed the characters would and participating in body and eye

Those who got the parts had to be back a week before classes began, when they rehearsed seven hours a day. The audition process included reading selections of the play, moving as they thought the characters would and participating in body and eye contact workshops.

Rehearsals centered around the Stanislavski Method which, according to Kearns, teaches acting as doing and what one does to the role of the character in order to get the effects one wants.

The cast also experimented with movement to music where they "released and sent energy and felt with the whole body, mind and soul linked together," Kearns explains while adding they also concentrated on body and eye contact.

When asked what is more difficult, being an actor or a director, Kearns pauses for a moment before answering. "Both are difficult and require serious work. But directing has taught me to look at a new way of acting. You must be involved in it, not just scratching the surface. Being a director has allowed me to check myself and being true to myself so I can help guide the actors."

Effect of Gamma Rays on Man in the Moon Marigolds is being presented in conjunction with Cap & Dagger, Company! and the departments of theater and dance. It premieres at 8 p.m. in Tustin Studio Theatre next Friday following with three other performances at 8 p.m. next Saturday, Sunday and Monday in Tustin Theater.

Cooking with Katie

Cinnamon Swirl Bread

As the shimmer of springtime invades a listless winter, offering sweet raindrops and squishy walking, the tone of breakfast is elevated from those feasts so endearing to a snowed-in morning. Although enticing in the piquancy of their aromas, eggs and bacon have that not-so-gentle knack of smacking your gut with the force of a concrete block. With a wily grin, an artfully swirled tea bread invades the newspaper-strewn breakfast table. Shrieking its presence is the combination of cinnamon and sugar reminiscent of the cinnamon toast Mom used to make, although here it derives its personality in the swirls it so cunningly fills. This delicacy feigns indulgence with its rampant flavors, as each loaf exhibits a minimal smattering of fat grams, hovering at one per slice.

√ 1 package yeast (1/4 oz.)
√ 1/4 cup plus 2 tablespoons (110°-115°) water
√ 1 and 3/4 cups skim milk
√ 1/3 cup sugar
√ 2 tablespoons canola oil
√ 2 teaspoons salt
√ 5 to 6 cups unbleached flour
√ 2/3 cup sugar mixed with a few teaspoons cinnamon (to taste)

1. Foam the yeast and warm water, adding 1 tablespoon of flour.
2. Whisk together the milk, oil, sugar and salt.
3. Add the yeast mixture and the first 4 cups of flour, stirring carefully. [Be very careful not to overwork the dough–this will result in tough bread]
4. Knead in remaining flour, adding just enough until the dough pulls away from the side of the bowl.
5. Let it rise until doubled in a lightly oiled bowl covered with plastic wrap.
6. Punch down and divide in two.
7. For each loaf, form the dough into a rectangle roughly the width of your bread pan, and about 12 inches long.
8. Sprinkle half of the cinnamon and sugar over the dough [raisins may be added at this point] and roll lengthwise, sealing the seam with gentle pinches.
9. Place in bread pan, seamside down, and allow to rise until doubled.
10. Bake at 350° for 40-45 minutes, or until golden and hollow sounding to the tap.
11. Allow loaves to sit for a few minutes, then cool on wire racks.

A loaf will seem to evaporate if a serrated knife is nearby, as each passerby will secure themselves a chunk. If you feel that your culinary endeavors deserve more praise, try a lazy morning, armed with a toaster, a blanket of cream cheese, and some real maple syrup. Store cooled loaves in airtight plastic bags, one to two days at room temperature, or a few weeks shivering in the freezer.

KAPPA ALPHA PSI: A LITTLE GOES A LONG WAY

Small Bucknell fraternity chapter is hard at work for a better place

BY TED BURNES
Bucknellian Staff Writer

Jonah Half—The Bucknellian

William Randall, Todd Holloman, Eric Polite, Kirby Spivey, Quincy Sherard Fàison, Kyle Holloman, and Willie Callahan, brothers of Kappa Alpha Psi, strive to make the fraternity the best that it can be.

It's not a secret that Greek Life is big at the University. Parties and fun are the name of the game when it comes to the houses uphill and around campus. One fraternity, however, is having fun with an added bonus... they're doing it for a good cause. The fraternity of Kappa Alpha Psi, the only fraternity with no house at present, is turning the heads of many people in the Bucknell community with its hard work and dedicated service.

Bucknell's chapter of Kappa Alpha Psi has only eight brothers; but they use their size to their advantage. The fraternity was started at the University in 1989 and was declared an official fraternity by the University in 1991. With only eight brothers this semester (one of whom is studying abroad), Kappa Alpha Psi finds it hard to get the recognition it deserves.

"We are definitely limited financially; we don't have the nice checking account that some larger fraternities do," said Eric Polite '97, the chapter's president. "We also work extremely hard. When organizing activities, one brother often does the work of two or three people."

Polite also says that the smallness helps to form a bond that you don't find at some of the larger fraternities. Polite, along with brothers Kyle Holloman '97, Todd Holloman '97, Kirby Spivey '98, Sherard Faison '98, Willie Callahan '99, William Randall '99, and Orwell Jacobs '98, strive their hardest to make sure the fraternity is the best it can be.

"The relationship is different than a lot of other organizations," Polite said. "I mean, I can go anywhere in the world and can be acknowledged as a brother of Kappa Alpha Psi. I often receive cards from brothers in Washington, DC, and from [my hometown of] Charlotte, NC. Brothers from all over the country will say 'Give me a call; write me a letter'. It's hard to find that in a lot of organizations."

"The main goal of Kappa Alpha Psi is achievement" Kyle Holloman said. "We strive to achieve inside the classroom as well as in the community. By being the best that we can be, we give back to Bucknell and its surrounding area. Many people think that being in a fraternity gives them the ability to slack off with their studies. My fraternity brothers and I feel the exact opposite—we must work even harder to excel within the program as well as excelling in the classroom."

And excel they do. The required G.P.A. for the fraternity system as a whole at the University is a 2.0; the minimum G.P.A. of Kappa Alpha Psi is 2.3, with an expected raise to 2.5 on the national level in the near future. Using this motivation, the brothers also offer encouragement and help to students who are having trouble with their individual perspectives. They hope to help others achieve as they do.

Not only is Kappa Alpha Psi a small fraternity here on campus, but it is the only minority-based fraternity as well. Having all African-American brothers in its chapter since its development, the brothers are worried that people might have the wrong idea.

"Kappa Alpha Psi is mostly minorities, yes," Polite said, "but that is only here at Bucknell. On a national spectrum, the fraternity is very ethnically diverse. I hope that all members of the student body feel that Kappa Alpha Psi is open to them. The mission of Kappa Alpha Psi is achievement."

The fraternity is working hard to get more involved in the Greek system and to be more recognized on campus. "We're getting more support from the Greek system; we're doing more events with organizations like Delta Gamma and Lambda Chi. We are taking the step toward more involvement, and we're getting a very positive response," Todd Holloman said.

Despite the size of their organization here, Kappa Alpha Psi does a lot in the area. "We do a lot for the Bucknell community" Spivey said. "We help out with the Big Brothers program, donate to S.W.I.T. (Susquehanna Women in Transition), and in general try and do our part to make the community a better place."

And so they have. Recently, the fraternity put on a "Dinners and Dates" auction which had the Bison packed with screaming, energetic students. From that auction alone, they donated almost $300 to S.W.I.T.; this is quite an achievement for such a small organization. They also sold Valentine's Day baskets which they delivered to sweethearts around campus.

"We try and do a lot of programming that gets the student body involved in the community," Todd Holloman said. Holloman said the fraternity plans almost 23 programs per year, including minority mixers, food drives and clothing drives.

The fraternity also has many activities planned for the spring. During Prospective's Weekend, Kappa Alpha Psi plans to hold a huge party with two different comedians and their sixth annual Step Show and Step contest. The show, which Polite described as "a big tradition within the fraternity," has been well received at the University, and many students are excited about it. Bucknell's chapter invites other schools to perform and compete in the show. The fraternity also hopes to hold a basketball tournament and dunk contest.

And what do possible pledges think of the fraternity? "I think they're really a great organization" said Rob Matthews '00. "I have not decided whether or not to join the Greek system yet, but I definitely think I would look into pledging there. They do a lot for the community, and that's something I would like to be a part of."

Achievement and service are what the fraternity of Kappa Alpha Psi is all about. Despite the minimal support from the University and their lack of a house, the small fraternity does its best to excel in every aspect, from social programs to charity for the needy area. "Greek life is very big here," Callahan said. "But there's more to a fraternity than parties... it needs to be a part of the school. I can honestly say the fraternity I belong to is a part of Bucknell and beyond."

Jonah Half—The Bucknellian

Eric Polite '97 president of Kappa Alpha Psi, realizes the differences from other fraternities which makes this fraternity so unique.

Ready for a good old fashioned hoe-down?

BY MICAH SCHWEIZER
Bucknellian Staff Columnist

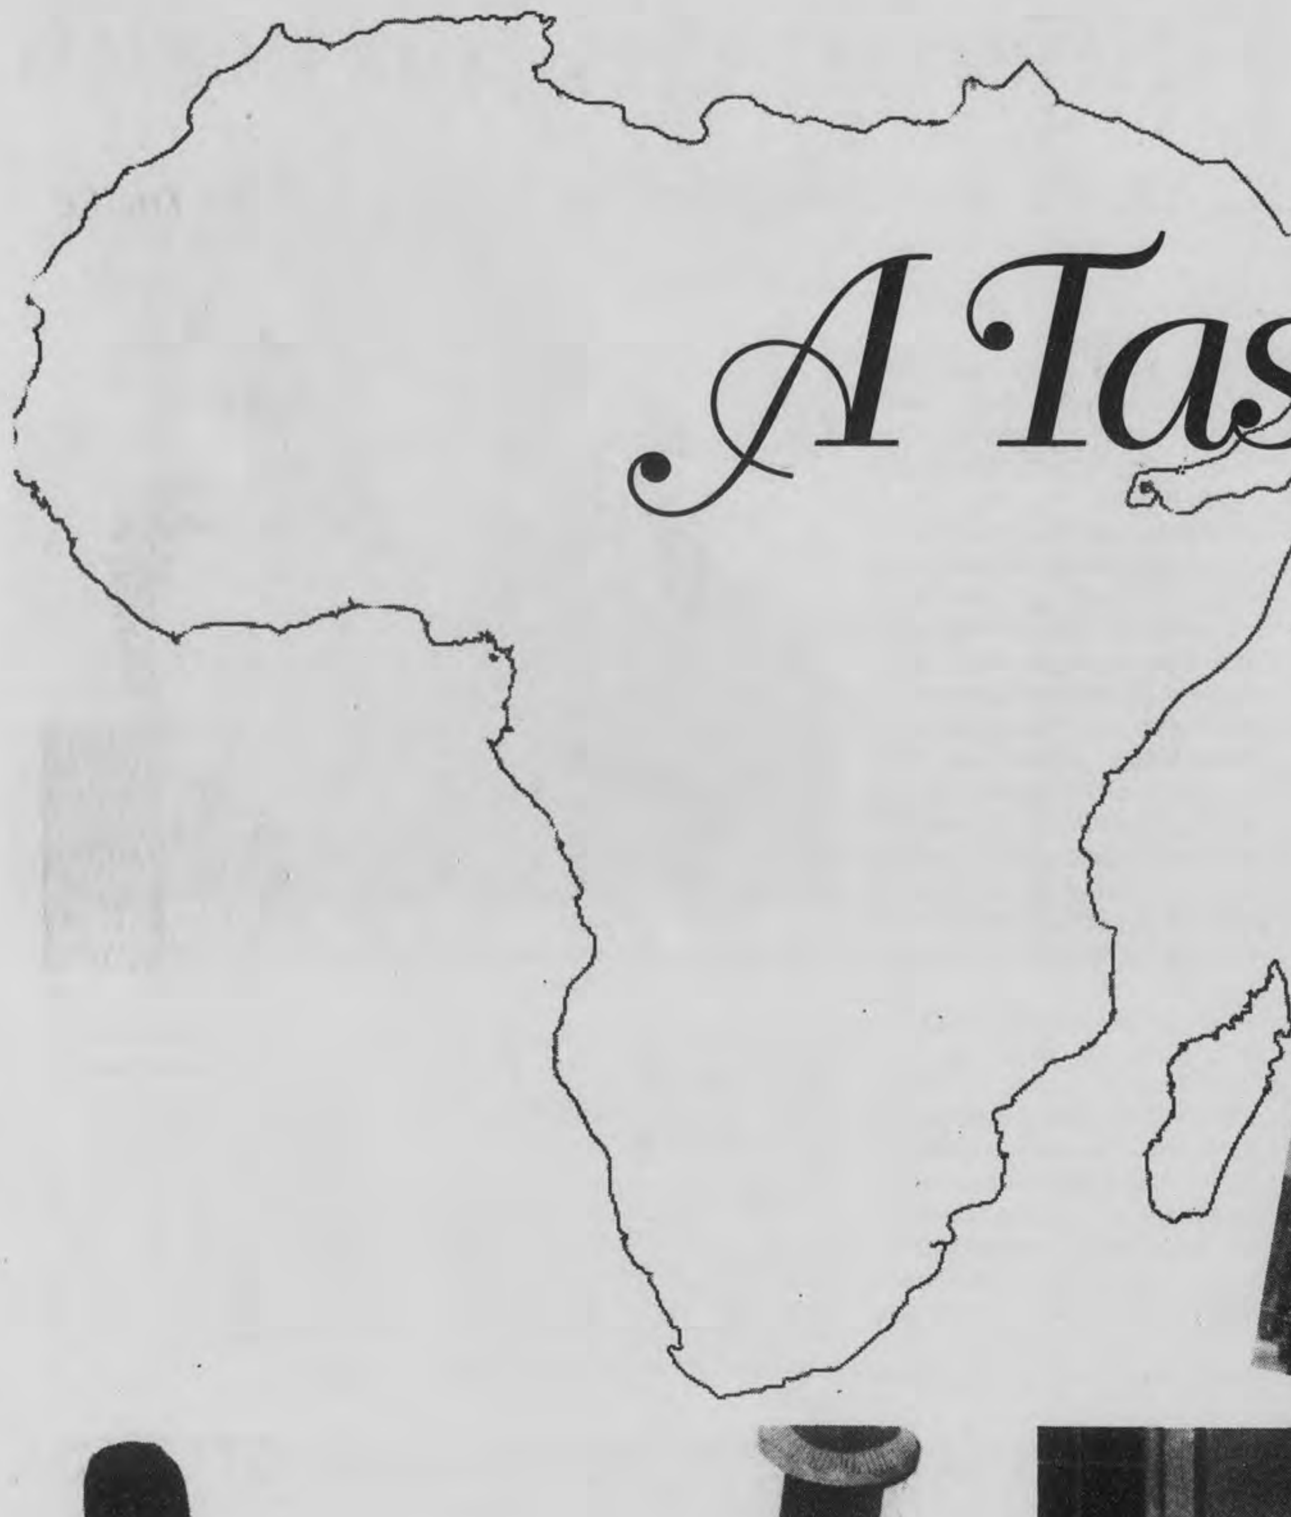
Local Color

For some foot-stompin' and hand-clappin' live acoustic music, roll yourself down to Northumberland's King Street Coffee House. One band that will be there is Back Up and Push, which performs old time and early country music featuring the fine fiddle playing of Bob Taylor, professor of English here at the University. Also in the band are Carl Kirby, professor of Geology, on upright bass, Tom Rosencrans on claw-hammer banjo, Sue Taylor and Jina Gillis-Rosencrans, both on rhythm guitar. In addition to skillful playing, Back Up and Push also has very fine vocals. This band promises a good, old-fashioned hoe-down.

The second act is the acoustic blues duo of Artie Renkel on acoustic guitar and vocals, and Nate Meyers on blues harp and vocals. Renkel's fingerstyle guitar playing is often reminiscent of the venerable southern bluesman Robert Johnson, and his singing has a distinctive Delta blues quality to it. Meyers has got a voice as deep as the bottom of the ocean, and his harmonica wails... let me tell you, my friend Nate has some serious soul.

The King Street Coffee House is located at 80 King St. in Northumberland. Cross the Lewisburg bridge and turn right onto Route 405, which you'll follow until you reach Route 147, where you'll turn right again. This will take you into Northumberland. To reach King St., make a left turn onto Second St., and drive for two blocks until you reach King St. The show begins at 7:30 p.m., next Friday, and there is a three dollar donation taken at the door.

A Taste of Africa



A Taste of Africa, sponsored by the Multicultural Center, was a dinner and talent show. It was just one of the events of Come and Play Weekend. Students read inspirational and personal poetry as well as displayed musical talents. Photos: **Top Right,** *Coleen Powell '98 and Alex Obe '99 socialize.* **Above,** *A colorful African print from Tanzania is displayed.* **Right,** *Students and faculty enjoyed a variety of foreign delicacies at the event.* **Below,** *Powell spoke about the time she spent in Belize this past winter break.* **Bottom left,** *A large crowd filled Larison Dining Hall.* **Bottom right,** *An exhibition table contained various mementos brought back from Tanzania where Eric Polite '97 spent last summer.*

SCIENCE AND TECHNOLOGY

Capstone course presents a different view on health

BY HEATHER SCHWEIGER

A new capstone course taught by Dr. Kathleen Page, "Perspectives in Health and Healing", CP 558, takes a new approach to looking at health. Rather than defining health by lack of diseases and ailments, Page challenges students to "change where we start thinking about health."

Through questions such as, "What are practices that maintain health?" and "How does lifestyle feed back into the functions of the body?" students are introduced to a variety of topics from homeostasis to psychoneuroimmunity to yoga and meditation.

While this course may seem to be science oriented, it is designed for non-biology majors. One of the difficulties Page finds is that she cannot use scientific language, since the class is composed of individuals with a wide range of majors.

Page intends "to move students through developed general concepts about the nervous system, endocrine system and immune system." Students not only take away from the course some knowledge of physiology, but also how it is used in describing the body's response to external and internal sensory cues.

"Perspectives in Health and Healing" is an investigation into the alternatives to orthodox medical methods, whether they are useful because of belief structures, and whether they should be incorporated into medical procedures in our everyday lives. Internal and external signals influence our body's responses.

Page not only poses questions on orthodoc medical methods, but reveals the possible roles that such things as yoga, acupuncture and neuropeptides play in health.

The appeal of this subject is apparent in the diversity of majors that are in the class including mechanical engineering, psychology, economics and biology just to name a few.

Robyn Shanahan '97, a mechanical engineer, said, "We look into the mind-body connection from biological and philosophical views. When doing yoga or tai-chi your mind and emotions are affecting your body. [It] biologically affects you."

The science portion of the course is designed so students can understand what is happening to them physiologically, such as why and how the blood pressure decreases during yoga.

Psychology major Sara Bielitz '97 finds the course very interesting and comments that they study "healing effects, rather than focusing on disease."

Meredith Barrows '97 is a biology major and finds "Perspectives in Health and Healing" very interesting, especially since she intends to pursue a career in medicine. "[It's] a good way to see alternative ways of healing, instead of the practical, traditional ways," Barrows said.

This alternative view of health also engages students in reading a sundry of literature including texts such as *Human Biology*, *Job's Body*, *The Healing Brain* and *Healing East and West*. Each text approaches the body and health in a different style so students are given a sense of symmetry.

Human Biology is scientific, while *Job's Body* is a "descriptive story about the body." Additionally, several guest speakers are incorporated into the syllabus, addressing issues including therapeutic touch, mind-body/midwifery and alternative medicine.

Beetna Kim—The Bucknellian

Kathleen Page, assistant professor of biology, teaches a new capstone course that deals with different aspects of health.

Page received her Ph.D. in physiological biochemistry from Penn State. In addition to teaching her new capstone course, Page is an instructor of sensory physiology, animal physiology and foundations of biology.

Page also does research that involves "work with testes to study the effects of vitamin A on gene expression in both seminiferous tubules and the cells that compose this tissue, Sertoli and spermatogenic cells." Helping her with this research are eight undergraduate and two graduate students.

Because Page conducts her other classes in a more methodical way, her new course explores the more philosophical connection between the body and its environment. This approach to the body and health provides an exciting avenue to self-knowledge.

Caught in the Web: Best of the Best

BY CURRAN FILER

Bucknellian Staff Columnist

Okay, last week's topic wasn't all that great. Unfortunately, the big car companies like Ford and Chevy have no creativity. But this week should be a little better. There's no common theme that ties these together, except that I think they're cool sites. I just browsed around all those "Best of the Web", and "Cool link" pages and picked out my favorites of their favorites, hence the term "Best of the Best." If you don't like them, tough. Get your own column!!

Ghosts, spirits, shades, and spectres

`http://members.aol.com/DWWaldron/home.html`

The author of this site is serious about ghosts, and wants you to believe too. It's filled with testimonials from phantasm-believers across the country, and information about ghosts. If you want information on a certain type of phenomenon, or want to know the difference between a churel and a banshee then look in the "Spectre" section. If you want to read about famous haunted places then look in the "Places" section. If you believe in this stuff then look into counseling.

Medspeak: The Dictionary of ER

`http://www.geocities.com/Televisioncity/5196/`

If you watch the television show ER, and I hear many people do, you may wonder what the heck those doctors are saying! Even though they are just actors they use that medical jargon like they're real doctors, and they don't even explain it. This site gives a short explanation of scads of medical terms. It's organized alphabetically so it's easy to use. If they ever say "normal sinus rhythm" on the show, you'll know it means the normal heart rate of 60 to 80 beats a minute for adults.

The Mr. Showbiz Plastic Surgery Lab

`http://www.mrshowbiz.com/features/games/surgery`

I know many of you out there are extremely bored. So if you want to spend some time doing something completely useless but fun, try "Celebrity Plastic Surgery". Choose your raw materials (the cast of Friends or Seinfeld, talk show hosts, or Goldie Hawn, Danny DeVito, Ellen Barkin, and Keanu Reeves). Then mix and match their facial parts until you get what you want. It's fun to make famous people look stupid!

Find-A-Grave

`http://www.orci.com/personal/jim/index.html`

Jim Tipton, the creator of this site, says he collects dirt from graves of noteworthy people as a hobby. I can just imagine his house filled with bottles of dirt from famous graves all around the world. If you think this is a completely normal hobby (it isn't) and you want to try it, Jim has a database of the locations of famous peoples graves, listed by name, location, and even by the specific cemetery. He even has pictures of famous graves. Check out the picture of Jim kissing Al Capone's grave!

The IllusionWorks Home Page

`http://www.illusionworks.com`

This site made me wig out! It's dedicated to illusion and visual puzzles. It has a huge number of puzzles, arranged into different illusion categories, with a description of the science behind the puzzles. They even have interactive puzzles to play with. To see the 3-D puzzles you'll need those funky, red and blue, 3-D glasses. Also, check out the gift shop to buy cool illusion stuff.

Engineering Week changes spark protest

BY KIM CHITTIM

Added changes to Engineering Week, the spirit competition for engineers, have spurred controversy amongst some previously spirited engineers.

Instead of the five departments competing against each other, as has been the tradition, this year the College of Engineering was split into the Blue Team and the Orange Team.

Trudy Cunningham, Associate Dean of Engineering, and a small committee of students decided on the change to promote participation and to have more fun.

The change has raised objections from some students who are concerned whether the changes will actually be beneficial. "It was a lot of fun last year, but it looks like it's not going to happen this year," commented Nathaniel Clark '97. Paul Deebel '97 added, "I think the idea for interdisciplinary teams will decrease participation, as people wouldn't have loyalty to a Blue or Orange Team as they would their department, their major."

Engineering Week was invented by a group of students and Cunningham 12 years ago as a spirit competition between the five engineering departments, with fun as its primary goal.

Every year a couple of students create all the contests and the rules. Cunningham acts as the judge and awarder of points.

Students believe this year's changes were brought about due to the fact that the chemical engineering department has won the competition for the last 10 years. "The other departments couldn't handle [the chemical engineers] winning all the time," said chemical engineer Brian Gale '97.

In reaction to the changes, a group of chemical engineering students, including Deebel, created a "green team." "We decided to form our own team in protest to the way they changed Engineering Week because we want them to change it back to the way it was before," Tim Raymond '97 said.

Cunningham, who was partly responsible for the team changes, admits that "it's wonderful if they want to protest." However, since the green team was not previously established, they will not be able to receive points in the contests.

Even though the green team was originally created by chemical engineering students, "the more we thought about it, the more we realized it should be more of a protest against the way it is," Raymond said. The green team now includes students from all five departments.

"My hopes by starting the green team is to increase interest and participation, not just by chemE's, but all engineers," Deebel explained.

Despite the protest, the competition promises to have the usual fun spirit. Everyone realizes that the primary purpose of Engineering Week is to have fun. "This is play. We're not talking life or death situations," Cunningham said.

With the main objective to have fun, Engineering Week at the University is not celebrated in the usual dinner/speaker fashion. It involves a week long collection of games and competitions involving engineering students, faculty, staff and anyone associated with the College of Engineering.

Engineering Week is celebrated nationwide in February. "The purpose nationally is to bring attention to engineering as a field of study and labor, a way of thinking, and a way to attract people into engineering," Cunningham explained.

Engineering Week at the University began last Friday and runs through today. This week's events include a paper plane contest, tug of war, egg toss, a team scream, videos made in the middle of the night, and a paper structure building contest. It ends with a dinner tonight in the Terrace Room at 5:30 p.m.

Look for additional photos and a summary of Engineering Week in the next issue of The Bucknellian.

Science & Technology Calendar

Tues., Feb. 25	**Physics Coffee Talk at noon in Olin 264** Richard Henry will speak on "Discovering the Atomic Nucleus: A case history in the search for truth in physics."
Thurs.,Feb. 27	**Mathematics Coffee Talk at 9.00 p.m. in Olin 373** Professor David Osi will speak on "What's the fuss about Fermat?"
	Geology Lecture at 8 p.m. in Biology Lecture Hall 5 Donald Wise will speak on "Crater Dating, Tectonics, and Kasei Vallis of Mars."
Fri., Feb. 28	**Geology Lecture at noon in Carnegie 208** Donald Wise will speak on "Basement Tectonics of the Rockies: Some Sacred Cows and a Little Ball."

BUCKNELL UNIVERSITY

SPORTS THURSDAY

Athlete of the week:

Ethan Buckley (swimming) finished third among men at the Patriot League championships.

Bison run strong at Patriot Championships

Bucknell runners break four school records; fall to Army, Navy in team standings

BY ERIC KEBER

Bucknellian Staff Writer

This past weekend the Bucknell men's and women's track teams traveled to Colgate to compete in the Patriot League Indoor Track and Field Championships. Despite a second place finish for the men's team and a third place finish for the women, both squads performed impressively against their opponents, and in the process set three school records.

A strong Army team swept the meet beating the Bucknell men's score of 133 by 70 points. The women's scores were a lot closer as the Cadets' score of 149 narrowly beat Navy by seven. The Bison came in third with 125.

"It was one hell of a meet," said Head Coach Art Gulden. "I'm very proud of the kids, they tried hard and competed well."

School records were set by Tunde Daniels '00, who won the 400m dash in 57.26 seconds, and Julie Sweitzer '99, who ran the mile in 4:59.13. The women's 4x800m relay team, a squad comprised of Sweitzer, Pamela Richardson '99, Connie Hamlin '99, and Annie Hamlin '99, broke its own record and won their event.

In addition to her win in the 400m, Daniels claimed victory in the 200m dash while teammate Kate Dei Cas '97 won the long jump. The women also won the 4x400m relay, but it was not enough to top Navy.

On the men's side, Brian Torres '98 won the 800m run and Dave Granger '97 outran his competitors in the 5000m run. The men's 4x800m relay team beat Army's by one one-hundredth of a second to set a Sanford field house record. The men had never beaten Army in the running events before last weekend.

"We don't have the numbers to match their numbers," stated Gulden. "We ran out of fresh people and they kept putting in fresh bodies. They just had deeper, stronger teams."

Gulden believes his athletes competed more confidently this year and that it showed in the meet. "We were a lot more confident. Last year we ran defensively, but this year we ran aggressively. As long as we improve on that we'll continue to get better."

The reason for the service academies' success in the meet is mostly due to their lifestyle. "They compete every day, all day, in every aspect of their lives," Gulden said. "We're learning to compete against them though." Gulden is grateful for the competition that Army and Navy provide. "We appreciate their aggressiveness because it makes us better."

Overall,Gulden was impressed with the results of the meet. "This growth is what athletics is all about. You can't get upset over things like this. We couldn't have done better."

This was the last event of the year in which the entire team will compete. The men's and women's distance medley teams will compete on Friday in the Mobil Grand Prix. Other athletes who have qualified or hope to qualify for either the IC4A or ECAC championships will participate in the Metropolitan Athletics Congress meet in New York City this weekend.

Swimmers cap impressive season at Army

BY ERICA FRIEDLANDER

Bucknellian Staff Writer

After a two week training period, the Orange and Blue swimmers from Bucknell were ready to face the competition. Shaved and tapered, the team traveled to the United States Military Academy to meet the other Patriot League swimmers.

Before the tournament was over, three Bucknell swimmers topped the high point standings at the close of Patriot League Championships last weekend in West Point, NY. Jen Myers '98 proved her power by racking up a total of 56 points, while freshman powerhouse Kate Wood '00 brought Bucknell 51 points, putting her in sixth place. On the men's side, senior co-captain Ethan Buckley '97 dominated by scoring 53 points, making him the third highest point scorer of the weekend.

After the first day of competition, Bucknell was seeded higher than anticipated, with the men's team in third place with 148 points and the women in fifth with 99 points.

The finals for the first evening's swim brought in top 10 wins for many Bucknell swimmers. The women's 200-yard freestyle relay kicked off the meet with Myers, Nicole Brandemarti '00, Jessica Klotz '98 and Molly Ellis '98 placing sixth with a time of 1:42.00. The men's relay team, consisting of Buckley, Alex Johnson '99, Fitzpatrick '98 and Antonio Lannes '98, captured a second place win for the Bison with a time of 1:23.89.

Friday's finals helped the Bison increase their overall point total with many personal best times from the men's and women's teams. Buckley placed first in the men's 200-yard freestyle with a time of 1:41.01, followed by Johnson, who took third place with a personal best of 1:41.8. The men's 200-yard medley relay team made up of Scott Woodworth '98, Buckley, Johnson and Vladmir Turkoglu '98 and the women's team consisting of Myers, Kate Wilson '00, Brandemarti and Klotz both took second place. Wood won a first place title in the 400-yard individual medley relay with a time of 4:33.03.

Army's men's team and Navy's women's team had already pulled for into the lead by Saturday.

Bucknell came on strong with co-captain John Zanella '97 swimming a 16:43.12 in the 1650-yard freestyle, which put him in ninth place. The 200-yard backstroke brought in two top-10 wins for Bucknell's women with Myers placing first (2:05.83) and Andrea Stanley '97 placing eighth (2:10.87). Woodworth placed second in the men's 200-yard backstroke with a time of 1:53.36.

The men's team continued to dominate at Patriots with Buckley and Johnson taking second and third in the 200-yard freestyle with times of 45.99 and 46.24 respectively. Later in the meet, Andrew Pierce '98 placed sixth (2:14.40) and Derek Gominger '00 placed eighth (2:15.80) in the 200-yard breaststroke.

Mike Malloure '98 took fourth place in the three meter diving and sixth place in the three meter diving competition. His final point total for the weekend was 484.25.

The weekend ended with the Army men and the Navy women taking first place in the championships. Bucknell's men's team placed third while the women took fifth.

Coach Katchmarik stated after the championship competition, "We did really well. I was very pleased with the way that everybody swam. We had so many personal bests. The only problem that we had was that our team does not have enough depth. Hopefully in the future we can increase our team's numbers."

Cara Mickelsen—The Bucknellian

Bucknell's swimmers finished strong weekend at the Patriot Championships. The men placed 3rd overall, and the women finished 5th.

DOWLING

from page 1

teams are made up of actual students at the school are 'real' colleges and universities and I respect them," Dowling said. "The rest are, to whatever degree, sports franchises with 'universities' attached."

Dowling has seen both ends of the athletic values spectrum, from cheering for Ivy league champions in his undergraduate years at Dartmouth, to teaching at Rutgers. Dowling himself earned nine varsity letters in high school, and was a second-team all-state basketball player, but chose to study at institutions where academics came first. Patriot League schools currently occupy such a distinguished place in American education, but the addition of scholarships would begin to taint that esteem. The league's schools, no matter how much publicity they gained from successful teams, would lose academic respect because of athletic grants.

"Imagine higher education as being spread out along a continuum with Harvard at one end—a genuine university devoted to higher level learning and teaching, and UNLV or Nebraska at the other—a professional sports franchise with a remedial-education 'university' attached," Dowling said. "The great question, then would be: 'why should any school at an intermediate point aspire to be closer to the UNLV end than the Harvard end?"

The league's conflict when deciding whether to grant Holy Cross scholarships was evident: give Holy Cross their scholarships, and lose respect. Deny them scholarships, and watch the league dissolve. The presidents of the league chose survival, but Dowling sees another option.

In last month's open letter to Bro Adams, Dowling asked the Patriot League to drop Holy Cross and, whenever Rutgers deems it possible, add the Scarlet Knights to the league's rolls. This would maintain the minimum of seven teams in the league, and keep the league closer to the "Harvard" end of the intellectual spectrum. Dowling admires Adams' stance to keep the "intellectual integrity" of the league intact, and to move Bucknell forward with a strong academic agenda.

"One person who thoroughly understands the underlying conflict of values here is your splendid President Adams. He is a rare treasure among college presidents, and students at Bucknell ought to be tremendously proud that you have him," Dowling said.

So is Dowling's campaign to get Rutgers to drop athletic scholarships realistic? Probably not. Big East schools are more powerful nationally than ever before, and dismantling the massive athletic program there may be next-to impossible. But he is generating publicity. The "1000 men" website has generated over 1,200 hits in its two months of existence, and mail about the campaign— both positive and negative— is delivered to Dowling by the bushel. Even if he doesn't succeed, Dowling's campaign has drawn attention throughout the Patriot League and the Big East to the conflict of values that "professionalized" athletics may represent.

"That's what this '1000 men and women' campaign is all about," Dowling said. "Trying to get Rutgers to preserve what it has, rather than moving toward the realm of 'sports prostitution.'"

Flash in the Pan

Gordon Takes Daytona: Jeff Gordon, 25, took his first-ever Daytona 500 this past Sunday, continuing the frustration of legend Dale Earnhardt. Earnhardt, whose illustrious career is only missing a Daytona victory, was bumped by defending champion Dale Jarrett on lap 190 after he was passed by Gordon. Earnhardt finished 31st. As to Gordon, he has quickly become a major force in NASCAR, and is now the youngest-ever Daytona champion, completing a top three sweep for the Rick Hendrick Chevrolet team.

Cleaning House: Don Nelson has only been on the job for 12 days, but he's already made massive changes in the roster of the Dallas Mavericks. Late last week he put together a trade that sent Jamal Mashburn to the Heat for a trio of players, and now he has organized one of the biggest trades in league history. On Monday the Mavericks sent guards Jimmy Jackson and Sam Cassell, forwards Chris Gatling and George McCloud, and center Eric Montross to the New Jersey Nets for guards Robert Pack and Khalid Reeves, forward Ed O' Bannon and center Shawn Bradley. With the current trade, the Mavericks have now unloaded their entire starting five, as well as totally broken up their supposed savior, the three J's—Jimmy Jackson, Jason Kidd and Jamal Mashburn.

Hill Loses the Magic: Actually, the Magic got rid of Hill, as they fired the fourth-year coach after the team has struggled to a 24-25 start. It has been a tough year all around for the Magic, as the loss of Shaquille O' Neal, coupled with injuries to the rest of their starters (most notably Anfernee Hardaway) has made it difficult for the team to gain any continuity. Hill will be replaced by assistant Richie Adubato.

Mirer Heads to the Windy City: The Chicago Bears, still unsure about the status of quarterback Erik Kramer's neck, traded their first-round pick in the 1997 draft for Seattle quarterback Rick Mirer. The former Notre Dame star struggled after being drafted number two overall by the Seahawks in the 1994 draft, and was beaten tout by journeyman John Friesz this past season.

George Continues Quarterback Shuffle: After a half-season absence, Jeff George will be back in black, except this time for the Oakland Raiders. The Raiders won a bidding war with division-rival Kansas City for the services of the former Falcon and Colt. George was waived by the Falcons last season after constant feuding with management and Head Coach June Jones.

In additional free agent news, the Pittsburgh Steelers lost two key members of their defense to the Seattle Seahawks, as Pro-Bowl linebacker Chad Brown and starting cornerback Willie Williams left for bigger money. However, the Steelers did save face by re-signing Pro Bowl running back Jerome Bettis.

College Basketball Top 10

SCIENCE AND TECHNOLOGY

Capstone course presents a different view on health

By Heather Schweiger

A new capstone course taught by Dr. Kathleen Page, "Perspectives in Health and Healing", CP 558, takes a new approach to looking at health. Rather than defining health by lack of diseases and ailments, Page challenges students to "change where we start thinking about health."

Through questions such as, "What are practices that maintain health?" and "How does lifestyle feed back into the functions of the body?" students are introduced to a variety of topics from homeostasis to psychoneuroimmunity to yoga and meditation.

While this course may seem to be science oriented, it is designed for non-biology majors. One of the difficulties Page finds is that she cannot use scientific language, since the class is composed of individuals with a wide range of majors.

Page intends "to move students through developed general concepts about the nervous system, endocrine system and immune system." Students not only take away from the course some knowledge of physiology, but also how it is used in describing the body's response to external and internal sensory cues.

"Perspectives in Health and Healing" is an investigation into the alternatives to orthodox medical methods, whether they are useful because of belief structures, and whether they should be incorporated into medical procedures in our everyday lives. Internal and external signals influence our body's responses.

Page not only poses questions on orthodoc medical methods, but reveals the possible roles that such things as yoga, acupuncture and neuropeptides play in health.

The appeal of this subject is apparent in the diversity of majors that are in the class including mechanical engineering, psychology, economics and biology just to name a few.

Robyn Shanahan '97, a mechanical engineer, said, "We look into the mind-body connection from biological and philosophical views. When doing yoga or tai-chi your mind and emotions are affecting your body. [It] biologically affects you."

The science portion of the course is designed so students can understand what is happening to them physiologically, such as why and how the blood pressure decreases during yoga.

Psychology major Sara Bielitz '97 finds the course very interesting and comments that they study "healing effects, rather than focusing on disease."

Meredith Barrows '97 is a biology major and finds "Perspectives in Health and Healing" very interesting, especially since she intends to pursue a career in medicine. "[It's] a good way to see alternative ways of healing, instead of the practical, traditional ways," Barrows said.

This alternative view of health also engages students in reading a sundry of literature including texts such as *Human Biology*, *Job's Body*, *The Healing Brain* and *Healing East and West*. Each text approaches the body and health in a different style so students are given a sense of symmetry.

Human Biology is scientific, while *Job's Body* is a "descriptive story about the body." Additionally, several guest speakers are incorporated into the syllabus, addressing issues including therapeutic touch, mind-body/midwifery and alternative medicine.

Page received her Ph.D. in physiological biochemistry from Penn State. In addition to teaching her new capstone course, Page is an instructor of sensory physiology, animal physiology and foundations of biology.

Page also does research that involves "work with testes to study the effects of vitamin A on gene expression in both seminiferous tubules and the cells that compose this tissue, Sertoli and spermatogenic cells." Helping her with this research are eight undergraduate and two graduate students.

Because Page conducts her other classes in a more methodical way, her new course explores the more philosophical connection between the body and its environment. This approach to the body and health provides an exciting avenue to self-knowledge.

Beetna Kim—The Bucknellian

Kathleen Page, assistant professor of biology, teaches a new capstone course that deals with different aspects of health.

Caught in the Web: Best of the Best

By Curran Filer

Bucknellian Staff Columnist

Okay, last week's topic wasn't all that great. Unfortunately, the big car companies like Ford and Chevy have no creativity. But this week should be a little better. There's no common theme that ties these together, except that I think they're cool sites. I just browsed around all those "Best of the Web", and "Cool link" pages and picked out my favorites of their favorites, hence the term "Best of the Best." If you don't like them, tough. Get your own column!!

Ghosts, spirits, shades, and spectres

`http://members.aol.com/DWWaldron/home.html`

The author of this site is serious about ghosts, and wants you to believe too. It's filled with testimonials from phantasm-believers across the country, and information about ghosts. If you want information on a certain type of phenomenon, or want to know the difference between a churel and a banshee then look in the "Spectre" section. If you want to read about famous haunted places then look in the "Places" section. If you believe in this stuff then look into counseling.

Medspeak: The Dictionary of ER

`http://www.geocities.com/Televisioncity/5196/`

If you watch the television show ER, and I hear many people do, you may wonder what the heck those doctors are saying! Even though they are just actors they use that medical jargon like they're real doctors, and they don't even explain it. This site gives a short explanation of scads of medical terms. It's organized alphabetically so it's easy to use. If they ever say "normal sinus rhythm" on the show, you'll know it means the normal heart rate of 60 to 80 beats a minute for adults.

The Mr. Showbiz Plastic Surgery Lab

`http://www.mrshowbiz.com/features/games/surgery`

I know many of you out there are extremely bored. So if you want to spend some time doing something completely useless but fun, try "Celebrity Plastic Surgery". Choose your raw materials (the cast of Friends or Seinfeld, talk show hosts, or Goldie Hawn, Danny DeVito, Ellen Barkin, and Keanu Reeves). Then mix and match their facial parts until you get what you want. It's fun to make famous people look stupid!

Find-A-Grave

`http://www.orci.com/personal/jim/index.html`

Jim Tipton, the creator of this site, says he collects dirt from graves of noteworthy people as a hobby. I can just imagine his house filled with bottles of dirt from famous graves all around the world. If you think this is a completely normal hobby (it isn't) and you want to try it, Jim has a database of the locations of famous peoples graves, listed by name, location, and even by the specific cemetery. He even has pictures of famous graves. Check out the picture of Jim kissing Al Capone's grave!

The IllusionWorks Home Page

`http://www.illusionworks.com`

This site made me wig out! It's dedicated to illusion and visual puzzles. It has a huge number of puzzles, arranged into different illusion categories, with a description of the science behind the puzzles. They even have interactive puzzles to play with. To see the 3-D puzzles you'll need those funky, red and blue, 3-D glasses. Also, check out the gift shop to buy cool illusion stuff.

Engineering Week changes spark protest

By Kim Chittim

Added changes to Engineering Week, the spirit competition for engineers, have spurred controversy amongst some previously spirited engineers.

Instead of the five departments competing against each other, as has been the tradition, this year the College of Engineering was split into the Blue Team and the Orange Team.

Trudy Cunningham, Associate Dean of Engineering, and a small committee of students decided on the change to promote participation and to have more fun.

The change has raised objections from some students who are concerned whether the changes will actually be beneficial. "It was a lot of fun last year, but it looks like it's not going to happen this year," commented Nathaniel Clark '97. Paul Deebel '97 added, "I think the idea for interdisciplinary teams will decrease participation, as people wouldn't have loyalty to a Blue or Orange Team as they would their department, their major."

Engineering Week was invented by a group of students and Cunningham 12 years ago as a spirit competition between the five engineering departments, with fun as its primary goal.

Every year a couple of students create all the contests and the rules. Cunningham acts as the judge and awarder of points.

Students believe this year's changes were brought about due to the fact that the chemical engineering department has won the competition for the last 10 years. "The other departments couldn't handle [the chemical engineers] winning all the time," said chemical engineer Brian Gale '97.

In reaction to the changes, a group of chemical engineering students, including Deebel, created a "green team." "We decided to form our own team in protest to the way they changed Engineering Week because we want them to change it back to the way it was before," Tim Raymond '97 said.

Cunningham, who was partly responsible for the team changes, admits that "it's wonderful if they want to protest." However, since the green team was not previously established, they will not be able to receive points in the contests.

Even though the green team was originally created by chemical engineering students, "the more we thought about it, the more we realized it should be more of a protest against the way it is," Raymond said. The green team now includes students from all five departments.

"My hopes by starting the green team is to increase interest and participation, not just by chemE's, but all engineers," Deebel explained.

Despite the protest, the competition promises to have the usual fun spirit. Everyone realizes that the primary purpose of Engineering Week is to have fun. "This is play. We're not talking life or death situations," Cunningham said.

With the main objective to have fun, Engineering Week at the University is not celebrated in the usual dinner/speaker fashion. It involves a week long collection of games and competitions involving engineering students, faculty, staff and anyone associated with the College of Engineering.

Engineering Week is celebrated nationwide in February. "The purpose nationally is to bring attention to engineering as a field of study and labor, a way of thinking, and a way to attract people into engineering," Cunningham explained.

Engineering Week at the University began last Friday and runs through today. This week's events include a paper plane contest, tug of war, egg toss, a team scream, videos made in the middle of the night, and a paper structure building contest. It ends with a dinner tonight in the Terrace Room at 5:30 p.m.

Look for additional photos and a summary of Engineering Week in the next issue of The Bucknellian.

Science & Technology Calendar

Tues., Feb. 25	**Physics Coffee Talk at noon in Olin 264** Richard Henry will speak on "Discovering the Atomic Nucleus: A case history in the search for truth in physics."
Thurs.,Feb. 27	**Mathematics Coffee Talk at 9.00 p.m. in Olin 373** Professor David Osi will speak on "What's the fuss about Fermat?"

Athlete of the week: Ethan Buckley (swimming) finished third among men at the Patriot League championships.

Bison run strong at Patriot Championships

Bucknell runners break four school records; fall to Army, Navy in team standings

By Eric Keber

Bucknellian Staff Writer

This past weekend the Bucknell men's and women's track teams traveled to Colgate to compete in the Patriot League Indoor Track and Field Championships. Despite a second place finish for the men's team and a third place finish for the women, both squads performed impressively against their opponents, and in the process set three school records.

A strong Army team swept the meet beating the Bucknell men's score of 133 by 70 points. The women's scores were a lot closer as the Cadets' score of 149 narrowly beat Navy by seven. The Bison came in third with 125.

"It was one hell of a meet," said Head Coach Art Gulden. "I'm very proud of the kids, they tried hard and competed well."

School records were set by Tunde Daniels '00, who won the 400m dash in 57.26 seconds, and Julie Sweitzer '99, who ran the mile in 4:59.13. The women's 4x800m relay team, a squad comprised of Sweitzer, Pamela Richardson '99, Connie Hamlin '99, and Annie Hamlin '99, broke its own record and won their event.

In addition to her win in the 400m, Daniels claimed victory in the 200m dash while teammate Kate Dei Cas '97 won the long jump. The women also won the 4x400m relay, but it was not enough to top Navy.

On the men's side, Brian Torres '98 won the 800m run and Dave Granger '97 outran his competitors in the 5000m run. The men's 4x800m relay team beat Army's by one one-hundredth of a second to set a Sanford field house record. The men had never beaten Army in the running events before last weekend.

"We don't have the numbers to match their numbers," stated Gulden. "We ran out of fresh people and they kept putting in fresh bodies. They just had deeper, stronger teams."

Gulden believes his athletes competed more confidently this year and that it showed in the meet. "We were a lot more confident. Last year we ran defensively, but this year we ran aggressively. As long as we improve on that we'll continue to get better."

The reason for the service academies' success in the meet is mostly due to their lifestyle. "They compete every day, all day, in every aspect of their lives," Gulden said. "We're learning to compete against them though." Gulden is grateful for the competition that Army and Navy provide. "We appreciate their aggressiveness because it makes us better."

Overall,Gulden was impressed with the results of the meet. "This growth is what athletics is all about. You can't get upset over things like this. We couldn't have done better."

This was the last event of the year in which the entire team will compete. The men's and women's distance medley teams will compete on Friday in the Mobil Grand Prix. Other athletes who have qualified or hope to qualify for either the IC4A or ECAC championships will participate in the Metropolitan Athletics Congress meet in New York City this weekend.

Swimmers cap impressive season at Army

By Erica Friedlander

Bucknellian Staff Writer

After a two week training period, the Orange and Blue swimmers from Bucknell were ready to face the competition. Shaved and tapered, the team traveled to the United States Military Academy to meet the other Patriot League swimmers.

Before the tournament was over, three Bucknell swimmers topped the high point standings at the close of Patriot League Championships last weekend in West Point, NY. Jen Myers '98 proved her power by racking up a total of 56 points, while freshman powerhouse Kate Wood '00 brought Bucknell 51 points, putting her in sixth place. On the men's side, senior co-captain Ethan Buckley '97 dominated by scoring 53 points, making him the third highest point scorer of the weekend.

After the first day of competition, Bucknell was seeded higher than anticipated, with the men's team in third place with 148 points and the women in fifth with 99 points.

The finals for the first evening's swim brought in top 10 wins for many Bucknell swimmers. The women's 200-yard freestyle relay kicked off the meet with Myers, Nicole Brandemarti '00, Jessica Klotz '98 and Molly Ellis '98 placing sixth with a time of 1:42.00. The men's relay team, consisting of Buckley, Alex Johnson '99, Fitzpatrick '98 and Antonio Lannes '98, captured a second place win for the Bison with a time of 1:23.89.

Friday's finals helped the Bison increase their overall point total with many personal best times from the men's and women's teams. Buckley placed first in the men's 200-yard freestyle with a time of 1:41.01, followed by Johnson, who took third place with a personal best of 1:41.8. The men's 200-yard medley relay team made up of Scott Woodworth '98, Buckley, Johnson and Vladmir Turkoglu '98 and the women's team consisting of Myers, Kate Wilson '00, Brandemarti and Klotz both took second place. Wood won a first place title in the 400-yard individual medley relay with a time of 4:33.03.

Army's men's team and Navy's women's team had already pulled for into the lead by Saturday.

Bucknell came on strong with co-captain John Zanella '97 swimming a 16:43.12 in the 1650-yard freestyle, which put him in ninth place. The 200-yard backstroke brought in two top-10 wins for Bucknell's women with Myers placing first (2:05.83) and Andrea Stanley '97 placing eighth (2:10.87). Woodworth placed second in the men's 200-yard backstroke with a time of 1:53.36.

The men's team continued to dominate at Patriots with Buckley and Johnson taking second and third in the 200-yard freestyle with times of 45.99 and 46.24 respectively. Later in the meet, Andrew Pierce '98 placed sixth (2:14.40) and Derek Gominger '00 placed eighth (2:15.80) in the 200-yard breaststroke.

Mike Malloure '98 took fourth place in the three meter diving and sixth place in the three meter diving competition. His final point total for the weekend was 484.25.

The weekend ended with the Army men and the Navy women taking first place in the championships. Bucknell's men's team placed third while the women took fifth.

Coach Katchmarik stated after the championship competition, "We did really well. I was very pleased with the way that everybody swam. We had so many personal bests. The only problem that we had was that our team does not have enough depth. Hopefully in the future we can increase our team's numbers."

Cara Mickelsen—The Bucknellian

Bucknell's swimmers finished strong weekend at the Patriot Championships. The men placed 3rd overall, and the women finished 5th.

DOWLING

teams are made up of actual students at the school are 'real' colleges and universities and I respect them," Dowling said. "The rest are, to whatever degree, sports franchises with 'universities' attached."

Dowling has seen both ends of the athletic values spectrum, from cheering for Ivy league champions in his undergraduate years at Dartmouth, to teaching at Rutgers. Dowling himself earned nine varsity letters in high school, and was a second-team all-state basketball player, but chose to study at institutions where academics came first. Patriot League schools currently occupy such a distinguished place in American education, but the addition of scholarships would begin to taint that esteem. The league's schools, no matter how much publicity they gained from successful teams, would lose academic respect because of athletic grants.

"Imagine higher education as being spread out along a continuum with Harvard at one end—a genuine university devoted to higher level learning and teaching, and UNLV or Nebraska at the other—a professional sports franchise with a remedial-education 'university' attached," Dowling said. "The great question, then would be: 'why should any school at an intermediate point aspire to be closer to the UNLV end than the Harvard end?"

The league's conflict when deciding whether to grant Holy Cross scholarships was evident: give Holy Cross their scholarships, and lose respect. Deny them scholarships, and watch the league dissolve. The presidents of the league chose survival, but Dowling sees another option.

In last month's open letter to Bro Adams, Dowling asked the Patriot League to drop Holy Cross and, whenever Rutgers deems it possible, add the Scarlet Knights to the league's rolls. This would maintain the minimum of seven teams in the league, and keep the league closer to the "Harvard" end of the intellectual spectrum. Dowling admires Adams' stance to keep the "intellectual integrity" of the league intact, and to move Bucknell forward with a strong academic agenda.

"One person who thoroughly understands the underlying conflict of values here is your splendid President Adams. He is a rare treasure among college presidents, and students at Bucknell ought to be tremendously proud that you have him," Dowling said.

So is Dowling's campaign to get Rutgers to drop athletic scholarships realistic? Probably not. Big East schools are more powerful nationally than ever before, and dismantling the massive athletic program there may be next-to impossible. But he is generating publicity. The "1000 men" website has generated over 1,200 hits in its two months of existence, and mail about the campaign— both positive and negative— is delivered to Dowling by the bushel. Even if he doesn't succeed, Dowling's campaign has drawn attention throughout the Patriot League and the Big East to the conflict of values that "professionalized" athletics may represent.

"That's what this '1000 men and women' campaign is all about," Dowling said. "Trying to get Rutgers to preserve what it has, rather than moving toward the realm of 'sports prostitution.'"

Flash in the Pan

Gordon Takes Daytona: Jeff Gordon, 25, took his first-ever Daytona 500 this past Sunday, continuing the frustration of legend Dale Earnhardt. Earnhardt, whose illustrious career is only missing a Daytona victory, was bumped by defending champion Dale Jarrett on lap 190 after he was passed by Gordon. Earnhardt finished 31st. As to Gordon, he has quickly become a major force in NASCAR, and is now the youngest-ever Daytona champion, completing a top three sweep for the Rick Hendrick Chevrolet team.

Cleaning House: Don Nelson has only been on the job for 12 days, but he's already made massive changes in the roster of the Dallas Mavericks. Late last week he put together a trade that sent Jamal Mashburn to the Heat for a trio of players, and now he has organized one of the biggest trades in league history. On Monday the Mavericks sent guards Jimmy Jackson and Sam Cassell, forwards Chris Gatling and George McCloud, and center Eric Montross to the New Jersey Nets for guards Robert Pack and Khalid Reeves, forward Ed O' Bannon and center Shawn Bradley. With the current trade, the Mavericks have now unloaded their entire starting five, as well as totally broken up their supposed savior, the three J's—Jimmy Jackson, Jason Kidd and Jamal Mashburn.

Hill Loses the Magic: Actually, the Magic got rid of Hill, as they fired the fourth-year coach after the team has struggled to a 24-25 start. It has been a tough year all around for the Magic, as the loss of Shaquille O' Neal, coupled with injuries to the rest of their starters (most notably Anfernee Hardaway) has made it difficult for the team to gain any continuity. Hill will be replaced by assistant Richie Adubato.

Mirer Heads to the Windy City: The Chicago Bears, still unsure about the status of quarterback Erik Kramer's neck, traded their first-round pick in the 1997 draft for Seattle quarterback Rick Mirer. The former Notre Dame star struggled after being drafted number two overall by the Seahawks in the 1994 draft, and was beaten tout by journeyman John Friesz this past season.

George Continues Quarterback Shuffle: After a half-season absence, Jeff George will be back in black, except this time for the Oakland Raiders. The Raiders won a bidding war with division-rival Kansas City for the services of the former Falcon and Colt. George was waived by the Falcons last season after constant feuding with management and Head Coach June Jones.

In additional free agent news, the Pittsburgh Steelers lost two key members of their defense to the Seattle Seahawks, as Pro-Bowl linebacker Chad Brown and starting cornerback Willie Williams left for bigger money. However, the Steelers did save face by re-signing Pro Bowl running back Jerome Bettis.

College Basketball Top 10

1. Kansas 25-1
2. Minnesota 22-2
3. Kentucky 24-3

CAMPUS CALENDAR
SEND ENTRIES TO BOX C-3952 OR EMAIL THEM TO BUCKNELLIAN@ BY TUESDAY.

The 1997 yearbook is almost complete, and we're ready to SUBMIT it to the publisher. We have the layouts and the stories. Now, all we need are the PICTURES. Do you have any photos laying around your room that you want TO see in the 1997 yearbook? If the answer is yes, send them to L'AGENDA, C-3906, by Tuesday, April 1st. Make sure you put your name and box number (home address if you're a senior) on the back of the picture, so we can return them next fall when the yearbooks arrive.
THANKS!

Athlete profile: Lisa Allen

Allen sets standards on field, in community

BY E.J. CRAWFORD
Bucknellian Staff Writer

A couple years ago Lisa Allen '97 was calling alumni as part of Annual Giving, when she came across a 90 year-old man who was very bitter with the school and had not given any money in quite some time. Allen befriended the man, and they talked for quite a while until the man came full circle and pledged $100,000 to the University.

"That's just the kid that she is," said track and field coach Art Gulden, "she'll take the time out to help somebody else. She's a real inspiration."

Allen is also one of the top throwers in the history of Bucknell, as she holds Bucknell records in both the 20-pound weight throw as well as the hammer throw, and ranks in the top three in the shot put. She is also an accomplished discus thrower.

Cara Mickelson— The Bucknellian
Lisa Allen '97 holds school records in the 20-pound weight throw and the hammer throw.

However, it was only by a fluke that Allen even started throwing. The tri-captain never even considered track and field as a freshman in high school, and was a three-sport athlete playing softball, basketball and track. In the beginning of her sophomore year, the track coach at her high school approached her about throwing after a softball game. Allen "reluctantly tried it," and a star was born.

She continued to play softball, while throwing during the same season, but soon realized that this would be too difficult and gave up softball. Said Allen, "I enjoyed softball, but it was clear that I had a talent [for throwing]."

After her esteemed high school career, a number of colleges came calling, but the NCAA championship qualifier became a Bison. "Bob Schambacher, the coach at the time, was a big reason I came here. He made me really excited to be here. Plus, [Bucknell] was a beautiful place and it's only two hours from where I live," she said.

Once at Bucknell, Allen took a special liking to the 20 pound weight throw. "The best thing is that [the 20 pound throw] is not done in high school and was something new to try, something different and exciting."

Allen spent a lot of time working on what Coach Gulden called "one of the most demanding events both technically and physically," and soon became one of Bucknell's best.

So far this season Allen has thrown consistently near the 50 foot mark, and has finished in the top two in all of this season's matches. She has also been very successful in the shot put, where she has finished no worse than fourth during the indoor season.

Allen credits a lot of her success to teammate Tria Tyler '99, who, as Allen said, "really pushed me to get better."

"I was starting to get a little burned out my sophomore year, and she came in and changed my life on college and athletics."

Off the track, Allen is the manager of the Student Calling Program, which is the organization that calls alumni for donations, and is the chair of the Senior Gift Drive. In addition, she also works at the refrectory and is the captain of the track team, prompting Gulden to comment, " I don't know how she's done everything she's done."

Despite all her activities, Allen has been able to be a consistent performer on the Dean's List, and currently holds a 3.6 as an elementary education major. Said Gulden, "she's done good things academically along with being a constant on the Dean's List... the kids [on the track team] really respect her and the person that she is."

Back home Allen lives in Athens, Pennsylvania with her parents and sister, who is a freshman thrower at the University of Ithaca.

When asked if her sister got into throwing after watching her sister, Allen admitted that "she probably did, but she's pretty good herself."

She certainly had a good model to emulate.

HOLY CROSS

from page 14

"This game was big for us, and we just outworked them," Gilliard said. "We wanted it more than they did."

The win over Holy Cross should have put Bucknell in the driver's seat for the Patriot League title, but six minutes of unfocused play at Navy's Alumni hall gave the Midshipmen the role of favorite going into the season's final week. The Bison outplayed Navy for 34 minutes of their Saturday contest, but it was the other six minutes, between the 17:30 and the 11:30 marks of the first half, that Navy used to reel off 18 straight points and emerge as the Patriot League favorite by virtue of a 78-67 win.

After J.R. Holden hit a long three pointer from the right side to put the Bison up 7-2 at the three-minute mark, the walls came crashing down on Flannery's team. Five turnovers sandwiched between several defensive lapses in the next six minutes helped Navy wrap up the game early. By the time Holden hit another three pointer to cut Navy's lead to 20-10, the game was all but over.

The Bison rallied twice in the second half, but couldn't cut the lead to less than seven points.

"We came out way too slow against Navy, and it cost us," Flannery said. "We made a conscious effort against Holy Cross to get out of the blocks. We weren't going to let that (run) happen to us again."

The formula for the Bison this weekend is simple. A win at Army on Saturday, coupled with a Navy loss to Holy Cross, would give Bucknell the tournament's #1 seed and a first-round tournament bye. If both teams win, Bucknell would earn the #2 seed and face 1-24 Lehigh. A loss, though, could make Bucknell the #3 seed and make a run to the NCAA tournament much harder. The third seed would likely face Army in the first round.

"If we can keep our focus, we can play with anybody," Flannery said. "We don't have that mentality night in and night out yet, but when we have it, we're very good."

Fazio, wrestlers end skid at Hofstra

BY E.J. CRAWFORD
Bucknellian Staff Writer

A little bit of life returned to the Bucknell wrestling team this week, as they ended a three game losing streak with a 27-20 victory at league-foe Hofstra.

Buoyed by two forfeits, Bucknell raced out to a seemingly comfortable 12-5 lead, but the resilient Dutchmen battled back to pull within a point at 12-11.

However, Jeff Fazio '98 turned the tide with an 8-2 decision that gave the team a 15-11 lead, and Jason Bellis '99 followed that up two matches later by pinning his opponent at 2:32 to give the Bison what proved to be an insurmountable 21-14 lead.

Said coach Bob Ferraro, "It felt good to end our losing streak. Everyone seems to be taking steps in the right direction, and re-committing themselves to their goals."

In addition, the squad hopes to have juniors Solomon Webb and Jeff Fisher back from injury for next week's matches against Rider and Virginia, as well as the upcoming ECWA league tournament. "With those guys back we can really give both Rider and Virginia a run for their money," Ferraro said.

Rider is currently ranked seventh in the country and is the league powerhouse, whereas the Cavaliers are a perennial power.

Also, the coach hopes to return star Mike Garcia '98, whose status is currently under inquiry from the University. Said athletic director Rick Hartzell, "we hope to have a report [on Garcia's eligibility from the investigators by the end of the week."

Women to face Lafayette in league tourney

BY JEFF CAMPAGNA
Bucknellian Staff Writer

The true champion of Patriot League women's basketball will be determined the weekend next Friday at Lehigh.

Though the regular season champ gets a first round bye, regular season performance is no guarantee of tournament success, a fact to which many Bucknell fans can attest. Holy Cross has been the cream of the crop this season, running the gamut with an undefeated 12-0 mark in the conference (23-3 overall).

Bucknell, 5-6 in the Patriot League looks to knockout rival Lafayette. As regular season champs last year, the Bison were upset by Colgate in their first game, and now Bucknell looks to play the role of the spoiler.

Women hoopsters fall to Holy Cross, Navy

Women to face Lafayette in tournament

BY JEFF CAMPAGNA
Bucknellian Staff Writer

Jonah Half— The Bucknellian
Lori Houck '00 recorded 16 points and four assists to pace the Bison against Holy Cross.

This past week was one that would like to be forgotten by women's basketball Coach Juliene Simpson, as her team was beaten soundly in back-to-back Patriot League contests and lost its lone senior starter.

Even with the two losses, Bucknell maintained its fourth-place standing in the conference, at 11-13 overall, 5-6 in league play. The Bison faced the wrath of the best of the Patriot League, absorbing a 72-54 loss to first-place Holy Cross on Tuesday and a 68-55 defeat to second-place Navy this past Saturday.

The trip to Annapolis proved to be more costly then a simple addition to the loss column, as senior guard Chiara Sockel went down with torn ligaments in her knee in the first half. Sockel, the only senior on the active roster, will be out for the rest of the season. She will be sorely missed come tourney-time, when veteran leadership and experience qre ever-so-valuable to a team's performance.

Bucknell came out fired up against the Mids and started strong with six points from forward Kim Delfs '99, and the Bison trailed by only five (25-20) at the half. Unfortunately, the Bison were unable to keep up the pace, as the Mids took off on a 7-0 run early in the second half. Inability to convert off of Navy's turnovers and missed shots, coupled with the first-half loss of Sockel's offensive presence, was too much to overcome for Bucknell in a 68-55 loss.

Delfs finished with 12 points to pace the Bison, while forward Mathieson led the team with six rebounds. As if an injury to one guard wasn't enough, point guard Leslie Blue '99 suffered a broken finger after the game, but was able to play with it taped against Holy Cross.

Tuesday's match-up against the Crusaders began with a pre-game tribute to the seniors, Sockel and McGowan, both of whom were in street clothes for the ceremony. Center McGowan, a second team All-Patriot League selection last year, suffered a season-ending knee injury at the start of the season.

Holy Cross came to Davis Gym looking to avenge last season's loss of the regular season title and jumped out to a 23-11 lead, combining sharp-shooting with quick passes under the rim. Meanwhile, Bucknell struggled on the offensive boards, creating only a few second shot opportunities.

In addition, Holy Cross flexed its defensive muscle, shutting out Bucknell's leading scorer, forward Kim Delfs, in the first half, while causing 13 turnovers.

The Bison finished out the half down 39-27.

The deficit quickly grew larger, as Bucknell gave up six straight points to Holy Cross to start the half. After that the Bison turned up their defensive intensity, but the Crusaders were not to be denied, pulling ahead by 20 with a 12:01 left, and then maintaining that lead until the end. Scoring high points for the Bison Kim Delfs, who came alive in the second half, scoring nine points and pulling down five rebounds to give the Bison a stronger presence inside, and freshman point guard Lori Houck played what might have been her best game of the year, as she netted 16 points and dished out four assists while running the show.

After the game, Coach Simpson was proud of her team's showing against a very powerful Crusader squad. "I think it was a tremendous effort. It's also important to remember that not one starter from last year's team [that beat Holy Cross to win the regular season championship] was playing today," she said.

Athlete profile: Lisa Allen

Allen sets standards on field, in community

BY E.J. CRAWFORD
Bucknellian Staff Writer

A couple years ago Lisa Allen '97 was calling alumni as part of Annual Giving, when she came across a 90 year-old man who was very bitter with the school and had not given any money in quite some time. Allen befriended the man, and they talked for quite a while until the man came full circle and pledged $100,000 to the University.

"That's just the kid that she is," said track and field coach Art Gulden, "she'll take the time out to help somebody else. She's a real inspiration."

Allen is also one of the top throwers in the history of Bucknell, as she holds Bucknell records in both the 20-pound weight throw as well as the hammer throw, and ranks in the top three in the shot put. She is also an accomplished discus thrower.

However, it was only by a fluke that Allen even started throwing. The tri-captain never even considered track and field as a freshman in high school, and was a three-sport athlete playing softball, basketball and track. In the beginning of her sophomore year, the track coach at her high school approached her about throwing after a softball game. Allen "reluctantly tried it," and a star was born.

She continued to play softball, while throwing during the same season, but soon realized that this would be too difficult and gave up softball. Said Allen, "I enjoyed softball, but it was clear that I had a talent [for throwing]."

After her esteemed high school career, a number of colleges came calling, but the NCAA championship qualifier became a Bison. "Bob Schambacher, the coach at the time, was a big reason I came here. He made me really excited to be here. Plus, [Bucknell] was a beautiful place and it's only two hours from where I live," she said.

Cara Mickelson— The Bucknellian

Lisa Allen '97 holds school records in the 20-pound weight throw and the hammer throw.

Once at Bucknell, Allen took a special liking to the 20 pound weight throw. "The best thing is that [the 20 pound throw] is not done in high school and was something new to try, something different and exciting."

Allen spent a lot of time working on what Coach Gulden called "one of the most demanding events both technically and physically," and soon became one of Bucknell's best.

So far this season Allen has thrown consistently near the 50 foot mark, and has finished in the top two in all of this season's matches. She has also been very successful in the shot put, where she has finished no worse than fourth during the indoor season.

Allen credits a lot of her success to teammate Tria Tyler '99, who, as Allen said, "really pushed me to get better."

"I was starting to get a little burned out my sophomore year, and she came in and changed my iife on college and athletics."

Off the track, Allen is the manager of the Student Calling Program, which is the organization that calls alumni for donations, and is the chair of the Senior Gift Drive. In addition, she also works at the refrectory and is the captain of the track team, prompting Gulden to comment, " I don't know how she's done everything she's done."

Despite all her activities, Allen has been able to be a consistent performer on the Dean's List, and currently holds a 3.6 as an elementary education major. Said Gulden, "she's done good things academically along with being a constant on the Dean's List... the kids [on the track team] really respect her and the person that she is."

Back home Allen lives in Athens, Pennsylvania with her parents and sister, who is a freshman thrower at the University of Ithaca.

When asked if her sister got into throwing after watching her sister, Allen admitted that "she probably did, but she's pretty good herself."

She certainly had a good model to emulate.

HOLY CROSS

from page 14

"This game was big for us, and we just outworked them," Gilliard said. "We wanted it more than they did."

The win over Holy Cross should have put Bucknell in the driver's seat for the Patriot League title, but six minutes of unfocused play at Navy's Alumni hall gave the Midshipmen the role of favorite going into the season's final week. The Bison outplayed Navy for 34 minutes of their Saturday contest, but it was the other six minutes, between the 17:30 and the 11:30 marks of the first half, that Navy used to reel off 18 straight points and emerge as the Patriot League favorite by virtue of a 78-67 win.

After J.R. Holden hit a long three pointer from the right side to put the Bison up 7-2 at the three-minute mark, the walls came crashing down on Flannery's team. Five turnovers sandwiched between several defensive lapses in the next six minutes helped Navy wrap up the game early. By the time Holden hit another three pointer to cut Navy's lead to 20-10, the game was all but over.

The Bison rallied twice in the second half, but couldn't cut the lead to less than seven points.

"We came out way too slow against Navy, and it cost us," Flannery said. "We made a conscious effort against Holy Cross to get out of the blocks. We weren't going to let that (run) happen to us again."

The formula for the Bison this weekend is simple. A win at Army on Saturday, coupled with a Navy loss to Holy Cross, would give Bucknell the tournament's #1 seed and a first-round tournament bye. If both teams win, Bucknell would earn the #2 seed and face 1-24 Lehigh. A loss, though, could make Bucknell the #3 seed and make a run to the NCAA tournament much harder. The third seed would likely face Army in the first round.

"If we can keep our focus, we can play with anybody," Flannery said. "We don't have that mentality night in and night out yet, but when we have it, we're very good."

Fazio, wrestlers end skid at Hofstra

BY E.J. CRAWFORD
Bucknellian Staff Writer

A little bit of life returned to the Bucknell wrestling team this week, as they ended a three game losing streak with a 27-20 victory at league-foe Hofstra.

Buoyed by two forfeits, Bucknell raced out to a seemingly comfortable 12-5 lead, but the resilient Dutchmen battled back to pull within a point at 12-11.

However, Jeff Fazio '98 turned the tide with an 8-2 decision that gave the team a 15-11 lead, and Jason Bellis '99 followed that up two matches later by pinning his opponent at 2:32 to give the Bison what proved to be an insurmountable 21-14 lead.

Said coach Bob Ferraro, "It felt good to end our losing streak. Everyone seems to be taking steps in the right direction, and re-committing themselves to their goals."

In addition, the squad hopes to have juniors Solomon Webb and Jeff Fisher back from injury for next week's matches against Rider and Virginia, as well as the upcoming ECWA league tournament. "With those guys back we can really give both Rider and Virginia a run for their money," Ferraro said.

Rider is currently ranked seventh in the country and is the league powerhouse, whereas the Cavaliers are a perennial power.

Also, the coach hopes to return star Mike Garcia '98, whose status is currently under inquiry from the University. Said athletic director Rick Hartzell, "we hope to have a report [on Garcia's eligibility from the investigators by the end of the week."

Women to face Lafayette in league tourney

BY JEFF CAMPAGNA
Bucknellian Staff Writer

The true champion of Patriot League women's basketball will be determined the weekend next Friday at Lehigh.

Though the regular season champ gets a first round bye, regular season performance is no guarantee of tournament success, a fact to which many Bucknell fans can attest. Holy Cross has been the cream of the crop this season, running the gamut with an undefeated 12-0 mark in the conference (23-3 overall).

Bucknell, 5-6 in the Patriot League looks to knockout rival Lafayette. As regular season champs last year, the Bison were upset by Colgate in their first game, and now Bucknell looks to play the role of the spoiler.

Women hoopsters fall to Holy Cross, Navy

Women to face Lafayette in tournament

Lori Houck '00 recorded 16 points and four assists to pace the Bison against Holy Cross.

This past week was one that would like to be forgotten by women's basketball Coach Juliene Simpson, as her team was beaten soundly in back-to-back Patriot League contests and lost its lone senior starter.

Even with the two losses, Bucknell maintained its fourth-place standing in the conference, at 11-13 overall, 5-6 in league play. The Bison faced the wrath of the best of the Patriot League, absorbing a 72-54 loss to first-place Holy Cross on Tuesday and a 68-55 defeat to second-place Navy this past Saturday.

The trip to Annapolis proved to be more costly then a simple addition to the loss column, as senior guard Chiara Sockel went down with torn ligaments in her knee in the first half. Sockel, the only senior on the active roster, will be out for the rest of the season. She will be sorely missed come tourney-time, when veteran leadership and experience qre ever-so-valuable to a team's performance.

Bucknell came out fired up against the Mids and started strong with six points from forward Kim Delfs '99, and the Bison trailed by only five (25-20) at the half. Unfortunately, the Bison were unable to keep up the pace, as the Mids took off on a 7-0 run early in the second half. Inability to convert off of Navy's turnovers and missed shots, coupled with the first-half loss of Sockel's offensive presence, was too much to overcome for Bucknell in a 68-55 loss.

Delfs finished with 12 points to pace the Bison, while forward Mathieson led the team with six rebounds. As if an injury to one guard wasn't enough, point guard Leslie Blue '99 suffered a broken finger after the game, but was able to play with it taped against Holy Cross.

Tuesday's match-up against the Crusaders began with a pre-game tribute to the seniors, Sockel and McGowan, both of whom were in street clothes for the ceremony. Center McGowan, a second team All-Patriot League selection last year, suffered a season-ending knee injury at the start of the season.

Holy Cross came to Davis Gym looking to avenge last season's loss of the regular season title and jumped out to a 23-11 lead, combining sharp-shooting with quick passes under the rim. Meanwhile, Bucknell struggled on the offensive boards, creating only a few second shot opportunities.

In addition, Holy Cross flexed its defensive muscle, shutting out Bucknell's leading scorer, forward Kim Delfs, in the first half, while causing 13 turnovers.

The Bison finished out the half down 39-27.

The deficit quickly grew larger, as Bucknell gave up six straight points to Holy Cross to start the half. After that the Bison turned up their defensive intensity, but the Crusaders were not to be denied, pulling ahead by 20 with a 12:01 left, and then maintaining that lead until the end. Scoring high points for the Bison Kim Delfs, who came alive in the second half, scoring nine points and pulling down five rebounds to give the Bison a stronger presence inside, and freshman point guard Lori Houck played what might have been her best game of the year, as she netted 16 points and dished out four assists while running the show.

After the game, Coach Simpson was proud of her team's showing against a very powerful Crusader squad. "I think it was a tremendous effort. It's also important to remember that not one starter from last year's team [that beat Holy Cross to win the regular season championship] was playing today," she said.

Bulls' Rodman a "worm" in every sense of the word

Dennis Rodman has quickly become one of the most controversial figures in all of professional sports, and is a radically changed individual from the one that was named Defensive Player of the Year while a Detroit Piston. For all these reasons I think it's about time that I voiced my position on the man (I use this word loosely) with the multi-colored hair.

So let the games begin!

I'm beginning to think that calling Dennis Rodman the "worm" might be the most appropriate nickname in all of professional sports, and not because of Rodman's prowess under the boards. Rodman is slime, and falls in that category of worthless professional athletes along with the infantile Michael brothers—Irvin and Tyson. In fact, one of the reasons I haven't written about Rodman earlier is that I had a difficult time justifying a column on a "man" hardly worth the paper this newspaper is printed on.

So now it would be logical to justify my particularly strong feelings on the self-proclaimed NBA bad-boy.

Commentary

E. J. Crawford
Sports Co-Editor

Much has been made of athletes having to be role-models for America's youth. And although I don't feel athletes should be role models, they are, and Charles Barkley and company need to face up to that.

Dennis Rodman is not a role model.

Hell, Rodman isn't even classy enough to be a role model for a pimp, but it's not because of how he dresses, his hair, his tattoos or his partying at gay-bars.

Rodman is a hypocrite and a loose cannon, with no respect for anyone or anything, and this is why I cannot stand Dennis Rodman. I could care less if he wants to dress in women's clothes, or dye his hair every color of the rainbow, or that he has ordained himself with more "artwork" than the Sistine chapel (I'll bet you never thought I could work the Sistine chapel and Dennis Rodman into the same sentence), or that he frequents gay bars. Rodman's dress, bodywork and sexuality are none of my business, and making them issues only reveals how small-minded some people in our culture still are.

However, Rodman does not do what he does because of personal taste—he does it for effect, and that makes him a screaming hypocrite. Rodman doesn't need to show up at book signings in full dress and make-up, but he does because he knows the press will take his picture, and that people everywhere will talk about him, just as I'm doing now. His tattoos are also a fairly recent phenomenon, and he takes every advantage to show them off, along with his hair, which displays more colors than a Crayola box stuck in a blender. Finally, I do not care if Rodman is gay, but he has stated that he has never so much as kissed another man, and thus is making a mockery of the gay community by traveling to gay bars simply for the effect.

As to the idea of a role model, it is not just Rodman's hypocrisy that I disdain, it is how he conducts himself in the general public. His defiance of team policy, refusal to take part in a huddle and kicking cameramen send a message of abuse, hostility and simply not caring. He is neither a team-player nor a gentleman, and that is a sad message to send to the public.

What might actually be sadder is that Rodman's antics overshadow what is otherwise a great career and basketball player. Dennis Rodman is the premier rebounder of his day, and can at times (translation, if he feels like it) be one of the top defenders in the NBA: He has amassed three championship rings; likely four if he doesn't screw it up. He is not altogether a bad person, as he has done charity work and seems to have a genuine affection for kids, but then why act as he does? Why alienate everyone with his behavior, and in effect send the wrong message to the kids that he supposedly loves?

Rodman displayed none of these inclinations toward disaster when he played with the Pistons, when he still had his competitive streak and ferocious drive, but channeled it into top-flight basketball, no the present top-flight idiocy and antics.

It appears that Dennis Rodman wants everyone to see him as this crazy rebel who won't give into societal pressures and norms. But don't be fooled, Rodman could care less about proving society to be small-minded, or to make a statement against the NBA. Rodman is a smart man, who has built himself quite an image under a veil of hypocrisy and greed—and he knows exactly what he's doing.

Holden, Bison hold off Holy Cross

Junior guard's gutsy 3-pointer thwarts comeback; loss to Navy leaves league title in doubt

BY CHRIS ELLIS
Bucknellian Staff Writer

Jonah Half—The Bucknellian

J.R. Holden '97 used the season's final home game to score 22 points and keep Bucknell in contention for a Patriot League title.

Pop quiz: your team has just had a 24-point lead whittled down to five with less than three minutes remaining. Your opponent is sky-high after winning its past four games and has momentum after making a 31-12 run over the last six minutes. Your starting center has fouled out and your team's confidence is slipping. The game could turn on any mistake, any mental lapse, any bad decision. Time to play conservative, right?

Not if you're J.R. Holden.

Bucknell was clinging desperately to a 62-57 advantage over Holy Cross Tuesday night, and had the ball with just under 2:45 remaining. Holden took the inbound pass, pushed the ball up court, and, with only five seconds off of the shot clock and without a second thought, fired a three pointer from the top of the left arc. Crusaders coach Bill Raynor was already relishing the chance of grabbing the rebound and cutting the lead to two. Holy Cross never got the chance.

Basket Good. Game over. Drive home safely.

The wind fell completely from Holy Cross's sails as Holden's shot touched nothing but twine. The comeback was over, and Bucknell's eventual 71-61 victory improved its record to 8-3 and kept hopes of a league title alive.

"J. R. is the best guard in this league," Ranyor said after the game. "When he's shooting the way he was tonight, he shouldn't have a problem with taking shots like that."

The clutch three-pointer was part of a 22-point, four-assist night for Holden, the third straight game he has topped the 20-point mark.

"Whenever they cut the lead down, J.R. stepped it up big," Bucknell coach Pat Flannery said. "He did everything we asked of him."

In the early going, the game looked as if it would offer no dramatics. Bucknell opened up a lead of 23-9 midway through the first half, and used stifling defense to shut Holy Cross down for most of the half. The Bison recorded 11 steals in the first half alone en route to opening a 36-20 lead.

"Their defense dictated the entire (first) half," Raynor said. "They made us hesitant, and we fell back on our heels."

The second half began in much the same fashion, as Dan Bowen '00 blocked Holy Cross's first two shots and Bucknell opened up a 50-26 lead.

After the advantage swelled to 24, though, Holy Cross made a run of its own. The Crusaders slowly sliced into Bucknell's lead and the Bison seemed almost powerless to stop the bleeding. Center Tom Welch '97 fouled out, and three timeouts couldn't slow Holy Cross down. After the lead shrunk to five, though, Holden took over.

After Holy Cross made the score 60-55, Holden's leading bank shot opened up a seven point advantage. The Crusaders' Jon Kerr came right back, though, making the score 62-57 and setting the stage for Holden's dramatics.

"We were getting impatient and they started feeding off of our bad shots," Holden said. "I was feeling it a little bit in the second half, and took the game upon myself.

Holden wasn't the games only star, though. After getting out-rebounded by a wide margin against Navy on Saturday, Martin Gilliard '99 took it upon himself to turn the tables against Holy Cross. Gilliard grabbed 13 rebounds, including seven offensive rebounds, as Bucknell finished the game with a 43-33 rebounding edge.

"Martin is one of the best athletes on our team," Flannery said, "We go to him whenever we can."

Gordon Mboya '97 also finished with a big game, scoring 18 points and pulling down 11 rebounds in the win. Center Dan Bowen '00 blocked a career-high five shots.

Fishing provides cheap alternative for area thrill-seekers

BY LUKE DAVID
Bucknellian Staff Writer

If you're looking for a break from the campus scene, some time away from the classroom, or a change of scenery to brighten your outlook, you don't have to look very far. Fortunately for Bucknell students, our quietly isolated campus is in the backyard of one of the country's best fishing rivers. Not only is the Susquehanna among the elite rivers in the country, it is also one of the area's best kept secrets.

For those anglers who seek walleye, muskellunge, trout, catfish or carp—all fish that can be caught in the Susquehanna—it will come as something of a disappointment to learn that all of these fish take a back seat to the smallmouth bass. It is this fish that has given the Susquehanna the reputation as one of the best in the states.

According to Laris Sauers, a guide who has been working the river for over 15 years, the Susquehanna "is in the top five rivers in the country for smallmouth." Although bass fishing trips are not the only trips that Sauers takes, they are among the most eventful. On a good day in September, Sauers and his clients have been known to land over 100 fish.

And Sauers is not alone in his feeling that this river is special. Jan Peterson of the Campus Cycle and Fly Fishing Center feels that "it's one of the best rivers available."

For Jason Foura '97, an area native who has been fishing the river for over ten years, "the Susquehanna is to bass fisherman what Killington is to skiers."

Not only the river itself, but also tributaries like the Juniata River and the lower part of Penn's Creek are highly acclaimed for their smallmouth production. Areas like Liverpool, Duncannon and Harrisburg are the hottest spots on the river, although trophy-sized fish can be pulled out in Lewisburg, Sunbury and Northumberland.

Although June, September and October are the very best months on the river, other times of the year can be productive depending on water temperature. Beginning in early Spring, anglers roam the river banks in hopes of landing another record.

The first thing that a potential river rat will need is a license. Unless you want to risk a run-in with the game warden, an event that is not unknown to this author, you will have to shell out the $35 for a license at Wal-Mart (the cost is only $17 for PA residents).

If you want to begin fishing in the spring, a boat or a good pair of waders is also needed. The water in the fall is warm enough that waders really aren't necessary.

As far as tackle is concerned, smallmouth have been known to hit on a number of things. Grubs, spinner baits, rattle-traps and crank baits are all effective as well as a multitude of live baits. The most important thing is to establish a few hotspots that can be tried when one area is not giving the desired results.

If you really want to attack the Susquehanna and learn about what it has to offer, the best thing to do is to call an expert like Sauers and make an appointment. A day on the river will cost about as much as a day of skiing and all equipment will be provided.

It's possible that fishermen have such good luck on the Susquehanna because there are few who know how truly great it is. Perhaps most people would rather spend a day at the mall or in an overpriced movie theater, and that's fine if that makes them happy.

But for those who would rather spend the day catching some of the country's best smallmouth ...shhh.

"Patty" Bouasanouvong nears the completion of her dancing marathon. She was one of 32 people who succeeded in dancing for the entire 24 hours of the SAMS Dance Marathon, held last Friday and Saturday in the Bison. The annual event, which raises money for the National Society for Multiple Sclerosis, raised over $3600 this year through donations, pledges, raffles and groups sponsoring hours in the Marathon. In the competition between sponsoring organizations for money raised and dancers participating, first place was taken by Alpha Phi Omega, second by Ultimate Frisbee and third, Kappa Alpha Theta.

BYOB policy spilled on sidewalks

Baker addresses misconceptions about IFC policy spread by rumors and "chalk talk"

BY KATHRYN ARDINGER
Bucknellian Staff Writer

Campus walkways have been getting the brunt of student discontent, as students have resorted to "chalk talk" to express their views about the enforcement of a BYOB policy that has been on the books since 1991.

The power of rumors has generated widespread misconception among students about what is actually happening. Roy Baker, assistant dean of students, confirmed Tuesday in an interview that "there has been no change in policy at all."

"A lot of people are not familiar with the policies and so they perceive it as a change when it is really not," Baker said.

He also confirmed that "President Adams has nothing to do with this."

Baker, who has been at the University for three months, has explained to the Interfraternity Council, as well as to eight fraternities and two sororities that "We have a lot of policies on paper and it's apparent we do not follow them."

In the hopes of spurning some conversations among Greeks about how they control alcohol at their parties, Baker said, "We have to either follow these policies [that already exist] or change them and come up with another plan."

"If we have a policy that we create and we don't enforce it and everybody knows that we're not enforcing it, then we have no credibility," he continued.

Baker said that he "knows the enforcement of the policy won't change overnight" and that he doesn't expect it to.

"Whatever is going on right now, I look at positively—We're talking about the issues. That's what I asked for from day one. I didn't ask for immediate change," Baker said.

"I guess it's unfortunate that anyone would view my request that we take a look at this issue as a threat to our existence," he said.

He explained that his approach has been: "If you don't address this problem and someone gets killed or hurt, someone will address it for us. And we do not want that to happen."

He uses the analogy "we're a powder keg getting ready to blow, because we're serving alcohol to the underage."

People take the stance that "it's not going to happen to us," Baker said.

He acknowledged numerous arguments against BYOB that he has heard from Greeks. For instance, "if we don't serve alcohol, there will be more drinking in the dorms. It will push the parties down town."

Other responses have been "if we don't maintain the status quo, it will hurt rush."

He said, however, these reasons "do not justify us breaking the law."

Providing the background that surrounds the creation of the policy, Baker explained that "in 1989, the Faculty voted to eliminate the Greek System at Bucknell University."

In response, the University Board of Trustees created TIP, Trustee Implementation Plan, which consisted of several policies that would govern the Greek system. The Risk Management Policy, otherwise known as the BYOB policy was instituted by IFC in response to the TIP recommendation, Baker said.

College alcohol policies compared

BY BETH MARTIN
Bucknellian Staff Writer

Although universities in Pennsylvania have various policies regarding BYOB at registered fraternity parties and the provision of alcohol at university-sponsored events, Bucknell's alcohol policy and the degree to which it is enforced is generally stricter than the following Pennsylvania schools:

Lehigh University: Lehigh does not mandate that registered social functions have a BYOB policy, although the adoption of this policy is under discussion by its Interfraternity Council and Panhellenic Council. According to Lehigh's alcohol policy in its "University Rules and Guidelines," at those social functions where alcohol is provided by the party's host, a second location, separate from the main party room, is the only place where alcoholic beverages may be served. A student must check identifications and stamp the hands of those 21 years of age and older. At least two students monitor the flow of people into and out of the barroom. The only acceptable form of ID is a Lehigh ID, and bartenders may serve an individual only one drink at a time. Hosts must ensure that no one under the age of 21 possesses or consumes alcohol at the party.

For events specifically designated BYOB, only those of legal age are permitted to bring alcoholic beverages.

Lehigh's alcohol policy does not mention whether the univer-

New chaplain to be installed on Sunday

Bucknellian Staff Writer

Reverend Ian Oliver will be installed as University chaplain this Sunday afternoon.

The event, as Oliver stated, "is not only a ceremony to celebrate my installation, but a ceremony to recognize the strengthening of our religious community."

Besides the installation of Oliver, the service will include a performance by the Rooke Chapel Choir and the Rooke Chapel Ringers under the direction of William Payn.

President William D. Adams will officiate this service. Representatives of the Rooke Chapel congregation, the First Baptist Church of Lewisburg, the Bucknell student body and other congregations will also be in attendance at the service.

The day will conclude with a concert performance of Zoltan Kodaly's "Missa Brevis" at 7:30 p.m. in Rooke Chapel. Both events are open to the public free of charge.

A graduate of Amherst College and the University of Chicago Divinity School, Oliver spent his last six years teaching high school students in southern India. From this experience, Oliver said that "he had the opportunity to observe different religious groups and also got a different perspective of American life."

Yet, after six fruitful years in India, Oliver felt the need to come home. "I've always wanted to be a college chaplain. It was time to come home; my family wanted me to be in the States. I wanted to find a small college community where I could be a successful college chaplain."

In searching for a small college community to work in, Oliver found Bucknell to be the perfect setting for him. "Bucknell University is ideal for me. It has a strong academic reputation and it is a small community. I believe that there is a strong combination between intellectual growth and spiritual growth. Bucknell has a lot of room for growth in both areas."

Oliver's first goal at the University is to meet as many students as he can. "I want to spend my first year listening. I want to meet as many people as I can, go to all sports events," he said. Oliver believes that knowing as many peo-

Wrestling program under investigation

The University's star wrestler has not been permitted to compete in his sport since the first match of the season last November, the result of an inquiry into a potential violation of NCAA rules in the wrestling program.

Unconfirmed reports have claimed that Mike Garcia '98 has received some type of illegal funding. However neither Garcia nor the University is able to address the question at this time due to the present investigation of the situation.

University officials have not allowed Mike Garcia '98 to compete in wrestling matches since the end of last semester when they initiated his suspension and an official inquiry into the situation. With one match left of the regular season, it is still up in the air whether or not Garcia will be back this season.

"I think it's really unfortunate that Mike Garcia was suspended without even being charged or being able to present his side of the case," said Tom Rivoire '72, president of the Grapplers Club, a support group for the University's wrestling program. "Mike hasn't formally been charged. Mike should be accused of specific wrongdoings and given the opportunity to defend himself in front of neutral-fact finders."

"This is a case of clear-cut discrimination" because Garcia is from a "disadvantaged, minority background and not part of the upper middle class," Rivoire said.

Barry Maxwell, vice president for administration, Rick Hartzell, director of physical education and athletics, and Elias Abelson, general counsel, suspended Garcia after receiving information suggesting a potential violation. Maxwell was unable to disclose the source of information, but he did say that the NCAA was contacted in order to develop a strategy to deal with the situation.

Maxwell said that the NCAA recommended an inquiry into the case and that the University decided for reasons of objectivity and fairness to solicit the services of outside investigators.

The law firm Stier, Anderson and Malone, headquartered in Washington D.C., is conducting the investigation. Maxwell said that the agency has completed the interviews and is currently compiling the report. Following the receipt of the report, it will be the University's responsibility to conclude the matter.

Maxwell expects to have the report soon, but could not predict how long the ensuing procedures would take. Likely University figures to be a part of the process are Maxwell, Hartzell, President William D. Adams and Abelson.

To Maxwell's knowledge, no other inquiries like this have been made at the University, although he has only been working with

IFC reaches no decision on BYOB

Fraternities to draw up alternate proposals; until then, IFC says abide by BYOB policy

BY KATHRYN ARDINGER
Bucknellian Staff Writer

The BYOB policy and alternative ideas were tossed around at Tuesday night's IFC meeting. However, having made no definite decisions, the meeting closed with a vote to have each fraternity collectively devise a proposal and submit it for discussion at next Tuesday's IFC meeting.

Held in the Terrace Room, the hour and twenty minute meeting was packed with curious and concerned students who openly voiced their opinions.

Roy Baker, assistant dean of students said, "There has been no formal change. There's nothing to change. You already have a policy. The question is are you going to enforce it?"

Baker has suggested that Greeks begin to discuss the issue of how fraternities control alcohol at their parties. IFC has not taken an official vote on the BYOB policy and is looking at other alternatives.

Thus far, there has been no mandate requiring fraternities to try out the policy. "I know that each and every one of you understands the problem—it's the law... I really applaud those chapters who have tried [the BYOB policy]."

Kappa Sigma tried out the BYOB policy at their registered party last Saturday.

"We had more people show up really drunk than we've ever had show up before that we had to escort home. We had a couple incidents of underage people trying to sneak different types of alcohol in. Other than that kind of stuff we performed admirably well. All the brothers did what they needed to do and we pulled it off," said Robert Griffin '97, president of Kappa Sigma.

As for how fraternities are to proceed and what guidelines they should adhere to until a decision is made by IFC, "The policy on the books is BYOB. If you do not follow BYOB, you face the consequences when the Greek Monitoring Team comes through," said Vincent Magyar '98, president of IFC at Tuesday's meeting.

As for problems with GMT this semester, IFC and Baker have devised a solution to address the situation. A list of Greek monitors who will be on duty Wednesday, Friday and Saturday nights of each

Bucknellian Staff Writer

Campus walkways have been getting the brunt of student discontent, as students have resorted to "chalk talk" to express their views about the enforcement of a BYOB policy that has been on the books since 1991.

The power of rumors has generated widespread misconception among students about what is actually happening. Roy Baker, assistant dean of students, confirmed Tuesday in an interview that "there has been no change in policy at all."

"A lot of people are not familiar with the policies and so they perceive it as a change when it is really not," Baker said.

He also confirmed that "President Adams has nothing to do with this."

Baker, who has been at the University for three months, has explained to the Interfraternity Council, as well as to eight fraternities and two sororities that "We have a lot of policies on paper and it's apparent we do not follow them."

In the hopes of spurning some conversations among Greeks about how they control alcohol at their parties, Baker said, "We have to either follow these policies [that already exist] or change them and come up with another plan."

"If we have a policy that we create and we don't enforce it and everybody knows that we're not enforcing it, then we have no credibility," he continued.

Baker said that he "knows the enforcement of the policy won't change overnight" and that he doesn't expect it to.

"Whatever is going on right now, I look at positively—We're talking about the issues. That's what I asked for from day one. I didn't ask for immediate change," Baker said.

"I guess it's unfortunate that anyone would view my request that we take a look at this issue as a threat to our existence," he said.

He explained that his approach has been: "If you don't address this problem and someone gets killed or hurt, someone will address it for us. And we do not want that to happen."

He uses the analogy "we're a powder keg getting ready to blow, because we're serving alcohol to the underage."

People take the stance that "it's not going to happen to us," Baker said.

He acknowledged numerous arguments against BYOB that he has heard from Greeks. For instance, "if we don't serve alcohol, there will be more drinking in the dorms. It will push the parties down town."

Other responses have been "if we don't maintain the status quo, it will hurt rush."

He said, however, these reasons "do not justify us breaking the law."

Providing the background that surrounds the creation of the policy, Baker explained that "in 1989, the Faculty voted to eliminate the Greek System at Bucknell University."

In response, the University Board of Trustees created TIP, Trustee Implementation Plan, which consisted of several policies that would govern the Greek system. The Risk Management Policy, otherwise known as the BYOB policy was instituted by IFC in response to the TIP recommendation, Baker said.

College alcohol policies compared

BY BETH MARTIN

Bucknellian Staff Writer

Although universities in Pennsylvania have various policies regarding BYOB at registered fraternity parties and the provision of alcohol at university-sponsored events, Bucknell's alcohol policy and the degree to which it is enforced is generally stricter than the following Pennsylvania schools:

Lehigh University: Lehigh does not mandate that registered social functions have a BYOB policy, although the adoption of this policy is under discussion by its Interfraternity Council and Panhellenic Council. According to Lehigh's alcohol policy in its "University Rules and Guidelines," at those social functions where alcohol is provided by the party's host, a second location, separate from the main party room, is the only place where alcoholic beverages may be served. A student must check identifications and stamp the hands of those 21 years of age and older. At least two students monitor the flow of people into and out of the barroom. The only acceptable form of ID is a Lehigh ID, and bartenders may serve an individual only one drink at a time. Hosts must ensure that no one under the age of 21 possesses or consumes alcohol at the party.

For events specifically designated BYOB, only those of legal age are permitted to bring alcoholic beverages.

Lehigh's alcohol policy does not mention whether the univer-

New chaplain to be installed on Sunday

BY ARGUN ULGEN

Reverend Ian Oliver will be installed as University chaplain this Sunday afternoon.

The event, as Oliver stated, "is not only a ceremony to celebrate my installation, but a ceremony to recognize the strengthening of our religious community."

Besides the installation of Oliver, the service will include a performance by the Rooke Chapel Choir and the Rooke Chapel Ringers under the direction of William Payn.

President William D. Adams will officiate this service. Representatives of the Rooke Chapel congregation, the First Baptist Church of Lewisburg, the Bucknell student body and other congregations will also be in attendance at the service.

The day will conclude with a concert performance of Zoltan Kodaly's "Missa Brevis" at 7:30 p.m. in Rooke Chapel. Both events are open to the public free of charge.

A graduate of Amherst College and the University of Chicago Divinity School, Oliver spent his last six years teaching high school students in southern India. From this experience, Oliver said that "he had the opportunity to observe different religious groups and also got a different perspective of American life."

Yet, after six fruitful years in India, Oliver felt the need to come home. "I've always wanted to be a college chaplain. It was time to come home; my family wanted me to be in the States. I wanted to find a small college community where I could be a successful college chaplain."

In searching for a small college community to work in, Oliver found Bucknell to be the perfect setting for him. "Bucknell University is ideal for me. It has a strong academic reputation and it is a small community. I believe that there is a strong combination between intellectual growth and spiritual growth. Bucknell has a lot of room for growth in both areas."

Oliver's first goal at the University is to meet as many students as he can. "I want to spend my first year listening. I want to meet as many people as I can, go to all sports events," he said. Oliver believes that knowing as many peo-

Wrestling program under investigation

The University's star wrestler has not been permitted to compete in his sport since the first match of the season last November, the result of an inquiry into a potential violation of NCAA rules in the wrestling program.

Unconfirmed reports have claimed that Mike Garcia '98 has received some type of illegal funding. However neither Garcia nor the University is able to address the question at this time due to the present investigation of the situation.

University officials have not allowed Mike Garcia '98 to compete in wrestling matches since the end of last semester when they initiated his suspension and an official inquiry into the situation. With one match left of the regular season, it is still up in the air whether or not Garcia will be back this season.

"I think it's really unfortunate that Mike Garcia was suspended without even being charged or being able to present his side of the case," said Tom Rivoire '72, president of the Grapplers Club, a support group for the University's wrestling program. "Mike hasn't formally been charged. Mike should be accused of specific wrongdoings and given the opportunity to defend himself in front of neutral-fact finders."

"This is a case of clear-cut discrimination" because Garcia is from a "disadvantaged, minority background and not part of the upper middle class," Rivoire said.

Barry Maxwell, vice president for administration, Rick Hartzell, director of physical education and athletics, and Elias Abelson, general counsel, suspended Garcia after receiving information suggesting a potential violation. Maxwell was unable to disclose the source of information, but he did say that the NCAA was contacted in order to develop a strategy to deal with the situation.

Maxwell said that the NCAA recommended an inquiry into the case and that the University decided for reasons of objectivity and fairness to solicit the services of outside investigators.

The law firm Stier, Anderson and Malone, headquartered in Washington D.C., is conducting the investigation. Maxwell said that the agency has completed the interviews and is currently compiling the report. Following the receipt of the report, it will be the University's responsibility to conclude the matter.

Maxwell expects to have the report soon, but could not predict how long the ensuing procedures would take. Likely University figures to be a part of the process are Maxwell, Hartzell, President William D. Adams and Abelson.

To Maxwell's knowledge, no other inquiries like this have been made at the University, although he has only been working with

IFC reaches no decision on BYOB

Fraternities to draw up alternate proposals; until then, IFC says abide by BYOB policy

BY KATHRYN ARDINGER

Bucknellian Staff Writer

The BYOB policy and alternative ideas were tossed around at Tuesday night's IFC meeting. However, having made no definite decisions, the meeting closed with a vote to have each fraternity collectively devise a proposal and submit it for discussion at next Tuesday's IFC meeting.

Held in the Terrace Room, the hour and twenty minute meeting was packed with curious and concerned students who openly voiced their opinions.

Roy Baker, assistant dean of students said, "There has been no formal change. There's nothing to change. You already have a policy. The question is are you going to enforce it?"

Baker has suggested that Greeks begin to discuss the issue of how fraternities control alcohol at their parties. IFC has not taken an official vote on the BYOB policy and is looking at other alternatives.

Thus far, there has been no mandate requiring fraternities to try out the policy. "I know that each and every one of you understands the problem—it's the law... I really applaud those chapters who have tried [the BYOB policy]."

Kappa Sigma tried out the BYOB policy at their registered party last Saturday.

"We had more people show up really drunk than we've ever had show up before that we had to escort home. We had a couple incidents of underage people trying to sneak different types of alcohol in. Other than that kind of stuff we performed admirably well. All the brothers did what they needed to do and we pulled it off," said Robert Griffin '97, president of Kappa Sigma.

As for how fraternities are to proceed and what guidelines they should adhere to until a decision is made by IFC, "The policy on the books is BYOB. If you do not follow BYOB, you face the consequences when the Greek Monitoring Team comes through," said Vincent Magyar '98, president of IFC at Tuesday's meeting.

As for problems with GMT this semester, IFC and Baker have devised a solution to address the situation. A list of Greek monitors who will be on duty Wednesday, Friday and Saturday nights of each

Rumors that alumni giving has dropped because of new alcohol policy prove false

By Beth Martin

Bucknellian Staff Writer

Despite rumors that the University's Annual Giving Department has suffered financial losses due to President William "Bro" Adams' unpopular decision to revise the University Alcohol Policy, the office expects to have raised a record-breaking amount of money by the close of the 1996-1997 fiscal year.

Although a petition circulating among the senior class threatens that those signing will revoke their pledge to the Senior Class's Annual Gift Drive, no action has been taken yet according to Robert Caldwell, director of annual giving.

Caldwell said, "We've heard of a petition, but we haven't seen any evidence of it here."

He said that two seniors did call asking to withdraw their pledges. However, "one hung up when we asked for his name, and the other gave an erroneous name. We couldn't find any record of the name anywhere."

Caldwell said, "I feel for students and how they must be feeling, and I sympathize, but we've seen no specific action taken by them."

Caldwell said alumni have shown "no negative response" in reaction to the new alcohol policy. Rather, "Bro's interaction with alumni is positive. Nobody has made any communication that has said otherwise," said Caldwell.

Robert Gaines, manager of development communications, said in the 1995-1996 fiscal year 38 percent of alumni donated money for a total of $8.8 million, "a modern record." He doesn't expect that the percentage will decrease by the end of this fiscal year.

The University has raised over $76 million so far towards its comprehensive campaign goal to raise $150 million in four years, according to Gaines.

Caldwell confirmed the campaign's success, "We've raised about 50 percent in receipts and future commitments."

The University has raised record-breaking amounts of money in the past several years. In the 1995-1996 fiscal year the University raised $13.64 million, a 1.5 percent increase from the $13.43 million raised in the previous year. The 1993-1994 fiscal year also saw an 82 percent increase from the $7.5 million raised in 1993-1994. These figures do not include pledges made to the University that had not been paid by the end of each fiscal year.

Percentage of alumni donating to the University has also increased from 32 percent in 1993-1994 to 36 percent in 1994-1995 and to 38 percent in 1995-1996.

Gaines attributes some of these increases to the active fundraising efforts made by Adams, since he was inaugurated as president in November 1995. "He's very active in fundraising. He spends a lot of time fundraising," said Gaines.

Corrections

There were two errors in the article entitled "Campus Mourns Death of a Coach" by E.J. Crawford and Brett Tomlinson published in the Feb. 20 issue. Peggy O'Connor's father Fred Prender died of a heart-attack in 1975 and thus was never Michael O'Connor's father-in-law. The article was also erroneous in that it misstated Prender's name.

REVEREND

ple as possible is the key to helping build a strong religious community at Bucknell.

Oliver, in his second semester at the University, has had many positive impressions. He has been "very impressed by the spirituality of students at Bucknell. I want to provide more and more students with the opportunity to express themselves as individuals," he said.

On the other hand, Oliver wants to work on improving some aspects of the school. "Students are going to have to get used to the idea of more diversity. We need to educate students on how to be sensitive to all cultures and religions. We need to prepare them to make adjustments towards changes in the global community. This sensitivity will become very practical when they go out into the job market," he said.

Oliver said his job is to "facilitate all aspects of religious life at the University." He intends to pay attention to students of various religious backgrounds in order to create a sense of a well-knit religious community.

Oliver also intends to answer such questions as, "Are students repressed at Bucknell? Are they content socially? Academically?"

The installation ceremony will take place 2:30 p.m. Sunday in Rooke Chapel.

PUBLIC SAFETY LOG

February 19, 1997

LARCENY— A University student reported to a Public Safety Officer that a portable CD player and compact disk were taken while the student was away from a study carrel in the library. The incident remains under investigation.

ACCIDENT— A University student reported to a Public Safety Officer that unknown person(s) scratched the driver's side door of the vehicle.

February 20, 1997

INFORMATION— A University Professor reported to a Public Safety Officer that unknown occupants of a truck yelled a racial slur at the professor as they passed in their vehicle. A report has also been filed with East Buffalo Township Police Department and a "Be On The Lookout For" (BOLO) was issued on the vehicle.

ASSIST LOCAL POLICE/MISSING PERSON— A Public Safety Officer assisted East Buffalo Township Police Department in an attempt to locate a missing person on University property. The individual was later located in Lewisburg.

February 21, 1997

UNIVERSITY PROPERTY DAMAGE/BROKEN WINDOW— A Public Safety Officer responded to Hulley House for the report of a window broken by a ball. The perpetrator took responsibility for the damage and the window was repaired.

STUDENT HEALTH SERVICE TRANSPORT— A Public Safety Officer responded to the Langone Center for the report of an ill University student. A Student Health Service driver transported the student to Evangelical Hospital Emergency Room for treatment.

February 22, 1997

STUDENT HEALTH SERVICE TRANSPORT— A Public Safety Officer responded to Smith Hall for the report of an ill student. A Student Health Service driver transported the victim to Evangelical Hospital Emergency Room for treatment.

MEDICAL ASSIST— A Public Safety Officer transported a University student from the Langone Center to Student Health Services for treatment of an injury sustained while walking to the LC.

LARCENY/BICYCLE— A University student reported that unknown person(s) had removed a bicycle from the exterior of a Bucknell West Mod. The incident was reported to East Buffalo Township Police Department and remains under investigation.

ASSIST LOCAL POLICE DEPARTMENT— A Public Safety Officer responded to Swartz Hall to escort a University student to the dorm room to secure identification. The student was cited by Lewisburg Police Department for an open container violation.

February 23, 1997

ASSIST LOCAL POLICE— A Public Safety Officer assisted the Lewisburg Police Department and the East Buffalo Township Police Department in locating a University student who was observed on S. 6th St. carrying an open container of beer. The student was cited for underage consumption, public drunkenness and ordinance violations.

TAMPERING WITH FIRE EQUIPMENT— A Public Safety Officer responded to Vedder Hall on a fire alarm activation which was caused by discharging a fire extinguisher. The University student that was responsible was later located and charged.

VANDALISM/TAMPERING WITH FIRE EQUIPMENT— A Public Safety Officer responded to Vedder Hall for a fire alarm activation which was caused by discharging a fire extinguisher.

TAMPERING WITH FIRE EQUIPMENT— A Public Safety Officer responded to a University West Mod for a fire alarm activation caused by discharging a fire extinguisher. The incident remains under investigation.

ASSIST LOCAL POLICE — A Public Safety Officer responded to Lewisburg Borough to assist the Lewisburg Police Department with an unconscious University student. The student was transported to Evangelical Hospital Emergency Room for treatment and will be cited for public drunkenness.

INFORMATION— A University student reported receiving phone calls that served no legitimate purpose. A phone trap has been placed on the line.

LARCENY— A University student reported to a Public Safety Officer that a license plate was removed from the vehicle while it was parked in the Farm Lot. The incident remains under investigation.

February 24, 1997

INFORMATION— A Public Safety Officer received a report regarding concern for the whereabouts of a University professor. An East Buffalo Township Police Officer later reported that the individual was located.

MINOR VEHICLE ACCIDENT— A Public Safety Officer responded to Vaughan Lit Road for the report of damage to a parked vehicle, sustained when a University student attempted to reverse direction of the vehicle that he was operating.

HARASSMENT BY COMMUNICATION— A University student reported to a Public Safety Officer having received harassing telephone calls and electronic mail messages. The incident remains under investigation.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

News Briefs

National News

Clinton OK'd using White House For Contributors

WASHINGTON — President Bill Clinton himself gave the go-ahead to invite political supporters to spend the night at the White House, and said there was nothing wrong with it.

"I did not have any strangers here," Clinton told reporters today. "The Lincoln Bedroom was never sold... the facts will show what the truth is." Clinton, who was asked about the White House sleepovers during a drug control briefing, said that in early 1995, friends who helped get him elected in 1992 thought he had not kept in touch.

Clinton said then-national campaign fund-raiser Terence McAuliffe sent him a memorandum, suggesting what they ought to do to re-establish contact, and Clinton said he told him to proceed.

Clinton said he also told an aide he wanted to ask some of his friends to come to the White House and spend the night.

The White House released more than 500 pages of documents, and Clinton said the information would show he did nothing unethical.

Atlanta mayor offers $10,000 in nightclub bombing

ATLANTA — Atlanta Mayor Bill Campbell yesterday announced a reward of $10,000 for information leading to a conviction in the bombing of a nightclub Friday night, the fourth Atlanta explosion in seven months.

One person was injured in the blast at The Otherside Lounge, a midtown Atlanta bar that caters to a largely gay and lesbian clientele.

Federal investigators also are looking into a double bombing last month at a suburban Atlanta family planning clinic where abortions are performed, and at the July explosion that killed one and injured more than 100 in Centennial Olympic Park.

Almost anyone can purchase dynamite, the use of which is being investigated by the ATF with respect to the most recent bombing, but customers must swear in writing that they are not undocumented immigrants and have no felony convictions. In addition, the buyer must swear not to be addicted to any controlled substance and to be mentally stable.

Study: 'Don't ask, don't tell' policy not working

NEW YORK — Citing a study by a legal aid organization, the New York Times reported yesterday that 850 men and women were discharged from the military for homosexuality during a one-year period that ends this month, which is a significant rise since the implementation of President Clinton's 'don't ask, don't tell' policy.

That figure represents an 18 percent increase over the previous year and a 42 percent increase from 1994, the year in which the policy, a compromise with conservative legislators who wanted a total ban on gay and lesbian servicemembers, was put into effect.

"The reality of 'don't ask, don't tell, don't pursue' has been anything but humane, as many commanders have continued to ask, pursue and harass suspected gay service members with impunity," said the report by the Servicemembers Legal Defense Network, which provides legal aid to troops accused of homosexuality.

The authors of the report, which was made public yesterday, suggested that controversy over the policy has resulted in an anti-gay backlash in the military that has in turn resulted in witch hunts.

Army knew about Gulf War chemical weapons depot

WASHINGTON — Senior Army officers fighting the Gulf War suspected in February 1991 that an Iraqi weapons depot contained chemical weapons but failed to alert U.S. troops who blew up the site less than two weeks later, the Pentagon acknowledged Tuesday.

The information is contained in a still-classified document, according to Bernard Rostker, the Pentagon's senior investigator into Gulf War matters. He has asked the CIA to declassify the memo, but the request has been denied because it would disclose "sources and methods" on how the information was obtained, Rostker told reporters at a Pentagon briefing.

Last June, the Pentagon announced that it had only recently learned that U.S. troops may have been exposed to chemical weapons during the destruction of the site. However, Rostker's new report makes it clear that information existed even before the war was concluded on February 28, 1991 and that the Army suspected chemical weapons were at Kamisiyah.

On Capitol Hill, senators who have been critical of the Pentagon's handling of unexplained illnesses among Gulf War veterans said the new report adds weight to suspicions of a government cover-up.

World News

China says Deng will is a fake

HONG KONG — China has denied a report in Hong Kong newspapers that senior leader Deng Xiaoping left a will apologizing for the 1989 crackdown against pro-democracy protesters in Beijing's Tiananmen Square.

Two Hong Kong newspapers reported there was such a will but gave no sources. The reports said Deng expressed remorse about the shooting of students during the military crackdown and that he apologized to families of the dead and to the people of China.

A copy of the purported will, which was dated Sept. 12, 1996, was also sent to international journalists in China.

A Chinese government spokesman in Hong Kong said yesterday that "the so-called Deng Xiaoping will, reported on by some media in Hong Kong and overseas, is a fabrication by some elements of the 'democracy movement' in the United States who sent it to the media."

Deng, who died a week ago, was in power when tanks were sent in to crush a student-led democracy movement in Tiananmen Square on June 3-4, 1989. He later thanked the army, and never publicly expressed any misgivings about the crackdown.

Seoul, Beijing resume contact over Korean defector

BEIJING — Contacts between Beijing and Seoul over the fate of the highest ranking North Korean official to flee the country resumed yesterday after being stalled by the death of Deng Xiaoping, South Korean officials said.

Pyongyang's top ideological theoretician, Hwang Jang Yop, has been stranded in Seoul's embassy in Beijing since he plunged ties between China and the two rival Koreas into crisis by seeking asylum there on February 12.

Deng's death last week put negotiations over Hwang's fate largely on hold, officials said, but six days of mourning for the Chinese patriarch ended with his funeral on Tuesday.

"Contacts between Seoul and Beijing have resumed, but so far no important developments have been reported," South Korean Foreign Ministry spokesman Lee Kyu-hyung said in Seoul.

Officials of Seoul's Beijing embassy were unable to comment on whether formal negotiations over Hwang's fate had restarted, but said Deng's cremation and funeral had slowed contacts.

Fear of Riots in Jerusalem over housing project

JERUSALEM — Israel yesterday approved construction of a new Jewish neighborhood in Arab East Jerusalem despite international protests and warnings of Palestinian violence.

Security was increased in Jerusalem and the West Bank ahead of the decision by a ministerial committee.

It approved a first-stage plan to build 2,600 homes for Jews at Jabal Abu Ghenaim, called Har Homa by Israel. Another 3,000 housing units would be built for Palestinians in Jerusalem.

Palestinians claim the eastern sector of Jerusalem as a future capital and fear Har Homa would cut off Arab sections of Jerusalem from the West Bank. Two-thirds of the land appropriated by the government for the project belonged to Jews and one-third to Palestinians.

"There is an immense housing shortage in Jerusalem," Israeli Prime Minister Benjamin Netanyahu said in defense of the plan.

Syria warned Israel yesterday that a decision to build a Jewish neighborhood in Arab East Jerusalem would be a "declaration of war" against Arabs and the Middle East peace process.

World's oldest person celebrates 122nd birthday

ARLES, France — Last year, she celebrated her 121st birthday by recording a rap CD. This year, Jeanne Calment, believed to be the world's oldest living person, will whoop it up on the Internet.

Chocolates and a cake full of candles were in store for her birthday party last Friday, a more low-key event than last's year fete, when the release of her CD, "Time's Mistress," sparked a media circus. On the CD, she recounts her memories to a musical background of rap, techno and farandole, a regional dance tune dating to the Middle Ages.

Calment may be blind, nearly deaf and in a wheelchair, but her mind and wit remain sharp. Recently, after being shown how to use a computer, she set up her own Web site, with help from the Ipsen Foundation.

Two years ago, her doctor persuaded her to give up smoking, and she no longer indulges in a Sunday glass of port wine.

National and World News Briefs compiled by Anna Foca from the CNN Interactive Website

ALCOHOL

from page 1

sity may distribute alcohol at university-sponsored events.

Lafayette College: According to Dr. Kissiah, dean of students, Lafayette does have a BYOB policy at registered social functions. When asked if the policy is successful, Kissiah responded "We like to think so. We've occasionally found a fraternity not following the policy, and they were disciplined accordingly."

Lafayette does not serve alcohol at university-sponsored events, except at certain graduation parties, such as "100 Days, 100 Nights" and other Senior Week events. Only seniors who are 21 will be served alcohol at these events.

Dickinson College: Adrian Bailey, spokesperson for the college, said that Dickinson has no BYOB policy, but most of its fraternities and sororities have individual BYOB policies imposed by their national charters. The two local Greek organizations on campus must register social events where alcohol is served and must check IDs of those attending. Those guests over 21 are given a wristband or hand stamp in order to obtain alcohol at the event.

At university sponsored graduation events alcohol may be served. However, the university must register the event in the same manner as any other social organization on campus. The campus security monitors the event in order to ensure that nobody under 21 receives alcohol. Only seniors are allowed to attend, so there is "an inherent check and balance" since almost every senior is of age. Seniors must present ID at these events, and those under 21 will not receive alcohol.

Susquehanna University: According to "Policies and Regulations Concerning Student Life," Susquehanna does not have a BYOB policy. Sororities may serve alcohol in private rooms, in accordance with national sorority policies. Fraternities are allowed to have alcoholic beverages at closed/private events if they meet certain guidelines. Such guidelines include a designated area in accordance with university policy, proper registration and monitoring of the event by qualified persons.

Regardless of location, no alcohol may be served at any campus event open to all students. The policy makes no reference to whether alcohol is permitted at graduation events.

WRESTLING

from page 1

athletics for a short time. He did point out that this type of procedure is not at all uncommon at other universities.

Although only one wrestler has been suspended, Maxwell said the rules violation investigation embraces the entire wrestling program. Bob Ferraro, coach of the wrestling team, said "I'm not real clear on the details myself" of why Garcia is the only one suspended when the whole program is under investigation.

Hartzell said he is unable to comment because the inquiry is not yet complete.

"We try to respond to questions without providing much information because it's premature. The position we've taken is that we have no comment," Maxwell said.

"These are matters that are normally not publicized," Maxwell said in response to a question about why the inquiry has been kept quiet.

Garcia was Bucknell's top wrestler last year, only a year after returning from knee surgery, and was nearly an All-American. Garcia advanced into the quarterfinals of last year's NCAA tournament before dropping a closely-contested match by one point.

Despite rumors that the University's Annual Giving Department has suffered financial losses due to President William "Bro" Adams' unpopular decision to revise the University Alcohol Policy, the office expects to have raised a record-breaking amount of money by the close of the 1996-1997 fiscal year.

Although a petition circulating among the senior class threatens that those signing will revoke their pledge to the Senior Class's Annual Gift Drive, no action has been taken yet according to Robert Caldwell, director of annual giving.

Caldwell said, "We've heard of a petition, but we haven't seen any evidence of it here."

He said that two seniors did call asking to withdraw their pledges. However, "one hung up when we asked for his name, and the other gave an erroneous name. We couldn't find any record of the name anywhere."

Caldwell said, "I feel for students and how they must be feeling, and I sympathize, but we've seen no specific action taken by them."

Caldwell said alumni have shown "no negative response" in reaction to the new alcohol policy. Rather, "Bro's interaction with alumni is positive. Nobody has made any communication that has said otherwise," said Caldwell.

Robert Gaines, manager of development communications, said in the 1995-1996 fiscal year 38 percent of alumni donated money for a total of $8.8 million, "a modern record." He doesn't expect that the percentage will decrease by the end of this fiscal year.

The University has raised over $76 million so far towards its comprehensive campaign goal to raise $150 million in four years, according to Gaines.

Caldwell confirmed the campaign's success, "We've raised about 50 percent in receipts and future commitments."

The University has raised record-breaking amounts of money in the past several years. In the 1995-1996 fiscal year the University raised $13.64 million, a 1.5 percent increase from the $13.43 million raised in the previous year. The 1993-1994 fiscal year also saw an 82 percent increase from the $7.5 million raised in 1993-1994.

These figures do not include pledges made to the University that had not been paid by the end of each fiscal year.

Percentage of alumni donating to the University has also increased from 32 percent in 1993-1994 to 36 percent in 1994-1995 and to 38 percent in 1995-1996.

Gaines attributes some of these increases to the active fundraising efforts made by Adams, since he was inaugurated as president in November 1995. "He's very active in fundraising. He spends a lot of time fundraising," said Gaines.

Corrections

There were two errors in the article entitled "Campus Mourns Death of a Coach" by E.J. Crawford and Brett Tomlinson published in the Feb. 20 issue. Peggy O'Connor's father Fred Prender died of a heart-attack in 1975 and thus was never Michael O'Connor's father-in-law. The article was also erroneous in that it misstated Prender's name.

REVEREND

from page 1

ple as possible is the key to helping build a strong religious community at Bucknell.

Oliver, in his second semester at the University, has had many positive impressions. He has been "very impressed by the spirituality of students at Bucknell. I want to provide more and more students with the opportunity to express themselves as individuals," he said.

On the other hand, Oliver wants to work on improving some aspects of the school. "Students are going to have to get used to the idea of more diversity. We need to educate students on how to be sensitive to all cultures and religions. We need to prepare them to make adjustments towards changes in the global community. This sensitivity will become very practical when they go out into the job market," he said.

Oliver said his job is to "facilitate all aspects of religious life at the University." He intends to pay attention to students of various religious backgrounds in order to create a sense of a well-knit religious community.

Oliver also intends to answer such questions as, "Are students repressed at Bucknell? Are they content socially? Academically?"

The installation ceremony will take place 2:30 p.m. Sunday in Rooke Chapel.

PUBLIC SAFETY LOG

February 19, 1997

LARCENY— A University student reported to a Public Safety Officer that a portable CD player and compact disk were taken while the student was away from a study carrel in the library. The incident remains under investigation.

ACCIDENT— A University student reported to a Public Safety Officer that unknown person(s) scratched the driver's side door of the vehicle.

February 20, 1997

INFORMATION— A University Professor reported to a Public Safety Officer that unknown occupants of a truck yelled a racial slur at the professor as they passed in their vehicle. A report has also been filed with East Buffalo Township Police Department and a "Be On The Lookout For" (BOLO) was issued on the vehicle.

ASSIST LOCAL POLICE/MISSING PERSON— A Public Safety Officer assisted East Buffalo Township Police Department in an attempt to locate a missing person on University property. The individual was later located in Lewisburg.

February 21, 1997

UNIVERSITY PROPERTY DAMAGE/BROKEN WINDOW— A Public Safety Officer responded to Hulley House for the report of a window broken by a ball. The perpetrator took responsibility for the damage and the window was repaired.

STUDENT HEALTH SERVICE TRANSPORT— A Public Safety Officer responded to the Langone Center for the report of an ill University student. A Student Health Service driver transported the student to Evangelical Hospital Emergency Room for treatment.

February 22, 1997

STUDENT HEALTH SERVICE TRANSPORT— A Public Safety Officer responded to Smith Hall for the report of an ill student. A Student Health Service driver transported the victim to Evangelical Hospital Emergency Room for treatment.

MEDICAL ASSIST— A Public Safety Officer transported a University student from the Langone Center to Student Health Services for treatment of an injury sustained while walking to the LC.

LARCENY/BICYCLE— A University student reported that unknown person(s) had removed a bicycle from the exterior of a Bucknell West Mod. The incident was reported to East Buffalo Township Police Department and remains under investigation.

ASSIST LOCAL POLICE DEPARTMENT— A Public Safety Officer responded to Swartz Hall to escort a University student to the dorm room to secure identification. The student was cited by Lewisburg Police Department for an open container violation.

February 23, 1997

ASSIST LOCAL POLICE— A Public Safety Officer assisted the Lewisburg Police Department and the East Buffalo Township Police Department in locating a University student who was observed on S. 6th St. carrying an open container of beer. The student was cited for underage consumption, public drunkenness and ordinance violations.

TAMPERING WITH FIRE EQUIPMENT— A Public Safety Officer responded to Vedder Hall on a fire alarm activation which was caused by discharging a fire extinguisher. The University student that was responsible was later located and charged.

VANDALISM/TAMPERING WITH FIRE EQUIPMENT— A Public Safety Officer responded to Vedder Hall for a fire alarm activation which was caused by discharging a fire extinguisher.

TAMPERING WITH FIRE EQUIPMENT— A Public Safety Officer responded to a University West Mod for a fire alarm activation caused by discharging a fire extinguisher. The incident remains under investigation.

ASSIST LOCAL POLICE — A Public Safety Officer responded to Lewisburg Borough to assist the Lewisburg Police Department with an unconscious University student. The student was transported to Evangelical Hospital Emergency Room for treatment and will be cited for public drunkenness.

INFORMATION— A University student reported receiving phone calls that served no legitimate purpose. A phone trap has been placed on the line.

LARCENY— A University student reported to a Public Safety Officer that a license plate was removed from the vehicle while it was parked in the Farm Lot. The incident remains under investigation.

February 24, 1997

INFORMATION— A Public Safety Officer received a report regarding concern for the whereabouts of a University professor. An East Buffalo Township Police Officer later reported that the individual was located.

MINOR VEHICLE ACCIDENT— A Public Safety Officer responded to Vaughan Lit Road for the report of damage to a parked vehicle, sustained when a University student attempted to reverse direction of the vehicle that he was operating.

HARASSMENT BY COMMUNICATION— A University student reported to a Public Safety Officer having received harassing telephone calls and electronic mail messages. The incident remains under investigation.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

News Briefs

National News

Clinton OK'd using White House For Contributors

WASHINGTON — President Bill Clinton himself gave the go-ahead to invite political supporters to spend the night at the White House, and said there was nothing wrong with it.

"I did not have any strangers here," Clinton told reporters today. "The Lincoln Bedroom was never sold... the facts will show what the truth is." Clinton, who was asked about the White House sleepovers during a drug control briefing, said that in early 1995, friends who helped get him elected in 1992 thought he had not kept in touch.

Clinton said then-national campaign fund-raiser Terence McAuliffe sent him a memorandum, suggesting what they ought to do to re-establish contact, and Clinton said he told him to proceed.

Clinton said he also told an aide he wanted to ask some of his friends to come to the White House and spend the night.

The White House released more than 500 pages of documents, and Clinton said the information would show he did nothing unethical.

Atlanta mayor offers $10,000 in nightclub bombing

ATLANTA — Atlanta Mayor Bill Campbell yesterday announced a reward of $10,000 for information leading to a conviction in the bombing of a nightclub Friday night, the fourth Atlanta explosion in seven months.

One person was injured in the blast at The Otherside Lounge, a midtown Atlanta bar that caters to a largely gay and lesbian clientele.

Federal investigators also are looking into a double bombing last month at a suburban Atlanta family planning clinic where abortions are performed, and at the July explosion that killed one and injured more than 100 in Centennial Olympic Park.

Almost anyone can purchase dynamite, the use of which is being investigated by the ATF with respect to the most recent bombing, but customers must swear in writing that they are not undocumented immigrants and have no felony convictions. In addition, the buyer must swear not to be addicted to any controlled substance and to be mentally stable.

Study: 'Don't ask, don't tell' policy not working

NEW YORK — Citing a study by a legal aid organization, the New York Times reported yesterday that 850 men and women were discharged from the military for homosexuality during a one-year period that ends this month, which is a significant rise since the implementation of President Clinton's 'don't ask, don't tell' policy.

That figure represents an 18 percent increase over the previous year and a 42 percent increase from 1994, the year in which the policy, a compromise with conservative legislators who wanted a total ban on gay and lesbian servicemembers, was put into effect.

"The reality of 'don't ask, don't tell, don't pursue' has been anything but humane, as many commanders have continued to ask, pursue and harass suspected gay service members with impunity," said the report by the Servicemembers Legal Defense Network, which provides legal aid to troops accused of homosexuality.

The authors of the report, which was made public yesterday, suggested that controversy over the policy has resulted in an anti-gay backlash in the military that has in turn resulted in witch hunts.

Army knew about Gulf War chemical weapons depot

WASHINGTON — Senior Army officers fighting the Gulf War suspected in February 1991 that an Iraqi weapons depot contained chemical weapons but failed to alert U.S. troops who blew up the site less than two weeks later, the Pentagon acknowledged Tuesday.

The information is contained in a still-classified document, according to Bernard Rostker, the Pentagon's senior investigator into Gulf War matters. He has asked the CIA to declassify the memo, but the request has been denied because it would disclose "sources and methods" on how the information was obtained, Rostker told reporters at a Pentagon briefing.

Last June, the Pentagon announced that it had only recently learned that U.S. troops may have been exposed to chemical weapons during the destruction of the site. However, Rostker's new report makes it clear that information existed even before the war was concluded on February 28, 1991 and that the Army suspected chemical weapons were at Kamisiyah.

On Capitol Hill, senators who have been critical of the Pentagon's handling of unexplained illnesses among Gulf War veterans said the new report adds weight to suspicions of a government cover-up.

World News

China says Deng will is a fake

HONG KONG — China has denied a report in Hong Kong newspapers that senior leader Deng Xiaoping left a will apologizing for the 1989 crackdown against pro-democracy protesters in Beijing's Tiananmen Square.

Two Hong Kong newspapers reported there was such a will but gave no sources. The reports said Deng expressed remorse about the shooting of students during the military crackdown and that he apologized to families of the dead and to the people of China.

A copy of the purported will, which was dated Sept. 12, 1996, was also sent to international journalists in China.

A Chinese government spokesman in Hong Kong said yesterday that "the so-called Deng Xiaoping will, reported on by some media in Hong Kong and overseas, is a fabrication by some elements of the 'democracy movement' in the United States who sent it to the media."

Deng, who died a week ago, was in power when tanks were sent in to crush a student-led democracy movement in Tiananmen Square on June 3-4, 1989. He later thanked the army, and never publicly expressed any misgivings about the crackdown.

Seoul, Beijing resume contact over Korean defector

BEIJING — Contacts between Beijing and Seoul over the fate of the highest ranking North Korean official to flee the country resumed yesterday after being stalled by the death of Deng Xiaoping, South Korean officials said.

Pyongyang's top ideological theoretician, Hwang Jang Yop, has been stranded in Seoul's embassy in Beijing since he plunged ties between China and the two rival Koreas into crisis by seeking asylum there on February 12.

Deng's death last week put negotiations over Hwang's fate largely on hold, officials said, but six days of mourning for the Chinese patriarch ended with his funeral on Tuesday.

"Contacts between Seoul and Beijing have resumed, but so far no important developments have been reported," South Korean Foreign Ministry spokesman Lee Kyu-hyung said in Seoul.

Officials of Seoul's Beijing embassy were unable to comment on whether formal negotiations over Hwang's fate had restarted, but said Deng's cremation and funeral had slowed contacts.

Fear of Riots in Jerusalem over housing project

JERUSALEM — Israel yesterday approved construction of a new Jewish neighborhood in Arab East Jerusalem despite international protests and warnings of Palestinian violence.

Security was increased in Jerusalem and the West Bank ahead of the decision by a ministerial committee.

It approved a first-stage plan to build 2,600 homes for Jews at Jabal Abu Ghenaim, called Har Homa by Israel. Another 3,000 housing units would be built for Palestinians in Jerusalem.

Palestinians claim the eastern sector of Jerusalem as a future capital and fear Har Homa would cut off Arab sections of Jerusalem from the West Bank. Two-thirds of the land appropriated by the government for the project belonged to Jews and one-third to Palestinians.

"There is an immense housing shortage in Jerusalem," Israeli Prime Minister Benjamin Netanyahu said in defense of the plan.

Syria warned Israel yesterday that a decision to build a Jewish neighborhood in Arab East Jerusalem would be a "declaration of war" against Arabs and the Middle East peace process.

World's oldest person celebrates 122nd birthday

ARLES, France — Last year, she celebrated her 121st birthday by recording a rap CD. This year, Jeanne Calment, believed to be the world's oldest living person, will whoop it up on the Internet.

Chocolates and a cake full of candles were in store for her birthday party last Friday, a more low-key event than last's year fete, when the release of her CD, "Time's Mistress," sparked a media circus. On the CD, she recounts her memories to a musical background of rap, techno and farandole, a regional dance tune dating to the Middle Ages.

Calment may be blind, nearly deaf and in a wheelchair, but her mind and wit remain sharp. Recently, after being shown how to use a computer, she set up her own Web site, with help from the Ipsen Foundation.

Two years ago, her doctor persuaded her to give up smoking, and she no longer indulges in a Sunday glass of port wine.

National and World News Briefs compiled by Anna Foca from the CNN Interactive Website

ALCOHOL

from page 1

sity may distribute alcohol at university-sponsored events.

Lafayette College: According to Dr. Kissiah, dean of students, Lafayette does have a BYOB policy at registered social functions. When asked if the policy is successful, Kissiah responded "We like to think so. We've occasionally found a fraternity not following the policy, and they were disciplined accordingly."

Lafayette does not serve alcohol at university-sponsored events, except at certain graduation parties, such as "100 Days, 100 Nights" and other Senior Week events. Only seniors who are 21 will be served alcohol at these events.

Dickinson College: Adrian Bailey, spokesperson for the college, said that Dickinson has no BYOB policy, but most of its fraternities and sororities have individual BYOB policies imposed by their national charters. The two local Greek organizations on campus must register social events where alcohol is served and must check IDs of those attending. Those guests over 21 are given a wristband or hand stamp in order to obtain alcohol at the event.

At university sponsored graduation events alcohol may be served. However, the university must register the event in the same manner as any other social organization on campus. The campus security monitors the event in order to ensure that nobody under 21 receives alcohol. Only seniors are allowed to attend, so there is "an inherent check and balance" since almost every senior is of age. Seniors must present ID at these events, and those under 21 will not receive alcohol.

Susquehanna University: According to "Policies and Regulations Concerning Student Life," Susquehanna does not have a BYOB policy. Sororities may serve alcohol in private rooms, in accordance with national sorority policies. Fraternities are allowed to have alcoholic beverages at closed/private events if they meet certain guidelines. Such guidelines include a designated area in accordance with university policy, proper registration and monitoring of the event by qualified persons.

Regardless of location, no alcohol may be served at any campus event open to all students. The policy makes no reference to whether alcohol is permitted at graduation events.

WRESTLING

from page 1

athletics for a short time. He did point out that this type of procedure is not at all uncommon at other universities.

Although only one wrestler has been suspended, Maxwell said the rules violation investigation embraces the entire wrestling program. Bob Ferraro, coach of the wrestling team, said "I'm not real clear on the details myself" of why Garcia is the only one suspended when the whole program is under investigation.

Hartzell said he is unable to comment because the inquiry is not yet complete.

"We try to respond to questions without providing much information because it's premature. The position we've taken is that we have no comment," Maxwell said.

"These are matters that are normally not publicized," Maxwell said in response to a question about why the inquiry has been kept quiet.

Garcia was Bucknell's top wrestler last year, only a year after returning from knee surgery, and was nearly an All-American. Garcia advanced into the quarterfinals of last year's NCAA tournament before dropping a closely-contested match by one point.

week will be submitted to Baker by noon on the Wednesday of each week. That way, if any one doesn't show up, Baker or IFC officers can call the responsible person.

Some of the concerns expressed from the floor strayed from the focus of the BYOB issue. For instance, Sheryl Frysinger '99 articulated her concerns about President Adam's intentions regarding the Greek system.

Frysinger, who had spoken with a student government member at Wesleyen University in Connecticut where Adam's previously was a member of the faculty, explained how Adams was successful in slowly getting rid of the University's small Greek system.

Frysinger raised the issue of whether the BYOB policy was part of a greater "hidden agenda."

Gerald Commerford, associate dean of students, responded that "There's no agenda, and time will prove that I'm sure."

Also, Baker stated in the beginning of the meeting that Adams has nothing to do with this policy.

President Adams was out of town and therefore not present at the meeting.

There were other concerns regarding problems that could be created by a BYOB policy. BYOB may shift the responsibility of serving to minors away from the fraternities; however, some argued that it can potentially create problems of students walking around campus with open containers. Furthermore, some mentioned it will be difficult to monitor the alcohol.

One IFC member mentioned the problems that could arise from a BYOB policy, suggesting that more people will probably consume more alcohol before they come to the party.

Cara Mickelsen—The Bucknellian

Roy Baker, assistant dean of students, has come under fire as a result of the recent dispute over the enforcement of the BYOB policy.

National trend results in fewer applications

By Beth Martin

Bucknellian Staff Writer

The University suffered a 4.5 percent early decision and a 6 percent regular decision application decrease this year, after a record-breaking 11 percent increase in applications last year.

Nevertheless, the 396 early decision (248 were offered admission) and 6872 regular decision applicants this year comprise the third largest applicant pool in the University's history.

Mark Davies, director of admissions, said this year's decline may be attributed to "less applicants out there applying to less schools," as well as "reverberations from last year. Admissions rejected over 3600 students, and word gets around high schools that Bucknell is more competitive which isn't a bad thing."

He added, "We're coming off a year when we were overwhelmed with applications, and it's settled down a little bit."

The University's decrease in applications is part of a nationwide trend at competitive colleges. Davies said, "Most similar schools are down."

Many competitive universities have undergone a decline in applications after record highs last year, according to William H. Honan's article, "Elite Schools See Numbers Of Applicants Leveling Off," printed in the Feb. 12,1997 edition of *The New York Times*.

Honan wrote that Yale and Harvard have each dealt with an 8 percent decrease in applicants compared to last year. In fact, Columbia University is the only Ivy League University that reported an increase in applicants this year (9 percent).

Honan reported that William R. Fitzsimmons, dean of admissions at Harvard University, said that part of the reason for the decrease in applications at Harvard is due to the implementation of binding early-decision programs by Yale, Princeton and Stanford last year. Many students applied early decision to just one of these institutions, instead of applying to several universities regular decision. Recently, early decision programs have been increasing in popularity among those applying to college.

Police crack down on violations near campus

Forty-seven people traveling down Sixth Street, Seventh Street or Moore Avenue Saturday evening were caught violating laws by local police.

Thirty-four citations and 13 warnings were issued for a variety of reasons by the Lewisburg Police and the East Buffalo Township Police in a joint enforcement operation.

University students accounted for most of those cited.

Both borough and township police intend to identify similar problems areas and conduct similar operations in the future.

During Saturday's operation the following citations and warnings were issued: 20 citations and four warnings for speeding; one citation and two warnings for stop signs; one equipment warning; one miscellaneous warning and three underage drinking citations; three citations for littering; two citations for public drunkenness; four citations and three warnings for open container violations; and three warnings for license violations.

Ann de Klerk
Behind the scenes of Bertrand Library
Librarian ends one career with books and starts another

By Nathan Grossman

She's constructed both building and highway, and now she's moving on to work in marble. The woman I describe is neither architect nor mason, but a librarian.

Ann de Klerk has been Director of Library and Information Services for 16 years. Her office lies beyond the glass wall of Bertrand Library, and in many ways she is the "mastermind behind the curtain" of the library. Her input was vital in the renovation of Bertrand Library in 1986, which included the addition of the back portion to the original 1956 facility, doubling the library's original size and bringing seating capacity to over a thousand. "Renovating the library was the most exciting thing I ever had to do. I loved it," de Klerk said.

However, her greatest contribution to the University may lie in trailblazing the way for the information super-highway to reach the steps of Bertrand Library. Referring to the introduction of computer technology into library science, de Klerk said, "I loved it. In 1976, when we first did database searching, and you wouldn't believe how clunky it was, I knew it was the wave of the future, and I have enjoyed that wave." Because of her efforts, the Bertrand Library is a model for other schools aspiring to attain excellence in information and computing technology.

Yet, as of May 31st, she will be leaving the University and the library as she retires—not to the stereotypical porch-life of retirement, but to another profession. She will be continuing her role as bibliographical crusader, this time not as preserver of books but as maker of books. De Klerk first met her present companion, Bernard Taylor, some years ago, because he ran an independent printing press out of his basement to make high-quality hand-tailored books. Now, Bernard Taylor operates the press out of his and Ann de Klerk's garage under the name, "Press of Appletree Alley." Once retired, de Klerk will be joining Taylor in the book making business.

The hand-press Taylor operates requires each line of wooden block type to be hand-set before the press can run. This method of printing is both difficult and time-consuming. Not only is the print hand produced, but so is virtually every other aspect of a book from Appletree Alley. Taylor purchases hand-made paper to print upon, and he then sends his finished work to another craftsman who personally hand sews the binding. When illustrations are called for, another artist, or possibly Taylor himself, makes a wood or linoleum etching to press the books with. Ultimately, every individual book is produced with care and original color illustrations. Even though Taylor charges no more than material costs, the price to buy an Appletree Press book may run over $500. The University has utilized Bernard Taylor's business by annually publishing the work of Bucknell poets in residence through Appletree Press. In turn, the University passes the finished books on as highly prized gifts to benefactors of the University.

Once retired, de Klerk will be working to add a new feature to Appletree books: marbling. If you have ever found yourself rummaging through some old books lying in your basement or attic, you might have glancingly noticed that the inside covers of a couple were decorated with pleasing and delicate swirls of color. The ancient art of "throwing" these colors onto a page is called marbling. The old method of marbling, which medieval guilds kept secret for centuries, required a certain genus of moss only found along the shores of Ireland and an oxen gall bladder among other ingredients. De Klerk has replaced these rare and unusual components with more available chemical substitutes. However, the modern method by which she marbles is by no means easy, and the eventual product is by all means stunning.

Photo courtesy of The Bertrand Library

Ann de Klerk, director of library and information services, will find enjoyment after retiring by entering the publishing field.

Representative of her strong dedication in achieving excellence in all aspects of Bertrand Library's daily functioning, a student employee at the library once referred to her as the strict English schoolmarm who watches for his every mistake. The allusion is not far from the truth, since, as a native Englander, de Klerk pursued a teaching career at the University of London. Once there, she met her late South African husband, John de Klerk, who was pursuing a doctorate in Physics. His later professorship at Brown University brought them to America for the first time. "After his stay at Brown was over, we went back to England, but in less than a year, we knew that America was where we wanted to be," de Klerk said. Subsequently, they went to Pittsburgh where de Klerk earned a degree in Library Science.

"I was attracted by the books and the teaching," de Klerk said. She views the study of library science as a composite between computer science and education, and one of the must enticing fields for interested Bucknell students to consider. "I think librarianship is so exciting now. It was always interesting, but now it's exciting. I almost feel I was born 20 or 40 years too soon because this is such a terrific time for people to have library careers," de Klerk said.

In many ways, Bertrand Library is a reflection of de Klerk's interests. Her office, marked by the juxtaposition of abstract paintings, anoak grandfather clock and softened fluorescent light, is a collage of new and old. Moreover, it matches the subtle melding of modern age with old age that one finds throughout the Bertrand Library: the quaint, traditional reading room is complemented by a computer room, the dark brick exterior is lightened by a sunroof-lit interior, and oak siding commonly glides underneath one of any several abstract paintings. De Klerk's passionate interests in both digital internet computing and traditional book printing matches the dual nature of Bertrand Library as both home of burgeoning technology and antique manuscripts.

Though she is leaving the University, de Klerk will always have a connection to it. When *The Bucknellian* requested a photograph with her and the printing press, she responded, "I would rather have my picture in the library, because I've always been a librarian and I'll always be one, even though I might not actually be working in a library."

Cooking with Katie

Soft Pretzels

Lavishly crusted with seeds or coarse salt, these delicacies perfectly echo the ardor of a bread lover. Twisted into giant, succulent knots, they may whisk you off to the vendor lined streets of New York City, where a grumbling belly would be satiated with a few determined nibbles. Complementing the essence and lush texture of these pretzels is the simplicity of the recipe and the scant role of fat. Wary dabbling chefs are often intimidated by yeast breads despite the character infused by this wily catalyst, but this recipe eclipses the complications of rising and punching. Intensify flavors by sprinkling sesame or poppy seeds onto an otherwise naked body.

- ☐ *1 teaspoon dry yeast*
- ☐ *3/4 cup lukewarm water*
- ☐ *1/4 teaspoon salt*
- ☐ *3/4 teaspoon sugar*
- ☐ *2 cups flour*
- ☐ *1 egg, beaten*
- ☐ *coarse salt, sesame, poppy seeds*

1. *Soften the yeast in water.*
2. *Add salt and sugar.*
3. *Mix in flour until well incorporated, kneading until smooth. Do not allow to rise.*
4. *Cut into 8 pencil thin pieces, twist and shape into pretzels, place on cookie sheet.*
5. *Brush with beaten egg, sprinkle with salt or seeds.*
6. *Bake at 400 degrees for 12-15 minutes or until golden.*

A crunchy accessory to later afternoon munchies, you might enhance steaming fragments of pretzel with a trifle of *boursin* cheese. This is an indulgent combination of cream cheese (8 ounces), garlic cloves (1-2, to taste), dried dill weed (a pinch) and black pepper. These pretzels are best gobbled immediately, so invite a few pals and be ready to bask in their compliments.

Caribbean professors find new home at Bucknell

By Melissa Renzi

Bucknellian Staff Writer

As you hear Caribbean accents throughout the halls of Coleman and Vaughan Literature, you might be thinking that there's an echo. You'll be able to rest easy knowing it's not an echo—whether by coincidence or happy accident, there are four professors originally from Barbados on this campus.

Intrigued by this phenomenon of sorts, I decided to meet these guys to find out how this happened. My journalistic travels led me up and throughout departments surrounding the Academic quad, yet had to end before I could travel to Barbados, as one of the four, Linden Lewis, is advising this semester's Bucknell in Barbados program.

Winston Griffith, Linden Lewis, Hilbourne Watson and Glyne Griffith share deep Caribbean roots, yet intend to stay in the United States.

Comprising, respectively, parts of the Economics, Sociology, International Relations and English departments, these professors are perhaps a part of an immigration trend toward academia.

"A small place like Barbados has not been able to provide a broad and complex range of opportunity for people with a lot of ambition and interest," Watson said. He considers such a move "integral to the people's survival." In view of Barbados' population of a quarter million, Winston Griffith speculates that "the University of the West Indies may be turning out more graduates than the economy can absorb."

However, our Barbadian professors chose an alternate path of education and immigration, one that brought them to the United States for undergraduate study. The paths that each individual took are as varied as their motives.

"I was very impressed with the American educational system," Winston Griffith recalled. "I came to the States to study at Howard University."

Watson also studied at Howard and stayed there to get his doctorate. "I ended up working there for 21 years," Watson said. Yet, for Watson, his draw to the States was not exclusively for the merit of a U.S. education. He chose studying in the States over England because "I thought it would be more interesting in the U.S. at the time; also there was the idea that you could come to the U.S., get into a University and work to pay your way," Watson said.

"It's sort of a roundabout way [that I left Barbados]," Glyne Griffith explained.

He recounts his mother's sort of "twilight zone" existence as she was born in the States, yet married a Barbadian man. "She always seemed torn, even though she's lived all her life in the Caribbean. When I was 17 this ambivalence grounded itself, and she decided to return to the U.S.," Griffith said. "I [then] did my bachelor's degree at the City University of New York."

While we may feel a sort of culture shock here in central Pennsylvania, these professors felt an amplified shock upon moving to the U.S. "In Barbados growing up, all of my teachers were black... all of my role models. I simply assumed it was a normal thing that black people got the education and training. When I got to this country I had this tremendous shock of the denigration of blackness. I consider that to be everyday racist stuff, but I will not embrace it under any circumstances," Watson said.

Glyne Griffith felt a similar shock and used it as his motivation to teach. After graduating from the City University of New York, he returned to Barbados "to explore, on an intellectual level, the Caribbean side of me." He taught at the University of the West Indies, Barbados campus, "but got the itch to return [to the U.S.]," Glyne Griffith said.

"No one reason is the reason," Glyne Griffith said, "it was a combination of the ideas I was grappling with. After a while I felt as though I was preaching to the converted... so then I decided to put my money where my mouth is. Let me put these ideas to the test... and get a sense of how good a teacher I am."

Glyne Griffith has been in the English Department at the University for two and a half years now, putting those ideas to the test through classes including Caribbean poetry, Race and Identity in Selected American Literature, Literature and Empire and a course on the Harlem Renaissance.

As director of the Bucknell in Barbados program, Winston Griffith sees the significance of offering Bucknellians exposure to the Caribbean. "Every summer since 1993, I have taken students to Barbados," Winston Griffith said.

As well, the University offers a minor in Caribbean studies.

Jackie Debicella—The Bucknellian

Glyne Griffith, professor of English, and Hilbourne Watson, professor of professor of International Relations are two of the University's professors who are native of Barbados. Two other Barbados native professors are Winston Griffith and Linden Lewis.

So are you still curious as to how we are so lucky to have four professors from Barbados? Though Winston Griffith calls it "purely a coincidence," that they all ended up here, there is still a bond between these men that predates their Bucknell existence.

Watson gave me the lowdown. "Linden knew me from Barbados. I taught at the secondary school he attended, but I did not know him." The two finally officially met in the States. Watson was a member of Lewis' Ph.D. dissertation committee while he was a student at American University.

"But the person I knew first, longest and best was Winston Griffith, because we attended the same school and worked together in Barbados," Watson said.

"I met Glyne for the first time in 1991, when I was doing my sabbatical in Barbados and he was a professor at the University of the West Indies at Cave Hill. Glyne and I came [to Bucknell] the same semester."

Maintaining connections to his roots in Barbados, Watson was excited to hear about the newly formed Caribbean Club. "Anything to promote other dimensions of the academic, intellectual and cultural side of it I'd be interested in."

week will be submitted to Baker by noon on the Wednesday of each week. That way, if any one doesn't show up, Baker or IFC officers can call the responsible person.

Some of the concerns expressed from the floor strayed from the focus of the BYOB issue. For instance, Sheryl Frysinger '99 articulated her concerns about President Adam's intentions regarding the Greek system.

Frysinger, who had spoken with a student government member at Wesleyen University in Connecticut where Adam's previously was a member of the faculty, explained how Adams was successful in slowly getting rid of the University's small Greek system.

Frysinger raised the issue of whether the BYOB policy was part of a greater "hidden agenda."

Gerald Commerford, associate dean of students, responded that "There's no agenda, and time will prove that I'm sure."

Also, Baker stated in the beginning of the meeting that Adams has nothing to do with this policy.

President Adams was out of town and therefore not present at the meeting.

There were other concerns regarding problems that could be created by a BYOB policy. BYOB may shift the responsibility of serving to minors away from the fraternities; however, some argued that it can potentially create problems of students walking around campus with open containers. Furthermore, some mentioned it will be difficult to monitor the alcohol.

One IFC member mentioned the problems that could arise from a BYOB policy, suggesting that more people will probably consume more alcohol before they come to the party.

Police crack down on violations near campus

Forty-seven people traveling down Sixth Street, Seventh Street or Moore Avenue Saturday evening were caught violating laws by local police.

Thirty-four citations and 13 warnings were issued for a variety of reasons by the Lewisburg Police and the East Buffalo Township Police in a joint enforcement operation.

University students accounted for most of those cited.

Both borough and township police intend to identify similar problems areas and conduct similar operations in the future.

During Saturday's operation the following citations and warnings were issued: 20 citations and four warnings for speeding; one citation and two warnings for stop signs; one equipment warning; one miscellaneous warning and three underage drinking citations; three citations for littering; two citations for public drunkenness; four citations and three warnings for open container violations; and three warnings for license violations.

National trend results in fewer applications

By Beth Martin
Bucknellian Staff Writer

The University suffered a 4.5 percent early decision and a 6 percent regular decision application decrease this year, after a record-breaking 11 percent increase in applications last year.

Nevertheless, the 396 early decision (248 were offered admission) and 6872 regular decision applicants this year comprise the third largest applicant pool in the University's history.

Mark Davies, director of admissions, said this year's decline may be attributed to "less applicants out there applying to less schools," as well as "reverberations from last year. Admissions rejected over 3600 students, and word gets around high schools that Bucknell is more competitive which isn't a bad thing."

He added, "We're coming off a year when we were overwhelmed with applications, and it's settled down a little bit."

The University's decrease in applications is part of a nationwide trend at competitive colleges. Davies said, "Most similar schools are down."

Many competitive universities have undergone a decline in applications after record highs last year, according to William H. Honan's article, "Elite Schools See Numbers Of Applicants Leveling Off," printed in the Feb. 12,1997 edition of *The New York Times*.

Honan wrote that Yale and Harvard have each dealt with an 8 percent decrease in applicants compared to last year. In fact, Columbia University is the only Ivy League University that reported an increase in applicants this year (9 percent).

Honan reported that William R. Fitzsimmons, dean of admissions at Harvard University, said that part of the reason for the decrease in applications at Harvard is due to the implementation of binding early-decision programs by Yale, Princeton and Stanford last year. Many students applied early decision to just one of these institutions, instead of applying to several universities regular decision. Recently, early decision programs have been increasing in popularity among those applying to college.

Ann de Klerk

Behind the scenes of Bertrand Library

Librarian ends one career with books and starts another

By Nathan Grossman

She's constructed both building and highway, and now she's moving on to work in marble. The woman I describe is neither architect nor mason, but a librarian.

Ann de Klerk has been Director of Library and Information Services for 16 years. Her office lies beyond the glass wall of Bertrand Library, and in many ways she is the "mastermind behind the curtain" of the library. Her input was vital in the renovation of Bertrand Library in 1986, which included the addition of the back portion to the original 1956 facility, doubling the library's original size and bringing seating capacity to over a thousand. "Renovating the library was the most exciting thing I ever had to do. I loved it," de Klerk said.

However, her greatest contribution to the University may lie in trailblazing the way for the information super-highway to reach the steps of Bertrand Library. Referring to the introduction of computer technology into library science, de Klerk said, "I loved it. In 1976, when we first did database searching, and you wouldn't believe how clunky it was, I knew it was the wave of the future, and I have enjoyed that wave." Because of her efforts, the Bertrand Library is a model for other schools aspiring to attain excellence in information and computing technology.

Yet, as of May 31st, she will be leaving the University and the library as she retires—not to the stereotypical porch-life of retirement, but to another profession. She will be continuing her role as bibliographical crusader, this time not as preserver of books but as maker of books. De Klerk first met her present companion, Bernard Taylor, some years ago, because he ran an independent printing press out of his basement to make high-quality hand-tailored books. Now, Bernard Taylor operates the press out of his and Ann de Klerk's garage under the name, "Press of Appletree Alley." Once retired, de Klerk will be joining Taylor in the book making business.

The hand-press Taylor operates requires each line of wooden block type to be hand-set before the press can run. This method of printing is both difficult and time-consuming. Not only is the print hand produced, but so is virtually every other aspect of a book from Appletree Alley. Taylor purchases hand-made paper to print upon, and he then sends his finished work to another craftsman who personally hand sews the binding. When illustrations are called for, another artist, or possibly Taylor himself, makes a wood or linoleum etching to press the books with. Ultimately, every individual book is produced with care and original color illustrations. Even though Taylor charges no more than material costs, the price to buy an Appletree Press book may run over $500. The University has utilized Bernard Taylor's business by annually publishing the work of Bucknell poets in residence through Appletree Press. In turn, the University passes the finished books on as highly prized gifts to benefactors of the University.

Once retired, de Klerk will be working to add a new feature to Appletree books: marbling. If you have ever found yourself rummaging through some old books lying in your basement or attic, you might have glancingly noticed that the inside covers of a couple were decorated with pleasing and delicate swirls of color. The ancient art of "throwing" these colors onto a page is called marbling. The old method of marbling, which medieval guilds kept secret for centuries, required a certain genus of moss only found along the shores of Ireland and an oxen gall bladder among other ingredients. De Klerk has replaced these rare and unusual components with more available chemical substitutes. However, the modern method by which she marbles is by no means easy, and the eventual product is by all means stunning.

Photo courtesy of The Bertrand Library

Ann de Klerk, director of library and information services, will find enjoyment after retiring by entering the publishing field.

Representative of her strong dedication in achieving excellence in all aspects of Bertrand Library's daily functioning, a student employee at the library once referred to her as the strict English schoolmarm who watches for his every mistake. The allusion is not far from the truth, since, as a native Englander, de Klerk pursued a teaching career at the University of London. Once there, she met her late South African husband, John de Klerk, who was pursuing a doctorate in Physics. His later professorship at Brown University brought them to America for the first time. "After his stay at Brown was over, we went back to England, but in less than a year, we knew that America was where we wanted to be," de Klerk said. Subsequently, they went to Pittsburgh where de Klerk earned a degree in Library Science.

"I was attracted by the books and the teaching," de Klerk said. She views the study of library science as a composite between computer science and education, and one of the must enticing fields for interested Bucknell students to consider. "I think librarianship is so exciting now. It was always interesting, but now it's exciting. I almost feel I was born 20 or 40 years too soon because this is such a terrific time for people to have library careers," de Klerk said.

In many ways, Bertrand Library is a reflection of de Klerk's interests. Her office, marked by the juxtaposition of abstract paintings, anoak grandfather clock and softened fluorescent light, is a collage of new and old. Moreover, it matches the subtle melding of modern age with old age that one finds throughout the Bertrand Library: the quaint, traditional reading room is complemented by a computer room, the dark brick exterior is lightened by a sunroof-lit interior, and oak siding commonly glides underneath one of any several abstract paintings. De Klerk's passionate interests in both digital internet computing and traditional book printing matches the dual nature of Bertrand Library as both home of burgeoning technology and antique manuscripts.

Though she is leaving the University, de Klerk will always have a connection to it. When *The Bucknellian* requested a photograph with her and the printing press, she responded, "I would rather have my picture in the library, because I've always been a librarian and I'll always be one, even though I might not actually be working in a library."

EDITORIAL

Honesty is best policy for Adams, Baker

Although unable to reach a firm decision, IFC adjourned its meeting on Tuesday with the understanding that this weekend's fraternity parties will abide by the previously latent BYOB policy until another policy is devised.

The chalk-talk scrawled over sidewalks across campus expresses student dismay over demands that the traditional methods of serving alcohol at fraternity parties must change. Ringing of President Adams' decision not to serve alcohol at Tent Party and other events where students are the majority, this new and intense focus on IFC alcohol policies has students up in arms once again. Many students believe that a dry Tent Party was the first step leading to a dry campus. They now point to the current tightening of IFC rules to support the realistic possibility of their premonition.

Can students be blamed for connecting the two changes? Although Roy Baker, assistant dean of students, said that the new focus on IFC policies has nothing to do with President Adams' decision not to serve alcohol at the graduation festivity, the two impending modifications are too closely related for students to believe that there is absolutely no collaboration in the grand scheme of things.

We are just asking the administration to be honest with us. If both of these sudden changes center around legal or liability issues, let us know. At this point, only Baker cited protection from lawsuits as a reason for the fresh look at IFC policy; Adams claimed his decision had nothing to do with legalities. If there is a genuine concern about consumption of alcohol on this campus and there is a desire to enact a plan of action, tell us that. Adams said he was worried about the amount of drinking but he did not have a greater plan. Whatever is the case, students have been left in the dark, not sure if the recent focus on campus alcohol policies is a coincidence or a conspiracy.

Meanwhile, suddenly urging fraternities to abide by a BYOB policy that is insensible and excessive because no other plan is apparent is not helping matters.

Technically, fraternities may serve alcohol only to people 21 years of age or older. But this is true for anyone serving alcohol. It's not fair to demand that fraternity members entertain 21-year-old guests while not giving them the option to serve complimentary alcoholic beverages. That is similar to mandating off campus students never to offer a beer to visiting 21-year-old friends. If fraternities already must abide by state drinking laws, why is this BYOB policy necessary?

If underage drinking is the real issue here, then wouldn't a better strategy be to monitor more closely the places and events where underage drinking is likely to occur? To crack down on underage drinking, why look to registered parties where fraternity brothers are careful about serving only 21-year-olds? Instead, look to unregistered fraternity parties, dorm rooms, gateways and off-campus parties. These places are where the problem of underage drinking is most prevalent.

With both the change in Tent Party and the new focus on BYOB, there has been increased regulation in areas that are already adequately regulated through state laws, if not University policies. Granted, IFC needs to have an accurate policy on the books, but reverting to and suddenly enforcing the BYOB policy until a change is made is unfair.

But even if BYOB and a dry Tent Party are appropriate, students shouldn't be caught off guard again. It's only natural to become defensive when faced with ultimatums so abruptly. And with such similar changes occurring almost simultaneously, it's no wonder suspicions are rampant. If we as the students can be a part of the decisions that affect us, then at least we could more readily accept the final outcomes. Don't keep us in the dark.

OPINIONS

Alcohol policy needs reevaluation in U.S. and Bucknell

NICOLE MAESTRI
Bucknellian Staff Columnist

When I was 20, I spent a semester studying abroad in France. When I was just about 20 and a half, I returned.

When I was in France, I could drink alcohol legally. When I finished my seven hour return flight and stepped foot on the ground in Newark, I could not.

But I didn't realize that right away. Having a two-hour layover between my flight from Newark to D.C., I figured I would go to a bar to relax, pass the time and maybe have a beer. Luckily, as I was about to order, I stopped myself before looking like a complete idiot. I realized I was going to have to wait six more months until I could consume alcohol legally again. I changed my order to a Coke. What a nice welcome home.

So what was going to happen to me in these next six months that was going to prepare me to be a 21-year-old already who knew how to handle alcohol responsibly? What change was there going to be in my mentality or my behavior that would make it alright for me to order a glass of wine with dinner? What about my 21 years of living had prepared me to consume alcohol legally? In the United States, the answer to these questions is absolutely nothing. Nothing has prepared me to handle alcohol responsibly.

The problem with American society is that the vast majority of "children," or those under the age of 21, are never taught how to drink. The range of views on alcohol vary from complete abstinence to reckless abandon, but no where has anyone thought it would be a good idea to step back, distance themselves from their personal views on alcohol, and reason that someone needs to teach the youth of American how to drink.

That might sound absurd but I think it is a very important factor lacking in our society. We are never taught how to drink.

In France, children are introduced to wine at a very young age. For the French, it is wine that completes a meal. The act of choosing a wine to accompany a specific dish is almost a science. Everything about wine—making it, serving it and drinking it—is dictated by specific rules of etiquette. There is a correct way to handle wine and French children are taught this.

Beer is as sacred to the Germans as wine is to the French. Who would have thought that entering a beer hall in Munich I would be greeted by a sense of family and community? The hall was not filled with drunk teenagers consuming liters of beer on Friday afternoon. It was packed with families gathered around tables, drinking from their personalized beer steins, eating pretzels and singing along with the German folk band playing in the background. The families were laughing and socializing and enjoying each other's company. It was the tourists (mainly Americans) who had come simply to drink vast quantities of beer in a real German beer hall.

My experience in these two countries and other European countries I visited has shown me an approach to alcohol that is one of learning and moderation. Children are taught how to serve alcohol, how to drink and not to drink if they do not want to. Not every European family fits this mold, but at least there is some overall attempt by society to teach children how to drink. Alcohol is not a taboo topic or a special drink reserved only for "adults."

It is no wonder then that underage drinking is so prevalent in the U.S. and the main goals of many American youth when they drink is to simply get drunk. We have never been shown how to incorporate alcohol into our lifestyle in any type of healthy, moderated manner. Instead alcohol is quarantined as a forbidden substance and that, obviously, only increases its appeal.

How is America's youth supposed to learn how to drink responsibly in this atmosphere? Our University is so afraid of alcohol that it has been banned from Tent Party and University events where the majority of attendants are students. Further rumors are circulating campus in regard to no more registered parties and strictly regulated house party, cracking down on possible underage drinking that might occur.

But, hypocritically, wine is still served by the University at Gallery Openings on Saturday afternoons in the L.C. In fact, there is one this Saturday. What makes it OK to serve wine in the Gallery, but not at Tent Party? Is it thought that guests at the Gallery are more refined, better behaved and more mature? In other words, the majority of guests must be professors and adults, not students. I guess they know how to maturely consume wine.

We have all heard the argument that you can die fighting a war for this country at the age of 18, but you still cannot buy yourself a beer. In fact at 18, you can vote, pay taxes, rent pornographic films, get married, and no longer be claimed as a dependent by your parents, but you cannot purchase alcohol.

Sadly, America is a hypocritical country and this hypocrisy is mirrored in its institutions—this University included. We have failed to admit that the mentality of Prohibition has gotten us nowhere.

Maybe if there was someone that would teach the youth of America how to drink responsibly they could in turn responsibly decide what role alcohol would play in their lives, instead of being bombarded by the pressures of underage drinking and mass consumption. Granted, there are many people who would disagree with me and state there is no such thing as responsible drinking or teaching youth to drink. But if we can convince our society of the need to practice safer sex, why can't we also convince ourselves of the need to practice safer drinking?

JonBenet Ramsey case involves more than murder

BY ALLISON PRICE
Bucknellian Staff Columnist

At this time, no arrests have been made in the high profile JonBenet Ramsey murder case in Colorado. Why do we hear about this case and not the myriad of similar murders throughout the country each year? Officials appear to be skirting the issues that the public is most inherently drawn to this case for, as well as those that are so disturbing that you don't like the idea of them occupying space in your mind. However, the case's officials, and the media, have seemed to be strongly insinuating that the girl's parents are somehow involved, or at best somehow let it happen by giving the wrong person access to their home and their daughter.

In particular, JonBenet's mother, Patsy Ramsey, comes up quite a bit in the news stories, usually introduced as the former Miss West Virginia. This is one of the parallels between the Ramsey case and last year's incident involving young pilot Jessica Dubroff who died in a plane crash trying to set an aviation age record. You remember: the one with the out of control mother?

If Phillip Roth and George Constanza have taught us to suspect that behind every messed up male is a meddling mother, the new trend seems to be that behind every martyred little girl-superstar-princess is her mother as well. Ironically, one of the quotes associated with the Ramsey case is, "Where are the feminists when you need them?", as if we, the long suffering army of the night, haven't been ridiculed for years as we fought the notion a swimsuit and matching heels as the epitome of American womanhood.

In the case of Jessica Dubroff, her mother was somehow too liberated and cryptically feminist. In the case of JonBenet Ramsey, folks cringe nauseatingly at the sight of a six year old performing a strip tease in full make-up regalia. Just what do we want, anyway—what is the epitome of a little girl's achievement, her worth? In the brand new society where soccer moms constitute a political constituency, it seems that everything is fine as long as little girls play cute and don't push it. While in both the Dubroff and Ramsey cases, each of the little girls endeavors were accepted and lauded before everything went horribly wrong, unfortunately beauty pageants for the two to six year old set would be considered a more natural outlet for little girls who are supposed to want to play with Barbies.

To discuss JonBenet Ramsey's pageant "career" is to somehow also subtly insinuate that somehow the little girl brought her fate upon herself, or at least her mother did. Are pageants OK when the same little girls we have the urge to protect go through puberty and can be looked at as sex objects with clean conscience? The myth of beauty pageants is that they are somehow incidental, a byproduct of an opportunity for women to "earn" scholarships. What is the defense with little girls? I have watched many pageant officials insist they discourage the little girls (come on, it's their "handlers" calling the shots) not to in wearing make-up, but for some odd reason they still consistently choose to wear it. Don't they know anything about capitalism, that competition necessitates the best possible product possible? Only when tragedy occurs are some people capable of stepping away and viewing society for what it is—complex, messy and equal parts good and evil. There are others who never will and seek scapegoats.

In the end, JonBenet Ramsey was pushed in a direction contrary to that of Jessica Dubroff, and both little girls died as victims. I am sure in both cases, no matter the clouded motives, this is not what their mothers had in mind. A friend of mine recently mused that she planned to make her own future daughter wait longer than she did to try make-up, as to this day she hates the way she can't leave the house without it. Inevitably we all learn and find direction. What is the measure of a little girl's worth, and are we any closer in the process of scapegoating a mother who embraced what is considered the most guaranteed path to happiness for women—a little talent, a whole lot of smile? Maybe if it was good enough for Patsy Ramsey, it is up to society to decide it was not good enough for her daughter.

LETTERS

President Adams' decision-making needs improvement

TO THE EDITOR:

I wish to address the many students and faculty who feel alienated by recent decisions made by President Adams and our administration. While I am personally perturbed by President Adams' decision to ban alcohol at Tent Party, I am more concerned about other events surrounding the decision. I, and many other seniors, feel that President Adams' decision to ban alcohol at Tent Party has in effect stated his belief that the Class of 1997 is not mature enough to responsibly consume alcohol. In complete honesty I think that reducing the amount of underage consumption on campus is needed. However, attacking the senior class is a classic case where the means do not justify the ends. President Adams must realize that this is not his university. He is a representative of his constituents— the students, faculty and trustees.

It seems the President and the administration feel that they know what is best for the students and faculty, and therefore, do not need to consider our feelings

As our representative and spokesman for the school, I am concerned about the process in which decisions have been reached and the consequences of those decisions. President Adams first stated in a letter to all seniors that the decision to ban alcohol at Tent Party was to limit underage drinking. On a WVBU interview he stated that it was to reduce the liability of the school, but at a faculty meeting he admitted he had done no research as to the amount of liability assumed at our sister and brother schools. I question the real reason for the decision. Of course as President his job is to act in the University's best interests. At times this may mean lowering the liability of Bucknell, but it is inherent to consider the feelings of everyone in this attempt.

Since President Adams' inauguration, we have lost two of our most influential trustees. Both Ken Langone and Lee Idleman have left the board and are reportedly disappointed by recent decisions of President Adams. Therefore, I wish to point out to the students of Bucknell that the decision to ban alcohol at Tent Party is not the only concern we should have.

Now I feel that President Adams is trivializing the decision. Unbeknownst to the majority of the school President Adams is planning to situate himself in a dunk tank at tent party so seniors may take their feelings out on him and not the school. This is a ridiculous response to student criticism. If the administration is truly concerned about student apathy then it should listen when we call out. The right decision is to listen to the faculty and the students who are trying to speak out. We are trying to be involved and have our voices heard, but unfortunately they are falling on deaf ears.

The ineffectiveness of recent petitions to save Professor Paul Dietz's professorship, remove a statue in front of Swartz Hall and to repeal the ban on alcohol have not been given their due respect. Therefore, it is not any one issue that truly concerns me. Rather, it is the lack of respect given to the students of this University. I should add that several faculty members have voiced similar concern to the apparent lack of consideration of their own feelings. Is this what Bucknell University was created for?

This is not one person's university. President Adams does not speak for everyone, but decisions made by the administration do. If we allow unpopular and unfair decisions to continue to be made without voicing our concerns, then we are failing ourselves. It seems the president and the administration feel that they know what is best for the students and faculty and therefore, do not need to consider our opinions. I do not believe this is the case nor do I believe that because President Adams' wishes for students to address him as 'Bro' that he really knows how many of us think or feel. It is time to stop stepping on toes and make decisions that are well-thought through and are considerate of the concerns of all those in the Bucknell community. Until the concerns of the students and faculty are met this will cease to be an institution where debate is welcomed and conflicts confronted. Is that in the best interest of Bucknell University?

Theatre Company redirects focus of article

TO THE EDITOR:

The members of Company! would like to take this opportunity to respond to last week's article on the winter production of *The Effect of Gamma Rays on Man-in-the-Moon Marigolds*. Ms. Doebber's article, while well-informed and well-written, unfortunately neglected to focus on what we, as the production staff, think is the most important and exciting aspect of the production. For the first time on this campus in recent memory, a mainstage production of the Department of Theatre and Dance has been, and will be, completely designed, directed and run by students.

In the past, students have as a senior project in theatre (and often as honors theses) designed for a mainstage or directed a mainstage; however, this is the first time a group of students have completely taken over the production of a performance. Further, the production is in no way funded by the Department of Theatre and Dance, but is supported completely by Bucknell Student Government. Finally, while the director, Shannon Kearns '97, has undertaken this project as her senior honors thesis in theatre, and Stacy Ayrton '98, in her sub-senior year, is completing an honors project in production management, none of the other students are involved with senior projects; most, in fact, are underclass students doing what they enjoy most: making theatre.

What began as a haphazard conversation between Stacy Ayrton and Rich Dionne GR in the Bison two years ago has, through the hard work and dedication of the members of Company, exploded into this: students doing the almost unthinkable. And doing it, in our opinion, exceptionally well.

Here's to more in the future.

Charter at Penn State denied for good reason

Anti-homosexual group STRAIGHT undermines campus diversity, does not affirm it

TO THE EDITOR:

This letter is in response to Nora Daniels' article in which she critiques the recent Penn State University decision to deny a charter to the student group known as STRAIGHT (STudents Reinforcing Adherence In General Heterosexual Tradition). Nora, I'd like to acknowledge your insight in the recognition of the relevance this decision has regarding the group's civil rights. I am wondering if you would like to participate in an alternative critique of what STRAIGHT's agenda is really about?

Let's examine the "nature" of the nouns, verbs and adjectives which comprise the acronym: *Students* — implies the process of learning, could be considered cultural; *Reinforcing, Adherence* — sounds methodical with potential for punishment or exclusion if not learned "properly", reeking of hegemony; *Tradition* — again, implies learned, passed down from generation to generation; *Heterosexual* — hmmm, is this what is being taught, reinforced with threat of punishment or exclusion if the tradition is not adhered to? BINGO!!

This is precisely the theory that Adrienne Rich asserts in her 1981 essay entitled, "Compulsory Heterosexuality and Lesbian Existence." This is fascinating reading which explores the reasons why such compulsory behavior is beneficial within the hegemonic discourse of patriarchy.

Well, if that's the case, STRAIGHT doesn't need an additional charter. Its charter can be read as being embedded within two texts which immediately come to mind: the Bible (Old or New Testaments, take your pick), and the United States Constitution.

My point is this: STRAIGHT's right to espouse and affirm its values and beliefs is practiced every day within our culture without fear of "punishment". Punishment can manifest itself in various forms such as physical violence, as well as economic and political sanctions. This is a reality many lesbian, gays and bisexuals are subjected to on a regular basis. Therefore, your understanding that "people need support, and in college, campus organizations are important in providing this "service" is correct. But STRAIGHT's right to affirm itself occurs every day. Its agenda does not incorporate tolerance, instead it perpetuates exclusion and punishment.

If the basic tenet of multiculturalism is in celebrating diversity, there must be an understood or assumed "center" (i.e. heterosexual, white, Christian) within the structure (society/culture). The "center" has the capacity to marginalize groups which do not fit the narrow confines of its archetype and will do so if its power is threatened. STRAIGHT is counterproductive to the celebration of diversity. It is not Penn State which misinterpreted the meaning of diversity, rather, it is you who misunderstood the insight which Penn State University had in denying STRAIGHT's charter.

MARY E. WYETH '98
FEBRUARY 26, 1997

TO THE EDITOR:

I am writing in response to last week's article by Nora Daniels concerning the decision of Penn State to deny a charter to a student group that was to be called STudents Reinforcing Adherence In General Heterosexual Tradition, or STRAIGHT. According to the article, the group of students rejects homosexuality and wants to express its disagreement with it. Daniels sees this as hindering efforts at creating an atmosphere of diversity on campus. I have to disagree with this assertion because I have a very different understanding of the meaning of diversity. To celebrate diversity is to celebrate what is unique or different in the culture or lifestyle of a certain group of people. Recognition and celebration of diversity will hopefully bring more respect and understanding to the variety of cultures and lifestyles which exist in our society. I do not truly understand how a group that focuses on celebrating heterosexuality contributes to diversity. Heterosexuality is the lifestyle with which the majority of our society, and certainly the great majority of the population at Bucknell, is familiar. For this reason, it cannot really be deemed as different or unique.

Heterosexuality is celebrated every day in the portrayals of heterosexual life in the media. Heterosexuality is advocated as the correct way of life by laws which deny rights to homosexuals. Heterosexuals are not subjected to any type of oppression or denied any opportunities based on their sexuality. Heterosexuality is already celebrated, but this celebration is not contributing to diversity or to the appreciation of things that are unique. On the contrary, it often contributes to society's general refusal to accept homosexuality. Last week's article also indicated that the student group, STRAIGHT, would focus its activities on expressing its disagreement with homosexuality. Unlike heterosexuality, homosexuality is a lifestyle that is considered different because it is followed by a minority of people in society. I, therefore, must ask myself, how does expressing disagreement toward a lifestyle that is different contribute to diversity and acceptance of what is different? In my opinion, it does not. It certainly does not seem that contributing to diversity is one of the goals that STRAIGHT had in mind.

Groups that form around issues of race, sex, culture or sexuality generally have the purpose of contributing to diversity through raising awareness of these issues and providing support for people who face discrimination based on these issues. Many such groups exist at Bucknell including Friends of Lesbians, Gays, and Bisexuals (FLAG&B), Feminist Outreach, Students for Asian Awareness at Bucknell (SAAB) and South Asian Student Association (SASA) to name just a few. These organizations exist because there is a need for them. They provide a safe place for students to discuss issues such as homophobia, sexism, racism, etc., that they confront at Bucknell and will undoubtedly encounter after departing from Bucknell. In addition, they give students an opportunity to provide education and organize events that make the campus community aware of the issues, and more knowledgeable about cultures and people who are not, in all ways ,the same as them.

Last week's article pondered what the response would be if a group such as STRAIGHT or a white student organization wanted to form at Bucknell. As I stated earlier, groups that form around race or sexuality generally have the purpose of fighting discrimination and heightening awareness. Therefore, it does not seem to me that there are needs for heterosexual or white student groups. These are the groups that hold power in our society; these groups do not face oppression based on their race or sexuality. In addition, the majority of people at Bucknell are white and heterosexual and our society is steeped in heterosexual, white tradition. Therefore, there is apparently no need to raise awareness about the issues of being white or heterosexual. Since these organizations could not have the purposes that organizations focused on race, gender, and sexuality generally have, what could their purpose possibly be? I think there is a danger that these types of organizations would breed intolerance and contribute to further discrimination, especially if they were focused simply on disagreeing with other ways of life like STRAIGHT had proposed to do. In fact, inconsistencies with Penn State's Statement of Intolerance was one of the reasons that STRAIGHT was denied a charter. I think it is commendable when a university enacts a statement against intolerance to promote diversity and to avoid racism, sexism, homophobia and all other forms of discrimination. It seems that an academic and learning environment should not be intolerant, but open to new and different ideas, opinions and ways of life. I agree that everyone has a right to voice any opinion that they wish. However, let us not confuse statements of intolerance with statements of diversity.

EDITORIAL

Honesty is best policy for Adams, Baker

Although unable to reach a firm decision, IFC adjourned its meeting on Tuesday with the understanding that this weekend's fraternity parties will abide by the previously latent BYOB policy until another policy is devised.

The chalk-talk scrawled over sidewalks across campus expresses student dismay over demands that the traditional methods of serving alcohol at fraternity parties must change. Ringing of President Adams' decision not to serve alcohol at Tent Party and other events where students are the majority, this new and intense focus on IFC alcohol policies has students up in arms once again. Many students believe that a dry Tent Party was the first step leading to a dry campus. They now point to the current tightening of IFC rules to support the realistic possibility of their premonition.

Can students be blamed for connecting the two changes? Although Roy Baker, assistant dean of students, said that the new focus on IFC policies has nothing to do with President Adams' decision not to serve alcohol at the graduation festivity, the two impending modifications are too closely related for students to believe that there is absolutely no collaboration in the grand scheme of things.

We are just asking the administration to be honest with us. If both of these sudden changes center around legal or liability issues, let us know. At this point, only Baker cited protection from lawsuits as a reason for the fresh look at IFC policy; Adams claimed his decision had nothing to do with legalities. If there is a genuine concern about consumption of alcohol on this campus and there is a desire to enact a plan of action, tell us that. Adams said he was worried about the amount of drinking but he did not have a greater plan. Whatever is the case, students have been left in the dark, not sure if the recent focus on campus alcohol policies is a coincidence or a conspiracy.

Meanwhile, suddenly urging fraternities to abide by a BYOB policy that is insensible and excessive because no other plan is apparent is not helping matters.

Technically, fraternities may serve alcohol only to people 21 years of age or older. But this is true for anyone serving alcohol. It's not fair to demand that fraternity members entertain 21-year-old guests while not giving them the option to serve complimentary alcoholic beverages. That is similar to mandating off campus students never to offer a beer to visiting 21-year-old friends. If fraternities already must abide by state drinking laws, why is this BYOB policy necessary?

If underage drinking is the real issue here, then wouldn't a better strategy be to monitor more closely the places and events where underage drinking is likely to occur? To crack down on underage drinking, why look to registered parties where fraternity brothers are careful about serving only 21-year-olds? Instead, look to unregistered fraternity parties, dorm rooms, gateways and off-campus parties. These places are where the problem of underage drinking is most prevalent.

With both the change in Tent Party and the new focus on BYOB, there has been increased regulation in areas that are already adequately regulated through state laws, if not University policies. Granted, IFC needs to have an accurate policy on the books, but reverting to and suddenly enforcing the BYOB policy until a change is made is unfair.

But even if BYOB and a dry Tent Party are appropriate, students shouldn't be caught off guard again. It's only natural to become defensive when faced with ultimatums so abruptly. And with such similar changes occurring almost simultaneously, it's no wonder suspicions are rampant. If we as the students can be a part of the decisions that affect us, then at least we could more readily accept the final outcomes. Don't keep us in the dark.

The problem with American society is that the vast majority of "children," or those under the age of 21, are never taught how to drink. The range of views on alcohol vary from complete abstinence to reckless abandon, but no where has anyone thought it would be a good idea to step back, distance themselves from their personal views on alcohol, and reason that someone needs to teach the youth of American how to drink.

That might sound absurd but I think it is a very important factor lacking in our society. We are never taught how to drink.

In France, children are introduced to wine at a very young age. For the French, it is wine that completes a meal. The act of choosing a wine to accompany a specific dish is almost a science. Everything about wine—making it, serving it and drinking it—is dictated by specific rules of etiquette. There is a correct way to handle wine and French children are taught this.

Beer is as sacred to the Germans as wine is to the French. Who would have thought that entering a beer hall in Munich I would be greeted by a sense of family and community? The hall was not filled with drunk teenagers consuming liters of beer on Friday afternoon. It was packed with families gathered around tables, drinking from their personalized beer steins, eating pretzels and singing along with the German folk band playing in the background. The families were laughing and socializing and enjoying each other's company. It was the tourists (mainly Americans) who had come simply to drink vast quantities of beer in a real German beer hall.

My experience in these two countries and other European countries I visited has shown me an approach to alcohol that is one of learning and moderation. Children are taught how to serve alcohol, how to drink and not to drink if they do not want to. Not every European family fits this mold, but at least there is some overall attempt by society to teach children how to drink. Alcohol is not a taboo topic or a special drink reserved only for "adults."

It is no wonder then that underage drinking is so prevalent in the U.S. and the main goals of many American youth when they drink is to simply get drunk. We have never been shown how to incorporate alcohol into our lifestyle in any type of healthy, moderated manner. Instead alcohol is quarantined as a forbidden substance and that, obviously, only increases its appeal.

How is America's youth supposed to learn how to drink responsibly in this atmosphere? Our University is so afraid of alcohol that it has been banned from Tent Party and University events where the majority of attendants are students. Further rumors are circulating campus in regard to no more registered parties and strictly regulated house party, cracking down on possible underage drinking that might occur.

But, hypocritically, wine is still served by the University at Gallery Openings on Saturday afternoons in the L.C. In fact, there is one this Saturday. What makes it OK to serve wine in the Gallery, but not at Tent Party? Is it thought that guests at the Gallery are more refined, better behaved and more mature? In other words, the majority of guests must be professors and adults, not students. I guess they know how to maturely consume wine.

We have all heard the argument that you can die fighting a war for this country at the age of 18, but you still cannot buy yourself a beer. In fact at 18, you can vote, pay taxes, rent pornographic films, get married, and no longer be claimed as a dependent by your parents, but you cannot purchase alcohol.

Sadly, America is a hypocritical country and this hypocrisy is mirrored in its institutions—this University included. We have failed to admit that the mentality of Prohibition has gotten us nowhere.

Maybe if there was someone that would teach the youth of America how to drink responsibly they could in turn responsibly decide what role alcohol would play in their lives, instead of being bombarded by the pressures of underage drinking and mass consumption. Granted, there are many people who would disagree with me and state there is no such thing as responsible drinking or teaching youth to drink. But if we can convince our society of the need to practice safer sex, why can't we also convince ourselves of the need to practice safer drinking?

JonBenet Ramsey case involves more than murder

BY ALLISON PRICE

Bucknellian Staff Columnist

At this time, no arrests have been made in the high profile JonBenet Ramsey murder case in Colorado. Why do we hear about this case and not the myriad of similar murders throughout the country each year? Officials appear to be skirting the issues that the public is most inherently drawn to this case for, as well as those that are so disturbing that you don't like the idea of them occupying space in your mind. However, the case's officials, and the media, have seemed to be strongly insinuating that the girl's parents are somehow involved, or at best somehow let it happen by giving the wrong person access to their home and their daughter.

In particular, JonBenet's mother, Patsy Ramsey, comes up quite a bit in the news stories, usually introduced as the former Miss West Virginia. This is one of the parallels between the Ramsey case and last year's incident involving young pilot Jessica Dubroff who died in a plane crash trying to set an aviation age record. You remember: the one with the out of control mother?

If Phillip Roth and George Constanza have taught us to suspect that behind every messed up male is a meddling mother, the new trend seems to be that behind every martyred little girl-superstar-princess is her mother as well. Ironically, one of the quotes associated with the Ramsey case is, "Where are the feminists when you need them?", as if we, the long suffering army of the night, haven't been ridiculed for years as we fought the notion a swimsuit and matching heels as the epitome of American womanhood.

In the case of Jessica Dubroff, her mother was somehow too liberated and cryptically feminist. In the case of JonBenet Ramsey, folks cringe nauseatingly at the sight of a six year old performing a strip tease in full make-up regalia. Just what do we want, anyway—what is the epitome of a little girl's achievement, her worth? In the brand new society where soccer moms constitute a political constituency, it seems that everything is fine as long as little girls play cute and don't push it. While in both the Dubroff and Ramsey cases, each of the little girls endeavors were accepted and lauded before everything went horribly wrong, unfortunately beauty pageants for the two to six year old set would be considered a more natural outlet for little girls who are supposed to want to play with Barbies.

To discuss JonBenet Ramsey's pageant "career" is to somehow also subtly insinuate that somehow the little girl brought her fate upon herself, or at least her mother did. Are pageants OK when the same little girls we have the urge to protect go through puberty and can be looked at as sex objects with clean conscience? The myth of beauty pageants is that they are somehow incidental, a byproduct of an opportunity for women to "earn" scholarships. What is the defense with little girls? I have watched many pageant officials insist they discourage the little girls (come on, it's their "handlers" calling the shots) not to in wearing make-up, but for some odd reason they still consistently choose to wear it. Don't they know anything about capitalism, that competition necessitates the best possible product possible? Only when tragedy occurs are some people capable of stepping away and viewing society for what it is—complex, messy and equal parts good and evil. There are others who never will and seek scapegoats.

In the end, JonBenet Ramsey was pushed in a direction contrary to that of Jessica Dubroff, and both little girls died as victims. I am sure in both cases, no matter the clouded motives, this is not what their mothers had in mind. A friend of mine recently mused that she planned to make her own future daughter wait longer than she did to try make-up, as to this day she hates the way she can't leave the house without it. Inevitably we all learn and find direction. What is the measure of a little girl's worth, and are we any closer in the process of scapegoating a mother who embraced what is considered the most guaranteed path to happiness for women—a little talent, a whole lot of smile? Maybe if it was good enough for Patsy Ramsey, it is up to society to decide it was not good enough for her daughter.

President Adams' decision-making needs improvement

TO THE EDITOR:

I wish to address the many students and faculty who feel alienated by recent decisions made by President Adams and our administration. While I am personally perturbed by President Adams' decision to ban alcohol at Tent Party, I am more concerned about other events surrounding the decision. I, and many other seniors, feel that President Adams' decision to ban alcohol at Tent Party has in effect stated his belief that the Class of 1997 is not mature enough to responsibly consume alcohol. In complete honesty I think that reducing the amount of underage consumption on campus is needed. However, attacking the senior class is a classic case where the means do not justify the ends. President Adams must realize that this is not his university. He is a representative of his constituents— the students, faculty and trustees.

> ***It seems the President and the administration feel that they know what is best for the students and faculty, and therefore, do not need to consider our feelings***

As our representative and spokesman for the school, I am concerned about the process in which decisions have been reached and the consequences of those decisions. President Adams first stated in a letter to all seniors that the decision to ban alcohol at Tent Party was to limit underage drinking. On a WVBU interview he stated that it was to reduce the liability of the school, but at a faculty meeting he admitted he had done no research as to the amount of liability assumed at our sister and brother schools. I question the real reason for the decision. Of course as President his job is to act in the University's best interests. At times this may mean lowering the liability of Bucknell, but it is inherent to consider the feelings of everyone in this attempt.

Since President Adams' inauguration, we have lost two of our most influential trustees. Both Ken Langone and Lee Idleman have left the board and are reportedly disappointed by recent decisions of President Adams. Therefore, I wish to point out to the students of Bucknell that the decision to ban alcohol at Tent Party is not the only concern we should have.

Now I feel that President Adams is trivializing the decision. Unbeknownst to the majority of the school President Adams is planning to situate himself in a dunk tank at tent party so seniors may take their feelings out on him and not the school. This is a ridiculous response to student criticism. If the administration is truly concerned about student apathy then it should listen when we call out. The right decision is to listen to the faculty and the students who are trying to speak out. We are trying to be involved and have our voices heard, but unfortunately they are falling on deaf ears.

The ineffectiveness of recent petitions to save Professor Paul Dietz's professorship, remove a statue in front of Swartz Hall and to repeal the ban on alcohol have not been given their due respect. Therefore, it is not any one issue that truly concerns me. Rather, it is the lack of respect given to the students of this University. I should add that several faculty members have voiced similar concern to the apparent lack of consideration of their own feelings. Is this what Bucknell University was created for?

This is not one person's university. President Adams does not speak for everyone, but decisions made by the administration do. If we allow unpopular and unfair decisions to continue to be made without voicing our concerns, then we are failing ourselves. It seems the president and the administration feel that they know what is best for the students and faculty and therefore, do not need to consider our opinions. I do not believe this is the case nor do I believe that because President Adams' wishes for students to address him as 'Bro' that he really knows how many of us think or feel. It is time to stop stepping on toes and make decisions that are well-thought through and are considerate of the concerns of all those in the Bucknell community. Until the concerns of the students and faculty are met this will cease to be an institution where debate is welcomed and conflicts confronted. Is that in the best interest of Bucknell University?

Theatre Company redirects focus of article

TO THE EDITOR:

The members of Company! would like to take this opportunity to respond to last week's article on the winter production of *The Effect of Gamma Rays on Man-in-the-Moon Marigolds*. Ms. Doebber's article, while well-informed and well-written, unfortunately neglected to focus on what we, as the production staff, think is the most important and exciting aspect of the production. For the first time on this campus in recent memory, a mainstage production of the Department of Theatre and Dance has been, and will be, completely designed, directed and run by students.

In the past, students have as a senior project in theatre (and often as honors theses) designed for a mainstage or directed a mainstage; however, this is the first time a group of students have completely taken over the production of a performance. Further, the production is in no way funded by the Department of Theatre and Dance, but is supported completely by Bucknell Student Government. Finally, while the director, Shannon Kearns '97, has undertaken this project as her senior honors thesis in theatre, and Stacy Ayrton '98, in her sub-senior year, is completing an honors project in production management, none of the other students are involved with senior projects; most, in fact, are underclass students doing what they enjoy most: making theatre.

What began as a haphazard conversation between Stacy Ayrton and Rich Dionne GR in the Bison two years ago has, through the hard work and dedication of the members of Company, exploded into this: students doing the almost unthinkable. And doing it, in our opinion, exceptionally well.

Here's to more in the future.

Charter at Penn State denied for good reason

Anti-homosexual group STRAIGHT undermines campus diversity, does not affirm it

TO THE EDITOR:

This letter is in response to Nora Daniels' article in which she critiques the recent Penn State University decision to deny a charter to the student group known as STRAIGHT (STudents Reinforcing Adherence In General Heterosexual Tradition). Nora, I'd like to acknowledge your insight in the recognition of the relevance this decision has regarding the group's civil rights. I am wondering if you would like to participate in an alternative critique of what STRAIGHT's agenda is really about?

Let's examine the "nature" of the nouns, verbs and adjectives which comprise the acronym: *Students* — implies the process of learning, could be considered cultural; *Reinforcing, Adherence* — sounds methodical with potential for punishment or exclusion if not learned "properly", reeking of hegemony; *Tradition* — again, implies learned, passed down from generation to generation; *Heterosexual* — hmmm, is this what is being taught, reinforced with threat of punishment or exclusion if the tradition is not adhered to? BINGO!!

This is precisely the theory that Adrienne Rich asserts in her 1981 essay entitled, "Compulsory Heterosexuality and Lesbian Existence." This is fascinating reading which explores the reasons why such compulsory behavior is beneficial within the hegemonic discourse of patriarchy.

Well, if that's the case, STRAIGHT doesn't need an additional charter. Its charter can be read as being embedded within two texts which immediately come to mind: the Bible (Old or New Testaments, take your pick), and the United States Constitution.

My point is this: STRAIGHT's right to espouse and affirm its values and beliefs is practiced every day within our culture without fear of "punishment". Punishment can manifest itself in various forms such as physical violence, as well as economic and political sanctions. This is a reality many lesbian, gays and bisexuals are subjected to on a regular basis. Therefore, your understanding that "people need support, and in college, campus organizations are important in providing this "service" is correct. But STRAIGHT's right to affirm itself occurs every day. Its agenda does not incorporate tolerance, instead it perpetuates exclusion and punishment.

If the basic tenet of multiculturalism is in celebrating diversity, there must be an understood or assumed "center" (i.e. heterosexual, white, Christian) within the structure (society/culture). The "center" has the capacity to marginalize groups which do not fit the narrow confines of its archetype and will do so if its power is threatened. STRAIGHT is counterproductive to the celebration of diversity. It is not Penn State which misinterpreted the meaning of diversity, rather, it is you who misunderstood the insight which Penn State University had in denying STRAIGHT's charter.

MARY E. WYETH '98
FEBRUARY 26, 1997

TO THE EDITOR:

I am writing in response to last week's article by Nora Daniels concerning the decision of Penn State to deny a charter to a student group that was to be called STudents Reinforcing Adherence In General Heterosexual Tradition, or STRAIGHT. According to the article, the group of students rejects homosexuality and wants to express its disagreement with it. Daniels sees this as hindering efforts at creating an atmosphere of diversity on campus. I have to disagree with this assertion because I have a very different understanding of the meaning of diversity. To celebrate diversity is to celebrate what is unique or different in the culture or lifestyle of a certain group of people. Recognition and celebration of diversity will hopefully bring more respect and understanding to the variety of cultures and lifestyles which exist in our society. I do not truly understand how a group that focuses on celebrating heterosexuality contributes to diversity. Heterosexuality is the lifestyle with which the majority of our society, and certainly the great majority of the population at Bucknell, is familiar. For this reason, it cannot really be deemed as different or unique.

Heterosexuality is celebrated every day in the portrayals of heterosexual life in the media. Heterosexuality is advocated as the correct way of life by laws which deny rights to homosexuals. Heterosexuals are not subjected to any type of oppression or denied any opportunities based on their sexuality. Heterosexuality is already celebrated, but this celebration is not contributing to diversity or to the appreciation of things that are unique. On the contrary, it often contributes to society's general refusal to accept homosexuality. Last week's article also indicated that the student group, STRAIGHT, would focus its activities on expressing its disagreement with homosexuality. Unlike heterosexuality, homosexuality is a lifestyle that is considered different because it is followed by a minority of people in society. I, therefore, must ask myself, how does expressing disagreement toward a lifestyle that is different contribute to diversity and acceptance of what is different? In my opinion, it does not. It certainly does not seem that contributing to diversity is one of the goals that STRAIGHT had in mind.

Groups that form around issues of race, sex, culture or sexuality generally have the purpose of contributing to diversity through raising awareness of these issues and providing support for people who face discrimination based on these issues. Many such groups exist at Bucknell including Friends of Lesbians, Gays, and Bisexuals (FLAG&B), Feminist Outreach, Students for Asian Awareness at Bucknell (SAAB) and South Asian Student Association (SASA) to name just a few. These organizations exist because there is a need for them. They provide a safe place for students to discuss issues such as homophobia, sexism, racism, etc., that they confront at Bucknell and will undoubtedly encounter after departing from Bucknell. In addition, they give students an opportunity to provide education and organize events that make the campus community aware of the issues, and more knowledgeable about cultures and people who are not, in all ways ,the same as them.

Last week's article pondered what the response would be if a group such as STRAIGHT or a white student organization wanted to form at Bucknell. As I stated earlier, groups that form around race or sexuality generally have the purpose of fighting discrimination and heightening awareness. Therefore, it does not seem to me that there are needs for heterosexual or white student groups. These are the groups that hold power in our society; these groups do not face oppression based on their race or sexuality. In addition, the majority of people at Bucknell are white and heterosexual and our society is steeped in heterosexual, white tradition. Therefore, there is apparently no need to raise awareness about the issues of being white or heterosexual. Since these organizations could not have the purposes that organizations focused on race, gender, and sexuality generally have, what could their purpose possibly be? I think there is a danger that these types of organizations would breed intolerance and contribute to further discrimination, especially if they were focused simply on disagreeing with other ways of life like STRAIGHT had proposed to do. In fact, inconsistencies with Penn State's Statement of Intolerance was one of the reasons that STRAIGHT was denied a charter. I think it is commendable when a university enacts a statement against intolerance to promote diversity and to avoid racism, sexism, homophobia and all other forms of discrimination. It seems that an academic and learning environment should not be intolerant, but open to new and different ideas, opinions and ways of life. I agree that everyone has a right to voice any opinion that they wish. However, let us not confuse statements of intolerance with statements of diversity.

Comet Hale-Bopp leaves its mark in space

BY DAVID LIEN, PROFESSOR OF PHYSICS

Already visible in the pre-dawn skies, Comet Hale-Bopp is being proclaimed as the comet of the century.

Discovered simultaneously in 1995 by Alan Hale and Thomas Bopp, comet Hale-Bopp is the most distant comet ever discovered, and has already provided cometary astronomers with a number of new puzzles to solve.

A 30 mile ball of ice and dirt, comet Hale-Bopp is shedding parts of its surface into space as it basks in the warmth of the rapidly approaching Sun. The ices, primarily water and carbon dioxide, sublimate as they are heated, and the gas rapidly expands into the vacuum of space, creating what we see as the bright head of the comet.

Small particles of dirt, once safely ensconced in a frozen matrix of ice, suddenly find themselves on the unprotected surface as the surrounding ice vaporizes into space. With an escape velocity so low that you could literally walk off the surface of the comet into space, many of these dust particles are quickly blown off the surface by the wind of escaping gas. Pushed ever so slowly by sunlight itself, this dust moves away from the nucleus and forms a gently curving tail of dust.

Water and carbon dioxide can suffer another fate from the radiation from the sun: ionization. Ultraviolet light from the Sun strips off an electron from these gases. These ions now see an entirely different picture of interplanetary space. Sunlight is not the only form of energy escaping from the sun. A fast flow of charged particles, the solar wind, speeds away from the sun, dragging with it magnetic fields from the Sun.

The neutral cometary atoms and molecules are blind to this torrent of charged particles and magnetic fields from the sun. But remove an electron, and the gas acts like it stepped through a door into a hurricane. These new ions are quickly accelerated up to the 200+ mile per second speed of the solar wind. On Earth, we see a trail of glowing gas stretching away from the nucleus: the ion tail.

What to look for...

The comet will appear much like its Feb. 20th picture: The long, thin ion tail will stretch away from the bright head of the comet. The brightest cometary ion tails have a faint blue hue to them.

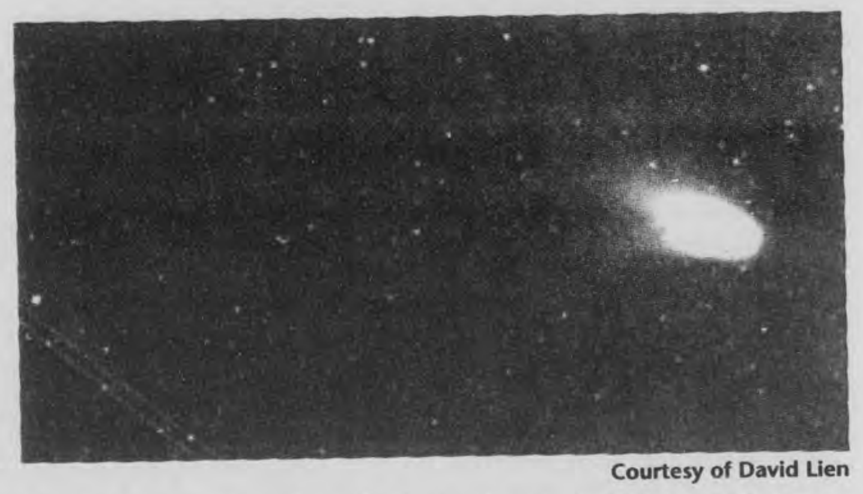
The curving dust tail will become fuller and brighter as the comet approaches its rendezvous with the sun, and will appear white or yellow in color, reminding us that we are looking at reflected sunlight. The head itself will be somewhat spherical in shape, glowing with a ghostly green hue.

If you have a pair of binoculars or a small telescope, you should be able to see some fascinating structures deep within the head of the comet as the rotating surface sputters off gas and dust in different directions.

How to look...

For the month of March, comet Hale-Bopp will shift its position from being visible only in the pre-dawn skies to being visible in the early evening.

In early March, look to the northeast about 20-30 degrees above the horizon at 5 a.m. By mid-March, the comet will be visible low in the northwest just after sunset. By the end of March and through most of April, comet Hale-Bopp will be about 20 degrees above the northwest horizon at the end of twilight. The comet should be brightest during the first week of April, when it is closest to the sun.



Courtesy of David Lien

Comet Hale-Bopp seen from the observatory on February 20. The parallel lines on the lower right are the wing lights of a passing plane.

Why look...

Although at any one time there are usually five to 10 active comets in our solar system, most of them need relatively powerful telescopes to be seen. Bright comets, ones that can be seen easily with the unaided eye, are relatively rare; the average for this century seems to be one every 10 to 15 years.

We have been fortunate to have two bright comets pass by us within one year: Comet Hyakutake from last year, and Comet Hale-Bopp this year. This ends a hiatus of almost 20 years since the last bright comet, Comet West in 1976.

We do not know when the next bright comet will pass.

Caught in the Web: Fun with celebrities

BY CURRAN FILER

Bucknellian Staff Columnist

I hope you enjoyed last week's column. I think it went a little better, and the sites were more interesting than in past columns. This week should be even better so be careful not to get too excited. I felt like delving into the world of famous people. We all know them, we all love them, and now we can harass them by email and box with them. But I didn't tell you to do it.

Chip's Celebrity Home & Email Addresses

`http://home.teclink.net/~chip1120`

If getting celebrity autographs was your hobby, you'd have a list of celebrity addresses too. But if you don't, and you want to write to Bone Thugs 'N' Harmony, or Cal Ripken Jr., you can find their addresses here. There is a special section just for addresses of beautiful women if you want to write to a model. He even has a "Famous Mississippian" section for famous people from, or living in, Mississippi. Don't bother to look in the "Unusual Celebrity Addresses" section because it's for people you've never heard of, like paranormal investigators. Makes me wonder why Chip thinks they're famous.

Celebrity Fare Home Page

`http://pathfinder.com/people`
`/celebrityfare`

Yes, that is the real address. Just an example of the stupid things people do on the web. If you end up bothering to type that thing you will end up at a site dedicated to celebrity restaraunts. You can find menus from some interesting restaraunts like the All-Star Cafe, as well as recipes so you can cook like a star. Nice graphics and simple organization almost make up for the terrible address.

Driveways of the Rich & Famous

`http://www.cris.com/~Driveway`

If you really want to know something about the stars, just look at their driveways. This site features pictures of the driveways of all kinds of stars. But the driveways aren't the important part of this site in my opinion. It's really about all those normal people that surround the stars. John has included interviews with (and even the recipes of) gardeners, mailmen and neighbors. If you really want to find out about the rich & famous, look at the way they treat delivery people. And be sure not to miss the interview with the talking rock at Hugh Hefner's mansion.

Celebrity Slugfest

`http://slugfest.kaizen.net`

This is by far the best celebrity website. If you don't have Shockwave yet, you'll want to get it just for this. Celebrity Slugfest is a little game dreamed up by the folks at Kaizen Works Inc. Basically, you choose a celebrity like O.J. or Madonna, and then you have to fight them. The interface is kind of cute, with a little picture of your hands, and the celebrity's head on a generic body. You move from side to side and punch with your right or left hand using the keyboard. The more you hurt them, the worse the celebrity starts to look. Eventually you knock their head off. The first time I played I knocked Fabio's head off easily, but Letterman gave me a first class beat down.

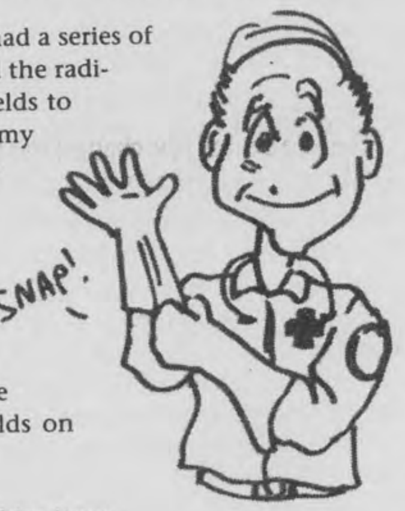
In Slugfest, the celebrities move back and forth on the screen punching you. You have to catch them and punch them instead.

Science & Technology Calendar

Thursday, Feb. 27	Geology Lecture at 8 p.m. in Biology Building Lecture Hall 5 Geologist David Wise will give a lecture "Crater Dating, Techtonics and Kasei Vallis of Mars."
Friday, Feb. 28	Geology Lecture at noon in Carnegie Lecture Hall, Room 208 Geologist David Wise will give a lecture entitled "Basement Tectonics of the Rockies: Some Sacred Cows and a Little Bull."
	Psychology Colloquium at 4 p.m. in Gallery Theatre, Langone Center "Equivalence Judgements in Primates: Why Monkeys Will Never be Scientists," by David Oden from LaSalle College.
Tuesday, Mar. 4	Physics Coffee Talk, noon in Olin 264 Sally Koutsoliotos will speak on "Detecting Neutrions: No Math, No Charge, No Problem." at noon in Olin 264.
	Chemistry Lecture at 7:30 p.m. in Rooke Chemistry Auditorium, Room 116 Dr. William R. Leonard from Merck Research Labs will speak on "Anti-Fungal Drug L-743, 872; From Discovery to Production."

Ask the Doctor: X-ray precautions

BY D.W. STECHSCHULTE, JR., M.D.
DIRECTOR OF ZIEGLER HEALTH CENTER



QUESTION: I recently had a series of x-rays done of my back, and the radiologist did not use lead shields to protect the other parts of my body from the x-rays. I was told the shields were not necessary, but I thought x-rays caused chemical reactions that altered DNA and caused cancer. Are x-rays dangerous? Should we always be protected by the lead shields on certain parts of the body?

ANSWER: X-rays are ubiquitous, they are present in sunshine, they are present in TV and computer monitors, and they are certainly present in the x-ray machines at the hospital. Is there danger with x-rays? Danger may be too strong a word. I prefer healthy respect for them. When used properly, they are extremely safe.

The most common x-ray that most of us have is the dental x-ray. When we have our mouths x-rayed, they always put a lead apron over our chests and abdomen. This is wise because there is a certain amount of deflection of the rays off our teeth and bones, and the lead apron will protect those areas of our body that are most susceptible to radiation (ie., ovaries, testicles and breast tissue).

However, when one has back films, especially of the lumbar area, one can't use the lead aprons because the ovaries/testicles are located too close to the area being x-rayed. As a physician, one must keep the risk-benefit relationship in mind when ordering an x-ray. Is the potential risk of x-ray damage worth the potential benefit of what the x-ray can reveal? Sometimes that question does not have an easy answer.

One must also keep in mind that the technology of the x-ray machines themselves and improvements in the sensitivity of x-ray film in the past few years have improved greatly. What this means is that higher quality pictures are generated with less x-ray exposure.

In the final analysis, the take-home message here is three-fold:

1) Anytime an area of your body can be protected from radiation while filming another part, it will be.

2) With updated technology, less x-rays are used to get better pictures today than even a few years ago.

3) Remember that you get more total body radiation from lying on the sand on the beach for 45 minutes than you get from an average chest x-ray, but that's a whole other kettle of fish!

Engineering Week a semi-success

Despite lack of turnout, Orange Team beats the Blue, 29-27

BY KIM CHITTIM

Engineering Week was not as successful as some had hoped, due to bad scheduling, a controversial change in the structure of the competition, and a lack of interest by some students.

Many of the events scheduled for Engineering Week did not draw much participation from engineering students. Some people blame the lack of participation on the change made this year, from a competition between the five departments to the two Blue and Orange teams which split the college in half.

"The loss of competition between the five departments is why people didn't do it," Kori Anderson '99 said. "Since they took away the competition between the five departments, there was a loss of incentive for students to participate."

"The idea behind [the change] was fine, but overall I think people didn't like it. I can see that they were trying to promote camaraderie within the whole college, but people like the department camaraderie," Andrew Freeston '98 said.

Trudy Cunningham, associate dean of Engineering, thought the main problem with the change to two teams was that it caused a lack of leadership normally seen within the five departments.

Cunningham blames the lack of turnout primarily on bad scheduling. "The biggest mistake we made was not paying attention to the calendar. We managed to do it the week of exams, instead of the week after."

Even the Green Team, formed in protest to the changes, did not have much participation. Paul Deebel '97, one of the organizers of the Green Team, said, "Although there were extensive efforts to make the Green Team work, general apathy really prevented things from getting going." He also agreed with Cunningham that there was bad scheduling because of all of the engineering tests last week.

Engineering Week was not a complete failure, however most of the events did take place, and the Orange team narrowly beat the Blue team with scores of 29 and 27 points respectively. The Green team was present throughout the events, although it could not receive any points. However, the chemical engineers on the Green team were happy to be informed that the winning plaque will remain in the chemical engineering office until an Orange team site can be determined.

"The kids who found time to participate had fun, but not many people participated," Cunningham commented. She contended that the week was a success because "the reason for this week is so we take each other less seriously." Another positive aspect of Engineering Week was that for the first time all of the engineering faculty and staff were invited to participate. Even though they did not participate much, they enjoyed being included.

"The longer it goes without [the competition between the five departments], the more likely we will lose it," Anderson said. She wants the competition to return to the traditional five departmental teams, especially for the first-year students who do not know what it was like in previous years.

Cunningham also expects changes for next year, although she doesn't know if it will go back to the five department teams. "This is about how we can take what's supposed to be fun, redesign it so it is fun, and keep people from taking themselves too seriously. That's what engineers do. They design and redesign continuously."

Comet Hale-Bopp leaves its mark in space

BY DAVID LIEN, PROFESSOR OF PHYSICS

Already visible in the pre-dawn skies, Comet Hale-Bopp is being proclaimed as the comet of the century.

Discovered simultaneously in 1995 by Alan Hale and Thomas Bopp, comet Hale-Bopp is the most distant comet ever discovered, and has already provided cometary astronomers with a number of new puzzles to solve.

A 30 mile ball of ice and dirt, comet Hale-Bopp is shedding parts of its surface into space as it basks in the warmth of the rapidly approaching Sun. The ices, primarily water and carbon dioxide, sublimate as they are heated, and the gas rapidly expands into the vacuum of space, creating what we see as the bright head of the comet.

Small particles of dirt, once safely ensconced in a frozen matrix of ice, suddenly find themselves on the unprotected surface as the surrounding ice vaporizes into space. With an escape velocity so low that you could literally walk off the surface of the comet into space, many of these dust particles are quickly blown off the surface by the wind of escaping gas. Pushed ever so slowly by sunlight itself, this dust moves away from the nucleus and forms a gently curving tail of dust.

Water and carbon dioxide can suffer another fate from the radiation from the sun: ionization. Ultraviolet light from the Sun strips off an electron from these gases. These ions now see an entirely different picture of interplanetary space. Sunlight is not the only form of energy escaping from the sun. A fast flow of charged particles, the solar wind, speeds away from the sun, dragging with it magnetic fields from the Sun.

The neutral cometary atoms and molecules are blind to this torrent of charged particles and magnetic fields from the sun. But remove an electron, and the gas acts like it stepped through a door into a hurricane. These new ions are quickly accelerated up to the 200+ mile per second speed of the solar wind. On Earth, we see a trail of glowing gas stretching away from the nucleus: the ion tail.

What to look for...

The comet will appear much like its Feb. 20th picture: The long, thin ion tail will stretch away from the bright head of the comet. The brightest cometary ion tails have a faint blue hue to them.

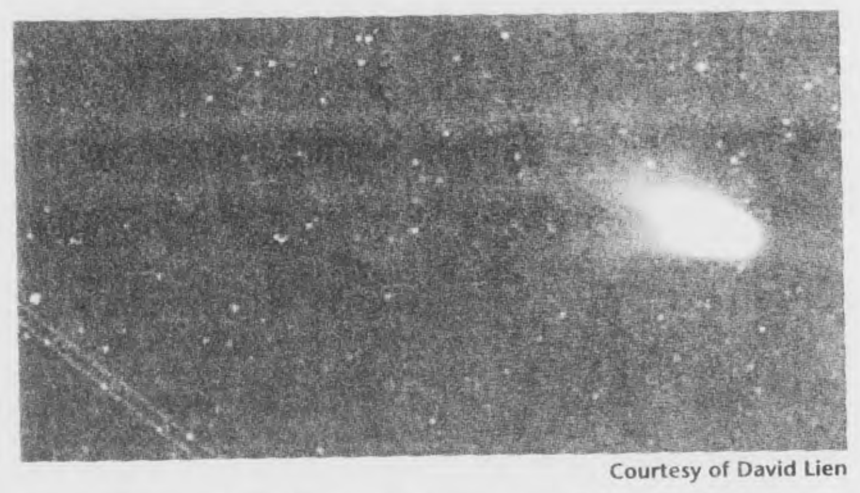
The curving dust tail will become fuller and brighter as the comet approaches its rendezvous with the sun, and will appear white or yellow in color, reminding us that we are looking at reflected sunlight. The head itself will be somewhat spherical in shape, glowing with a ghostly green hue.

If you have a pair of binoculars or a small telescope, you should be able to see some fascinating structures deep within the head of the comet as the rotating surface sputters off gas and dust in different directions.

How to look...

For the month of March, comet Hale-Bopp will shift its position from being visible only in the pre-dawn skies to being visible in the early evening.

In early March, look to the northeast about 20-30 degrees above the horizon at 5 a.m. By mid-March, the comet will be visible low in the northwest just after sunset. By the end of March and through most of April, comet Hale-Bopp will be about 20 degrees above the northwest horizon at the end of twilight. The comet should be brightest during the first week of April, when it is closest to the sun.



Courtesy of David Lien

Comet Hale-Bopp seen from the observatory on February 20. The parallel lines on the lower right are the wing lights of a passing plane.

Why look...

Although at any one time there are usually five to 10 active comets in our solar system, most of them need relatively powerful telescopes to be seen. Bright comets, ones that can be seen easily with the unaided eye, are relatively rare; the average for this century seems to be one every 10 to 15 years.

We have been fortunate to have two bright comets pass by us within one year: Comet Hyakutake from last year, and Comet Hale-Bopp this year. This ends a hiatus of almost 20 years since the last bright comet, Comet West in 1976.

We do not know when the next bright comet will pass.

Caught in the Web: Fun with celebrities

BY CURRAN FILER
Bucknellian Staff Columnist

I hope you enjoyed last week's column. I think it went a little better, and the sites were more interesting than in past columns. This week should be even better so be careful not to get too excited. I felt like delving into the world of famous people. We all know them, we all love them, and now we can harass them by email and box with them. But I didn't tell you to do it.

Chip's Celebrity Home & Email Addresses
`http://home.teclink.net/-chip1120`

If getting celebrity autographs was your hobby, you'd have a list of celebrity addresses too. But if you don't, and you want to write to Bone Thugs 'N' Harmony, or Cal Ripken Jr., you can find their addresses here. There is a special section just for addresses of beautiful women if you want to write to a model. He even has a "Famous Mississippian" section for famous people from, or living in, Mississippi. Don't bother to look in the "Unusual Celebrity Addresses" section because it's for people you've never heard of, like paranormal investigators. Makes me wonder why Chip thinks they're famous.

Celebrity Fare Home Page
`http://pathfinder.com/people`
`/celebrityfare`

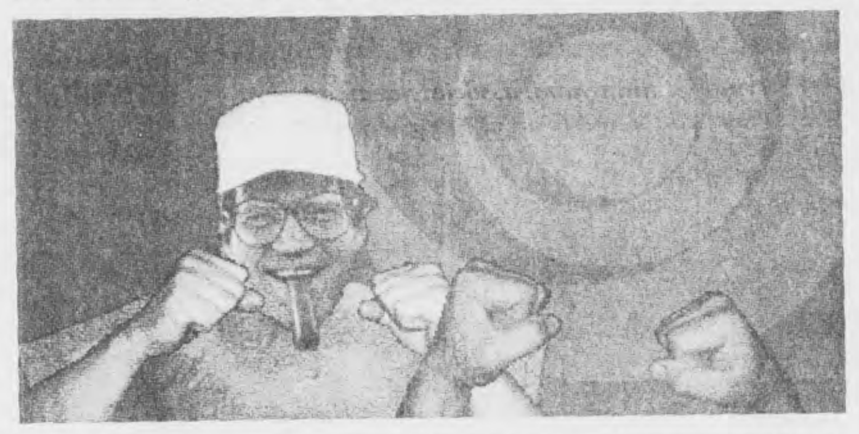
Yes, that is the real address. Just an example of the stupid things people do on the web. If you end up bothering to type that thing you will end up at a site dedicated to celebrity restaraunts. You can find menus from some interesting restaraunts like the All-Star Cafe, as well as recipes so you can cook like a star. Nice graphics and simple organization almost make up for the terrible address.

Driveways of the Rich & Famous
`http://www.cris.com/-Driveway`

If you really want to know something about the stars, just look at their driveways. This site features pictures of the driveways of all kinds of stars. But the driveways aren't the important part of this site in my opinion. It's really about all those normal people that surround the stars. John has included interviews with (and even the recipes of) gardeners, mailmen and neighbors. If you really want to find out about the rich & famous, look at the way they treat delivery people. And be sure not to miss the interview with the talking rock at Hugh Hefner's mansion.

Celebrity Slugfest
`http://slugfest.kaizen.net`

This is by far the best celebrity website. If you don't have Shockwave yet, you'll want to get it just for this. Celebrity Slugfest is a little game dreamed up by the folks at Kaizen Works Inc. Basically, you choose a celebrity like O.J. or Madonna, and then you have to fight them. The interface is kind of cute, with a little picture of your hands, and the celebrity's head on a generic body. You move from side to side and punch with your right or left hand using the keyboard. The more you hurt them, the worse the celebrity starts to look. Eventually you knock their head off. The first time I played I knocked Fabio's head off easily, but Letterman gave me a first class beat down.



In Slugfest, the celebrities move back and forth on the screen punching you. You have to catch them and punch them instead.

Science & Technology Calendar

Thursday, Feb. 27	<u>Geology Lecture at 8 p.m. in Biology Building Lecture Hall 5</u> Geologist David Wise will give a lecture "Crater Dating, Techtonics and Kasei Vallis of Mars."

Birds takes a comic flight within a city in the sky

Aristophanes' comedy of political strife within the Greek city of Athens unsuccessfully searches for a world free of tyrrany

BY KATRYNA ANDRUSIK

The Aquila Theatre Company of London's production introduces the gods Heracles, Poseidon, Prometheus and Todgerrubber to to the uncorrupted world that Hoopoe tries to create in the sky.

The University's Humanities Institute welcomes the Aquila Theatre Company of London, as they perform Aristophanes's *Birds*.

Birds tells the story of two Athenians, Makedo and Goodhope, who travel throughout fifth century B.C. Greece in search of a world unpolluted by corrupt leaders, tyrrany and war. Eventually they find Hoopoe, a man who has been turned into a bird, and begin to build a special city within the sky. After this "perfect home" has been constructed, it slowly begins to fall apart until conflicts with the gods and other human beings results in a tyrannical state ruled by none other than Makedo himself.

Aristophanes wrote this comedy, which is one of the eight that have survived to modern day, in reaction to the political strife he had seen around him. He often parodies the Greek tragedy and easily combines fantasy and satire to make his plays complete.

Translating this work for the stage has often proved difficult, as Aristophanes often used sexual and lewd phrases in his pieces. This is the tenth play which Peter Meineck has translated and produced for Aquila, which he founded in 1991.

The Aquila Theatre Company boasts a multi-talented cast of performers with experience in every aspect of acting. They are well-known for their treatment of classical theatre and have toured in Europe, Canada and the United States, including performances in over 60 various universities. Last year they visited the University with the presentation of Book I of the Iliad, which was well received by the students and faculty.

One of the key sponsors of this event is the Humanities Institute, founded recently by classics professor Mark Padilla.

Professor Padilla hopes that this organization will bring together different departments and create a more in depth study of a particular theme for a year. 1997-1998 will encompass the topic "Comedies of Ideas and Ideas of Comedies," a look at comedy from the ancient world to present day. The theater and dance, modern languages and classics departments have already agreed to format classes over the next year in direct relation to this subject.

Speakers and performers associated with comedy will also be brought into the University. Padilla would like to see interdisciplinary courses within the humanities which pertain to the issue and contribute to the encouragement of the theme on campus.

Birds can be seen at 8 p.m. on Monday in the Weis Center. The production will be sponsored by various benefactors, which includes the Association for the Arts, the Classics Department and Comparative Western Humanities. This presentation is the first of many activities in the 1996-97 school year supported by the newly founded Humanities Institute. Because of the sponsorship, this event will be free to Bucknell students and their visitors.

No ordinary recital: professor brings new sounds to the piano

BY SHETAL MITHANI
Bucknellian Staff Writer

Lois Svard incorporates dimes, which produce different piano sounds, into her experimental performance.

People, buzzing with excitement, crowd into a room and wait for the performer to bring the piano to life. The audience listens intently, anticipating the usual Bach or Beethoven piece, but to their surprise they hear intriguing, new sounds and styles.

This is a description of a typical piano recital that Lois Svard, associate professor of music, would give. She is set apart from most pianists because of her unusual contemporary repertoire.

"I really enjoy playing fresh, new music. I tend to work mainly with American experimental music," Svard said.

> *"I think [aspiring young pianists] should be open minded and willing to try anything."*
> *—Lois Svard,*
> *Associate Professor of Music*

The pieces Svard is playing at her recital are typical of her contemporary repertoire. "Four Imaginings" by Kirk Nurock is a 20 minute solo piece written especially for Svard. "Departures" by Stephen Scott is a set of six miniatures. "Two Etudes: Galamb Borong (#7); Fém (#8)" by György Ligeti, is an intricate technical piece. "Ear-Walking" by Annea Lockwood uses many experimental styles and emphasizes the internal sounds of the piano. The final piece is "Variations on the Orange Cycle" by Elodie Lauten, which is distinct for its improvisational style.

Svard's zeal for the piano started when she was five years old and is still going strong. "It's just something I've always enjoyed," Svard said smiling.

Svard has performed throughout the country and in Europe.

"I like trying to learn and play various styles of music. When the composers first send me their music, it's exciting because I never know how the piece will turn out," Svard said.

One of the new styles Svard will experiment with at her upcoming recital is the use of dimes in the piano to detune the strings and pluck or strum the strings to produce different sounds.

"I think [aspiring young pianists] should be open minded and willing to try anything. There is a lot of exciting stuff out there that they could easily miss out on," she said.

Svard's recital is this Friday at 8 p.m. in the Weis center.

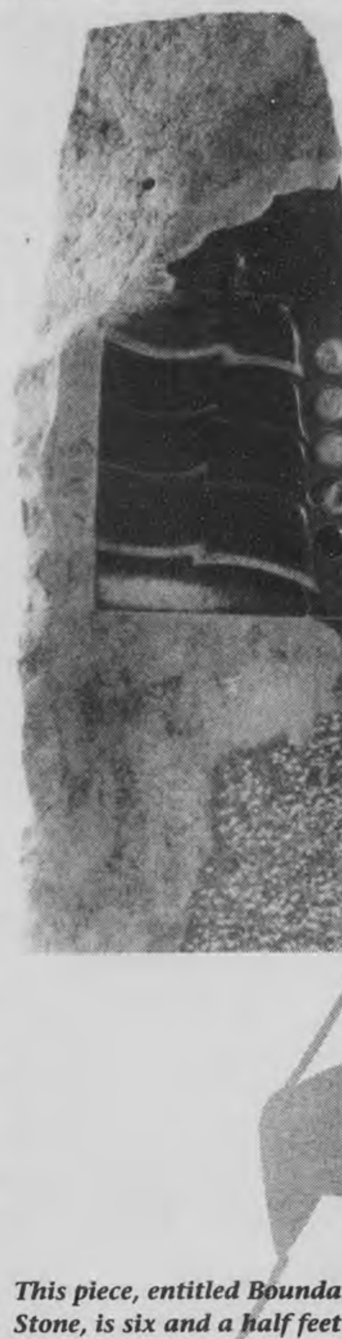
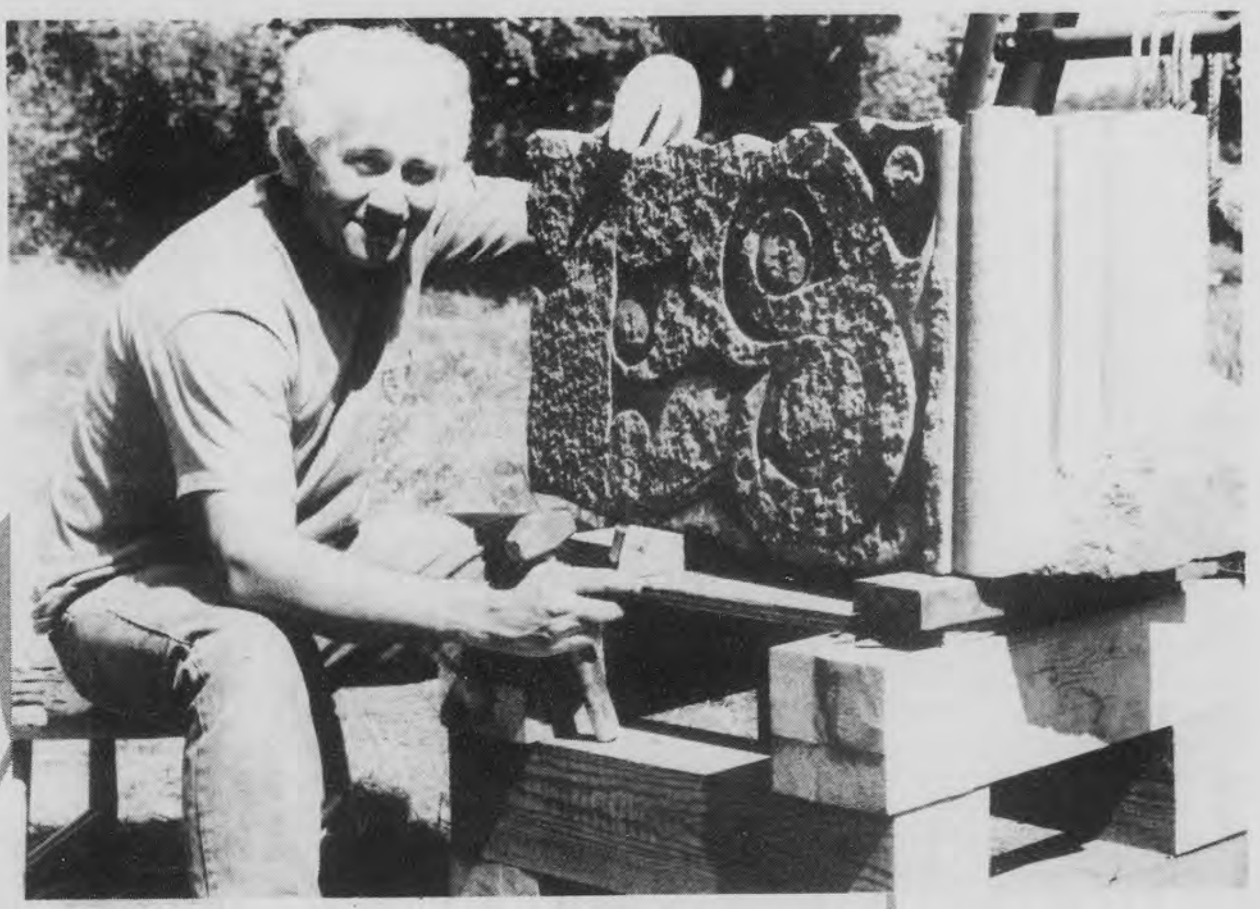
Mysteries behind unique sculptures chiseled out

BY RACHEL DOEBBER
Bucknellian Staff Writer



This piece, entitled Boundary Stone, is six and a half feet tall, weighs over 2000 pounds and is carved out of granite from Maine.



Lasansky works on a carving that he titled "Fragment" which incorporates many architectural forms such as columns. Most of his work is done at his cabin on Vinalhaven Island or here in Lewisburg, in a room at the physical plant facility. He does not have one specific idea of what he will carve before he starts, but he has a visual image of many ideas and forms that take shape as he works.

In a little room set off to the side in the art barn surrounded by saw dust, amid the drone of a power saw and the smell of wet clay, Professor William Lasansky told the story of how he became interested in sculpture. "It all started when I was three. I mixed mud and made little men. One thing lead to another," he said, smiling.

Years later, this professor and chair of the art department is still carving sculptures, not out of mud, but out of granite pieces that weigh up to 2000 pounds.

Lasansky has spent the past ten years sculpting 17 pieces for his exhibit that is to open this Saturday in the Weis Center.

To him, the exhibit "is an attempt to show people what inspired me to carve and present work in stone carving."

Taking off his glasses, Lasansky leaned over to show me several photographs of pieces that are to be included in his exhibit, "Carving in Context: Granite Sculpture by William Lasansky."

"This one here," he said pointing to one of the photos, "is about 6 1/2 feet tall and weighs over 2000 pounds. I call this piece Boundary Stone. It is carved from granite found in Maine that was discarded from a quarry. It spent 150 years under saltwater which explains all the markings and discoloration."

For the past 50 years, Lasansky has spent his summer vacations in Maine on the island of Vinalhaven, which has many stone formations. "When I was a little kid, I used to see all these small ornamental pieces of stone in an old quarry left over from the pre-Great Depression days. I used to ask myself why they were there and who did them," he said.

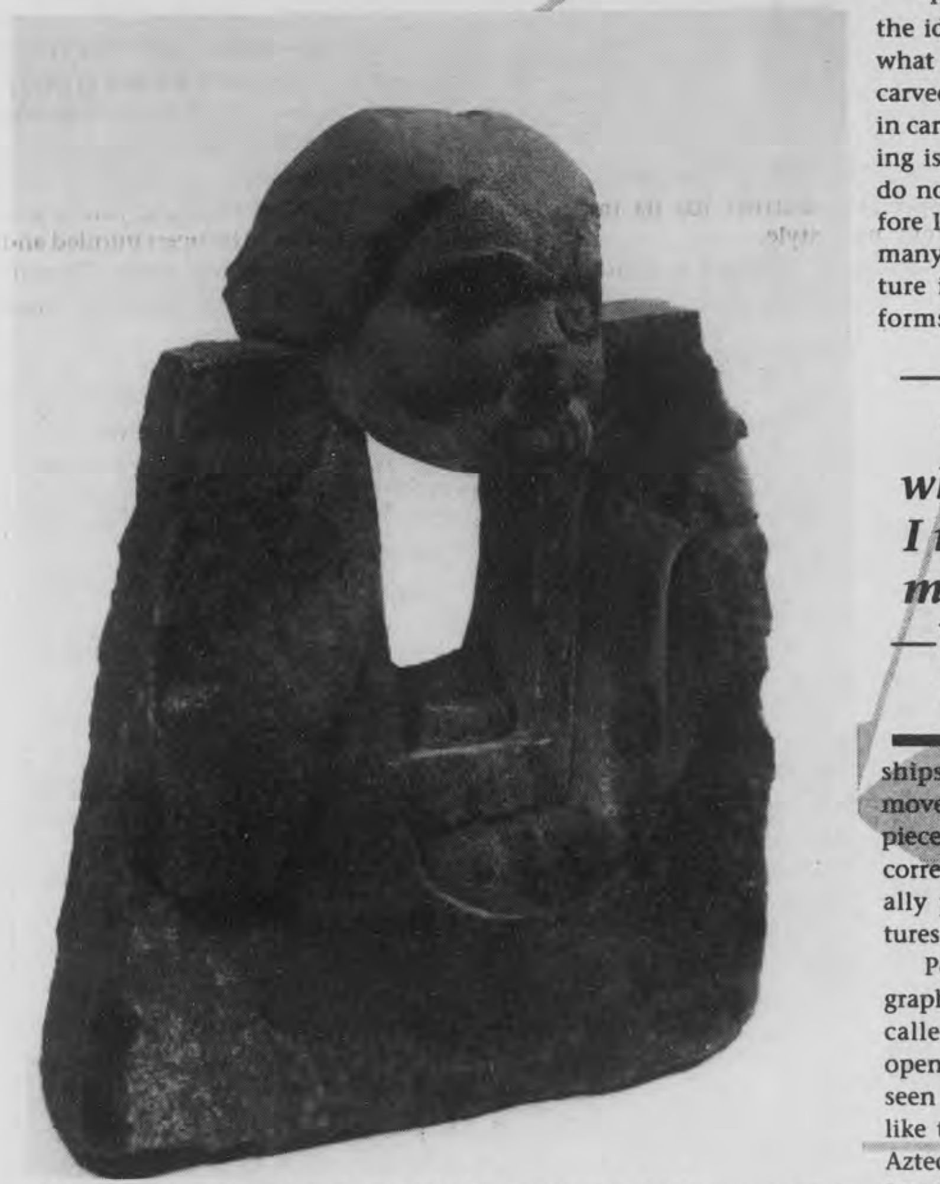
Lasansky later learned that these were pieces abandoned when the quarr was closed due to the Great Depression. The pieces were not artwork, but were leftover from quarry workers who carved out granite pieces for an architectural firm. As he got older, Lasansky said, "Looking at them [granite formations] makes me want to do something out of it."

Lasansky gets his pieces of granite from Maine and carves them at his cabin on Vinalhaven Island or brings them back to Lewisburg where he works on them in a room located in the physical plant facility. "I find a stone I like and knock off the parts I don't want. The trick is not to knock off something you do want," he commented half-jokingly, while adding, "the concept is easy but very labor intensive."

As I listen to him talk, I imagine him carving while following a great big blueprint. When asked if he has a preconceived plan for his piece, his response is surprising.

> *"It all started when I was three. I mixed mud and made little men."*
> *—William Lasansky*
> *sculptor, professor*

"I start with a partial idea but the idea has to evolve. If I knew what the whole piece was before I carved it, I wouldn't be interested in carving sculptures. Part of carving is seeing how ideas evolve. I do not have one specific idea before I start, it is a visual image of many [ideas]. For you see, a sculpture is a formal arrangement of forms where there are relationships between the size, texture, movement and proportions of the piece. I find the relationship that corresponds with what I find visually powerful from other sculptures I've seen."



This sculpture by Lasansky is called "Aperture," which means opening and is inspired by forms in ancient Mexican Aztec and Mayan temple ruins.

Pointing to a second photograph, Lasansky said, "This one is called "Aperture" which means opening. It relates to the forms seen in ancient ruins in Mexico; like the temple complexes of the Aztecs and Mayans. As I was carving this piece, the openings in the homes found in Mesa Verde also came back to mind."

Lasansky does not copy other artists' works, but uses pieces from other artists and ancient civilizations as inspirations for his own sculptures. "Sources from art history and civilizations are not well known. They [stone sculptures from ancient worlds] are very different from ours. They are interesting to me because they are carved in stone, whereas today there are few stone sculptures," he said.

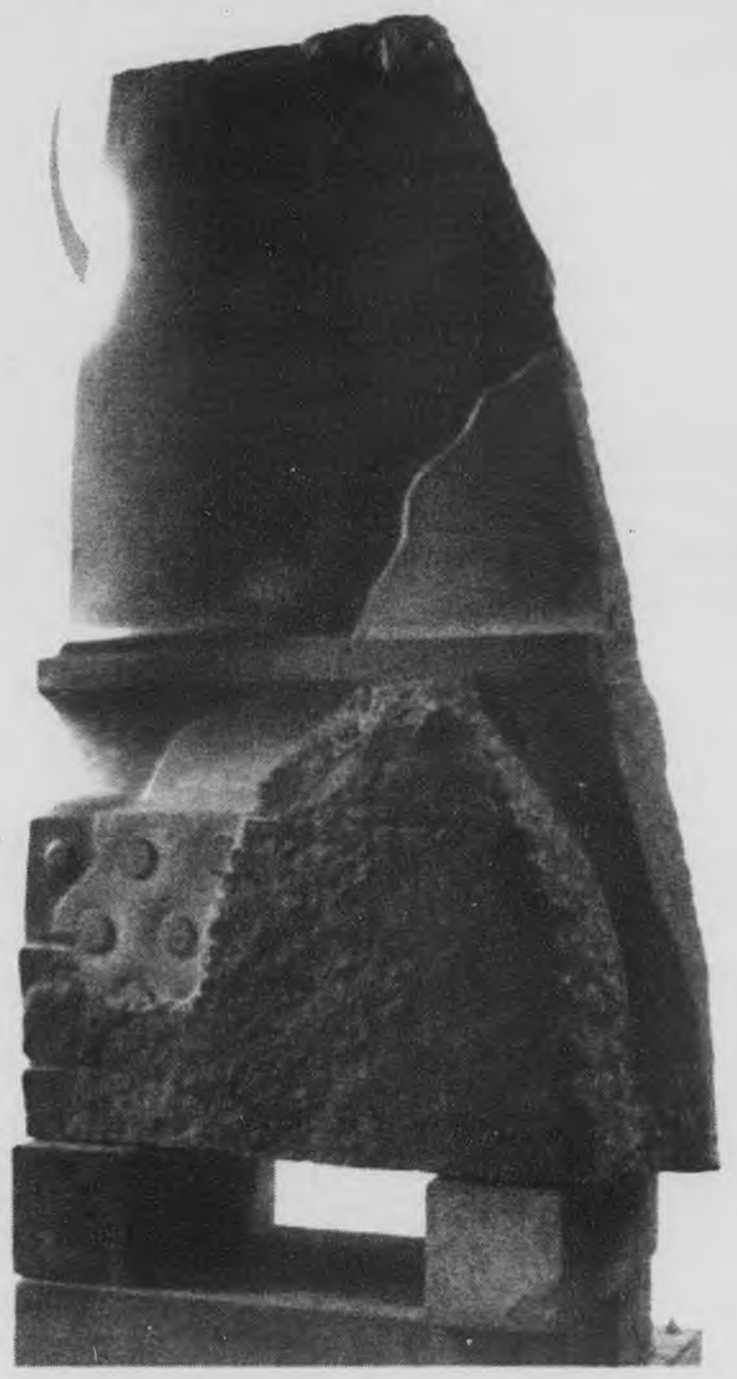
When I asked him what "Aperture" symbolizes, he replied, "The point of view is different between artist and spectator. What's most meaningful is what you see in [the piece of sculpture]. People think there's just one meaning. However, it's multifaceted."

In between carving five and six foot sculptures, Lasansky finds time to chair and teach in the art department.

How does his work relate to his teaching?

"That's a good question, " he replied, "but in all areas, we [the professors] teach what we know because we do it. As a teacher, everything I do in work relates to teaching. In art, specifically, I often ask students to look up works of art from other cultures when it would help them; broaden their perspective. What other art has been, what art is today, it all comes into the classroom."

An opening reception for Lasansky's exhibit will be from 4 p.m. to 6 p.m. this Saturday in the lobby of the Weis Center. The exhibit lasts from Saturday through April 19.



Known as "Artifact 3," this sculpture weighs over 500 lbs. and is carved out of black granite.

Birds takes a comic flight within a city in the sky

Aristophanes' comedy of political strife within the Greek city of Athens unsuccessfully searches for a world free of tyrrany

BY KATRYNA ANDRUSIK

The University's Humanities Institute welcomes the Aquila Theatre Company of London, as they perform Aristophanes's *Birds*.

Birds tells the story of two Athenians, Makedo and Goodhope, who travel throughout fifth century B.C. Greece in search of a world unpolluted by corrupt leaders, tyrrany and war. Eventually they find Hoopoe, a man who has been turned into a bird, and begin to build a special city within the sky. After this "perfect home" has been constructed, it slowly begins to fall apart until conflicts with the gods and other human beings results in a tyrannical state ruled by none other than Makedo himself.

Aristophanes wrote this comedy, which is one of the eight that have survived to modern day, in reaction to the political strife he had seen around him. He often parodies the Greek tragedy and easily combines fantasy and satire to make his plays complete.

The Aquila Theatre Company of London's production introduces the gods Heracles, Poseidon, Prometheus and Todgerrubber to to the uncorrupted world that Hoopoe tries to create in the sky.

Translating this work for the stage has often proved difficult, as Aristophanes often used sexual and lewd phrases in his pieces. This is the tenth play which Peter Meineck has translated and produced for Aquila, which he founded in 1991.

The Aquila Theatre Company boasts a multi-talented cast of performers with experience in every aspect of acting. They are well-known for their treatment of classical theatre and have toured in Europe, Canada and the United States, including performances in over 60 various universities. Last year they visited the University with the presentation of Book I of the Iliad, which was well received by the students and faculty.

One of the key sponsors of this event is the Humanities Institute, founded recently by classics professor Mark Padilla.

Professor Padilla hopes that this organization will bring together different departments and create a more in depth study of a particular theme for a year. 1997-1998 will encompass the topic "Comedies of Ideas and Ideas of Comedies," a look at comedy from the ancient world to present day. The theater and dance, modern languages and classics departments have already agreed to format classes over the next year in direct relation to this subject.

Speakers and performers associated with comedy will also be brought into the University. Padilla would like to see interdisciplinary courses within the humanities which pertain to the issue and contribute to the encouragement of the theme on campus.

Birds can be seen at 8 p.m. on Monday in the Weis Center. The production will be sponsored by various benefactors, which includes the Association for the Arts, the Classics Department and Comparative Western Humanities. This presentation is the first of many activities in the 1996-97 school year supported by the newly founded Humanities Institute. Because of the sponsorship, this event will be free to Bucknell students and their visitors.

No ordinary recital: professor brings new sounds to the piano

BY SHETAL MITHANI

Bucknellian Staff Writer

People, buzzing with excitement, crowd into a room and wait for the performer to bring the piano to life. The audience listens intently, anticipating the usual Bach or Beethoven piece, but to their surprise they hear intriguing, new sounds and styles.

This is a description of a typical piano recital that Lois Svard, associate professor of music, would give. She is set apart from most pianists because of her unusual contemporary repertoire.

"I really enjoy playing fresh, new music. I tend to work mainly with American experimental music," Svard said.

The pieces Svard is playing at her recital are typical of her contemporary repertoire. "Four Imaginings" by Kirk Nurock is a 20 minute solo piece written especially for Svard. "Departures" by Stephen Scott is a set of six miniatures. "Two Etudes: Galamb Borong (#7): Fém (#8)" by György Ligeti, is an intricate technical piece. "Ear-Walking" by Annea Lockwood uses many experimental styles and emphasizes the internal sounds of the piano. The final piece is "Variations on the Orange Cycle" by Elodie Lauten, which is distinct for its improvisational style.

Lois Svard incorporates dimes, which produce different piano sounds, into her experimental performance.

> *"I think [aspiring young pianists] should be open minded and willing to try anything."*
> *—Lois Svard,*
> *Associate Professor of Music*

Svard's zeal for the piano started when she was five years old and is still going strong. "It's just something I've always enjoyed," Svard said smiling.

Svard has performed throughout the country and in Europe.

"I like trying to learn and play various styles of music. When the composers first send me their music, it's exciting because I never know how the piece will turn out," Svard said.

One of the new styles Svard will experiment with at her upcoming recital is the use of dimes in the piano to detune the strings and pluck or strum the strings to produce different sounds.

"I think [aspiring young pianists] should be open minded and willing to try anything. There is a lot of exciting stuff out there that they could easily miss out on," she said.

Svard's recital is this Friday at 8 p.m. in the Weis center.

Mysteries behind unique sculptures chiseled out

BY RACHEL DOEBBER

Bucknellian Staff Writer

In a little room set off to the side in the art barn surrounded by saw dust, amid the drone of a power saw and the smell of wet clay, Professor William Lasansky told the story of how he became interested in sculpture. "It all started when I was three. I mixed mud and made little men. One thing lead to another," he said, smiling.

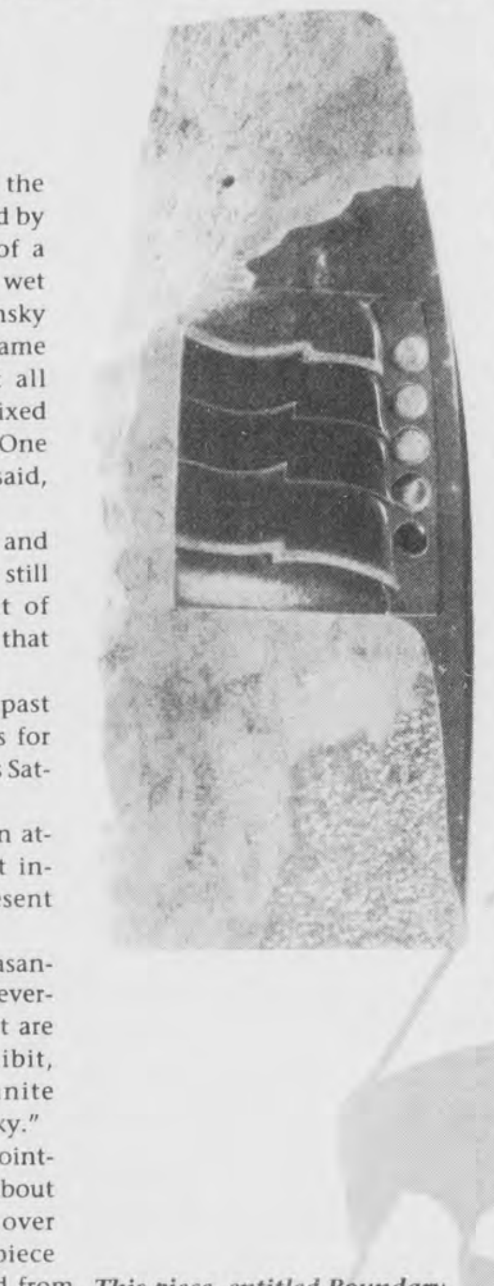
Years later, this professor and chair of the art department is still carving sculptures, not out of mud, but out of granite pieces that weigh up to 2000 pounds.

Lasansky has spent the past ten years sculpting 17 pieces for his exhibit that is to open this Saturday in the Weis Center.

To him, the exhibit "is an attempt to show people what inspired me to carve and present work in stone carving."

Taking off his glasses, Lasansky leaned over to show me several photographs of pieces that are to be included in his exhibit, "Carving in Context: Granite Sculpture by William Lasansky."

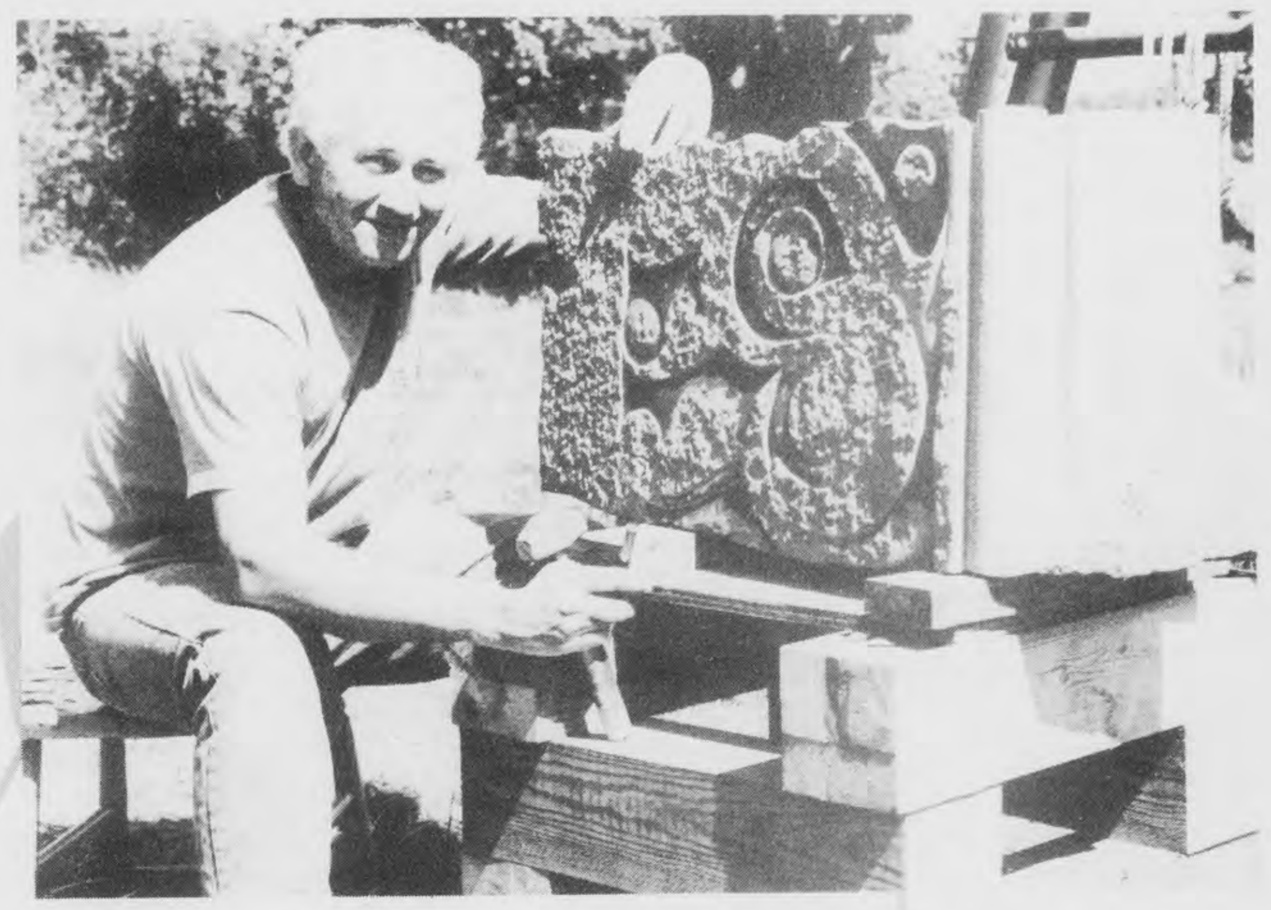
"This one here," he said pointing to one of the photos, "is about 6 1/2 feet tall and weighs over 2000 pounds. I call this piece Boundary Stone. It is carved from granite found in Maine that was discarded from a quarry. It spent 150 years under saltwater which explains all the markings and discoloration."



This piece, entitled Boundary Stone, is six and a half feet tall, weighs over 2000 pounds and is carved out of granite from Maine.

For the past 50 years, Lasansky has spent his summer vacations in Maine on the island of Vinalhaven, which has many stone formations. "When I was a little kid, I used to see all these small ornamental pieces of stone in an old quarry left over from the pre-Great Depression days. I used to ask myself why they were there and who did them," he said.

Lasansky later learned that these were pieces abandoned when the quarr was closed due to the Great Depression. The pieces were not artwork, but were leftover from quarry workers who carved out granite pieces for an architectural firm. As he got older, Lasansky said, "Looking at them [granite formations] makes me want to do something out of it."



Lasansky works on a carving that he titled "Fragment" which incorporates many architectural forms such as columns. Most of his work is done at his cabin on Vinalhaven Island or here in Lewisburg, in a room at the physical plant facility. He does not have one specific idea of what he will carve before he starts, but he has a visual image of many ideas and forms that take shape as he works.

Lasansky gets his pieces of granite from Maine and carves them at his cabin on Vinalhaven Island or brings them back to Lewisburg where he works on them in a room located in the physical plant facility. "I find a stone I like and knock off the parts I don't want. The trick is not to knock off something you do want," he commented half-jokingly, while adding, "the concept is easy but very labor intensive."

As I listen to him talk, I imagine him carving while following a great big blueprint. When asked if he has a preconceived plan for his piece, his response is surprising.

"I start with a partial idea but the idea has to evolve. If I knew what the whole piece was before I carved it, I wouldn't be interested in carving sculptures. Part of carving is seeing how ideas evolve. I do not have one specific idea before I start, it is a visual image of many [ideas]. For you see, a sculpture is a formal arrangement of forms where there are relationships between the size, texture, movement and proportions of the piece. I find the relationship that corresponds with what I find visually powerful from other sculptures I've seen."

CAMPUS CALENDAR

Thursday, February 27

4 & 7 p.m.—Third World Film Series, *Samsara*, Coleman 120

7 p.m.—MC Critical Dialogues, Langone Center Gallery Theater

7 p.m.—Focus Semester Lecture, "No Mohicans in Last of the Mohicans,'" Maurice Collins, College of Misericordia, Dana Lecture Hall 132

8 p.m.—Geology Talk, "Crater Dating, Tectonics and Kasei Vallis of Mars," Donald Wise, Franklin and Marshall, former deputy director and chief scientist with NASA's lunar exploration office, Biology Bldg. Lecture Hall 5

Friday, Febraury 28

Noon—Geology Talk, "Basement Tectonics of the Rockies: Some Sacred Cows and a Little Bull," Donald Wise, Franklin and Marshall, former deputy director and chief scientist with NASA's lunar exploration office, Carnegie Lecture Hall 208

4 p.m.—Psychology colloquium, "Equivalence Judgments in Primates: Why monkeys will never be scientists," David Oden, LaSalle College, Langone Center Gallery Theatre

4:30 & 8 p.m.—Hilltop Film, *Love and Anarchy*, Langone Center Forum

8 p.m.—Cap & Dagger Production,*The Effects of Gamma Rays On Man-In-The-Moon Marigolds* directed by Sannon Kearns '97, Tustin Studio Theatre

8 p.m.—BAC Hypnotist: Astonishing Neal, Langone Center Terrace Room

8 p.m.—Lois Svard, piano, Weis Center

Saturday, March 1

4-6 p.m.—Weis Center Exhibit Opening/Artist's Reception: "Carving in Context: Granite Sculpture by William Lasansky," Weis Center Lobby

5 p.m.—Catholic Liturgy, Rooke Meditation Chapel

7 p.m.—Wrestling vs. Virginia, Davis Gym

8 p.m.—Cap & Dagger Production: *The Effects of Gamma Rays On Man-In-The-Moon Marigolds* directed by Sannon Kearns '97, Tustin Studio Theatre

9 p.m.—BAC Comedienne, Sabrina Matthes, Langone Center Bison

10:30 p.m.—BAC Movie, *Preacher's Wife*, $1 admission, Langone Center Forum

Sunday, March 2

2:30 p.m.—Installation Service of Chaplain Ian Oliver, Rooke Chapel

4 p.m.—Catholic Liturgy

7:30 p.m.—Spring Concert: The Rooke Chapel Choir in honor of installation of Chaplain Ian Oliver, Rooke Chapel

8 p.m.—Cap & Dagger Production: *The Effects of Gamma Rays On Man-In-The-Moon Marigolds* directed by Sannon Kearns '97, Tustin Studio Theatre

Monday, March 3

8 p.m.—Play, *Birds*, written by Aristophanes, presented by Aquila Productions, Weis Center

8 p.m.—Play, *The Effect of Gamma Rays on Man-in-the-Moon Marigolds*, written by Paul Zindel, directed by Shannon Kearns '97, Tustin Studio Theatre

Tuesday, March 4

Noon—Physics Coffee Talk, "Detecting Neutrinos: no mass, no charge, no problem," Sally Koutsoliotas, 264 Olin Science

Noon—Religious Studies Forum, "As We Take Back Our Culture," Tom Greaves, Walls Lounge, Langone Center

5-6 p.m.—Honors/Master's Thesis Workshop, Writing Center, 200G Roberts Hall

4:30 p.m.—Lecture about radical decade of 60s, Yuri Kochiyama, community activist in Harlem, Forum, Langone Center

7:30 p.m.—Merck-Bucknell Lecture Series, "Antifungal Drug L-743,872: From Discovery to Production," William Leonard, senior research chemist, Merck Research Labs, Rooke Chemistry Auditorium

8 p.m.—Guest recital, "Art/Piano Concert," Susan and Michael Grace, Bucknell Hall

8 p.m.—A cappella performance, The Flirtations, Center Gallery, Langone Center

9 p.m.—Lecture about Asian-American Movement, Yuri Kochiyama, Terrace Room, Langone Center

Wednesday, March 5

5 p.m.—Driver Authorization Test, Forum, Langone Center

10:30 p.m.—BAC Movie: "Preacher's Wife," $1 admission, Langone Center Forum

Thursday, March 6

Noon—Mathematics Lunch Talk, "An Analytic Theory for Power Law Detection in Multiplicative Noise," David Andescavage, sponsored by Phi Mu Epsilon and MAA, 302 Langone Center

Noon & 7 p.m.—Film, "The Sunrise Dance," Women's Resource Center/Focus Semester Film, Gallery Theatre, Langone Center

4 p.m. & 7 p.m.—Third World Film Series, *My Footsteps in Baragua*, 120 Coleman

4:30 p.m.—Race/Gender Center Lecture, "Transgressive Desire at Social Critique: Representations of Interracial Love in the Unlikely Couple Films," Tom Wartenberg, Mount Holyoke, Gallery Theatre, Langone Center

8 p.m.—Focus Semester Concert, Native American vocalist Lanelle Stevenson, with David Yeomans, piano, and Alicia Suarez, flute, Bucknell Hall

Friday, March 7

Noon—Intercultural panel highlighting International Women's Day, Cave, Langone Center

4 p.m.—Biology Seminar Series, "Developmental Studies on Chaetopterus, the Parchment Work," William Eckberg, Howard University, Rooke Chapel Chemistry Auditorium

4:30 & 8 p.m.—Hilltop Film Series, *Salaam Bombay!*, Hindi with English subtitles, Vaughan Literature Auditorium

5 p.m.—Senior Countdown, "Smart to Practice: The Importance of Professional Etiquette!," Tim Tenon and Chris MacGill, Terrace Room Langone Center

7 p.m.—Asian Awareness Week Dinner, Larison Dining Hall

8 p.m.—Casatt String Quartet with Lois Svard, tickets $15, Weis Center

9 p.m.—Performance group, here*and*now, Forum, Langone Center

SUMMER SCHOOL FOR PEOPLE ON THEIR WAY TO THE TOP.

If you didn't sign up for ROTC as a freshman or sophomore you can still catch up this summer by attending Army ROTC Camp Challenge, a paid six-week course in leadership. Apply now. You may qualify for a $4,000 scholarship and advanced officer training when you return to campus in the fall. You'll also have the self-confidence and discipline you need to succeed in college and beyond.

ARMY ROTC
THE SMARTEST COLLEGE COURSE YOU CAN TAKE

For details, visit Spratt House or call
524-1013

The 1997 yearbook is almost complete, and we're ready to SUBMIT it to the publisher. We have the layouts and the stories. Now, all we need are the PICTURES. Do you have any photos laying around your room that you want TO see in the 1997 yearbook? If the answer is yes, send them to L'AGENDA, C-3906, by Tuesday, April 1st. Make sure you put your name and box number (home address if you're a senior) on the back of the picture, so we can return them next fall when the yearbooks arrive.

THANKS!

Patriot League basketball tournaments

Baseball at Georgetown

BUCKNELL UNIVERSITY

SPORTS THURSDAY

Athlete of the Week: *J.R. Holden (basketball) was named Patriot League player of the week after his fourth straight 20-point game.*

Welch, Bison finish strong at Army

Holden tops 20-point mark for fourth straight game; Bison head to tourney as #2 seed

BY CHRIS ELLIS
Bucknellian Staff Writer

It took more than 60 minutes of basketball, but the Bucknell men's basketball team finally solved Army.

Embarrassed by the Black Knights in a 12-point loss at home last month, and held in check throughout the first half of the rematch at West Point, the Bison rallied behind forward Tom Welch '97 in the second half to break open a three-point halftime lead and finally put the clamps on the Black Knights, 76-67.

"We had to start looking inside to Tom and Dan (Bowen) to be able to beat Army," Head Coach Pat Flannery said. "Once we started attacking them as a team, we became really tough to beat."

Welch scored 16 points and made several key second-half buckets, and J.R. Holden continued his run for Patriot League player of the year as Bucknell clinched the League tournament's second seed with the win.

"In the first game (against Army), we got behind, and got away from what we wanted to do," Flannery said. "We tried to make a comeback relying on just shooting the basketball. We have some good shooters, but we're not the kind of team that can do that."

The first half of Saturday's rematch looked like it would provide more of the same headaches for Flannery's club. His team's chances for the no. 1 seed all but vanished in the loss to the Black Knights earlier, and no. 2 seed could have gone by the wayside with another loss. The Bison couldn't work the ball inside to either Welch or Dan Bowen '00, and despite Holden's best efforts, were unable to break free. Bucknell went into the locker room nursing a three-point lead.

After Army cut the lead to one early in the second half, though, Bucknell took control. The Bison shot almost 60 percent from the field in the second and opened up leads of as large as 15 points.

Welch, virtually silent throughout the first game—and the first half of the rematch—came alive late to score 16 points on 6-8 shooting. Bucknell's ability to get the ball inside to Welch spelled disaster for the Black Knights (10-15), who were forced to give Holden more room from the perimeter.

Holden responded with another superb effort, going for more than 20 points for the fourth consecutive game.

"Tommy played an outstanding game— he really helped us put this one away," Flannery said. "When he can play this kind of productive game, it really complements J.R. and takes our team to the next level."

Gordon Mboya '97 added 13 points for the Bison, who improved to 16-10 with the win.

Jonah Half—The Bucknellian

J.R. Holden '98 and the Bucknell men will begin their quest for an NCAA Tournament berth against Lehigh this Saturday.

Fast fact: Gordon Mboya needs only five points to become the 25th Bison player to score 1,000 points in his career.

Baseball looks to return to NCAA tournament

BY BRETT TOMLINSON
Bucknellian Staff Writer

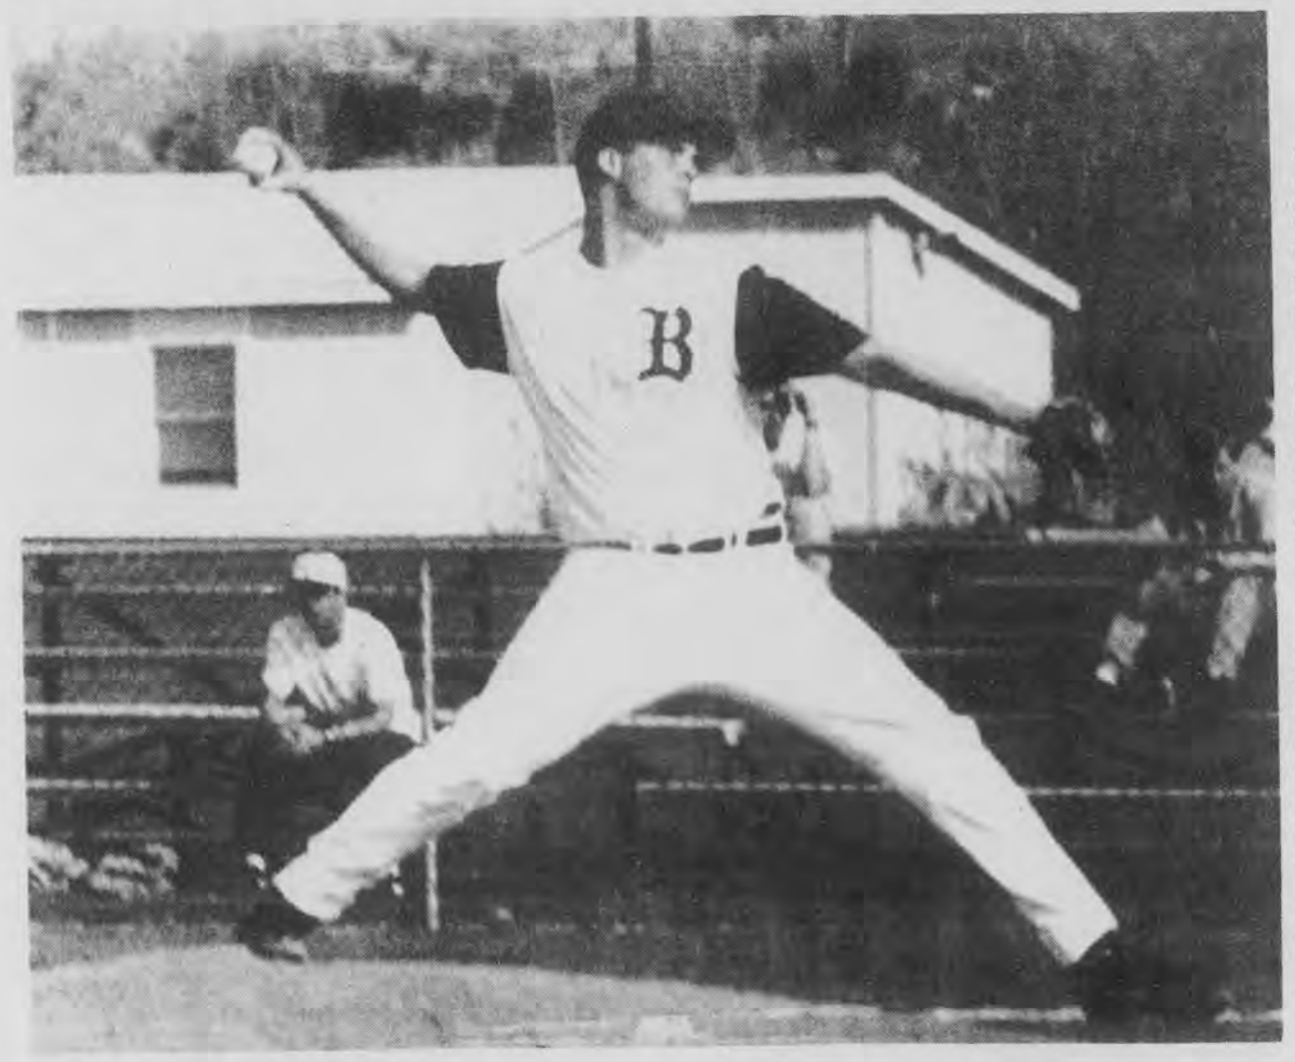
The defending Patriot League champion baseball team returned to the diamond on Saturday hoping to break through the winter rust, and after a 2-2 weekend split, the gears are starting to turn again for skipper Gene Depew's squad.

The Bison took on the look of a well-oiled machine in the season opener against George Washington at Williamsburg, Va., downing the Colonials 7-3. Mike Anders '98 pitched a solid debut, scattering seven hits and two earned runs en route to a complete game victory.

A three-run Bison outburst in the fourth inning proved to be the difference in the game, breaking the 1-1 tie. Third baseman Tyler Prout '00 made his first game for the Bison memorable, hitting a bases loaded triple which drove in two of the fourth inning runs. Left fielder Mike MacNeely '98 tried to score from first but was thrown out at the plate.

In game two of Saturday's double-header, Bucknell took on the Tribe of William and Mary, and sophomore hurler Andy Cook

See BASEBALL, page 14



Cara Mickelsen—The Bucknellian

Doug Hoffman '97 earned the win as the Bison baseball teamt upset William and Mary, 6-4 on Sunday.

Wrestling routed by national power Rider

48-6 loss the worst in 24 years for Bison; win over Wagner evens ECWA record

BY E.J. CRAWFORD
Bucknellian Staff Writer

It may have been ABC that coined the term "the thrill of victory and the agony of defeat," but this past week it was the Bucknell wrestling squad that experienced it.

To start the week the Bison grapplers knocked off league foe Wagner 35-6 in their most lopsided victory of the season, but followed that up with a 48-6 shellacking at the hands of league rival Rider. It was the worst loss in 24 years for Bucknell squad, leaving the Bison at 6-5 overall, and 4-4 in the East Coast Wrestling Association.

The Wagner match gave the Bison an opportunity to build on their victory over Hofstra. The Bison jumped on Wagner early behind victories by Todd Boerner '99, who wrestled up a weight class, Matt Mittman '98 and Jeff Fazio '98, and raced out to a 18-2 lead from which they never looked back.

Said coach Bob Ferraro, "Our kids... seem to be solving some of the problems they've been having. [They are] staying more focused on positive things."

However, this positive thinking did not carry over to the squad's match against Rider, who is currently ranked seventh in the country. The team, still missing four starters, was never able to get going. "Overall, with our team missing four starters, we seemed to be convinced that we couldn't beat Rider," said Ferraro.

This proved to be true, as Bucknell never really made an impact, losing nine of 10 bouts, six of which were by pins. "We've beaten Rider three of the past four years, and they came out really fired up to beat us... it's a real rivalry."

The lone highlight for the Bison was the wrestling of freshman Brian Pitzer, who accounted for all of Bucknell's points by pinning his opponent Chad Liott, the defending ECWA champion at that weight class.

The grapplers return home on Saturday to face national powerhouse Virginia in their last match of the season before hosting the ECWA Championships starting on Sat., March 8.

Flash in the Pan

Say it Ain't So Bowe: Heavyweight boxer Riddick Bowe officially quit Marine boot camp a mere three days after it had begun. Or did he? According to reports and interviews with Bowe's manager Rock Newman, Bowe was unable to handle the regimented lifestyle, which the reason for his leaving. Newman also cited Bowe's reluctance to being away from his family for such an extended period of time. However, recent reports from Parris Island have officers saying that Bowe was discharged, saying that he was lazy and often flatly denied orders to do early morning runs and other various disciplines. Bowe has yet to comment on the issue. There is no word yet if or when the former heavyweight champion plans to return to the ring.

Only 62 Spots Left: The Minnesota Golden Gophers and the Princeton Tigers both qualified for the 1997 NCAA Basketball Tournament this weekend by winning their respective regular-season conference titles. Minnesota claimed the Big 10 title with a 67-66 victory over Illinois, improving the second-ranked Golden Gophers record to 24-2. Princeton, which upset UCLA in the first round of last year's tournament, also qualified after defeating Dartmouth 60-53 to remain perfect in the Ivy League. Most conferences will not decide their berths for a few more weeks, as the Big 10 and the Ivy League are two of the only conferences not to hold a year-end tournament.

Falcons to Fly Under Chandler: After the Jeff George debacle, the Falcons have opted for good-guy Chris Chandler to lead their team next year. The oft-injured Chandler has played for four other teams, most recently for the Houston Oilers, where he started the past two seasons. However, the Oilers decided to hand the team's reins over to promising youngster Steve McNair. The Falcon's starter from last year, Bobby Hebert, will most likely not be re-signed, and is expected to retire.

In additional quarterback news, the Chiefs appear to be the front-runners for 49er free agent Elvis Grbac after the Falcons and a few other teams have dropped out of the running. The 49ers are still attempting to re-sign Grbac, but have little cap room left, and have named Steve Young as their starter for at least the next two seasons.

Holy Hopkins: Houston Oiler's Brad Hopkins, a left tackle, recently became the NFL's highest-ever paid lineman after receiving a 20 million dollar deal over five years.

Lindh to the Rescue: Hilary Lindh salvaged an otherwise disappointing U.S. ski season with a victory at the World Alpine Championships in the downhill event. Up until her victory, this year's season has been plagued by poor results and injuries to two-time downhill season champion Picabo Street and Olympic gold medalist Tommy Moe. Lindh took home a silver in the 1992 Olympics, also in the downhill.

Devil of a Trade: The New Jersey Devils filled their void at center on Tuesday by trading for Toronto Maple Leaf Doug Gilmour. In the deal, that the Devils hope will propel them to the top of the competitive eastern Conference, the Devils also receive defensman Dave Ellett in exchange for a group of draft picks.

Springtime Paradise

Snow What ?

BY CHRIS RUNNELLS

Bucknellian Staff Columnist

As I sat out on my bench outside my window last week I appreciated the sun as it soaked my skin with warm rays. The spring weather seemed to have jump-started this dead campus. Even though this winter was short for some of us, it was too long for many others. I then began to think about my upcoming article deadline, and how winter seemed to be over, and what in the world I was going to write about.

I then pensively recollected different trips throughout the winter, and I looked forward to two more trips to the snow country this year. I had decided that this would be a winter to remember in terms of soul satisfaction. I began to look forward to non-snow related activities. I then had an epiphany that I have every year about this time—I realized that skiing and winter life are matters of the mind and soul rather than just snow and mountains.

The life is about the satisfaction of conquering a run, the exhilaration of champagne freshies (fresh powder), and the adrenaline rush of dropping a rock or getting down the bunny slope for the first time. The satisfaction of those desires to test ones ability do not require one to be an expert. A beginner just learning and an expert who has skied his or her whole life have the common thread of testing their limits and experiencing the rush of living an exciting life. These feelings are not restricted to the winter. There are many other warm weather sports that quench the thirst of adrenaline junkies everywhere.

Mountain biking is considered the sister sport of skiing. It is, perhaps, the choice of most skiers in the off-season because it requires the same environment as skiing, sans snow.

Mountain biking requires more athletic ability than most people think. There are different types of mountain biking. There is touring, which is nice if you want to smell the flowers. But then there is aggressive, which is climbing grueling slopes and tearing down a rocky slope at 40 miles an hour. This is more for people who like to taste the flowers. Biking is a great way to stay in shape in the off season and continue to enjoy the mountain life, while testing your limits.

In-line skating has been the biggest craze since the sandwich. Skating is great because it can be done almost anywhere and there is not a lot of equipment. It is also not difficult to learn and is a great work out. It can also be translated into tar skiing by bringing your poles out and making turns down gentle inclines. I stress gentle.

But do not overlook the joys of the melted snow: water.

There is no way around it. Water skiing is not really close to alpine skiing except for the name. But it is a blast. When you define fun as being dragged behind a boat at 40 miles an hour, you are living it up. Board sailing and surfing are other sports that provide that special feeling of total satisfaction.

So whatever your poison is for soothing the soul in the off season, be sure to do it all the way. Remember that we are all looking for the same rush and that each experience is unique to the person but also universal to the love of the lifestyle. Be safe and think snow or sun or water or whatever you like! Have fun.

BASEBALL

from page 13

brought the Bison batsmen back to earth, pitching seven innings, striking out eight, and giving up just three hits.

Meanwhile, the Tribe was chopping its way toward a blowout with nine runs in the first six innings. Bucknell managed to cross the plate just twice, with Dave Apollon's '98 solo home run accounting for half of the scoring.

William and Mary rolled to an 11-2 win with pitcher Mike Tomko '98 absorbing the loss for Bucknell. The Bison were not content to bow to their warm weather foe, though.

On Sunday, Bucknell faced the Tribe again in a twin-bill rematch. Game one provided more headaches for the Bison. Heading into the bottom of the seventh, Bucknell was clinging to a 3-2 lead, but a five run rally put the Tribe in command.

Bucknell inched closer with a one-run eighth, but fell short in the ninth, generating two runs to fall 7-6. Right fielder Alex Inclan '97 went three-for-five with a double and a home run in the losing cause.

Tegan Campbell '99 had a steady five-inning debut on the mound, surrendering just one earned run. Reliever Matt Potalivo '00 took the loss for the Bison.

Bucknell once again licked their wounds and prepared for battle, and persistence paid off in the weekend finale. The Bison played their first error-free game of the young season and jumped to a 6-0 lead in the sixth inning.

William and Mary mounted a comeback but fell short, dropping a 6-4 decision to the Bison. Apollon blasted another home run from the leadoff slot while Mike McCarthy '99 took advantage of his first start of the year, going two-for-three at the plate with four runs batted in.

Pitcher Doug Hoffman '97 picked up the win, pitching five and one-third innings and striking out three. Sean Huss '99 and Ed Soley '00 sealed the victory, surrendering just one earned run in relief.

The Bison are looking to return to the NCAA Tournament after their first-ever appearance last year, and with only five seniors lost to graduation, Bucknell looks to be in the proverbial driver's seat in the Patriot League. The entire pitching staff has returned, and the youthful group only has two seniors this season.

Bucknell will be back in action this week at Georgetown for another pair of doubleheaders.

Cara Mickelsen—The Bucknellian

The Bucknell baseball team returns all but five players from last year's NCAA tournament squad. The team opened 2-2 last week.

The Bucknell cheerleaders will perform a new routine at this week's Patriot League Championships at Lehigh University. The squad has been active throughout the year performing at basketball and football games.

In additional Patriot League news, the school will be providing a bus, leaving at noon on Saturday, for those interested in attending this years's Patriot League Tournament to support the men's and women's teams.

Jonah Half—The Bucknellian

Bison trample Army on way to the tourney

BY JEFF CAMPAGNA

Bucknellian Staff Writer

The Bucknell women's basketball team wrapped up their regular season on a high note with a victory over Patriot League cellar-dweller Army. The Bison finished with an overall mark of 12-13, fourth in the conference with a 6-6 record.

This past Saturday, Bucknell made its yearly visit to scenic West Point to meet the lowly Cadets, who have posted only a single victory this season. Despite their record, Army came out fighting, and took advantage of a slow start by the Bison.

Both teams were plagued by terrible shooting during the first half, with Army hitting only .241 from the floor. Even so, they still managed to hold onto the lead, which stretched to as many as seven, for most of the half. Bucknell promptly responded with a late 10-3 run to tie the game, and then pulled ahead 23-21 on a jumper by forward Kristen Lloyd '98 at the end of the half.

The Cadets' shooting woes continued into the second half, yet they were able to hang tight early on. The Bison, on the other hand, began to scorch the net, shooting over 50 percent from the field in the 2nd half.

Army stayed within four points until, with 2:28 left, point guard Lori Houck '00 sank two free throws to give Bucknell a 51-45 lead. The Bison held fast, as the Cadets started to foul out of desperation, sending forward Lyndsay Earhart '00 and guards Leslie Blue '99 and Houck to the line.

Combined, the three hit six of eight free throws to seal up a 58-49 victory in Army's Christi Arena. Forward Jessica Mathieson '98 and Houck each scored 13 points to pace the team. Mathieson also came up strong under the boards, pulling down 11 to lead the Bison.

As tournament time comes around, the Bison look to send a message to the conference. "Do we have something to prove? Absolutely," said Mathieson, "The rest of the teams counted us out. If you look at the stats, with knee injuries to Chiara [Sockel '97] and Shannon [McGowan '97], and Leslie's broken finger, we definitely have something to prove, and I think Army was the first step."

Though hobbled by injuries and hampered by inexperience,the Bison will have a chance to play the spoiler role in the Patriot League Tournament. The Bison will square-off against the fifth-place Lafayette in first round action at 8:00.

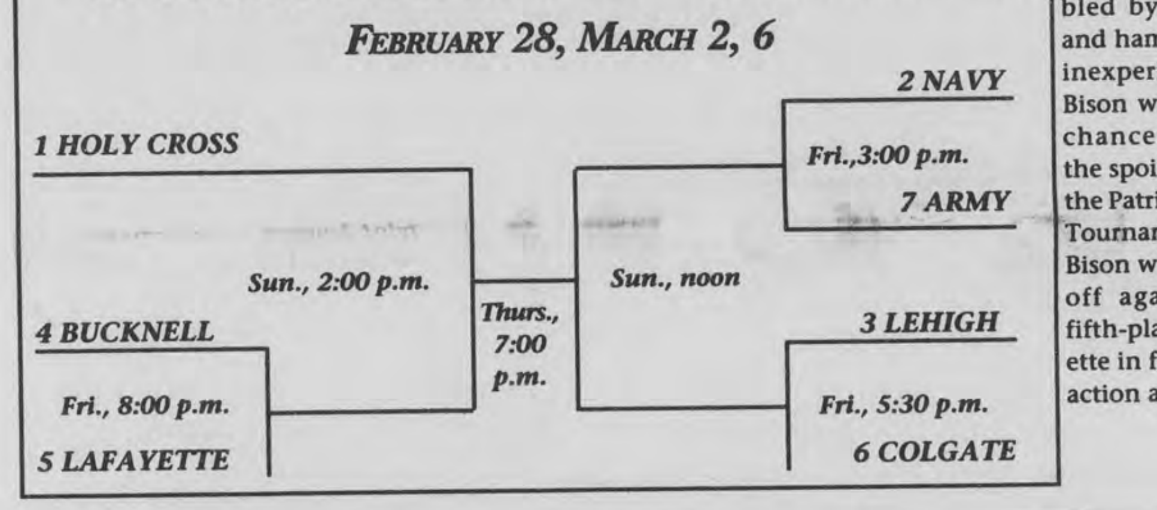
1997 Patriot League Women's Basketball Tournament

February 28, March 2, 6



Men to face Lehigh in opener

BY CHRIS ELLIS

Bucknellian Staff Writer

The brackets for the 1997 Patriot league tournament were set after this weekend's round of games, and by virtue of their Saturday win over Army, the Bison have earned the tournament's #2 seed.

In the first round, Bucknell will face Lehigh, 1-24 throughout the season but playing on their home court. A Bucknell win is expected, but hardly taken for granted.

"I think our kids are realistic enough to know that we'll be playing a team with nothing to lose on their home court, and we'll have to play them tough to win," head coach Pat Flannery said. "Come Saturday, we'll find out how realistic they are."

Bucknell whipped the Engineers in their two regular-season meeting, 75-53 at home and 80-65 at Stabler Arena, the site of the league tournament. Lehigh is widely considered to be one of the worst teams in Division I basketball, but are not without their good players.

Guards Bret Eppeheimer finished the season averaging 19.7 points per game, second in the Patriot League to only Adonal Foyle. Eppeheimer is a quick, feisty player who is not afraid to take chances. He also has an excellent shot from outside, shooting a league-best 41 percent from beyond the 3-point arc this season.

Lehigh also has time on its side. The Engineers have not played in ten days, and likely have used those days to tinker with their offensive and defensive sets, altering ones that may not have worked during the season.

"They've had a very long time to prepare, and maybe they'll change some things around," Flannery said. "If we're prepared enough, though, a new look won't affect us that much."

If the Bison beat Lehigh on Saturday, they return to Stabler Arena on Sunday for a 5 p.m. against the winner of Colgate-Army. The Bison split with both teams this season.

Bucknell would, of course, have to contend with the league's "Mr. Everything"—Adonal Foyle led the league in scoring, rebounding, blocked shots, and field goal percentage. He played Bucknell tough during both regular-season matchups, but was overmatched by a swarming Bison defense in Bucknell's 82-78 win at Davis Gym.

"We're going to have to play with defensive intensity to win," Flannery said. "If we play smart defense, we can beat anyone in this league."

The winner of the second-round game will face the survivor of the bracket's other half, which includes Navy, Holy Cross and Lafayette. The league championship will be played next Wednesday at the home of the highest remaining seed.

"If we keep our focus, and play to our capabilities, we're definitely good enough to win this league," Flannery said. "We know exactly what we have to do—it's time to let the games begin."

Jonah Half—The Bucknellian

Gordon Mboya '97 will lead the Bison into Patriot League tournament action at Lehigh.

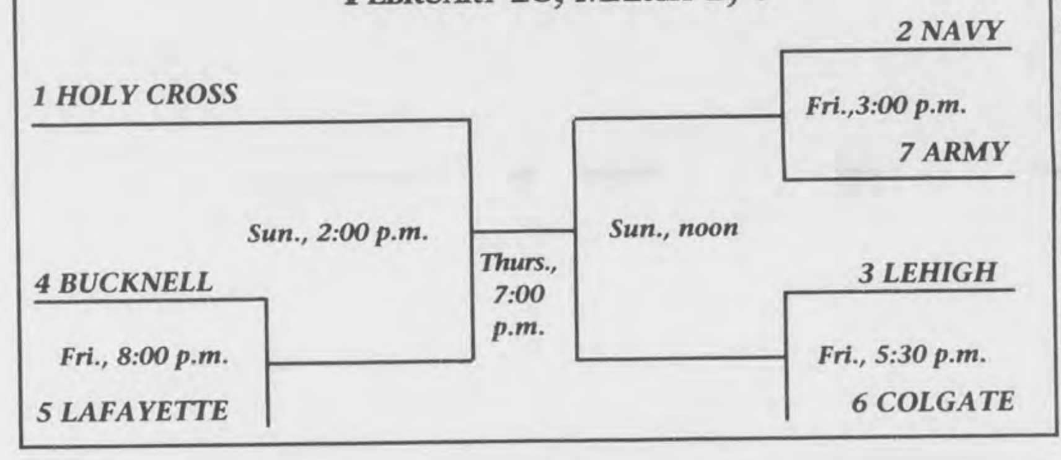
1997 PATRIOT LEAGUE WOMEN'S BASKETBALL TOURNAMENT

FEBRUARY 28, MARCH 2, 6



Men to face Lehigh in opener

BY CHRIS ELLIS

Bucknellian Staff Writer

The brackets for the 1997 Patriot league tournament were set after this weekend's round of games, and by virtue of their Saturday win over Army, the Bison have earned the tournament's #2 seed.

In the first round, Bucknell will face Lehigh, 1-24 throughout the season but playing on their home court. A Bucknell win is expected, but hardly taken for granted.

"I think our kids are realistic enough to know that we'll be playing a team with nothing to lose on their home court, and we'll have to play them tough to win," head coach Pat Flannery said. "Come Saturday, we'll find out how realistic they are."

Bucknell whipped the Engineers in their two regular-season meeting, 75-53 at home and 80-65 at Stabler Arena, the site of the league tournament. Lehigh is widely considered to be one of the worst teams in Division I basketball, but are not without their good players.

Guards Bret Eppeheimer finished the season averaging 19.7 points per game, second in the Patriot League to only Adonal Foyle. Eppeheimer is a quick, feisty player who is not afraid to take chances. He also has an excellent shot from outside, shooting a league-best 41 percent from beyond the 3-point arc this season.

Lehigh also has time on its side. The Engineers have not played in ten days, and likely have used those days to tinker with their offensive and defensive sets, altering ones that may not have worked during the season.

"They've had a very long time to prepare, and maybe they'll change some things around," Flannery said. "If we're prepared enough, though, a new look won't affect us that much."

If the Bison beat Lehigh on Saturday, they return to Stabler Arena on Sunday for a 5 p.m. against the winner of Colgate-Army. The Bison split with both teams this season.

Bucknell would, of course, have to contend with the league's "Mr. Everything"—Adonal Foyle led the league in scoring, rebounding, blocked shots, and field goal percentage. He played Bucknell tough during both regular-season matchups, but was overmatched by a swarming Bison defense in Bucknell's 82-78 win at Davis Gym.

"We're going to have to play with defensive intensity to win," Flannery said. "If we play smart defense, we can beat anyone in this league."

The winner of the second-round game will face the survivor of the bracket's other half, which includes Navy, Holy Cross and Lafayette. The league championship will be played next Wednesday at the home of the highest remaining seed.

"If we keep our focus, and play to our capabilities, we're definitely good enough to win this league," Flannery said. "We know exactly what we have to do—it's time to let the games begin."

Jonah Half—The Bucknellian

Gordon Mboya '97 will lead the Bison into Patriot League tournament action at Lehigh.

SPORTS

Flannery pushes all the right buttons

The date was November 23rd, the opening night of the Bucknell basketball season. The Bison were in the midst of struggling to a 65-56 win over Robert Morris College, when a genial but cynical man, obviously a veteran of many Bucknell basketball seasons, was overheard:

"It doesn't matter who wins this game, both these teams are going to have a long season."

Sir, wherever you are, you're half-right.

The Colonials, under the direction of first-year coach Jim Boone, are in the process of rebuilding. Robert Morris will be good one day, but the 1996-97 season was not one to remember. The Colonials sputtered to a 4-21 season, mercifully falling in the play-in round of the Northeast Conference tournament.

Bucknell, on the other hand, is expected to fight for an NCAA tournament birth. The reasons for this team, which returned zero starters from last season, being successful are numerous, but they all have one thing in common: they all originated from the top.

In his five seasons at Lebanon Valley College, Pat Flannery transformed a so-so Division III basketball team into a national championship team. As he stepped into the job with his alma mater in 1994, he faced an even more daunting task: keep a non-scholarship basketball team afloat in Division I.

Commentary

Chris Ellis
Sports Co-Editor

Flannery hasn't had the luck of some other Patriot League coaches. He hasn't had a future NBA player drop into his lap like coach Jack Bruen at Colgate. Adonal Foyle is the quintessential "big fish in a small pond," and his presence alone would keep the Red Raiders near the top of the league no matter what else happened.

Flannery has, however, been blessed with the gift of molding what players he does have into the kind of basketball team he likes.

The inexperience of the Bucknell lineup showed in a big way in the team's first two games, the win over Robert Morris and a 74-72 loss to Niagara that same week.

Optimism reigned in the Bucknell locker room, though, even as the humbling experiences of the beginning of the season seemed to prove critics right. Many publications picked Bucknell to finish last in the Patriot League, and after the first two games of the season, there was little reason to doubt them. Flannery remained high on his young team, though, and results followed quickly.

"Our objective was to go out and get better every single game," Flannery said. "We had a lot of unknown quantities at the beginning of the year, and we still had to feel our way around."

Flannery's crash course in Division I basketball started to turn things around rather quickly, though. A 1-1 Thanksgiving-week trip to Air Force and Colorado state helped to build confidence in the Bucknell players, and the team returned from the trip ready to win.

Spurred on by confidence gained during the week in Colorado, the Bison began to roll. A 81-57 win over Delaware gave Bucknell more confidence, and a victory over Princeton in which Bucknell rallied from 12 points behind in the second half, improved the team's prospects further. Close losses to Penn State and New Mexico gave Bucknell the ability to believe they could play with anyone. In less than two months, Flannery had turned a team with zero returning starters and little confidence in their ability to one that was, perhaps, a bit overconfident. A little more adversity, maestro?

The night after the 67-57 defeat at New Mexico, the Bison got punished, 71-62, by Appalachian State. That loss would signal the beginning of a downward spiral that would eventually push the losing streak to five games.

"We got a little overconfident, and we didn't play physical enough to win games," Flannery said. "We got away from what we wanted to do, and it cost us some games."

The losses, though, would stop shortly thereafter. The Bison routed Lehigh the following night and began a streak of eight wins in nine tries. Aside from back-to-back losses to UMBC and Navy, the Bison never lost two consecutive games again.

Throughout the year, Flannery has pushed all the right buttons in individual games, as well. After watching Adonal Foyle tear his Bison up in their first meeting of the season, he came at the Colgate star with every big man he had. Instead of entrusting one player with the duty of watching Foyle, Flannery sent Tom Hauser, Dan Bowen, Max Wetzel, and Tom Welch at him, giving the Bison 20 fouls with which to hack Foyle to death. If Colgate was going to win, they would have to beat the Bison at the free-throw line and Foyle, a 50% foul shooter on the season, entertained no thoughts of putting on a free-throw shooting exhibition. The Bison prevailed, 82-78.

Four days later, Bucknell traveled to Lehigh to face a team that was having an atrocious year in the standings, but had played teams tough at their home arena. Flannery gave freshman Dyrika Cameron the first start of his career in that game, and Cameron responded by being named Patriot League rookie of the week. Bucknell handed Lehigh one of their worst home losses of the season, 80-65.

Now, four months after it all started, Flannery's crew heads back to Lehigh for the Patriot League tournament as the #2 seed and one of the favorites to clinch a birth to the NCAA tournament.

A long season? Yes, of course it has been a long season. And maybe, just maybe, it'll be a little longer than originally planned.

Sports Trivia Quiz

1. How much did it cost U.S. taxpayers to send Riddick Bowe to Marine boot camp for three days?

2. Since 1980, three NBA power forwards have won rebounding titles. Name them.

3. What was the first team to qualify for this year's NCAA title?

4. Who is the PGA's all-time money leader?

5. What team has the worst record in division 1-A basketball?

Answers:

1. $5,000 2. Dennis Rodman, Charles Barkley and Michael Cage 3. Minnesota 4. Greg Norman 5. Lehigh Mountain Hawks (1-25)

"He was a good man and a good friend"

The Bucknell community mourns the loss of enthusiastic coach Mike O'Connor

BY LUKE DAVID
Bucknellian Staff Writer

As the Bucknell community mourns the loss of one of its finest members, many students and faculty are left not really knowing who Mike O'Connor was. For those of us who were not fortunate enough to be in contact with Coach O'Connor every day, it has already become apparent that he was a special person.

A native of the Pittsburgh area, O'Connor attended Upper St. Clair High School and played football, basketball, baseball and track. After high school, he attended West Chester and started at split end for three years on the Varsity squad. He then went on to the University of Connecticut, where he worked on his masters degree and coached football. The next stop for O'Connor was American International College, where he served as offensive coordinator, before coming to Bucknell in 1983.

At Bucknell, Coach O'Connor served as offensive backfield coach, offensive coordinator and wide receivers coach. He lived in Lewisburg with his wife Peggy, and their three children, Meghann and Michael, who are both in high school, and Patrick, who is in grade school. A devoted father, O'Connor could often be found spending hours working with his children's athletic teams.

One of the biggest impacts that O'Connor had on the football team was his success as a recruiter. Working primarily in the Western Pennsylvania area, he played a crucial role in building winning teams. O'Connor's recruits are so numerous and talented that at any time next year, eight of 11 offensive players on the field could be ones that he persuaded to attend Bucknell.

One of O'Connor's most successful recruits, All-American linebacker Brandon Little, said that "he was a good man and a good friend. He was a big part of my life and I was only one player that he came in contact within fourteen years."

Ken Scholtz, a junior receiver from Pittsburgh who worked closely with O'Connor, said that "he was my father in Lewisburg."

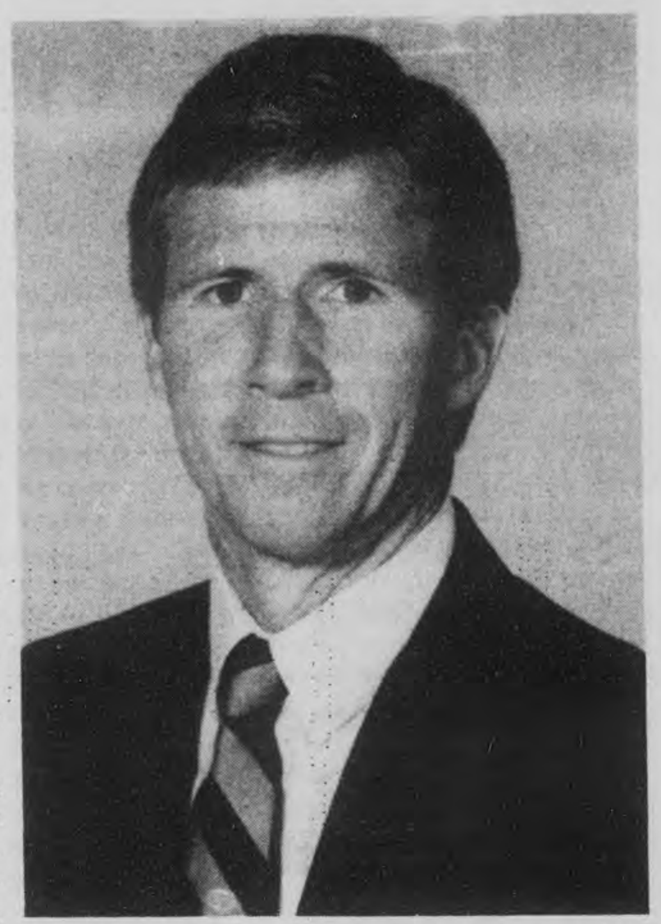
O'Connor was always interested in the lives of not just his players, but all those whom he came in contact. He was not just casual hellos, but rather heart-felt concerns about the lives of his friends and players.

According to Little, "To him, you were a person first and a player second. He would get me in his office and rather than tell me what a great player some recruit was, he would first say what a great kid he was."

For all of O'Connor's recruits and players, he was as easy to talk to as a member of the family.

As a coach, he was enthusiastic and positive every day, making sure that his players would benefit from his energy. Scholtz noted that "he made sure that if something went wrong in a football game, it wasn't going to be with his wide receivers. He wanted us to be perfect."

Making players aware of his watchful and concerned eye was something that he went out of his way to do.



Mike O'Connor's amiable nature helped to recruit as many as eight of Bucknell's 11 offensive starters.

The tragic loss of one of the school's favorite coaches has left everyone with questions. Players and coaches alike have stressed the importance of staying together in order to deal with the pain. Since the tragedy, coaches have called players, and players have called coaches in an attempt to make sure that everyone is dealing with the loss.

Perhaps in the wake of this awful tragedy, we can look to the words of Mrs. O'Connor to find something to remember him by. "Mike won some and he lost some, but he was never defeated."

Club Sport Report:Skiing

Seven Bucknell skiers to compete at National finals

BY CHRIS RUNNELLS
Bucknellian Team Correspondent

The Bucknell men's ski team finished third at the 1997 mid-Eastern regional race at Elk Mountain.

Regionals? Maybe. Nationals? No way. The men's ski team toughed through a trying season and qualified to go to the NCSA National Races in Lake Tahoe, Nevada.

The season started with a trip to Smugglers Notch, Vermont. The outlook for this season was brilliant. The team had a strong anchor from previous years in captain Steve Engler '97. He found himself leading a young group of newcomers ready to tear the Allegheny league apart.

The women's team looked perhaps even more promising led by captain Sara Glanville '97. The training sessions were great as the team reacquainted themselves with the snow. Upon returning to Pennsylvania the teams were boosted with the arrival of more great racers. The promise of many experienced racers had everyone contributing one hundred percent to earn spots on the "A" team.

The first race proved the strength of the teams as they each took third place. The team established itself as a contender for the regional race. The second race was a repeat of the first where both the women's and the men's teams placed third behind Penn and Penn State.

However, the third race was marred as only three men's members raced on the second day and won the race, but ended up fifth for the whole weekend. The women also entered three racers on the second day and finished fourth for the weekend. These results made it nearly impossible to go to the regional race. Both teams would have to finish no lower than third to qualify for regionals.

In the true competitive spirit that fueled the team, all year, both did finish third in the following races to propel them into the regional race at Elk Mountain.

The regional race tested the team's perseverance and strength. The men's "A" team finished in fourth place after a trying first day, while the women's "A" team found themselves in fifth place after the slalom on day one.

Day two brought forth the giant slalom, one of the team's stronger events. After strong runs both the women's and men's teams found themselves on the brink of national berths. At the end of the season banquet the announcements were to be made who was going to nationals.

The women's "A" team comprised of Heather Hammerstead '99, Sahra Kaceor '98, Glanville, Elissa Schreiner '99, and Mellisa Wochtley '97, were disappointed to hear that they had been edged out by Virginia to go to nationals. The team was dealt a tough blow. However there was some rejoicing for the women as Hammerstead qualified individually by finishing second in the region.

The men's team, disheartened by the women's loss, waited anxiously. The results came—a national berth was won by "A" team members Matt Cricklar '99, Chris Runnells '99, Jed Malcolm '00, Steve Ritchie

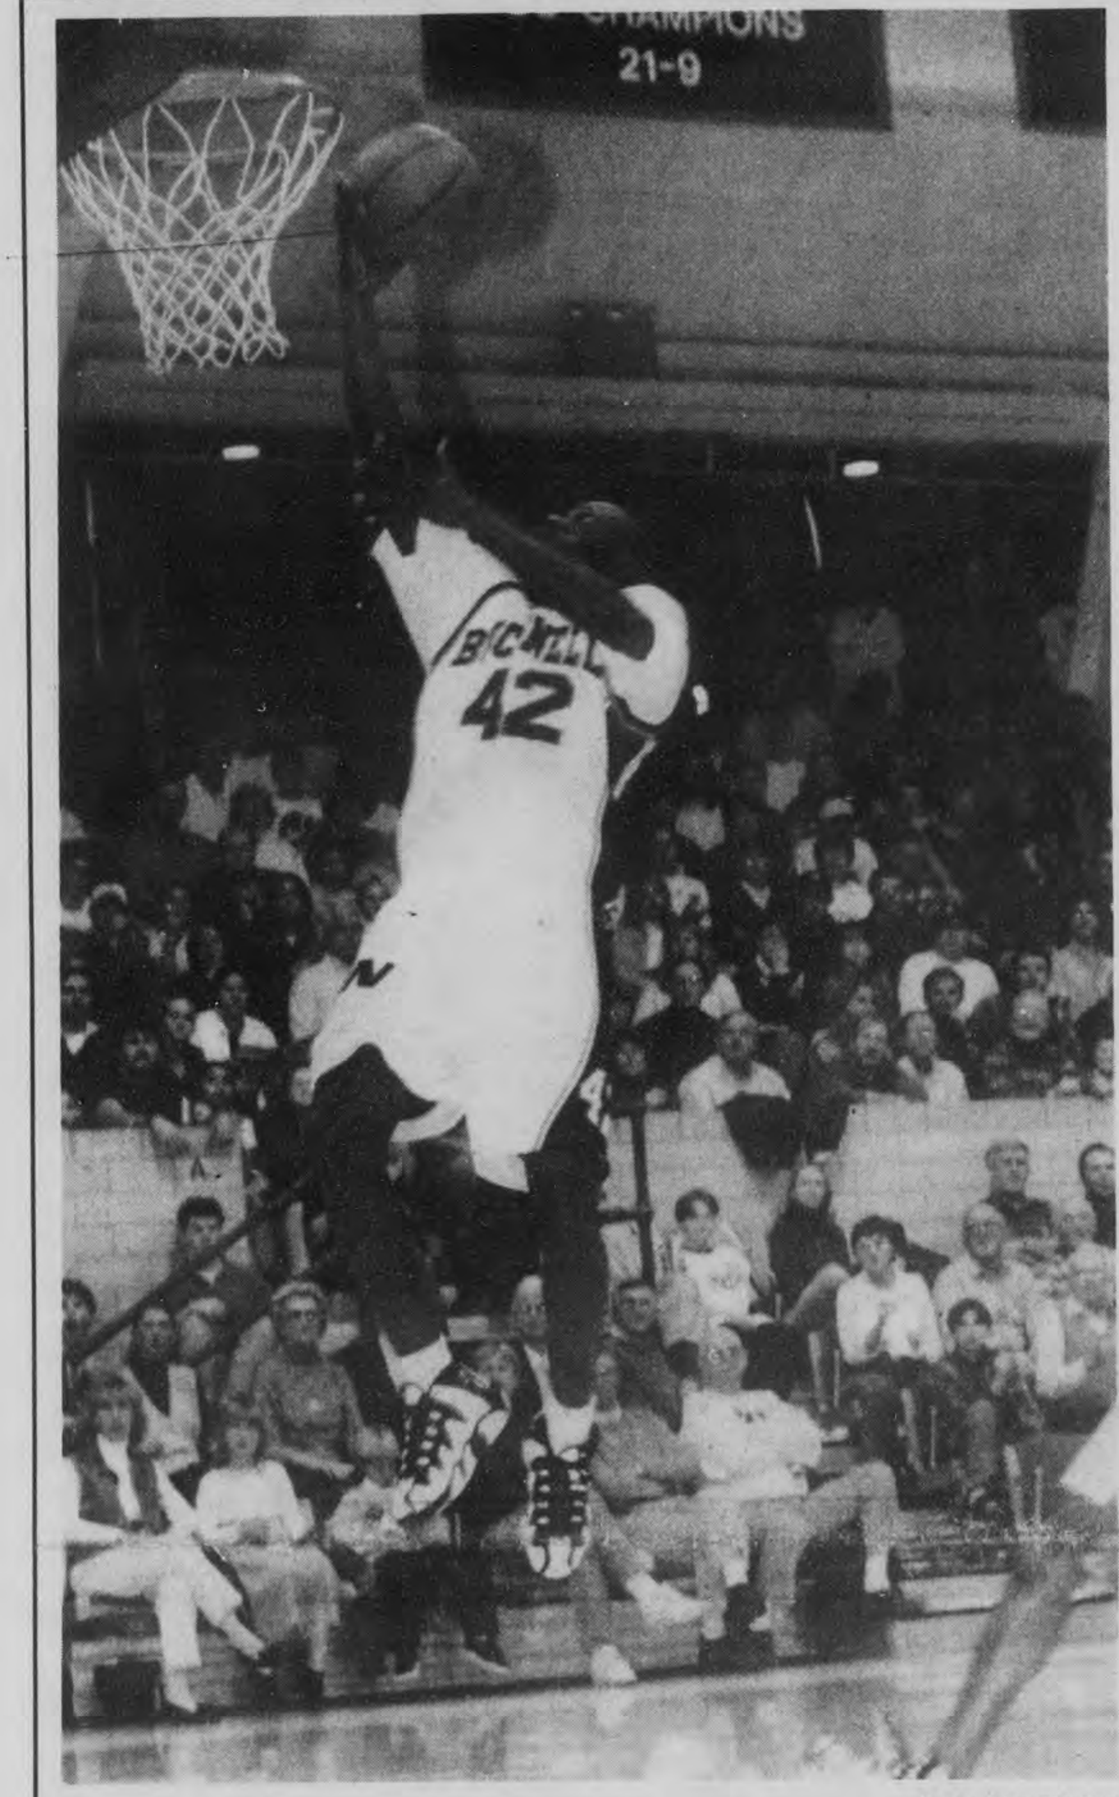
THE BUCKNELLIAN

BUCKNELL UNIVERSITY — LEWISBURG, PENNSYLVANIA 17837



Bucknellian File Photo

One point away...

Bucknell held leads of as many as 10 points in the second half, but couldn't hold on in the closing minutes at Navy. The 76-75 loss ended Bucknell's improbable run at an NCAA birth, just one game short of a spot in the tournament. The game also marked the end of the collegiate careers of seniors Gordon Mboya (above), Tom Welch and Mark Treiber. For stories on the game, turn to Sports, page 13.

Tapping into the 'Net: Dorms to move in wired direction

BY BETH MARTIN

Bucknellian Staff Writer

Over 50 percent of University residents will have access to ResNet, an Internet networking service, in their rooms, by the beginning of the 1997-98 academic year.

The Network and Telecommunication Planning Group expects to put ResNet in the remaining University residences, mostly upper-class residences and fraternity houses, by the fall of the following year.

In an interview, Gene Spencer, director of computer and communication services and co-chairman of NTPG said, "This is a huge project for us... in that we're taking service into an area where we've never been before and we're supporting computing in the resident halls."

Spencer said that the project requires rewiring every building, pulling fiber optic cable all across campus, taking a network designed for 1200 devices and getting it ready for 4500 devices, and preparing every CCS service, such as sending mail to computers and keeping the addresses of computers.

Spencer said, "Dan Little and Bro Adams are extremely interested and the trustees are extremely interested in this project. Everyone sees this as a tremendous resource for students and wants to get it done as quickly as possible."

Spencer continued, "So, we have a plan of attack." CCS will connect approximately 54 percent of the resident spaces Sept. 1. These include Vedder Hall, Smith Hall, Larison Hall, Carey House, Bucknell Cottage, Hulley House, Hunt Hall, and Swartz Hall.

In Phase B, projected to take place in the late fall, CCS is going to connect Roberts Hall, Malesardi Hall, Silberman Hall, Kress Hall, Trax Hall, Leiser House, Seventh Street House, Edwards House and Taylor House, which CCS will have already pulled wires in during the summer. These buildings comprise another 25 percent of the spaces."

"We want to let the students know before they have the room picks that there is a fair probability that these will be connected in the fall, but we can't guarantee it. This second list is likely but not guaranteed," Spencer said.

Spencer indicated that the remaining residence spaces, including private fraternity houses that elect to pay the wiring fee, should receive ResNet by Sept. 1, 1998.

In addition to the $1.5 million the University has committed to installing ResNet into the Residence Halls, students wishing to participate in the service must pay a $65 per semester operational cost and purchase a network card and cable.

Justifying the cost, Spencer said "Well, if you were in your home, you would be spending $20/month for modem connection to connect to an Internet service provider. This [$65/semester] is less than that, but you're getting much greater speeds—hundreds of times faster than in the home. The University is paying the cost of the installation, the $65 is paying for the ongoing support of it."

Thomas Mathies, visiting assistant professor of computer science, expressed some concerns about costs to students using ResNet.

"My concern is that this is being provided as an educational resource, and yet not all students have the financial means to participate. Other resources on campus, like the library and writing center, are available to everyone free of charge... [ResNet] creates a two-tiered educational system—those that have money and those who don't— which is a departure from the previous way of offering services to students," Mathies said.

In January, a modest pilot project was launched in Larison Hall, Bucknell Cottage and Carey House. Network connections were provided to approximately 200 residence spaces; at this point, only 55 students are using this

Generations. Maybe that is the word used to describe the obvious difference between her and I or between her and you. When you first see her, your mind does not immediately race through American history to a mental earmark at the Radical 1960s.

Yuri Kochiyama, who spoke to students on Tuesday as part of Asian Awareness Week, would be the first to say that "[she was not typical of the] young people in mass against the American culture." She does not look like the die-hard, outspoken, demonstrative activist which characterized the era. However, she is neither weak nor repressed in any sense of the word. A fire burns within her.

To Kochiyama, the 1960s were a "humanistic way of living. [People] were getting away from materialism, away from racism, sexism, classism..." If you add "humanitarian" to civil rights activist, you get an accurate picture of Kochiyama. This humanist quality is evident in everything she champions, ranging from promoting ethnic studies on college campuses and universities to raising support to free political prisoners such as Mumia Abu-Jamal, a black activist incarcerated in Pennsylvania, who is facing the death penalty.

A 1965 *Life* magazine cover is testimony to the loving heart of this woman warrior. The shocking picture on the cover instantaneously captures the horrors of injustice, and the passionate struggles revolving around an assassinated black activist, Malcolm X. However, as you peer to the top of the photograph, the complete image begins to take on a modern version of Michaelangelo's *Rondanini Pietà* with a younger Kochiyama cradling the head of the wounded and dying Malcolm X. The classic image of a mother's love coupled with her mourning a sacrificed leader was now colored by the complex issues of American identity, class structure, race and other social and political agendas.

This was not, however, the only social grievance that Kochiyama witnessed firsthand. During World War II, she and "...All Persons of Japanese Ancestry" as stated on notices by the Western Defense Command and Fourth Army Wartime Civil Control Administration, were sent to concentration camps in the interior part of the country as America decided to keep close watch on those of "the enemy race."

Kochiyama retold the stories of numerous Japanese and Japanese-Americans whose loyalties were in question. She recollects the trauma of some Japanese-American soldiers who were willing to fight abroad for America, and, yet,

Course makes R.A.D.ical impression on students

BY ARGUN ULGEN

Bucknellian Staff Writer

On Monday, students participating in R.A.D. (Rape Aggression Defense systems) attended their final class in the six week course, which taught female students certain methods of self defense.

This final day of class placed R.A.D. students in mock attack situations to test their self defense techniques.

R.A.D. is based on a philosophy that it is important for a female to learn the proper techniques to fully defend herself if necessary.

Sue Ellen Henry, an organizer of R.A.D. and program coordinator for Residential Colleges said "There are many messages from society that undo a female's belief that they are worthy and capable of fully defending themselves. We train females to be confident enough to use their strength to their utmost potential and we teach them fighting techniques to do so."

R.A.D. is a six week course that is initiated by mentally preparing students and encouraging them to believe that they are worthy and capable of fully defending themselves. It then goes on to teach defense techniques that will, Henry said, "teach a female where to hit an ag-

See R.A.D., page 3

Adams makes it clear; his decision is final

BY KATHRYN ARDINGER

Bucknellian Staff Writer

Students crowded into the aisles and squatted on the floor of the Langone Center forum on Tuesday evening for President William D. Adams' open forum sponsored by the Bucknell Student Government. While other issues were discussed, most students raised questions and voiced concerns about Adams' recent decision to make Tent Party dry.

WILLIAM D. ADAMS

Despite arguments presented by students in support of serving alcohol at the party, Adams made it clear that he was not going to change his mind.

When asked if he would reconsider his decision about Tent Party, after hearing student comments at the forum, Adams said, "I think for this year, no."

Adams wanted to make it absolutely clear that "his concern had nothing to do with the behavior of the seniors" but rather the administration's ability to monitor such large events.

Adams also mentioned at the outset of the forum that he had "no foreknowledge of the BYOB policy discussions."

Recently, students have been erroneously connecting Adams' Tent Party decision with one made by Roy Baker, associate dean of students, who has proposed that the Interfraternity Council look at the BYOB policy that has been in effect since 1989.

Adams explained that "in making the decision on Tent Party, the Greek System was nowhere in my thinking."

A number of alternative suggestions, such as a third party catering system, stepped up security and closing off the party to just seniors and their families, were presented to Adams.

Nevertheless, Adams said he would stand by his decision.

"I regret to say this but, these arguments do not persuade me to change my mind," he said.

The open forum had been scheduled before the Tent Party decision was made and was intended to be an opportunity for students to dis-

Generations. Maybe that is the word used to describe the obvious difference between her and I or between her and you. When you first see her, your mind does not immediately race through American history to a mental earmark at the Radical 1960s.

Yuri Kochiyama, who spoke to students on Tuesday as part of Asian Awareness Week, would be the first to say that "[she was not typical of the] young people in mass against the American culture." She does not look like the die-hard, outspoken, demonstrative activist which characterized the era. However, she is neither weak nor repressed in any sense of the word. A fire burns within her.

To Kochiyama, the 1960s were a "humanistic way of living. [People] were getting away from materialism, away from racism, sexism, classism..." If you add "humanitarian" to civil rights activist, you get an accurate picture of Kochiyama. This humanist quality is evident in everything she champions, ranging from promoting ethnic studies on college campuses and universities to raising support to free political prisoners such as Mumia Abu-Jamal, a black activist incarcerated in Pennsylvania, who is facing the death penalty.

A 1965 *Life* magazine cover is testimony to the loving heart of this woman warrior. The shocking picture on the cover instantaneously captures the horrors of injustice, and the passionate struggles revolving around an assassinated black activist, Malcolm X. However, as you peer to the top of the photograph, the complete image begins to take on a modern version of Michaelangelo's *Rondanini Pietà* with a younger Kochiyama cradling the head of the wounded and dying Malcolm X. The classic image of a mother's love coupled with her mourning a sacrificed leader was now colored by the complex issues of American identity, class structure, race and other social and political agendas.

This was not, however, the only social grievance that Kochiyama witnessed firsthand. During World War II, she and "...All Persons of Japanese Ancestry" as stated on notices by the Western Defense Command and Fourth Army Wartime Civil Control Administration, were sent to concentration camps in the interior part of the country as America decided to keep close watch on those of "the enemy race."

Kochiyama retold the stories of numerous Japanese and Japanese-Americans whose loyalties were in question. She recollects the trauma of some Japanese-American soldiers who were willing to fight abroad for America, and, yet,

Course makes R.A.D.ical impression on students

BY ARGUN ULGEN
Bucknellian Staff Writer

On Monday, students participating in R.A.D. (Rape Aggression Defense systems) attended their final class in the six week course, which taught female students certain methods of self defense.

This final day of class placed R.A.D. students in mock attack situations to test their self defense techniques.

R.A.D. is based on a philosophy that it is important for a female to learn the proper techniques to fully defend herself if necessary.

Sue Ellen Henry, an organizer of R.A.D. and program coordinator for Residential Colleges said "There are many messages from society that undo a female's belief that they are worthy and capable of fully defending themselves. We train females to be confident enough to use their strength to their utmost potential and we teach them fighting techniques to do so."

R.A.D. is a six week course that is initiated by mentally preparing students and encouraging them to believe that they are worthy and capable of fully defending themselves. It then goes on to teach defense techniques that will, Henry said, "teach a female where to hit an ag-

Adams makes it clear; his decision is final

BY KATHRYN ARDINGER
Bucknellian Staff Writer

Students crowded into the aisles and squatted on the floor of the Langone Center forum on Tuesday evening for President William D. Adams' open forum sponsored by the Bucknell Student Government. While other issues were discussed, most students raised questions and voiced concerns about Adams' recent decision to make Tent Party dry.

WILLIAM D. ADAMS

Despite arguments presented by students in support of serving alcohol at the party, Adams made it clear that he was not going to change his mind.

When asked if he would reconsider his decision about Tent Party, after hearing student comments at the forum, Adams said, "I think for this year, no."

Adams wanted to make it absolutely clear that "his concern had nothing to do with the behavior of the seniors" but rather the administration's ability to monitor such large events.

Adams also mentioned at the outset of the forum that he had "no foreknowledge of the BYOB policy discussions."

Recently, students have been erroneously connecting Adams' Tent Party decision with one made by Roy Baker, associate dean of students, who has proposed that the Interfraternity Council look at the BYOB policy that has been in effect since 1989.

Adams explained that "in making the decision on Tent Party, the Greek System was nowhere in my thinking."

A number of alternative suggestions, such as a third party catering system, stepped up security and closing off the party to just seniors and their families, were presented to Adams.

Nevertheless, Adams said he would stand by his decision.

"I regret to say this but, these arguments do not persuade me to change my mind," he said.

The open forum had been scheduled before the Tent Party decision was made and was intended to be an opportunity for students to dis-

Future of minority rep position uncertain

BY ALLISON THOMAS

The Bucknell Student Government on Sunday will vote on Samantha Jackson's proposal to dissolve BSG's International/Minority Representative position, which she currently holds.

Following the submission of a memorandum Jackson '00 sent to BSG Congress members on Jan. 26, an ad hoc committee of various Bucknell Student Government members and student minority organization representatives met on Feb. 20. Intending to discuss the future of the BSG Minority Representative position, they instead found themselves contending with much larger questions, such as what is "Multiculturalism," and what role does it play in the life of the University's students and staff.

In Jackson's document, she expressed concern over the significance of her position on BSG, and proposed the reconsideration of its standing on the BSG board.

Although originally created to secure the seat of at least one minority student on BSG, Jackson felt that a single International/Minority Representative position discourages, rather than encourages, increased participation among the University's international and minority population.

In the document, Jackson recognizes BSG's original intentions to increase the voice of minority students on campus, but felt that the inclusion of a clearly defined minority position worked against these very goals.

The memorandum stated that as a distinct member, the International/Minority Representative is "displaced and inefficient," and that the inclusion of such a position "only encourages non-participation in the BSG process by minority students." As such, Jackson's memorandum proposed that the position be eliminated from the BSG representative board.

When presented at the Jan. 26 BSG meeting, the issue of Jackson's memorandum and its proposals was tabled by Tracey Gray '99, president of BSG, in order to allow sufficient research and consideration of background information to take place before further discussion.

According to Gray, it was of primary importance that the members of BSG, as well as all other concerned parties, had a clear understanding of what "multiculturalism" was before a decision was to be made regarding the future of the International/Minority Representative position.

When questioned about the memorandum and the future course of action to be taken toward her proposal a few days following the meeting, Jackson maintained that "things are really still in the preliminary stages" and declined further comment.

She wished to emphasize that her opinion may not be representative of the greater student population, and that it would be necessary to hold an open discussion involving the ideas and opinions of other minority leaders and organizations on campus before elaborating upon her own. Since then, many organizations on campus have recognized her concern and have taken action in assessing the impact of the Minority Representative position within BSG and the University's general minority population.

At the suggestion of Joyce Bylander, associate dean of students, student representatives from campus organizations such as Brothers and Sisters Empowered, Cumbre Hispanic Society, Essential, Greeks for the Advancement of Multicultural Education, International Spectrum, Students for Asian Awareness at Bucknell and South Asian Awareness, met with the BSG executive officers and committee chairs, as well as, the BSG Multicultural Affairs committee to discuss the issues brought up by Jackson.

According to Gray, between 30 and 40 people attended the Feb. 20 meeting, where discussion focused not only on the future of BSG's Minority Representative position, but also explored the meaning of "multiculturalism" and its implications on the University's student population.

Beetna Kim—The Bucknellian

Samantha Jackson '00 is urging that the BSG International/Minority Representative position be dissolved. She views this position as a discouragement, rather than an encouragement, for international and minority students. BSG will vote on the issue Sunday.

The preliminary results of this meeting indicate promising changes in the role and function of the Minority Representative position, as well as the emphasis of multiculturalism in the student body. As a whole, those in attendance reported that a problem did not necessarily exist in the position itself, but rather in the lack of communication between the Minority Representative and the various student groups on campus.

In order to represent the University's minority population most effectively, it was agreed upon that the delegate increase the lines of communication with the Multicultural Center, as well as possibly scheduling bimonthly meetings with the presidents of minority organizations.

Jackson reported that the only major change taking place will be a slight revision in the BSG bylaws. As they stand now, the bylaws do not specify as to ethnicity of the minority representative.

It is likely that the bylaws will require that the representative qualify as a "legal minority."

Jackson felt that the above changes would serve to increase participation among the University's minority population and to strengthen the position of Minority Representative.

A follow-up meeting will be held tonight to further discuss the meaning of "multiculturalism," and to explore the role of BSG and its promotion on campus.

For more information on tonight's meeting, contact the BSG office at x3150.

Corrections

In last week's issue of *The Bucknellian*, in the article entitled "Wrestling program under investigation" Tom Rivoire was misidentified as the president of the Grappler's Club. He is not president, but is a member.

Also last week, in "Ann de Klerk: Behind the scenes of Bertrand Library," Barnard Taylor's name was incorrectly spelled Bernard. In the same story the price of Appletree Press books was incorrect. The books usually cost around $150, not $500.

In a letter to the editor written by Gerald Saltarelli '97, the author incorrectly said that Lee Idleman is no longer a member of the board. Idleman is still a member and is the Chair of the Investment Committee.

were denied visits to their own families by order of the U.S. government because of its internment effort. "They were not allowed to return to California to visit their families for even a week despite the possibility of being killed and never seeing each other again," Kochiyama said.

"You may not see the harvest, but you can plant the seeds."
—Yuri Kochiyama

As I think of Kochiyama, I keep returning to the word "generations," which is in fact the theme of Asian Awareness Week sponsored by Students for Asian Awareness at Bucknell. Kochiyama presented two lectures, on Tuesday, entitled "The Radical '60s" and "Active Reflection: Journeying through Asian America."

In her goal to keep the activist flame alive, she challenged Bucknell students with the thought of, "Do students on campus support political prisoners?" With this first question, many other related questions surfaced like "What is Bucknell's history of radical activism?" or "Is there a social, political, or radical cause that Bucknell students would unite for?"

To Kochiyama, the 1960s were a "humanistic way of living. [People] were getting away from materialism, away from racism, sexism, classism..."

Eventually Kochiyama was again replanting the seed of the fruits of her labor. She called for more activists to take a louder voice and to unite as a larger community. In building this activist community, it was implicit in her message that students need to think about the future image and goals of America and to consider future generations. "You may not see the harvest, but you can plant the seeds," she prompted.

This woman's roots run deep and stretch far, and, she still continues to grow despite all the challenges she has faced.

PUBLIC SAFETY LOG

February 26, 1997

SCATTERING RUBBISH—A Public Safety Officer responded to Vedder Hall for items being thrown from a window. The person involved was warned and cleaned up the trash.

INFORMATION/MEDICAL ASSIST—A Public Safety Officer received a report of a University student who received a finger laceration in Rooke Chemistry building. The individual was treated by Student Health Services.

MEDICAL ASSIST—A Public Safety Officer responded to the sidewalk at the Music and Arts building for a University student who had fallen. The student was transported to Evangelical Hospital Emergency Room by ambulance.

February 27, 1997

VANDALISM—A Public Safety Officer responded to Davis Gym for a broken window. An employee witnessed a University student break the glass by hitting it. East Buffalo Township Police Department responded to the scene and the incident is under investigation.

LARCENY/THEFT BY UNLAWFUL TAKING—A Public Safety Officer responded to Davis Gym for the report of a pair of sneakers stolen from a locker room. The incident is under investigation.

February 28, 1997

INFORMATION/OVERHEATED ELECTRICAL MOTOR—A Public Safety Officer responded to Dana Engineering building on a fire alarm activation. Smoke was found to be coming from an electrical motor. A University employee responded to inspect the equipment.

INFORMATION—A Public Safety Officer responded to Kappa Delta Rho and found evidence that individuals had been drinking alcoholic beverages while sitting on the lawn. The fraternity president received a verbal warning and was requested to move the brothers inside the building.

March 1, 1997

INFORMATION/UNIVERSITY PROPERTY DAMAGE—A Public Safety Officer responded to Swartz Hall for the report of a broken window. No apparent cause could be located. Physical Plant was contacted to make the repairs.

THEFT—A Public Safety Officer received the report of money being taken from an unlocked Swartz dorm room. The incident is under investigation.

MEDICAL ASSIST—A Public Safety Officer responded to Davis Gym for the report of an injured University student. A Student Health Services driver transported the student to Evangelical Hospital Emergency Room for treatment.

TRASH CAN FIRE—A Public Safety Officer responded to Roberts Hall for a fire alarm activation, caused by a fire in a trash can. A witness had put out the fire, which appeared to have originated from a burning cigarette butt.

INFORMATION/SUSPECTED MARIJUANA ODOR—A Public Safety Officer responded to Swartz Hall for the odor of marijuana. Upon investigation, the report appeared to be unfounded.

March 2, 1997

INFORMATION/DISTURBANCE—While on routine patrol a Public Safety Officer and the Lewisburg Police Department observed an altercation between two University students walking on the sidewalk at Smith Hall. The officers spoke with the students and the victim advised that no charges would be necessary.

ACCIDENT—A University student reported to a Public Safety Officer that her vehicle's windshield was broken while the car was parked in Lower Harris Lot. The incident is under investigation.

INFORMATION—A University student reported to a Public Safety Officer that someone marked the roof of her car while the vehicle was parked in Bucknell West. An approximate time could not be determined and the incident is under investigation.

March 3, 1997

VEHICLE ACCIDENT—A Public Safety Officer responded to Dent Drive at 7th Street for a motor vehicle accident. A University employee's vehicle sustained minor damage when struck by a University owned vehicle. No injuries were sustained in the accident.

STUDENT HEALTH SERVICES/AMBULANCE REQUEST—The Student Health Service requested an ambulance to transport a University student to Evangelical Hospital for treatment of a leg injury.

VEHICLE ACCIDENT—A Public Safety Officer responded to Lower Taylor Lot for the report of a collision between a University vehicle and a University student's vehicle. There were no injuries reported.

March 4, 1997

INFORMATION/SAFETY VIOLATION—A Public Safety Officer responded to a fire alarm activation at the Delta Upsilon Fraternity. The officers found smoke detectors that had been covered, posing a safety hazard.

THEFT—A University employee reported that parts of the water cooler and water bottles had been removed from Taylor Hall. The incident is under investigation.

VEHICLE ACCIDENT—A Public Safety Officer responded to the Langone Center at Dent Drive for a vehicle accident involving a University truck that was struck by an unknown vehicle that had left the scene. The incident is under investigation.

MOTOR VEHICLE ACCIDENT—A Public Safety Officer responded to Bucknell West for the report of a motor vehicle accident, involving two student vehicles. The damages sustained were minor and East Buffalo Township Police Department was notified.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

Community Judicial Board releases results

The information which follows is a summary of cases recently adjudicated by the Community Judicial Board Panel.

First-year male involved in two incidents:

Incident #1: Student acknowledged responsibility for possessing and using a BB gun inside of Vedder Hall in late November to break five window panes.

Charge: possession of firearms and explosives.

Incident #2: Student acknowledged responsibility for being stopped by a Public Safety Officer for carrying a pitcher of beer on campus, providing the officer with a false name and claiming he had no form of identification. The student fled from the officer, but was later found lying unconscious near the Langone Center; transported to Evangelical Hospital for treatment. December 14, 1996.

Charges: Failure to comply/ Disorderly Conduct (Cat. II), Possession and/or consumption by an underage person, Intoxication or public drunkenness.

Sanction: Placed on stayed suspension through June 1, 1997. If found responsible for any violation of the Student Code of Conduct between this date and January 1, 1998, or fail to fulfill the requirement listed below, the sanction of suspension for one academic semester will be immediately activated; placed on Disciplinary Probation from June 1 to January 1, 1998.; required to meet with Drug and Alcohol Programs Coordinator for evaluation of his use of alcohol; will continue to meet until mutually determined the meetings are no longer necessary; prior to meeting with Drug and Alcohol Programs Coordinator, must submit a three-page paper "What Influence Peer Pressure Had on this Incident"; required to perform 20 hours of University service by remaining on campus May 16 and 17 to work with the Physical Plant to clean residence halls; restitution for the damages; if an applicant to live off campus, must meet with the Off Campus Living Review Board to determine his eligibility.

Incident #3: First-year male acknowledged responsibility for smoking marijuana in his Vedder Hall room as reported by Public Safety.

Charge: Possession/ Use of a Controlled substance

Sanction: Placed on stayed suspension through January 1, 1998. If found responsible for any violation of the Student Code of Conduct between this date and January 1, 1998 or fail to fulfill the requirement listed below, the sanction of suspension for one semester will be immediately activated; required to meet with Drug and Alcohol Programs Coordinator by March 10 to discuss the issues related to this incident and evaluate his use of marijuana; will meet until mutually determined that the meetings are no longer necessary; if applicant to live off campus, must meet with the Office Campus Living Review Board to determine his eligibility.

Incident #4: First-year male acknowledged responsibility for smoking marijuana in his Smith Hall room as reported by Public Safety.

Charge: Possession/ Use of a Controlled substance

Sanction: Placed on stayed suspension through January 1, 1998. If found responsible for any violation of the Student Code of Conduct between this date and January 1, 1998 or fail to fulfill the requirement listed below, the sanction of suspension for one semester will be immediately activated; required to meet with Drug and Alcohol Programs Coordinator by March 10 to discuss the issues related to this incident and evaluate his use of marijuana; will meet until mutually determined that the meetings are no longer necessary; if applicant to live off campus, must meet with the Office Campus Living Review Board to determine his eligibility.

Fee increase is approved

The University's Board of Trustees has approved a 3.9 percent increase in the comprehensive fee for students attending the University during the 1997-98 academic year.

At a recent Board meeting, the Trustees set the comprehensive fee—the total cost for room, board, tuition and fees—at $26,410. Marking the lowest percentage increase in 34 years, the comprehensive fee is $990 more than that of the 1996-97 academic year.

Tuition accounts for $21,080 of the comprehensive fee, while room is $2,785, board is $2,415 and fees are $130.

INTERNET ACCESS

from page 1

resource.

Sara Dean '99 was offered the service in January, but refused it due to the relatively small amount of time she spends on the Internet and, "for $65, I don't see a reason for it," she said.

Matt Kurdock '99, a computer science and chemical engineering major, is currently using a modem-based system, "but with World Wide Web and the Internet it's really power draining—it's too slow for anyone. Also, it's impossible to get a connection anywhere from like 5 p.m. to 12 a.m."

Kurdock said, "The new system is really excellent, but Bucknell is really slow on it. Other not so well-endowed schools have had this for a long time."

Yet, Kurdock does not plan to use ResNet. He said "I really considered it, but I just don't think I have that kind of money. For $65, I can walk down to Dana."

R.A.D.

from page 1

gressor and how to escape situations where she is up against two aggressors as well."

The last session of R.A.D. put the skills developed by its students to the ultimate test. R.A.D. instructors suited up and acted as aggressors against each individual female student. Each mock attack was taped so that students could observe their techniques after the session was complete.

During this session, each female student was tested in different mock attack situations. At first, she may have dealt with defending against a wrist grab done by a purse snatcher. Later on, the mock attack became more serious, as the student had to deal with defending herself against two aggressors.

"In any case, our instructors really did act like aggressors. They were definitely not nice. For instance, in one case a member was placed at an ATM machine. An instructor was a robber who sneaks up behind. It's the defender's job to use elbow chops and any other attacks necessary to escape the robber," said Sarah Singer '99, a R.A.D. student.

Beetna Kim—The Bucknellian

Melissa Brown '99 defends herself against her well-protected attacker, Jim Middleton. Middleton is a public safety officer, as well as a R.A.D. instructor. The 6-week course trained women to protect them-

At the end of the session, students seemed pleased with their progress. Leigh Klimowicz '00 said, "It's a very empowering experience to go through this course. I gained a lot of self-confidence from this course. It makes you aware of possible real life situations that may occur and how to defend against them."

Singer added, "We have been trained to be more aggressive. The course has almost presented us with a new socialization."

Henry believes that more female students should join R.A.D. "There have already been 14 reported sexual assaults on campus this year. But this is not the only place we live in. This course will help female students protect themselves both now and in the future."

Henry indicated that R.A.D. will have at least two more sessions after spring break.

Beetna Kim—The Bucknellian

Sarah Anderson '99 struggles to free herself from Jeff Baird, her attacker. Baird is the director of public safety at Lycoming College and a R.A.D. instructor. While the first session of the course just ended, more sessions will be offered after spring break.

The 1997 yearbook is almost complete, and we're ready to SUBMiT it to the publisher. We have the layouts and the stories. Now, all we need are the PiCTURES. Do you have any photos laying around your room that you want TO see in the 1997 yearbook? If the answer is yes, send them to L'AGENDa, C-3906, by Tuesday, April 1st. Make sure you put your name and box number (home address if you're a senior) on the back of the picture, so we can return them next fall when the yearbooks arrive.

Future of minority rep position uncertain

By Allison Thomas

The Bucknell Student Government on Sunday will vote on Samantha Jackson's proposal to dissolve BSG's International/Minority Representative position, which she currently holds.

Following the submission of a memorandum Jackson '00 sent to BSG Congress members on Jan. 26, an ad hoc committee of various Bucknell Student Government members and student minority organization representatives met on Feb. 20. Intending to discuss the future of the BSG Minority Representative position, they instead found themselves contending with much larger questions, such as what is "Multiculturalism," and what role does it play in the life of the University's students and staff.

In Jackson's document, she expressed concern over the significance of her position on BSG, and proposed the reconsideration of its standing on the BSG board.

Although originally created to secure the seat of at least one minority student on BSG, Jackson felt that a single International/Minority Representative position discourages, rather than encourages, increased participation among the University's international and minority population.

In the document, Jackson recognizes BSG's original intentions to increase the voice of minority students on campus, but felt that the inclusion of a clearly defined minority position worked against these very goals.

The memorandum stated that as a distinct member, the International/Minority Representative is "displaced and inefficient," and that the inclusion of such a position "only encourages non-participation in the BSG process by minority students." As such, Jackson's memorandum proposed that the position be eliminated from the BSG representative board.

When presented at the Jan. 26 BSG meeting, the issue of Jackson's memorandum and its proposals was tabled by Tracey Gray '99, president of BSG, in order to allow sufficient research and consideration of background information to take place before further discussion.

According to Gray, it was of primary importance that the members of BSG, as well as all other concerned parties, had a clear understanding of what "multiculturalism" was before a decision was to be made regarding the future of the International/Minority Representative position.

When questioned about the memorandum and the future course of action to be taken toward her proposal a few days following the meeting, Jackson maintained that "things are really still in the preliminary stages" and declined further comment.

She wished to emphasize that her opinion may not be representative of the greater student population, and that it would be necessary to hold an open discussion involving the ideas and opinions of other minority leaders and organizations on campus before elaborating upon her own. Since then, many organizations on campus have recognized her concern and have taken action in assessing the impact of the Minority Representative position within BSG and the University's general minority population.

At the suggestion of Joyce Bylander, associate dean of students, student representatives from campus organizations such as Brothers and Sisters Empowered, Cumbre Hispanic Society, Essential, Greeks for the Advancement of Multicultural Education, International Spectrum, Students for Asian Awareness at Bucknell and South Asian Awareness, met with the BSG executive officers and committee chairs, as well as, the BSG Multicultural Affairs committee to discuss the issues brought up by Jackson.

According to Gray, between 30 and 40 people attended the Feb. 20 meeting, where discussion focused not only on the future of BSG's Minority Representative position, but also explored the meaning of "multiculturalism" and its implications on the University's student population.

Beetna Kim—The Bucknellian

Samantha Jackson '00 is urging that the BSG International/Minority Representative position be dissolved. She views this position as a discouragement, rather than an encouragement, for international and minority students. BSG will vote on the issue Sunday.

The preliminary results of this meeting indicate promising changes in the role and function of the Minority Representative position, as well as the emphasis of multiculturalism in the student body. As a whole, those in attendance reported that a problem did not necessarily exist in the position itself, but rather in the lack of communication between the Minority Representative and the various student groups on campus.

In order to represent the University's minority population most effectively, it was agreed upon that the delegate increase the lines of communication with the Multicultural Center, as well as possibly scheduling bimonthly meetings with the presidents of minority organizations.

Jackson reported that the only major change taking place will be a slight revision in the BSG bylaws. As they stand now, the bylaws do not specify as to ethnicity of the minority representative.

It is likely that the bylaws will require that the representative qualify as a "legal minority."

Jackson felt that the above changes would serve to increase participation among the University's minority population and to strengthen the position of Minority Representative.

A follow-up meeting will be held tonight to further discuss the meaning of "multiculturalism," and to explore the role of BSG and its promotion on campus.

For more information on tonight's meeting, contact the BSG office at x3150.

Corrections

In last week's issue of *The Bucknellian*, in the article entitled "Wrestling program under investigation" Tom Rivoire was misidentified as the president of the Grappler's Club. He is not president, but is a member.

Also last week, in "Ann de Klerk: Behind the scenes of Bertrand Library," Barnard Taylor's name was incorrectly spelled Bernard. In the same story the price of Appletree Press books was incorrect. The books usually cost around $150, not $500.

In a letter to the editor written by Gerald Saltarelli '97, the author incorrectly said that Lee Idleman is no longer a member of the board. Idleman is still a member and is the Chair of the Investment Committee.

PUBLIC SAFETY LOG

February 26, 1997

SCATTERING RUBBISH—A Public Safety Officer responded to Vedder Hall for items being thrown from a window. The person involved was warned and cleaned up the trash.

INFORMATION/MEDICAL ASSIST—A Public Safety Officer received a report of a University student who received a finger laceration in Rooke Chemistry building. The individual was treated by Student Health Services.

MEDICAL ASSIST—A Public Safety Officer responded to the sidewalk at the Music and Arts building for a University student who had fallen. The student was transported to Evangelical Hospital Emergency Room by ambulance.

February 27, 1997

VANDALISM—A Public Safety Officer responded to Davis Gym for a broken window. An employee witnessed a University student break the glass by hitting it. East Buffalo Township Police Department responded to the scene and the incident is under investigation.

LARCENY/THEFT BY UNLAWFUL TAKING—A Public Safety Officer responded to Davis Gym for the report of a pair of sneakers stolen from a locker room. The incident is under investigation.

February 28, 1997

INFORMATION/OVERHEATED ELECTRICAL MOTOR—A Public Safety Officer responded to Dana Engineering building on a fire alarm activation. Smoke was found to be coming from an electrical motor. A University employee responded to inspect the equipment.

INFORMATION—A Public Safety Officer responded to Kappa Delta Rho and found evidence that individuals had been drinking alcoholic beverages while sitting on the lawn. The fraternity president received a verbal warning and was requested to move the brothers inside the building.

March 1, 1997

INFORMATION/UNIVERSITY PROPERTY DAMAGE—A Public Safety Officer responded to Swartz Hall for the report of a broken window. No apparent cause could be located. Physical Plant was contacted to make the repairs.

THEFT—A Public Safety Officer received the report of money being taken from an unlocked Swartz dorm room. The incident is under investigation.

MEDICAL ASSIST—A Public Safety Officer responded to Davis Gym for the report of an injured University student. A Student Health Services driver transported the student to Evangelical Hospital Emergency Room for treatment.

TRASH CAN FIRE—A Public Safety Officer responded to Roberts Hall for a fire alarm activation, caused by a fire in a trash can. A witness had put out the fire, which appeared to have originated from a burning cigarette butt.

INFORMATION/SUSPECTED MARIJUANA ODOR—A Public Safety Officer responded to Swartz Hall for the odor of marijuana. Upon investigation, the report appeared to be unfounded.

March 2, 1997

INFORMATION/DISTURBANCE—While on routine patrol a Public Safety Officer and the Lewisburg Police Department observed an altercation between two University students walking on the sidewalk at Smith Hall. The officers spoke with the students and the victim advised that no charges would be necessary.

ACCIDENT—A University student reported to a Public Safety Officer that her vehicle's windshield was broken while the car was parked in Lower Harris Lot. The incident is under investigation.

INFORMATION—A University student reported to a Public Safety Officer that someone marked the roof of her car while the vehicle was parked in Bucknell West. An approximate time could not be determined and the incident is under investigation.

March 3, 1997

VEHICLE ACCIDENT—A Public Safety Officer responded to Dent Drive at 7th Street for a motor vehicle accident. A University employee's vehicle sustained minor damage when struck by a University owned vehicle. No injuries were sustained in the accident.

STUDENT HEALTH SERVICES/AMBULANCE REQUEST—The Student Health Service requested an ambulance to transport a University student to Evangelical Hospital for treatment of a leg injury.

VEHICLE ACCIDENT—A Public Safety Officer responded to Lower Taylor Lot for the report of a collision between a University vehicle and a University student's vehicle. There were no injuries reported.

March 4, 1997

INFORMATION/SAFETY VIOLATION—A Public Safety Officer responded to a fire alarm activation at the Delta Upsilon Fraternity. The officers found smoke detectors that had been covered, posing a safety hazard.

THEFT—A University employee reported that parts of the water cooler and water bottles had been removed from Taylor Hall. The incident is under investigation.

VEHICLE ACCIDENT—A Public Safety Officer responded to the Langone Center at Dent Drive for a vehicle accident involving a University truck that was struck by an unknown vehicle that had left the scene. The incident is under investigation.

MOTOR VEHICLE ACCIDENT—A Public Safety Officer responded to Bucknell West for the report of a motor vehicle accident, involving two student vehicles. The damages sustained were minor and East Buffalo Township Police Department was notified.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

Community Judicial Board releases results

The information which follows is a summary of cases recently adjudicated by the Community Judicial Board Panel.

First-year male involved in two incidents:

Incident #1: Student acknowledged responsibility for possessing and using a BB gun inside of Vedder Hall in late November to break five window panes.

Charge: possession of firearms and explosives.

Incident #2: Student acknowledged responsibility for being stopped by a Public Safety Officer for carrying a pitcher of beer on campus, providing the officer with a false name and claiming he had no form of identification. The student fled from the officer, but was later found lying unconscious near the Langone Center; transported to Evangelical Hospital for treatment. December 14, 1996.

Charges: Failure to comply/ Disorderly Conduct (Cat. II), Possession and/or consumption by an underage person, Intoxication or public drunkenness.

Sanction: Placed on stayed suspension through June 1, 1997. If found responsible for any violation of the Student Code of Conduct between this date and January 1, 1998, or fail to fulfill the requirement listed below, the sanction of suspension for one academic semester will be immediately activated; placed on Disciplinary Probation from June 1 to January 1, 1998.; required to meet with Drug and Alcohol Programs Coordinator for evaluation of his use of alcohol; will continue to meet until mutually determined the meetings are no longer necessary; prior to meeting with Drug and Alcohol Programs Coordinator, must submit a three-page paper "What Influence Peer Pressure Had on this Incident"; required to perform 20 hours of University service by remaining on campus May 16 and 17 to work with the Physical Plant to clean residence halls; restitution for the damages; if an applicant to live off campus, must meet with the Off Campus Living Review Board to determine his eligibility.

Incident #3: First-year male acknowledged responsibility for smoking marijuana in his Vedder Hall room as reported by Public Safety.

Charge: Possession/ Use of a Controlled substance

Sanction: Placed on stayed suspension through January 1, 1998. If found responsible for any violation of the Student Code of Conduct between this date and January 1, 1998 or fail to fulfill the requirement listed below, the sanction of suspension for one semester will be immediately activated; required to meet with Drug and Alcohol Programs Coordinator by March 10 to discuss the issues related to this incident and evaluate his use of marijuana; will meet until mutually determined that the meetings are no longer necessary; if applicant to live off campus, must meet with the Office Campus Living Review Board to determine his eligibility.

Incident #4: First-year male acknowledged responsibility for smoking marijuana in his Smith Hall room as reported by Public Safety.

Charge: Possession/ Use of a Controlled substance

Sanction: Placed on stayed suspension through January 1, 1998. If found responsible for any violation of the Student Code of Conduct between this date and January 1, 1998 or fail to fulfill the requirement listed below, the sanction of suspension for one semester will be immediately activated; required to meet with Drug and Alcohol Programs Coordinator by March 10 to discuss the issues related to this incident and evaluate his use of marijuana; will meet until mutually determined that the meetings are no longer necessary; if applicant to live off campus, must meet with the Office Campus Living Review Board to determine his eligibility.

Fee increase is approved

The University's Board of Trustees has approved a 3.9 percent increase in the comprehensive fee for students attending the University during the 1997-98 academic year.

At a recent Board meeting, the Trustees set the comprehensive fee—the total cost for room, board, tuition and fees—at $26,410. Marking the lowest percentage increase in 34 years, the comprehensive fee is $990 more than that of the 1996-97 academic year.

Tuition accounts for $21,080 of the comprehensive fee, while room is $2,785, board is $2,415 and fees are $130.

INTERNET ACCESS

from page 1

resource.

Sara Dean '99 was offered the service in January, but refused it due to the relatively small amount of time she spends on the Internet and, "for $65, I don't see a reason for it," she said.

Matt Kurdock '99, a computer science and chemical engineering major, is currently using a modem-based system, "but with World Wide Web and the Internet it's really power draining—it's too slow for anyone. Also, it's impossible to get a connection anywhere from like 5 p.m. to 12 a.m."

Kurdock said, "The new system is really excellent, but Bucknell is really slow on it. Other not so well-endowed schools have had this for a long time."

Yet, Kurdock does not plan to use ResNet. He said "I really considered it, but I just don't think I have that kind of money. For $65, I can walk down to Dana."

R.A.D.

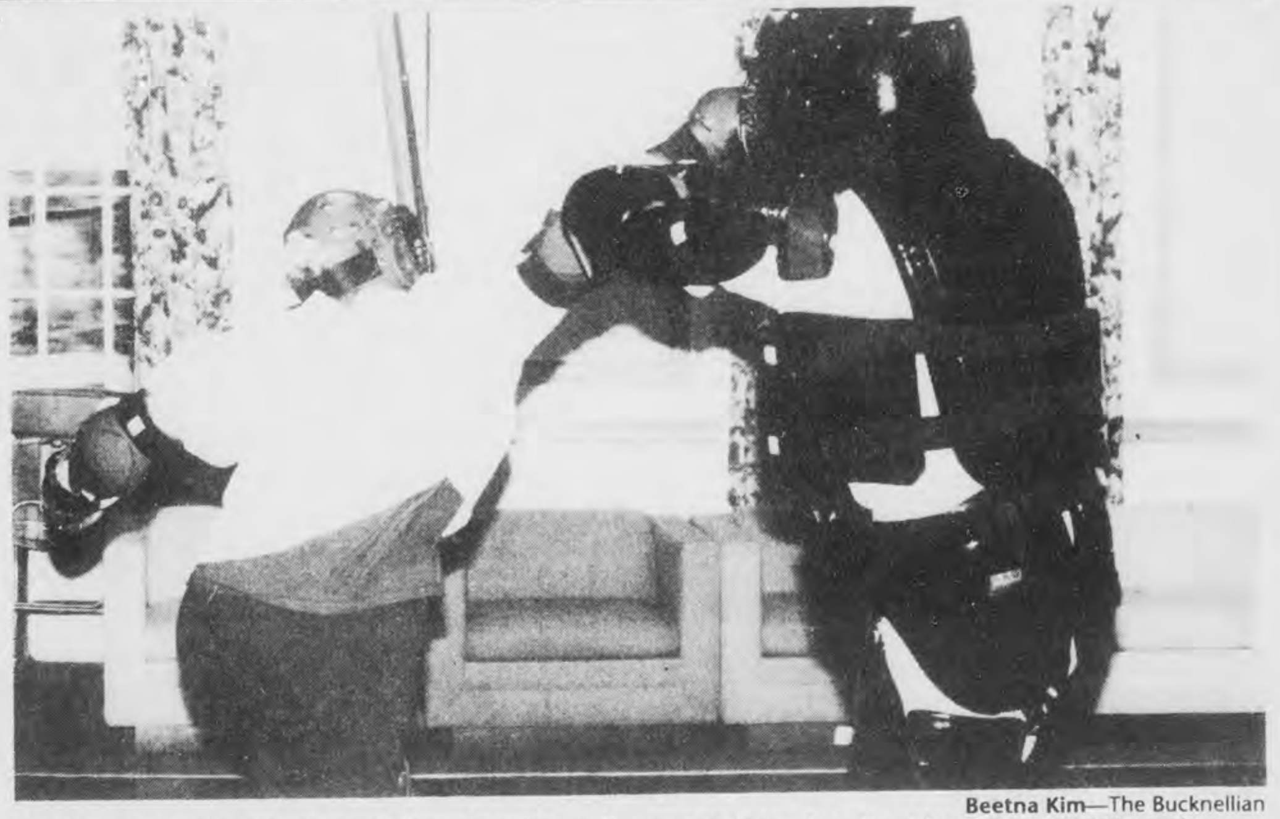
from page 1

gressor and how to escape situations where she is up against two aggressors as well."

The last session of R.A.D. put the skills developed by its students to the ultimate test. R.A.D. instructors suited up and acted as aggressors against each individual female student. Each mock attack was taped so that students could observe their techniques after the session was complete.

During this session, each female student was tested in different mock attack situations. At first, she may have dealt with defending against a wrist grab done by a purse snatcher. Later on, the mock attack became more serious, as the student had to deal with defending herself against two aggressors.

"In any case, our instructors really did act like aggressors. They were definitely not nice. For instance, in one case a member was placed at an ATM machine. An instructor was a robber who sneaks up behind. It's the defender's job to use elbow chops and any other attacks necessary to escape the robber," said Sarah Singer '99, a R.A.D. student.



Beetna Kim—The Bucknellian

Melissa Brown '99 defends herself against her well-protected attacker, Jim Middleton. Middleton is a public safety officer, as well as a R.A.D. instructor. The 6-week course trained women to protect them-

At the end of the session, students seemed pleased with their progress. Leigh Klimowicz '00 said, "It's a very empowering experience to go through this course. I gained a lot of self-confidence from this course. It makes you aware of possible real life situations that may occur and how to defend against them."

Singer added, "We have been trained to be more aggressive. The course has almost presented us with a new socialization."

Henry believes that more female students should join R.A.D. "There have already been 14 reported sexual assaults on campus this year. But this is not the only place we live in. This course will help female students protect themselves both now and in the future."

Henry indicated that R.A.D. will have at least two more sessions after spring break.

Beetna Kim—The Bucknellian

Sarah Anderson '99 struggles to free herself from Jeff Baird, her attacker. Baird is the director of public safety at Lycoming College and a R.A.D. instructor. While the first session of the course just ended, more sessions will be offered after spring break.

The 1997 yearbook is almost complete, and we're ready to SUBMIT it to the publisher. We have the layouts and the stories. Now, all we need are the PICTURES. Do you have any photos laying around your room that you want TO see in the 1997 yearbook? If the answer is yes, send them to L'AGENDA, C-3906, by Tuesday, April 1st. Make sure you put your name and box number (home address if you're a senior) on the back of the picture, so we can return them next fall when the yearbooks arrive.

THANKS!

National News

Muddy Ohio keeps on rising

CINCINNATI, Ohio—The muddy waters of the Ohio River rose inexorably toward their highest level in three decades yesterday as flood-weary residents of the Ohio Valley braced for more rain, surveyed their flooded homes, and searched for more victims.

President Clinton has dispatched Vice President Al Gore and Federal Emergency Management Director James Lee Witt to the Ohio Valley to survey the damage. The president has already declared federal disaster areas in 14 Ohio counties.

More rain was forecast for yesterday, but precipitation amounts were expected to be much lower than the copious amount of rain that fell over the weekend. But state and federal officials said the new rains will prevent the Ohio and its tributaries from dropping as fast as had been hoped.

Coast Guard Petty Officer Alan Hayes said Ohio Valley residents who had stayed in their homes as the Ohio rose around them were now asking officials to help them get out.

Pentagon chief criticizes Gulf War record-keeping

STUTTGART, Germany—Defense Secretary William Cohen said yesterday he is disappointed that most Gulf War chemical weapons logs are missing but he expressed confidence that the Pentagon is conducting a thorough investigation of the matter.

While critical of the military's record-keeping, Cohen promised to "pursue all the leads that we can" to find missing logs that tracked chemical warfare during the Persian Gulf War.

"I think there's general disappointment with the level of record-keeping that took place," Cohen told reporters traveling with him in Germany on his first trip abroad as Pentagon chief.

On Monday, Cohen ordered the Pentagon's inspector general to investigate the mishandling.

A separate Pentagon team investigating the missing files said in a preliminary report last week that more than three-quarters of the records are missing even though multiple copies had been stored in safes at U.S. military bases after the war.

Black actor's portrayal of Jesus sparks threats

NEWARK, New Jersey—Eric Hafen knew he would get some telephone calls when he cast a black man to portray Jesus Christ in an annual play. But he did not expect death threats.

"The first call that I got, the woman asked me, 'When is the white actor playing because I don't want to see the black thing,'" Hafen said Tuesday.

Hafen, artistic director for the Park Theater Performing Arts Center in Union City, selected Desi Arnaz Giles to play Jesus in "Passion Play," a story of Jesus' final days, because of his "humanistic approach."

While officials have not taken the death threats seriously, they are troubled about the response. At least two groups have canceled and another rescheduled for a day Giles is not working.

As it happens, Giles is portraying the devil this week in a musical in Plainfield.

"We'll see how many people object to a black man playing him," Giles said.

World News

Nuclear waste convoy inches through protesters

DANNENBERG, Germany—Six flat-bed trucks carrying spent fuel rods from German nuclear power plants pulled out of a Dannenberg train station yesterday morning, while protesters continued a pitched battle with police to stop the transport.

The convoy left hours late because thousands of demonstrators blocked the street leading away from the station. After first trying to carry the protesters away one at a time, police finally resorted to low-pressure bursts from a water cannon.

After about three hours, police had pushed the 4,000 demonstrators a few hundred meters away.

Protesters have blocked and damaged many of the roads from Dannenberg 20 km (14 miles) away in Gorleben, where the nuclear waste is to be stored. They have dug tunnels beneath the roads, cemented tractors to the road and used human blockades. In one instance, two men cemented themselves to the tracks and had to be removed with jackhammers.

Koller proposes $4.7 billion fund for Nazi victims

BERN, Switzerland—Switzerland's president proposed yesterday using the country's gold reserves to endow a $4.7 billion fund that would aid Holocaust victims, a major concession to international groups that claim Swiss banks still hold the fortunes of Jews murdered during World War II.

President Arnold Koller told Parliament that the Swiss Foundation for Solidarity— to be set up in the coming year—would help "victims of poverty and catastrophes, of genocide and other severe breaches of human rights such as, of course, victims of the Holocaust" both inside and outside of Switzerland.

Swiss National Bank Chairman Hans Meyer said the new plan, which would require amending Switzerland's constitution, entailed selling gold over a decade. But he insisted such sales would not have to disrupt the gold market and would not undermine the stability of the Swiss currency.

No taxpayer money would be used for the solidarity fund. Swiss conservatives have attacked any such move as tantamount to an admission of guilty behavior during the war.

Mangled Manilow prompts pollution check

SWINDON, England—They hate the song that makes the whole world sing. Maybe because the whole world seemed to be singing it. Badly.

A team of noise pollution inspectors went undercover after residents of Swindon, west of London, complained that karaoke singers at the local pub sang Barry Manilow's 1970s hit "I Write the Songs" again and again.

Neighbors put up with karaoke evenings at The Gamekeeper pub when they began last year, but called in their local council's health inspectors when "I Write the Songs" became virtually the only song aspiring Manilows would sing.

"This Barry Manilow song was a particularly tuneless rendition," said Stephen Harcourt, the insanity-defying health inspector who staked out The Gamekeeper pub for three nights.

"It was quite a difficult song to sing but it was really murdered," he said. "I think it was the straw that broke the camel's back for the residents. We all agreed the noise was unacceptable."

Following Harcourt's team's recommendation, the local council revoked publican Tracey Osbourne's license in October. She appealed, and a court threw out her appeal this week.

Planned call boxes to increase security

By Kathryn Ardinger

Bucknellian Staff Writer

TRACEY GRAY

Eight call boxes will be installed around campus since Bucknell Student Government received approval this week from Gene Spencer, director of computer and communication services.

Currently, one call box which was installed last year is located by Larison Hall. Tracey Gray '99, president of Bucknell Student Government explained that there are 14 residence hall and thus 13 more call boxes are needed around campus.

"It's [call boxes] a security measure that many of our frame of reference schools have," Gray said.

The call boxes, which are different from the freestanding emergency call boxes with a direct line to Public Safety, will cut down on the number of calls to Public Safety for students who are locked out of their residence halls. Furthermore, the call boxes may reduce the number of broken windows that result from locked out students trying to gain entry into residence halls.

Ultimately, the call boxes will increase campus security. While the line to Public Safety is not direct, the phones will act as another link to Public Safety.

Originally, BSG planned to present the proposal to the University, but decided to fund five of the phones, with the hope that other University departments would follow suit, Gray said.

A few BSG members did not think that this would actually happen, but Housing and Residential Life offered to fund three of the call box phones, according to Gray.

Five call boxes will be installed by the end of the semester, while the remaining three will be installed during the renovation period over the summer, Gray said.

The new call boxes will be stationing in the following locations: Hunt Hall, on the St. George side of Larison Hall, the main entrance of Vedder Hall, under the portico of Smith Hall, the main entrances of Roberts and Swartz Halls, and one on both sides of the Gateway, Malesardi Hall.

The call box phones, which will be fixed to the residence halls, are in accordance with the American Disabilities Act in terms of height accessibility.

The call boxes will not be free standing because of the $2000 to $3000 incurred additional expensive of doing so, Gray said.

ADAMS ANSWERS QUESTIONS

from page 1

Beetna Kim—The Bucknellian

President William D. Adams addresses students, who crowded into the Langone Center Forum Tuesday.

cuss a variety of concerns and issues.

The Greening Task Force, the University's endowment and financial aid were other topics briefly addressed during the hour and 10 minute forum.

For instance, Adams explained that the University is aiming to increase the number of students receiving financial aid from the current 35 percent to 45 percent by 2001-2002, which amounts to an increase in financial aid from the current $16.5 million to $24 million.

Adams not responsible for changing Wesleyan Greek System

President William D. "Bro" Adams was not responsible for abolishing the Greek system at Wesleyan College in Connecticut, as some students have indicated in the last few weeks.

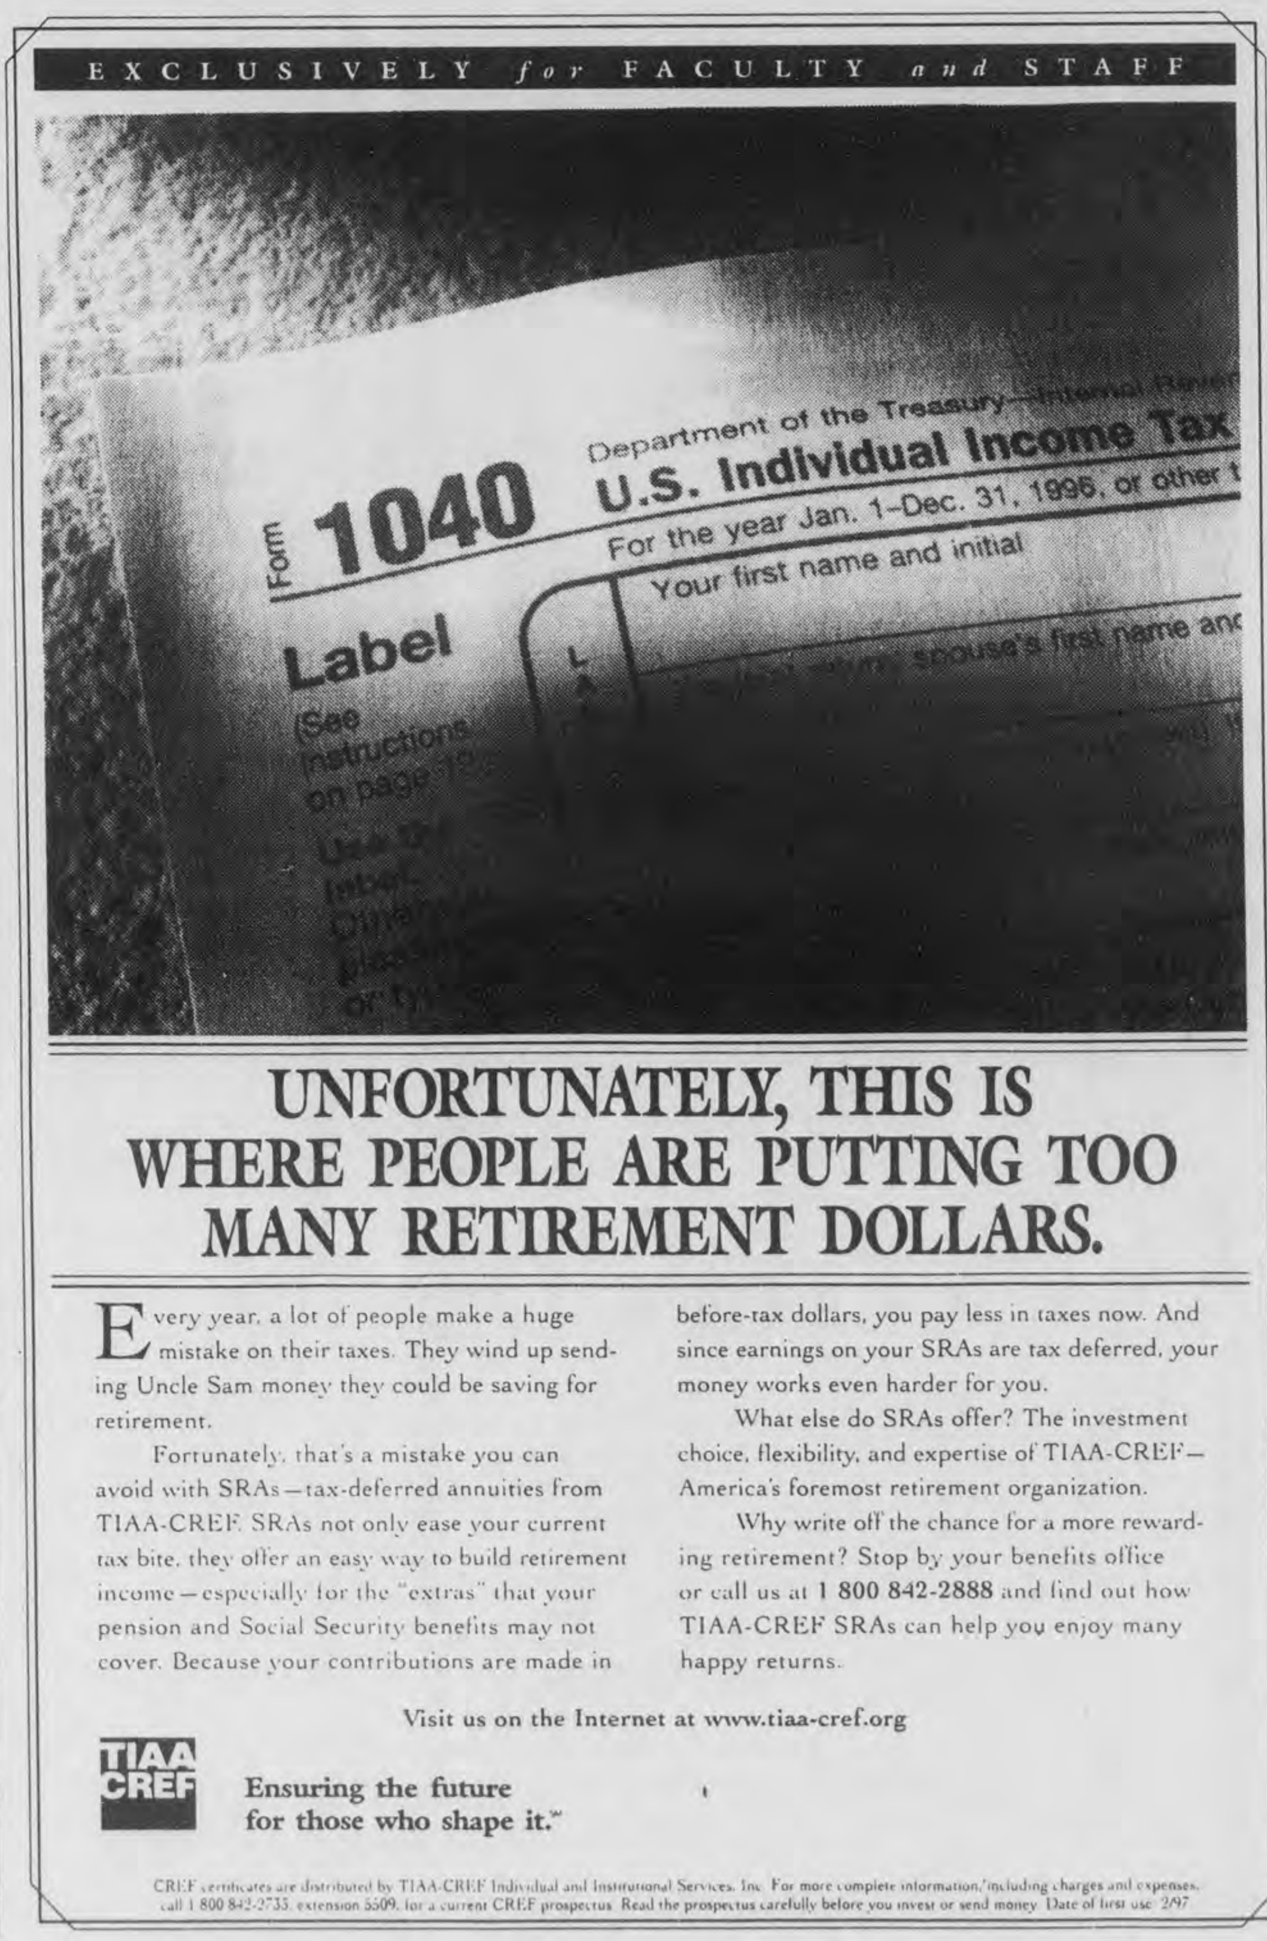
In fact, Wesleyan currently has five residential coeducational fraternities, whose members comprise less than 10 percent of the university's total population, according to Bill Holden, Director of Public Information at Wesleyan.

Upon Adams arrival at Wesleyan in 1988 as the Executive Assistant to the President, a university policy mandating the coeducation of all-male fraternities had already been in place for a year.

When asked what Adams' role was in creating this policy, James A. Flynn Jr., director of major gifts at Wesleyan, said, "None whatsoever."

In an interview Tuesday, Adams said, "I worked for the president, I was involved in [the policy's] implementation. That was the policy and that's what we were seeking to accomplish."

Adams indicated that he has no plans to abolish Bucknell's Greek system. "I'm not in the position to do away with the Greek system here or at Wesleyan... Bucknell is a different place. It has different policies and different tendencies. It is a different institution with a different set of values," he said.



EXCLUSIVELY *for* FACULTY *and* STAFF

UNFORTUNATELY, THIS IS WHERE PEOPLE ARE PUTTING TOO MANY RETIREMENT DOLLARS.

Every year, a lot of people make a huge mistake on their taxes. They wind up sending Uncle Sam money they could be saving for retirement.

Fortunately, that's a mistake you can avoid with SRAs—tax-deferred annuities from TIAA-CREF. SRAs not only ease your current tax bite, they offer an easy way to build retirement income—especially for the "extras" that your pension and Social Security benefits may not cover. Because your contributions are made in before-tax dollars, you pay less in taxes now. And since earnings on your SRAs are tax deferred, your money works even harder for you.

What else do SRAs offer? The investment choice, flexibility, and expertise of TIAA-CREF—America's foremost retirement organization.

Why write off the chance for a more rewarding retirement? Stop by your benefits office or call us at 1 800 842-2888 and find out how TIAA-CREF SRAs can help you enjoy many happy returns.

Visit us on the Internet at www.tiaa-cref.org

ARTS & ENTERTAINMENT

Tune in to a collaborative musical recital

By Anne Putnam

Bucknellian Staff Writer

Three different people, one common interest: their devotion to music.

The University requires that all music majors give a recital to display their talents. Kiersten Drumm '98, mezzo-soprano, and Jen Ahrens '97, clarinetist, are combining their talents to perform a collaborative effort in their junior/senior recital. Ray McDonald '99, will accompany Drumm on the piano.

Early Thursday morning in the Bison, Drumm interrupted her busy schedule to divulge her hopes and fears concerning her music career. Drumm, a music education major, has always enjoyed music due to the fact that her mother is a professional singer. Drumm loves her mother's voice because it gives her a "great feeling." Her mother became her inspiration.

Encouraged by her mother's talents, Drumm took piano and voice lessons. Her voice teacher pushed her further. Drumm's impression of her teacher's singing was "Holy cow!" When she projected her voice, Drumm was enraptured. From this great basis, Drumm went on to perform in high school musicals, and was chosen to participate in a select chamber choir of 30 voices. Headed to Bucknell, Drumm knew what she wanted and had found a strong program in the growing music department at the University.

Drumm is very active musically on campus. As a member of the Rooke Chapel Choir, the Chorale, Two Past Midnight, the handbell ensemble and the technical and costuming divisions of the Opera Company, there is never a dull moment in her life.

A typical day for Drumm involves music all day long. She begins her morning with an hour of singing rehearsal in a practice room of the Music and Arts building at 11 a.m. Classes run until 3 or 4 p.m. for her and then she continues to practice at 5 p.m. each evening for Chorale or Chapel Choir, depending on the day. The rest of her evening is devoted to a dual rehearsal with McDonald so they can perfect the recital pieces. In her performance, Drumm will sing nine selections, including several in foreign languages, as the recital must show the different languages she has mastered. Four German selections, two Italian as well as two English songs, and one French piece demonstrate the breadth of her ability. She chose these pieces herself with assistance from her professors.

Beetna Kim—The Bucknellian

Jen Ahrens, a member of the symphonic band, orchestra and a director of the stadium band, practices her clarinet for the recital.

Drumm's aspirations are very focused. She hopes to work as a high school music teacher with the possibility of going further into a singing profession. As the feasibility of professional success is not guaranteed, Drumm is holding off on her hopes to become involved with administration and opera performance for a while. She plans to attend graduate school if she pursues an administrative position in an opera company.

A little-known aspect about Drumm's life is her ability to speak in sign language, which connects to her love and pursuit of music. A deaf woman in her neighborhood had an impact upon her youth and, as a result, Drumm began to learn sign language. Although there is little connection to her musical stimulus, Drumm stated that the deaf can pick up beats and feel vibrations without hearing the sounds of music. She feels this aspect of her education will help her with teaching and working with kids.

Beetna Kim—The Bucknellian

Kristen Drumm and Ray McDonald rehearse their selections for the upcoming performance. Drumm aspires to become a high school music teacher or perhaps a professional singer. But for now, her participation in the Chorale and Chapel Choir give her voice a lot of practice to reach her dreams and goals.

Ahrens is also a music education major with a concentration in the study of the clarinet. Straight from practicing, Ahrens came to the Seventh Street Cafe to unwind before concentrating on the busy day to come. Every day is full for this senior, who is student teaching for her last semester in Lewisburg at both the middle and elementary schools. She divides her time between four days at the middle school and two in the elementary, leaving little time in-between to prepare for the recital. Ahrens is extremely devoted and arrives to start her days by conducting and observing band rehearsals. The day proceeds to involve group instrumental lessons which she enjoys very much.

Ahrens likes to work with the kids: "They have a different mentality because of the levels they come from socially and musically." But what the discoveries really come down to in her mind, are "having fun."

In fourth grade, she became involved with the band program and chose to play the clarinet. She began perforing in both the band and marching band. Private lessons followed in sixth grade which led her into regional bands. Her involvement with the high school marching band tuned her into the future she wanted to pursue. She joined this band in eighth grade, a year earlier than most, and realized at this time that the clarinet was impacting on her life. "Band was really my life from then on," she stated.

Ever since that point, Ahrens focused her interests on music and when she became a junior in high school, she decided to follow musical education in college. Now a participant in the symphonic band, a two year member of the orchestra with a concerto performance last semester, and student director of the stadium band for three years, Ahrens has made an impact and become an asset to the music program at the University.

Ahrens hopes to teach instrumental music as an elementary or middle school teacher, hopefully in the greater Philadelphia area. She understands the competition within the work force, especially money constraints from budget cuts. She is very hopeful nonetheless.

Ahrens will be performing three pieces for her senior recital. *Saint Saens Sonata* is a standard clarinet piece with Andrea Maas '98 accompaning on piano. Her other duet is by Gordon Lewin, *Three Latin American Impressions*, which will be performed with Pam Lucera '97, her roommate and flutist. They chose this piece because Lucera's flute teachers played this duet together and suggested the song. *Rhapsody* by Wilson Osbourne is her only solo piece, also selected at a professor's suggestion.

McDonald pulls the whole picture together. As a sophomore, he is Drumm's accompanist and will be until she graduates, a position they mutually agreed upon. McDonald is pursuing a Bachelor of Arts in Music with a piano concentration. He selected piano in his youth as his musical family was a significant influence. His father played the piano and he remembered "(the piano) just always being there."

As the Gospel Choir Leader at the University, McDonald continues his previous involvement. He directed choirs before coming to Bucknell including working with the Baltimore Youth Choir. He composed two pieces for the choir for a Gospel competition placing his work in the top 10 finalists. It is not surprising that he prefers the styles of Gospel music. McDonald's natural talent speaks for itself and he believes God gifted him with his ability.

Although McDonald came to the University as a pre-med student, Chorale and his other musical pursuits changed his pursuit. Barry Hannigan, his advisor and professor of music, instructs him on piano technique and influenced his change to music concentration. Now he sees the possibility of heading into a music ministry, with hopes to have his own Gospel choir.

The three, although very different personally, are focused on the same goal. Yet, short term objectives take precedent for the upcoming recital, something all three are anticipating. Drumm, Ahrens and McDonald are enthusiastic about the recital, especially since it will be their first effort together.

The recital starts at 7:30 p.m. on Sunday in Bucknell Hall.

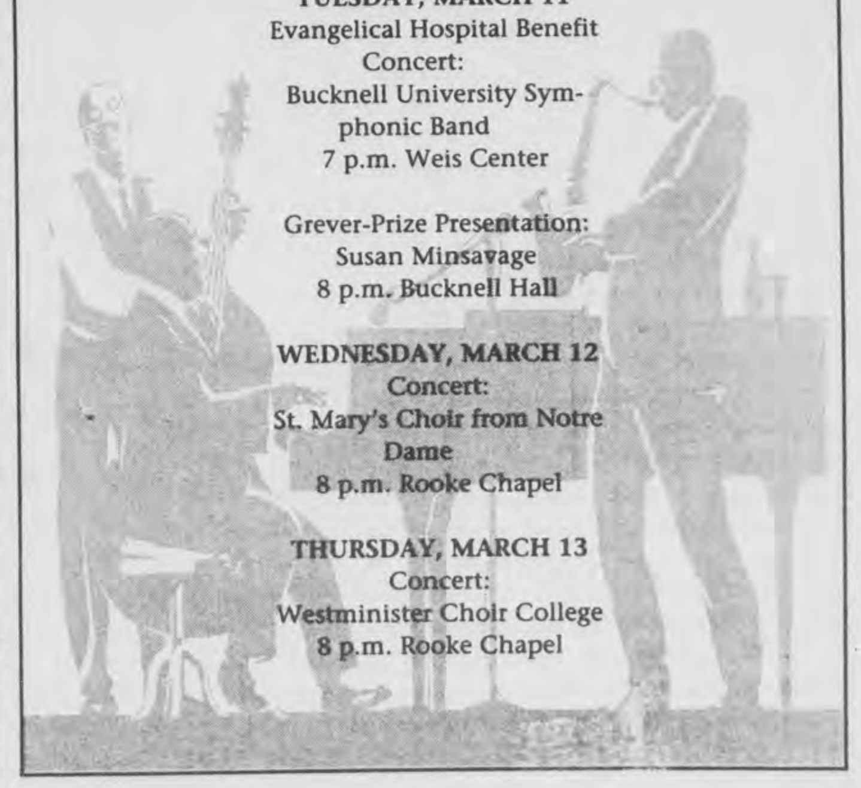
BEFORE THE MORNING OF GRADUATION THE SCHOOL IS CUTTING OFF 21 YEAR OLDS AND GIVING THEM A NEGATIVE LASTING IMPRESSION OF BUCKNELL AND FORCING ALL THE PARTIES DOWNHILL JUST BECAUSE THEY COULDN'T HANDLE THEIR OWN SECURITY AT THE GALA? ALUMNI DONATIONS WILL BE GREAT NEXT YEAR!
CLASS OF 1997!
TENT PARTY W/ MILK + COOKIES
CHIRP CHIRP
WELL CAPTAIN, THE GREEK SYSTEM IS GOING NEXT, SO BEFORE BUCKNELL HAS AN ENROLLMENT OF 4 AND VANISHES, I'M BRINGING YOU BACK TO LIFE TO SAVE IT AND GIVING YOU A PALETTE OF BEER AND A CASE OF ASSAULT RIFLES TO DO THE JOB.
NOW LETS SEE IF WE CAN'T POSSIBLY MAKE THIS COMIC ANY MORE OBNOXIOUS. YOU'RE MINE TILL AFTER SPRING BREAK, NOW LETS GO SEE IF WE CAN'T BREAK SOME SPRINGS OF OUR OWN!!

A & E Calendar



FRIDAY, MARCH 7
concert:
Cassatt String Quartet
with Lois Svard on piano
8 p.m. Weis Center
tickets required

SUNDAY, MARCH 9
Poetry Reading:
The Dark Room Collective
2 p.m. Bucknell Hall

Senior/Junior Recital:
Jen Ahrens, Kiersten Drumm,
and Ray McDonald
7:30 p.m. Bucknell Hall

TUESDAY, MARCH 11
Evangelical Hospital Benefit
Concert:
Bucknell University Symphonic Band
7 p.m. Weis Center

Grever-Prize Presentation:
Susan Minsavage
8 p.m. Bucknell Hall

WEDNESDAY, MARCH 12
Concert:
St. Mary's Choir from Notre Dame
8 p.m. Rooke Chapel

THURSDAY, MARCH 13
Concert:
Westminister Choir College
8 p.m. Rooke Chapel

EDITORIAL

Networked residence halls are not a privilege, but a necessity

Sending email and surfing the net from computer labs and modems only? Not anymore. Next year the residence halls will be fully wired so that students can have access to the internet from their rooms without the use of a modem.

Add it all up, and what do you get? A loss of $130, if students want to take advantage of this technological feat.

The University should be commended for this upcoming improvement, even if it is late in arriving. In this computer age, Internet access is becoming more of a necessity. It is not uncommon for students to communicate with their professors through email, and campus announcements are often sent electronically. Not only is the Internet a technological advance, it is also an educational advance. The University has rightly seen that individual dorm room wiring is the way to go.

Having the dorm rooms wired is important because it will relieve some of the stress on computer lab equipment and will most likely make it easier for students to find an open computer during busy times, such as midterms and finals when many assignments come due.

However, it is unnecessary to charge students $65 per semester to connect to the internet. This $130 a year seems like an outrageous cost for a service that should be free. Students do not pay to have access to a phone line, and this is very much the phone line of the future. Internet access is no longer a privilege. It is a necessity.

In the near future, no one will think twice about the possibility of Internet access in residence halls; people will simply assume it is available. Even today, some new students arrive at Bucknell with this expectation, only to be disappointed. Granted, next year this expectation will be met, but only when students reach into their pockets and pay up.

In order to remain competitive, the University must install a network for the residence halls, a step they are finally taking. But by forcing students to pay, the University is actually providing a limited service. This restriction is a step in the wrong direction. Why hold back the wave of the future by charging students a fee they may not be able to or want to afford?

As an institution of higher education, it is the University's responsibility to provide students with the most up-to-date tools to maximize their educational experience. Without a fee. Let's make this three steps forward, without a step back.

LETTERS

Alleged abuse at parties refuted by fraternity president

To The Editor:

I have never written a response to anything that I have ever seen in the *Bucknellian* in all of my three and a half years here at Bucknell. However, in the Feb. 13 edition I noticed a statement that was so ignorant and spiteful, I feel that it necessitated a response. An article entitled "Other campus issues exist besides Tent Party," by Kyle Holloman and Gillian Kirstel, the following statement was made:

"Our class is willing to speak out in protest concerning our right to drink, yet every day we passively accept atrocities that occur on our own campus. We watch while women are drugged and raped at our Frat parties and we remain silent."

Of course, this is not the first time the Greeks have been attacked here at Bucknell for a multitude of reasons. But it is the first time that I have ever heard such an uninformed and mean-spirited comment. I refuse to allow these authors to accuse me, my fraternity and the majority of the fraternal system of this crime. I have never, nor will I ever sit passively by and allow such a sick individual to perpetuate such a crime. If I ever found out that a brother in my fraternity had participated in an act that violated a woman, that person would be immediately removed from our numbers and I would be the first to cooperate in the resulting criminal investigation. My morals, and those of the majority of fraternity men, would not allow such actions to take place within our midst.

To the authors: I am uncertain as to what your personal experience is with Greeks and fraternity parties in particular. However, I am quite sure that even if you have had a terrible experience similar to the one you are describing, by all means come forth and finger the guilty party. However, by ignorantly accusing the entire fraternal system of this disgusting crime you are only serving to perpetuate untrue, misleading and slanderous stereotypes.

I believe that ignorance is the root of all stereotypes. If you would ever like to alleviate yourself of this terrible affliction I have a few suggestions for your education process. If you have the desire to learn more about the moral values of my own fraternity and brotherhood, I would be more than happy to entertain your request. If you would like to ascertain the values of the Greek system here at Bucknell, I would encourage you to arrange an audience with Dean Roy Baker. If you would like to learn more about the actual statistics and facts of the escalating violence against women on this campus, meet with Dean Joyce Bylander. If you question the way that Kappa Sigma has treated women in the past, please call our alumni advisor, Dr. Bill Lenker, and he will be more than happy to instruct you in the facts. I am confident that the information you would gain at these meetings will move you one step closer to an accurate understanding of the slanderous nature of your accusation.

I have refused to remain silent on this issue and I would encourage my fellow Greeks to stand up and respond to any and all false accusations made against the system. I would also encourage any other person who has a grudge against the system to educate him or herself before denouncing the entire system. I firmly believe that if we can eradicate the ignorance here at Bucknell on both sides of the issue, the benefits reaped will be immense. Someday I hope that the Greeks, administration, faculty and independent student body will all fully understand and support each other's needs, cultures and desires. Before this point can be reached, all groups on campus must take the initiative to educate themselves. Without everyone moving toward this goal of common understanding, we as a community will only be as intelligent as our most ignorant member.

Alcohol ban at Tent Party must be kept in perspective

To The Editor:

I think we're missing the point. While attending the Forum in which President Adams addressed the criticisms that abound from his decision to ban alcohol from Tent Party, there seemed to be an inability of the group to put things into perspective. Do I believe that this was a bad decision? Yes. I also believe that the inconsistency and hypocrisy of the band-aid approach was obvious to President Adams as well as all in attendance. The decision seems largely to be a "makeup call" for the mismanaged Gala fiasco at the expense of a much different Tent Party. However, the word "tradition" continually arose as a rallying cry for a senior class that feels slighted. But isn't Tent Party itself the tradition? In saying this, I do not agree with the belief that social events such as these are as enjoyable without adult beverages. I also do not agree with the implication put forth by the student who asked "Why is alcohol integral to Tent Party?" The implication is that this individual is able to have a good time at a social events without alcohol whereas the rest of us sinners are too weak to expose our sober personalities. I am not afraid to answer this "holier than thou" attitude by saying that I do enjoy the effects of a reasonable amount of alcohol at such functions.

However, I believe that the question should have been posed, "By a show of hands, how many of you have never attended Tent Party?" I would expect that the majority (including President Adams) would have had to raise their hands. I did attend Tent Party last year as a 21 year- old junior, and I must admit that the degree to which alcohol was a part of that event was minimal. I knew people who would wait in a long and slow moving line to get a cup of watered-down beer, only to go immediately back to the end of the line to wait again. Even these people had a difficult time "tagging on a buzz," so to speak. Thus, what is the "tradition" that everyone is ranting and raving about? My understanding of a tradition is something that is near and dear to a certain group and is both *understood* and longed for by that group. But I argue that we are fighting for a tradition that is envisioned differently than it takes place in reality.

Finally, I must admit that I find it hard to feel as though I've some how been victimized by this university. I don't mean to take on an "eat your green beans because there are people starving in China" attitude, but look at the relative position of Bucknell grads in the world. The redundant whining of "but, I've worked so hard these last four years" needs serious reconsideration. We work hard here because it's in our own interests to do so. It's not as if we've been altruistically building sanitation systems and hospitals for the world's poor. Sometimes I think we need to take a step back and see our problems in a wider perspective.

President Adams corrects information on Idleman and "dunk tank"

To The Editor:

A recent letter in *The Bucknellian* incorrectly noted that Lee Idleman has resigned from the Board of Trustees. Mr. Idleman remains a very active and important member of the Board, and is the Chair of the Investment Committee. In addition, I wish to state clearly that I have no intention of sitting in a "dunk tank" at any time in the near future. This remark was made in a humorous way during a recent interview on WVBU. I regret that it was taken seriously. Thank You.

William Adams, President

OPINIONS

Bucknell students lacking in volunteer activity

By Nora Daniels
Bucknellian Staff Columnist

I recently heard a man say, "Well, I gave to the United Way, so my good deed is done." This man holds a position that demands respect, and until I overheard this statement, I respected him not just professionally, but also as a person.

While giving to the United Way or another organization is an act of community service, there is more to giving back than that sort of automatic activity. When did that man last stop to see who right here in Lewisburg needs help? When did he last see all the sorts of people right here who are in desperate straits?

Oh, I understand perfectly how he and all others like him could drive down Market Street, see the speciality stores that are supported by the local community and decide that no one here needs anything he can give. So he sends his donation in the mail and feels warm knowing that someone, somewhere will be helped by it.

I did not know how many people in Lewisburg need even the most basic necessities until I started working with BISON Volunteers. Did you know that there are a large variety of local organizations that help area residents with everything from providing winter coats to spring cleaning? Susquehanna Valley Women in Transition (SWIT) helps women and children stay safe, and it is one organization of which most of us have probably heard.

Still, SWIT needs more volunteers, and so do many other service agencies in Lewisburg. Even the schools need help with general tutoring and with the special programs they run for at-risk students.

A lot of time is not necessary, nor is a lot of money. Sometimes, a few minutes of raking, a donation of a few dollars or even a letter to a sick individual is all that is needed. If you do have some extra time or money, there are so many different ways you'll be helping that you could not count them all. The point is, though, that each of us has to think, act and help. Sure, that donation to the United Way is going to help someone, but so would a little bit of volunteerism right here in our college town.

OPINIONS

Regulation at the federal level too burdensome

By Brian J. Walsh
Bucknellian Staff Columnist

Red tape... bureaucracy... the money pit. Sound familiar yet? Of course it does, because they are just a few of many such words or phrases that the majority of Americans have come to associate with the federal government.

Two hundred years ago, James Madison warned the people about the danger of an over-centralized, over-expensive government. If we aren't careful, he said, our democracy would turn into an oligarchy run by politicians in Washington. Furthermore, it was Thomas Jefferson who reminded us that a "wise" and "good" government "shall not take from the mouth of labor the bread it has earned." With recent polls showing that almost 75 percent of Americans do not believe the federal government knows what it's doing, why then do we continue to abdicate local responsibilities in favor of Washington micro-management.

While the answer is complex one, involving not just political questions and problems but sociological and philosophical ones as well, a primary reason is that while Americans can react towards their tangible dealings with the government, such as the payment of taxes, the majority are unaware of the thousands of burdensome regulations that are passed daily by a countless number of federal agencies. While often imposed on businesses and local governments, the costs of these regulations are invariably passed onto the average American in the form of reduced quality or availability of products and services, higher prices or even worse, higher taxes.

Conservative estimates indicate that the cost of complying with federal regulations was at least $668 billion in 1995 and will increase to $721 billion by 2000, thereby costing each household more than $6,000. Combined with government taxation and deficit spending, Americans for Tax Reform estimate that the average American will have to work full-time until July 9 to pay these costs.

> ***Unlike what many in the media would have you believe, Republicans are not against clean air or people with disabilities.***

To be sure, there are many regulations that are needed and therefore justified for the existence of a civil society. For example, the seat belt requirement for car passengers has not only saved lives but has also stemmed the enormous health-care costs associated with accidents. Using such a familiar example, however, highlights what is so often lacking in most governmental decisions, and that is the oft-forgotten concept of common sense.

In Anchorage, Alaska, a city of 240,000, the local government obtained a waiver from the Environmental Protection Agency so that they would not have to build a secondary treatment plant which would cost them as much as $150 million or three-fourths of their entire annual budget. In order to receive this waiver the city had to follow EPA regulations, of which one stated that they must treat a certain percentage of the organic material in the waste water. The problem faced by Anchorage, however, was that due to constant snow runoff, their water was too clean to meet this percentage. Knowing the potential amount of red-tape and litigation that might be faced in attempting to explain this to the EPA, the city came up with another solution in order to keep their waiver. They had fish companies dump fish guts into the water to pollute it, thereby allowing the city to clean up the water and enabling them to keep their waiver.

This is not a singular or unique example. As a result of high-sounding bills such as the Clean Air Act and the Americans for Disabilities Act, businesses and municipalities are being forced through unfunded mandates to pay large debts and incur unreasonable costs. In Rockland County, N.Y., ADA compliance is estimated in the millions of dollars as it dictates such minute details as how high a light switch must be from the ground in a public building. Failure to follow the commands of "Mother Washington" results in enormous fines in some instances and complete federal oversight in others.

Unlike what many in the media would have you believe, Republicans are not against clean air or people with disabilities, for it is actually just the opposite. What is so often misconstrued as pompous elitism is actually the support of common sense and responsible government. Who is more attuned to the needs of the handicapped in Rockland County? The county executive or the Washington legislator who is looking for a lift in the polls?

Effective regulatory reform means smart regulation. By ensuring that regulators sensibly and consistently evaluate risks, while considering the benefits and costs of their actions, we can do a better job protecting the environment and public health and safety while spending less.

Penn State correct to deny charter to hate group

Anti-homosexual group at State College undermines diversity by preaching intolerance

By Brian Yung-Pau Chang

Coming to college is a challenge. Academically, it signals a departure from the high school days of rote memorization to something more substantial. That substantiality lies not only in the ability to comprehend and absorb new information, but also in the ability to keep an open mind about ideas and beliefs foreign to one's own. The move by several students at Penn State to establish the STudents Reinforcing Adherence in General Heterosexual Tradition (STRAIGHT) organization undermines the purpose of keeping an open mind.

The organization legitimizes its existence by masking itself behind the ideal that all people should have the right to say whatever they wish, even if it is without regard to the fact that what they might be saying may be promoting ignorance within its community. While it is important to ensure that no voice is ignored, one must realize that particular voices which are threatening to destroy attempts to understand others who choose to live alternative lifestyles must be scrutinized.

One of the interesting aspects of this organization is the fact that it expresses its disagreement with the lifestyle in a "nonviolent" manner. When have anti-gay movements in this country been "nonviolent"? Have all of the gay bashing incidents on television escaped our memory so quickly? In an already conservative environment like State College, wouldn't the existence of STRAIGHT fuel even more opposition to such a lifestyle? Would it be unreasonable to assume that tensions would arise erupting into violence between both parties should such a group exist?

One may make the argument that if one organization is allowed to form on campus, then surely others should have the right as well. Think about the groups on campus. The multicultural groups on campus seek to diversify the campus. Religious organizations want to promote peace and understanding. Environmental and human rights groups seek to eliminate problems affecting all of us on this planet. Could STRAIGHT be added to this list? Surely it is an organization with goals. However, its purpose is not to promote, educate or build up any sort of positive environment, but rather to bring down or destroy an already oppressed group of individuals.

Should STRAIGHT be allowed to exist in the future, groups like the Ku Klux Klan should be allowed to function on campuses too. Clearly they have an agenda and a mission, but it is has been shown that they are intent on destroying races merely to promote the "superiority" of their own. One can say that it is unfair that these individuals do not have the right to form to promote their values. But what are those values? They are values of intolerance, ignorance and hate. And would it be safe to assume that these individuals would also be "nonviolent"? Again, history has pointed to the fact that tensions will lead to violence because of this. Instead of building something up, their main intent is to tear something down. There is a simple reason why the Undergraduate Student Government Supreme Court at Penn State decided this group will not exist: they do not want to destroy people who have different preferences, be it ideological, spiritual or sexual.

For those who believe people are born gay, wouldn't this be discrimination against a group of people, just like any race of individuals? Why stop at race? Since homosexuality appears to be an ideological battle, why aren't there organizations on college campuses that fight against certain religions like Christianity and Islam? Certainly those groups have a right to exist, should STRAIGHT exist.

Ultimately, the approval for such an organization to exist promotes the elimination of respect and understanding between others who have different beliefs. By promoting organizations that go against this creed of respect and understanding, one is not allowing one's mind to remain open. While one should applaud the decision made by the Undergraduate Student Government Supreme Court to ban the existence of this organization, one must realize that there has not been a violation of any principle of diversity. Within diversity, there is no desire to shun or tear down groups that are not similar. There is, however, a mission to see that discrimination, ignorance and hate will not be tolerated. Individuals who live different lifestyles should not be further hindered or repressed by a discriminatory organization like STRAIGHT when it is clear that they are already a repressed minority in need of respect and understanding.

Campaign finance reform in desperate need of serious Congressional attention

A recent Clinton memo was published in the current issue of *Newsweek*. Clinton had been asked to consider three different approaches to "energize" fund raising activities. He replied, "Yes, pursue all three and promptly. And get other names at 100,000 [dollars] or more, 50,000 [dollars] or more... [get] ready to start overnights right away. Give me the top 10 [contributors] list back, along with the 100, 50,000."

Campaign finance reform, a program that due to its populist appeal (term limits would apply here as well) will arouse support within the public. Opinion polls show that these two reforms, along with environmental protection, enjoy the highest favorability ratings among voters. So, it is indicative of the issue's poignant character that recent reports of the White House "renting" overnight visits in the Lincoln Bedroom to big campaign contributors have aroused so much discontent.

However, the public should not err in believing that such incidents of abuse stop at the White House, nor should the President be held more at fault than past Chief Executives. The practice of fund raising has been abused at all levels of government, although especially at the federal level. Reform can only be initiated through the U.S. Congress, but it has met considerable resistance.

And why shouldn't it? Although some avenues of fundraising are tightly regulated, such as a ceiling for donations, the real problem is what is quite legal—"soft money." This gaping loophole sets no limits on donations, as long as the money is "destined" to a political party, not a specific candidate. But we all know who receives a good part of the Democratic National Committee's coffers...

According to Fred Wertheimer, former head of Common Cause, a public interest group, more money (much of it "soft money") coursed through Washington D.C. than in the infamous Watergate year of 1972, even after adjusting for inflation. Don't believe it? Listen to Senate Majority Leader Trent Lott addressing a group of political contributors in Palm Beach, Fla. recently; $100,000 contributions are "the American way." Yes, the crimes run deep.

To understand that shady political fund raising is endemic and a result of institutional pressures (such as the astronomical costs of campaigning, advertising, etc.—campaigns which usually favor the wealthiest of political candidates) is to realize its solution: the closing of the "soft money" loophole and a cap on political action committee's (lobbying groups) donations. The McCain-Feingold bill currently debated in the Senate proposed just that. While not overly ambitious in scope, since slowing the influx of money and its concomitant influence is not especially difficult to legislate, the bill's intent stabs right into the heart of the political establishment in Washington. After all, the loss of benefits would be enormous. What politicians out there wouldn't want to travel in a catered private jet provided by some of their most loyal (and wealthy) supporters, such as former Senator Robert Dole's frequent-flyer plan with agricultural giant Archer Daniels Midland?

Republican Senator John McCain and Democratic Senator Russell Feingold's bill takes a noble step in the right direction. The Senate would be wise to support it, although putting the public's interests above those of wealthy contributors would be without recent precedent.

Thoughts...

and ramblings

EDITORIAL

Networked residence halls are not a privilege, but a necessity

Sending email and surfing the net from computer labs and modems only? Not anymore. Next year the residence halls will be fully wired so that students can have access to the internet from their rooms without the use of a modem.

Add it all up, and what do you get? A loss of $130, if students want to take advantage of this technological feat.

The University should be commended for this upcoming improvement, even if it is late in arriving. In this computer age, Internet access is becoming more of a necessity. It is not uncommon for students to communicate with their professors through email, and campus announcements are often sent electronically. Not only is the Internet a technological advance, it is also an educational advance. The University has rightly seen that individual dorm room wiring is the way to go.

Having the dorm rooms wired is important because it will relieve some of the stress on computer lab equipment and will most likely make it easier for students to find an open computer during busy times, such as midterms and finals when many assignments come due.

However, it is unnecessary to charge students $65 per semester to connect to the internet. This $130 a year seems like an outrageous cost for a service that should be free. Students do not pay to have access to a phone line, and this is very much the phone line of the future. Internet access is no longer a privilege. It is a necessity.

In the near future, no one will think twice about the possibility of Internet access in residence halls; people will simply assume it is available. Even today, some new students arrive at Bucknell with this expectation, only to be disappointed. Granted, next year this expectation will be met, but only when students reach into their pockets and pay up.

In order to remain competitive, the University must install a network for the residence halls, a step they are finally taking. But by forcing students to pay, the University is actually providing a limited service. This restriction is a step in the wrong direction. Why hold back the wave of the future by charging students a fee they may not be able to or want to afford?

As an institution of higher education, it is the University's responsibility to provide students with the most up-to-date tools to maximize their educational experience. Without a fee. Let's make this three steps forward, without a step back.

LETTERS

Alleged abuse at parties refuted by fraternity president

To The Editor:

I have never written a response to anything that I have ever seen in the *Bucknellian* in all of my three and a half years here at Bucknell. However, in the Feb. 13 edition I noticed a statement that was so ignorant and spiteful, I feel that it necessitated a response. An article entitled "Other campus issues exist besides Tent Party," by Kyle Holloman and Gillian Kirstel, the following statement was made:

"Our class is willing to speak out in protest concerning our right to drink, yet every day we passively accept atrocities that occur on our own campus. We watch while women are drugged and raped at our Frat parties and we remain silent."

Of course, this is not the first time the Greeks have been attacked here at Bucknell for a multitude of reasons. But it is the first time that I have ever heard such an uninformed and mean-spirited comment. I refuse to allow these authors to accuse me, my fraternity and the majority of the fraternal system of this crime. I have never, nor will I ever sit passively by and allow such a sick individual to perpetuate such a crime. If I ever found out that a brother in my fraternity had participated in an act that violated a woman, that person would be immediately removed from our numbers and I would be the first to cooperate in the resulting criminal investigation. My morals, and those of the majority of fraternity men, would not allow such actions to take place within our midst.

To the authors: I am uncertain as to what your personal experience is with Greeks and fraternity parties in particular. However, I am quite sure that even if you have had a terrible experience similar to the one you are describing, by all means come forth and finger the guilty party. However, by ignorantly accusing the entire fraternal system of this disgusting crime you are only serving to perpetuate untrue, misleading and slanderous stereotypes.

I believe that ignorance is the root of all stereotypes. If you would ever like to alleviate yourself of this terrible affliction I have a few suggestions for your education process. If you have the desire to learn more about the moral values of my own fraternity and brotherhood, I would be more than happy to entertain your request. If you would like to ascertain the values of the Greek system here at Bucknell, I would encourage you to arrange an audience with Dean Roy Baker. If you would like to learn more about the actual statistics and facts of the escalating violence against women on this campus, meet with Dean Joyce Bylander. If you question the way that Kappa Sigma has treated women in the past, please call our alumni advisor, Dr. Bill Lenker, and he will be more than happy to instruct you in the facts. I am confident that the information you would gain at these meetings will move you one step closer to an accurate understanding of the slanderous nature of your accusation.

I have refused to remain silent on this issue and I would encourage my fellow Greeks to stand up and respond to any and all false accusations made against the system. I would also encourage any other person who has a grudge against the system to educate him or herself before denouncing the entire system. I firmly believe that if we can eradicate the ignorance here at Bucknell on both sides of the issue, the benefits reaped will be immense. Someday I hope that the Greeks, administration, faculty and independent student body will all fully understand and support each other's needs, cultures and desires. Before this point can be reached, all groups on campus must take the initiative to educate themselves. Without everyone moving toward this goal of common understanding, we as a community will only be as intelligent as our most ignorant member.

Alcohol ban at Tent Party must be kept in perspective

To The Editor:

I think we're missing the point. While attending the Forum in which President Adams addressed the criticisms that abound from his decision to ban alcohol from Tent Party, there seemed to be an inability of the group to put things into perspective. Do I believe that this was a bad decision? Yes. I also believe that the inconsistency and hypocrisy of the band-aid approach was obvious to President Adams as well as all in attendance. The decision seems largely to be a "makeup call" for the mismanaged Gala fiasco at the expense of a much different Tent Party. However, the word "tradition" continually arose as a rallying cry for a senior class that feels slighted. But isn't Tent Party itself the tradition? In saying this, I do not agree with the belief that social events such as these are as enjoyable without adult beverages. I also do not agree with the implication put forth by the student who asked "Why is alcohol integral to Tent Party?" The implication is that this individual is able to have a good time at a social events without alcohol whereas the rest of us sinners are too weak to expose our sober personalities. I am not afraid to answer this "holier than thou" attitude by saying that I do enjoy the effects of a reasonable amount of alcohol at such functions.

However, I believe that the question should have been posed, "By a show of hands, how many of you have never attended Tent Party?" I would expect that the majority (including President Adams) would have had to raise their hands. I did attend Tent Party last year as a 21 year- old junior, and I must admit that the degree to which alcohol was a part of that event was minimal. I knew people who would wait in a long and slow moving line to get a cup of watered-down beer, only to go immediately back to the end of the line to wait again. Even these people had a difficult time "tagging on a buzz," so to speak. Thus, what is the "tradition" that everyone is ranting and raving about? My understanding of a tradition is something that is near and dear to a certain group and is both *understood* and longed for by that group. But I argue that we are fighting for a tradition that is envisioned differently than it takes place in reality.

Finally, I must admit that I find it hard to feel as though I've some how been victimized by this university. I don't mean to take on an "eat your green beans because there are people starving in China" attitude, but look at the relative position of Bucknell grads in the world. The redundant whining of "but, I've worked so hard these last four years" needs serious reconsideration. We work hard here because it's in our own interests to do so. It's not as if we've been altruistically building sanitation systems and hospitals for the world's poor. Sometimes I think we need to take a step back and see our problems in a wider perspective.

President Adams corrects information on Idleman and "dunk tank"

To The Editor:

A recent letter in *The Bucknellian* incorrectly noted that Lee Idleman has resigned from the Board of Trustees. Mr. Idleman remains a very active and important member of the Board, and is the Chair of the Investment Committee. In addition, I wish to state clearly that I have no intention of sitting in a "dunk tank" at any time in the near future. This remark was made in a humorous way during a recent interview on WVBU. I regret that it was taken seriously. Thank You.

Bucknell students lacking in volunteer activity

By Nora Daniels
Bucknellian Staff Columnist

I recently heard a man say, "Well, I gave to the United Way, so my good deed is done." This man holds a position that demands respect, and until I overheard this statement, I respected him not just professionally, but also as a person.

While giving to the United Way or another organization is an act of community service, there is more to giving back than that sort of automatic activity. When did that man last stop to see who right here in Lewisburg needs help? When did he last see all the sorts of people right here who are in desperate straits?

Oh, I understand perfectly how he and all others like him could drive down Market Street, see the speciality stores that are supported by the local community and decide that no one here needs anything he can give. So he sends his donation in the mail and feels warm knowing that someone, somewhere will be helped by it.

I did not know how many people in Lewisburg need even the most basic necessities until I started working with BISON Volunteers. Did you know that there are a large variety of local organizations that help area residents with everything from providing winter coats to spring cleaning? Susquehanna Valley Women in Transition (SWIT) helps women and children stay safe, and it is one organization of which most of us have probably heard.

Still, SWIT needs more volunteers, and so do many other service agencies in Lewisburg. Even the schools need help with general tutoring and with the special programs they run for at-risk students.

A lot of time is not necessary, nor is a lot of money. Sometimes, a few minutes of raking, a donation of a few dollars or even a letter to a sick individual is all that is needed. If you do have some extra time or money, there are so many different ways you'll be helping that you could not count them all. The point is, though, that each of us has to think, act and help. Sure, that donation to the United Way is going to help someone, but so would a little bit of volunteerism right here in our college town.

OPINIONS

Regulation at the federal level too burdensome

By Brian J. Walsh
Bucknellian Staff Columnist

Red tape... bureaucracy... the money pit. Sound familiar yet? Of course it does, because they are just a few of many such words or phrases that the majority of Americans have come to associate with the federal government.

Two hundred years ago, James Madison warned the people about the danger of an over-centralized, over-expensive government. If we aren't careful, he said, our democracy would turn into an oligarchy run by politicians in Washington. Furthermore, it was Thomas Jefferson who reminded us that a "wise" and "good" government "shall not take from the mouth of labor the bread it has earned." With recent polls showing that almost 75 percent of Americans do not believe the federal government knows what it's doing, why then do we continue to abdicate local responsibilities in favor of Washington micro-management.

While the answer is complex one, involving not just political questions and problems but sociological and philosophical ones as well, a primary reason is that while Americans can react towards their tangible dealings with the government, such as the payment of taxes, the majority are unaware of the thousands of burdensome regulations that are passed daily by a countless number of federal agencies. While often imposed on businesses and local governments, the costs of these regulations are invariably passed onto the average American in the form of reduced quality or availability of products and services, higher prices or even worse, higher taxes.

Conservative estimates indicate that the cost of complying with federal regulations was at least $668 billion in 1995 and will increase to $721 billion by 2000, thereby costing each household more than $6,000. Combined with government taxation and deficit spending, Americans for Tax Reform estimate that the average American will have to work full-time until July 9 to pay these costs.

> ***Unlike what many in the media would have you believe, Republicans are not against clean air or people with disabilities.***

To be sure, there are many regulations that are needed and therefore justified for the existence of a civil society. For example, the seat belt requirement for car passengers has not only saved lives but has also stemmed the enormous health-care costs associated with accidents. Using such a familiar example, however, highlights what is so often lacking in most governmental decisions, and that is the oft-forgotten concept of common sense.

In Anchorage, Alaska, a city of 240,000, the local government obtained a waiver from the Environmental Protection Agency so that they would not have to build a secondary treatment plant which would cost them as much as $150 million or three-fourths of their entire annual budget. In order to receive this waiver the city had to follow EPA regulations, of which one stated that they must treat a certain percentage of the organic material in the waste water. The problem faced by Anchorage, however, was that due to constant snow runoff, their water was too clean to meet this percentage. Knowing the potential amount of red-tape and litigation that might be faced in attempting to explain this to the EPA, the city came up with another solution in order to keep their waiver. They had fish companies dump fish guts into the water to pollute it, thereby allowing the city to clean up the water and enabling them to keep their waiver.

This is not a singular or unique example. As a result of high-sounding bills such as the Clean Air Act and the Americans for Disabilities Act, businesses and municipalities are being forced through unfunded mandates to pay large debts and incur unreasonable costs. In Rockland County, N.Y., ADA compliance is estimated in the millions of dollars as it dictates such minute details as how high a light switch must be from the ground in a public building. Failure to follow the commands of "Mother Washington" results in enormous fines in some instances and complete federal oversight in others.

Unlike what many in the media would have you believe, Republicans are not against clean air or people with disabilities, for it is actually just the opposite. What is so often misconstrued as pompous elitism is actually the support of common sense and responsible government. Who is more attuned to the needs of the handicapped in Rockland County? The county executive or the Washington legislator who is looking for a lift in the polls?

Effective regulatory reform means smart regulation. By ensuring that regulators sensibly and consistently evaluate risks, while considering the benefits and costs of their actions, we can do a better job protecting the environment and public health and safety while spending less.

Penn State correct to deny charter to hate group

Anti-homosexual group at State College undermines diversity by preaching intolerance

By Brian Yung-Pau Chang

Coming to college is a challenge. Academically, it signals a departure from the high school days of rote memorization to something more substantial. That substantiality lies not only in the ability to comprehend and absorb new information, but also in the ability to keep an open mind about ideas and beliefs foreign to one's own. The move by several students at Penn State to establish the STudents Reinforcing Adherence in General Heterosexual Tradition (STRAIGHT) organization undermines the purpose of keeping an open mind.

The organization legitimizes its existence by masking itself behind the ideal that all people should have the right to say whatever they wish, even if it is without regard to the fact that what they might be saying may be promoting ignorance within its community. While it is important to ensure that no voice is ignored, one must realize that particular voices which are threatening to destroy attempts to understand others who choose to live alternative lifestyles must be scrutinized.

One of the interesting aspects of this organization is the fact that it expresses its disagreement with the lifestyle in a "nonviolent" manner. When have anti-gay movements in this country been "nonviolent"? Have all of the gay bashing incidents on television escaped our memory so quickly? In an already conservative environment like State College, wouldn't the existence of STRAIGHT fuel even more opposition to such a lifestyle? Would it be unreasonable to assume that tensions would arise erupting into violence between both parties should such a group exist?

One may make the argument that if one organization is allowed to form on campus, then surely others should have the right as well. Think about the groups on campus. The multicultural groups on campus seek to diversify the campus. Religious organizations want to promote peace and understanding. Environmental and human rights groups seek to eliminate problems affecting all of us on this planet. Could STRAIGHT be added to this list? Surely it is an organization with goals. However, its purpose is not to promote, educate or build up any sort of positive environment, but rather to bring down or destroy an already oppressed group of individuals.

Should STRAIGHT be allowed to exist in the future, groups like the Ku Klux Klan should be allowed to function on campuses too. Clearly they have an agenda and a mission, but it is has been shown that they are intent on destroying races merely to promote the "superiority" of their own. One can say that it is unfair that these individuals do not have the right to form to promote their values. But what are those values? They are values of intolerance, ignorance and hate. And would it be safe to assume that these individuals would also be "nonviolent"? Again, history has pointed to the fact that tensions will lead to violence because of this. Instead of building something up, their main intent is to tear something down. There is a simple reason why the Undergraduate Student Government Supreme Court at Penn State decided this group will not exist: they do not want to destroy people who have different preferences, be it ideological, spiritual or sexual.

For those who believe people are born gay, wouldn't this be discrimination against a group of people, just like any race of individuals? Why stop at race? Since homosexuality appears to be an ideological battle, why aren't there organizations on college campuses that fight against certain religions like Christianity and Islam? Certainly those groups have a right to exist, should STRAIGHT exist.

Ultimately, the approval for such an organization to exist promotes the elimination of respect and understanding between others who have different beliefs. By promoting organizations that go against this creed of respect and understanding, one is not allowing one's mind to remain open. While one should applaud the decision made by the Undergraduate Student Government Supreme Court to ban the existence of this organization, one must realize that there has not been a violation of any principle of diversity. Within diversity, there is no desire to shun or tear down groups that are not similar. There is, however, a mission to see that discrimination, ignorance and hate will not be tolerated. Individuals who live different lifestyles should not be further hindered or repressed by a discriminatory organization like STRAIGHT when it is clear that they are already a repressed minority in need of respect and understanding.

Campaign finance reform in desperate need of serious Congressional attention

Thoughts...

and ramblings

Todd R. Zeranski

By Todd R. Zeranski
Bucknellian Opinions Editor

A recent Clinton memo was published in the current issue of *Newsweek*. Clinton had been asked to consider three different approaches to "energize" fund raising activities. He replied, "Yes, pursue all three and promptly. And get other names at 100,000 [dollars] or more, 50,000 [dollars] or more... [get] ready to start overnights right away. Give me the top 10 [contributors] list back, along with the 100, 50,000."

Campaign finance reform, a program that due to its populist appeal (term limits would apply here as well) will arouse support within the public. Opinion polls show that these two reforms, along with environmental protection, enjoy the highest favorability ratings among voters. So, it is indicative of the issue's poignant character that recent reports of the White House "renting" overnight visits in the Lincoln Bedroom to big campaign contributors have aroused so much discontent.

However, the public should not err in believing that such incidents of abuse stop at the White House, nor should the President be held more at fault than past Chief Executives. The practice of fund raising has been abused at all levels of government, although especially at the federal level. Reform can only be initiated through the U.S. Congress, but it has met considerable resistance.

And why shouldn't it? Although some avenues of fundraising are tightly regulated, such as a ceiling for donations, the real problem is what is quite legal—"soft money." This gaping loophole sets no limits on donations, as long as the money is "destined" to a political party, not a specific candidate. But we all know who receives a good part of the Democratic National Committee's coffers...

According to Fred Wertheimer, former head of Common Cause, a public interest group, more money (much of it "soft money") coursed through Washington D.C. than in the infamous Watergate year of 1972, even after adjusting for inflation. Don't believe it? Listen to Senate Majority Leader Trent Lott addressing a group of political contributors in Palm Beach, Fla. recently; $100,000 contributions are "the American way." Yes, the crimes run deep.

To understand that shady political fund raising is endemic and a result of institutional pressures (such as the astronomical costs of campaigning, advertising, etc.—campaigns which usually favor the wealthiest of political candidates) is to realize its solution: the closing of the "soft money" loophole and a cap on political action committee's (lobbying groups) donations. The McCain-Feingold bill currently debated in the Senate proposed just that. While not overly ambitious in scope, since slowing the influx of money and its concomitant influence is not especially difficult to legislate, the bill's intent stabs right into the heart of the political establishment in Washington. After all, the loss of benefits would be enormous. What politicians out there wouldn't want to travel in a catered private jet provided by some of their most loyal (and wealthy) supporters, such as former Senator Robert Dole's frequent-flyer plan with agricultural giant Archer Daniels Midland?

Republican Senator John McCain and Democratic Senator Russell Feingold's bill takes a noble step in the right direction. The Senate would be wise to support it, although putting the public's interests above those of wealthy contributors would be without recent precedent.

ARTS & ENTERTAINMENT

Many strings tie Cassatt Quartet together

Professor Lois Svard joins the all female Quartet in a performance of music from Beethoven to contemporary American music

BY ERIN MCCALLISTER
Bucknellian Staff Writer

Like bars of music merging from viola and cello strings, The Cassatt String Quartet's connections with the University overlap. The quartet is a young ensemble comprised of four women which performs a diverse selection of music worldwide.

Associate Professor of Music Lois Svard will perform with the quartet. Throughout the United States and Europe, Svard has commissioned and premiered several piano works by American experimental composers. Her recent compact disc *With or Without Memory*, released by Lovely Music, contains some of these works. At the end of this month, she will perform at Merkin Hall in New York, but this Friday she will be on the Weis Center stage.

Svard's special interest is in American contemporary music, which precedes to a two-way tie between the Cassatt performance and the University.

One piece of the program is *String Quartet*, composed by American composer Conlon Nancarrow. He is also the subject of the book *The Music of Conlon Nancarrow* by Kyle Gann, visiting Assistant Professor of Music. Nancarrow's rhythmically complex music uses up to 12 different tempos and is primarily written for player piano, as it is too complex for individuals to play. *String Quartet*, an American-sounding piece mixed with blues, was written before his player piano music.

The other performance pieces are Beethoven's *String Quartet in B-flat Major* and Brahms' *Piano Quartet in F Minor*. Since 1997 is the 200th anniversary of Brahms' death, the piece holds special significance. This particular piece was originally written as a quintet for strings using two cellos. Since it was not well received as such, Brahms re-wrote it for strings and two pianos. Although the re-written version is still played, the version used in this performance involves one piano and a string quartet.

With its repertoire ranging from early Beethoven to German Romanticism to contemporary American music, the quartet attracts much attention. Svard believes that performers who play both standard and contemporary music have a fresher approach to music than those who play only standard music. "My feeling is that people who play recent music stop thinking of [older music] as museum pieces. When dealing with living composers, people view and make the music alive, and such performers can approach Beethoven and Brahms as also alive," she said.

Jennifer Leshnower, Muneko Otani, Kelley Mikkelsen and Michiko Oshima bring a variety of musical selections to the Weis Center stage on Friday. They are presently involved in

The performers of The Cassatt String Quartet who make such music come alive are violinist Muneko Otani, violinist Jennifer Leshnower, violist Michiko Oshima, and cellist Kelley Mikkelsen. In 1992, Mikkelsen was part of The Aurelian Trio that played at the University.

Each of the women in the quartet hold individual acclaim. Otani received her Bachelor of Music degree in both performance and education from the Toho Academy of Music in Japan, continued training at the New England Conservatory, performed as a soloist with the Tokyo Chamber Orchestra and the Norfolk Festival Orchestra, and is currently on the faculty of Columbia University.

Leshnower's Bachelor of Music degree is from the Shepherd School of Music at Rice University, and her Master of Music degree is from the Peabody Conservatory. A previous member of the Thouvernel String Quartet, she has coached with members of the Amadeus, Guarneri and Julliard Quartets.

Oshima's Bachelor of Music degree also came from the Toho Academy of Music in Japan. She studied at the Eastman School of Music receiving the Performer's Certificate, the school's top honor. She has performed with the Pacific Music Festival and NHK Radio in Japan.

Holding degrees from the Eastman School of Music and the University of Akron, Mikkelsen received first prize in the 1992 J. Edmunds Young Artist Competition. She was a recent prize winner in the Chicago Society International Cello Competition.

They are currently involved in New York City's May "Bang on a Can" Festival, a display of performances in which The Cassatt String Quartet participates every year.

The Cassatt concert begins at 8 p.m. on Friday in the Weis Center.

Tickets are $15 regular admission, $5 with university ID, and can be purchased at the Weis Center box office Tuesday through Friday rom 11:30 a.m.-5:30 p.m. or by calling 524-1000.

Collective group shares its talents and encourages writers

BY KATRYNA ANDRUSIK

English Professor Cynthia Hogue, the director of the Stadler Center for Poetry, first saw the "Dark Room Collective" in the *New Yorker*. Soon afterwards, while in Philadelphia, she heard one of the poets giving a reading. The author caught her interest and she learned that he and the Collective enjoyed visiting college campuses. Thanks to her, seven members of the Collective-Vera Beatty, Thomas Sayers Ellis, Nehassaiu deGannes, Major Jackson, Sharan Strange, Kevin Young and Natasha Trethewey are coming to share their original poems with the University. They range in age from about 20 years-old to mid 30s and each has been published in either a book or journal of poetry. Kevin Young spent time here in 1991 during the Bucknell Seminar for Younger Poets.

This group began in 1988 due to the efforts of three Cambridge students who felt that multicultural literature did not receive enough attention at their school and decided to host their own informal discussions and readings. Conversations revolved around the history of black poetry and its place in the present world, in relation to both artists and readers alike, while authors could also read their works and find a receptive audience. These gatherings quickly grew to include visual and vocal art and eventually the Collective emerged as a force which recognized and supported the works of artists of color.

Jackson says that when he first encountered this group in 1993, he was struck by how seriously they seemed to care about this vocation and the support offered to them by older members of the black literary community. Well known authors such as Alice Walker and David Bradlee have read with them, as has Michael Weaver, the current poet-in-residence at the University.

Today, the "Dark Room Collective" tries to visit universities, some of which have included Brown, Bowdoin and UPenn, in an attempt not only to reach diverse listeners, but also to share their talents and encourage other writers of color to do the same.

The Dark Room's presentation will be free and sponsored by the Multicultural Center, *Giving Voice*, and the Stadler Center for Poetry. The reading will begin at 2 p.m. on Sunday in Bucknell Hall and will be followed by an informal question and answer session and a reception. The members strongly encourage the audience to ask questions and meet them after their reading.

The critic's scoop's in: The Empire Strikes Back in full effect

BY CHRIS NICHOLS
Bucknellian Staff Columnist

The Empire Strikes Back (Special Edition) ★★★★★
Starring Mark Hamill, Harrison Ford, Carrie Fisher, Anthony Daniels, Billy Dee Williams
Directed by Irvin Kershner

Not to be totally biased because I am a huge Star Wars fan, but I think I could argue that this is the greatest film of all time. Of course one has to ask, why is it that I and so many other people are such huge fans of the Star Wars Trilogy? Probably because they are excellent movies. And this 17th anniversary release of the second film is definitely a movie you should not miss.

What's so amazing about this film is the way in which the main characters all take huge personal blows, yet remain focused and driven in their quests to defeat the Empire. At the beginning of *Empire*, things don't look bad until Darth Vader manages to uproot the rebel forces hiding on the ice planet Hoth. From there it's a constant run from the bad guys for Han Solo, Princess Leia, R2D2, and C3P0. Luke however, manages to make his own way to Degobah where he continues his Jedi training with Yoda, a Jedi master. These words may sound foreign to you if you're not accustomed to the Star Wars vernacular but I will assure you if you see the movies, they will become second nature.

The Special Edition of *Empire* doesn't contain as much new footage as the first one did, but it is all amazing and well-used. There are some scenes early on with the Wampa (ice creature) that are really neat. The old version is really lacking when you see what they did this time around. There are lots of scenery shots on the cloud city of Bespin that add a lot visually. In addition to this, there was a part toward the end that was unclear about where Vader was and how he got from one place to another. Those questions are dealt with in a way that does change the ending sequence without affecting it too much, and leaves the audience with a good sense of pace and anticipation about what is happening.

I applaud the initiative of George Lucas (starter of it all), Irvin Kershner (director), and Gary Kurtz (producer) for beating the odds in making a movie in which the bad guys win yet there is still hope. At the end of this film (don't read on if you haven't seen it), Han is frozen in carbonite (a sort of metal suspended animation chamber) and taken off to meet Jabba the Hutt who has had a bounty on Han's head. Luke has had his arm chopped off by Vader who had revealed a juicy piece of information that is almost soap opera-like in its nature. It's a cliffhanger in the most wonderful sense of the word. The audience is simultaneously concerned about the heroes and hopeful for them.

See this movie. If you've seen it before, see it again.

Celebrity hosts talk show as a part of Women's Week

Charles Perez to participate in the events that will address many issues of gender

BY RACHEL DOEBBER
Bucknellian Staff Writer

Co-Presidents Nina Dhawer '99 and Barbara Blatterman '97, treasurer Melissa Wockley '97, and members Tamara Zgonjanin '98, Amy Johnston '00, Sarah Singer '99 and Nicole Sprague '97 who make up the Committee On Women's Leadership (COWL) have worked together as a committee to design and schedule the many events for 5th Annual Women's Week which runs from Mar. 24 to Mar. 28.

The three main highlighted events include a lecture entitled "Between a Rock and a Hard Place," given by Janice Hamlet on the experiences of being an African American woman in America, a Bucknell Women's Talent Expose with performances by the Silhouettes, the Dance Team, the Dance Company and Vietnamese Dancers, and the talk show hosted by Charles Perez, "Bucknell-The Gender Issue."

Why a talk show?

"We wanted to present an event where Bucknell University [students] could talk about issues, not just listen," Wockley said. "A lot of things have been occurring on campus such as date rape and few students have expressed their opinions. We wanted a place where a lot of students could express their views," she added.

The guest panel includes two faculty members and five students selected by COWL on the basis of their personal views and interest on the topic of gender. In addition, two students whose names will be picked in a lottery drawing in the Langone Center Mall during Women's Week, will join the other seven members of the panel.

According to Dhawer, the issue of gender was picked as a topic as opposed to a narrower topic such as date-rape because "we wanted to broaden the topic to include women and men on campus where all ends of the spectrum could be represented. There are a lot of views that are controversial. One side is never heard and therefore never understood. [Through this event] all sides are brought together. We wanted to create an open forum that is as unbiased as possible where multiple views including those from minority students, Greeks, non-Greeks, liberals and conservatives could be expressed."

Filled with numerous activities, including brown bag lunches with female professors and faculty members, movies like *Thelma and Louise* and *Courage Under Fire*, and a talk show hosted by celebrity talk show host, Charles Perez, Women's Week promises to be packed with a variety of events.

Women's Week begins with the Janice Hamlet lecture on Monday, Mar. 24 at 7 p.m. in Vaughan Literature Auditorium which is followed by the Women's Talent Expose the following night at 7 p.m. in Vaughan Literature Aud. The week ends with the talk show hosted by Charles Perez on Thursday, Mar. 27 at 7 p.m. in Vaughan Literature Aud. which is, as Dhawer said, "a discussion to get to the bottom of things."

> *"A lot of things have been occurring on campus such as date rape and few students have expressed their opinions. We wanted a place where a lot of students could express their views."*
> *——Melissa Wockley*

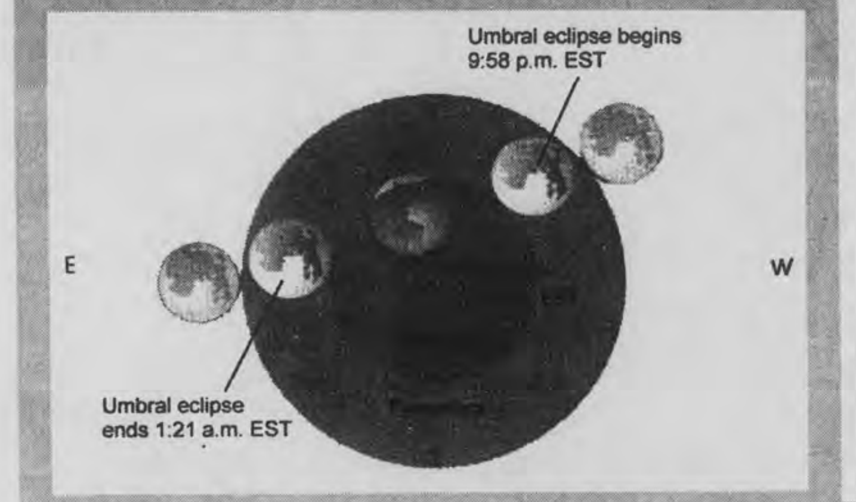
Astronomical sights for the month of March

Partial lunar eclipse

A partial lunar eclipse will occur on the night of March 23rd. This will occure because the entire moon will not be in the shadow of the Earth. The eastern edge of the moon enters into the central shadow of the Earth at 9:58 p.m., although it appears to us that it is the shadow that is moving across the face of the moon, slowly approaching its western edge. By mid-eclipse (11:39 p.m.), only the top eight percent of the moon remains visible; the other 92 percent is eclipsed. Expect to see a bright white "cap" on top of an otherwise red or orange colored moon. This reddish hue is due to the refraction and scattering of light as it passes through the atmosphere of the Earth: all of the sunrises and sunsets of the world are focused on the moon during an eclipse. Mid-eclipse is also the exact moment of this month's full moon.

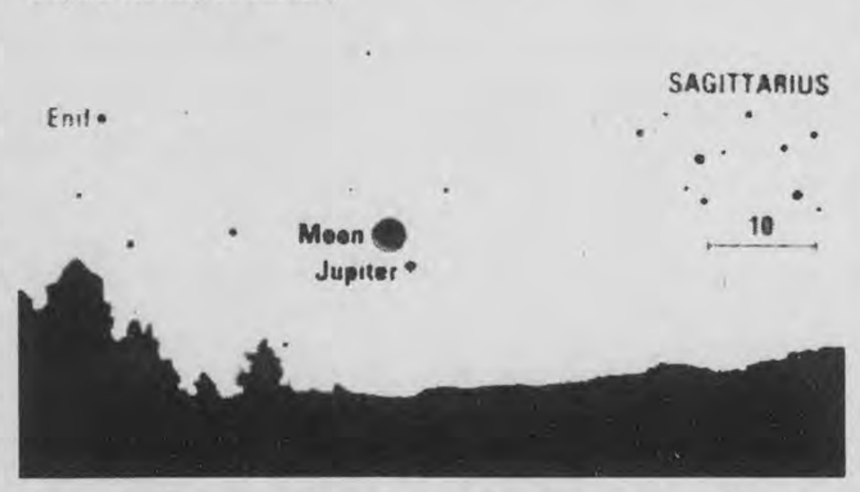
The moon, moving eastward through the Earth's shadow, will exit from the central shadow at 1:21 a.m. on the morning of March 24th. The shadow will uncover the last part of the far south-western edge of the moon at this time. The most visible part of the eclipse will be over, but the moon still remains in a part of the shadow of the Earth, finally exiting it at 2:38 a.m. Monday morning.



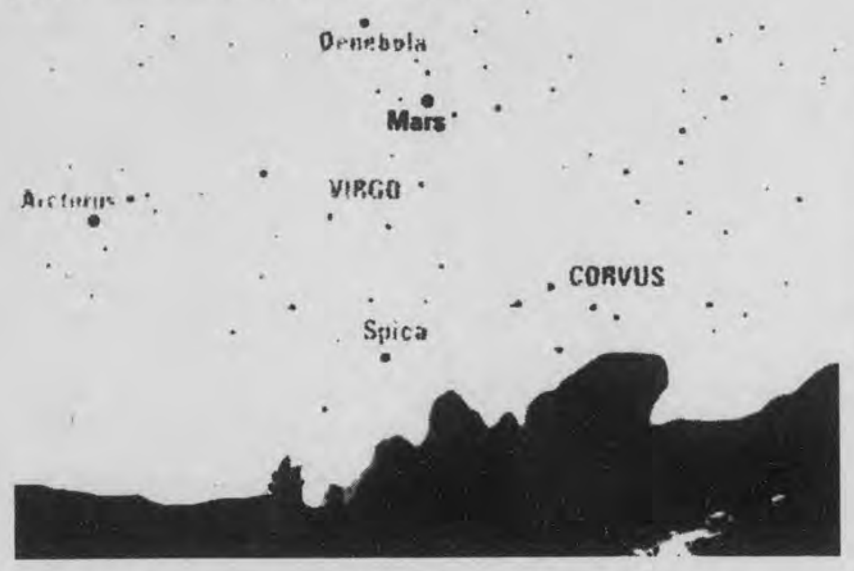
Umbral eclipse begins 9:58 p.m. EST
E
W
Umbral eclipse ends 1:21 a.m. EST

The moon enters the umbra, or Earth's central shadow, on the night of March 23rd and leaves the morning of March 24th.

Graphics courtesy of *Astronomy*



As the cresent moon sets in the pre-dawn hour, you can look for Jupiter in the south as the moon passes by.



Opposite the setting sun, Mars will rise above the horizon.

All information compiled by David Lien, assistant professor of physics

What is visible in March?

What to look for in March:

Lunar Phases:

Sun., March 9: New Moon
Sun., March16: First Quarter
Mon., March 24: Full Moon
Mon., March 31: Last Quarter

Planets:

Thurs., Mar. 6: In the pre-dawn sky, look for the waning crescent Moon to pass by shining Jupiter.

Mon., Mar. 10: Look for the thin, waxing crescent Moon in the west just after sunset next to the planet Saturn.

Mon., Mar. 17: Mars is exactly opposite to the Sun in the sky. It rises at sunset, and is almost as bright as Sirius, the brightest star in the night sky. Look for Mars to move toward the west with respect to the stars about 1/4 degree per day (about 1/2 the width of the full Moon).

Other visible objects

Sat., Mar. 22: Comet Hale-Bopp reaches its closest approach to the Earth, a mere 197 million km (1.13 times the distance from the Earth to the Sun).

Sun., Mar. 23: A partial lunar eclipse is visible from Lewisburg. 92 percent of the Moon's surface will be covered by the Earth's shadow. The main part of the eclipse will start at 9:58 p.m. EST and reach its maximum at 11:39 p.m. when it will look like a snow-capped ruddy red marble. The eclipse will end at 12:21 a.m.

University sponsors first MCM teams

Mathematical Contest in Modeling teams solved "real-world" problems in a weekend

BY JOHN VENARCHICK

At midnight on Friday, February 7, the 13th annual Mathematical Contest in Modeling began. Two teams of three students from the University were given a sealed envelope containing two mathematical problems; they were to solve one of the "real-world" problems during the weekend using their own ingenuity and library research. The solutions were mailed to the judges by 5 p.m. on Monday afternoon.

This year's teams were the first ever from the University to submit solutions for judging in MCM.

The University's first team, consisting of David Erwin '00, Argun Ulgen '00 and John Venarchick '00 was advised by David Farmer, assistant professor of mathematics. The team reported to Farmer at midnight on Friday for some last minute instructions as they picked up the envelope and broke contact with the outside world for the remainder of the weekend.

The first team chose the problem entitled "Mix Well for Fruitful Discussion." The problem dealt with arranging a series of meeting groups for the members of the board of directors from a large, fictitious company. The groups required that no two board members would see each other more than once during the course of the morning and afternoon meetings.

The University's other team, consisting of Michael Costello '00, Thomas Egan '00, and Bradley Morick '00, was advised by Sally Koutsoliotas, assistant professor of physics. Their problem, entitled "The Velociraptor Problem," investigated possible strategies used by the dinosaurs when hunting alone or in pairs. Koutsoliotas noted that "such simulations are the only way to study this behavior because, outside of the movies, it is not possible to observe living dinosaurs."

The MCM is sponsored by the Consortium on Mathematics and its Applications, a national organization which fosters undergraduate mathematics.

The MCM is designed to elicit advances in the problem-solving and writing skills of students in a team setting. Last year, over 393 teams entered the contest, representing 235 schools in nine countries.

The outstanding solutions from the contest will be published in October in a special issue of *The Undergraduate Mathematics and its Application Project Journal*. It is hoped that more students will be interested in future contests enabling the University to participate in the MCM each year.

Brain Teaser

Place four points on the x-axis and one point on the y-axis so that the distance between any pair of points is a whole number.

This week's brain teaser is complements of Greg Adams and David Farmer from the mathematics department.

ARTS & ENTERTAINMENT

Many strings tie Cassatt Quartet together

Professor Lois Svard joins the all female Quartet in a performance of music from Beethoven to contemporary American music

BY ERIN MCCALLISTER

Bucknellian Staff Writer

Like bars of music merging from viola and cello strings, The Cassatt String Quartet's connections with the University overlap. The quartet is a young ensemble comprised of four women which performs a diverse selection of music worldwide.

Associate Professor of Music Lois Svard will perform with the quartet. Throughout the United States and Europe, Svard has commissioned and premiered several piano works by American experimental composers. Her recent compact disc *With or Without Memory*, released by Lovely Music, contains some of these works. At the end of this month, she will perform at Merkin Hall in New York, but this Friday she will be on the Weis Center stage.

Svard's special interest is in American contemporary music, which precedes to a two-way tie between the Cassatt performance and the University.

One piece of the program is *String Quartet*, composed by American composer Conlon Nancarrow. He is also the subject of the book *The Music of Conlon Nancarrow* by Kyle Gann, visiting Assistant Professor of Music. Nancarrow's rhythmically complex music uses up to 12 different tempos and is primarily written for player piano, as it is too complex for individuals to play. *String Quartet*, an American-sounding piece mixed with blues, was written before his player piano music.

The other performance pieces are Beethoven's *String Quartet in B-flat Major* and Brahms' *Piano Quartet in F Minor*. Since 1997 is the 200th anniversary of Brahms' death, the piece holds special significance. This particular piece was originally written as a quintet for strings using two cellos. Since it was not well received as such, Brahms re-wrote it for strings and two pianos. Although the re-written version is still played, the version used in this performance involves one piano and a string quartet.

With its repertoire ranging from early Beethoven to German Romanticism to contemporary American music, the quartet attracts much attention. Svard believes that performers who play both standard and contemporary music have a fresher approach to music than those who play only standard music. "My feeling is that people who play recent music stop thinking of [older music] as museum pieces. When dealing with living composers, people view and make the music alive, and such performers can approach Beethoven and Brahms as also alive," she said.

Jennifer Leshnower, Muneko Otani, Kelley Mikkelsen and Michiko Oshima bring a variety of musical selections to the Weis Center stage on Friday. They are presently involved in

The performers of The Cassatt String Quartet who make such music come alive are violinist Muneko Otani, violinist Jennifer Leshnower, violist Michiko Oshima, and cellist Kelley Mikkelsen. In 1992, Mikkelsen was part of The Aurelian Trio that played at the University.

Each of the women in the quartet hold individual acclaim. Otani received her Bachelor of Music degree in both performance and education from the Toho Academy of Music in Japan, continued training at the New England Conservatory, performed as a soloist with the Tokyo Chamber Orchestra and the Norfolk Festival Orchestra, and is currently on the faculty of Columbia University.

Leshnower's Bachelor of Music degree is from the Shepherd School of Music at Rice University, and her Master of Music degree is from the Peabody Conservatory. A previous member of the Thouvernel String Quartet, she has coached with members of the Amadeus, Guarneri and Julliard Quartets.

Oshima's Bachelor of Music degree also came from the Toho Academy of Music in Japan. She studied at the Eastman School of Music receiving the Performer's Certificate, the school's top honor. She has performed with the Pacific Music Festival and NHK Radio in Japan.

Holding degrees from the Eastman School of Music and the University of Akron, Mikkelsen received first prize in the 1992 J. Edmunds Young Artist Competition. She was a recent prize winner in the Chicago Society International Cello Competition.

They are currently involved in New York City's May "Bang on a Can" Festival, a display of performances in which The Cassatt String Quartet participates every year.

The Cassatt concert begins at 8 p.m. on Friday in the Weis Center.

Tickets are $15 regular admission, $5 with university ID, and can be purchased at the Weis Center box office Tuesday through Friday rom 11:30 a.m.-5:30 p.m. or by calling 524-1000.

Collective group shares its talents and encourages writers

BY KATRYNA ANDRUSIK

English Professor Cynthia Hogue, the director of the Stadler Center for Poetry, first saw the "Dark Room Collective" in the *New Yorker*. Soon afterwards, while in Philadelphia, she heard one of the poets giving a reading. The author caught her interest and she learned that he and the Collective enjoyed visiting college campuses. Thanks to her, seven members of the Collective-Vera Beatty, Thomas Sayers Ellis, Nehassaiu deGannes, Major Jackson, Sharan Strange, Kevin Young and Natasha Trethewey are coming to share their original poems with the University. They range in age from about 20 years-old to mid 30s and each has been published in either a book or journal of poetry. Kevin Young spent time here in 1991 during the Bucknell Seminar for Younger Poets.

This group began in 1988 due to the efforts of three Cambridge students who felt that multicultural literature did not receive enough attention at their school and decided to host their own informal discussions and readings. Conversations revolved around the history of black poetry and its place in the present world, in relation to both artists and readers alike, while authors could also read their works and find a receptive audience. These gatherings quickly grew to include visual and vocal art and eventually the Collective emerged as a force which recognized and supported the works of artists of color.

Jackson says that when he first encountered this group in 1993, he was struck by how seriously they seemed to care about this vocation and the support offered to them by older members of the black literary community. Well known authors such as Alice Walker and David Bradlee have read with them, as has Michael Weaver, the current poet-in-residence at the University.

Today, the "Dark Room Collective" tries to visit universities, some of which have included Brown, Bowdoin and UPenn, in an attempt not only to reach diverse listeners, but also to share their talents and encourage other writers of color to do the same.

The Dark Room's presentation will be free and sponsored by the Multicultural Center, *Giving Voice*, and the Stadler Center for Poetry. The reading will begin at 2 p.m. on Sunday in Bucknell Hall and will be followed by an informal question and answer session and a reception. The members strongly encourage the audience to ask questions and meet them after their reading.

The critic's scoop's in: The Empire Strikes Back in full effect

BY CHRIS NICHOLS

Bucknellian Staff Columnist

The Empire Strikes Back (Special Edition) ★★★★★
Starring Mark Hamill, Harrison Ford, Carrie Fisher, Anthony Daniels, Billy Dee Williams
Directed by Irvin Kershner

Not to be totally biased because I am a huge Star Wars fan, but I think I could argue that this is the greatest film of all time. Of course one has to ask, why is it that I and so many other people are such huge fans of the Star Wars Trilogy? Probably because they are excellent movies. And this 17th anniversary release of the second film is definitely a movie you should not miss.

What's so amazing about this film is the way in which the main characters all take huge personal blows, yet remain focused and driven in their quests to defeat the Empire. At the beginning of *Empire*, things don't look bad until Darth Vader manages to uproot the rebel forces hiding on the ice planet Hoth. From there it's a constant run from the bad guys for Han Solo, Princess Leia, R2D2, and C3P0. Luke however, manages to make his own way to Degobah where he continues his Jedi training with Yoda, a Jedi master. These words may sound foreign to you if you're not accustomed to the Star Wars vernacular but I will assure you if you see the movies, they will become second nature.

The Special Edition of *Empire* doesn't contain as much new footage as the first one did, but it is all amazing and well-used. There are some scenes early on with the Wampa (ice creature) that are really neat. The old version is really lacking when you see what they did this time around. There are lots of scenery shots on the cloud city of Bespin that add a lot visually. In addition to this, there was a part toward the end that was unclear about where Vader was and how he got from one place to another. Those questions are dealt with in a way that does change the ending sequence without affecting it too much, and leaves the audience with a good sense of pace and anticipation about what is happening.

I applaud the initiative of George Lucas (starter of it all), Irvin Kershner (director), and Gary Kurtz (producer) for beating the odds in making a movie in which the bad guys win yet there is still hope. At the end of this film (don't read on if you haven't seen it), Han is frozen in carbonite (a sort of metal suspended animation chamber) and taken off to meet Jabba the Hutt who has had a bounty on Han's head. Luke has had his arm chopped off by Vader who had revealed a juicy piece of information that is almost soap opera-like in its nature. It's a cliffhanger in the most wonderful sense of the word. The audience is simultaneously concerned about the heroes and hopeful for them.

See this movie. If you've seen it before, see it again.

Celebrity hosts talk show as a part of Women's Week

Charles Perez to participate in the events that will address many issues of gender

BY RACHEL DOEBBER

Bucknellian Staff Writer

Co-Presidents Nina Dhawer '99 and Barbara Blatterman '97, treasurer Melissa Wockley '97, and members Tamara Zgonjanin '98, Amy Johnston '00, Sarah Singer '99 and Nicole Sprague '97 who make up the Committee On Women's Leadership (COWL) have worked together as a committee to design and schedule the many events for 5th Annual Women's Week which runs from Mar. 24 to Mar. 28.

The three main highlighted events include a lecture entitled "Between a Rock and a Hard Place," given by Janice Hamlet on the experiences of being an African American woman in America, a Bucknell Women's Talent Expose with performances by the Silhouettes, the Dance Team, the Dance Company and Vietnamese Dancers, and the talk show hosted by Charles Perez, "Bucknell-The Gender Issue."

Why a talk show?

"We wanted to present an event where Bucknell University [students] could talk about issues, not just listen," Wockley said. "A lot of things have been occurring on campus such as date rape and few students have expressed their opinions. We wanted a place where a lot of students could express their views," she added.

The guest panel includes two faculty members and five students selected by COWL on the basis of their personal views and interest on the topic of gender. In addition, two students whose names will be picked in a lottery drawing in the Langone Center Mall during Women's Week, will join the other seven members of the panel.

According to Dhawer, the issue of gender was picked as a topic as opposed to a narrower topic such as date-rape because "we wanted to broaden the topic to include women and men on campus where all ends of the spectrum could be represented. There are a lot of views that are controversial. One side is never heard and therefore never understood. [Through this event] all sides are brought together. We wanted to create an open forum that is as unbiased as possible where multiple views including those from minority students, Greeks, non-Greeks, liberals and conservatives could be expressed."

Filled with numerous activities, including brown bag lunches with female professors and faculty members, movies like *Thelma and Louise* and *Courage Under Fire*, and a talk show hosted by celebrity talk show host, Charles Perez, Women's Week promises to be packed with a variety of events.

Women's Week begins with the Janice Hamlet lecture on Monday, Mar. 24 at 7 p.m. in Vaughan Literature Auditorium which is followed by the Women's Talent Expose the following night at 7 p.m. in Vaughan Literature Aud. The week ends with the talk show hosted by Charles Perez on Thursday, Mar. 27 at 7 p.m. in Vaughan Literature Aud. which is, as Dhawer said, "a discussion to get to the bottom of things."

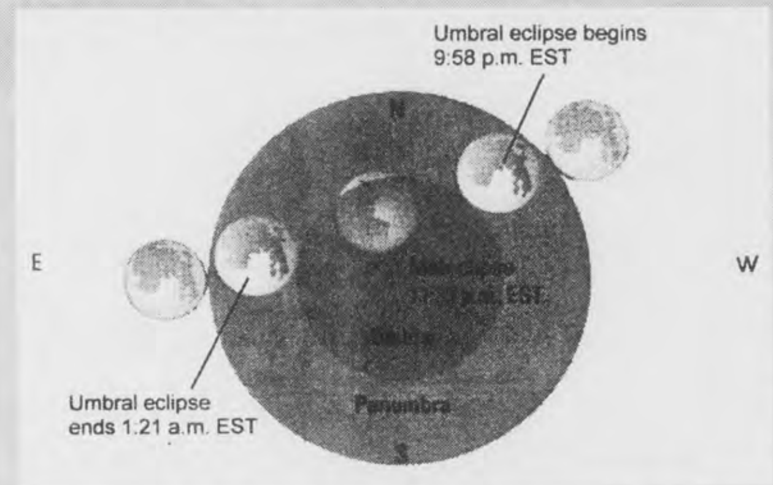
Astronomical sights for the month of March

Partial lunar eclipse

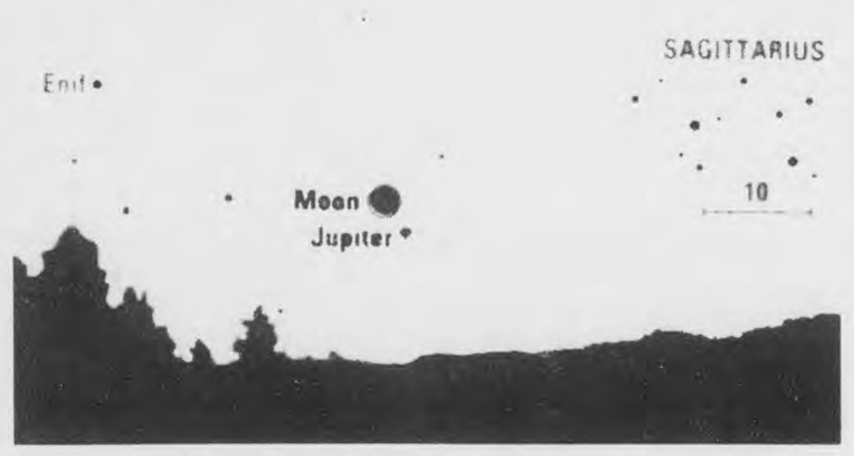
A partial lunar eclipse will occur on the night of March 23rd. This will occure because the entire moon will not be in the shadow of the Earth. The eastern edge of the moon enters into the central shadow of the Earth at 9:58 p.m., although it appears to us that it is the shadow that is moving across the face of the moon, slowly approaching its western edge. By mid-eclipse (11:39 p.m.), only the top eight percent of the moon remains visible; the other 92 percent is eclipsed. Expect to see a bright white "cap" on top of an otherwise red or orange colored moon. This reddish hue is due to the refraction and scattering of light as it passes through the atmosphere of the Earth: all of the sunrises and sunsets of the world are focused on the moon during an eclipse. Mid-eclipse is also the exact moment of this month's full moon.

The moon, moving eastward through the Earth's shadow, will exit from the central shadow at 1:21 a.m. on the morning of March 24th. The shadow will uncover the last part of the far south-western edge of the moon at this time. The most visible part of the eclipse will be over, but the moon still remains in a part of the shadow of the Earth, finally exiting it at 2:38 a.m. Monday morning.

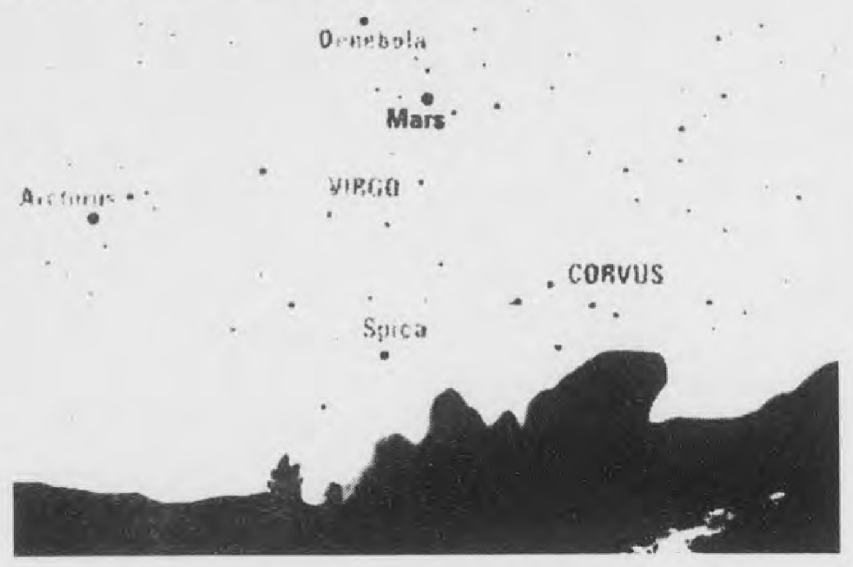


The moon enters the umbra, or Earth's central shadow, on the night of March 23rd and leaves the morning of March 24th.

Graphics courtesy of *Astronomy*



As the cresent moon sets in the pre-dawn hour, you can look for Jupiter in the south as the moon passes by.



Opposite the setting sun, Mars will rise above the horizon.

All information compiled by David Lien, assistant professor of physics

What is visible in March?

What to look for in March:

Lunar Phases:

Sun., March 9: New Moon
Sun., March16: First Quarter
Mon., March 24: Full Moon
Mon., March 31: Last Quarter

Planets:

Thurs., Mar. 6: In the pre-dawn sky, look for the waning crescent Moon to pass by shining Jupiter.

Mon., Mar. 10: Look for the thin, waxing crescent Moon in the west just after sunset next to the planet Saturn.

Mon., Mar. 17: Mars is exactly opposite to the Sun in the sky. It rises at sunset, and is almost as bright as Sirius, the brightest star in the night sky. Look for Mars to move toward the west with respect to the stars about 1/4 degree per day (about 1/2 the width of the full Moon).

Other visible objects

Sat., Mar. 22: Comet Hale-Bopp reaches its closest approach to the Earth, a mere 197 million km (1.13 times the distance from the Earth to the Sun).

Sun., Mar. 23: A partial lunar eclipse is visible from Lewisburg. 92 percent of the Moon's surface will be covered by the Earth's shadow. The main part of the eclipse will start at 9:58 p.m. EST and reach its maximum at 11:39 p.m. when it will look like a snow-capped ruddy red marble. The eclipse will end at 12:21 a.m.

University sponsors first MCM teams

Mathematical Contest in Modeling teams solved "real-world" problems in a weekend

BY JOHN VENARCHICK

At midnight on Friday, February 7, the 13th annual Mathematical Contest in Modeling began. Two teams of three students from the University were given a sealed envelope containing two mathematical problems; they were to solve one of the "real-world" problems during the weekend using their own ingenuity and library research. The solutions were mailed to the judges by 5 p.m. on Monday afternoon.

This year's teams were the first ever from the University to submit solutions for judging in MCM.

The University's first team, consisting of David Erwin '00, Argun Ulgen '00 and John Venarchick '00 was advised by David Farmer, assistant professor of mathematics. The team reported to Farmer at midnight on Friday for some last minute instructions as they picked up the envelope and broke contact with the outside world for the remainder of the weekend.

The first team chose the problem entitled "Mix Well for Fruitful Discussion." The problem dealt with arranging a series of meeting groups for the members of the board of directors from a large, fictitious company. The groups required that no two board members would see each other more than once during the course of the morning and afternoon meetings.

The University's other team, consisting of Michael Costello '00, Thomas Egan '00, and Bradley Morick '00, was advised by Sally Koutsoliotas, assistant professor of physics. Their problem, entitled "The Velociraptor Problem," investigated possible strategies used by the dinosaurs when hunting alone or in pairs. Koutsoliotas noted that "such simulations are the only way to study this behavior because, outside of the movies, it is not possible to observe living dinosaurs."

The MCM is sponsored by the Consortium on Mathematics and its Applications, a national organization which fosters undergraduate mathematics.

The MCM is designed to elicit advances in the problem-solving and writing skills of students in a team setting. Last year, over 393 teams entered the contest, representing 235 schools in nine countries.

The outstanding solutions from the contest will be published in October in a special issue of *The Undergraduate Mathematics and its Application Project Journal*. It is hoped that more students will be interested in future contests enabling the University to participate in the MCM each year.

Montandon: home of rare sand dunes

By Tim Parrott
Bucknellian Staff Writer

Within only five miles of the University, rare Pleistocene geological features otherwise known as sand dunes, unique to this area of Pennsylvania, can be observed. These rounded ridges of drifted sand are considered to be a geological phenomenon.

The dunes, which are the largest in Pennsylvania, occupy the area South of Route 45 on the east side of the Susquehanna River along with their associated wetlands. In reality, the entire town of Montandon is covered by sand, sometimes by over 20 feet of the blown and drifted grains.

If it is true that the town of Montandon and the surrounding area are covered with sand dunes and undrained depressions, how did they arise in an area known for having the normal foundation of bedrock covered with soil?

The dunes present in the Montandon area are parabolic dunes which, as with all dunes of this type, bow in the downwind direction from the prevailing wind which caused them to form. Accompanying these dunes are longitudinal dunes which form parallel to the direction of the wind which caused them to originate.

Because of the positioning of the parabolic and longitudinal dunes in the Montandon area, it can be observed that they must have been formed from a prevailing wind coming from 75 degrees west of north.

According to geologists, sand accumulated in the area of Montandon as a result of the deglaciation during the Pleistocene Period thousands of years ago. During the Pleistocene Period, the Susquehanna River was a braided river occupying both part of its present area and also areas to the east, closer to Montandon.

During this period, a glacier north of Montandon and Lewisburg, near the present Williamsport area, began to melt and outwash filled with sediments began moving down the valley through the existing braided Susquehanna River. With the sediments in the outwash, there came a huge source of water.

As this outwash moved along the valley, the braided Susquehanna became the large, fairly linear river that it is today, leaving much of the sediment from the outwash in the area which the braids of the river once occupied. The sediment contained small chunks of limestone, sand, loess and negligible amounts of other sedimentary material.

As the prevailing wind blew across the sedimentary particles in the area west of Montandon, the debris was differentially distributed across the eastern area according to its weight and size.

Today, just east of the Susquehanna River, deposits of large rocks and heterogeneous soil exist. Just beyond the deposits are the sand dunes with almost total homogeneity, followed by an area with a light covering of loess.

Loess, a sedimentary particle finer than sand, was blown further than the sand due to its weight and consistency, while the sand was blown further than the limestone for the same reason. As the sand was blown into the present Montandon region, it was blown into the longitudinal and parabolic dunes.

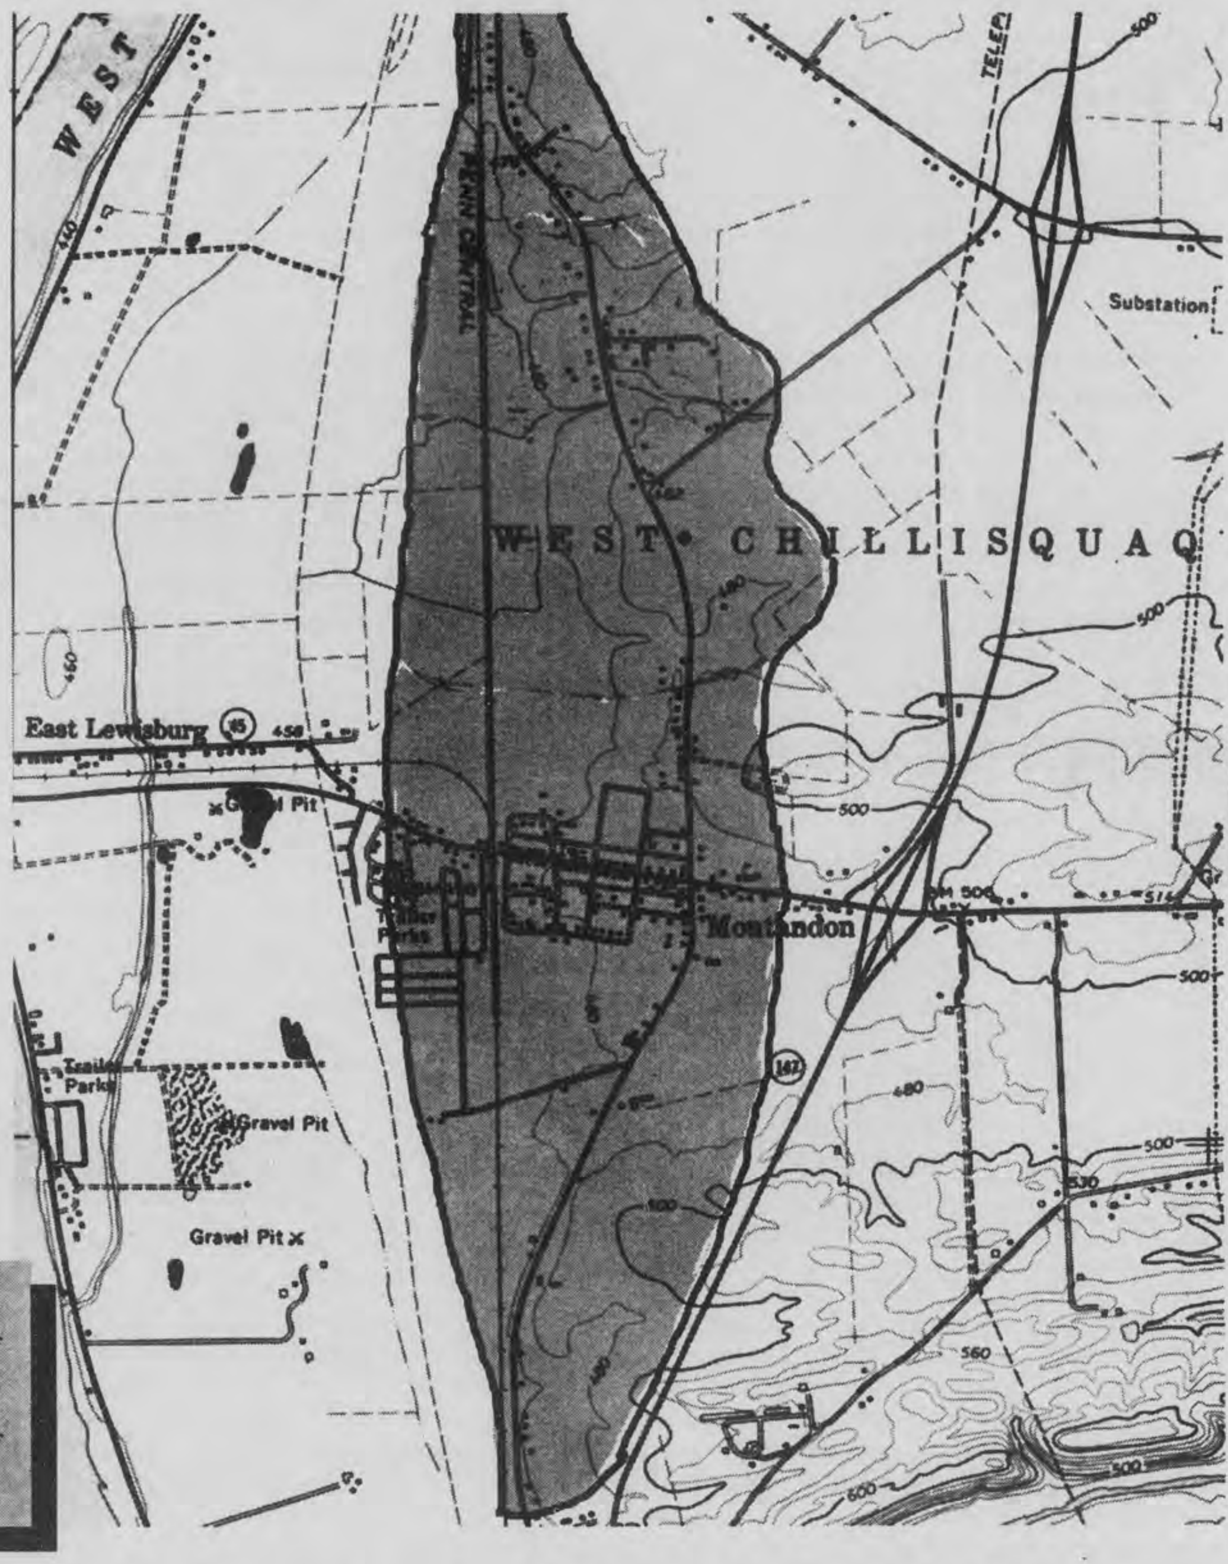
The Montandon area has been studied for many years, and the legitimacy of the presence of dunes has been proven time and time again. Not only has the entire area developed its general topographical shape from the blown sand, but the texture of the ground is that of packed sand.

Auguring has also been done, in which large drifts have been drilled in order to find the nature and makeup of that drift. In all instances, the drifts have been found to consist of at least 20 feet of pure sand.

The Montandon dunes, although still present, are difficult to see due to the development which has occurred in the Montandon area since their original formation. The high drifts can be seen in areas where the dunes were cut to allow for the building of a road and in areas which have not yet been developed.

Regardless of their visibility at the present, these dunes are a unique geological phenomena. They are the only known set of dunes along the Susquehanna River. As a result, both these dunes and their associated wetlands and undrained depressions are looked upon as natural wonders.

The map to the right displays the area surrounding the town of Montandon where the sand dunes were created thousands of years ago. Notice the parabolic shape of the dunes on the eastern side.



Caught in the Web: Employment opportunities

By Curran Filer
Bucknellian Staff Columnist

Many of us at Bucknell are worried about what we will do when we graduate. We all want to find a good job, but it's not always that easy. Luckily, the World Wide Web has many resources for people seeking employment. The World Wide Web has help from writing a resume to jobs for recent graduates. The web sites below are only a few of the many resources. If you would like to find many more, just use the major search utilities using keywords like "jobs" and "employment".

America's Job Bank
`http://www.ajb.dni.us`

This is the Employment Service's web site. The public Employment Service is a collection of state-run employment offices working under the Department of Labor. The public Employment Service has been helping employers find employees for over 60 years. The Job Bank's database has information on more than 250,000 jobs across the country. The database is also pretty easy to use. You select an occupation and location, and then click on the "View Jobs Now" button. This is a good way to use your tax dollars.

Welcome to E-Span
`http://www.espan.com`

E-Span is a private job database. You can search E-Span's database by keyword, company name, geographical area, education level and managerial classification. You can also post your resume for free. Members get special privileges as well. Registering is free, and once you do, E-Span will notify you of job openings that fit your criteria, and they will save your search criteria so you don't have to type it in each time.

JOBTRAK
`http://www.jobtrak.com`

Jobtrak is an interesting employment service designed for college students and recent alumni. Jobtrak posts job listings for a particular school so that employers can target students and graduates from a particular college or university. Jobtrak has over 500 college and university partners, including Bucknell. You will need to get a password from the Career Development Center to use this resource. Jobtrak also has some other resources for students looking for jobs.

Archeus Online
`http://www.golden.net/~archeus/reswri.htm`

If you need help writing your resume this site might help you. Archeus has reviews of many of the articles about resume writing available on the Web, with links to each article. There are also reviews of two resume writing books that the web site's author feels are good guides. It might be helpful to go through and read the reviews of the articles you think are most relevant and then read those articles. It may also save you the cost of a book on writing a resume.

'Old school' bowling right up your alley?

By Micah Schweizer
Bucknellian Staff Columnist

Local Color

Once upon a time, not too long ago, there were bowling alleys. People gathered at these bowling alleys on Friday evenings to get out of the house, meet friends and beat last week's high score. Time went by, and people happily peered through the smoky haze to confirm that they had rolled a gutter ball, listened to their favorite tunes on the juke box, ate fatty food from vending machines and miscalculated their scores. Life at bowling alleys went on like this for quite some time, until suddenly non-smokers began to infiltrate them and demanded a clearer view to the end of the lane. Fatty foods in the vending machines were replaced with vegetables, and automatic score keepers were installed. Due to the loss of manual score keeping methods, now a nearly extinct art, the nation's high school math ratings plummeted. Within only a short time, the complex and highly developed weekend night bowling culture had been destroyed and rebuilt with space age technology and nineties sterility.

While this tale is sad and partially true, the good old days may be relived — right here in the Burg. Yes indeed, Lewisburg sports its very own 'old school' bowling alley where the nineties have not yet taken their toll. The atmosphere is by no means smoke free, vending machines hold all your favorite goodies, score keeping is manual, and the juke box still plays classic Michael Jackson. The Lewisburg Lanes are located at 127 Buffalo Road, below the American Legion, right before the intersection of Routes 15 and 192 (near Bechtels, the place with the big cow on the roof). Bowling costs two dollars, and shoe rentals cost another 50 cents. When I called the Lanes inquiring about the hours, I received a vague response regarding Friday night bowling — it officially runs from six in the evening "'till whenever." The Lanes are open on Saturday from around 6 p.m. until 11 p.m., on Sunday in the afternoon, and on weekdays from 12:30 p.m. until 3 p.m. For more information call 524-9071.

Assuming you don't hit the pin collector with your ball (as I once did in my younger days), you should have quite a pleasant bowling experience.

An additional reminder for this weekend: since it's the first Friday of the month on March 7, that can only mean one thing — Contra Dancing at the Lewisburg Club (131 Market St.) from 7:30 p.m. until the cows come home (that is, 11 p.m.). Admission is four dollars. Remember — Contra Dance, your ticket to a rollicking good time!

Preparing for Purim celebration

By Corrie Drummond
Bucknellian Staff Writer

Walking through the LC mall this week, you might be surprised to find a little bit of Jewish culture for sale. Hillel is presently preparing to celebrate the Jewish holiday Purim, which falls on March 23, by selling gift baskets full of items sacred to the holiday. Hillel focuses on promoting awareness of Jewish culture by celebrating holidays, encouraging deeper understanding of traditions and fostering and open Jewish community.

The story of Purim dates back to the second century BCE in Persia. Here, Haman, an advisor to King Ahasuerus, formulated a plan to destroy all the Jewish people in the land. In keeping with Jewish law, which required that Jews bow only before God, Mordechai, a Jewish man, refused to bow down to him, inciting Haman's wrath.

Mordechai appealed to his niece, Queen Esther, who had acquired the crown as a result of a search by the king and who was keeping her nationality and faith hidden. He challenged her to make use of her position in order to save her people, even though she faced possible death for coming in to the king's chamber uninvited. As a result of her courage, Haman's plot was revealed, and he was hanged on the gallows built for Mordechai. The holiday is celebrated by a number of traditions, including reading the magillat, which is the book of Esther. Emily Schreiber '98, president of Hillel, recounts the tradition of reading this book. "The tradition of the reading is a fun occasion, participants put on skits, dress up as the characters of the story and cheer on the story's good guys and boo at the bad guys. Also, to get so drunk so that you don't know the difference between the good hero, Mordechai, and the evil Haman," Schreiber explained. "The message of Purim is to rid ourselves of the evil Haman that's inside all of us."

Hillel is providing a way to integrate some of these traditions in order that the University may celebrate Purim: eating *Hamantaschen* (triangular shaped cookies filled with fruit, known as "Haman's Ears"), giving to the poor and giving *Mishloakh Manot* (a basket of fruits and sweets) to friends and family.

This is the essence of the Purim holiday package: a basket full of *Hamantaschen*, complete with a message from the sender, to be given to friends and family. They may be ordered in the Langone Center Mall between March 10 and 13, from 11 a.m. to 1 p.m. Packages should be picked up on March 25-26 from 11 a.m. to 1 p.m. Packages cost $3 each or $10 for four. All proceeds will be given to the Susquehanna Valley Women in Transition, which benefits victims of domestic and sexual assault. Checks should be made payable to Israel Programs Account. If you have any questions, you may contact Emily at 523-5819.

Cooking with Katie

Banana Bread

As the metamorphosis from a lime green shadow to a spotty black disease envelops your innocent bunch of bananas, it may cross your mind to dispose of these fruit fly attracting sweets. But if you can convince yourself to overlook this mutation and the sticky perks that define it, you will find yourself with the ideal ammunition for intensely moist banana bread. Ignore the temptation of the perfectly ripe, canary-yellow firm banana, and instead realize that the degree of advanced ripeness is directly reflected in the 'oohs' and 'aahs' that will reverberate from any munching party.

∞ *2/3 cup canola oil*
∞ *1 and 1/2 cups sugar*
∞ *3 rotten rotten bananas*
∞ *2 eggs*
∞ *1 tablespoon plus 1 teaspoon maple syrup*
∞ *2 cups flour*
∞ *1 teaspoon baking soda*
∞ *3/4 teaspoon salt*
∞ *1/2 cup milk*
∞ *1 teaspoon fresh lemon juice*
∞ *1/4 cup chopped & toasted nuts (pecans or walnuts)*
∞ *sugar for sprinkling*

1. *Mash bananas and add sugar.*
2. *Add oil and whisk until well incorporated, adding eggs one at a time.*
3. *Sift dry ingredients together (flour, baking soda and salt).*
4. *Fold in alternately with the milk.*
5. *Add lemon juice and toasted nuts.*
6. *Pour into pans sprayed lightly with cooking spray.*
7. *Sprinkle tops with sugar.*
8. *Bake at 325° for approximately one hour.*
9. *Allow to cool in pans for a few minutes, remove and set on wire racks to cool completely.*

Banana Bread is a 'quickbread,' which is risen with baking soda rather than yeast. It may be baked in either loaf pans or as muffins, (fill cups to about three-quarters) although muffins require only 15-20 minutes (until they don't wiggle inside) in the oven. I've found that the ideal combination is one average sized loaf pan and six medium muffins cups (there's not quite enough batter for two loaves),which are ideal for the "just out of the oven" taste test. Well-wrapped, the bread will remain moist for a few days; alternately, refrigerate (one week) or freeze (a few weeks).

SCIENCE AND TECHNOLOGY

Montandon: home of rare sand dunes

By Tim Parrott
Bucknellian Staff Writer

Within only five miles of the University, rare Pleistocene geological features otherwise known as sand dunes, unique to this area of Pennsylvania, can be observed. These rounded ridges of drifted sand are considered to be a geological phenomenon.

The dunes, which are the largest in Pennsylvania, occupy the area South of Route 45 on the east side of the Susquehanna River along with their associated wetlands. In reality, the entire town of Montandon is covered by sand, sometimes by over 20 feet of the blown and drifted grains.

If it is true that the town of Montandon and the surrounding area are covered with sand dunes and undrained depressions, how did they arise in an area known for having the normal foundation of bedrock covered with soil?

The dunes present in the Montandon area are parabolic dunes which, as with all dunes of this type, bow in the downwind direction from the prevailing wind which caused them to form. Accompanying these dunes are longitudinal dunes which form parallel to the direction of the wind which caused them to originate.

Because of the positioning of the parabolic and longitudinal dunes in the Montandon area, it can be observed that they must have been formed from a prevailing wind coming from 75 degrees west of north.

According to geologists, sand accumulated in the area of Montandon as a result of the deglaciation during the Pleistocene Period thousands of years ago. During the Pleistocene Period, the Susquehanna River was a braided river occupying both part of its present area and also areas to the east, closer to Montandon.

During this period, a glacier north of Montandon and Lewisburg, near the present Williamsport area, began to melt and outwash filled with sediments began moving down the valley through the existing braided Susquehanna River. With the sediments in the outwash, there came a huge source of water.

As this outwash moved along the valley, the braided Susquehanna became the large, fairly linear river that it is today, leaving much of the sediment from the outwash in the area which the braids of the river once occupied. The sediment contained small chunks of limestone, sand, loess and negligible amounts of other sedimentary material.

As the prevailing wind blew across the sedimentary particles in the area west of Montandon, the debris was differentially distributed across the eastern area according to its weight and size.

Today, just east of the Susquehanna River, deposits of large rocks and heterogeneous soil exist. Just beyond the deposits are the sand dunes with almost total homogeneity, followed by an area with a light covering of loess.

Loess, a sedimentary particle finer than sand, was blown further than the sand due to its weight and consistency, while the sand was blown further than the limestone for the same reason. As the sand was blown into the present Montandon region, it was blown into the longitudinal and parabolic dunes.

The Montandon area has been studied for many years, and the legitimacy of the presence of dunes has been proven time and time again. Not only has the entire area developed its general topographical shape from the blown sand, but the texture of the ground is that of packed sand.

Auguring has also been done, in which large drifts have been drilled in order to find the nature and makeup of that drift. In all instances, the drifts have been found to consist of at least 20 feet of pure sand.

The Montandon dunes, although still present, are difficult to see due to the development which has occurred in the Montandon area since their original formation. The high drifts can be seen in areas where the dunes were cut to allow for the building of a road and in areas which have not yet been developed.

Regardless of their visibility at the present, these dunes are a unique geological phenomena. They are the only known set of dunes along the Susquehanna River. As a result, both these dunes and their associated wetlands and undrained depressions are looked upon as natural wonders.

Professional File: Kathy Wieand

BY STEPHANIE KARDOHELY
Bucknellian Staff Writer

Cara Mickelsen—The Bucknellian
Wieand's grandson, Dalton, is one of her most prized customers.

Wearing her red and black uniform and petite gold scissors in her ears, dining services employee/beautician Kathy Wieand is no stranger to many students at the University. Wieand began working at Bucknell six years ago and has since found a place in the hearts of many students.

I met Wieand at the Seventh Street Cafe where she was talking with a group of students, teasing one for having shaved his head. Wieand finds that one of the best parts about working at the University is the students. She enjoys getting to know them and watching them change as they complete their career at the University. "You get to know the students and it's sad to see them go, but you see their accomplishments when you look back on when they first came to Bucknell and when they leave. Their whole personality changes," Weiand said.

Recently there has been some discussion about Bucknellians looking down upon dining service employees, but according to Wieand, "I've not ever found a bad Bucknell student. I've always had a great rapport with students. It all has to do with communication." Wieand compliments student workers as being hard working and responsible. "They go above and beyond the call of duty. One time I was very sick and trying to close up and the students sent me home and closed for me," she said.

Wieand is no stranger to hard work. While working full time at the University she decided to fulfill her dream of becoming a beautician. "It was something I've always wanted to do. I said to myself, 'Kathy, if you don't do it now you're never going to do it.'" So Wieand attended cosmetology classes and graduated with a cosmetology license. She has now opened a salon in her home outside Montandon called Hair-I-Am. Wieand credits some students with helping her find a name for her shop.

Because of her experience in both working and going to school, Wieand can sympathize with students who feel overwhelmed. She related how, while working in the Café, she would often see students working and getting more and more frustrated by the minute. "I would go over to them and say, 'You need a break'. Everyone needs someone to remind them to take a break once in a while."

Wieand On...

The Seventh Street Cafe: Wieand's favorite place to work was in the Seventh Street Café. Why? "It's a laid-back place and I had more of a chance to talk one-on-one with the students. That's one of the things I enjoy" Wieand said.

Flavor of the Day: Her favorite snack at the Café? "I like to take snickerdoodle coffee, with some chocolate sauce and vanilla ice cream, and put some chocolate sprinkles on top." Yum.

Mannequins: While attending cosmetology school, Wieand would sometimes bring her mannequins to work at the Seventh Street. "Some of the students thought it was fun. I'd bring in my mannequin heads and we'd fix them up." Wieand now welcomes real people at her new salon.

Helpers: At home Wieand enjoys spending time with her three grandchildren, Caleb, Emily and Dalton. Dalton and her cat, Kelan, have fun sweeping up the shop with a little dustpan and broom. "They just like to play" said Wieand.

Just a trim?: If Wieand could cut anyone's hair who would it be? "The country singer Crystal Gayle. I would just trim the straggly ends. Every time I see her on T.V. I say, 'She still needs a trim'."

One at a time, please: Working in the serving line one day Wieand noticed a guy coming back for seconds right after he had been through the line. The student denied having already gone through the line. Wieand teased him, "You must have a look-alike then." About that time his brother walked over. They were twins. "We've been friends ever since" laughs Wieand.

Her '56 Chevy: "I do a lot of crafts and like to go antiquing... and I have a '56 Chevy to cruise around in."

BUCKNELL UNIVERSITY
SPORTS THURSDAY

Athlete of the Week: Gordon Mbooya '97 (men's basketball) became the 25th player in Bucknell/ Patriot League history to score over 1,000 career points.

Bucknell's NCAA hopes sunk by Midshipmen

Late Navy rally ends hopes of first tournament birth since 1989,76-75

Tiny Booker comes up big for Mids

BY CHRIS ELLIS
Bucknellian Staff Writer

One point away.

Head Coach Pat Flannery's Bison, returning no starters from last season and predicted by many to finish last in the Patriot League came within a single point of representing the league in the NCAA tournament. Navy, by virtue of its 76-75 triumph last night, will travel to the NCAAs for the first time in three years, and head coach Don Devoe will make his fifth trip, his second with Navy. The Midshipmen will go to the dance, but, even if Navy makes a near-impossible run in the tournament, they won't see another game as thrilling as this one.

Navy held leads of as many as nine points, trailed by as many as 11, trailed for all but two minutes of the second half, fought back from five down with 4:30 to go, and shot almost flawlessly from the foul line. Still, if it wasn't for the efforts of a truly small forward, Bucknell would live to play another day.

Navy's Hassan Booker, at only 6'2", lived up to every compliment the ESPN announcing crew seemed to grant him. Booker had faced off against giants, dominating Pitt seven-footer Mark Blount and holding his own in some time against Stanford's Brevin Knight, but saved his best performance for the League championship. The fiesty Navy forward, playing most of the second half with four fouls, scored 25 points, including a crucial three-point play with just 1:40 remaining to give Navy the NCAA birth.

With the game tied 66-66, Bucknell's J.R. Holden '98 was fouled trying to receive a pass. Holden missed the front end of the one-on-one, though, and Navy raced down the court in an effort to take the lead. Michael Heary missed a jump shot, but Booker was left alone underneath. He was fouled while forcing the putback through the nets, and gave Navy a 69-66 lead that would hold up for the remainder of the game. Booker finished with 13 rebounds, including 6 offensive rebounds, in the game.

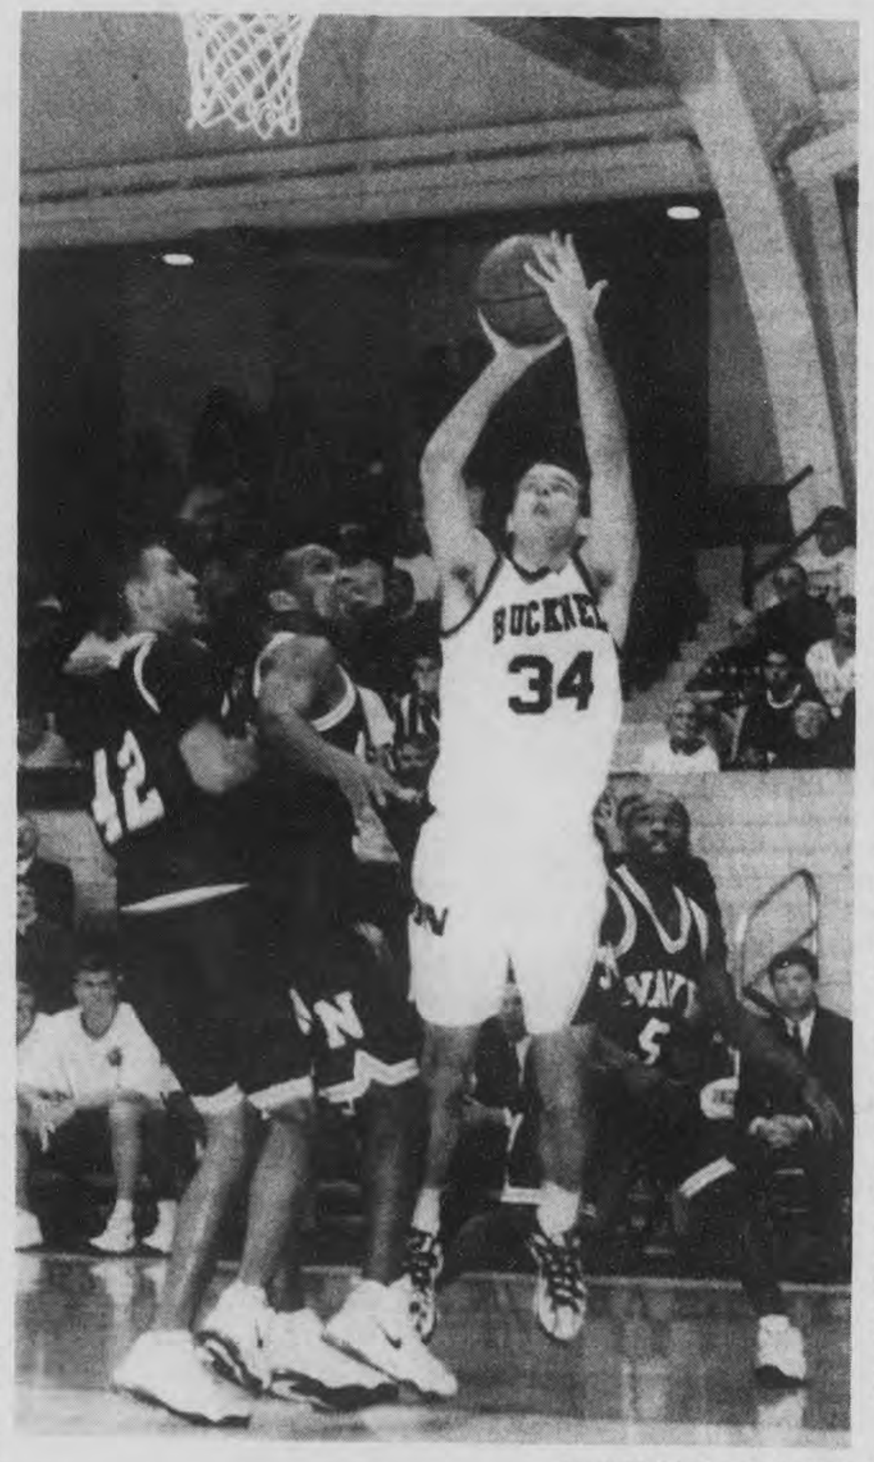
The Bison, down by scores of 12-4 and 16-5 early in the game, rallied to take a 21-18 lead with 9:02 remaining in the first half on a three-point play by Tom Welch. Bucknell maintained that lead through the rest of the first half, going to the locker room up 34-29.

Bucknell stretched its lead early in the second half. Welch and Dan Bowen '00 combined to score Bucknell's first nine points in the second half, as the Bison raced out to a 43-33 lead.

Navy's hopes appeared to be all but over when the team's sparkplug and leader Booker received his fourth foul with 11:00 remaining. Booker spent only a few seconds on the bench, though, before returning and leading the improbable Navy charge.

Navy whittled away at the Bucknell lead, finally tying the game on a three-pointer with just 3:10 remaining. Holden responded by hitting a leaning jump shot to give Bucknell the lead one more time. Navy's Heary answered Holden, but Martin Gilliard's '99 two free throws sent the Bison to the final TV timeout with a 66-64

see BISON, page 15



Jonah Half—The Bucknellian
Tom Welch '97 ended his Bucknell career in style, scoring 20 points and grabbing eight rebounds, but it wasn't enough to lead the Bison past Navy in the Patriot League Championship game.

Bucknell's Welch goes out a winner

BY CHRIS ELLIS
Bucknellian Staff Writer

Commentary

The collegiate basketball career of Bucknell forward Tom Welch may have come to an end in last night's one-point loss to Navy, but Welch wouldn't let it go without showing why he was a tri-captain on a team that came painfully close to the Big Dance.

Throughout most of the 1996-97 season, Welch was overshadowed by Bucknell guards J.R. Holden and Gordon Mboya. Nobody could blame the press for giving the guards most of the attention. Mboya was a Patriot League first-team player, and Holden, save for the efforts of Colgate's Adonal Foyle, was the Patriot League's best player. Both Mboya and Holden played solid games against the Midshipmen. Mboya finished with 10 points, and Holden scored 15, including a pair of late jump shots to keep Bucknell ahead until under two minutes remaining in the game. But it was Welch who saved his best for last.

Welch, playing underneath against a Navy team that led the Patriot League in rebounding margin, grabbed eight rebounds and scored 20 points in nearly leading Bucknell to the top.

"Tom's been there all season for us, and he's always done the job," Bison coach Pat Flannery said after the regular-season finale. "When he's on his game, it takes our entire team to a different level."

For 38 minutes, it looked at if that level would be the NCAA round of 64. Bucknell fell behind by nine points early, but, led by Welch's inside play, battled back. Bucknell slowly chipped away at the Navy lead until a Welch layup tied the game at 18-18 midway through the half. On the next trip down the court, Welch was fouled

see WELCH, page 15

Flash in the Pan

Declawed: The South Carolina Gamecocks continued their stunning assault on the Southeastern conference this weekend by defeating Kentucky 72-66, earning their first regular-season SEC title. Kentucky, ranked third in the nation going into the game, was a 16-point favorite playing at Rupp Arena, where they had not lost all season. With the win, South Carolina (23-6) become an unlikely favorite to earn a #1 seed in the NCAA Tournament.

Johnston sent packing: The Pittsburgh Penguins, losers of nine of their past 11 games, fired head Eddie Johnston on Monday. Pittsburgh, which has slipped nine points behind the Buffalo Sabres in the NHL's Northeast Division, will be coached on an interim basis by General Manager Craig Patrick, who also coached the team in the 1989-90 season. Patrick's work will not be easy, though. Star forward Jaromir Jagr announced this week that he may miss the remainder of the season with a groin injury, and Mario Lemieux may miss several games with the same injury.

Enough already: Boxer Sugar Ray Leonard's fourth comeback from retirement ended on a sour note this weekend after a fifth round TKO by Hector Camacho. Leonard earned an estimated $4 million for the fight, which dropped his career record to 36-2-1.

Ripken injured: Cal Ripken, Jr., who hasn't missed a regular-season game since May 29, 1982, sat out a pair of Baltimore's exhibition games this week because of a strained left groin. Ripken injured the groin fielding ground balls in a practice last week. The Orioles' shortstop is confident, though, that his injury won't become a long-term problem. "If I had to play, I know I could," Ripken said.

Talk about strong finishers: The Fairfield men's basketball team rebounded from an 8-18 regular-season to win three Metro Athletic tournament games, including a 78-72 win over Canisius in the tourney final, to earn an automatic birth in the NCAA tournament. Fairfield, the eighth and final seed in the tournament, and had dropped a 92-45 decision to Canisius in the regular season and were 2-12 in regular-season conference play.

Capping a monster deal: In a trade that involved more big-name players than any in the 1990's, the Washington Capitals signaled their commitment to return to the NHL playoffs by swapping six players with the Boston Bruins. The Caps receive disgruntled forward Adam Oates, who had spoken out against Bruins management one week earlier, goaltender Bill Ranford, and winger Rick Tochet. In return, the Bruins get last year's Vezina trophy winner Jim Carey, and centers Anson Carter and Jason Allison. The Capitals (24-32-7) currently trail Tampa Bay by two points for the final playoff birth in the Eastern Conference.

Women's Basketball Top 10

1. Connecticut 30-0
2. Stanford 28-1
3. Old Dominion 29-1
4. Louisiana Tech 26-3
5. N. Carolina 27-2
6. Georgia 22-5
7. Kansas 23-4
8. Alabama 23-6
9. Florida 21-8
10. Louisiana St. 23-4

Grapplers limp into conference tournamnent

Bison suffer second-straight blowout; look to get well in ECWA tourney at Bucknell

BY E.J. CRAWFORD
Bucknellian Staff Writer

They say that adversity makes you stronger.

The Bucknell wrestling team certainly hopes so, as the squad completed its regular season with a second straight blowout loss, this time to Virginia 29-9, and still have wrestlers with lingering injuries heading into the East Coast Wrestling Conference Tournament, to be held at Bucknell next weekend.

Virginia is a perennially strong team, and was coming off a big victory over Clarion, a traditional powerhouse. Said Head Coach Bob Ferraro, "Virginia is a very strong team... having one of their best years. We knew it would be a tough one to win.

On the opposite side of the spectrum from the Cavaliers, Bucknell was coming off a lopsided loss to conference-rival Rider, in which the Bison suffered their worst loss in team history, but were hoping to build momentum going into the conference tournament.

However, hopes of an upset never materialized, as the Bison fell behind early, losing the first six matches.

"We had to win the close matches, and we just didn't do that. I thought there might be three or four tight matches we could win, but it just didn't happen," Ferraro said.

Bright spots for the Bison were victories by Jeff Fisher '98, who has been recently injured, and another big win by freshman Brian Pitzer, who Ferraro described as "a very dangerous wrestler. [He is] really exciting to watch."

The victory by Pitzer comes on the heels of his upset victory over Rider, whose wrestler was last year's conference champion.

Despite his strong performances as of late, Pitzer will most likely receive only a fourth seed at 167 pounds, which would put him in line to wrestle Rider again in the semifinals.

Other likely seeds for the tournament, who look to improve on Bucknell's fifth place finish from last season, include Solomon Webb '99, who should receive a second seed; Jeff Fazio '98, who should receive a third seed; Fisher, who looks to receive a fourth seed in the heavyweight division; Todd Boerner '99, a likely third seed at 118 pounds; and finally Mike Garcia, who should receive a top seed at 150 pounds despite sitting out most of the season under University inquiry.

Last season both Garcia and Fazio made it to Nationals based on their performances in the tournament. A wrestler receives a National bid by either winning his weight class, or by receiving one of the seven at-large bids given to runner-ups in certain weight classes. The conferences coaches decide on which wrestlers receive the at-large bids.

Rider and Buffalo are early favorites in the tournament, although Ferraro thinks that the Bison can compete with Boston University for third. "Realistically, if we can have an excellent tournament we could finish as high as third... [and] could place as many as four or five wrestlers in the [conference] finals."

FEATURES

Professional File: Kathy Wieand

BY STEPHANIE KARDOHELY
Bucknellian Staff Writer

Wearing her red and black uniform and petite gold scissors in her ears, dining services employee/beautician Kathy Wieand is no stranger to many students at the University. Wieand began working at Bucknell six years ago and has since found a place in the hearts of many students.

I met Wieand at the Seventh Street Cafe where she was talking with a group of students, teasing one for having shaved his head. Wieand finds that one of the best parts about working at the University is the students. She enjoys getting to know them and watching them change as they complete their career at the University. "You get to know the students and it's sad to see them go, but you see their accomplishments when you look back on when they first came to Bucknell and when they leave. Their whole personality changes," Weiand said.

Recently there has been some discussion about Bucknellians looking down upon dining service employees, but according to Wieand, "I've not ever found a bad Bucknell student. I've always had a great rapport with students. It all has to do with communication." Wieand compliments student workers as being hard working and responsible. "They go above and beyond the call of duty. One time I was very sick and trying to close up and the students sent me home and closed for me," she said.

Wieand is no stranger to hard work. While working full time at the University she decided to fulfill her dream of becoming a beautician. "It was something I've always wanted to do. I said to myself, 'Kathy, if you don't do it now you're never going to do it.'" So Wieand attended cosmetology classes and graduated with a cosmetology license. She has now opened a salon in her home outside Montandon called Hair-I-Am. Wieand credits some students with helping her find a name for her shop.

Because of her experience in both working and going to school, Wieand can sympathize with students who feel overwhelmed. She related how, while working in the Café, she would often see students working and getting more and more frustrated by the minute. "I would go over to them and say, 'You need a break'. Everyone needs someone to remind them to take a break once in a while."

Bison suffer second-straight blowout; look to get well in ECWA tourney at Bucknell

BY E.J. CRAWFORD
Bucknellian Staff Writer

They say that adversity makes you stronger.

The Bucknell wrestling team certainly hopes so, as the squad completed its regular season with a second straight blowout loss, this time to Virginia 29-9, and still have wrestlers with lingering injuries heading into the East Coast Wrestling Conference Tournament, to be held at Bucknell next weekend.

Virginia is a perennially strong team, and was coming off a big victory over Clarion, a traditional powerhouse. Said Head Coach Bob Ferraro, "Virginia is a very strong team... having one of their best years. We knew it would be a tough one to win.

On the opposite side of the spectrum from the Cavaliers, Bucknell was coming off a lopsided loss to conference-rival Rider, in which the Bison suffered their worst loss in team history, but were hoping to build momentum going into the conference tournament.

However, hopes of an upset never materialized, as the Bison fell behind early, losing the first six matches.

"We had to win the close matches, and we just didn't do that. I thought there might be three or four tight matches we could win, but it just didn't happen," Ferraro said.

Bright spots for the Bison were victories by Jeff Fisher '98, who has been recently injured, and another big win by freshman Brian Pitzer, who Ferraro described as "a very dangerous wrestler. [He is] really exciting to watch."

The victory by Pitzer comes on the heels of his upset victory over Rider, whose wrestler was last year's conference champion.

Despite his strong performances as of late, Pitzer will most likely receive only a fourth seed at 167 pounds, which would put him in line to wrestle Rider again in the semifinals.

Other likely seeds for the tournament, who look to improve on Bucknell's fifth place finish from last season, include Solomon Webb '99, who should receive a second seed; Jeff Fazio '98, who should receive a third seed; Fisher, who looks to receive a fourth seed in the heavyweight division; Todd Boerner '99, a likely third seed at 118 pounds; and finally Mike Garcia, who should receive a top seed at 150 pounds despite sitting out most of the season under University inquiry.

Last season both Garcia and Fazio made it to Nationals based on their performances in the tournament. A wrestler receives a National bid by either winning his weight class, or by receiving one of the seven at-large bids given to runner-ups in certain weight classes. The conferences coaches decide on which wrestlers receive the at-large bids.

Rider and Buffalo are early favorites in the tournament, although Ferraro thinks that the Bison can compete with Boston University for third. "Realistically, if we can have an excellent tournament we could finish as high as third... [and] could place as many as four or five wrestlers in the [conference] finals."

Flash in the Pan

Declawed: The South Carolina Gamecocks continued their stunning assault on the Southeastern conference this weekend by defeating Kentucky 72-66, earning their first regular-season SEC title. Kentucky, ranked third in the nation going into the game, was a 16-point favorite playing at Rupp Arena, where they had not lost all season. With the win, South Carolina (23-6) become an unlikely favorite to earn a #1 seed in the NCAA Tournament.

Johnston sent packing: The Pittsburgh Penguins, losers of nine of their past 11 games, fired head Eddie Johnston on Monday. Pittsburgh, which has slipped nine points behind the Buffalo Sabres in the NHL's Northeast Division, will be coached on an interim basis by General Manager Craig Patrick, who also coached the team in the 1989-90 season. Patrick's work will not be easy, though. Star forward Jaromir Jagr announced this week that he may miss the remainder of the season with a groin injury, and Mario Lemieux may miss several games with the same injury.

Enough already: Boxer Sugar Ray Leonard's fourth comeback from retirement ended on a sour note this weekend after a fifth round TKO by Hector Camacho. Leonard earned an estimated $4 million for the fight, which dropped his career record to 36-2-1.

Ripken injured: Cal Ripken, Jr., who hasn't missed a regular-season game since May 29, 1982, sat out a pair of Baltimore's exhibition games this week because of a strained left groin. Ripken injured the groin fielding ground balls in a practice last week. The Orioles' shortstop is confident, though, that his injury won't become a long-term problem. "If I had to play, I know I could," Ripken said.

Talk about strong finishers: The Fairfield men's basketball team rebounded from an 8-18 regular-season to win three Metro Athletic tournament games, including a 78-72 win over Canisius in the tourney final, to earn an automatic birth in the NCAA tournament. Fairfield, the eighth and final seed in the tournament, and had dropped a 92-45 decision to Canisius in the regular season and were 2-12 in regular-season conference play.

Capping a monster deal: In a trade that involved more big-name players than any in the 1990's, the Washington Capitals signaled their commitment to return to the NHL playoffs by swapping six players with the Boston Bruins. The Caps receive disgruntled forward Adam Oates, who had spoken out against Bruins management one week earlier, goaltender Bill Ranford, and winger Rick Tochet. In return, the Bruins get last year's Vezina trophy winner Jim Carey, and centers Anson Carter and Jason Allison. The Capitals (24-32-7) currently trail Tampa Bay by two points for the final playoff birth in the Eastern Conference.

Women's Basketball Top 10

1. Connecticut	30-0
2. Stanford	28-1
3. Old Dominion	29-1
4. Louisiana Tech	26-3
5. N. Carolina	27-2
6. Georgia	22-5
7. Kansas	23-4
8. Alabama	23-6
9. Florida	21-8
10. Louisiana St.	23-4

Club Sport Report: Ultimate Frisbee

Mudsharks struggle in Lehigh's "Damn Cold"

Beetna Kim—The Bucknellian

Mike O'Brien (left) was one of two freshman to travel to Lehigh's Damn Cold Tournament this past weekend.

BY E.J. CRAWFORD
Bucknellian Team Correspondent

The men's and women's basketball teams weren't the only Bucknell squads to travel to Lehigh this weekend, as the Bucknell men's Ultimate Frisbee team traveled to the aptly named Damn Cold Tournament. Unlike their basketball counterparts, the men's squad, the Mudsharks, truly lived up to their nickname while playing four consecutive games through wind, rain and, of course, mud.

The tournament started a little slow as the Mudsharks suffered through four field changes and the wayward driving of junior Beau Botteicher before getting started.

Due to not being allowed to practice on the outside fields until after spring break, as well as no available indoor field space, the men's squad had no real practice before this week's tournament, and it showed as they started slowly against the Rutgers Machine. Despite their sluggish start, the Mudsharks still displayed the spirit that has made them a tournament favorite while continually diving and cheering throughout the game. However, in the end it wasn't enough, as the precise Rutgers team defeated the Mudsharks 10-3.

The team again started slow against Carnegie Mellon, but as the skies cleared the team seemed to regain strength behind the precise passing of handlers Rob Jacob '97 and Dan Heckman '99, as well as the surprising play of long Matt Fisher '00, who made his presence felt in only his third tournament.

The Mudsharks rallied from a 7-1 deficit to make it close, eventually falling 12-9.

In the team's third game, against Drew University, the lack of play and conditioning began to catch up with the Mudsharks, as the quicker Drew squad utilized continual long throws to open up a lead. But, in true fashion, the Mudsharks bounced back behind the strong defense of the injury plagued handler Botteicher and long E.J. Crawford '99, as well as the precise cuts of middle Alex Gregory '99, to close within 10-8 before dropping a closely contested 13-10 contest.

Much of the credit for the continually improving play belonged not only to the players, but to their mascots and assorted toys which provided the Mudsharks with the spirit necessary to continue their sportsmanship and hard play. As always, Yoda, the team's spiritual adviser played an important role; but in this tournament he was backed by the intimidating voodoo doll, as well as the many and assorted pez dispensers.

The Mudsharks' toys came up biggest as the weary Mudsharks headed to the field designed on the side of a hill for the day's most fun game—against SUNY Binghamton. After captain Brian Gale's '97 embarrassing fall in the dizzy bat game (where you spin around a bat and then try to run to the finish line), the Mudsharks executed the tournament's best pull (or kickoff), as sophomore handler Gregg Lithgow led the *Braveheart* pull. Gale redeemed himself with his stellar play and antics during the spirit-filled contest. The game included a graceful full layout by John Belding '98 for an almost score, and the emergence of another promising freshman, Mike O'Brien. For their part, SUNY did a good job of keeping the game close, but eventually the Mudsharks pulled away for a 13-8 victory and ended the day with a 1-3 record and a group of 10 sore and tired individuals.

The Mudsharks and their female counterparts, the Peace Frogs, will continue to play throughout their spring season with hopes of finally making it to regionals, which the men narrowly missed last year.

Lacrosse sticks it to American, wins 7-6

BY HALEY FUTTERKNECHT
Bucknellian Staff Writer

Bucknellian File Photo

Heidi Hammes '99 (shown defending) scored in new coach Barb Jordan's first victory at Bucknell.

With most of their team back from last season, the Bucknell women's lacrosse team has benefited from an easy transition in the position of head coach. Barb Jordan claimed her first head coaching position and relieved field hockey coach Heather Lewis.

The team has benefited from Jordan's high degree of dedication to improve Bucknell's program. "Barb knows the game well due to her plethora of background experience. She has a great deal of confidence in us which allows us to rise to a new level of play," commented Heidi Hammes '99.

Jordan played defense for Penn State, was a member of the U.S. Squad and was the former assistant lacrosse coach at Vanderbilt.

Jordan got her first taste of victory as coach as the Bison edged out American 7-6 on Sunday.

Bucknell led for the entire game and by as much as four goals three times, but American battled back in the second half, closing to within two goals twice.

The Bison took a 4-0 lead at halftime on two goals from Lauren Coyne '99, and one each by Hammes and Alison Cox '97. "The defense made a nice adjustment to American's performance in the second half," said Christine Studdiford '99.

With the contribution of two more goals by Cox and one from Kate McIlvain '97, Bucknell held a two goal lead until American scored for the last time with two seconds left. "To ensure domination of the game, we concentrated on maintaining possession chiefly by coming up with ground balls," commented Elizabeth Murphy '99.

Added Coyne, "A key to our ending success was the stall play that we employed which allowed us to maintain possession for a majority of the remaining nine minutes of the game."

Goal was tended by Alyson Toombs '97, who made 14 saves.

The women's squad will travel to San Francisco for spring break to challenge UC Berkeley and Stanford. "It provides us with a chance to play outside and experience western schools that we wouldn't have a chance to compete against in regular season. We hope to continue with the positive momentum that has formulated as we look forward to beating our Patriot League opponents," Hammes said.

WELCH

from page 13

while connecting on another shot, making the free-throw to give the Bison a three-point lead.

Welch combined with teammate Dan Bowen to open Bucknell's lead to 10 early in the second half. A pair of inside buckets from Welch gave Bucknell the jump-start it needed to begin the second half, and after Bowen made a pair of jump shots, Bucknell's victory seemed to be sealed.

"When Welch and Bowen start to heat up inside, they give their club a complete package ," Colgate coach Jack Bruen said after the duo helped to hold Adonal Foyle to only 13 points. "They make Bucknell very, very hard to beat."

Sadly for Bucknell's three seniors, a victory wasn't in the cards. Hassan Booker heated up late in the game, scoring 25 points en route to picking up tournament MVP honors. But Welch's performance will stand out, as well. The 20 points were a career high, and his performance helped to earn him All-Tournament honors.

At times criticized for being overly-emotional on the court, Welch combined the best of his raw passion and cold-as-ice frontcourt play in the league final.

Next year's Bison look to be even better than the team that fell just short this year. Only two seniors will be lost, and freshman big men Valter Karavanic, Dyrika Cameron and Bowen will do nothing but improve. But while it may be easy to replace Welch's minutes, points and rebounds, the loss of his intensity and emotion will be much harder to overcome. The Bison may have come up losers at Navy, but Tom Welch's last game in a Bucknell uniform established in the minds of a national TV audience what Bucknell basketball insiders have known all along--Tom Welch is a true champion.

BISON

from page 13

lead.

Michael Heary hit another tough jump shot to tie the game, setting the stage for Booker's dramatics. Bucknell turned the ball over on two of its final four possessions, and Navy's Jason Sladky sealed the game with five free-throws. Late three pointers by Willie Callahan and Mboya kept the score close, but Navy's foul shooting dashed any chances of a comeback. The Midshipmen were 21-25 from the line in the game.

The loss overshadowed an impressive tournament run by Bucknell. The sprint to the finals started with a first-round game at Lehigh. Bucknell trailed by two at the half, but outscored the Engineers 55-23 in the second to post a 84-54 win.

Next up for the Bison was Colgate and Patriot League player of the year Adonal Foyle. The Bison picked up where they left off in this game, scoring the final eight points of the first half and holding Foyle to just seven first half points in taking a 39-27 lead into the locker room.

"We stretched the floor and took advantage of our quickness to put them on their heels," Flannery said. "We forced them into some tough shots."

Foyle didn't produce much in the second half, either. Bucknell held the Red Raider center to only 13 points on 6-20 shooting in what probably was his final game at Colgate. Holden and Mboya combined for 35 points in that game.

"They kept us from being able to do the things that we did all season," Foyle said after the game. "When they get games like that from their guards (Holden and Mboya), you just have to tip your hat. There's not much you can do."

"Their guard play just overwhelmed us," concurred Colgate coach Jack Bruen.

The loss to Navy ends Bucknell's season at 17-11, and ended the collegiate careers of seniors Tom Welch, Gordon Mboya and Mark Treiber. The seniors helped Bucknell to post four winning seasons in the Patriot League in their four years.

Basketball racks up Patriot League honors

BY E.J. CRAWFORD
Bucknellian Staff Writer

A year's worth of hard work was rewarded to a number of Bucknell athletes and to men's Head Coach Pat Flannery, as Flannery was named Co-Coach of the Year along with Navy's Don DeVoe, and power forward Dan Bowen was named Patriot League Rookie of the Year.

Also honored for the men's team was the backcourt tandem of J.R. Holden '98 and Gordon Mboya '97, who were both named to the Patriot League's first team. Holden was third in the league with 100 assists and fourth with a scoring average of 17.5 points per game. The versatile Mboya who recently became the 25th player in both Bucknell and Patriot League play to amass 1,000 points, ranks sixth in the league in scoring and fifth in rebounding.

Flannery was honored after guiding this year's squad to second in the league, despite losing all five starters from last year. A big contributors to Flannery and the Bison's success was Bowen, who was twice named rookie of the week and started all 26 games for the Bison.

In women's honors, Chiara Sockel '97 and forward Kim Delfs '99 were both named to the second team all-conference, while freshman guard Lori Hauck was named to the all-rookie team.

CAMPUS CALENDAR

Thursday, March 6

7 p.m.—Film, *The Sunrise Dancer*, sponsored by Women's Resource Center, Gallery Theatre, Langone Center

7 p.m.—Third World Film Series, *My Footsteps in Baragua*, 120 Coleman Hall

8 p.m.—Lecture-recital, Lanelle Stevenson, Bucknell Hall

Friday, March 7

11 a.m.—International Women's Day Celebration, Cave, Langone Center

Noon—Hillel lunch, 241C, Langone Center

4 p.m.—Biology Seminar Series, "Developmental Studies on Chaetopterus, the Parchment Work," William Eckberg, Howard University, Rooke Chapel Chemistry Auditorium

4:30 & 8 p.m.—Hilltop Film Series, *Salaam Bombay!*, Hindi with English subtitles, Vaughan Literature Auditorium

5 p.m.—Senior Countdown, "Smart to Practice: The Importance of Professional Etiquette!," Tim Tenon and Chris MacGill, Terrace Room, Langone Center

7 p.m.—Asian Awareness Week Dinner, Larison Dining Hall

7:30 p.m.—Move, *Billy Madiosn*, sponsored by Phi Sigma Pi, $1 admission, Gallery Theatre, Langone Center

8 p.m.—Casatt String Quartet with Lois Svard, tickets $15, Weis Center

9 p.m.—Performance group, here*and*now, Forum, Langone Center

Saturday, March 8

Noon—Baseball vs. LeMoyne (doubleheader)

Noon—ECWA wrestling championships

1 p.m.—Softball vs. St. Francis (PA)

1 p.m.—Women's Lacrosse vs. Duquesne

10 p.m.—Murder-Mystery dance party, sponsored by CALVIN & HOBBES, CALVIN & HOBBES house

10 p.m.—BAC sketch comedy, "No Time," Bison, Langone Center

10:30 p.m.—BAC movies, *She's the One* and *The Brothers McMullen*, $1 admission, Forum, Langone Center

Sunday, March 9

9:30 a.m.-4 p.m.—Zen Retreat at Cowan, call Mary Evelyn Tucker at x1205 if interested

Noon—Baseball vs. LeMoyne

Noon—ECWA wrestling championships

2 p.m.—Poetry reading, The Dark Room Collective, group of young African American poets, Bucknell Hall

7:30 p.m.—Senior-junior recital, Jennifer Ahrens '97, clarinet, Kiersten Drumm '98, mezzo-soprano, and Ray McDonald '99, piano, Bucknell Hall

Monday, March 10

7 p.m.—Movie screening, *Dances With Wolves*, Gallery Theatre, Langone Center

7:30 p.m.—Religion lecture, "Zen and No Ego," Rev. Keido Fukushima, Forum, Langone Center

Tuesday, March 11

2:30 p.m.—Calligraphy demonstration, Rev. Keido Fukushima, Forum, Langone Center

3 p.m.—Women's lacrosse vs. Cornell

4-5:15—Discussion on *Dances With Wolves* (movie screened Monday, March 10), Glyne Griffith and Angela Curran, 104 Biology

4:30 p.m.—Lecture/Slide presentation, "The Poet and the Profits: Felicia Hemans and the Literary Marketplace," Paula Feldman, sponsored by Women's Resource Center, Gallery Theatre, Langone Center

4:30-5:30 p.m.—Meditation, Meditation Chapel, Rooke Chapel

7 p.m.—Evangelical Hospital Benefit Concert, Bucknell Symphonic Band, conducted by William Kenny, Weis Center

8 p.m.—Grever-Prize Presentation, Susan Minsavage, mezzo-soprano, Bucknell Hall

9 p.m.—BAC Bingo, Terrace Room, Langone Center

Wednesday, March 12

Noon-6 p.m.—American Red Cross Blood Drive, Larison Dining Hall

Noon—Well Women's Series, "Hanging Loose in an Uptight Worl: Burnout Prevention," Natalie Ferry, Walls Lounge, Langone Center

3:30 p.m.—Men's lacrosse vs. Mt. St. Mary's

8 p.m.—Concert, St. Mary's Women's Choir, Notre Dame, Rooke Chapel

9 p.m.—BAC movies, *She's the One* and *The Brothers McMullen*, $1 admission, Forum, Langone Center

Thursday, March 13

Noon—Mathematics Lunch Talk, Greg Adams, sponsored by Pi Mu Epsilon and MAA, 302 Langone Center

4 & 7 p.m.—Third World Film Series, *Frantz Fanonck Skin, White Mask*, 120 Coleman Hall

8 p.m.—Recital, Westminster Choir College Chapel Choir, James Jordan, director, Rooke Chapel

Sunday, March 23

11 a.m.—Men's tennis vs. Georgetown

Monday, March 24

Noon—Brown bag lunch, in celebration of Women's Week, 241D Langone Center

7 p.m.—Focus Semester Film, *Incident at Oglala*, Gallery Theatre, Langone Center

7 p.m.—Women's Resource Center Lecture, "African American Women in Society," Janice Hamlet, Forum, Langone Center

Tuesday, March 25

Noon—Brown bag lunch, in celebration of Women's Week, 241D Langone Center

7 p.m.—Bucknell Women's Talent Expose, Vaughan Literature Auditorium

7:30 p.m.—Merck-Bucknell Lecture Series, "Application of Mass Spectrometry to Studies in Drug Metabolism and Toxicology," Thomas Baillie, vice president, drug metabolism department, Merck Research Laboratories, Rooke Chemistry Auditorium

Wednesday, March 26

Noon—Brown bag lunch, in celebration of Women's Week, 241D Langone Center

Thursday, March 27

Noon—Brown bag lunch, in celebration of Women's Week, 241D Langone Center

3 p.m.—Women's lacrosse vs. Holy Cross

3:30 p.m.—Men's tennis vs. Villanova

7 p.m.—Talk show, hosted by Charles Perez, in celebration of Women's Week, Vaughan Literature Auditorium

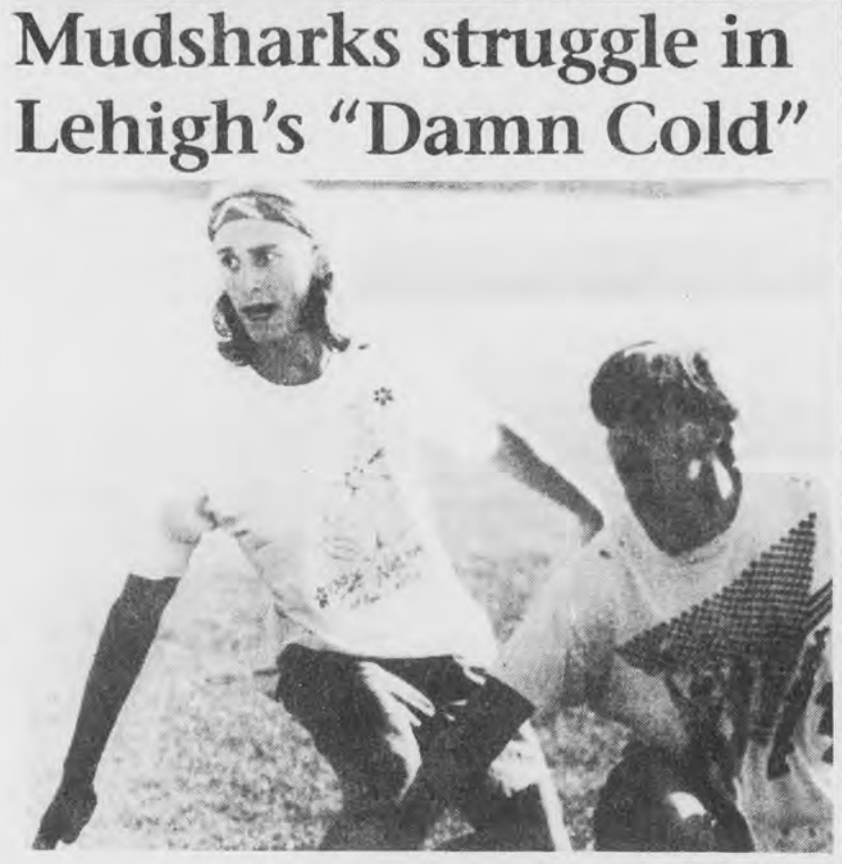
Club Sport Report: Ultimate Frisbee

Mudsharks struggle in Lehigh's "Damn Cold"



Beetna Kim—The Bucknellian

Mike O'Brien (left) was one of two freshman to travel to Lehigh's Damn Cold Tournament this past weekend.

BY E.J. CRAWFORD
Bucknellian Team Correspondent

The men's and women's basketball teams weren't the only Bucknell squads to travel to Lehigh this weekend, as the Bucknell men's Ultimate Frisbee team traveled to the aptly named Damn Cold Tournament. Unlike their basketball counterparts, the men's squad, the Mudsharks, truly lived up to their nickname while playing four consecutive games through wind, rain and, of course, mud.

The tournament started a little slow as the Mudsharks suffered through four field changes and the wayward driving of junior Beau Botteicher before getting started.

Due to not being allowed to practice on the outside fields until after spring break, as well as no available indoor field space, the men's squad had no real practice before this week's tournament, and it showed as they started slowly against the Rutgers Machine. Despite their sluggish start, the Mudsharks still displayed the spirit that has made them a tournament favorite while continually diving and cheering throughout the game. However, in the end it wasn't enough, as the precise Rutgers team defeated the Mudsharks 10-3.

The team again started slow against Carnegie Mellon, but as the skies cleared the team seemed to regain strength behind the precise passing of handlers Rob Jacob '97 and Dan Heckman '99, as well as the surprising play of long Matt Fisher '00, who made his presence felt in only his third tournament.

The Mudsharks rallied from a 7-1 deficit to make it close, eventually falling 12-9.

In the team's third game, against Drew University, the lack of play and conditioning began to catch up with the Mudsharks, as the quicker Drew squad utilized continual long throws to open up a lead. But, in true fashion, the Mudsharks bounced back behind the strong defense of the injury plagued handler Botteicher and long E.J. Crawford '99, as well as the precise cuts of middle Alex Gregory '99, to close within 10-8 before dropping a closely contested 13-10 contest.

Much of the credit for the continually improving play belonged not only to the players, but to their mascots and assorted toys which provided the Mudsharks with the spirit necessary to continue their sportsmanship and hard play. As always, Yoda, the team's spiritual adviser played an important role; but in this tournament he was backed by the intimidating voodoo doll, as well as the many and assorted pez dispensers.

The Mudsharks' toys came up biggest as the weary Mudsharks headed to the field designed on the side of a hill for the day's most fun game—against SUNY Binghamton. After captain Brian Gale's '97 embarrassing fall in the dizzy bat game (where you spin around a bat and then try to run to the finish line), the Mudsharks executed the tournament's best pull (or kickoff), as sophomore handler Gregg Lithgow led the *Braveheart* pull. Gale redeemed himself with his stellar play and antics during the spirit-filled contest. The game included a graceful full layout by John Belding '98 for an almost score, and the emergence of another promising freshman, Mike O'Brien. For their part, SUNY did a good job of keeping the game close, but eventually the Mudsharks pulled away for a 13-8 victory and ended the day with a 1-3 record and a group of 10 sore and tired individuals.

The Mudsharks and their female counterparts, the Peace Frogs, will continue to play throughout their spring season with hopes of finally making it to regionals, which the men narrowly missed last year.

Lacrosse sticks it to American, wins 7-6

BY HALEY FUTTERKNECHT
Bucknellian Staff Writer

Bucknellian File Photo

Heidi Hammes '99 (shown defending) scored in new coach Barb Jordan's first victory at Bucknell.

With most of their team back from last season, the Bucknell women's lacrosse team has benefited from an easy transition in the position of head coach. Barb Jordan claimed her first head coaching position and relieved field hockey coach Heather Lewis.

The team has benefited from Jordan's high degree of dedication to improve Bucknell's program. "Barb knows the game well due to her plethora of background experience. She has a great deal of confidence in us which allows us to rise to a new level of play," commented Heidi Hammes '99.

Jordan played defense for Penn State, was a member of the U.S. Squad and was the former assistant lacrosse coach at Vanderbilt.

Jordan got her first taste of victory as coach as the Bison edged out American 7-6 on Sunday.

Bucknell led for the entire game and by as much as four goals three times, but American battled back in the second half, closing to within two goals twice.

The Bison took a 4-0 lead at halftime on two goals from Lauren Coyne '99, and one each by Hammes and Alison Cox '97. "The defense made a nice adjustment to American's performance in the second half," said Christine Studdiford '99.

With the contribution of two more goals by Cox and one from Kate McIlvain '97, Bucknell held a two goal lead until American scored for the last time with two seconds left. "To ensure domination of the game, we concentrated on maintaining possession chiefly by coming up with ground balls," commented Elizabeth Murphy '99.

Added Coyne, "A key to our ending success was the stall play that we employed which allowed us to maintain possession for a majority of the remaining nine minutes of the game."

Goal was tended by Alyson Toombs '97, who made 14 saves.

The women's squad will travel to San Francisco for spring break to challenge UC Berkeley and Stanford. "It provides us with a chance to play outside and experience western schools that we wouldn't have a chance to compete against in regular season. We hope to continue with the positive momentum that has formulated as we look forward to beating our Patriot League opponents," Hammes said.

WELCH from page 13

while connecting on another shot, making the free-throw to give the Bison a three-point lead.

Welch combined with teammate Dan Bowen to open Bucknell's lead to 10 early in the second half. A pair of inside buckets from Welch gave Bucknell the jump-start it needed to begin the second half, and after Bowen made a pair of jump shots, Bucknell's victory seemed to be sealed.

"When Welch and Bowen start to heat up inside, they give their club a complete package ," Colgate coach Jack Bruen said after the duo helped to hold Adonal Foyle to only 13 points. "They make Bucknell very, very hard to beat."

Sadly for Bucknell's three seniors, a victory wasn't in the cards. Hassan Booker heated up late in the game, scoring 25 points en route to picking up tournament MVP honors. But Welch's performance will stand out, as well. The 20 points were a career high, and his performance helped to earn him All-Tournament honors.

At times criticized for being overly-emotional on the court, Welch combined the best of his raw passion and cold-as-ice frontcourt play in the league final.

Next year's Bison look to be even better than the team that fell just short this year. Only two seniors will be lost, and freshman big men Valter Karavanic, Dyrika Cameron and Bowen will do nothing but improve. But while it may be easy to replace Welch's minutes, points and rebounds, the loss of his intensity and emotion will be much harder to overcome. The Bison may have come up losers at Navy, but Tom Welch's last game in a Bucknell uniform established in the minds of a national TV audience what Bucknell basketball insiders have known all along--Tom Welch is a true champion.

BISON from page 13

lead.

Michael Heary hit another tough jump shot to tie the game, setting the stage for Booker's dramatics. Bucknell turned the ball over on two of its final four possessions, and Navy's Jason Sladky sealed the game with five free-throws. Late three pointers by Willie Callahan and Mboya kept the score close, but Navy's foul shooting dashed any chances of a comeback. The Midshipmen were 21-25 from the line in the game.

The loss overshadowed an impressive tournament run by Bucknell. The sprint to the finals started with a first-round game at Lehigh. Bucknell trailed by two at the half, but outscored the Engineers 55-23 in the second to post a 84-54 win.

Next up for the Bison was Colgate and Patriot League player of the year Adonal Foyle. The Bison picked up where they left off in this game, scoring the final eight points of the first half and holding Foyle to just seven first half points in taking a 39-27 lead into the locker room.

"We stretched the floor and took advantage of our quickness to put them on their heels," Flannery said. "We forced them into some tough shots."

Foyle didn't produce much in the second half, either. Bucknell held the Red Raider center to only 13 points on 6-20 shooting in what probably was his final game at Colgate. Holden and Mboya combined for 35 points in that game.

"They kept us from being able to do the things that we did all season," Foyle said after the game. "When they get games like that from their guards (Holden and Mboya), you just have to tip your hat. There's not much you can do."

"Their guard play just overwhelmed us," concurred Colgate coach Jack Bruen.

The loss to Navy ends Bucknell's season at 17-11, and ended the collegiate careers of seniors Tom Welch, Gordon Mboya and Mark Treiber. The seniors helped Bucknell to post four winning seasons in the Patriot League in their four years.

Basketball racks up Patriot League honors

BY E.J. CRAWFORD
Bucknellian Staff Writer

A year's worth of hard work was rewarded to a number of Bucknell athletes and to men's Head Coach Pat Flannery, as Flannery was named Co-Coach of the Year along with Navy's Don DeVoe, and power forward Dan Bowen was named Patriot League Rookie of the Year.

Also honored for the men's team was the backcourt tandem of J.R. Holden '98 and Gordon Mboya '97, who were both named to the Patriot League's first team. Holden was third in the league with 100 assists and fourth with a scoring average of 17.5 points per game. The versatile Mboya who recently became the 25th player in both Bucknell and Patriot League play to amass 1,000 points, ranks sixth in the league in scoring and fifth in rebounding.

Flannery was honored after guiding this year's squad to second in the league, despite losing all five starters from last year. A big contributors to Flannery and the Bison's success was Bowen, who was twice named rookie of the week and started all 26 games for the Bison.

In women's honors, Chiara Sockel '97 and forward Kim Delfs '99 were both named to the second team all-conference, while freshman guard Lori Hauck was named to the all-rookie team.

Number twenty: with a bullet?

What would you think of a team with two All-Stars, the former NCAA Player of the Year, last year's winner of Most Improved NBA player and one of the top point guards in the league as your starters. But it gets better. Your bench includes a former starter who average a near double-double last year and two of the top outside shooters in the game.

Pretty good, huh?

Well actually these are the Bullets, and this star-studded team has soared to a sub-.500 record and could yet again be looking at the lottery. Simply put, the Bullets have been lottery dwellers so long even the lowly Clippers have been to the playoffs more recently than the Bullets.

It is hard to believe that this team has not excelled this season, as all the key ingredients appear to be there for a run deep into the playoffs. Last season the Bullets made a stirring resurgence behind All-Star Juwan Howard. With his fellow college star Chris Webber healthy once again, as well as a trade that brought scintillating point guard Rod Strickland to Washington, the squad seemed poised for contention. They even had luck on their side, as the seemingly Heat-bound Howard came back due to the miscalculations of Pat "hair-spray" Riley (I'll bet Riley and his first-place Heat are crying about that one now).

Commentary

E.J. Crawford

E.J. Crawford
Sports Co-Ed

But now Webber is struggling with injury, Howard is just struggling, Gheorge Muresan is getting blown past by the like of Matt Fish and some guy named Szabo (who is actually starting for the Celtics, which tells you a lot about that franchise) and Jimmy Lynam is in the unemployment line. Even worse, if the Bullets do continue their poor play and end up in the lottery, they don't have a first-round pick because they landed Lorenzo Williams and Tracy Murray during Howard's brief stint in sunny Florida.

So what went wrong? How could a team many picked to be one of the three best in the East be struggling against the likes of the New Jersey Mavericks (whoops, I mean Nets) and that team in green that used to play like the Celtics?

The easy cop-out is to attribute it to youth, as Webber, Calbert Cheaney and Howard are all in their early to mid 20's, and Muresan is only in his third NBA season. But the fact is that Cheaney has been in this league longer than Latrell Sprewell and Grant Hill, and they're doing just fine; Howard and Webber are basically veterans at this point and should know better, and Muresan is getting worse!

Here are the answers. First of all, Wes Unseld is an idiot. The Bullets have had plenty of chances over the past 10 or so years to select top players, but the only one that has come through is Juwan Howard. An example: if you have power forwards Chris Webber and Juwan Howard, why do you then draft Rasheed "I'm going to cry if you don't play me" Wallace. Furthermore, one name: Kevin Duckworth.

But one cannot blame everything on Wes, although it certainly is a viable option. The problem with the present-day Bullets is that they don't have a winning team out on the floor. Everyone in America knows that good individual players do not necessarily constitute a good team, and it's time for the Bullets to put the right players on the floor.

The Bullets are not far from being a contender, but to do so they're going to have to bench big Gheorge. He could get outrun by a statue. Better yet, Muresan could get outrun by Dan Marino, and that's sad. Muresan can't guard most of today's centers because they blow by him before they can get a whiff of his cabbage-scented cologne.

Did anyone see what Alonzo Mourning did to Muresan? It was ugly. Mourning rook the ball on the outside and went right by the biggest nose in the history of the NBA. Muresan's a great guy, but he is not a quality NBA starter.

The solution: move Webber to center and Howard to his natural power forward position. Howard has some great low-post moves, let him use them.

As for Webber, I know he has long said that he doesn't like playing center. I'll admit that he is a bit undersized, but so are 75 percent of the centers in the NBA. Mourning is the perfect example—he's only 6'10", same as Webber. Against the big centers, put Muresan in there and let him battle with Mutombo and Shaq, they aren't going to take him outside and expose his speed, or lack thereof.

In addition, by doing this the Bullets could get another shooter into their lineup, something they desperately need. Having Murray and Tim Legler would relieve the inside pressure off Howard and Webber, and the Bullets could still use Harvey Grant and Jaren Jackson for defense.

I know some "fans" still subscribe to that "you gotta have a big man to win a championship," but there has been a certain NBA team that has been fairly successful playing a 6'8" "worm" as their big man.

The Bullets have to do something if they expect fans to follow them as they move to a new location and change their name to the Wizards next year—or else it may take a wizard to get fans to show up, or better yet, to get this sorry franchise into the playoffs.

Women's injury-plagued season ends in first round tourney loss to Lafayette

BY JEFF CAMPAGNA
Bucknellian Staff Writer

The Patriot League Tournament marked the close of a disappointing, injury-plagued year for Bucknell women's basketball. In a less-than-stellar performance, the Bison were rudely shoved aside 66-52 in the opening stages of the Lafayette Leopards' march to the championship game.

Coach Juliene Simpson shook up the starting line-up for the first-round match-up, inserting Lyndsay Earhart '00 at forward for the tip-off. Both teams came out flat, and almost three minutes passed before either team scored, as the Leopards took a 2-0 lead. Though Lafayette led throughout the half, they were unable to pull away.

The Bison held tight, knotting the score seven times while relying heavily on forward Jessica Mathieson's '98 10 points. The Leopards took advantage of their own strong play under the boards and the Bison's turnovers, taking a 28-25 lead into halftime.

Bucknell was still in contention at the start of the half, and with 17:24 left, they had pulled within one point of the Leopards (32-31), but that was all they could manage. Lafayette proceeded to pull away, eventually building up a lead of 13 points by the final gun.

Mathieson, who had been so effective in the first half, was held to only one point in the second half, yet still led the team in scoring with 11 points, along with fellow forward Kim Delfs '99.

Delfs also pulled down six boards to pace the team, but the Bison were unable to overcome the tough rebounding efforts under the glass of the Leopards' front line. Though the Bison outshot the Leopards percentage-wise, Lafayette was able to create more scoring opportunities, both from the field and the free throw line.

The Leopards finished off the resounding 60-47 victory with three players scoring in double-figures.

With the loss to Lafayette, the Bison finished with an overall record of 12-15, fourth in the Patriot League at 6-7. This was quite a drop from last year's regular season Patriot League championship, however; several factors contributed to this decline, namely injuries and the graduation of key starters. Even with this adversity, the Bison still managed to finish in the position (fourth) at which they were predicted in the preseason.

This finish was accomplished without the services of last season's Second Team All-Patriot League center Shannon McGowan '97, who was lost at the start of the season to knee surgery.

Senior guard Chiara Sockel, the only senior left on the team, stepped up her play, which included setting the career record for three-pointers, only to suffer a season-ending knee injury against Navy two games before the league tournament. In addition, Delfs, the team's leading scorer suffered the lingering effects of a broken finger throughout the season.

Coach Simpson continued to look for the positives that can be found in a rather unfortunate situation, "I'm proud we were able to hold together. The kids really stepped up, and looked to improve at every practice and to better with each game. We were able to overcome a lot."

These positives can also be found in the contribution of this year's freshman class, namely Lori Houck. Houck spent substantial minutes running the show at point guard, and she stepped up her play late in the season when Sockel went down with an injured knee.

The upperclassmen did their part as well, as Jessica Mathieson '98 showed great improvement while averaging 10 points a game and leading the team in rebounding. Though Delfs (12.5 PPG) was hampered by an injured finger, she still gave the Bison a formidable inside presence on the front line, which was nicely complemented by Sockel's deadly outside shooting.

Kimberly Delfs '99 led the team with 11 points in its loss to Lafayette.

Club Sport Report: Ice Hockey

Bucknell silenced by Hoyas in league final

Three-goal third period does in Bison; wins over Widener, Dickinson earn division crown

BY CHRIS ELLIS
Bucknellian Staff Writer

In took almost an entire season to do it, but the Mason-Dixon Hockey league finally found a team that could shut Bucknell down.

The Bison, who had nine, 10, 14 and 17 goal-games this season, could push only one past Georgetown goaltender Mike Boyd in a 5-1 league-championship game loss, thwarting Bucknell's efforts for a second championship in three years.

The Bison's top three scorers of Eric Hidy '97, Eric Mastroianni '98, and Jeff Werring '00, who had combined for 10 goals and 17 points in Bucknell's two divisional playoff games, were held to just one goal and one assist in the championship. Mastroianni's second-period goal was the only tally the three could register in the championship.

"We couldn't get things together like we wanted to in the championship game," Hidy said. "Georgetown did a good job of keeping us in check."

Bucknell and Georgetown went into the game with identical 9-0-1 league records and had both breezed through their two playoff games. Georgetown, though set the tone for the championship almost right from the start. A Bucknell penalty just seven minutes into the game put the Hoyas on a power-play, and Georgetown's George Whiting flipped a shot past goaltender Bill Gubing to give the Hoyas a 1-0 lead and get Georgetown's sizable home crowd into the game. Bucknell countered two minutes later as Eric Mastroianni '98 poked a rebound past Boyd to tie the game.

Whiting struck again midway through the second to give Georgetown a 2-1 lead going into the third. The Hoyas took control of the game early in final stanza striking for three goals in four minutes against Gubing to seal the game. The Bison could not crack Boyd in the final 11 minutes, and were forced to settle for the title of Northern Division Champion and Mason-Dixon league runner-up.

"We just lost a little bit of our focus in the third period, and it wound up costing us," team captain Eric Hidy '97 said.

The loss overshadowed Bucknell's superb efforts in its two divisional playoffs. Bucknell routed Widener, 9-3, and Dickinson, 4-1, in the playoffs.

The Bison opened the playoffs by routing Widener, 9-2 behind a hat trick from Werring and two goals from Hidy. The Bison outshot Widener 54-16 in the game.

Bucknell next traveled to Dickinson to visit the defending Mason-Dixon league champion. After a scoreless first period, Bucknell's Werring flipped a wrist shot over the glove of Dickinson goaltender John Neill to give the Bison a lead they would never relinquish. Goaltender Bill Gubing stopped 24 shots in the win, giving Bucknell the Northern division title for the second time in three years.

The run to the league Championship, though, came to an end at Georgetown. Bucknell outshot the Hoyas 24-18 and outplayed them for much of the game, but were victimized by penalties and mental lapses throughout the game. Three of Georgetown's five goals were power-play goals.

"We made some mistakes in the championship, and Georgetown made us pay for them," Hidy, the team's only senior, said. "It was a good season, though, and I'm proud of what this team accomplished while I was here."

Bill Gubing '98 shined in the divisional playoff finals against Dickinson, but his 13 saves couldn't lead Bucknell past Georgetown in the league Championship game.

Sports Trivia Quiz

1. Which active male tennis player has won the most tournaments?
2. What was the last season in which the N. Carolina men's basketball team finished out of the top three in the ACC?

BUCKNELL UNIVERSITY — LEWISBURG, PENNSYLVANIA 17837

THE BUCKNELLIAN

University adopts new billing system

BY KATHRYN ARDINGER

Bucknellian Staff Writer

Students may notice some changes in the ways that bills are issued as accounts receivable is converted to the University's new administrative computing system, BANNER. This conversion will take place on April 2.

Previously, two separate billing statements have been issued and students have been able to designate where they want each of those statements to be mailed. There was the "regular billing account" which included such bills as telephone, car fines and student health services. There was also a separate "semester billing account" which included tuition, room and board.

With the introduction of BANNER, these two statements will be consolidated into one statement, known as "the billing statement."

Students will have to determine where they want this comprehensive statement to be mailed and can do so by filling out the address form mailed to students this week. By neglecting to return the completed form, students can expect to receive the billing statement in their name at their home address.

Lori Wilson, assistant director of business services, said that "Yes, we have had calls and concerns" about the billing changes. They have mostly been questions, she said.

Other departments have already been converted or will be converting to BANNER throughout 1997. For instance, the admissions office currently uses BANNER to process acceptance letters for the class of 2001. Other departments such as the finance office will convert to BANNER over the summer months.

Colorado-based rock band The Samples will headline this year's Spring Concert. Guster and Aquarium Rescue Unit will also perform. Tickets are available at the Weis Center Box Office.

BSG signs Samples to headline concert

BY RACHEL DOEBBER

Bucknellian Staff Writer

A Dave Matthewsish sounding band, a Phish-like band and a band with a Toad The Wet Sprocket style all performing here one night? Sounds too good to be true.

This year, the University's annual concert features two opening bands, Guster and Aquarium Rescue Unit. The main act, The Samples, is known for such popular hits as *The Lost Children (A Slow Motion Crash), Anyone* and *Did You Ever Look So Nice.*

According to Neal Harrison '97, chairman of the BSG Student Concert Committee which chooses what bands will perform, The Samples are a pop-rock group with a style very similar to the Dave Matthews Band.

National study shows room for improvement in gender equity

University figures fail proportionality test; Hartzell cites continuing progress

BY BRETT TOMLINSON

Bucknellian Staff Writer

Despite ongoing efforts to improve gender equity, Bucknell's athletic program falls short of the proportionality standards for compliance to Title IX according to a recent study published in *USA Today*. Bucknell spends almost $3000 more per year on male athletes than female athletes, according to the *USA Today* figures.

The University is not alone in its problems with equity standards, however. Of the 225 colleges with Division I or I-AA football programs, only 16 have the percentages of female athletes to meet the reported standard.

In order to be considered in compliance, according to the *USA Today* report, the percentage of female athletes at a given school must exceed or be within five points of the percentage of its female undergraduates. Bucknell's undergraduate population is 50 percent female, but women make up only 38 percent of athletes.

"We're making progress every year," Director of Athletics Rick Hartzell commented. "We'll continue to make progress until we're in complete compliance with the law [Title IX], and hopefully that will be very soon."

The Patriot League posts a deceptively strong record in the study, with four of the seven league members meeting compliance. Of the four schools, however, three have extraordinarily low numbers of female students (Army, Navy, and Lehigh). Lafayette is the only league institution comparable to Bucknell which meets the proportionality standard.

"I think everybody is pretty much in the same boat as we are," Hartzell said. "If they have a 50-50 breakdown between men and women they all have the same issues that we have."

See TITLE IX, page 13

How Female Athletes Fare at Patriot League Schools

	Number of sports		Percentage of females		Total expenses per	
	Male	Female	Students	Athletes	Male	Female

Students long to be home for Easter holiday

BY TED BURNES

Bucknellian Staff Writer

So, it's that time of the year again. Time to color eggs in radiant pastel shades, dress in your finest clothes and wait for that large rabbit to make his annual appearance. Easter is this Sunday, and though it does not agree with the University's academic calendar, Bucknellians are keeping the tradition alive. Even though you may not be going home this Easter, grin and bear it—celebrate Bucknell style!

"I'm upset that I won't be able to go home for Easter this year," said Lisa Molinelli '00. "This holiday is a real family tradition, and it's a shame that I cannot be a part of it." Other students feel exactly the same way. Easter is one of the main national holidays that is not observed by the academic calendar. While many students blessed with automobiles will be traveling home for the holiday, many will not. Since Easter is so close to the conclusion of spring break, many students cannot find the time nor a ride home to spend the holiday with their families.

Easter is always hard to accommodate when looking at academic calendars because it changes yearly. Easter is celebrated on the Sunday after the full moon which occurs on or after the first day of Spring. Because the lunar calendar changes radically, it is hard to give people time off to celebrate this holiday.

"Easter [in the Christian church] changes year to year, and it's hard to accommodate," said Ian Oliver, the University's chaplain. "One must also look at Easter in terms of other religions as well. The orthodox Christians celebrate their Easter on April 27, and they rarely get time off for the holiday."

For those who spend the holiday here every year, Easter at the University is positive. "Easter is a time of beginning anew," said Father Jack Kelly, the University's Catholic campus minister. "Students spend the entire year with their new friends and family here on campus... here is an opportunity to celebrate with the people you live with."

So how do people celebrate this holiday here at the University? Kelly says that many people celebrate Easter in a more religious way than they do other holidays. "People go to church and

Wrestling rules inquiry continues

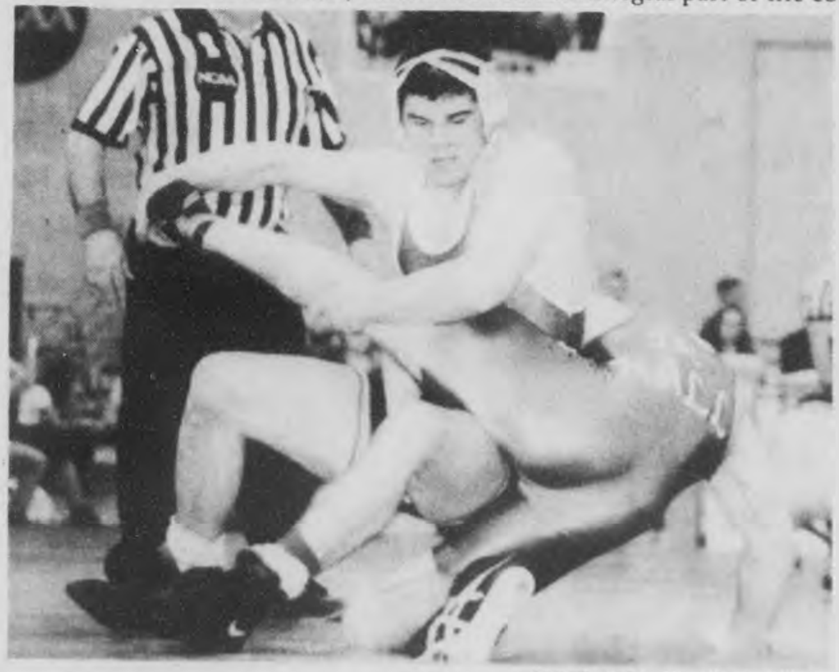
BY KARIN DAVIDSON

Bucknellian Staff Writer

The East Coast Wrestling Association Championships have come and gone, but the University's wrestling program and wrestler Mike Garcia '98 are still very much in the midst of a University inquiry.

Garcia obtained a preliminary court injunction March 7 which allowed him to wrestle in an NCAA-associated match for the first time since last semester when he was suspended indefinitely as a result of an inquiry into a potential violation of NCAA rules in the wrestling program.

Neither Garcia nor the University is able to comment on the status of the investigation, although unconfirmed reports suggest that the report compiled by the outside investigating company, Stier, Anderson and Malone, has been received by the administration. Garcia did say that he has been told repeatedly that the results will be available soon and charges will be produced.



Jonah Half—The Bucknellian

A court injunction allowed Mike Garcia '98 to wrestle in the season finale, but the investigation into the wrestling program continues.

MG101 innovator receives honor

BY ARGUN ULGEN
Bucknellian Staff Writer

The creator of the University's very own Management 101 program, which has been a model used by many other universities, recently was named the recipient of the Christian R. Lindback Professor of Management endowed chair. This title, given to those professors who make outstanding scholastic contributions towards the community in various fields of academics, was awarded to John Miller, professor of management.

Regarding the award, Miller said, "Of course, I'm delighted with the recognition, especially because it's mainly about teaching. It focused on the stuff I care about, 'untiring devotion to teaching, heartfelt commitment to students, and a lifelong quest to achieve classroom perfection through creative and inspirational teaching.'"

To celebrate Miller's achievement, an honorary dinner was held for him in the Bertrand Library's traditional reading room on March 11th.

Before becoming a professor at the University, Miller said he had a fruitful career, holding positions at a variety of schools, including the University of Rochester and Yale University. Yet, Bucknell is where Miller feels he is most successful in contributions to the academic community.

Miller said that his success "all goes back to MG101." In 1979, a year after he started his career at the University, Miller established its popular Management (MG) 101 course that requires students to form corporations selling items, such as the "Good Luck John" poster and Bucknell boxer shorts, to students.

Miller believes that this project is important since "it gives certain experience that textbooks don't present. Students learn how to work together efficiently through this project. They get a feel of what's to come in their careers."

Miller's MG101 course has not only been an asset to the management department at Bucknell, but has also been beneficial to other universities across the country. Miller has given speeches about his course to various colleges, many of them adding Miller's corporation project to their management course offerings.

Articles promoting Miller's MG 101 project have appeared in such publications as the *Journal of Management Education* .

Miller said "I love what I'm doing. I can't imagine a job that's more fun than the job that I have. Every company in my course creates something new and exciting, and we learn from it. Also, I'm the only person I know who has been 'chairman of the board' of 130 companies at one time."

Miller said he also takes pleasure in seeing his past students benefit from the course. He notes, probably not coincidentally, that "there have been 22 MG101 marriages since I have started teaching at Bucknell." Miller regularly receives letters from his past MG101 students, many who are now presidents of "real" companies.

All money, approximately $100,000 since MG 101 was implemented in 1979, raised from its various companies goes to area charities and service projects.

Miller said that he sees the Christian R. Lindback endowed chair as "important for someone who knows about the academic world."

Dinner set to commemorate King

BY REBECCA KLINGLER
Bucknellian Staff Writer

The sixth annual Martin Luther King Jr. Commemoration has been designed to encourage people to honor the civil rights hero through action within the community.

Entitled "Honoring Through Action," the no-cost event will celebrate Martin Luther King's achievements through speakers, performers and a community service pledge.

The event is centered around the time of King's assassination on April 4, 1968 instead of his birth and national holiday for several reasons, said Kristin Skarie, director of student activities. More students are on campus in April than in January, and the type of event creates a more serious atmosphere.

"It is a more reflective, serious event—a commemoration instead of a celebration—time to think of how and why he died and what we have done since then to keep his dream alive," Skarie said in an email interview yesterday.

"We hope this event will motivate the student body to get more involved with Bucknell, the Bucknell community, understanding diversity and understanding other parts of Martin Luther King's life other than the 'I have a dream' man,'' said Lorene Johnson '98, a member of the Martin Luther King Celebration Committee.

The commemoration began six years ago as a luncheon in the Terrace room. Since 1995, the committee has organized a dinner to make it "more meaningful," Johnson said.

Along with a buffet, the program includes a poetry reading by Mike Weaver, the poet in residence, and a keynote address entitled "The Inconvenient Hero" by Glyne Griffith, assistant professor of English.

"When we think of Martin Luther King, it is convenient to remember that he wanted blacks and whites together... This is a convenient 'feel good' image to hold on to," Skarie said. "In truth, Martin Luther King is an inconvenient hero in that he stood for much more than that and for things that at the time were unpopular, difficult and uncomfortable."

Other speakers will include President William D. Adams, Skarie, Johnson, Eric Polite '97 and Lisa Frye '97.

Kaycee Mitchell '97 will sing the Black National Anthem. Two Past Midnight and Voices of Praise will also perform.

Those attending the dinner will have the opportunity to sign a community service pledge. Participants will also be able to give donations, and students with a meal plan may choose to donate the cost of their meal. All contributions will go to the Southern Union County Supplemental Food program, a local food bank.

Only 150 people can attend the dinner, and so far 100 people have signed up.

"It's a great event and I hope it gets students to... get more involved in Bucknell and the community surrounding us," Johnson said. "I've had a great time organizing it the last three years, and I think it gets better each year, with more student involvement."

To sign up for the event, contact the Office of Student Activities by March 31.

PUBLIC SAFETY LOG

March 17, 1997

LARCENY—A Public Safety Officer received the report of a bicycle removed from the bike rack at the Langone Center, where it was locked.

LARCENY—A Public Safety Officer was notified by an employee that a copy of a key was found during room inspections in Roberts Hall.

POSSESSION OF ILLEGAL AIR GUN—A Public Safety Officer was notified by an employee that an air gun was found during room inspections in Harris Hall.

SUSPICIOUS ACTIVITY—A University employee reported to Public Safety that a large four-door vehicle stopped, for no apparent reason, on the Seventh Street hill. One of the four male occupants spoke to the employee, who found the situation to be suspicious.

March 18, 1997

LARCENY/MISSING PORTRAIT—A University employee reported to a Public Safety Officer that a portrait was missing from the lobby of Coleman Hall. The East Buffalo Township Police Department was notified and the incident is under investigation.

March 19, 1997

TRANSPORT—A Public Safety Officer responded to the Biology Building for the report of an ill visitor. The individual was transported to Evangelical Hospital Emergency Room for treatment.

March 21, 1997

INFORMATION/UNAUTHORIZED USE OF COMPUTER FACILITIES—A University employee notified a Public Safety Officer that a group of individuals not affiliated with the University were using the computers in the Dana Connector Lab. The individuals were identified and requested to leave the property.

March 23, 1997

INFORMATION/FIRE BUCKNELL WEST—A Public Safety Officer responded to a fire alarm activation in Bucknell West. A partition in the living room area was found to be smoldering. The William Cameron Fire Co. responded and extinguished the fire. The fire resulted in minor damage. The incident is under investigation.

March 25, 1997

INFORMATION—A Public Safety Officer responded to Theta Chi Fraternity for the report of a burned letter attached to a student's room door. The incident is under investigation.

March 26, 1997

INFORMATION/HIT & RUN—A University student reported to a Public Safety Officer that his vehicle was damaged while it was parked illegally on Coleman Road. The incident is under investigation.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

Physical plant removes controversial sculpture

BY BETH MARTIN
Bucknellian Staff Writer

The Physical Plant removed the sculpture in front of Swartz Hall yesterday morning due to complaints from the Swartz Residence Staff and Residence Hall Association that it did not complement the University's architectural style.

Jim Wiltgen, assistant director of Housing and Residential Life, said that the University is "looking at options" to replace the sculpture, but "no formal plans" have been made yet.

Victor Arcelus, Swartz resident director, said the Physical Plant presented a sketch of a possible plan for the area to the Swartz resident assistants Tuesday night. Arcelus described the sketch as "a little patio with a walkway... a square area with benches and trees and bushes."

Ryan Ural '98, an RA in Swartz, said "it is a pretty nice area that they have planned."

Arcelus and Ural led a movement last semester to rid Swartz Hall's front lawn of the sculpture.

Ural first presented the idea to the RHA, receiving their "full support." After also receiving support from Swartz RAs and many residents, Ural wrote a memo, which he and Arcelus sent to several administrators on Nov. 6.

According to Wiltgen, Richard Chapman, Dean of Students, "did all the necessary checks with the sculptor and donor and made sure it was okay."

Arcelus said the sculpture has been the subject of complaints "for many years, but nothing was ever done before."

The Bucknell Landscape Master Plan, prepared by the Halvorson Company in 1990, advocated the removal of the sculpture. The report said "Some (sculptures) appear to detract from the landscape," and cited the sculpture in front of Swartz as being "particularly questionable."

Arcelus said he was "ecstatic" when the statue was removed yesterday.

Ural said, "I was pretty happy to come back and see it gone. It really didn't seem to fit in with the building—it looked like it was from the 1970s and it was yellow and ugly."

Many Swartz residents expressed approval of the decision.

Amy Yule '99 said, "It was really hideous, and it made Swartz look awful. I'm really glad it's gone."

Others Swartz residents had no opinion, many never even noticing the existence of the sculpture.

Miriam Lopez '99 said, "I didn't even notice the sculpture in front of Swartz. How could I say more?"

THEATRE

from page 1

deepest well in town, Stiefel said.

Two years ago, there was a severe snowstorm and the heavy snow weighted down the flat roof of the theatre, damaging the interior ceiling by knocking out pieces of plaster, Stiefel explained.

Repairs to the theatre's ceiling are currently under way and Stiefel said that the painters estimate that the painting will be completed in two weeks.

Preserving the original paintings on the ceiling is an intricate task, because it is difficult to match the colors of paint which have faded over time. Stiefel compared the color matching process to that of matching DNA.

Despite the renovations, the theatre will not be closing down. As Stiefel explained, different sections have been closed off depending on where the painters have been working.

Built by Stiefel's father-in-law and his three brothers, the Campus Theatre on Market Street was one of 11 theatres in Pennsylvania that the Stiefel family operated over the years.

Stiefel's late husband, Harold Stiefel was a freshman at the University in 1941. Her husband was actively involved in the University, as the advisor to Sigma Alpha Mu for 35 years and as member of the alumni board.

Kappa Sigma to sponsor Third Annual Career Day

BY JESSICA LODATO

Kappa Sigma fraternity is sponsoring its Third Annual Career Day, open to all members of the University Community.

There will be six speakers from several large business and engineering firms. The presentations will focus on job and internship opportunities and how to take advantage of them, as well as the recruiting process.

Mark Kerr, director of the University's Career Development Center, will apply new ideas offered by the speakers to improve University resources in aiding students through the job-hunting process. At the Career Day, Kerr will comment on what the center has to offer to University students, including help with résumés and interview styles.

"The overall goal of the day," said Brian Vendig '98, president of Kappa Sigma, "is to have experienced professionals, who have been through and know about the job process, advise students first-hand on what to expect and how to seize present and future opportunities. Hopefully, this will give students a realistic view of the world they are about to enter and how to use Bucknell resources to apply what they have learned."

Kappa Sigma intends to focus on getting more first-year students and sophomores involved in its program by contacting Residential Halls and RAs in hopes that they will make Career Day a hall event.

Special invitations have been sent to the deans and to administrators, as well as presidents of all the sororities and fraternities. The Alumnae Group Council will also be asked to join the event. Kappa Sigma encourages all to attend and get a head start on the future.

The day has been designed to benefit University students. Kappa Sigma has revised its usual Career Day program in order to improve the quality and quantity of information given on this day.

The program will be held from 12 to 3 p.m. at the fraternity's house next Saturday. Lunch will be provided for all guests.

Campus Briefs

Modifications Made in Format of Trustee Access Day

The format for this year's Trustee Access Day has been modified from the one used in years past. For the majority of the day, trustees will visit with students and faculty in Environmental Studies and Biochemistry programs—the chosen programs for this year. Unlike years past, there will be a limited amount of time for individuals in the campus community to gather informally and privately with trustees.

The annually held Trustee Access Day is scheduled for Friday, April 11. Those interested in scheduling meetings can contact Joan D'Angelo in the Office of the President at extension 1511 before April 3.

Entries Sought for Smithson Prizes

The Julia Fonville Smithson Memorial Contest, which honors two University students who show excellence in writing, is accepting poetry and fiction entries via the English Department until April 11.

The two prizes, one given for poetry and the other for fiction, are $50 each and will be presented on May 13 by the English Department.

Smithson, a 1976 graduate of the University, was an English major. On May 13, 1977, at the age of 23, she died from injuries sustained in an automobile accident.

Charles Perez Will Host Bucknell Talk Show

Tonight Charles Perez, host of the nationally televised *Charles Perez Talk Show,* will lead a discussion called "Bucknell: The Gender Issue" at 7 p.m. in Vaughn Literature Auditorium.

All University students are invited to attend the dialogue among students, faculty, and administrators.

"Bucknell: The Gender Issue" will not be nationally televised.

Lewisburg Gets New Chief of Police

The Lewisburg Borough Council recently voted unanimously to appoint Ron Kerstetter as Chief of Police.

Kerstetter, who has served on the force for 25 years, has been serving as acting police chief since last spring when Chief Donald Heiter became ill. Heiter died in December.

Lewisburg to Get a New Park

The Lewisburg Garden Club with the help of private donors will construct a small park between Zoink's Coffee House and the West Shore Railroad tracks on Market Street.

The 18 feet wide by 157 feet long space was donated by Julia Sanders of Lewisburg in memory of her husband, Richard, who owned the rail line.

The plan is to build the park in stages as funds become available and it is expected to be completed by 1999, the 50th anniversary of the Lewisburg Garden Club.

Family Planning Services

- birth control
- pregnancy testing/ options counseling
- confidential
- STD testing/treatment
- annual Pap tests & breast exams
- education

What is Depo-Provera®?
Depo-Provera® is a relatively new birth control option for women. Injections or "shots" are given at 12 week intervals. Depo-Provera® is over 99% effective -that's even more effective than the pill. And it's available at SUN Family Planning. Call us for more information.

Inefficiency of inquiry unfair to wrestler

Mike Garcia, one of our University's star wrestlers, was finally able to compete in his sport two weekends ago at the ECWA tournament after acquiring a court injunction the day before the match.

Mike has not wrestled in an NCAA-associated match since last semester, and it's not because of an injury. It's not because of academic probation. Mike hasn't wrestled because the entire wrestling program is under inquiry. He has lost one quarter of his collegiate wrestling career.

Same old story. Administrators cannot speak to reporters because the investigation is continuing. Mike cannot tell his story because his lawyers advise him not to. No one is quite sure what the issues at stake are, but that's not the real problem at hand.

The problem is that a student at this University has not been permitted to wrestle during an inquiry into this unnamed situation. It doesn't seem quite fair that no matter what the outcome of the investigation, Mike will have already been punished. Understandably, investigations take time and we can assume that this, as any investigation, is appropriate in how and why it is being conducted. But there needs to be some consideration of the student in the process. Supposedly the results of the investigation, which was conducted by an outside group, are available, yet the administration has not assessed the outcome and made any decisions.

For Mike, it cannot be a situation conducive to academia. It must be exhausting to be continually told that the ruling will be made in several days, but never see it happen.

Mike is not the only one suffering in this ordeal, even though he seems to be the target. It must be difficult for the entire wrestling team to have the inquiry constantly on the mind and to see a teammate watching on the sidelines, knowing he won't be wrestling.

The concept of suspension is common and inquiries seem to pop up everywhere. The problem does not lie in the procedure or the reasoning for the procedure at this point. Right now the problem lies in the inefficiency of the inquiry.

LETTERS

Computer networking policy fine as is

To The Editor:

The editorial on March 6th praised the new installation of network into dorm rooms but at the same time condemned having to pay a fee for the service. The time tested saying "you don't get something for nothing" is true, and free technology is without a doubt an oxymoron.

With all these recent decisions being made for us, we should welcome the chance to control where our dollars are going. It is an advantage to know what you are paying for, and if you don't believe it's worth the cost, then don't subscribe. It's that simple. There is no easier way to make your voice heard then when you invest your money. But the best part about it is that the people who are using the service are the ones paying. If you think it should be "free" you are just fooling yourself, because you can also watch the price of housing rise $130 a year. Somebody has to pay for it, and the "free" way would end up being the whole campus, instead of the individual users.

The truth is that network is still a luxury, comparable to cable television. The campus cable policy is the same as the new network policy: if you have the means of getting it and you want it, you buy it. We do need electronic mail to keep in touch with professors and the like, but the university provides more than adequate labs for that purpose. If you think that it's too far to walk to the lab or possibly wait in line for a few minutes, then you should probably pay the $65 per semester fee.

Computer technology is changing continuously, and owning a computer means investment. Hopefully, if you buy a computer you are aware of this, or you will be gravely disappointed a few years from now when your machine is for the most part obsolete. If you can afford a computer that can handle the blazing network speeds than you can also probably afford a relatively small fee (compared to other providers) for network.

You may not be aware that network connections also require a bit of maintenance. Protocol addressers from your computer need to be handled, and there is always upgrading and troubleshooting the many problems that may occur so that you can stay on-line as long and as fast as possible. Not to mention the fee to the initial service provider. So if you want to ride on the expressway, either pay the toll or find another route.

Organizations are not intended to promote diversity

Pro-heterosexual student group at State College has a Constitutional right to assemble

To the Editor:

I would like to continue the discussion regarding the recent Penn State decision to deny a charter to the group called STudents Reinforcing Adherence In General Heterosexual Tradition, otherwise known as STRAIGHT. My concern is that a great number of organizations are misrepresented today, as I assume STRAIGHT has been. I wish to address this much broader issue of how people, and more specifically organizations, who hold beliefs based on universal truths can operate in a diverse and increasingly politically correct society.

STRAIGHT was faulted for not holding or accepting "diverse" beliefs, yet it was their very purpose which did not allow them to hold more inclusive viewpoints. Many organizations are caught in similar snares. The problem stems from the idea that absolute truth exists. Absolutes define right and wrong, and this is foreign to most of academia, which tends to champion relativistic paradigms. Absolutists and relativists both want every individual to choose and act according to what the individual thinks is right and proper. The difference is that absolutists claim that some decisions have universal right and wrong answers. As a result, relativists bombard organizations holding such views with accusations of intolerance.

The understanding of this conflict is extremely deeply rooted but not difficult to understand. Allow me to use an engineering example. Dimensions are always given with a tolerance value. For example, a hole should be one inch in diameter give or take one-hundredth of an inch. In this case, the tolerance value is two one-hundredths of an inch. If a hole could be made perfectly, the tolerance would be zero. Now apply the example to the current conflict.

If an individual knows an answer absolutely, they have no uncertainty, they could be called intolerant. Remember, the definition of absolute is perfect. The origin of this conflict may be important to keep in mind, but the real question is how to solve the conflict. Penn State chose to deny the charter. Is that always the right answer? Is that ever the right answer? I believe that groups such as STRAIGHT are obligated recognition and equal treatment.

There is one specific point presented in a past issue by Mary Wyeth and Lara Plaskon that I disagree with.

Wyeth and Plakson claim that STRAIGHT need not be granted a charter because the heterosexual lifestyle is practiced by the majority of the population and the group would not increase the diversity level at Penn State. Unfortunately, they fail to recognize the purpose of organizations. Organizations do not exist to increase diversity, but rather to provide support, comfort, and/or opportunities for its members as they live, work and serve. The same logic would abolish all abused women groups because almost three out of every four women will, tragically, be victims of violence. Women's groups do serve a purpose, but it is not to increase diversity. In the case of STRAIGHT, the organization could serve to support a group of people that is trying to hold to its principles in a politically correct culture.

It is fundamentally important to recognize that two forms of intolerance exist: intolerance toward individuals and intolerance toward ideas. I am by no means advocating intolerance toward people. I am, however, stating that intolerance toward ideas must be recognized as rational, reasonable and even acceptable from those individuals and organizations holding beliefs based on absolutes.

In some cases, arguments can be made that an individual's beliefs are a part of them and that condemning a belief constitutes condemning an individual. Individual condemnation may be a consequence of absolutes but it is not the intention. Remember, individuals choose which beliefs they hold and why. As a consequence, their beliefs may include ideas which are condemned by others. Some people claim that homosexuals did not choose any preference so the previous argument is void; but the question of whether or not sexual preference is a choice is not the intention of STRAIGHT. The issue deals with the conflict between the two beliefs that homosexuality can or cannot be determined as right or wrong.

The source of absolute truth need not be recognized for an organization to deserve equal recognition. The First Amendment of the Constitution protects STRAIGHT's right to meet and hold unique, intolerant views. Remember this principle of absolute truth next time you hear someone say that right and wrong must be left up to the individual. Many people and upstanding, diverse organizations hold beliefs that are based on absolutes.

Graduate student's advice to Bucknell: "To thine own self be true"

To the Editor:

While glancing over last week's article on the proposed addition of campus security call boxes, I was struck by the lone quote from Tracey Gray, BSG president. Gray wàs quoted, "It's a security measure that many of our frame-of-reference schools have." Taken in context, what Tracey said is perfectly logical. Many schools and organizations research and investigate how others in their field are operating, hoping to draw upon their experience and improve their performance.

Unfortunately, this seemingly harmless remark symbolizes a deeper problem that Bucknell faces: our obsession with "frame-of-reference schools." As an institution, we seem to be so extremely concerned (even overtly) with being like everyone else. Over the years, I have seen the term "frame of reference" appear numerous times, most notably from the termination of Jan-Plan three years ago. It has also been used in the letters from University Presidents explaining tuition increases that are below, percentage-wise, other frame-of-reference schools. This frame-of-reference mentality effectively masks objectivity and blurs our ability to understand things in perspective. For example, private school tuition (Bucknell included) has increased more than twice the rate of inflation from the early '80s into the '90s for few apparent reasons. Yet in comparison to our frame- of-reference schools, we seem to be doing great.

But back to the call boxes. Don't get me wrong, by no means am I advocating that Bucknell should not invest in them (I happen to like the idea), nor would I suggest that we close our collective eyes and not examine what other universities are doing. Rather, I would like to see Bucknell concentrate more of our pride and energy on our uniqueness. For certain, there is no place else like it: the rural character of the Susquehanna Valley (read: interesting smells); the successes of our student-athletes; the inexplicable number of Saabs on campus; the driven students, engaging professors and friendly staff; and the sight of our gorgeous campus when the cherry blossoms bloom. Unfortunately, I have seen too many unique aspects of Bucknell fall by the wayside because other "comparable schools" do it another way.

Instead of drowning in the sameness with other schools that are supposedly similar to us, we should reward innovation and creativity within our ranks. By purging ourselves of the unwritten mission of homogeneity and conformity currently plaguing both the administration and the students at many levels, Bucknell can only benefit. Let's take a lesson from Robert Frost and take "the road less traveled by." So when Bucknell and Bucknellians make decisions concerning the future plans and policies of the university, let's examine the.options that other schools are doing but, above all, strive to be unlike other places. Let's attempt to hold on to things that make us distinctive from other places. For, as we all know, being unique makes "all the difference."

Cloning: Students offer differing perspectives

Genetic cloning does not respect society's wondrous human diversity

By Nora Daniels
Bucknellian Staff Columnist

I've decided that I'm all for cloning. See, I really want a clone of Tom Cruise to call my own. I have it all planned out, and there's even an empty space in my life that he'd fill. Oh, and I also want a few clones of my favorite professors, the ones who gave me A's. I've thought about this, and have decided that a great love life and great grades will help me have a wonderful life, now and in the future.

There is, however, a tiny grain of doubt about cloning floating around my head. What if my clone of Tom is more like Tom Arnold due to some freak of science? What if all of my favorite professors turn out to be like that one who felt 8 a.m. examinations were a good idea? Maybe I should reconsider this cloning deal...

Let's see. Part of what makes the world so incredible is the diversity of human beings. Not only are there differences between races and ethnicities, but even those of us who look relatively similar and have lived similar lives are different in unique ways. Each and every person on Earth is an individual, unlike everyone else. If we were cloned, this distinctness would be lost, and suddenly, I have a feeling, there would be more than just one clone of Tom Cruise for me.

Part of what makes him so special, and everyone else too, is that he is unique, and his looks, personality and wonderful eyes are his alone.

There are definitely times when I'd like to be in two (or more) places at once, but in reality, if I had the choice whether or not to be cloned, I'd refuse. And though there are many people whom I'd love to have a clone of, I guess that if it came down to it, I'd reject those clones as well.

I love the variety of people I know, and life just wouldn't be as wonderful if all my friends were homogeneous, cloned images of perfect people. Variety is the spice of life, I've heard, and it's true. I don't want to lose that spice, not even for my own Tom Cruise or professors who give me A's. I guess I need to be exposed to professors who are challenging, and who won't give me that A unless I work for it. And besides, Tom is short, too short for me.

So I guess that cloning is not going to help me with my life, and I think that it really won't help anyone else, either. Right now, animals are being cloned by scientists. In the future, I hope that rational humans will reject the cloning of humans, no matter how appealing it appears on the surface.

Cloning presents both potential benefits and dangers for mankind; safeguards against technological abuse are necessary

By Toby Anderson
Bucknellian Staff Columnist

Currently we are facing one of the toughest ethical dilemmas since the decision to create the atomic bomb. Then, as now, we were faced with a decision that would fundamentally alter our lives and future generations' lives in ways we could not possibly imagine. The long term effects of cloning technology are, quite obviously, thoroughly unknown. However, it is clear that the cloning technology is similar to the atomic technology in its myriad of possible detrimental uses. We have a method of ridding our society of societal and personal problems, previously unsolvable, and simultaneously creating innumerable new problems.

Advocates of unrestricted technological development claim that every new discovery can be misused. It is not society's problem that the technology is misused; it is the problem of the individual who misuses it. We can not allow a sick random individual's actions to keep us from bursting through new scientific frontiers. This is an argument that dates back to the Age of Reason, but it is based on the premise that reason and knowledge are the highest good. This is a flawed position. There are priorities higher than the laws of the rational and scientific world. While I don't completely disagree with the increasingly rapid rate of technological advance, I do approach the issue with considerable reservations. Too often we pursue and discover technology without putting appropriate safeguards on its use. We have run precisely into that problem now.

That cloning is possible has been a fact for many years, yet we are just now doing studies on the implications and possible regulation of the technology. Yet another example of the shortsightedness of our governmental leaders. Only when the issue becomes a headline do they finally decide to take some modest action. The implications cloning has for the future of our society are quite frightening and deserving of serious thought. The possibility of harvesting organs from a brain-dead clone, while probably highly illegal, is absolutely frightening. Furthermore, just because it is illegal doesn't mean that it won't happen on a widespread basis; in fact, the illegal market for donor organs provides ample evidence of the opposite effect.

One of the key problems in the situation with cloning is that our policy-makers were taken by surprise and did not have time to study and regulate the experimentation of cloning technology once they realized its significance. Because our policy-makers tend to be so shortsighted, they need to establish a foresighted mechanism to give them breathing room and time to create informed positions on the technology being discovered. A law needs to be passed that categorizes discoveries and experiments in certain fields as national security issues. Then the experimentation will be paused after reaching a certain critical point, until the government has had enough time to research it and assess the need for regulation.

While the advancement of technology is inevitable, we need to prepare our society for the Frankensteins of the future. It is absolutely irresponsible of our society to let technology that has such far-reaching implications advance unchecked and without critique. Remember, we make our own bed and, sooner or later, we are going to have to lie in it. We split the atom, and now two cities have been obliterated and many ecological systems have been contaminated by the unchecked advance of technology.

Life of Guevara example for Bucknellians

By Charles Sackrey

As others have in the past when confronted with disputes over inalienable rights, we need the strong witness of Che Guevara to help us resolve the alcohol debate between the senior class (and most other students) and our president. Why Che Guevara, who Walter Mondale (candidate for the U.S. Presidency in 1980 and 1984) once called "the most despicable man in the Western Hemisphere"? Let's look at the debate.

On the one side are the seniors, who quite simply must be seniors: after four years of what many apparently consider repressive tolerance at best, grinding opposition at the worst, understandably demand the right to establish the conditions of their final drink together. It is, along with the pursuit of the life, liberty and a job, an inalienable right of the student graduating from an expensive, exclusive university.

On the other side is "the president" who quite simply must be presidential: he must exert control over situations that might reflect badly on the institution or on himself. Our particular president is under the steely gaze of 30 or 40 trustees. It must be hard for these trustees to tolerate their own president suffering angry and dismissive criticism during his (as presidents are now given to say) "watch." Thus, a president's inalienable rights include that of having the presidential will be done, without being subjected to a cacophony of contumacious carping.

With the two seemingly justifiable and unwavering stands being taken, we ask ourselves "What can we do?" And that's where Che Guevara comes in. Che was an Argentinian who lived from 1928 to 1967, when he was murdered by Bolivian police trained by the C.I.A. Che was also a doctor who happened to be in Guatemala in 1954 when the elected government there was overthrown by Guatemalan military forces trained by C.I.A. agents. Conditions were so horrible for most Guatemalans in 1954, Che committed himself to their liberation along with that of all oppressed people everywhere. And, for the next 13 years he fought with guerrillas against military dictators in Cuba, Angola and Bolivia. Even though Che had frequent disabling attacks of asthma, he became a famous guerrilla leader known for fearlessness in combat. He was also known for fair treatment of the men and women who served under him, comrades who enjoyed Che's courses in politics and economics during forgiving lulls between battles.

Che Guevara was spurred to rebellion by the fact that so many people in the world were denied their own inalienable rights to food, shelter, medical care and the things people need to feel their life has dignity and purpose. Along with fighting dictators, Che tried to imagine and help to build societies which would encourage men and women to organize themselves with equality and dignity, societies, by the way, which ideally would be without presidents or without universities which are exclusive and privileged. These societies would be governed by the love of freedom rather than by jockeying for position among those on top and those below them.

Now maybe it's clear how Che's witness can help us: His actions concerning the rights of billions of genuinely oppressed people might encourage students and our president to resolve their differences, to struggle less over drinking rights and more on behalf of the inalienable rights of people greatly less privileged than they are. As an added bonus, growing concern about oppressed people on the part of our students might encourage some of us on the faculty to spend less time worrying about various contradictions in our own working lives (the merit system and publicationism, for instance) and more about things that truly matter to the larger human community.

Much at Bucknell depends, it turns out, on whether we're willing to let Che Guevara lead us out of the darkness.

Resist the allure of athletic scholarships

Rise in athletic accomplishments not worth University academics

By Samuel Feeney

Just a few months ago, the Patriot League's Presidents voted to allow athletic scholarships for basketball. Although they ratified the movement, Bucknell, Colgate and Lafayette have decided to abstain from using athletic scholarships to improve their respective basketball programs. In light of the recent Patriot League Championships and the fervor of the NCAA basketball championships, this is an issue that needs to be addressed. Does Bucknell need or even want a Sweet Sixteen-caliber basketball team?

The whole issue of basketball scholarships was brought about by Holy Cross. They were once a well-known basketball school, with alumni the likes of Bob Cousey. However, without scholarships, they have fallen from the ranks of the nation's elite. They believe that basketball scholarships will improve their program, and in turn give the school more national exposure. However, many disagree with that hypothesis. While it is a given that UCLA, Kentucky, UNC and Michigan are famous, big-name schools, so are Harvard, Yale and UPenn. The difference is name association. Most of the large sports schools are also very competitive academically. However, they gain the majority of their recognition through television coverage and sporting goods stores. The Ivy League schools, on the other hand, have earned their reputations by being excellent academic schools. They are not athletic powerhouses, but Princeton and Penn are perennial NCAA basketball contenders. Bucknell itself defeated Arkansas two years ago and was tied at the half this year at Penn State, both big-time athletic schools. The main reason that Bucknell, Colgate and Lafayette did not choose to allow basketball scholarships is their common goal to be accepted into the Ivy League. The schools of the Ivy League believe that by offering athletic scholarships, the prestige of the school will be lessened. This is also the feeling at Bucknell. By paying athletes to play basketball, there will most likely be more national recognition. However, with scholarships come the problems of student-athletes not making the grade here, and potential students being denied admission to make room for a less qualified, but more athletic student.

Another issue raised when discussing the Patriot League's decision is, what about the other sports? Why does only basketball get to have future professional athletes? Why aren't there more opportunities for our Patriot League Champion football team to have a Steve Sarkisian or an Orlando Pace? The Patriot League Champion in soccer was just awarded an automatic bid to their "big dance." Why not give them an opportunity to put us on the map by taking the national championship?

It is not that I wouldn't love to see the Bison beat Kansas and get into the Final Four. All athletes who compete at the Division I level are exceptional, especially at Bucknell where the academics are much more aggressive. However, the cost of giving preference to the athletic programs over the music or art departments is too great a risk for Bucknell's reputation. Although we may receive a record number of applications as a result of our athletic accomplishments, we could end up lessening our academic abilities by accepting the student with the sub-4:00 minute mile and rejecting the student who will win a Nobel Prize in Literature. The future of Bucknell hangs in the balance. It is for that reason that we must not act with haste. We must conserve the one thing that has taken us this far—our academics supplemented with sports and partying. It is the emphasis on academics that will propel us into the next century and into the Ivy League.

Peace, education is a pointe for Dance Art

Three-member group mixes traditional, modern Chinese dance

BY DAVID CARPENTER
Bucknellian Staff Writer

In only the third tour outside of their native Hong Kong, the three members of Dance Art of Hong Kong bring a mixture of traditional and modern Chinese dance to the University classrooms and the stage.

Consisting of members Yvette Huang, Francis Leung and Andy Wong, Dance Art's mission is to "promote dance appreciation in Hong Kong through education," said Amanda Cheng, the company manager.

"We believe through dance education and workshops, more people will understand modern dance," she continued. "The classes can teach an understanding of modern dance to the community."

The dancers have been at the University all week teaching dance classes and preparing for their performance this Friday. The performance consists of four pieces that have been choreographed by and star the three members.

The first piece, *A Journey in Solitude*, features Leung who uses many Chinese elements in his dance to tell the story of a man who is going back home and the memories he encounters on his journey.

The next piece, entitled *Remembrance,* was choreographed by Huang, who uses Chinese steps and movement along with a special costume to relate the story of a girl who finds memories of the past.

Shadow Box has two parts and was inspired when the dancers were trying to rehearse in their small apartment on the outskirts of Hong Kong. Their neighbors were fighting while playing the Chinese game of mahjong and the dancers decided to do a piece about fighting.

In the second part of the piece, Wong performs a solo dance where he explores themes of mortality.

The final piece, *The Regeneration From the Sterility*, is choreographed by Leung, and all three of the dancers perform. It is the only piece that is completely modern dance. This four part piece looks into the idea of human relationships, specifically couples.

Danna Frangione, professor of dance and director of the Bucknell Dance Company, met Wong, who is the artistic director of Dance Art, while she was working in Taiwan.

"He came from the CCDC, which is the Contemporary City Dance Company of Hong Kong, the largest professional modern dance company in Hong Kong," Frangione said.

The CCDC is known for elaborate staging techniques and amazing dancers. After Frangione met Wong, he broke from the CCDC and formed his own company.

"I knew what amazing dancers they were and brought them here," she said.

Formed in 1993, the dance troupe "is dedicated to promote world peace and community conscious through organizing public performances and workshops for different community sectors," as the company's program says. Alhough the company is small in numbers, its three members have dedicated the mission of Dance Art of Hong Kong to educate the community.

In Hong Kong, Dance Art does a great deal of community service. The dancers have an outreach program that takes modern dance to minoritie, disabled people and those in mental and children's hospitals.

"They take their art to people who would normally not have the time or money to go and see modern dance," Cheng said .

She added "They design the program depending on the audience. The feedback we get is good, because dance helps these people open up to themselves and others more."

In addition to classes, the dancers teach lecture demonstrations on Chinese dance and modern dance.

The performance begins at 7 p.m. Friday in Tustin Studio Theatre. A $2 donation is requested at the door. For more information, call the Department of Theatre and Dance at extension 1235.

Dance Art, a three-member group comprised of Francis Leung, Yvette Huang and Andy Wong, is only on its third tour outside of Hong Kong. The three dancers taught classes this week , as well as rehearsing for a four-piece performance to take place at 7 p.m. tomorrow evening in Tustin Studio Theatre.

Dance Art mixes traditional and modern forms of Chinese dance with the mission of promoting "world peace and community conscious," as the company's program says.

Movie Review:

And the Oscar goes to...

BY CHRIS NICHOLS
Bucknellian Staff Columnist

And this year's Dances With Wolves award for the most awards won goes to *The English Patient*. I suppose I shouldn't complain, I gave it an excellent review. On the other hand, I think there were some films out there that didn't get recognized as much as they should have.

BEST PICTURE

The award went to *The English Patient*. This was one of the awards over which I was most torn. I really would have liked to see*Shine* get it. It was such an excellent movie, and so well done with such high caliber acting. Likewise, *Fargo* would have been an equally good choice but there can only be one winner. *Jerry Maguire* was the one film there that I thought didn't deserve the award. It was a good film but simply outclassed by the competition.

BEST DIRECTOR

Winner: Anthony Minhella (*The English Patient*). By this point in the evening, it was a given. Forman's already won one, Coen already had won for Screenplay and *Shine* had just taken Best Actor. I suppose it was to be expected. It was a night for *The English Patient,* that's for sure. I suppose the movie deserves it, but that scene in *Shine* when David Helfgott is playing for the concerto contest and passes out is some amazing directing. I almost think Scott Hicks deserves the award for that scene alone.

BEST ACTOR

The award went to Geoffrey Rush and I couldn't be happier. The contenders were all really good for this one as well, but I think Rush did the best job in *Shine*. Tom Cruise, I felt, was the weakest of the candidates. My second choice would have had to be Woody Harrelson for his performance in *The People vs. Larry Flynt*. I enjoyed Fiennes in *The English Patient*, but the others just seemed so stellar to me that I wouldn't have given it to him.

BEST ACTRESS

The award went to Francis McDormand for her excellent role in *Fargo*. This was another choice that I couldn't even begin to contend. She did such an amazing job that I couldn't have seen the award going to any other actress that night.

BEST SUPPORTING ACTOR

The award went to Cuba Gooding Jr. for his role in *Jerry Maguire*. I liked Gooding in it but I didn't feel his role was Oscar-worthy. If the Academy was going to go with a newcomer, why didn't they choose Edward Norton? His acting in *Primal Fear* was absolutely flawless. If he didn't have you fooled, I'm surprised. Likewise, William H. Macy was astounding in *Fargo*. The least worthy actor in this category would have to be James Woods. He did a fine job but it certainly wasn't Oscar caliber. I can't believe he was nominated in place of some of the fine acting this year.

BEST SUPPORTING ACTRESS

Winner: Juliette Binoche. This was another award that I was totally pleased with. For anyone who has seen her perform in *Red*, it's clear that *The English Patient* was no fluke. She did an excellent job and was well rewarded for it. That dress on the other hand...

SCREENPLAY (ORIGINAL)

Winner: Ethan and Joel Coen (*Fargo*) I have to agree with this award as well. From the start of the movie, with the bogus message at the beginning telling the audience that it's a true story (it wasn't), to the end with Marge and her husband in bed together saying goodnight, it's well done from start to finish. But something in the back of my mind would have really liked to see John Sayle's *Lonestar* be recognized for something. If one element of that film deserved commendation, it's the screenplay.

All in all, it seemed like a good night at the Oscars. There were some good awards, some bad awards. The show overall was much better than last year. There weren't all of the distracting presentations that had nothing to do with the event to make things go even longer. The speeches weren't interrupted too badly. Kudos to Tarantino for swearing on live TV. I didn't review all of the awards but I tried to touch on the most important, and the ones I felt most strongly about. For the people that I mentioned were least deserving, I mean no disrespect to them. There were amazing actors and films here. I just mean this in reference to the competition that they were up against ...

Grammy-nominated flutist, composer influenced by tribal stories, culture

BY ROBIN REITZES
Bucknellian Staff Writer

R. Carlos Nakai was nominated under the category of Best Traditional Folk Album for *Ancestral Voices* at the 1994 Grammy Awards. There is much more to this fascinating man than a Grammy Nomination. He is not only a highly talented flutist, but also a composer and historian who is to perform at the University as part of the Native American Focus Semester.

> *"My objective is to communicate a perspective based upon the future oriented and living oral traditions of the Dine and other aboriginal native peoples of North America that are not couched in the romantic and/ or stereotypical idealism."*
> *—R. Carlos Nakai*

Nakai's culture and surroundings have greatly influenced his work. He was born in Arizona and is affiliated with the Navajo-Ute tribe. It is extremely important to Nakai that the native flute does not become a museum piece.

"A lot of what I've been taught culturally comes from an awareness of the environment. How I feel is based on my impressions of being in certain spaces at certain times. Thinking back... on personal tribal stories and the history of my culture figures into how I organize my music," he said.

Nakai's music has an original sound, combining elements of his classical training with his expertise on the cedar flute. He creates an elegant sound that covers an arena of musical categories such as jazz, piano and guitar collaborations. Nakai also creates new sounds for the flute by incorporating electronic technology such as synthesizers and digital delay.

An accomplished musician with many career goals, Nakai said, "my objective is to communicate a perspective based upon the future oriented and living oral traditions of the Dine and other aboriginal native peoples of North America that are not couched in the romantic and/or stereotypical idealism. I will utilize contemporary teaching methods to develop a creative learning atmosphere in which to share awareness."

Nakai will be performing at 8 p.m. Tuesday in the Weis Center.

SAMPLES, GUSTER TO PERFORM

from page 1

Formed in Boulder, Colo. in 1987, the Samples have four albums to date, including their most recent *Outpost*. The band performed in the first H.O.R.D.E. nationwide tour in 1992 and has had shared the stage with well-known groups including Toad the Wet Sprocket, The Dave Matthews Band and Hootie and The Blowfish.

Hailing from Tufts University in Boston, Guster features its three members on acoustic guitar and bongo drums in addition to vocals. It also has shared the stage with many well-known groups including Live, Violent Femmes and Rusted Root.

The other opening act, ARU, comes all the way from Georgia. The band performed in several of the H.O.R.D.E. shows and opened for Blues Traveler. Described as an alternative rock'n'jazz group, ARU has one album on the market, *In A Perfect World,* and another one in the works.

When asked why these bands were chosen, Harrison said, "We (the committee) thought they would go over well. They are different but similar in that they are all college rock kind of bands. It was difficult to find bands that were within our small budget."

Harrison further explained that all the money for the annual concert comes from BSG, which gets its money from the student activity fee. Harrison says that because the student concert committee gets such a small amount of money, the bands they are able to book are not as popular. He feels that if the University matched BSG's funds towards entertaining events such as concerts and lectures, the committee could get bigger named bands.

How does he predict the night will go?

"It will be a lot of fun. Plus, the more people that show up, the more money we have for next year to do a bigger and better show since the profits from one concert roll-over to the next year," he said.

Doors open for the concert at 7 p.m. next Friday in the Fieldhouse.

Tickets went on sale in advance starting Tuesday for $10 with Bucknell ID at the Weis Center Box office.

The box office is open Tuesday through Friday from 11:30 a.m. till 5:30 p.m. Tickets are $15 for non-students and on the day of the concert.

Guster, a group hailing from Tufts University in Boston, will open for The Samples. The three-member band consists of acoustic guitar, bongo drums, and vocals. Aquarium Rescue Unit (ARU) will also open for the main act. The student concert is scheduled for 7 p.m. next Friday in the Fieldhouse. Tickets are $10 with BU ID.

FEATURES

Cooking with Katie

Scones

Forget about high tea or the flirtations of Austen's whimsical high society characters. These delectable treats may be nibbled at any time or place. Scones are too eagerly compared to the lard-laden biscuit, an association which is smashed by their deceptive ability to hide their opulence in a crumble of subtle sweetness. They may be studded with anything from fresh fruits to chocolate chunks or toasted nuts... a few favorite combinations of mine include "Raspberry White Chocolate," "Strawberry Cream Cheese," "Blueberry Raspberry" and "Pear Almond."

- 3 cups cake flour
- 1 cup all purpose flour
- 2 tablespoons baking powder
- 1 cup sugar
- pinch of salt
- 2/3 cup of cold unsalted butter
- 3 eggs
- 1/2 cup milk
- 1/2 cup heavy cream
- 2 cups fruit, chocolate or toasted nuts
- egg batter: 1 egg plus 2 tablespoons heavy cream
- sugar

1. Sift dry ingredients together, reserve in a medium sized bowl.
2. Coarsely grate the cold butter into the flour mixture, tossing all to coat.
3. Crack eggs into a large bowl and add milk and cream, beating very lightly with a whisk.
4. Add fruits and egg mixture to the flour; with a rubber spatula, stir *just until all ingredients are moist, **do not overwork**.*
5. On a lightly floured surface, mold dough into a rectangle, approximately 16 inches long, 1 inch high, 4 inches wide. With a pastry cutter, cut into 4 squares, and then cut each square into 4 triangles.
6. Place on a parchment lined baking sheet, brush with egg batter, sprinkle with sugar.
7. Bake in a convection oven at 425 degrees for 4-8 minutes, or until barely set and golden brown.

Scones are best devoured right out of the oven, although they may be frozen for a few weeks, if wrapped in plastic. To reheat, defrost for 30 seconds in the microwave, and place in a 400 degree oven for a minute or two. Pair a warm scone with a plate of fresh berries, and your mind will squelch the memory of the devilish fats lurking in the nooks of this luscious treat.

A new chaplain, a new challenge...

BY LUCY HANCOCK

Bucknellian Staff Writer

All right, students, here's the $100,000 question: who can name the newly instated University chaplain? OK, just how many of you knew there was a chaplain? For that matter, what exactly does a chaplain do anyway?

I'll be the first to admit that I didn't know the answers to these questions before writing this article. And while these thoughts were racing through my mind as I went to speak with the University's new chaplain, Ian Oliver, two other issues also intrigued me.

Feeling that spiritual life on our campus is anything but strong, I was curious to see what sort of person had been chosen for the formidable task of being "in general, a presence throughout the campus reminding all of those within the University community of the urgent need to keep always in mind the most basic questions that pervade the search for understanding, particularly the question of ultimate meaning." (One of Bucknell's expectations of its University chaplain.)

Also, I wondered how Oliver was adapting to his new surroundings, knowing that he traveled quite a bit before settling here in Lewisburg.

Oliver was born and raised in El Paso, Texas, near the Mexican border. At 18, he went to Amherst for his undergraduate work, and then to Chicago where he would study and work for 10 years. "I was always imagining that I would go back there, to work as a chaplain," Oliver said, when referring to his alma mater. However, his life suddenly took a very different turn.

After being ordained in the United Church of Christ, Oliver remained in Chicago, working temporarily in the seminary library. Oliver says he was "looking for a job like this one at Bucknell, which I think I was too young to get at that point."

After several disappointments, Oliver applied for a job in India, about which he was told by his former boss at Kalamazoo College. Almost a year later he was offered the position where he would spend the next six years of his life.

Oliver had the unique position of being a co-chaplain of "a little experimental international boarding school way up in the mountains" of South India. At Kodaikanal they were trying "to run a school on Christian principles that would welcome people of all religions, and show how on the basis of such principles, people of all religions could live together in peace."

Needless to say, this was a very different place than Lewisburg, Pennsylvania. Oliver states, "I know people have impressions of India as sort of the archetypal third world country—poor, dirty, depressing." I got a feel for where such images come from through Oliver's stories of the electricity going out and not knowing how long it would take to be fixed, and not being able to leave the mountains for days on end because the rains had washed out the roads.

Yet you can tell Oliver appreciated and learned a great deal from his time in India. "I loved it. I planned on staying for two or three years, and ended up staying for six."

As for India's marred image, Oliver states, "I didn't find it that way at all. There were a lot of positive things as well in the sense that the pace of life was very slow, relaxed. Relationships were much more important than they are here. People took family, friendships and church more seriously."

However, after six years in India, Oliver decided it was time to move on, and ended up at the University. As for the change, he stated, "America has been a culture shock, and then Lewisburg has been twice the culture shock." This is understandable for someone who had never stepped foot in Pennsylvania.

Oliver seems to be adjusting to his new role quite well, however, as he is "trying to adapt that patient, accepting attitude back to being in America so I don't get so hyper about things, like many Americans do." This is one lesson he feels college students could greatly benefit from.

Oliver admits that he hasn't "cracked the student culture yet." However, the previous schools he has been at were less than half the size of Bucknell. This was yet another adjustment. "I spent the first month thinking I was going to memorize the whole list of names, but there's just no way. While I think I know a lot of individuals now, I don't have a sense of the whole yet."

However, Oliver feels "It's early yet. One of the rules that I learned in the seminary was that when you come into a new community, don't change anything for a year. Try to figure out the lay of the land first."

Oliver seems to be doing just that in his new role as University chaplain. This position requires, first, that he "coordinate the religious and spiritual life of the whole University." So Oliver has been working closely with the Catholic Campus Ministry, the Jewish chaplain, the orthodox priest in Lewisburg, as well as the Zen Buddhist meditation group. Oliver hopes to strengthen such ties in the future, as well as provide more for the smaller religious sects on campus.

"The other half of the job is to be pastor of the congregation here at Rooke Chapel," Oliver said. This includes leading Sunday services, Bible study, and retreats, as well as general duties such as counseling whoever comes in. "My door is always open," Oliver said.

As for his hopes for the future, Oliver states, "I'd like to see some forum where people of all religions can get together and talk about life here at Bucknell, try to understand each other, and get over the gaps." We'll see what happens as Oliver begins his first year as the official University chaplain.

Jackie Debicella—The Bucknellian

Ian Oliver, the University's new chaplain, looks forward to the challenges of his new position.

Easter

From page 1

religious services more; as for Holy Week [the week before Easter in the Christian Church] Bucknell has different religious services for students in order to prepare for the Christian Church] Bucknell has different religious services for students in order to prepare for the holiday. Holy Week is all about being with other people. I think it's great that students are able to be with one another. Students do not live at home anymore and Bucknell is really a new family for them."

Easter can be celebrated—just in a different manner. If a student visits Rooke Chapel or Newman House this week, he or she is bound to find something cool going on. The Foot Washing Services, Stations of the Cross, the Adoration, and the Ecumenical Service are all services for different religions that are happening on cam-ration, and the Ecumenical Service are all services for different religions that are happening on campus this week. Easter Sunday will have a Festival Easter Service for all at 11 a.m. in Rooke Chapel, and there will be Catholic services on Saturday evening and Sunday at 4 p.m. and 10 p.m.

Some people agree that more things should be done to celebrate Easter at the University. "In terms of non-denominational faith services, there is a lot more we could do," Kelly said. Kelly says there has been talk of a Sunrise Service for Easter.

"I am new here, but I do want to do more for the Easter season," says Oliver, who also hopes to

"I am new here, but I do want to do more for the Easter season," says Oliver, who also hopes to have an Easter Sunrise Service and has ideas for a processional Stations of the Cross.

If you've really been bitten by the Easter bug, there are tons of activities going on in the area as well. Churches including Sharon Lutheran Church (Selinsgrove), All Saints Episcopal Church (Selinsgrove), St. Paul's United Methodist (Lewisburg), and Emmanuel Bible Fellowship Church (Sunbury) have a range of activities going on including services, youth breakfasts, anointing and healing ceremonies, and Easter communions all this week. Check out the *Daily* fasts, anointing and healing ceremonies, and Easter communions all this week. Check out the *Daily Item's* "Local" section from March 22.

So, if you can't go home for the holiday, make Easter your holiday. Oliver looks at Easter as a time to come together for a couple days. "We're here, and we should build new experiences and new traditions—instead of splitting up and going home to our families, we're coming together and doing things for ourselves."

SCIENCE AND TECHNOLOGY

Student geologists present at regional conference

BY TRACY THIFFAULT

Bucknellian Staff Writer

The University's geology department was well represented at this year's Northeast Section Meeting of the Geological Society of America which occurred March 17-19 in King of Prussia, Pennsylvania.

Students Scott Decker '97, Natalia Macander '97, Elizabeth Spiker '97, and alumnist Jennifer Elder '96 were selected to present their senior thesis projects to professional geologists from around the country.

Decker and Macander were advised by Carl Kirby, assistant professor of geology. Spiker was advised by Mary Beth Gray, assistant professor of geology.

"Each year we usually encourage a few students to submit abstracts for this meeting, and we have a pretty good record of acceptance," Gray said. The Geological Society receives prospective abstracts from students all over the Northeast including students from Colgate, Bates, Wellesley, the University of Vermont, and the University of Massachusetts.

If accepted, students prepare a poster presentation describing their research. At the conference they stand with their project for several hours while geologists ask them questions about their research. Students are also able to listen to other speakers, tour exhibits, and speak with other geology students from the area.

"It was an educational experience that allowed me to see how professionals present their research," Decker said.

Unlike most science degree programs at the University, completion of a year long senior thesis is required for students wishing to attain a bachelor of science degree in geology. Students begin their research in February of their junior year so that their project is completed by December of their senior year. Students wishing to submit an abstract for the meeting then have time to prepare a presentation.

Some theses produce negative results and thus are not recommended to submit an abstract to the meeting.

The University currently has six faculty members in the geology department with 17 or 18 senior majors, seven or eight of whom have chosen to earn a bachelor of science degree in geology.

Decker and Macander worked together on a project involving "Abandoned Mine Drainage Sediment Composition and its Relation to Color." They studied coal mines in central and eastern Pennsylvania.

Spiker conducted "A Study of Progressive Deformation at the Allegheny Front, Lycoming County, PA" for her project.

Elder, a double major in chemical engineering and geology, titled her project "Development of a Field Mixed Flow Reactor for Determination of Aqueous Reaction Rates: Applications to Acid Mine Drainage." She combined her studies and created a Mixed Flow Reactor (MFR) device to be used in her research on acid mine drainage.

The Northeast Section Meeting of the Geological Society of America is an annual event hosted at various sites, with next year's meeting in Maine.

Cara Mickelsen—The Bucknellian

Scott Decker '97 attended the Northeast Section Meeting of the Geological Society of America to present his senior thesis. His thesis compared abandoned mine drainage sediment composition to its color.

Problems arise for distressed students who "self-medicate"

BY ERIC AFFSPRUNG

Psychologists sometimes speak of individuals who "self-medicate"; that is, individuals who use alcohol and other mood altering substances in an effort to cope with emotional distress. Such behavior among college students is very different from the normal experimentation that young people often engage in.

Attempts at self-medication are really a form of substance abuse, which can be defined as a pattern of substance use that leads to significant emotional distress or impairment in functioning.

Some college students self-medicate in an attempt to escape from and deny feelings of depression and anxiety. Poor self-esteem, shaky self-confidence, painful thoughts, feelings and memories, and frustrating life circumstances such as academic difficulties can lead to the frequent consumption of alcohol or smoking of marijuana.

Unfortunately, self-medication is, in the long run, self-defeating. Alcohol, for example, is a central nervous system depressant and tends only to increase feelings of depression.

The use of marijuana, which produces a sense of de-personalization and de-realization, can actually heighten anxiety. There is some evidence that frequent pot smoking can reduce motivation, encourage passivity and undermine ambition.

Substance abuse impairs one's ability to perform academically or engage in rewarding personal relationships. In fact, the chronic use of mood altering substances can seriously damage relationships with those we care about most.

The irony is that substance abuse only increases feelings of anxiety, failure and guilt by heightening emotional vulnerability and further reducing one's ability to cope with life's tasks. Thus, the whole thing can become a vicious circle.

Breaking free from this self-defeating pattern of behavior can also be more difficult for students who surround themselves with others who may themselves be depressed, anxious - and self-medicating. Such a circle of friends may only serve to reinforce substance abuse.

If you are worried that someone you know is "self-medicating," consider sharing your thoughts and feelings with that person in an honest and caring manner. If you are concerned about yourself, you may find it helpful to talk with someone you trust - a parent, a professor, a close friend or a professional staff person.

Asking for help can sometimes be difficult, but we all need help from time to time. Admitting to ourselves that we are struggling is not a sign of weakness but rather, a sign of courage and strength, and can help us to seek out the support that we need to get back on track.

Eric Affsprung is staff psychologist in Psychological Services.

Caught in the Web: health topics

BY CURRAN FILER

Bucknellain Staff Columnist

There are many minor medical problems surrounding us today whichwe never think about. In fact, with most health topics, like mental health, physical health & fitness, and even vision and hearing, we don't think about it until it's too late. We are young, and we feel invincible. We think it could never happen to us or our friends. Every year people our age are killed or permanently affected by illnesses that could have been avoided or treated. That's why I decided to do this week's column on health issues. I hope these sites give you useful information so you can better deal with these common problems.

Dr. Ivan's Depression Central

`http://www.psycom.net/depression.central.html`

Dr. Ivan's Depression Central is a good place to start looking for information on a number of depression related topics. He has information about different disorders, how they affect different populations, and some treatments. There are also a few lists of famous people with depression related illnesses. All kinds of famous people have had to deal with depression, from Mike Tyson to Axl Rose. It really can affect anyone.

Online Depression Screening Test

`http://www.med.nyu.edu/Psych/screens/depres.html`

This web page is a preliminary screening test for depression. It was created by the Department of Psychiatry at NYU. It's not meant to be comprehensive, but if you take the test and it indicates that you suffer from symptoms of depression you should have a more conclusive test done. Note that the test asks if you have had these symptoms for more than two weeks. If you have these symptoms for a day or two, you wouldn't put it down as an answer.

Shape Up America!

`http://www.shapeup.org/sua`

This is the homepage of Shape Up America!, a "high profile national initiative to promote healthy weight and increased physical activity in America." It was founded by former Surgeon General, C. Everett Koop. It provides basic information on fitness, obesity, nutrition, and related topics. The first thing you should do when you get there is to calculate your Body Mass Index. If it's too high you can get some tips on safe weight loss and proper nutrition. This is another issue that is easy to overlook but very important to our health.

An Introduction to Skin Cancer

`http://www.maui.net/~southsky/introto.html`

When the weather gets better and the sun comes out, most people start to think about getting a tan. It's become so popular that you can get an artificial tan just about anywhere in the country, even in little Lewisburg. But we don't think of the risks and consequences except when we complain about the sunburns we got on spring break. This page has a lot of basic information on skin cancer. One of the possible causes of skin cancer is overexposure to the sun. This page is important for everybody to read, especially people who expose themselves to the sun often. Remember, the sunburn you get over spring break may not become cancerous right away, but it might in 20 years!

Science & Technology Calendar

Tues., Apr. 1	**Science Lecture at noon in Olin 268** Ramon Lopez will talk on "Science Education Reform and the Implications for Undergraduate Teaching."
	Science Lecture at 7 p.m. in Olin 268 Ramon Lopez will talk on "Science Education Reform: Models for success and pitfalls to avoid." A reception will follow in the Biology Building, Room 325.
Fri., Apr. 4	**Biology Seminar at 4 p.m. in Rooke Chemistry Auditorium, Room 116** Dr. Steven Handel from the Department of Ecology, Evolution, and Natural Resources at Rutgers University will speak on "*In vitro* Plant Ecology: The Restoration of Degraded Land."

After six months, new graduates are often waiting for their first job.

Our Co-op MBA's are waiting for their first paycheck.

Getting your first job isn't easy, unless you're part of Northeastern's Co-op MBA Program. After six months of study, you'll work another six months in a paid professional-level position. A final nine months of school completes your degree. At the end of the program, you'll have built a solid resume and gained the valuable contacts and experience necessary to launch your career. To find out how you can have a great job in six months, call us at (617) 373-5960 or visit our web site at www.cba.neu.edu/gsba. But, don't wait too long, the next class starts in June.

SPORTS THURSDAY

Athlete of the week:
Heidi Hammes (women's lacrosse) scored 18 goals in Bucknell's first six games, helping the team to an undefeated start.

Baseball's youngsters come up big in Florida

Tyler Prout '00 smacks grand slam in three-run loss to Pace; team finishes trip 3-4-1

BY JEFF CAMPAGNA
Bucknellian Staff Writer

Jonah Half— The Bucknellian

Doug Hoffman '97 (above) and teammate Scott Peny '00 combined to two-hit New Hampshire in a 5-1 win. Hoffman also had a solid outing in a 2-1 loss to Northeastern. The team's record stands at 8-8-1.

Most college students head down to Florida for Spring Break in search of the never-ending party, but the Bucknell baseball team journeyed to Fort Myers with more serious goals in mind.

As the defending Patriot League champions, the Bison looked to get back into shape and sharpen their play, both offensively and defensively. Though the Bison posted an overall losing record during their stint in the Sunshine State (3-4-1), the quality innings afforded an opportunity for Coach Gene Depew to see what the younger players could do. Freshman Tyler Prout (3B), sophomore Mike McCarthy (CF), and freshman pitcher Scott Perry made the best of the chance, earning notice from Coach Depew.

"A few guys stepped up and looked ready to play, and some guys started hitting the ball the way we needed to get it done," commented the coach. "I'm disappointed we didn't come away with a winning record during the trip, but I think we're prepared for this weekend's opener against Lehigh."

Bucknell took awhile to warm up in Florida, dropping the first three games on their schedule. The Bison absorbed an 8-5 loss to Pace University in their initial contest, as staff ace Mike Anders '98 gave up six earned runs over six innings in a disappointing first outing.

Offensively, Bucknell was held in check throughout most of the game, until Tyler Prout '00 smacked a grand slam in the bottom of the ninth to narrow the gap to 8-5, the final score.

The Bison came out on the short end of a 12-11 extra-inning slugfest the next day against Northeastern. Pete Cann '97 led the offense with a homer and three RBIs, while centerfielder McCarthy collected three hits. Northeastern roughed up Bison pitching early, pushing across seven runs over six innings on starter Mike Tomko '98.

Though the next day's match-up against Northeastern was the exact opposite style of the previous game—a pitching duel—the final outcome was the same, as the team suffered another tight loss.

Starter Doug Hoffman '97 went the distance, scattering six hits while giving up only two earned runs in a quality outing. However, it was not enough as Bucknell fell 2-1.

The Bison finally got their first taste of victory in Florida against Drexel, as their offense revived itself, erupting for 12 runs in a 12-6 win. First baseman Steve Rutkowski '97 provided some of the offensive fireworks, going 4-5 with three RBIs, while pitcher Sean Huss '99 picked up the win in a quality start.

Bucknell nearly won their next match-up against Farleigh Dickinson, but were victimized by a FD two-run rally in the bottom of the eighth that left the game knotted at eight.

Later that same day, the Bison combined quality pitching with timely hitting to finally defeat Northeastern, 7-6.

Bucknell continued to roll the following day, defeating New Hampshire 5-1, as Scott Perry '00 and Hoffman combined on a two-hitter. Shortstop Joe D'Orazio '98 swung the hot bat for the Bison, collecting two hits while knocking in two runs. Later that day, the Bison closed out their Florida schedule against a tough UMass squad. Bucknell built a 2-1 lead over four innings, only to watch the Minutemen score six runs over the next three frames to take an 8-6 victory.

The Bison currently stand at 8-8-1, with a series against Patriot League foe Lehigh this weekend. Senior tri-captain Rutkowski is pleased with his team's progress during the Florida trip and optimistic about their chances this season.

"We realize other teams are going to be shooting for us a little more since we're the returning champions, but I think at this point we're looking better than we did last year, and we'll be able to compete," he said.

Inexperience reigns as lacrosse stumbles to 1-3 start

BY E.J. CRAWFORD
Bucknellian Staff Writer

The good news is that the 1997 Bucknell men's lacrosse team ran their undefeated streak to a national and school best 13 games with a win over Mt. St. Mary's. The bad news is that 12 of those victories came last season, and the 13th win was followed by losses to Penn, Villanova and Army.

The men's squad is looking at an up-hill battle this season. They look to continue last season's excellence despite not retaining a single starter from last season's 12-0 squad other than Paul Bruccoleri '98, who has now been moved to midfield. The team's inexperience prompted last season's National Coach of the Year Sid Jamieson to deem this year's squad as "pale-green; we're not even experienced enough yet to be considered green."

He continued, "Our goal [this year] is to get better every game... [we] need to continue to improve and try to get the right personnel on the field."

The men's inexperience, particularly on defense, showed during the team's first four games, as the Bison gave up at least 10 goals in each game, something they did only three times all of last season.

This year's defense is composed of former midfielder Bryan Nidrie '99, Brad Fetchet '99 and junior Taro Yoshitome, in only his second year since coming over from Japan. "Our defense is the

see LACROSSE, page 12

Alexis Englehardt—The Bucknellian

Bryan Nidrey '99 is one of 10 new starters on a men's lacrosse team that finished undefeated last season. The Bison stand at 1-3.

Crew races to great start

BY MORGAN MORAN
Bucknellian Team Correspondent

In keeping with its seven year tradition, Bucknell Crew endured the long bus ride to Augusta, Georgia, where the team kicked off its spring racing season. Following a sweltering week of training under the relentless southern sun the crew was ready to race at the Augusta Invitational.

Beginning the adventure was the women's novice four who set a winning tone for the rest of the team, as they sailed to victory in their qualifying heat and continued on into the final, eventually earning a bronze medal. The rest of the women's novice crew quickly followed suit as they too sped through the qualifying heats, posting the third fastest time in the event.

Not to be outdone by the women, the novice men's eight trounced the competition in their heat. Later they competed in the final were they placed a respectable fourth place.

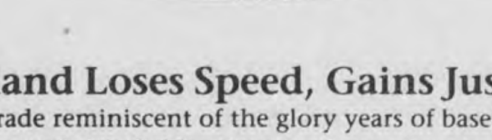
The varsity team was led by the men's varsity four, who was led by captain Tim Keen '97, embarrassed the other crews in their qualifying heat by crossing the finish line with seven boat lengths of open water over the rest of the field. That afternoon the four battled against the powerhouse crew of Temple University down to the last strokes of the race, placing second by only a few seconds.

The lightweight men also faired well in their heavily stacked final, placing third behind Dartmouth and the University of Tennessee, Chattanooga. Coxswain Scott Uebele '00, who walked away from the event with his second medal of the day, summed up the men's experience by saying, "Following this week of training and the regatta experience, my boys are well prepared to bring home the hardware during the rest of the season."

Ending the day's events was the women's varsity eight event. Following an easy morning heat, the women found themselves beside some tough crews at the start of the final. Determined to persevere the women placed fourth.

As a whole the team is looking forward to a prosperous season. The entire crew is now back in Lewisburg training hard for the Bucknell Invitational, which is scheduled to take place in two weeks.

Flash in the Pan



Cleveland Loses Speed, Gains Justice: In a blockbuster trade reminiscent of the glory years of baseball, the Atlanta Braves traded rightfielder Dave Justice and centerfielder Marquis Grissom to the Cleveland Indians for stolen-base king Kenny Lofton and hard-throwing lefthander Alan Embree. All but Embree are All-Stars. The move frees cap room for the Braves, who still need to sign Cy Young winning pitchers Greg Maddux and Tom Glavine for next season. The move also allows for more playing time for budding stars Andruw Jones and Jermaine Dye. For the Indians, this trade adds money but moves them back in front of the White Sox in jockeying for the Central Division title. Also, Lofton is a free agent after the season, whereas Grissom and Justice are signed to long-term deals.

Number One Seeds Lead On: For the first time since 1993, three number one seeds advanced to the men's NCAA basketball final four. And one of them isn't Kansas. In the tournament's biggest surprise, the Jayhawks were bounced in the sweet 16 by the upstart Arizona Wildcats, the only non-number one in the final four. The Wildcats dumped No. 10 seed Providence in an overtime thriller to reach the Final Four. Arizona faces red-hot North Carolina in one semifinal, and Kentucky faces the resilient Minnesota Golden Gophers in the other semi.

Basketball Honors: In collegiate honors, there were no surprises as Tim Duncan of Wake Forest and Kate Starbird of Stanford were named National Players of the Year. In coaching circles, Kansas coach Roy Williams, whose team lost only once this year before their upset in the tournament, was named Coach of the Year along with undefeated but likewise upset Gene Auriemma of the Lady Huskies.

And For the Women: It was not a good week for favorites, as the previously undefeated UConn Huskies were bounced in the Elite Eight by defending champion Tennessee Volunteers, who advance to the final four with a record 10 losses. Tennessee next faces surprising sixth seed Notre Dame, who advanced to the final four against another surprising team, George Washington. The other half of the draw held more to form as number one seeds Old Dominion and Stanford prevailed and will meet this week.

Tiny Ice Princess: Fifteenth last year, 14 year-old Tara Lapinski continued her meteoric rise to the top of women's ice skating by winning Figure Skating's World Championships this past weekend. Lapinski finished first in the short program, and barely hung on in the long program to defeat fellow American and teenager Michele Kwan (16 years old) for the title.

Softball suffers through dismal start

By E.J. Crawford
Bucknellian Staff Writer

Bucknellian File Photo

Jenny Snyder '99 and the women's softball team has been plagued by poor fielding in their 2-14 start. Bucknell hopes to rebound in this week's four home contests.

Early season games are usually reserved for playing tough opponents and answering the questions and reservations a coach has about a team. Unfortunately, for the women's softball team, they returned from South Carolina with a lot more questions than answers.

The women's team, which met with some success last year, has struggled mightily this year with their fielding and hitting, it currently stands at 2-14.

The Bison were able to generate only four runs in their March 16 games against Illinois at Chicago and Coastal Carolina, while their opponents pounced early to post 9-1 and 8-3 victories, respectively.

Last year's Bucknellian Rookie of the Year Stacey Waite '99 and Melanie Kulis '98 took the losses in the two games.

Bucknell returned the next day to take on the same two teams, but unfortunately met with similar results. Illinois at Chicago jumped on Bucknell early, taking a 13-0 lead after three innings in coasting to a 16-1 victory. To the Bison's dismay, Coastal Carolina took a similar lead, as they jumped out 5-0 en route to a 9-1 victory.

Bad fielding plagued Bucknell the following day against East Illinois and Coastal Carolina, as four unearned runs proved the difference in a 7-3 loss to East Illinois, and an unearned run doomed the brilliant pitching of Waite in a 2-1 loss to Coastal Carolina.

Bucknell's woes continued at the Winthrop Invitational, as the team dropped decisions to Dayton (10-3), Marshall (8-2) and UNC-Charlotte (11-0). The heartbreaker, however, came against Charleston Southern, as the Bucknell bats came alive to take a 7-6 lead into the bottom of the ninth. However, Charleston Southern put two on the board in the bottom of the inning to take an 8-7 victory. Kristin Sandel '98 led the way for the Bison with three hits and an RBI, but it wasn't enough to overcome the four team errors, which led to five unearned runs.

Despite the tough start, Waite is having another fine season, leading the team with 17 hits and seven RBI's, in addition to hitting a team-best .415. Also, despite her 1-6 record, she holds only a 2.65 ERA.

However, it is the team's fielding which seems to be largely contributable to their rocky start, as the squad boasts a mere .918 fielding percentage, and, of the 115 runs allowed this season, only 58 are earned.

The team looks to rebound this week with doubleheaders against Mt. St. Mary's and Penn State.

Linksters open spring schedule in Maryland

By Eric Keber
Bucknellian Staff Writer

For the first match of the season the Bucknell golf team traveled to Maryland to compete in the two day Loyola Invitational held on Monday and Tuesday.

Out of a field of 20 teams the Bison finished in fifth place with a two-day, 36-hole, team score of 637.

Loyola won their own meet by four points with a score of 621, defeating Indiana University of Pennsylvania, who finished with a score of 625. William and Mary and the University of Maryland-Baltimore County came in third and fourth respectively, with scores of 631 and 637.

After the first day of competition, Bucknell was tied for third place with a score of 315 but then fell to fifth after shooting a 322 on Tuesday.

"We started off really well the first day," commented Mark McGinly '97. "We were in third place and then we just didn't do as well. We could have done better but we are pleased with the performance. There were 20 teams so coming in fifth wasn't that bad."

The Bison were led by Bryan Sun '99, who shot two 76's for a two day total of 152 and finished tied for third individually. Josh Hartman '98 shot an 80 on Monday and than improved with a four over par 76 on the second day of competition bringing his total to 156.

Completing the scoring for the Bison were Todd Schneider '99 with a 164 (79-85), McGinly with a 166 (80-86), and Tony Calandra '99, who shot a 174 (89-85).

The top individual performance was posted by Loyola's Brandon Luckett who shot a 150 (77-73).

The match was held at the Hunt Valley Country Club on a par-72 course with a yardage of 6685.

Head Coach Tommy Thompson's team will compete next on Saturday and Sunday at the Navy Invitational.

Mike O'Donnell— The Bucknellian

Most of the Loyola Invitational field saw nothing but the back of Bucknell's Bryan Sun '99, who shot consecutive 76's en route to a third place individual finish.

LACROSSE

from page 11

most settled, but also the most inexperienced group on the field... our offense has to take some pressure away from them [until they get settled,]" said Jamieson.

That offense consists of the only two major contributors from last year's team in sophomore attackmen Michael Kennedy and Ed Joffe. Despite the fact that "neither has been very healthy," noted Jamieson, they have still made an impact this season, as Joffe leads the team in goals and Kennedy exploded for four goals and three assists in the 12-10 victory over Mt. St. Mary's. Their leadership and importance to the team can be seen in Bucknell's 13-3 loss to Penn, in which both players missed the majority of the game.

The third attackman will be freshman Ed Costello, who inherited the role of crease attack after Mark DelGrego '98 moved to midfield. Jamieson seemed excited about Costello's potential, calling him a "great finisher." Costello will be pushed by second-year attackman Michael Vallone.

Whereas the attack position may be somewhat set, the team's biggest question mark is its midfield. Coach Jamieson has already used a multitude of midfields, which included moving DelGrego from attack and Bruccoleri from goal, although he has played in the cage sparingly this season. Freshman Steve Wood was also moved from goalie, as he was forced to play long-stick middie after an injury to starter Fritz Wisor '99. In addition, Ben Payne '99 and Noah Fink '98 return as contributors to last season's team.

The remainder of the midfield is also unsettled, although it does not lack potential. Brad VanNostrand '00 is, according to Jamieson, "going to be a really good player, he just needs some work on his defense." Another young middie is sophomore Koichiro Oe, to whom Jamieson referred as "very exciting, he's unbelievably quick... but is taking a while to understand the offense [as this is his first year in the U.S.]."

In addition, the midfield boasts co-captain Luke David '97 and sophomore John Golaszewski, while co-captain John Siris '98, Brad Wright '98 and Chris Savinelli '99 vie for face-off duties.

Assessing the squad's early games, Jamieson seemed upbeat in saying that "we've had some tough losses, but the kids are playing hard and we're moving in the right direction."

League-foe Holy Cross comes to town on Saturday for a 1 p.m. matchup, followed by an April 2 game at Navy. "Each game is a must-win right now, in that we need to get better and gain confidence," said Jamieson.

Maybe with a little more confidence this squad can finally be considered "green."

Tyler, outdoor track open strong at Wake Forest, Navy

Sophomore thrower wins three events

By Chris Ellis
Bucknellian Staff Writer

Bucknell's Tria Tyler '99 stole the show last week as the Bison track and field team opened its season by competing in a pair of invitationals.

Tyler, a thrower who played second fiddle to multiple school-record holder Lisa Allen '97 last season, opened her 1997 campaign with three victories in the Navy Invitational throwing events. Tyler, the Bucknell record holder in the discus, won first-place medals in the hammer throw, discus and shot put last week.

Tyler's hammer throw of 147 feet is the second-best throw by a female Bucknell athlete in history, two feet shorter than Allen's 1995 throw. Her discus throw of 136 feet, 1 inch entered the school record books as the fourth best throw of all time.

Joylyn Brown '98 finished second to Tyler in both the hammer throw and discus, while Andy Bullard's '97 hammer throw of 160 feet, ten inches was good enough for second place in the men's competition.

While the throwers were at Navy, the Bucknell sprint and distance teams were competing in the Wake Forest Invitational, where Bucknell's Tim Evans '98 earned a second-place finish with a personal best mark in the pole vault of 15 feet, 3 inches—a height that was second best in school history. Bryan Schiding '00 finished fifth in the triple jump.

The outdoor track and field season kicks into high gear this Saturday, as the team travels to Lawrenceville, New Jersey for the Rider Invitational.

Men's tennis readies for title run...

By Jared Silliker
Bucknellian Staff Writer

With a roster dominated by underclassmen and a schedule filled with top tennis schools, the Bucknell men's tennis team and head coach Bob Hammerlee have a long, yet promising, road ahead of them this spring.

Coming off a 14-7 campaign last year, Hammerlee could only be positive about his youthful team and the competition his players will face. "What we have can only improve, and they will all get some good experience facing tough competition," he said. Hammerlee is in his fifth year as head coach at Bucknell.

This year's lineup includes only two seniors—co-captains Josh Plumb and Drew Thimme, and boasts two freshmen within the top four spots. Freshman T.K. Kelly, a highly recruited player from Florida, will jump immediately into the number one singles spot, while Justin Quandt '00 will play at No. 4.

"T.K. will have his hands full all season at number one, but he's certainly a top-notch player, and Justin comes in with a lot of experience playing tournaments in Europe," Hammerlee noted.

Quandt graduated from the International School of Brussels in Belgium, but is originally from California.

Plumb will play No. 2 singles, followed by sophomore Steve Bomberger at No. 3. Thimme currently stands at No. 8 and will likely play third doubles. In NCAA Division I dual matches, schools play six singles matches along with three doubles matches.

Kelly and Bomberger will play together at No. 1 doubles while Plumb will team up with No. 5 Adam Epstein '99 at No. 2 doubles.

"I think our number one doubles team should do very well, especially since Steve played there last year as well," Hammerlee said.

Sean Galligan '98 fills out the starting rotation at No. 6 singles, while John Scarborough '98 and John McLin '97 hold the number nine and ten spots, respectively.

The Bison's revamped schedule will challenge this young lineup like never before. West Virginia, Villanova, Georgetown, Buffalo and Duquesne, all schools with quality tennis programs, have been added to this year's spring schedule.

"This is the best depth I've ever had," Hammerlee said. "And that's the reason I felt I could schedule this type of competition. We've also had the best conditioning program ever, so we should be prepared when we get into three-set matches.

"As far as the Patriot League goes, the service academies are still the toughest, but I think we should be in the top three," the coach said. Bucknell was fifth in the League Tournament last year.

...while gaining needed experience at Hilton Head

By Jared Silliker
Bucknellian Staff Writer

Looking for its first action of the year, the Bucknell men's tennis team opted for warmer weather—specifically, Hilton Head Island, South Carolina. The team played four straight days of matches, one per day, after three days of practice. The Bucknell men returned with a 2-2 record, sandwiching wins over Tufts and Buffalo between losses to Morehead State and Colgate.

The Bison received good singles wins from Josh Plumb '97, Justin Quandt '00 and Sean Galligan '98, but the team lost a tight matchup with Morehead State (4-3) on the first day of competition. At No. 5 singles, Adam Epstein '99 had a match point before falling in a third set tie-breaker, 7-5, 2-6, 7-6 (7-3).

"It's tough when they have all scholarship players to our none. And interestingly, none of their players were from the U.S.," head coach Bob Hammerlee noted. "But we still played very well, and had our chances."

The team then went on to defeat Tufts and Buffalo, 5-2 and 6-1 respectively. T.K. Kelly '00 won two tough matches at No. 1 singles for the Bison—a 6-1, 2-6, 7-5 victory over Tufts and a 6-3, 7-6 (9-7) win against Buffalo.

Kelly and Galligan both registered wins on the last day of the trip against Patriot League rival Colgate, but the team took the loss 5-2. Galligan finished the trip with a perfect 4-0 singles record, while he and co-captain Drew Thimme '97 teamed up to win three doubles matches. The freshmen, Kelly and Quandt, both tallied three singles wins during the trip.

The Bucknell netters then traveled home and played Georgetown at home Sunday, losing 5-2.

Photo courtesy of Amy Matheson

Bucknell gymnastics team members (from left) Jessica Thomas '98, Amy Matheson '98, and Denise Lamoureux '00 recently won Bucknell's first-ever gymnastics medal at a tournament at the Naval Academy, as they posted a bronze-medal showing against much more experienced squads.

News Analysis: Title IX (from page one)

According to Hartzell, the problem stems from football and money. Since there is no female equivalent for the 90-player football roster, the numbers of male and female athletes are skewed. In order to combat the problem, more women's opportunities need to be added, and that costs money.

"The NCAA fights the same problem that all of us do, and that is the NCAA doesn't want football to be damaged," Hartzell commented.

The NCAA has provided institutions with advice in *Achieving Gender Equity*, a booklet that outlines information and resources to contact, but for the most part, schools have been left to find their own solutions.

Cutting men's programs has been a common but largely unpopular measure at many colleges. Bucknell has avoided the dreaded ax so far, and Hartzell hopes to continue with positive solutions.

"All of the talk that we've had so far has been no, that we would not [cut men's programs]," Hartzell said. "There are too many negatives ... Everybody's goal is to add women's [opportunities]."

Smaller men's rosters and more women's sports have been among the measures enacted for leveling the playing field, and Hartzell hopes to continue these efforts.

Equalizing the budgets for men's and women's sports is another goal for the University. According to the (*USA Today*) figures, Bucknell spends an average of $8,796 per year on male athletes and $6,094 per female. Although the figures seem alarming, Bucknell is in the middle of the pack in the Patriot League. Hartzell is not satisfied with that consolation, though.

"We need to get those numbers equal, and I'd prefer to have the women's number higher than the men's," Hartzell said.

The University has already equalized men's and women's budgets in complementary sports like tennis, lacrosse and baseball/softball.

Solving gender equity problems is not a simple process, though, and hasty decision making can yield disastrous results, as officials at Brown University have discovered. After cutting two men's sports and two women's sports in 1992, nine female athletes sued the college for noncompliance with Title IX, igniting a long court battle. Several other schools have experienced similar legal cases related to Title IX.

Hartzell said that the Brown case has heightened awareness of Title IX issues nationwide. "I think it's made people realize that you've got to put some long, hard thought into whatever steps you are going to take."

> ***"I have a daughter, and I want her to have every opportunity that my son has, but I don't want to take opportunities away from men."***
> *—Athletic Director Rick Hartzell*

A crucial part of that "long, hard thought" at Bucknell is the Gender Equity Task Force, a committee headed by Rose Ewan, associate athletic director for women's sports, and Richard Chapman, dean of students. The group has been studying the issues for the past two years, formulating objectives for increased equity.

Hartzell is looking forward to the committee report so that the University can establish a plan for compliance with Title IX, but above all, he views the issue from a practical standpoint.

"I have a daughter, and I want her to have every opportunity my son has, but I don't think we should have to take opportunities away from men," Hartzell commented.

UNFORTUNATELY, THIS IS WHERE PEOPLE ARE PUTTING TOO MANY RETIREMENT DOLLARS.

Every year, a lot of people wind up sending Uncle Sam money they could be saving for retirement.

Fortunately, that's a mistake you can avoid. SRAs are tax-deferred annuities. They offer an easy way to build retirement income — especially for the "extras" that your pension and Social Security may not cover.

Instant tax savings.

Because your contributions are made in before-tax dollars, you pay less in taxes now. And since earnings on your SRAs are tax deferred, your money works even harder for you.

Loans and more.

What else do SRAs offer? A valuable loan option, plus a full range of investment choices, and the expertise of TIAA-CREF — America's largest retirement organization.*

The sooner you act, the sooner you benefit.

Why write off the chance for a more rewarding retirement. Stop by your benefits office or call us at 1 800 842-2888 and find out how TIAA-CREF SRAs can help you enjoy many happy returns.

Visit us on the Internet at www.tiaa-cref.org

TIAA CREF
Ensuring the future for those who shape it.

*Based on assets under management.
CREF certificates are distributed by TIAA-CREF Individual and Institutional Services, Inc. For more complete information, including charges and expenses, call 1 800 842-2733, extension 5509, for a current CREF prospectus. Read the prospectus carefully before you invest or send money. UNC's Dean finally at the top of the list

It was the summer of 1961, and University of North Carolina Athletic Director John Swofford gave new Tarheel men's basketball coach Dean Smith one mandate: "Give us a program we can be proud of."

The Tarheels had gone though seasons of scandal and horrid play and were desperately searching for someone who could give their program a good name again. The athletic department, as well as the student body at large, was a bit skeptical of the hiring of Smith, and the doubters seemed to be right as UNC sputtered to an 8-9 record in its first season. After the first road trip of his second season, the Tarheels returned home to find Smith hanging in effigy from the fieldhouse rafters.

Things at UNC have gotten a bit better since then.

North Carolina routed Colorado in the second round of the 1997 NCAA tournament, giving Smith his 878th career victory. In the 36 years since UNC defeated Virginia 80-46 to earn their first victory under Smith's reign, the accomplishments that have occurred as a result of Smith's ability have been unrivaled in sport. For those of you who have missed CBS's tournament coverage, here's a quick recap:

Commentary

Chris Ellis
Sports Co-Editor

- 26 consecutive 20-win seasons.
- 23 top-10 finishes in the past 30 years.
- 15 top-four finishes in the past 28 years.
- A gold medal at the 1976 Montreal Olympics.
- 13 consecutive trips to the sweet 16.
- 17 ACC Championships.
- 50 UNC players that have gone on to play in the NBA.
- 3 UNC players who have become NBA coaches of the year.
- A 97.3% graduation rate among letterwinners.

The eternally modest Smith has more than enough former players to attest to his excellence. NBA coaches Larry Brown and George Karl have virtually copied their wildly-successful coaching styles after the Dean's style.

No less of an authority than Michael Jordan has given possibly the most glowing of testimonials to Smith. Jordan, an incoming freshman with a limited track record and critics feeling he may never play to the level of North Carolina basketball, turned to the Dean for advice early in his career. Jordan led North Carolina to two final fours in his tenure at UNC, then went on to have a bit of success in the NBA.

"Coming out of high school, I had the ability, but I didn't know how to play the game," Jordan said after winning last year's NBA title. "After playing at UNC, all I had to do was go to the NBA and apply my knowledge. Dean Smith taught me how to score 37 points a game."

Despite all these accomplishments, Smith may never have been more on top of his game than this year. North Carolina, highly touted as a National Championship contender before the season started, had sputtered to an 0-3 start in the ACC. The team had fallen as far as 22nd in major polls, and was in a state of disrepair, at best. Doubters, much like those 35 years ago, stated publicly that perhaps the game had passed Smith by. After that abysmal start, though, came what was arguably the biggest turnaround in college basketball history.

Down nine points with 3:00 remaining against lowly NC State. the Tarheels stormed out of the game's final television time-out to take the game from the Wolfpack, and signal the start of a run that would put UNC at the top of the conference again. The Tarheels rose to fourth in the polls and earned a #1 seed in the NCAA tournament.

Now, just a few months later, UNC is back in the final four again, having lost exactly no games since January.

The fieldhouse where Smith's likeness was found hanging is gone, replaced with the 23,000 seat "Dean-Dome." The team has missed the sweet 16 only once in the past 16 years. The North Carolina recruiting classes are consistently rated among the top five in the nation. And, unlike many other top-flight program, the Tarheels haven't seen as much as a touch of off-court controversy in Smith's tenure.

A program to be proud of? It sure looks that way.

• Prediction time: with all that said, don't look for another UNC championship this year. Arizona, which came from 12 points down in the final 5:00 in its first round game against Alabama, has been fighting for its tournament life all season. The Wildcats dethroned Kansas from the #1 ranking and earned a birth in the Final Four with an overtime victory over upstart Providence. If Arizona can finally learn how to effectively manage the clock in the final minutes of games (they almost blew substantial late-game leads against Kansas and Providence), the Wildcats have the talent to win it all. Arizona over Kentucky in the championship game. Don't say I didn't tell you so.

Hammes, women's lacrosse open undefeated

By Haley Futterknecht
Bucknellian Staff Writer

The Bucknell women's lacrosse team is history in the making as they strive to maintain their undefeated record of 6-0.

The Bison began the week by recording their second win against Duquesne in an 18-2 rout. Despite crashing skulls requiring stitches and a check to the nose, Bucknell recorded its highest score in three years.

Bucknell outshot Duquesne 29-12, as Heidi Hammes '99 contributed five goals for the Bison while Theresa Frezzo '99 scored the first two goals of her career. Ali Toombs '97 held a shutout at the half and made five saves for the Bison. Goal was tended in the second half by Maureen Breslin '99, who recorded five saves.

Ali Dwyer—The Bucknellian

Heidi Hammes '99 scored 18 goals in Bucknell's first six games.

The biggest win yet for the Bison has been in their 8-5 victory over Cornell. In eleven previous meetings with the Big Red, Bucknell has lost 10 and tied once.

The Bison fell behind 5-4 early in the second half, but goals by Hammes and Elizabeth Murphy '99 put Bucknell ahead 6-5. Soon following, the Bison added two more goals, one by Hammes and one from Lauren Coyne '99.

Bucknell then held Cornell scoreless for the last 15 minutes of the game to come up with the win. The Bison outshot Cornell 26-16.

Goal was tended by Toombs who recorded 12 saves for the Bison. "We were on fire when we played Cornell. I sense an overall confidence among the girls that hasn't been there in the past that allows them to pull together. As a coach, I see great potential and talent present. They hold the future in their hands," commented Gina Lucido, assistant coach.

The Bison added two more wins during their spring break trip to California, dancing over UC Berkeley 13-4 before pounding Stanford, 11-7. The Bison came out strong with a 7-0 lead with seven minutes left in the first half. A slight break in defensive chemistry was rectified by Bucknell's ability to keep possession at the end and hold on .

Hammes contributed six goals while the Bison outshot Stanford 26-16. Toombs tended goal and recorded nine saves for the Bison.

Hammes was subsequently named Patriot League Offensive Player of the Week, and Jen Rose '97 was named Patriot League Defensive Player of the Week.

Bucknell recorded its sixth win against Monmouth, 11-5. Hammes contributed four goals in the victory, and Murphy supplied a hat trick. Coyne added two goals in the winning effort.

"The double teams that we have been working on in practice really became effective on the field," Christine Studdiford '99 commented. Hammes added, "The first half we played down to their level. We worked hard and picked it up in the second halt."

Bucknell has its Patriot League opener Thursday against Holy Cross. Holy Cross proves to be a challenging opponent for the Bison, as Bucknell eked out a win in a close game last year. Holy Cross returns a much-improved program this year. "We're psyched to have played six games before Holy Cross. We're hoping to come out with the same intensity as we did with Cornell and continue to improve our record," Coyne said.

Club sport report: Cycling

Bison cyclers dominate Eastern Conference field

By Whit Yost
Bucknellian Team Correspondent

The 1997 Eastern Cycling Conference season began last week with races in Pennsylvania, New York and New Jersey. The Bucknell team had a very successful three races, dominating at UPenn and put themselves in an excellent position for Nationals.

The first race was held at Columbia University in New York City. The first event was the men's C race where Mike Rizzi '00 rode a smart race to begin his collegiate career with a fifth place finish. The women's race followed with Erin Hemler '98 riding well to finish eighth in her first ever collegiate race. Next came the men's B race, where Whit Yost '99 was present at the front for most of the race until a broken chain with two laps to go ruined his chance for a good finish.

Finally, the men's A race came. Bucknell's team rode a dominating race, with riders present in every important move. The race ended in a sprint with Bucknell placing two riders on the podium and two more in the top 20. Ryan Steneken '98 and Dan Doolan '00 finished second and third respectively, while Marc Ducharme '98 and Tim Gernitis '98 were 10th and 19th. All four riders scored points for Nationals, and the team finished second overall for the day.

Next the team traveled to Rutgers for a race similar to the previous one. Again Hemler rode well to finish in the top 10, while Diran Ayandele '98 rode a strong men's B race to finish near the top of the field.

In the men's A race, the Bucknell team once again dominated, placing riders in two key breakaways for most of the race. With two laps to go, Ducharme escaped with three other riders to try to hold off the field. They just managed to do so, and Ducharme ended up in third place. In the field sprint, Gernitis placed sixth and Doolan was 10th, thus garnering more points for the team's already impressive total.

Bucknell's Tim Gernitis '98 wins the Men's A Race at the University of Pennsylvania. It was the first individual win for the team since 1995.

The following Saturday, Bucknell traveled to UPenn for what proved to be a very special day indeed. In the women's B race, Hemler once again rode a consistent race to finish in sixth place, her best placing yet. In the Men's B race Yost and Brian Hill '98 worked together to launch Hill to a third place finish, with Yost close behind. The men's A race was spectacular as Gernitis and Steneken broke away early with three other riders. The riders rode most of the race by themselves with Gernitis overpowering them one by one. As the race came to a close, just Gernitis and one other rider remained. During the last lap, a strong push by Gernitis enabled him to drop his breakaway companion and win the race solo. It was the first individual win for a Bucknell rider since 1995.

Finally, the four-race week ended at PSU-Allentown where Hemler started things off again with a sixth place finish. The men's A race was again dominated by Bucknell. Halfway through, Bucknell had three riders in the top 10 led by Steneken and Doolan. Unfortunately, a crash soon put Steneken out of the race, and left Doolan and Gernitis chasing to regain their places. The riders managed to salvage some energy for the sprint though, and Gernitis placed eighth, while Doolan and Ducharme placed 16th and 18th respectively.

Overall, it was possibly the best ever start to the season for Bucknell, which now sits atop the Eastern Conference standings. Thanks to the week's efforts, the team is optimistic about earning a third consecutive invitation to Nationals, as well as being one of the top three small schools.

Sports Trivia Quiz

1. Name the last time three #1 seeds reached the Final Four.
2. What is the lowest seed to win the NCAA basketball Championship?
3. How many final fours did the Kansas seniors play in?
4. Name the two states with the most professional hockey teams.
5. Who are the top two active home run hitters in Major League Baseball?

Answers:

1. 1993. 2. #8—Villanova in 1985. 3. Zero. 4. Texas and Florida. 5. Eddie Murray and Cal Ripken, Jr.

BUCKNELL UNIVERSITY — LEWISBURG, PENNSYLVANIA 17837

THE BUCKNELLIAN

Safety officer patrols campus on two wheels

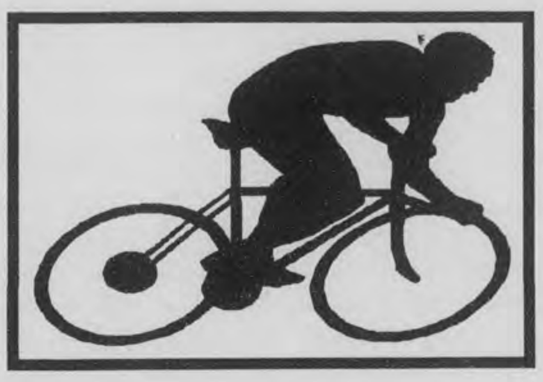
Pioneer John Weaver hits streets on bicycle duty

BY ARGUN ULGEN

Bucknellian Staff Writer

For those of you wondering who that policeman riding a bicycle around campus is, it's none other than Seargent John Weaver, the lone member of the Public Safety bicycle patrol. The patrol was instituted at the beginning of this semester.

"There are various reasons for setting up this bike patrol," said Vincent DeCerchio, director of Public Safety. "For one thing, the bike patrol has been used successfully in other police departments and campus public safety departments throughout the country."



DeCerchio said, "The bike patrol is environmentally friendly, and provides our officer the opportunity to interact with the public more, and reaches certain areas of campus that an automobile cannot reach. It may also reach certain areas faster than an automobile."

"Many of my colleagues like the program," said Weaver. "In fact, other officers are interested in joining. I support the program because it is low cost and efficient."

DeCerchio believes that another advantage to the bike patrol is that it is able to reach crime scenes more quietly than an automobile.

Weaver, who will ride his bicycle throughout campus under suitable weather conditions, said "I concentrate most on parking lots and around dorms, as well as places where an automobile does not have easy access to."

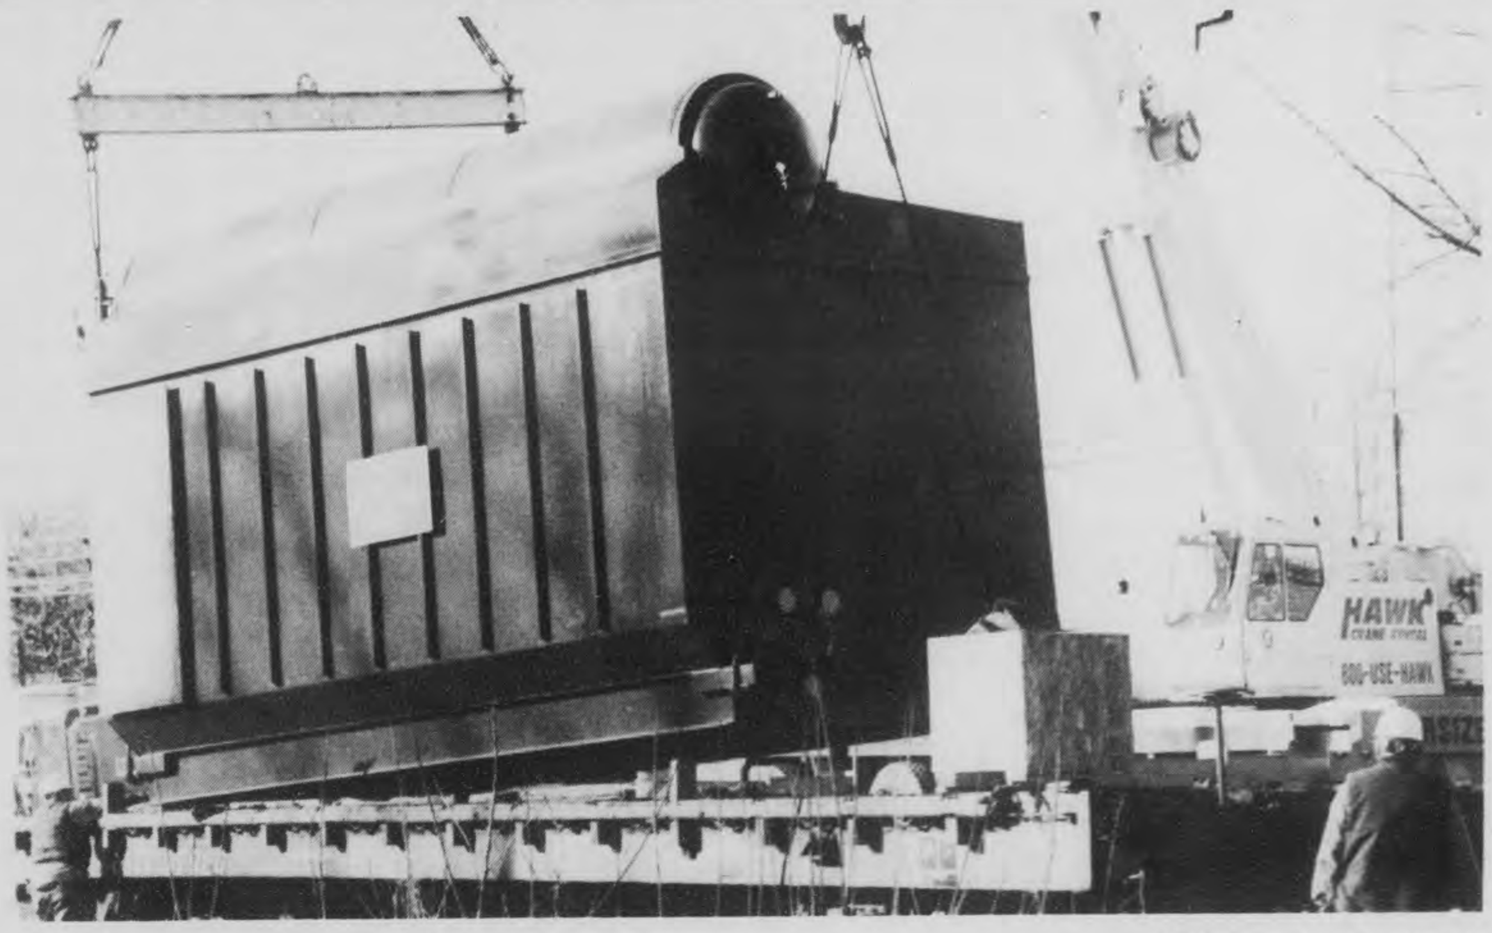
The bike patrol, no matter how many bikes may be used, will always be backed up by one police car. "The combination of a police car and a bicycle will hopefully provide a very high response time to emergency situations," Weaver said.

To train to become a bicycle patrolman, Weaver had to attend a four day police cyclist course. "I learned many efficient tactics like riding up and down staircases in emergency situations. I also got hands on practice with approaching suspects on the bicycle."

The bike Weaver uses on patrol is well equipped. It has high beam lights, shocks, high degree shifting and a bag with emergency supplies.

DeCerchio believes that the success of the bike patrol remains to be seen. To test the program, Public Safety will conduct a survey to see how efficient the patrol is. The test will require Weaver to record how many times he interacts with the public on his trips, incidents that he reaches and how much more ground his bicycle will be able to cover compared to a police car.

The bike patrol will continue to be executed throughout the rest of the academic year.



Mitch Stewart—The Bucknellian

This 46-ton natural gas boiler from Nebraska arrived via train last weekend. Installation of the boiler will occur next year. The arrival of the boiler was not related to the weekend power outages in Roberts, Swartz and Trax Halls.

Who turned out the lights?

Conversion complications cause extended power failure in residence halls

BY BETH MARTIN

Bucknellian Staff Writer

Residents of Roberts, Swartz and Trax Halls were inconvenienced by a lack of electricity on Saturday as the Physical Plant ran into unexpected delays in replacing obsolete electrical equipment with a new system in many campus buildings.

Although the Physical Plant had indicated that the conversion, starting at 6 a.m. would take eight to 12 hours, electricity was not restored in Roberts and Trax Halls until approximately 7:30 p.m. and in Swartz Hall until 8:15 p.m. In addition, Swartz Hall suffered another power outage from approximately 9:30 p.m. until 10:15 p.m.

Jim Knight, coordinator of the Physical Plant project, said that electricians contracted by the University finished the conversion at 5:30 p.m., but then two obstacles occurred.

The first problem resulted from an unidentified main circuit that could not be tested on Friday when the other electrical circuits were tested, because it posed a safety hazard. When University electricians were sent to restore power in the residence halls on Saturday night after the electrical conversion was completed, this main circuit caused unforeseen difficulties.

According to Knight, the second power outage in Swartz Hall was due to a "miscommunication among our people."

Knight said, "We tried to pick the time

Fire strikes again in Swartz

Housing and Residential Life offers $700 reward after second fire of the semester

BY BETH MARTIN

Bucknellian Staff Writer

Rewards totaling $700 are being offered by the Office of Housing and Residential Life for help in identifying and prosecuting the person(s) responsible for discharging a fire extinguisher on the first floor of Swartz Hall "D" wing early Saturday morning, and for setting a bulletin board ablaze on the same floor early Sunday morning.

According to Vincent DeCerchio, director of Public Safety, at 12:25 a.m. on Saturday morning, Walt McNamara '98, resident assistant of Swartz 1D, reported to Public Safety that someone had "squeezed the handle of the fire extinguisher dispersing a small amount of white extinguishing powder" on his hall between 11 p.m. and 12:20 a.m. that night.

Public Safety replaced the fire extinguisher, and a $300 reward is offered for assistance in apprehending the person(s) responsible for this incident.

The first floor of Swartz Hall "D" wing also was the target of alleged arson Sunday morning when its bulletin board was set on fire, activating fire alarms in "D" wing.

Vince DeCerchio, director of Public Safety

The fire was extinguished by McNamara and Carey Koch '99, a hall resident, before Public Safety arrived at 3:45 a.m. Residents were evacuated for approximately ten minutes as Public Safety investigated the crime scene. No injuries were reported.

Although a Physical Plant representative estimated the cost of the damage caused by the fire to be approximately $35, a $400 reward is offered for help in identifying the individual(s) responsible for this incident.

DeCerchio said that Sunday's fire in Swartz Hall is not necessarily related to the series of fires occurring in Swartz on Jan. 26, a case which is still under investigation. "It is an isolated event. We have these little scorching of bulletin boards from time to time. Every couple of months we have one," he said.

DeCerchio also expressed concern about false fire alarm activations, two of which occurred in Vedder Hall on Friday night, but said that they do not appear to be related to the events in Swartz Hall.

He indicated that the reward is only being offered for help in apprehending the person(s) responsible for the incidents in Swartz Hall, because they are viewed by the University as a more serious threat to students' welfare than those in Vedder Hall.

He added that false fire alarm activations are "criminal offenses, though, because it is the old 'Cry Wolf' syndrome. If a person comes home drunk every weekend and sets off the fire alarm, residents will be much less likely to take the alarms seriously. This could pose a serious problem in the event of a real fire."

DeCerchio said that he believes most arson and false fire alarm activations at the University are committed by "residents of the hall or residents at Bucknell who have either a very twisted sense of humor or a twisted way of expressing their dissatisfaction with something. It's a way of striking out against Bucknell or expressing anger at a

Unseasonable snow slows students' return

BY KATHRYN ARDINGER

Bucknellian Staff Writer

The unseasonable snow storm that swept across the northeast on Monday caused problems for several students traveling back to campus. The storm, which lasted through Tuesday in parts of the northeast, dumped a record-making two feet of snow in Boston and three feet of snow in parts of New York.

One junior driving back from Colgate on Monday morning, described a car accident that she found herself in when her car hit a sheet of ice in the Wilkes-Barre stretch of Interstate 81 southbound.

The student, who did not want to be identified, explained that she came over a hill, hit ice, lost control of her car and did a 180 degree spin. Her car was hit by a tractor trailer on the passenger side and was pushed into the guard rail. After she left the scene, she said that about 20 more accidents happened at that same stretch of the interstate and that a car actually hit her wrecked car on the side of the road.

She said "I am really happy that I was OK. I really lucked out."

Another student returning to the University from Boston, sat on Interstate 84 for two-hours. "I got off the interstate and went to a motel [in Millford, Pennsylvania] where my dad had called ahead and reserved a room," said Dawn Dawson '99. "When I went back out to get into my car, and before I had a chance to get in, a tree fell and crushed my car," Dawson said.

Brian Colello '99 left Northwest New Jersey on Monday at 9:30 a.m. By the time he reached the Poconos, there were three inches of snow on the ground, but the roads were cleared. Colello hit problems about five to ten miles past the Poconos on Interstate 80.

There was about an inch and a half of snow on the roads that had not been cleared. Colello said that

Admissions numbers remain steady

Rumors of a disproportionately large incoming class are unfounded, Davies says

BY ALLISON THOMAS

Bucknellian Staff Writer

The University has taken no unusual considerations in determining the size of the class of 2001, according to Mark Davies, director of admissions.

In an interview, Davies dispelled current rumors of an unusually, and perhaps disproportionately large, incoming class.

According to these rumors, the University is concerned about the increasingly large number of University students who choose to study off campus their junior year, and is trying to fill the vacancies by increasing the size of the first-year class.

According to Jean Schindler, secretary in the office of international relations, 96 juniors studied off campus this fall, and 191 students are currently abroad.

These numbers impose immediate implications on the financial prospects of the University, coupled with a sizable decrease in the student population.

It was rumored that in preparation for yet another large number of juniors planning to study abroad during the 1997-98 school year, the University would accept more first-year students for the upcoming Fall semester in order to offset the anticipated financial loss.

According to Davies, these accusations are unfounded and clearly misguided. He said that 6896 applications were processed this year, which is a decrease from 7364 processed last year.

In March, 3493 applicants were offered admission.

Davies said, "The admissions staff must keep in mind that its applicants are applying to a number of fine schools beyond Bucknell."

Davies said that determining the number of students to extend admission to is not an exact sci-

PUBLIC SAFETY LOG

March 27, 1996

INSTITUTIONAL VANDALISM—A University student reported to a Public Safety Officer of having heard unknown person(s) breaking five window panes in Swartz Hall. The windows were repaired and the incident is under investigation.

NON-EMERGENCY MEDICAL TRANSPORT—A University student was transported to Evangelical Hospital Emergency Room by a Student Health Service driver for treatment of a facial laceration.

March 28, 1997

LARCENY—A University student reported to a Public Safety Officer that unknown person(s) entered an unlocked dorm room and removed cash from a wallet. The incident is under investigation.

March 29, 1997

VANDALISM/TAMPERING WITH FIRE EQUIPMENT—A University student reported to a Public Safety Officer that unknown person(s) had partially discharged the contents of a fire extinguisher in Swartz Hall. The extinguisher was replaced and the incident is under investigation.

INFORMATION/FOUND PROPERTY—A University student reported to a Public Safety Officer that an unidentified individual checked in a VCR allegedly found in the area of the fraternities to the library. The VCR will be returned to the owner and the incident is under investigation.

MISSING PROPERTY—A University student reported to a Public Safety Officer that a fire extinguisher was missing from Vedder Hall. A search of the area met with negative results. The extinguisher was replaced and the incident is under investigation.

VANDALISM/TAMPERING WITH FIRE EQUIPMENT—A Public Safety Officer responded to a fire alarm activation in Vedder Hall. An unknown person had activated a pull station. A search of the area was conducted and the incident is under investigation.

VANDALISM/TAMPERING WITH FIRE EQUIPMENT—A Public Safety Officer responded to a second fire alarm activation at Vedder Hall. An unknown person had activated another pull station. The area was searched and the incident is under investigation.

UNIVERSITY PROPERTY DAMAGE—A University student reported to a Public Safety Officer that a door in Vedder Hall was damaged, making it difficult to secure. Physical Plant was requested to make the repairs.

March 30, 1997

ARSON—A Public Safety Officer responded to a fire alarm activation in Swartz Hall. University students advised a Public Safety Officer that they had extinguished a bulletin board fire that had been ignited by unknown person(s). East Buffalo Township Police Department was notified and the incident is under investigation.

INFORMATION/AUTOMOBILE HIT & RUN—A University student reported to a Public Safety Officer that a vehicle was damaged while parked in the Gateway Lot. The incident is under investigation.

VANDALISM—A University student reported to a Public Safety Officer that a window in a Vedder Hall room was broken. The incident is under investigation.

VANDALISM—A University student reported to a Public Safety Officer that a vehicle was damaged while parked at the rear of Carey House. The incident is under investigation.

LARCENY/THEFT BY UNLAWFUL TAKING—A University student reported to a Public Safety Officer that his jacket was removed from Tau Kappa Epsilon Fraternity while he was visiting there.

March 31, 1997

INSTITUTIONAL VANDALISM—A University employee reported vandalism to two Bucknell vehicles and property missing from two additional vehicles. The incident is under investigation.

MOTOR VEHICLE THEFT—A University student reported that a Bucknell University van had been left to the rear of a residence on S. 4th St. in Lewisburg. The Lewisburg Police were notified. The incident is under investigation.

LARCENY/BICYCLE—A University student reported a bicycle taken from the Smith Hall bicycle rack, where it was secured. The incident is under investigation.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

Seniors to complete new survey

Standardized national survey "significantly shorter," Hoyt says

BY MELISSA ROVERTS

The class of 1997 will be the first group of seniors at the University to complete the College Student Survey, a new standardized national questionnaire. Typically administered at the January registration, the new survey will be completed in April beginning this year.

Upon returning from spring break, all seniors received a letter from President Adams and a joint letter from Arlyne Hoyt, director of Psychological Services, and Jerome Rackoff, director of Institutional Research, encouraging their participation in the annual Senior Survey.

Fortunately for the senior class, this year's survey, produced by a California association called the Higher Education Research Institute, will be "significantly shorter," Hoyt said. The new survey differs from the old survey in detail, wording and context, although the issues and goals are similar. It will also include some "local questions" in keeping with issues of direct significance to the University.

Rackoff expressed concern that administering the questionnaire at January registration prevented an accurate account of the senior year. Therefore the test dates this year are April 16 and 17 to capture reactions as the senior year is almost at a close. The change in time will be important because of the need to evaluate the capstone experience.

Rackoff stated some reasons for using the new survey. Private institutions are responsible for self-regulation in order to receive accreditation. Rackoff explained, "all educational institutions begin with a mission. It's a statement of purpose—What are we as a higher education institution trying to do?"

From this mission statement, a number of programs are put into place and as students prepare to graduate, the opportunity arises to determine how effectively this mission was accomplished. "What kind of difference have we made as an institution after four years?" Rackoff quoted as one question in which the survey aims to give insight.

The Freshmen Survey provides baseline data and is used in conjunction with the Senior Survey to identify variances in student experiences such as between Greeks and independent students or between students who participate in sports and those that do not. Gender distinctions and the development of students in one particular major as opposed to another constitute other areas to be scrutinized.

Amherst, Colgate, Franklin and Marshall and Lafayette are some of the other colleges and universities that use the College Student Survey. Using this standardized survey will help to determine how the University is changing in relation to other schools, although HERI will not disperse data about individual institutions.

In response to questions of distribution of this survey's findings among the graduating class, Hoyt said that such information has been available upon request in the past because results usually are generated in the summer and locating the graduates is difficult.

Rackoff further explained that with the new agency, they anticipate the initial results to be in the form of raw data which require interpretation.

After trends and evaluations are completed, this information might be more interesting and appropriate to be shared with certain groups.

When asked how his staff plans to consider the students' comments, President William D. Adams said, "I would hope to discuss the results of the survey in a focused way with my senior colleagues—probably in a meeting that includes the director of Institutional Research [Jerome Rackoff] and any summary analysis he provides."

In regard to the "significant influence on the educational experience that Bucknell offers to its students" cited in the joint letter, Rackoff said that the results can be advantageous as a reference tool for improving the University's programs and policies.

Furthermore, college catalogs will now have substantive information available and a more reliable, accurate representation of the student body than they would have obtained through interviews with a small sampling of students.

Hoyt concurred and cited the data's importance in dispelling myths about Bucknell. She illustrated that a few years ago, the University was able to defend itself using its available data when the *New York Times* printed an article that presented an inaccurate depiction of the University. An accurate representation, of course, hinges upon participation in the program which has been a 27 year tradition.

ELECTRICITY

from page 1

least inconvenient for students and are cognizant of the fact that it was a major inconvenience to students, but it was just not a good situation."

He added, "We didn't allow ourselves enough time to do all the testing when we estimated the amount of time the project would take; we thought we'd be done before dark. Unfortunately, we did not have everything planned out in enough detail. [The delays] did give us the advantage of planning things more."

The conversion project was originally scheduled to occur during spring break, Knight explained, but the Physical Plant was forced to push the project back when some of the electrical equipment did not arrive on time.

Knight said that the Physical Plant chose to carry out the conversion last Saturday, because each day the conversion is delayed "will end up costing the University about $5000 in the long run. This is a huge and complex project, and a certain order must be followed in carrying it out."

Most residents of the three dormitories were unsympathetic to the Physical Plant project. Public Safety cited numerous incoming calls from students angered and concerned by the lack of power in the three residence halls.

Robert Sherwood '99, a resident of Swartz Hall said, "Besides the obvious nuisances involved, I feel that the inherent dangers involved in turning off the power for such an extended period of time were overlooked by the administration. Students were forced to use bathrooms left pitch black by lack of emergency lighting, a problem that should have been addressed before the project was approved.

Suzanne Nogami '99, also a resident of Swartz Hall said, "I thought that they could have done it at a more convenient time, maybe during spring break, when most people were not here."

An article detailing the Physical Plant project will be featured in the Science and Technology section of *The Bucknellian* on April 17.

ADMISSIONS

from page 1

ence.

The admissions staff has a target number of 890 first-year students that they would like to see attend the University next year.

Davies said that this target number, comparatively similar to last year's first-year student total of 894 and the previous year's 910 students, was developed in consideration of a five-year strategic plan to strengthen the success of the admissions process. The goal of the plan is to diversify the student body at the University, while maintaining the optimal size of students that attracts others to the University.

The exact number of students who will comprise the class of 2001 will not be determined until May 1, the deadline for students to respond to their acceptances.

Those students who were accepted early decision and general decision are invited to visit the University campus on April 12 for "Admission's Day."

Alleged trespasser charged

Marcus J. Hernandez '00 was charged with trespassing and alcohol violations by the East Buffalo Township Police Department on Friday. Hernandez unlawfully entered the residence of Michael Popp of 241 South 13th Street in Lewisburg at 3:30 a.m., according to an East Buffalo Township Police Department release.

Hernandez proceeded to the second floor before he was confronted by Popp, who detained Hernandez until the police arrived, the police release said.

Hernandez was arraigned in Middleburg and released on a signature bail, the release stated.

National Briefs

Documents: Tobacco industry targeted by age, gender, race

PHOENIX — In the early 1960s, the tobacco industry knew of nicotine's "severe toxicity," targeted potential smokers as young as 16 and marketed brands especially for black, Hispanic and Jewish smokers, documents released Tuesday show.

Made public by Arizona's attorney general, the documents represent only a fraction of the thousands of papers Liggett is turning over to Arizona and 21 other states as part of a landmark settlement.

On March 20, Liggett admitted smoking was addictive, something the tobacco industry has long denied, and agreed to pay one-quarter of its pre-tax profits over the next 25 years to offset the costs of smoking-related illnesses.

Most of the documents are under seal until state judges determine whether to release them. Arizona Attorney General Grant Woods said the papers released Tuesday do not fall under the attorney-client privilege and are not under seal. Liggett delivered the papers to his office over the weekend.

Snow causes power outages, travel delays

NORTHEAST U.S.— Snow-melting temperatures were forecast in the Northeast yesterday, but tens of thousands of people had no electricity for a third day, following the region's biggest April snowfall on record.

Authorities predicted that it could take days to clear all the roads, and electric utility officials said some customers may be without power until Friday.

At least five deaths were blamed on the storm, which at its peak knocked out power to nearly 13 percent of New England.

The storm, which began on Monday, dropped up to three feet of heavy, wet snow from the mid-Atlantic region through New England, shutting down schools and businesses and stranding thousands of travelers.

Strong winds, combined with the snow, brought down trees and power lines.

The snow should disappear quickly, as temperatures are expected to climb into the 50s and 60s over the next few days.

USDA: Berries shipped to schools may contain hepatitis

LOS ANGELES — School children in six states may have been exposed to the hepatitis A virus by eating contaminated frozen strawberries that were shipped to school cafeterias. The processor and packer of the berries could face criminal charges, sources told CNN.

The United States Department of Agriculture, which provides surplus food to school lunch programs, distributed the berries.

Initial reports indicated 16 states and the District of Columbia might have received tainted strawberries and had been asked to "put a hold" on the fruit.

But yesterday, the USDA and the Food and Drug Administration said only six states received berries believed to be linked to an outbreak in Michigan because all bore the same lot number. Those states, in addition to Michigan, are Arizona, California, Georgia, Iowa and Tennessee.

Another potential juror says no to death penalty

DENVER — The thirteenth prospective juror questioned in the Timothy McVeigh bombing trial cited Biblical texts when she told the judge and prosecutor yesterday she could not condemn somebody to die.

Questioning of candidates in the morning session of day three moved on at a quicker pace than the first two days of the trial's first phase.

The fourteenth prospective, another woman, said she's involved in a court fight to save her farm that will conflict with the trial. The fifteenth was a man, the seventh to be questioned.

The first prospect questioned yesterday, juror No. 101, quoted the biblical story of how Christ told those about to stone an adulterer, "Let you who is without sin cast the first stone." She told U.S. District Judge Richard Matsch, "I don't feel capable of throwing that first stone."

She said she believes there are crimes for which the penalty should be death, but only God can choose.

"Human judgment has angles and agendas and imperfections," she said, "and I don't feel I can condemn someone."

World Briefs

Israel approves expansion of West Bank settlements

JERUSALEM — The Israeli government has quietly approved further expansion of Jewish settlements in the West Bank — a decision made even as tensions escalate over a controversial housing complex being built in East Jerusalem.

Yesterday, David Bar-Illan, an adviser to Prime Minister Benjamin Netanyahu, confirmed an Israeli television report that the government had in recent days given approval for more homes to be built for Jewish residents in the West Bank.

But Bar-Illan said the report on Israel's Channel 2, which put the number of new houses in the "thousands," was exaggerated.

The decision to expand settlements could further inflame passions in the Middle East, where there have been daily demonstrations for the past two weeks over Netanyahu's decision to build a Jewish settlement called Har Homa in a historically Arab section of Jerusalem.

Adding to the unrest yesterday, a bus carrying Israeli civilians and soldiers overturned in the West Bank after a firebomb was thrown at the vehicle. At least 13 people were injured.

Major promises lower taxes as British election nears

LONDON — Prime Minister John Major yesterday promised low taxes and a hand-up for the have-nots as part of a 25-point platform for the May 1 election that he said would help make Britain the best place in the world to live.

Describing his election manifesto as the boldest any party had published since the ruling Conservatives took power in 1979, Major outlined a wide range of policies aimed at countering charges that his government had run out of steam and ideas.

Buoyed by an opinion poll showing that the lead of the opposing Labor party had fallen to 14 percentage points, Major said the manifesto was being published against a backdrop of a booming Britain that could look forward to a prosperity undreamed of a few years ago.

The only new policy in the 56-page program encapsulated Major's ambition to cut taxes and show that Labor does not have a monopoly on measures to help the less well-off.

Zaire rebels: New prime minister changes nothing

KINSHASA, Zaire — Zairian opposition leaders said yesterday that President Mobutu Sese Seko has accepted longtime rival Etienne Tshisekedi as his new prime minister. But rebels who control up to a quarter of the country said the development made no difference to their goal of removing Mobutu from power.

Separately, a U.N. human rights investigator accused rebels, who began pushing across eastern Zaire late last year, of massacring Rwandan refugees and urged a speedy investigation.

Roberto Garreton said upon his return to Switzerland from a three-day visit to the Zairian border town of Goma that Tutsi-led rebels had failed to come up with satisfactory answers to allegations of killings, torture and disappearances.

Aid workers meanwhile prepared to repatriate 4,000 Rwandan Hutu refugees after months in the jungles of eastern Zaire and expressed despair for the fate of 80,000 more south of the northeastern city of Kisangani.

Convicted killer ordered shot, nailed to cross in Yemen

SAN'A, Yemen — A Yemen court yesterday rejected an appeal by a man found guilty of killing six people and ordered him executed by firing squad and his corpse nailed to a cross and displayed in public for three days.

A court on Monday sentenced Mohammed al-Nazari to death for the weekend slayings, which occurred at two high schools. The appeals court said displaying the body in public would serve as a warning to potential criminals. In Yemen, death sentences are usually carried out by firing squad and the bodies buried immediately.

The execution was expected to take place Friday after Muslim noon prayers, but no official date was set.

Campus Briefs

Alumnist to discuss entrepreneurship at Bucknell

Glen Tullman '81 will speak on "Innovation and Entrepreneurship: Making Ideas Come to Life" at 7 p.m. on Tuesday in the Langone Center Forum. The presentation, which is open to the public, is sponsored by the economics and management departments. Tullman is the chief executive officer of Enterprise Systems Inc., headquartered in Wheeling, Illinois.

CCS staff member receives Army Public Service Award

Will George, a client services analyst with the University's Computer and Communication Services, was recently awarded the Commander's Award for Public Service from the United States Army. The army medal, which may be awarded to civilians not employed by the Army, "recognizes service or achievements that contribute significantly to the accomplishment of the mission of an Army activity, command or staff agency." George, who is a client service analyst for the military science department, "distinguished himself by problem solving U.S. government and Bucknell computer system incompatibility and reprogramming system software to enable the department to maximize the potential of automation and information management," according to a Public Relations news release.

University to host Mid-Atlantic Regional AIChE Conference

The University will host the annual Mid-Atlantic Regional American Institute of Chemical Engineers Conference on April 4 through 6. George Keller, a senior corporate research fellow and manager of the separations and process fundamentals group, research and development department of the Union Carbide Corporation, will present the annual Ralph B. Derr Memorial Lecture, "The Removal of Organic Contaminants from Gaseous Waste Streams" at 11 a.m. on Friday in the Gallery Theatre in the Langone Center.

Keller will give a keynote talk entitled "Scaledown of Separation Processes" at 7 p.m. on Saturday after the dinner banquet held in the Terrace Room, which begins at 6 p.m.

Twenty-four papers will be presented by undergraduate chemical engineering students from several universities on Saturday between 9:30 a.m. to 4 p.m. in the Dana Engineering building. A schedule of events will be posted in Dana on Saturday. Interested persons can call 524-1114 for a complete schedule of topics.

Cycling race to close Moore Avenue

The Bucknell Cycling Team will compete against the best collegiate cycling teams on the East Coast in the 1997 ECCC Prestige Race held on campus April 5 and 6. Because cyclists will be finishing the race on Moore Avenue, there will be no parking on Saturday or Sunday on Moore Avenue.

Phi Gamma Delta to host semi annual philanthropy

The brothers of Phi Gamma Delta fraternity will be hosting Luigi Fiji, their semi-annual fund-raiser on April 4 and 5. Proceeds from this non-profit event will be donated to the Lewisburg Little League.

The event is an Italian style dinner, sponsored by many local restaurants and businesses. Stromboli, pizza, spaghetti, meatball and sausage grinders, zeppoli and garlic bread are some of this year's menu items. Luigi Fiji is being held at the Phi Gamma Delta House, located at 78 University Avenue, from 5 p.m. to 8 p.m. on both Friday and Saturday nights. Meals are approximately five dollars.

The Bucknellian Advisory Board seeks new members

There are openings on the Advisory Board to The Bucknellian. Faculty members with a strong interest in students and the student newspaper who are interested in being a part of this board should contact Katherine Wheatcroft, adviser to The Bucknellian. She can be reached at x1488.

Special Programs for Special Interests

1997 SUMMER WRITING INSTITUTE

Twentieth-Century American Poetry
June 26, 27, 30, July 1 & 2, 1997
9:00 a.m.-4:00 p.m. 3 graduate credits

Fiction Writing Seminar I
July 14-18, 1997 (Mon.-Fri.)
9:00 a.m.-4:00 p.m. 3 graduate credits

Remembering: From Image to Memoir (Creative Nonfiction)
July 21-25, 1997 (Mon.-Fri.)
9:00 a.m.-4:00 p.m. 3 graduate credits

Writing for the Magazine Market
July 28 - August 1, 1997 (Mon.-Fri.)
9:00 a.m.-4:00 p.m. 3 graduate credits

ELDERHOSTELS

Elderhostel I - July 13-19, 1997
(Sun.-Sat.), 8:00 a.m.-4:30 p.m.
I. The Nighttime Sky: Our View of the Universe
II. The Mystery Film

Elderhostel II - July 20-26, 1997
(Sun.-Sat.), 8:00 a.m.-4:30 p.m.
I. Masters of Jazz
II. A Summer Jazz Festival
III. Ireland Through the Images of William Butler Yeats

Elderhostel/Habitat for Humanity III
July 13-19, 1997 (Sun.-Sat.), 8:00 a.m.-4:30 p.m.
July 20-26, 1997 (Sun.-Sat.), 8:00a.m.-4:30p.m.

Elderhostel II & III participants are invited to attend WPC's week-long "Jazz it Up!" festival.

JAZZ IMPROVISATION WORKSHOP FOR HIGH SCHOOL AND COLLEGE STUDENTS
July 20-26, 1997 (Sun.-Sat.) 8:00 a.m.-4:30 p.m.

SUMMER INSTITUTE IN HEALTH EDUCATION FOR TEACHERS

Selected Topics in Nutrition for Educators
July 7-10, 1997 (Mon.-Thurs.)
10:00 a.m.-3:00 p.m.
1 graduate credit or noncredit

Selected Topics in Mental and Emotional Health for Educators
July 14-17, 1997 (Mon.-Thurs.)
10:00 a.m.-3:00 p.m.
1 graduate credit or noncredit

Selected Topics for Educators: Communicable and Chronic Diseases for Educators
July 21-24, 1997 (Mon.-Thurs.),
10:00 a.m.-3:00 p.m.
1 graduate credit or noncredit

MULTIMEDIA CERTIFICATE COURSES FOR GRAPHIC DESIGNERS, MARKETING PROFESSIONALS AND EDUCATORS

I. Introduction to Web Design and Implementation
August 18-19 (Mon.-Tues.)
9:00 am-4:00 pm noncredit

II. Introduction to Multimedia Using Macromedia Director
August 20-21 (Wed.-Thurs.)
9:00 am-4:00 pm noncredit

CUSTOMIZED TRAINING PROGRAMS

Developed to fit particular organizational needs, cost-effective quality training sessions are offered to your employees at your facility or on the college campus.

- Computer Software Instruction (a state-of-the-art networked multimedia computer laboratory is used for training)
- English as a Second Language
- Foreign Language Instruction
- Business Writing Skills
- Communication Skills (public speaking, presentation skills, etc.)
- Communication for Business and Organizational Leaders

SUMMER TRAVEL

The Ancient Anasazi: Geology and Prehistory of America's Southwest
May 18-31, 1997
3 undergraduate credits or noncredit

Italy, The Grand Tour: Rome, Florence and Places in Between
May 23-June 3, 1997
noncredit

Mexico: From the Mayans to the Biosphere
July 11-20, 1997
3 undergraduate credits or noncredit

THE CENTER FOR Continuing EDUCTAION

For more information on any of these programs, please call The Center for Continuing Education at

News Feature — Study Abroad

Senior tandem returns from school in the Netherlands

BY JEN BEAUCHAMP AND TOM LABADIE

Two University seniors were among the first American students to attend the Akzo Nobel International Business Course in the Netherlands in February.

This four-day course, sponsored by Akzo Nobel, a Dutch chemical and pharmaceutical company, provided an opportunity for engineering and business students to learn about the company as well as international business. As participants, Tom Labadie '97, a chemical engineering major and Jennifer Beauchamp '97, an accounting major, interacted with European students through various activities, including group discussions, outdoor team assignments and case studies.

The overall theme of the course was "Strength in Diversity." The programs focused upon multiculturalism and product diversity, two of Akzo Nobel's primary strengths.

Each day emphasized a different one of Akzo Nobel's four business units: fibers, coatings, chemicals and pharmaceuticals. "While learning about the chemicals unit, we were involved in a case study about developing a market for a new application of one of their products. Our roles were switched so that the business people acted as engineers and vice versa. It was challenging and exciting to learn about how it is done by the other guy," Beauchamp said.

The course presented a unique educational business experience. "Everyday we were faced with new opportunities to learn about ourselves... One morning we had three hours to build and overcome eight rope and wood obstacles. For instance, I helped transform 10 four-foot two-by-fours and 25 pieces of two-foot cord into a free standing ladder which everyone had to climb over. With 30 newly acquainted individuals, we all had to recognize our own personal strengths and abilities in order to accomplish the task," Labadie

In addition to the United States, participants came from Holland, Sweden, Austria and Germany. To prevent language barriers, the course was presented in English only. The students ranged in ages from 21 to 27 and will all be receiving either their undergraduate or graduate degrees by August 1997. Their degrees include chemical engineering, economics, accounting, marketing and MBAs.

Most of the participants had prior international experience either through study abroad programs or overseas internships. All students were provided travel to and accommodations at the Hotel Harrhuis in Arnhem, where the Akzo Nobel World Headquarters is located.

The opening day of the course began with an overview of Akzo Nobel's company structure and was highlighted later by dinner at Doorwerth Castle. During dinner, students had the opportunity to meet Mr. Cees van Lede, chairman of the Board of Management. "It was very exciting to meet Mr. van Lede. I never would have thought that the leader of a 70,000 employee company would be so easy to talk to," Beachamp said.

The days began at 8 a.m. and ended around 10:30 p.m. This time was broken down into two to three hours of lecture, three hours of group discussion and three hours of case studies. "The course was intense—there was a lot of information presented and the days were long. But since we covered a wide range of topics and the activities were varied, it was very exciting as well," Labadie said.

During lunch and dinner, young professionals were available for questioning about their experiences while working for Akzo Nobel. "Most of the formal programs were presented by corporate executives. It was a nice change of pace at meals when I was to able to speak with the younger employees who are currently working in positions which I may have an immediate interest in," Labadie said.

At night, many students went to a local pub to socialize for a couple of hours. "Going out at night gave us a good opportunity to get to know the other students better. I really enjoyed learning more about them and their countries," Beauchamp said.

Participation in the course was made available to University students through strong University alumni relations. Mack Day, a Bucknell alumnus and current director of Human Resources for Akzo Nobel Chemicals, Inc. in Chicago, contacted Tim Sweeney, professor of management and Dr. William King, chairman of chemical engineering, to assist in the recruitment and selection process.

"This course is an excellent opportunity for our students to experience a learning opportunity with diverse cultures from all over the globe. We are deeply appreciative and grateful to Akzo Nobel, and particularly to Mr. Day for his continued loyal support of Bucknell students," Sweeney said.

FIRE from Page 1

particular student."

DeCerchio said that Public Safety has taken increased security measures to prevent the risk of other "fire-related" incidents occurring in residence halls, but he "would rather not reveal the specifics."

He added, "We do have a window period when they usually occur and where they usually occur."

DeCerchio indicated that if the offender in any case involving arson, or false activation of a fire extinguisher or alarm, is apprehended, he or she "will be given the severest penalties. They would have to go through the University judicial system, and, in all likelihood, we'd probably file criminal charges."

Gerald Commerford, associate dean of students, is responsible for deciding when it is appropriate to offer rewards to students helping in a criminal investigation.

Concerning this week's incidents, he said, "The University is extremely concerned about all areas of fire safety, whether it be arson, the pulling of a fire alarm, using a fire extinguisher without cause, possession/use of candles, because of the potential and real danger they place the students in. Consequently, we will do all we can, including offering rewards to identify the irresponsible individuals who jeopardize the safety of others."

He added, "I firmly believe that incidents of this nature will continue to occur until students take exception to the behavior of identifying those who are a threat to the community."

SNOW from Page 1

he hit this patch of snow, his car started to skid and he lost control of his car which kept skidding back and forth. "It was the worst driving I have ever done," Colello said.

Susan Hermansen '97 said, "I left at 10 a.m. [from Connecticut] and I didn't get back until 9:30 p.m. The roads were absolutely horrible, I saw so many accidents."

Where interstate 81 intersects interstate 80, Hermansen was stopped for three hours. She said that she had to "shut off the engine to save gas and keep turning it back on for heat."

When they were able to get off the interstate, they decided to get a hotel room. They stopped at a truck stop and "heard that there were no rooms."

SPRING HAS SPRUNG AT BJ'S!

The air is filled with the sounds and smells of Spring: sizzling, smoky baby back ribs grilling on an open flame, smothered with BJ's own BBQ sauce... and you feel like celebrating! There's nothing like a family get-together over BJ's juicy charbroiled steaks to mark a truly memorable occasion... we're the greatest place to celebrate! Whether it's Graduation Day, or a simple family outing, let BJ's help you put the warmth in your Spring Celebration. It'll be an event you'll never forget!

The Bubble breaks, spreads environmental awareness

BY TRACY THIFFAULT
Bucknellian Staff Writer

A common interest in the environment brought a group of students together to publish *The Bubble*, a new University environmental newsletter promoting environmental awareness. Their aim is to get more students active in preserving the environment by participating in progressive acts on campus.

Currently, "the University's surroundings aren't conducive to environmental activity, but people can be swayed to be environmentally conscious," said Mike Walters '00, one of the editors.

We want to be the "nagging reminder on your shoulder," said Kellem Agnew '00, another editor.

The group believes that more important than recycling is reusing, and more important than reusing is reducing. They have set up "Bubble Boxes" in computer labs located throughout campus for students to donate one-sided used paper. *The Bubble* then uses the other side to print their newsletter.

Most of the staff of *The Bubble* are members of the environmental residential college for first year students. The idea for the newsletter came up in their foundation seminar, "Environment in Society," taught by Stephen Stamos Jr., professor of international relations.

The three editors, Andrew Taylor '00, Walters, and Agnew work together with the editor-in-chief, Mike McCaffrey '00 to think of story ideas, revise articles and distribute the newsletter. The group is advised by John Gillroy, associate professor of environmental studies.

The first issue of *The Bubble* came out in early March and was distributed in the Seventh Street Cafe and the Langone Center. The group hopes to publish one issue each month focusing on local and international news. The first issue focused on Electric Cars, the Japan oil spill and issues in Burma.

We're going to "see where it takes us, and come up with ideas as we go along," Walters said.

Members of *The Bubble* staff work together with SEAC, the nationwide Student Environmental Action Committee, to promote environmental awareness on campus. They're currently planning Earth Day activities for April 20th.

"We're still a little inexperienced, but we're doing okay," Taylor commented. "There are two things to look at," Agnew said, "*The Bubble* has been well received, but we can't determine to what extent our purpose has been taken."

"I've been receiving a lot of positive comments," Walters said. "We'll work out the rough edges and move on."

Jackie Debicella—The Bucknellian

The staff of The Bubble, Kellem Agnew, Anne Halgren, Karen Fadely, Mike McCaffrey, Jaymie Mackler, and Steve Grimes produced their first issue in early March. The staff is advised by John Gilroy, associate professor of environmental studies.

Caught in the Web: Best of Shockwave

BY CURRAN FILER
Bucknellian Staff Columnist

One of the most exciting things about the Web is the new software products that have been developed for it. Shockwave, created by Macromedia, is a software tool that allows web page designers to display animation, and create interactive applications on the Web. Many web pages now feature a Shockwave powered, interactive application that runs in real-time over the Web. It also supports streaming video and audio (audio and video files you don't have to download to use), which allows you to show a movie in real-time on your web page. New sites are created every day that take advantage of this software in new and interesting ways. This week I compiled some of the best Shockwave-powered sites.

Macromedia - Shockwave Download Center
`http://www.macromedia.com/shockwave`

This is Macromedia's Shockwave Download Center. You can download the proper version of the Shockwave player here. You must have the Shockwave player before you can use Shockwave applications.

Spacepirate
`http://spacepirate.com/game.html`

Spacepirate is an interactive, multi-player Web game designed by Clevermedia. It's set in the future and allows you to take the role of an outlaw trader traveling around space trying to amass a fortune. As computer games go it's quite limited, but the fact that it's played over the Web makes it amazing. This is by far the most complex and involved Shockwave game I've seen. You can interact in real-time with other players and it even saves your game.

Game-Land, A World of Games
`http://www.game-land.com`

This site is full of great Shockwave games, and even some contests. The games are small for the most part so they will be easy to download. They range from the classic gambling games to a game where you think up a caption for a cartoon drawn by their own in-house cartoonist.

Disney.com Home Page
`http://www.disney.com/index.html`

Disney has done some interesting things with Shockwave and its movies. They have Shockwave storybooks for some of their biggest movies, like Toy Story, 101 Dalmations and The Lion King. They also have Shockwave games based on the movies. The Toy Story memory game is addictive!

Amazing Fishtank!
`http://morganmedia.com/m2/shock.html`

The Amazing Fishtank is a simple fishtank simulation. You are given a small tank and two fish. One is a predatory fish and one isn't. You can also customize two fish of your own. Then you drop them in the water by clicking on their icon. The fish will swim around and eat each other. If you get tired of them you can drag them into the toilet.

Interactive Science Education
`http://www.ppsa.com/ppsa/science`

The Interactive Science Education site uses Shockwave to teach scientific principles over the Web. It was created by Raman Pfaff, who started creating it while he was working on his doctoral thesis at Michigan State University. Each of the interactive labs presents one scientific principle, and you can control the settings. I think Raman has created a great site here, especially since it is educational as well as fun.

Brain Teaser

A jailer unlocked every cell, then proceeded to lock cells 2, 4, 6... He then turned the key again in cells 3, 6, 9..., thereby locking some and unlocking others. He then turned the key once more in cells 4, 8, 12... Which cells were open at the end of this infinite process?

This week's brain teaser was contributed by Allen Schweinsberg, associate professor of mathematics.

Solution:

The cells that were open are 1, 4, 9, 16..., the perfect squares, because these are the only positive integers with an odd number of integer divisors. The cells are unlocked if the key is turned an odd number of times.

Science & Technology Calendar

Tues., Apr. 8 <u>Chemistry lecture at 7:30 p.m. in Rooke Chemistry Audtorium</u>
Dr. Heinz F. Koch, professor, Department of Chemistry, Ithaca College will speak on "Proton-Transfer Reactions Between Carbon and Oxygen."

Thurs., Apr. 10 <u>Mathematics Lunch Talk at noon in LC302</u>
Dr. Brian Conrey will speak on "Unsolved Problems in Number Theory."

Job opportunities with Computer & Communication Services

We have openings for:
Help Desk Assistants
Department Liaison Assistants
Lab Support Assistants
Software Development Assistants
Tutors/Trainers
Administrative Assistants

If you ...
- like to work with microcomputers
- want to improve your computing skills
- enjoy working with people

then apply for a job with CCS!

CCS student employees work at least 6 hours per week and attend weekly training meetings and regular training with staff members. Pay starts at $4.95/hour with promotion opportunities after one semester of work.

Applications are available from Ms. Mitchell in Room 101 Computer Center. Deadline to apply is Monday, April 7.

Ask the Doctor: What is CFS?

BY DR. COLLEEN FLAHERTY

Have you recently returned from spring break feeling tired? Too many late nights with too little sleep? Fortunately, most students rebound after a good night's sleep. However, imagine constantly feeling fatigued regardless of your activities. This is the experience of individuals diagnosed with Chronic Fatigue Syndrome (CFS). Approximately one out of every 10,000 individuals is afflicted. Statistically, it is most common in Caucasian females between the ages of 20 and 40 years of age.

Chronic Fatigue Syndrome is a difficult diagnosis to confirm since there is no specific test that is diagnostic. The etiology of this illness remains uncertain. Medical researchers have investigated multiple viruses such as Human Retrovirus, Enteroviruses and Ebstein-Barr Virus as causative agents, but results have been inconclusive. Physicians must rule out treatable conditions such as anemia, endocrine disorders, malignancy, HIV and Lyme disease before concluding that a patient has CFS. Diagnostic criteria of this syndrome includes persistent fatigue which has lasted for six months or longer. The fatigue can be so severe that activity is reduced to less than 50 percent of one's pre-illness status. This condition often begins abruptly, frequently following a viral illness.

In addition to overwhelming fatigue, patients can experience sore throat, low grade fever, swollen glands and body aches. Many patients complain of forgetfulness, difficulty with concentration, mood swings and depression. Sleep disorders can result despite their extreme fatigue.

Treatment of Chronic Fatigue Syndrome is palliative rather than curative. No one medication or therapy has been completely effective. Some individuals improve when prescribed with low dose antidepressants. Others respond to exercise programs and nutritional therapy. Support groups have been helpful in teaching patients mechanisms to cope with their illness. Fortunately, with time and plenty of rest, most patients recover.

EDITORIAL

Recent Swartz fires ignite school concern

The recent arson in Swartz only emphasizes one thing—how irresponsible students can be.

Individuals need to think twice before pulling stunts like this one, especially those that involve fire. Students may think that setting a bulletin board on fire will give them the time of their lives, but their actions come at the possible expense of other students' lives.

Granted, students will play pranks. In fact, college life might be rather dull without them. But when fire becomes a part of the plan, it goes way beyond a normal (and funny) college prank.

Unfortunately this is not the first time students have played with fire. At the beginning of the semester, another bulletin board in Swartz went up in flames. Last semester, a person or group of people went around stuffing gas rags in the exhaust pipes of several cars and setting them on fire.

Thanks to the keen eye of Public Safety and the quick thinking of some students, not one of these events resulted in serious damage either to the cars, the building, or any students. But we may not be so lucky the next time.

If endangering people's lives is not enough to stop some students from setting fires and tampering with fire safety equipment, what about a fine or jail time? Arson is a criminal offense, and if caught, the perpetrators will be punished to the fullest extent of the law. As they well should be.

Students must stand against these immature actions. Not only will everyone receive peace of mind, Residential Life is offering a $400 reward for anyone who can lead them to the guilty party, with an additional $300 for information about who dismantled the fire extinguisher the night before.

These more dramatic events aren't the only fire hazards created on campus. For some reason, students think that pulling down a little red handle is great fun. The loud fire drill must enthrall them. While activating a fire alarm may seem harmless, it actually presents a case similar to "The Boy Who Cried Wolf."

There's only so many times people will react to fire alarms with urgency before realizing that most (if not all) of them are false alarms. When a fire does indeed spark, it's hard for students to take the resulting alarm seriously, thinking it's just another practical joke.

And if someone just happens to dismantle the fire extinguisher before setting a fire, the result easily could be some injured students. Or worse.

And that's not funny.

OPINIONS

Internet has positive and negative societal, ethical implications

Divisive issues such as pornography, radical religious ideas need to be addressed in relation to efficiency and benefits

BY NORA DANIELS

Bucknellian Staff Columnist

The Internet. It's everywhere.

A lot of our Bucknell life focuses on it. It's where we find sources for papers, it's where we search for jobs, and it's where some of us take quizzes and exams. In a way the Internet controls much of our lives... If you don't think that this is true, you must never have visited a computer lab when the Internet connections are off.

College students, though, aren't the only ones whose lives tend to revolve around the ever expanding Information Super Highway. Businesses, magazines, newspapers and individuals alike employ web pages to reach the public, selling and influencing inhabitants of the world (not just America) about their merchandise, services and ideas.

Since news is reported as it occurs, and other information is available 24 hours a day, it is no wonder why all the major industries of the world rely on the Web.

In many ways the Internet is useful and speeds up our efficient, cost-counting way of life. Still, nothing is perfect, not even this resource that has changed society in so many ways. Is its strong influence on each and every one of us, "connected" or not, too strong?

Residents of San Francisco County, California, may be especially anti-Internet this week, as a result of finding 39 people dead in a mass suicide there last weekend. The group of individuals involved were very active in their use of the Internet.

Sometimes termed "Web Wizards," people who are highly skilled in creating web pages have been in much demand over the past few years, and this suicidal group was an organization of web wizards. They had a web page that proclaimed their beliefs, including the idea that they needed to end their lives to get to the next level.

Now they are dead, but questions remain. Should groups with these kind of radical and detrimental ideas be allowed to use the Internet?

Some people, like the neighbors of the San Francisco group, are up in arms over the fact that the group's ideas were available for all to see on the Internet. And in relation to the availability of information on the Web, what about pornography?

To me, it comes down to this: People who want to find radicals like the suicidal group will do so, whether it's on the Internet or not. People who want porn will get porn whether it's on their computer or not. So in answer to those who want to screen the 'Net, I say that your idea may seem like a good way to protect surfers, but it probably won't work.

The Internet may control much of our lives, and it will probably control even more of the lives of future generations, but we are still individuals. We don't need to control it.

Thirty-nine deaths is a tragedy. Porn on the World Wide Web is disgusting. But we can't blame or censor the Internet, because it is too encompassing and strong to start trying to control. And maybe, if we accept its positive influences in our lives, we will someday not have to worry about the negatives, which hopefully will become less prevalent.

> ***In many ways the Internet is useful and speeds up our efficient, cost-counting way of life. Still, nothing is perfect, not even this resource that has changed society in so many ways.***

Speak Out

How do you feel about the recent fires set in Swartz? If you were a resident, would you be concerned?

Sarah Kobielski '00

"It's wrong. If anything, it's just kids being dumb. I'm not too worried."

Ellen Mager '97

"The people in Swartz should be worried. Giving a reward is a good idea, because people tend to work on that sort of system."

Jared Peretin '99

"I guess setting bulletin boards on fire doesn't pose a big danger, but the people doing it are pretty stupid."

Emily Gilbert '99

"I think it's really scary that there's an arsonist on campus who is premeditating fires. I'm glad I live on the second floor so I can jump out my window."

Bison, meal credit policies need improvement

Quantity of french fries, "Hashbrown Rule" and size of cereal all receive student's criticism

BY ARGUN ULGEN

Bucknellian Staff Columnist

Being that I'm a big fan of junk food, it seems that the Bison would be the perfect place to eat at the University. Yet the overpricing of meals as well as certain policies have made many of my eating experiences at the Bison less than pleasant.

Let's start off with the meal credit policy. Food at the Bison is more expensive than at the caf, while meal credit prices are really low. Logically, this means that a meal credit plan at the Bison will only give you a very limited amount of food each meal. In fact, you get about three to four dollars less at the Bison than you do at the caf for breakfast, lunch and dinner meal credit. This is simply not fair.

Rather, we should be allowed to have the same meal credit purchasing power that is granted to us in the caf. We are hard-working students and deserve to have greater masses of high quality food if we choose not to eat at the caf. I am disgusted by the fact that a breakfast meal credit is only enough to get one bison breakfast and a small drink. We are growing boys and girls and should have enough meal credit to get TWO bison breakfasts, if not three or four.

And then, they have those unfriendly polices such as the Hashbrown Rule. This rule states that you cannot purchase hashbrowns after eleven o'clock. Yet, some people enjoy eating their breakfasts from 11 a.m. to 12 p.m. This hour still qualifies as the morning anyway. We should have the right to request ALL BREAKFASTS in the morning, no matter what type of breakfast it is. I'm outraged at the uptight attitude of this policy.

Another policy is the placement of french fries and cajun fries into those little boxes. Did you ever notice that some of those boxes have six fries in it, while others have 30? The cooks at the Bison should be ordered to put an equal amount of fries into every container so that customers don't get deprived of their fair share of fries. This is only right, since we will probably lose half of our meal credit on the fries anyway.

Prices are also another thing that turns us Bucknellians off at the Bison. Since when should a small box of cereal cost 75 cents? The people at the Bison are trying to make some outrageous profit off those students who miss the cafeteria hours due to classes or sleep deprivation. As cereal is an important part of our daily nutritional supplement, it is only fair that the Bison charge the percent of cereal in the box in proportion to a regular box of cereal. (That would be about 10 percent. A box of cereal costs around $1.39, So we should pay around 40 cents for that small box of cereal!)

Don't settle for the caf, even though it may give you all that you can eat for free while the Bison is overly expensive. Eating higher quality food will raise our productivity, strength and overall happiness at the university! We should demand the best for ourselves, and right now the best is at the Bison (until we finally get a Pizza Hut or some better restaurant on campus)! Therefore, my fellow Bucknellians, rise and encourage the managers of the Bison to meet our needs in a more suitable manner! Lower prices, more meal credit power, more hashbrown hours, and equity in french fries... we should have it all.

OPINIONS

Students live jaded lives

BY ALLISON PRICE

Bucknellian Staff Columnist

There are several levels of resentment shared by Bucknell seniors in terms of the newly dry Tent Party.

On one level, there is a sense that after four years of paying tuition at Bucknell, seniors are entitled to a university funded event with the god of alcohol. On another level, there is a notion that Tent Party was the one event that included all Bucknellians regardless of Greek or any other affiliation and was funded by a system that has long supported the abuses wrought by wayward Greeks. This is the same system that seems perfectly at ease making a token gesture at combating the alcohol problem when most people know where real problems exist. There is also the idea that if most of the seniors disagree with the administration's decision, the decision should be reconsidered.

This is all gone now, the illusion of privilege, power and ultimately, entitlement. Any semblance of a community gathering was shattered when seniors found out that not only their families but that they themselves would have to pay to attend the graduation picnic. Even those seniors who shied away from exerting their inherent right to alcohol are now annoyed. It costs to get in, and while $15 may not seem like that much, concretely and metaphorically you have to pay to play, to be a part of the community.

It is possible that there is greater principle to be found in boycotting the picnic. Remember, picnics have long played a role in American social history as the leisure, upper classes were always able to take off from work and picnic as the workers did their jobs.

Oh yes, the jobs. It seems that the outrage over Tent Party and the ultimately more meaningful complaints lodged by those who feel shut out of the golden promise of post-Bucknell employment are the greatest sense of unfairness and shafting that many Bucknellians have felt in a long time, perhaps their entire lives. In this, there is the illusion of what Bucknell means versus one of those lowly state schools.

In the end, there are really no guarantees. For the past four years seniors have worked, paid or loaned themselves into the next millennium. There are particularly no guarantees if you have stepped outside of the Bucknell capitalist carousel and are reaching for a different golden ring than the ones to be found in big business and industry. The myth is that if you have got in, graduated and before anything else, pulled off the Bucknell mortgage, they'll take care of you.

This is all embodied in the big catch phrase of Bucknell comfort—networking. For those who have not yet fully embraced the culture of entitlement, networking means that they know people, mostly Bucknell alumni and fans, who can hook you up to the future you have always dreamed about. There was a non-profits organization job fair until it became insufficiently cost effective.

In the end, networking and the mentality that cultivates it reproduces and maintains every inequity in American society. On one level, there is the difficulty minorities and women find in getting into professions and companies that have long gone to only those who have networked in by the power establishment already in place. On a much deeper level, it all comes down to class.

This is the real illusion of entitlement and power, the lesson of the pay to partake metaphor. For more Bucknellians than you think, this has been the essence of their experience at this university. Internships are great for networking and making those illustrious connections, if you can afford not to work and save money for a summer. A relevant off-campus job is great, if you have a car. There are also seniors here who will find themselves cut off from any health insurance the day they graduate.

I have sat through many classes at Bucknell and watched the sea of complacent faces, wondering what great injustice could be described that could really raise their anger or consciousness. Then came Tent Party. In one way or another, it is always means tested.

Hopefully, if Bucknell teaches anyone anything, a dry and costly graduation will not be the most unfairly treated students ever allow themselves to feel. And how does it feel? In the end, illusions detract from reality and always make you feel better. Unfortunately, we have been trained to be content and embody complacent comfort.

Gingrich errs with Chinese

House Speaker's comments exacerbate tensions

BY TODD ZERANSKI

Bucknellian Staff Columnist

This past weekend while visiting China, Speaker of the House Newt Gingrich proved himself to be quite tactless and unaware of the delicacy of current Sino-U.S. dialogue."I said firmly, 'We want you to understand we [the U.S.] will defend Taiwan'. I think that they are more aware now that we would defend Taiwan if it were militarily attacked," Gingrich said.

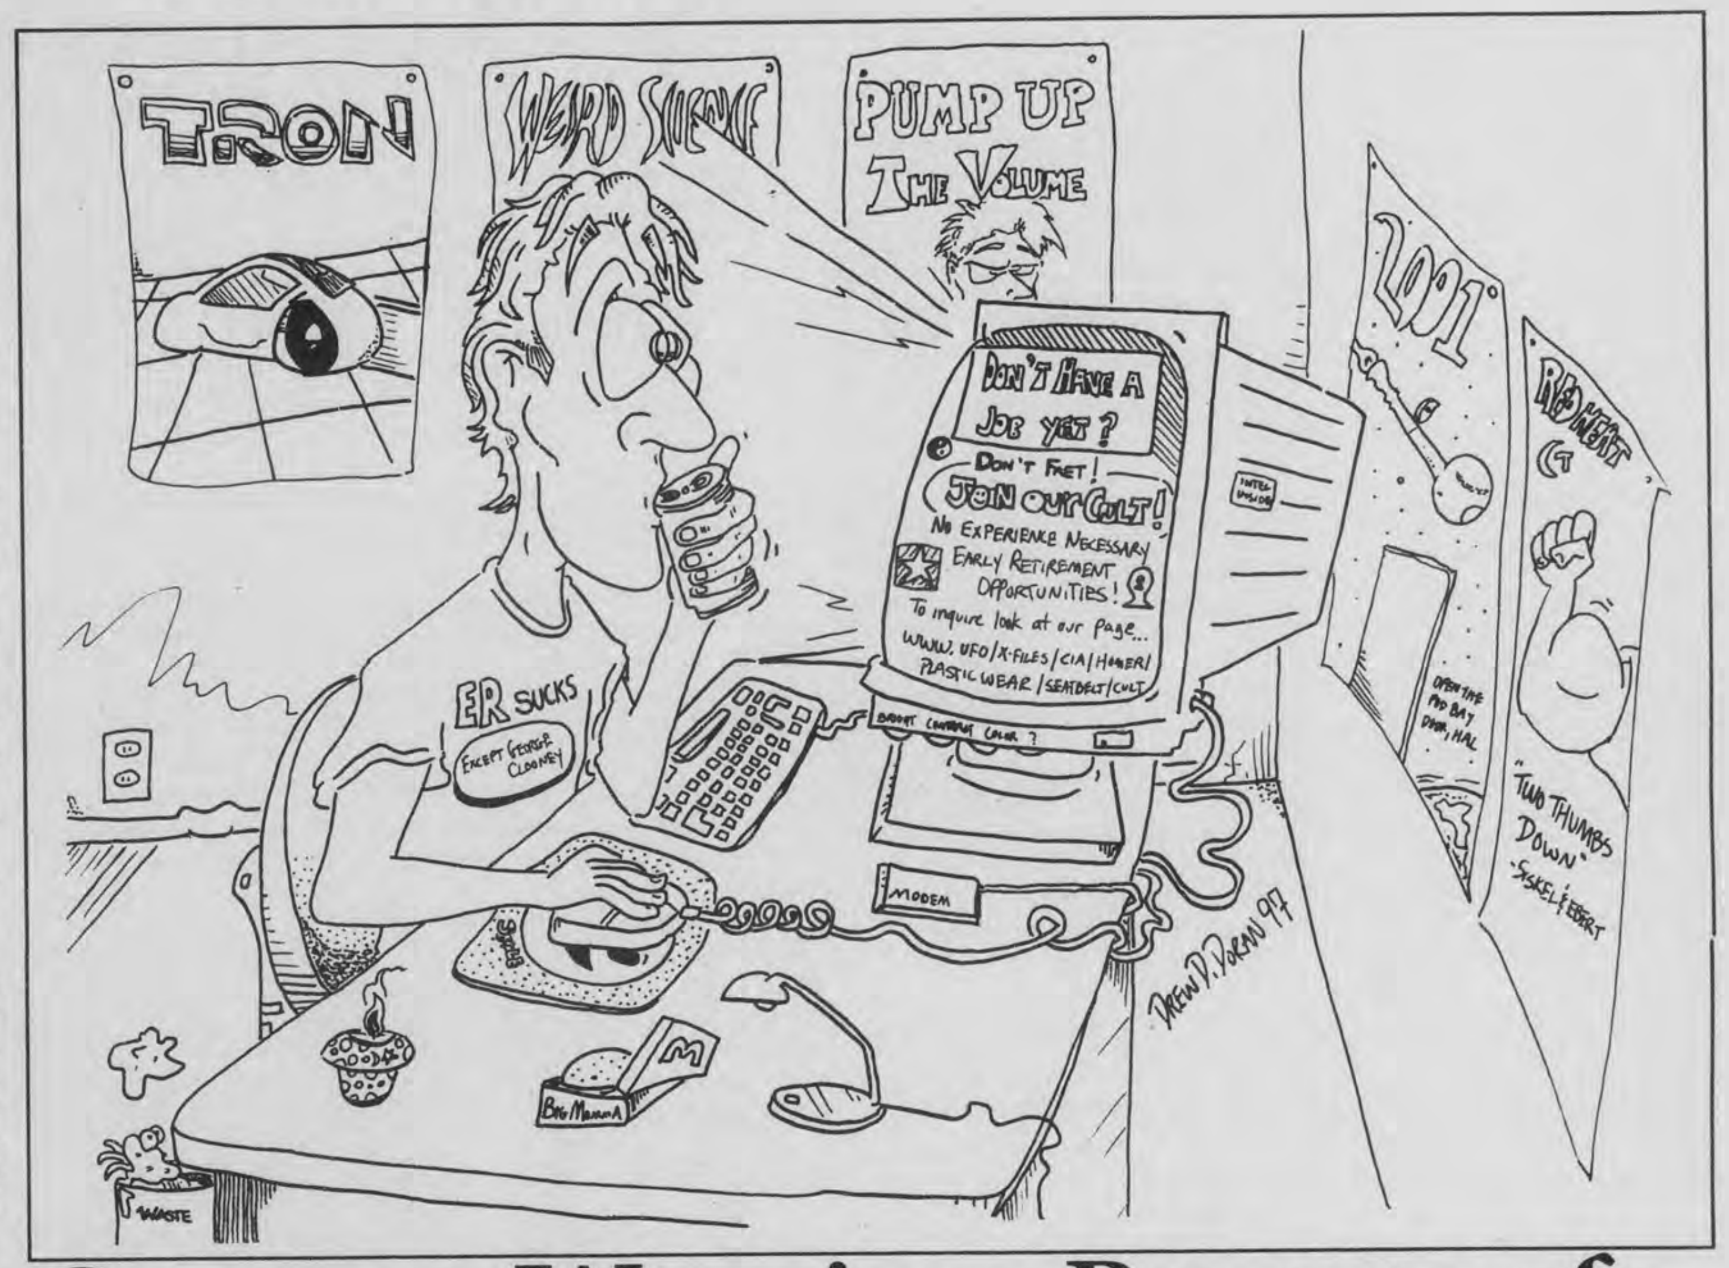
It may not seem like much; it has always been common knowledge that the U.S. wishes a peaceful reunification between Taiwan and the mainland. That's not the problem. What is so appalling is Gingrich's blatant disregard for diplomatic procedure and his lack of concern for a unified American foreign policy towards China.

Diplomats have traditionally dodged the issue. After Gingrich's blunder, the White House tried to rectify the damage by stating its policy of "meeting its obligation under the Taiwan Relations Act including the maintenance of an adequate self-defense for Taiwan". Furthermore, the Administration wished to maintain its "one-China policy, the fundamental bedrock of which is that both parties peacefully address the Taiwan issue." This is diplomatese for "We regret Gingrich's outspokenness, we want peaceful reunification as much as the mainland does."

Vice President Gore visited China last week and didn't even mention Taiwan. Then Gingrich comes along and basically threatens President Jiang Zemin and Prime Minister Li Ping. An old political statement, "Politics end at the water's edge," has been standard procedure for the United States government. It basically means that public statements uttered by government officials should coalesce in order to issue a cogent and coherent foreign policy. Now, because of Gingrich (who also issued statements on human rights and religious freedom) the Chinese may perceive the United States to be weak and divided. The timing couldn't be much worse.

Slowly but surely, the Chinese and the United States have realized lately that they both need to work with each other. The United States has been negotiating for Chinese membership into the World Trade Organization, while China has also expressed initiative in cleaning up intellectual property violations and allowing more political dissent at home. Such an improvement in Sino-U.S. relations has taken careful cultivation. Gingrich's recent comments certainly won't help.

The House Speaker noted, "I didn't flinch, but they didn't flinch either... If you can be respectful but firm, you can get a long way talking with the Chinese." "A long way" in the wrong direction.



Campus Warning: Beware of Spring Break travel companies

Bad experience over Spring Break raises questions over student treatment; Bucknellian raises questions over handling of concerns

BY AMY YOUNGGREN

Bucknellian Staff Columnist

In the effort to possibly catching a small glimpse of spring in the middle of this overcast, rainy and windy month in Pennsylvania, many Bucknellians flocked to spring break destinations in many tropical islands and beaches.

I, too, desperately wanted to get away and spend the week baking in the sun and sipping daiquiris. After much chaos over where to go, how much to spend, where to stay and what travel group to go with, we decided upon our vacation in Nassau, Bahamas. However, the complications and logistics of getting to and from Nassau bordered on ruining the romance of spring break, even of the Bahamas.

The past two years my group and I have traveled with World Class Vacations. I do have to admit, last year went very smoothly, with the exception of some minor delays and confusions at each of the airports. We were actually very pleased with the services that World Class provided before our trip, during travel, once we arrived at our hotel and throughout the entire week.

However, this year, much to our dismay, we were very disappointed and upset at the way we were treated. Before going any further, I need to clarify one detail. This year, after we landed in Nassau Bahamas we were switched over to a smaller organization responsible for our activities and our stay while we were there. This company was Spring Break Express, which is part of World Class Vacations. This was never explained to us before we actually arrived at our orientation in Nassau.

I realize that there are many different people, companies and organizations that are involved in making spring break for college students possible. Therefore, it is somewhat difficult to know exactly where to assess the blame for our dissatisfaction.

Everyone from the agents at the Baltimore airport, the crew on our plane, the hotel staff, the spring break express staff, all play an important role in the flow of our vacation and our travel. My point in writing this is to publicize on a small scale, the difficulties we experienced while traveling under World Class Vacations and Spring Break Express.

After arriving at Baltimore airport we were forced to sit in the doorway of the lobby for two hours with no explanation as to why we were delayed. Meanwhile an agent was making an announcement that each person traveling would need to pay $20 for gas. Let me remind you that we were not taking a road trip to Ft. Lauderdale, we were flying, in an airplane, across the ocean to another country, but we still were forced to pay for gas.

Since we were not given seat assignments when we checked in, we hurried to the gate to secure a place in another line. We sat at this gate for approximately 45 minutes and then noticed many of the students collecting their carry-ons and leaving. We followed the herd of students to another area of the airport where we were finally stopped right in front of the security check in.

We sat down in a huge mob, again on the floor of the airport and waited. During this time, we had still not been notified as to why we had been moved or why our plane was delayed over two hours. Finally, they let us through the check in and we found our gate. We then sat and waited there without any explanation until 11 p.m., when we finally boarded, four hours later than scheduled.

We finally landed in Nassau and after getting our transfer to the hotel it was 3:30 a.m. After orientation, we were "dismissed" at 4:30 a.m., and notified that our hotel had been overbooked so we were bumped to the Marriot. However, after we got to our room, we realized that they had promised our luggage would be transferred for us from the other hotel, and it still was not anywhere in sight.

Because of the hotel transfer, our luggage had been taken to the hotel where we were originally booked. We inquired about whether or not our luggage would be brought to us and the Spring Break Express staff ensured us that either that night or the next morning, it would eventually show up. So we waited. Soon after, we asked a staff person of the hotel what the situation of our luggage would be. He explained that they were not responsible for bringing our luggage to us, that we would have to go next door to the other hotel and get it ourselves. So my group at I walked next door and found our luggage at the curb of the hotel, and without argument, we dragged it back to the Marriot and to our rooms.

Besides our frustration with the entire trip, we also had lost one entire day due to the delays and confusions. We were originally supposed to arrive at 9:00 p.m Friday night and leave at 3:00 p.m the next Friday. Although we didn't even arrive at our hotel until 3:30 a.m and didn't get to our rooms with our luggage until after 5:00 a.m on Saturday morning, our departure the next Friday was never changed, and we were never compensated in any way. However, we managed to have a blast, until Friday morning when we had to endure another day of travel with the company.

We all are concerned about getting away on spring break and finding a beautiful place to relax and make memories with our friends. We are also willing to pay large amounts of money to enjoy ourselves during our break from school.

However, if a company, such as World Class Vacations, refuses to show any respect to the students who are keeping them in business, it is not worth the time or the money. In past years many Bucknellians have expressed concerns and frustrations with many travel groups, but especially World Class Vacations.

Therefore, I urge you to beware of the quality of many of the travel package organizations that mainly cater to "spring breakers." I'm sure that this campus, and others, would agree that it is most important to always be treated with respect and like the adults that we are. I have made the conclusion that this company either does not know how to run a business or simply does not value or respect their college clients.

> ***I have come to the conclusion that this company either does not know how to run a business or simply does not value or respect their college clients.***

> ***I urge you to beware of the quality of many of the travel package organizations that mainly cater to "spring breakers."***

ARTS & ENTERTAINMENT

Opera Company to perform four shows in one story

BY DAVID CARPENTER
Bucknellian Staff Writer

Cara Mickelsen—The Bucknellian
Zach Kulis '98 and Kate Cressman '99 rehearse a scene from their performance, which integrates both traditional and contemporary singing.

The Bucknell Opera Company is back again with its annual spring performance. Incorporating traditional and contemporary singing styles, this performance should be a treat for the entire audience. It will include both classic shows such as *Madam Butterfly*, and hot new Broadway smash hits like *Rent*.

"What we are doing with this season's performance is one story told through two different venues," said Susan Minsavage '97, the vocal teaching assistant for the group.

On Saturday, Opera Company will perform pieces from *Madam Butterfly*, followed by the contemporary show, *Miss Saigon*. Following is *La Boheme* by Puchinni, after which the fourth piece, *Rent* is modeled.

This entire show consists of the work of a relatively small number of people. With only 12 members and one individual abroad, the show will consist of performances from all the members, some of whom will perform multiple times, and the entire company will perform in the final piece, *Rent*. Many of the performers find this type of arrangement beneficial, for they are able to gain a better understanding of their role within the performance with a small group.

"The way that the company works is that Dr. Payn [director of the opera company] assigns roles to the members of the company," Minsavage commented. "We are assigned the role at the beginning of the semester and Dr. Payn fits the role to where that singer is in their musical education."

In this show, each member is getting the chance to perform some opera and some musical theatre. "Over four years, in Opera Company, you get to sing a variety of different styles," said Minsavage. All of the work can seem a bit overwhelming for so small a group, but the members seem happy with the closeness which develops. "There is no cap at all in letting members in. During auditions we let in whatever talent we see if they are both a benefit to the group and to themselves," Minsavage further commented.

Minsavage said that the smallness of the group allowed a great deal of open and honest communication and criticism with all the members, including Payn.

Although the final say is given to Payn, of who gets into the production, seniors within the group are invited to the audition process, and the group as a whole has something to say about the staging of the show. The collaboration of the entire group in the process of putting the production together is important to the success of the show. "We do a lot of independent work within a collaborative atmosphere under the guidance of Dr. Payn," Minsavage stated.

Since there is only one night of this performance, there will be an open dress rehearsal to accommodate people who might not be able to attend the Saturday performance. To reserve a ticket for Saturday, call Dr. Catherine Payn at 523-1247 as soon as possible.

When asked to sum up what the audience can gain from seeing this performance of the Company, Minsavage replied with a smile, "It is a very accessible way to enter the world of Opera. With this semester's show people will see something they can really relate to."

This performance will be at 8p.m. Saturday in the Tustin Studio Theatre.

Students tap into an open theatre and dance show

Student and faculty are encouraged to participate in a performance of variety and self- expressions

BY KATRYNA ANDRUSIK
Bucknellian Staff Writer

A week from tonight, set against the black walls of the Tustin Studio Theater, an open performance showcase for both theater and dance students to show works of theirs in progress will take place. "Unique things that may not be seen otherwise as well as things from the classrooms will also be shared," said Professor of Theater, Bob Gainer.

The included performers range from members of the Dance Company, such as soloist Nicole Bradley '97, to the students in Assistant Professor of Dance Er-Dong Hu's introduction Chinese dance class.

Seniors Shannon Kearns and Liz Maccie will perform pieces used for their graduate school auditions. Kearns will also be doing a short work with Professor Bob Gainer, associate professor of theatre, who will also be doing one of his own personally created works.

In addition to performances by these veterans of stage, those who have less experience on stage will present something for the audience. One of these amateurs, Ethan Paige '99, will perform his own choreographed dance piece. Paige performed in the studio performance last semester and hopes that diverse actors and dancers will participate. He said that the "studio performance gives me a space to express myself." Through the freedom of art, he can express his "own internal narrative [he's] following and acting out." As Danna Frangione, associate professor of dance and director of the Bucknell Dance Company said, the studio production is "dancing for everybody."

Although the Jazz 1 group will not be performing this term (as the class was not offered), this performance will include a performance by the Chinese dance class, the first of its kind anywhere in the United States. Hu, originally from mainland China, has been teaching a class this term on Chinese dance, which is rarely seen outside of China. It involves both classical ballet and Chinese folk dance for a style of dance almost completely unknown to the western world.

Although only one hour long, it is long enough, as Frangione said, to experience the art.

The studio concert starts at 5 p.m. next Thursday in the Tustin Studio Theater.

Beetna Kim—The Bucknellian
This studio performance allows the artist to explore his/her artistic talents and abilities. Both the Theatre and Dance departments are taking part in this performance of personal freedom and expression.

Carrey gets the thumbs up: *Liar Liar* is both a funny and entertaining flick

BY CHRIS NICHOLS
Bucknellian Staff Columnist

Liar Liar ★★★
Starring Jim Carrey

What happens when a lawyer/liar has to tell the truth for 24 hours? Fletcher Reede (Carrey) has a hard time telling the truth in just about any situation. He's such a liar that his son's birthday wish (when Dad no-shows on a promise) is that his father tell the truth for just one day. This sets the stage for Carrey's outrageous facial features bending and stretching in every which way. For those of you disappointed with *The Cable Guy*, you should give him another shot. From the opening it's clear that this movie is more serious than his past attempts, yet is still equally funny. An honest attempt has been made to make the story less slap-stick with more of a purpose. This film succeeds. Carrey is obnoxious and entertaining while still being heart-felt and well- meaning. The relationship with his movie son is a strong one and it's good to see him representing a character that comes to learn a real lesson rather than just going through some wacky adventure trying to track down an animal. The humor is funny, Carrey is fantastic, as is the little boy (who would rival the kid from *Jerry Maguire* in a cute kid contest) and the actress playing Reede's ex-wife. All in all, it's a very worthwhile film despite its silliness.

Jungle 2 Jungle ★★★
Starring Tim Allen and Martin Short

Cute. There's not a whole lot I can say about this one. It's basically exactly what it claims to be. Disney has produced a pretty good film here with some really funny scenes. The story follows Allen's character who is heading to the amazon to sign divorce papers with his wife who left him years ago when he was away at work and the phone company came to install a fifth phone line. (He's a serious business man; a stockbroker, actually, that deals mostly in commodities.) When he arrives in the amazon, he discovers the reason his wife made him come so far. He has a son. Mimi-suku (it means 'cat piss' roughly translated) is played by Sam Huntington who does a really good job playing a serious character who gets into all sorts of funny situations. Mimi-suku wants to come with his father to New York City to see where his father works and to complete a quest necessary for his tribe to accept him as a possible leader. Thus starts the *Crocodile Dundee* like quest of the boy in his adventures with his father's overworking, the new wife who screams at practically everything he does, a love interest and even a run-in with the Russian Mafia. The story is cute and goofy. I suspect that it will please its target audience (although a lot of them were packed in *Liar Liar*). Adults can find some good humor as well.

Video Review
The Spitfire Grill ★★★★★
Starring Allison Elliot and Ellen Burstyn

Before you go out to the movies, think about staying in if you're ready for what I would argue is one of the five best movies of this year. One of the things that infuriated me most about this year's Academy Awards was the failure to even nominate this excellent film for any awards. (This might have to do with a controversy surrounding how the movie was funded.) This fantastic story is about a young woman, Perchance Talbot (Elliot), better known as "Percy", who is released from prison and wants to start afresh in a small town. She ends up in Gillard, Maine where she finds a job at a small café called "The Spitfire Grill" where she's reluctantly taken in by Burstyn's character. Initially, the small town thinks she's nothing but trouble, especially when they find out where she's been for the past five years. When they get to know her, most of them quickly fall in love with Percy, as you probably will. She's a wonderful character beautifully portrayed by Elliot. The film is excellently done from start to finish. The small town atmosphere is perfectly demonstrated. Be warned, it's a serious movie and does have a sad ending, but if you're in the mood for good drama, this is where it's at. Rent this movie.

Two native dance groups stomp their way together

A part of the focus semester, the Allegheny River Dancers and the dancers of Babemba USA perform selections to music and song from their individual cultures

BY RACHEL DOEBBER
Bucknellian Staff Writer

"It will be a spontaneous performance where both groups will, together, play off each other's work to get the audience involved. It's about watching, listening and participating -- a total experience," said Joyce Bylander, director of multicultural affairs, on the upcoming Dance Encounter performance.

As part of the Native American focus semester, Allegheny River Dancers, a Native American dance group from the Allegheny Reservation in Buffalo, NY, and Babemba USA, an African American dance troupe from Massachusetts, will perform their traditional dances in an event called Dance Encounter.

"We wanted to have a dance performance because we wanted an event that is visual and involves participation," Bylander said.

Brought up with social dancing since birth, Bill Crouse, one of the ten Allegheny Dancers, has helped each person in the Iroquois nation to learn the social dances, as well as keeping the traditional dances an important part of Iroquois culture.

The Allegheny Dancers will be performing two styles of dances, social and "Intertribal-Powwow" competition, which have been handed down from generation to generation.

"The basis for the ceremony is thanksgiving. We [the people of the longhouse religion] believe that everything is provided for us by the creator, our one God. We did not ask for anything. We should make good use of everything," Crouse said.

Some of the social dances include the Stomp Dance, Women's Dance and Stick Dance.

Originating in the tribes west of the Mississippi, the Powwow dancing is learned by attending the Powwow competitions. Popular competition dances such as the Grass and Hoop dances will be exhibited.

Each dance will be performed to a specific song, sung by the dancers.

> ***"We wanted to have a dance performance because we wanted an event that is visual and involves participation."***
> *—Joyce Bylander*
> *director of multicultural affairs*

Taking turns performing with the Allegheny Dancers will be the dancers of Babemba USA.

Originally from West Africa in a region called Mande,the five male members of Babemba will perform dances to live music played on a variety of traditional instruments.

Drum Call, a dance to be performed, involves calling the people to come celebrate and gather for social events. The djembe, a goblet-shaped drum carved from redwood, is a loud sounding instrument that can be heard above all other drums and will be played during Drum Call.

Another dance is the Sounou, which comes from the Khassonke people in Northwestern Mali. It is danced after the harvest by young boys and girls who have worked in the fields to celebrate their youth, strength and attraction towards each other.

"These are quite energetic dances about the harvest, celebrations for marriages and ceremonies that involve a lot of footwork," said Bylander on the nature of the African dances where the dancers and drums take turns telling the story.

Although these two groups of dancers are dressed in different regalia and perform to different styles of music, the concepts on which they base their dances on are very similar.

"It is uncanny on how similar the dances are. They both share the concept of giving thanks to the creator which is an aboriginal belief,"Crouse said.

Bylander commented, "It will be an organic experience... Interesting to see how the similarities and differences will find each other."

Towards the end of the program, the two groups will perform together get the audience involved.

Dance Encounter starts at 7 p.m. this Sunday in Davis Gym.

Babemba consists of five male members who will perform their pieces to a selection of music played on native instruments. Their dances express the feelings within the celebrations and social events of their culture and tell the audience these stories through their energetic footwork and pounding of intricately carved drums.

The Allegheny Dancers perform traditional as well as social dances that are important parts of Iroquois culture. Many of the selections are danced in order to give thanks to the creator as well as to promote the concept of making good use of things provided for them.

These Dancers will dance and sing to songs in their native dress, creating a visual display that calls for participation from the audience. The two groups will play off one another as well, whihc will generate a lively performance showing the differences and similarities between the troupes.

Cooking with Katie

Vegetarian Lasagna

Dare to be entranced by the sweetness flanking the gills of these pasta sheets. This lasagna is a thrill of layers, spinach leaves, wild mushrooms and delicately sliced red onion, frolicking between three cheeses. It woos your senses with a deceptive richness and charms you without the scent of meat. Although trendy in nature, it will satisfy your craving for the rich and creamy without the guilt of the "heart attack on a plate" (i.e. *fettucini alfredo*), while it boosts your vitamin tally with the incorporation of the vegetable of legends, Popeye's spinach.

- 9-12 lasagna noodles
- 2 pounds fresh spinach
- 1 teaspoon olive oil
- 2 garlic cloves
- 1 shallot, finely diced
- a few leaves of fresh basil
- freshly ground black pepper
- pinch of salt
- 1 container (15 oz.) ricotta, part skim
- 2 eggs
- 1/4 cup freshly grated parmesan
- 4 ounces of grated part-skim mozzarella
- 1 medium red onion, finely sliced
- 1/2 pound wild mushrooms, such as portabella, finely sliced
- 1 cup all natural tomato sauce
- 4 ounces of mozzarella and parmesan, mixed

1. Boil noodles according to box directions, draining and rinsing beneath cool water. Sprinkle a few drops of olive oil on them to minimize sticking, and set aside.
2. Peel stems and ribs from spinach leaves, blanch until bright green, drain, squeezing out all water, and set aside.
3. Carefully chop garlic and sauté with the shallots in olive oil until they are translucent.
4. Remove from heat, add chopped basil and season with salt and pepper. Allow to cool slightly.
5. Beat eggs lightly, and add the ricotta, parmesan, mozzarella and shallot mixture.
6. Pour the tomato sauce into a large casserole dish.
7. Assemble the lasagna: place one layer of noodles in casserole dish, coating it with a layer of the ricotta mixture. Layer the spinach, mushrooms, and onion, and repeat until all ingredients are incorporated.
8. Sprinkle the top with the remaining mozzarella and parmesan, and bake at 350° until hot and bubbly (30-40 minutes).

Try a piece with a mesclun salad sweetened with honey vinaigrette and some crunchy bread with roasted garlic and olive oil. These three components are all you'll need for a simple and delicious summer meal, except perhaps a glass of chilled white wine. The lasagna can be covered and refrigerated for a few days.

Zoinks! juices up Market Street

BY MICAH SCHWEIZER

Bucknellian Staff Columnist

Local Color

Next up on our wild and wacky tour of Central PA's finest attractions is the upbeat, off-beat, on-the-street café and juice bar Zoinks! Created by Laura Michalak, Zoinks! opened this past November and immediately filled Lewisburg's hangout void.

While older residents of Lewisburg are attracted to the low fat, low cal, freshly squeezed juice, the high school and college crowd is drawn to the funktified decor, toys and informal feeling Zoinks! offers. Bucknell students should be excited about the candles which legally burn on the two tables in the café.

Private space is minimal; between the tables with glitter painted chairs, a dignified armchair, and a sprawling sofa, Zoinks! seats roughly 12. The better you know the people you're sitting with, the more it will seat.

Any place providing customers with "unplugged" and "wired" coffee in lieu of the more traditional decaf and caffeinated coffee can be said to have a wacky flair. (Zoinks! did not comment on the risks taken in consuming "wired" coffee, and Local Color assumes no responsibility for electrocutions or other injuries incurred in the process of consuming this beverage.)

In my opinion, however, the juices are supreme. They vary frequently. Alongside old favorites such as orange, grapefruit, carrot and apple juice are more exotic juices such as parsley, celery and the hard liquor of juice, ginger. A straight shot of this will knock your socks off, and you probably won't even get to keep your shoes.

Along with coffee and juice, Zoinks! provides smoothies and a variety of pastries, some of which are freshly baked. Zoinks! opens daily at 9:30 a.m. and stays open until 9 p.m. on weekdays and 11 p.m. on weekends.

Zoinks! is located at 512 Market St., right by the railroad tracks where the Westshore Railway train zips along at a speedy 2.674 miles per hour (do I sense an upcoming feature?).

CAMPUS CALENDAR

Thursday, April 3

7 p.m.—Third World Film Series, *The Global Assembly Line*, 120 Coleman

7:30 p.m.—Women's Resource Center/Focus Semester Film, *Doctor, Lawyer, Indian Chief*, Gallery Theatre, Langone Center

Friday, April 4 (Siblings Weekend)

11 a.m.—Ralph B. Derr Memorial Lecture, "Removal of Organic Contaminants from Gaseous Waste Streams," Dr. George Keller, Gallery Theatre, Langone Center

4 p.m.—Biology Seminar Series, "*In Vitro* Plant Ecology: the Restoration of Degraded Land," Steven Handel, Rutgers University, Rooke Chemistry Auditorium

4 p.m.—Psychology Colloquium, "The Role of the Development of Expertise in the Production of the Disproportionate Effect of Inversion in Object Recognition," Julie Kantos, Bloomsburg University, 151 Coleman Hall

4:30 & 8 p.m.—Hilltop Film Series, *Rambling Rose*, Vaughan Literature Auditorium

5-8 p.m.—Luigi Fiji, sponsored by Phi Gamma Delta, proceeds to go to Lewisburg Little League, Phi Gamma Delta house

5:30-9 p.m.—Flowers, candlelight and elegant dinner in the Refectory, Langone Center, call for reservations x1240

7 p.m.—Concert, The Samples, with opening acts Aquarium Rescue Unit and Guster, Fieldhouse Main Floor

8 p.m.—Contra Dance (beginner's workshop starts at 7:30 p.m.), $5 per person, $4 for students, Lewisburg Club, 131 Market Street

Saturday, April 5

7:30 a.m.—Cycling Team Stage Race, Seventh Street, Moore Avenue, Dent Drive

7:30 a.m.—Departure for New York City trip from downhill Langone Center, buses leave the city at 7:30 p.m., $18 per person

Noon—Baseball vs. Army, doubleheader

Noon-3 p.m.—Kappa Sigma's Third Annual Career Day, Kappa Sigma house

1 p.m.—Career Development Center Workshop for international students interested in legal issues with regard to emplyment opportunities in the United States, Gallery Theatre, Langone Center

1 p.m.—Men's lacrosse vs. Hobart

1 p.m.—Women's lacrosse vs. Lafayette

5 p.m.—Catholic Mass, Meditation Chapel

5-8 p.m.—Luigi Fiji, sponsored by Phi Gamma Delta, proceeds to go to Lewisburg Little League, Phi Gamma Delta house

5-11 p.m.—Fun Flicks, sponsored by BAC, Walls Lounge, Langone Center

7 p.m.—Ralph B. Derr Memorial Lecture, "Scaledown of Separation Processes," Dr. George Keller, Terrace Room, Langone Center

7:30 p.m.—Middle East Association dinner, catered by Beirut Restaurant from Allentown, Larison Dining Hall

8 p.m.—Concert, Bucknell Opera Company, Tustin Studio Theatre

9 p.m.-2 a.m.—Phi Kappa Psi's Battle of the Bands, Phi Kappa Psi house

10:30 p.m.–BAC Movie, *101 Dalmations*, Forum, Langone Center

Sunday, April 6

7:30 a.m.—Cycling Team Stage Race, Seventh Street, Moore Avenue, Dent Drive

11 a.m.—Friends Meeting, Smith Library, Vaughan Literature Auditorium

11 a.m.—Interdenominational Worship Service, Main Sanctuary, Rooke Chapel

Noon—Baseball vs. Army, doubleheader

2:30 p.m.—Concert, Penn Central Wind Band, conducted by William Kenny, Weis Center

4 p.m.—Catholic Mass, Main Sanctuary, Rooke Chapel

7:30 p.m.—Senior Recital, Stephanie Kardohely '97, organ, and Trey Helms '98, organ, Rooke Chapel

7 p.m.—Dance Encounter, featuring a Native American and an African-American dance troupe, Davis Gym

10 p.m.—Catholic Mass, Larison Dining Hall

Monday, April 7

4 p.m.—Women's lacrosse vs. Rutgers

4:30 p.m.—Confidential program for women who have been sexually assaulted, Women's Resource Center, 200B, Roberts Hall

7 p.m.—Focus Semester Film Series, *Thunderheart*, Gallery Theatre, Langone Center

Tuesday, April 8

3:30 p.m.—Men's tennis vs. St. Joseph's

7 p.m.—Women's Resource Center Film/Lecture, *Motherhood on Trial*, filmmaker Lynn Estomin, Lycoming College, Gallery Theatre

7 p.m.—Presentation, "Innovation and Entrepreneurship: Making Ideas Come to Life," Glen Tullman, chief executive officer of Enterprise Systems, Inc., Forum, Langone Center

7 p.m.—Career Development Center Panel, high school principals and superintendents on portfolios/resumes/philosophies of eductation, Buttery, Langone Center

7:30 p.m.—Merck-Bucknell Lecture, "Proton-Transfer Reactions Between Carbon and Oxygen," Heinz Koch, Ithaca College, Rooke Chemistry Auditorium

Wednesday, April 9

Noon—Well Women Series, "Benefits of Massage," Jasmine Loney-Griffith, trained practitioner of Swedish massage and reflexology, Walls Lounge, Langone Center

1 p.m.—Baseball vs. St. Bonaventure, doubleheader

8 p.m.—Recital, Craig Cramer, organ, Rooke Chapel

Thursday, April 10

Noon—Mathematics Lunch Talk, "Unsolved Problems in Number Theory, Brian Conrey, Oklahoma State University, sponsered by Pi Mu Epsilon and MAA, 301 Langone Center

11 a.m.-1 p.m.—Faculty Share-A-Film Series, "Skin Deep," presented by Joyce Bylander, The Cave, Langone Center

3:30 p.m.—Softball vs. Lafayette

4 & 7 p.m.—Third World Film Series, *The Official Story*, 120 Coleman

5 p.m.—Studio Concert, Bucknell Dance Company and Cap & Dagger present works in progress, $1 donation requested, Tustin Dance Studio

7:30 p.m.—Women's Resource Center Poetry Reading, "Women's Voices," Bucknell Hall

9 p.m.—Economics department informational meeting about graduate school, 150 Coleman

Friday, April 11 (Trustee Access Day)

4 p.m.—Biology Seminar Series, "Studying Stroke in a Slice of Brain," Kathleen Susman, Vassar College, Rooke Chemistry Auditorium

4:30 & 8 p.m.—Hilltop Film Series, *Night on Earth*, Vaughan Literature Auditorium

6 p.m.—Shabbat Dinner, Larison Lounge

8 p.m.—Concert, Awadagin Pratt, piano, Weis Center Series 1, $15, Weis Center

Next week:

Crew's Bucknell Invitational

Baseball vs. Army

BUCKNELL UNIVERSITY SPORTS THURSDAY

Athlete of the week:

Tyler Prout '00 (baseball) was named Patriot League player of the week as the Bison went 3-1.

Women's lacrosse routs Holy Cross

Heidi Hammes' three goals key 11-1 win; team's 6-0 start is best in school history

BY HALEY FUTTERKNECHT
Bucknellian Staff Writer

Holy Cross didn't have a prayer last Thursday as the women's lacrosse team defeated the Crusaders 11-1. Bucknell now holds a 1-0 record in the Patriot League and 6-0 record overall, which does not include their win over UC Berkeley, as lacrosse is not a recognized varsity sport at Berkeley.

It is the best start in the 22-year history of women's lacrosse at Bucknell.

Holding Holy Cross scoreless at halftime, Bucknell dominated the game as play was mostly on the attack end. "The success of women's lacrosse is not due to one player. Everyone can do the job. Holy Cross is an example of that," Heidi Hammes '99 commented.

Hammes led the way for the Bison, scoring three goals and one assist for the Bison. Liz Murphy '99 also contributed three goals, and Kate McIlvain '97 and Meghan Hallahan '97 each scored twice in the victory. Kelly Dolnik '99 rounded out the scoring by adding one goal. Captain Amy Green '97 also provided an integral transition as the midfield connector.

The Bison outshot the Crusaders 25-10.

Bucknell, which starts four seniors on its defense, has outscored the opposition 36-8 in the first halves of its six games this year. In three of those, the first halves have been scoreless. The defense has continually proved integral to the Bison's early success, as it has allowed just 25 goals in five games.

Ali Toombs '97 recorded nine saves against Holy Cross. "Our defense is not allowing shots to come off. Ali is simply amazing," Hammes noted.

The Bison have attracted many new fans due to their success. Fan Jess Romm '99 commented, "I thought the passing was absolutely fabulous."

Hammes has led Bucknell in scoring in five straight games. She was named the Patriot League Offensive Player of the Week for the second consecutive week.

The Bison are now approaching the height of their season, as the squad puts its undefeated record on the line at Shippensburg on Wednesday. They will strive to hold their standing in the Patriot League against Lafayette at home on Saturday. They then open up the week Monday at Rutgers. "These next few weeks contain crucial games for us. This will put our undefeated record to the test," Hammes stated.

Jonah Half—The Bucknellian

Kate McIlvain '97 scored two goals to propel Bucknell to an 11-1 win over Holy Cross. The team will face Shippensburg this week.

Jonah Half—The Bucknellian

Tne Bucknell baseball team took the early lead in the Patriot League standings after a 3-1 week against Lehigh.

Baseball bats come alive against Lehigh

BY JEFF CAMPAGNA
Bucknellian Staff Writer

The Bison baseball players got their first taste of Patriot League action last weekend, as they took three out of four games from Lehigh. At this early point in the season, Bucknell stands atop the Patriot League along with Army at 3-1.

Coach Eugene Depew was relatively pleased with his team's performance, commenting that "the Patriot League is a pretty even league. Any team can beat anyone on any given weekend, so any time you go 3-1, it's definitely a positive."

In out-of-league play, Bucknell dropped both ends of a twin bill against powerful Penn State on Tuesday, taking their lumps in a 12-6 loss and a 21-4 drubbing. Younger pitchers received some starting experience against the Nittany Lions, but veteran hurlers will be sure to take the mound this weekend, as the Black Knights from Army march into Lewisburg for an important league match-up.

The wind was blowing out at Lehigh this past weekend, and as a result, hitters feasted in Bethlehem. Over four games, the two teams combined to score 77 runs while knocking 15 homers. Many Bison players put up some big numbers over the four-game series. Right fielder Alex Inclan '97 got back on track at the plate, batting over .500 while crashing two homers and picking up 10 RBIs. Shortstop Joe D'Orazio '98 jacked two out of the park, while catcher Pete Cann '97 and third baseman Tyler Prout '00 each cranked two homers apiece.

The Mountain Hawks leapt out of the gate early, jumping on starter Mike Anders '98 for six runs in

See BASEBALL, page 12

Track run roughshod on Rider Invitational

Men use versatility for easy victories; women slam St. Francis (N.Y.) 145-0

BY CHRIS ELLIS
Bucknellian Staff Writer

Dave Pomfret '00 is a pretty good pole vaulter. His high school statistics would bear that out, and the beginning of his Bucknell career would indicate that as well. In last week's Rider Invitational, Pomfret lived up to his billing, tying teammate Tim Evans for the meet victory—and fourth-best height in Bucknell history—with a height of 14'9".

Pomfret's day, though, was nowhere near over.

Pressed into service by a lack of competitors, Pomfret also entered the javelin and high jump competitions at the Rider meet. Despite having precious little experience with the two events and no collegiate experience with the high jump, Pomfret placed in the top four in both events, helping the Bison to routs of Rider, Rhode Island and St. Peter's.

"It's one thing when you can do one thing well, but it's another when you can be a good athlete and help the team in ways you may not expect," Head Coach Art Gulden said. "Athletes like him really can score well and help the team."

Pomfret's javelin throw of 167 feet, 7 inches was good for fourth in the four-team meet, and his 5 foot, 11-inch high jump was the third-best. Even though he had no experience high jumping at Bucknell, the third-place finish wasn't exactly good enough for Pomfret.

"He was upset he couldn't clear the next height," Gulden said. "He really helped us to cover all the events."

Pomfret's performance highlighted an outstanding effort from the entire team at the Rider invitational. Bucknell defeated Rider 109-57, Rhode Island 110-51, St. Francis 134-14, and St. Peter's 139-11.

"We just have a hellish dual meet team," Gulden said. "We cover every event well and are deep enough to win big."

Bucknell came away with first-place finishes in eight events in the meet, including a victory in the 4x100 relay with an IC4A-Championship qualifying time of 43.0 seconds. The team outdistanced Rhode Island by just .1 of a second.

The women's team was even more dominating at the Rider Invitational. The Bucknell women, racing against three other teams, earned 10 victories in the meet's 17 events. The Bison defeated Rider 123-21, St. Peters 128-17, and St. Francis 145-0.

"I was disappointed in some of the competition we had at the meet, but I wasn't disappointed in our performances," Gulden said. "It was a good season opener for us."

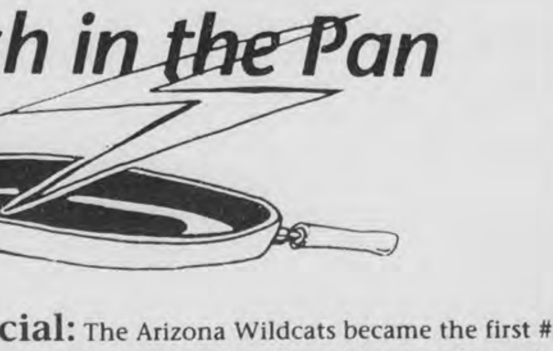
Tria Tyler '99 continued her strong opening, winning both the discus throw and shot put a week after winning three events at Navy. Tyler's 41 foot, 5 1/4 shot-put throw was the fifth-best in school history. Tunde Daniels '00 also won a pair of events, earning top honors in both the 200 and 400 meter runs. Daniels finished ahead of teammate Karen Leonard '98 in both races. Leonard recorded lifetime personal bests in both events at Rider.

"It was definitely a breakthrough meet for Karen," Gulden said. "Things finally came together for her."

Gulden's team next travels to Williamsburg, Virginia for the Colonial Relays, a meet that should provide a better measure of competition.

"Each of our meets will increase in intensity as the season progresses," Gulden said. "This was a good opening meet, and now we've just got to progress from here."

Flash in the Pan



Upset Special: The Arizona Wildcats became the first #4 seed to ever win the NCAA Tournament after defeating Kentucky, 84-79 in overtime in the Championship game. Kentucky was the third consecutive #1 seed that the Wildcats beat, recording victories over Kansas and North Carolina to earn a birth in the title game. Arizona won the championship despite shooting just 37 percent from the floor against Kentucky.

Tennessee Repeats: The Tennessee Lady Volunteers rebounded from a 10-loss regular season to win the women's NCAA basketball championship 68-59 over Old Dominion. Sophomore sensation Chamique Holdsclaw scored 24 points to lead the Vols and Coach Pat Summitt to the victory. Tennessee became the first champion to have double-digit losses, and became the first repeat champs since Southern Cal in 1983-84. The Lady Volunteers defeated Notre Dame to gain the finals, while Old Dominion beat Stanford for the second time this season, Stanford's only two losses.

Champs of the ice: The North Dakota ice hockey team ended an improbable run through the NCAA hockey tournament with a 6-2 win over Boston University in the Championship game. North Dakota scored five second period goals in the win. The win came just days after North Dakota defeated Michigan, the NCAA's #1 team throughout the regular season.

A new queen of the nets: Sixteen-year old phenom Martina Hingis became #1 in women's tennis last week, one day after pounding former #1 Monica Seles in the finals of the Lipton Championships. Hingis is undefeated in 1997 action.

It's finally here: Baseball's 1997 season opened Tuesday with 11 games across the major leagues. Among the highlights: Ken Griffey's two home runs propelled the Mariners two a 4-2 win over New York, Curt Schilling struck out 11 batters as Philadelphia topped Los Angeles 3-0, and Pittsburgh, with the lowest payroll in the major leagues, surprised almost everyone by opening the season with a win, topping San Francisco 5-2. Kansas City's game at Baltimore was postponed because of cold weather.

Indian in trouble: Cleveland's Jose Mesa, who saved a major-league record 46 games last season, heard opening statements in his Cleveland rape trial on Monday. Mesa, who is accused of rape, gross sexual imposition and felony assault, faces three to 10 years in prison if convicted. Mesa struggled through spring training, giving up 20 hits and 10 runs in 13 and one-third innings.

Solid fielding keys turnaround

By Chris Ellis

Bucknellian Staff Writer

Jonah Half — The Bucknellian

Melanie Kulis '98 pitched a complete game in Bucknell's 13-5 win over Mt. St. Mary's last week. The team went 3-1 to improve its record to 5-15.

What a difference a week makes.

Just days after a disastrous road trip extended Bucknell softball's losing streak to 14 games, the Bison came home and got well again in a pair of doubleheaders vs. Mt. St. Mary's and George Mason.

The Bison were plagued by defensive lapses in their first 16 games (2-14), committing 41 errors in those 16 games. The team committed only four in the next four games, though, and the extra attention to defense paid off.

Bucknell's Kristen Sandel '98 pounded the ball during the 3-1 week, improving her season average to .400 and on-base percentage to .444. Pitcher Stacey Waite '99 also had a huge week for the Bison, improving her batting average to .383 and—possibly more importantly—her fielding percentage to a team-high .957

In the week's first game, Bucknell's Melanie Kulis '98 broke a 2-2 tie with a sacrifice fly in the bottom of the fifth inning, and Bison pitcher Waite held on, scattering eight hits in pitching the complete game, 3-2 victory.

The second game of the doubleheader against Mt. St. Mary's was also tied going into the bottom of the fifth, but Bucknell would leave no doubts about this one. Senior Jenn Gombos' three-run triple highlighted a five-run fifth inning that paved the way to a 13-5 win. The Bison were the benefactors of poor defense in this game, as five Mt. St. Mary's errors led to Bucknell's 10-run offensive explosion in the game's final three frames. Kulis went the distance on the mound for the win.

The winning streak was extended to three games after a 10-2 win over George Mason in the first game of another doubleheader. A five-run third inning, keyed by Nicole Zergebel's '00 two-run double, was the difference, and Kulis again went the distance for her second straight win.

The Bison bats, however, were shut down by George Mason's Shannon Hiltner in the nightcap. Hiltner allowed eight hits in the game, but didn't allow a runner to score. The loss overshadowed a fine pitching performance from Waite, who settled down after giving up two runs in the first inning to hurl scoreless ball the rest of the way.

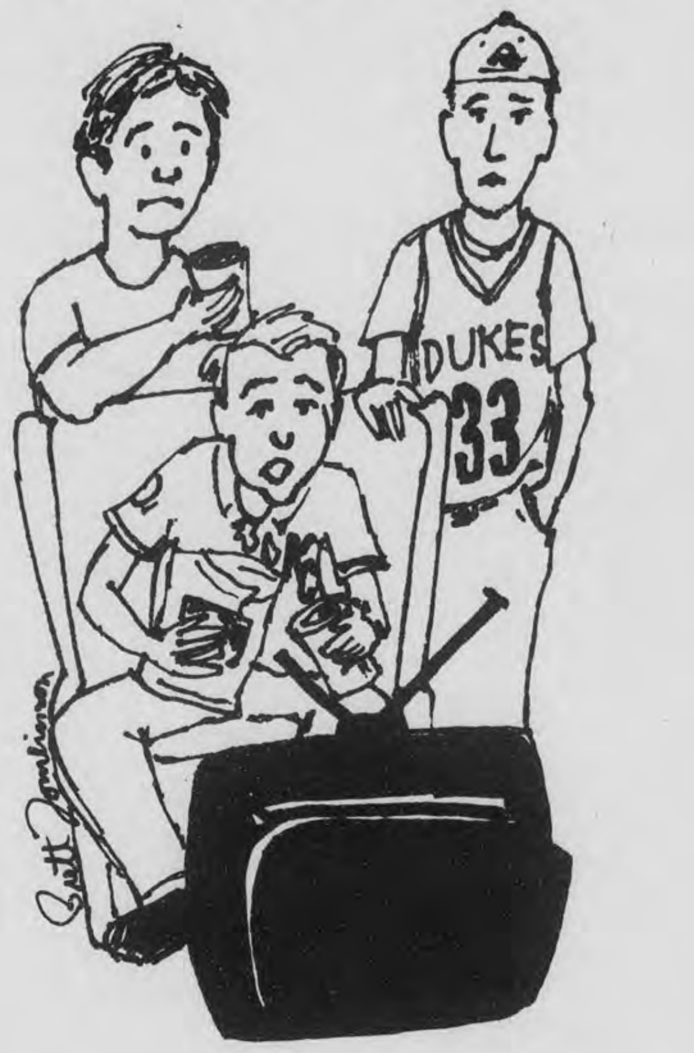
The week improved Bucknell's record to 5-15.

"A natural disaster"

Blackout mars the NCAA's biggest night; throws campus into complete pandemonium

By Jared Silliker

Bucknellian Staff Writer



The setting: Saturday, March 29, 1997 in television lounges across the Bucknell University campus, 5:42 p.m.

With a campus sparsely populated due to the mass exodus of students for the Easter weekend, those that remained—at least those in tune with the world of college basketball—prepared for their excitement of the weekend.

Or so they thought.

These basketball fans stuck on campus were ready to watch the second biggest night of the college basketball season—the NCAA men's tournament semifinals. Already having won their respective regions, and moving onto the Final Four in Indianapolis—Arizona, Kentucky, Minnesota and North Carolina were all vying for a spot in the national championship game Monday night.

So, with the first game, pitting Arizona against North Carolina, scheduled for a 5:42 p.m. tip-off, many students pulled up chairs in their respective television lounges to watch the action unfold.

Unfortunately, the screens registered only snow.

The outrage was on. To many, including this writer, this was a natural disaster.

Some of the more subtle comments: "Of all the times they could mess with the cable, they choose one of the biggest nights in college basketball," Michael Sambrook '00 said.

Other lounges were tried, including the big-screen TV in the Bison, to see if the outage was campus wide.

No luck.

Calls were put in to the switchboard, but were met only with a confirmation that the cable was in fact out indefinitely.

So, with no answer in sight, the wait was on. The clock was ticking—six o'clock, six-thirty, seven . . .

Suddenly, however, the cable connection was restored with about five minutes remaining in the Arizona/North Carolina game, allowing viewers to catch Arizona's exciting 66-58 win.

Alas, the night was salvaged, to some extent, you say?

Hardly.

The drama continued when, with seven minutes remaining in the Kentucky/Minnesota game, the TV screens once again turned white with snow. This time, however, the cable did not return before the end of the game. Kentucky eventually downed Minnesota, 78-69, to move on to the championship game against Arizona, but those affected by the cable outage would have to wait until later to find out.

That was it—an end to a crazy night of college basketball. Not what most had planned on, and certainly a disappointment, at least in this writer's eyes.

To those sports fans who experienced this story, or one like it, here's your answer to the cable problem that partly kept students from viewing one of the great sports spectacles—the NCAA Final Four.

According to the Physical Plant, the cable was dysfunctional due to a power outage in Roberts Hall. The cable enters campus in Roberts and is first amplified there, so without power in the building all day, the cable throughout campus was non-existent.

The second outage noted above was caused by the power having to be shut off again, so the signal could be rephased, or fine-tuned.

Giving some credit to those that worked on the outage, the televisions were back in working order for Monday night's Championship game between Arizona and Kentucky. A truly exciting game won by the underdog Arizona in overtime, which would have been surely missed, at least by this writer, had the cable been off once again.

BASEBALL

from page 11

the first inning, several of them coming following an error by shortstop D'Orazio. Lehigh kept up the pressure, scoring three runs in each of the next two frames to go up 12-3, which proved to be an insurmountable lead. The Bison hit the ball well in the 16-8 defeat, with D'Orazio's homer and three RBI's leading the way.

Bucknell received a strong start from Sean Huss '99 in the nightcap, as Huss went all the way to pick up his third victory of the season. After giving up three runs over the first three innings, Huss settled down and blanked the Mountain Hawks the rest of the way. The Bison batsmen gave him all the support he would need, scoring 11 times, using a six-run explosion in the fourth to take the lead for good. Cann led the team with four RBI's, while four Bison went yard in this 11-5 win.

Bucknell continued to roll the next day, blasting Lehigh 16-4. Starter Mike Tomko '98 was hit for four runs in the first inning, which seemed to be reminiscent of his several rocky outings in Florida. However, Tomko bore down, and proceeded to shut out Lehigh the rest of the way, striking out five. The Bison continued to batter Lehigh pitching, as D'Orazio and Prout each had a homer and three RBI's.

Starter Doug Hoffman '97 threw the third complete game in a row for Bucknell to close out the series, taking the 11-6 victory. The Bison jumped out to an early 5-0 lead during the first four innings, as Lehigh was held in check. The Mountain Hawks finally solved Hoffman for three runs at the close of the fifth, but a six-run sixth inning ended Lehigh's hopes of comeback. Cann supplied power from the DH spot, cranking a homer and knocking in two runs, while first baseman Steve Rutkowski '97 pounded out three hits.

Though the Bison handily defeated Lehigh, Penn State proved to be too much for Bucknell to handle, as they were swept in an out-of-league doubleheader. Freshman Matt Potalivo got the start in the first half of the doubleheader, and was greeted rudely by the Nittany Lions, as they rocked him for nine earned runs over five innings. Except for a four-run outburst in the first inning, Bucknell's offense was held in check for most of the game, as the Bison fell 12-6. Things went from bad to worse in the nightcap, as Penn State blasted pitching-thin Bucknell 21-4. The Nittany Lions put together two monster innings, scoring 10 in the third and seven in the fourth to go up 17-3. Starter Scott Perry '00 lasted into the third inning and picked up the loss as the Bison fell to 11-11-1 overall.

Bucknell looks to shake off the Penn State losses and turn its focus back to its ever-important Patriot League match-ups. "After winning last year, everyone hopes to win the championship again. If we can beat Army, that would be a step in the right direction," commented shortstop D'Orazio on the weekend's upcoming doubleheaders against Army.

The Bucknellian Sports Deparment is still looking for club sport writers and a writer for softball. Call Chris at x5349.

Club Sport report: Ultimate Frisbee and Water Polo

The Mudshark Empire strikes back at Rutgers

By E.J. Crawford

Bucknellian Team Correspondent

Once upon a time, not long ago, the Bucknell Mudshark travelled to a the faraway galaxy of Rutgers to do battle with many powerful forces and warriors. After a long journey from their familiar Bucknell home in which the Mudshark jet cruiser was apprehended for flying at ludicrous speed, the Mudsharks prepared for battle.

In the journey's first war, young and inexperienced Mudshark, tutored by his mentor Yoda, prepared to battle the powerful Spank of the Penn State galaxy. The Mudshark fought bravely in a see-saw battle against Spank, as a series of precise forehand and backhand blows the end zone of the mighty Spank seemed to indicate victory for the naive Mudshark.

But, with its back against the wall, the Spank fought desperately for the victory, finally putting together a rally to take the legs out from the Mudshark and escape the upset with a narrow victory.

The Mudshark, buoyed by the quick advancement in his training, then prepared to take on the most powerful force in the Rutgers galaxy—the Brown-in-Motion.

Despite the blind inspiration of Mr. Magoo, the powerful warrior from Brown was simply too large and fast for the inexperienced Mudshark, although the Brown-in-Motion creature credited the young Mudshark with presenting one of its stiffest challenges in the Rutgers galaxy.

The Mudshark, now badly beaten and wearied, turned to his mentor as well as the healing powers of the Louisiana VooDoo Doll for leadership and healing before travelling into the dangerous realm of Haverford's Seven Deadly Sins.

The Sins were too much for the weary Mudshark, as the Mudshark was weighed down by the intergalactic chives and never-ending dimensions of the Sins' galaxy. The young warrior suffered too many repeated overhead hucks and long blows to its end zone to prevail as liquified meteors and tazer blows from the intergalactic gods ended the day's battles.

Beetna Kim—The Bucknellian

Droopy O'Brien '00 (shown here defending Kevin Mulroy '99) was one of the 11 all freshman and sophomore Ultimate team that travelled to do battle at Rutgers this past weekend.

Despite the tough losses that were endured, the Mudshark never broke its spirit and good-will towards its opponent, and was the hit of the intergalactic peace festival held to unify the warring parties of the Rutgers galaxy.

Overall, Yoda was proud of his young protegee, knowing that the Mudshark had never given in to adversity and had gained the valuable experience that will allow the Mudshark to one day fight again, and this time return victorious.

Water polo wins big at home tournament

By Amanda Woll

Bucknellian Team Correspondent

The women's water polo team is off to a strong start this season. With two non-league invitational tournaments and a home league tournament under their cap, the Bison are on their way to a successful season.

The team is lead by senior Captain Kim Tierney and fellow seniors, Sharon Gashlin, Mary Anne Kurucz, and Amanda Woll. This is the fourth season that these women have played together and all have made significant contributions to this year's season. Tierney and Woll lead the team in goals scored. Both Gashlin and Kurucz are tough two-meter defenders.

On March 7-8, Bucknell hosted a non-League Invitational Tournament and finished the weekend 4-0. The Bison defeated Colgate, 15-7 , Columbia, 19-3, George Washington 20-5, and Princeton, 13-5. Overall, the entire team showed strong performances in the pool.

Bucknell hosted a league tournament March 15-16 and ended the weekend 2-1, defeating Penn State and Indiana University of Pennsylvania. The highlight of the weekend was the game in which Bucknell lost to Slippery Rock 18-12.

Slippery Rock is perenially one of the top five teams in the nation.

The Bison proved to be a solid team through strong defense, as well as offense, to score 12 goals on the Rock, the highest scoring game that Bucknell ever had against this team. The Bucknell women are looking to defeat Slippery Rock at the Southern Division Playoffs, April 19-21.

This weekend Bucknell travels to Penn State for their second league tournament of the season. The Bison will play Villanova, University of Maryland, Princeton and Penn.

Mathewson leaves legacy at Bucknell

Original baseball Hall-of-Famer excelled at football, basketball for Bison

By Luke David

Bucknellian Staff Writer

In 1898 a young man who liked to play checkers and would become one of the most famous athletes of his era arrived at Bucknell University. Because most people had already heard about the amazing arm strength that Christy Mathewson possessed, his arrival on campus was anticipated by many students. It was not until he actually arrived in Lewisburg that most people began to realize the non-baseball contributions that he would make to the school.

Mathewson's rare combination of height, strength and speed did not go unnoticed by the football coaches and they soon convinced him to be a part of the team. It was perhaps on this field that Mathewson made his biggest contribution to the school.

With nicknames like "Matty," "Husk" and "Big Six," Mathewson scored 106 points during his three-year football career. While he kicked eight field goals during those years, Christy was also known as a punishing runner and an exceptional punter.

But his contributions did not end there. Matty was also the center on the basketball team , a member of the Glee Club and Literary society, and the class president. Amazingly enough, during all of his years in Lewisburg, Mathewson pitched for a pro team in Honesdale in order to pay his bills.

Born in Factoryville, PA, and one of five children, Mathewson would not remain in Pennsylvania for long. In 1900, Mathewson became a member of the New York Giants of the National League. With his honest and clean-living personality thrust into the spotlight, Mathewson began to have an impact not only on baseball, but on American life as well.

Matty brought the game into the mainstream of the country because his education, good looks and reserved manner represented all that Americans believed in. Not to mention his total dominance on the baseball diamond.

Mathewson used his famous "fadeaway" pitch, now known as a screwball, to win 30 games in 1903, 1904 and 1905, and an astounding 37 in 1908. No stranger to the pitching promised land known as the no-hitter, Mathewson pitched one in 1901 against St. Louis and one in 1905 against Chicago. His unparalleled strength and endurance allowed him to pitch three world series shut-outs in five days versus the Philadelphia Athletics in 1905.

One of the original members of the Baseball Hall of Fame, Mathewson holds several impressive career marks. On his way to pitching 551 games, he amassed 373 wins and 2502 strikeouts while posting an earned average of 2.13, good for fifth on the all-time list.

Even when Mathewson's physical gifts failed him, he continued his association with baseball by managing the Cincinnati Reds from 1916 to 1918, and serving as the president of the Boston Braves in 1920.

As a person who achieved excellence in all phases of his life, Mathewson earned the respect of everyone who came in contact with him. According to his wife, he was "a good man, a very good man, but he [was] not a goody-goody."

Mathewson is buried in the cemetery just North of campus and his tombstone, as well as the stadium that bears his name, serve as reminders to the community of the standards of excellence that one man set for himself.

PAIN KILLER.

EXCLUSIVELY *for* FACULTY *and* STAFF
For fast relief from the nagging ache of taxes, we recommend TIAA-CREF SRAs. SRAs are tax-deferred annuities designed to help build additional assets—money that can help make the difference between living and living *well* after your working years are over.
Instant tax savings.
Contributions to your SRAs are deducted from your salary on a pretax basis, so you pay less in taxes now. And since earnings on your SRAs are also tax deferred until you receive them as retirement income, the money you don't send to Washington can work even harder for you.
Loans and more.
What else do SRAs offer? A valuable loan option, plus a full range of investment choices and the financial expertise of TIAA-CREF—America's largest retirement organization.*
The sooner you act, the sooner relief begins.
To find out more, stop by your benefits office or give us a call at 1 800 842-2888. We'll show you how SRAs can lower your taxes.
Do it today. It couldn't hurt.
Visit us on the Internet at www.tiaa-cref.org
TIAA CREF Ensuring the future for those who shape it.℠
*Based on assets under management.

SPORTS

Clank, Clank goes the wayward shots of March Madness

Let me start this by saying that I am incredibly impressed with the Arizona Wildcats. Arizona and Lute Olson took a young and inexperienced team and surprised three top seeds to win an electrifying championship. And for those that saw that championship game they saw a close and exciting game.

Notice that I didn't say a good game.

With the exception of Arizona's awesome free throw shooting, the players in the final four, and actually the whole tournament, looked like they were trying to shoot a bowling ball into a dixie cup. It was pathetic.

I realize that I'm not the first person to bring up the awful shooting plaguing basketball (in fact, I'm probably not even the 100th) but this is something that needs to be addressed. I mean, give me a break, these guys have spent half of their lives on a basketball court and they can't hit an open 15-footer.

A big part of the reason for this downward trend isn't the fascination with the dunk as many, nay, every run-of-the-mill journalist seems to think, but to the added athleticism in today's game. Players are so quick today and defenses so complicated that it is hard to get good shots, but the fact is that when players do get open looks they still can't hit.

Commentary

E.J. Crawford

E.J. Crawford
Sports Co-Editor

Another reason for this is the new emphasis on playground basketball (see punk Allen Iverson). Players today have become more concerned with their wicked crossover and downtown J that they spend no time working on the mid-range jumper that wins teams big games. Neither Michael Jordan or Grant Hill are great three-point shooters, but I would trust either with my life on an open twelve-footer.

But even sadder than the abysmal shooting is the equally abysmal free throw shooting. In the finals, Kentucky's Nazir Muhammed's free throws were as off as Roseanne's pitch in singing the National Anthem. There is no viable excuse for being a bad free throw shooter at that level of play. None. Period. And the fact that Wayne Turner shoots as well from three-point land as he does from the charity stripe (wow, has that one become an oxymoron), basketball has got some problems.

This brings me to the solution—move the three point line back. Way back. At least make it a challenge. As it stands now, power forward's and center's eyes are lighting up at the chance to pop a three. Hell, even players like Chris Dudley (well, maybe not an ex-Net) feel like they can shoot a trey. It's ridiculous!

The NBA needs to move the three-point line back to where it used to be, and the NCAA should move its arc back to where the NBA's is now.

The effects of this would be many fold. First of all, it would reward the pure shooter more than anyone. No longer would any Tom, Dick or Dwayne Schitznus be able to spot up for a three. The shot would be reserved for great long-range bombers like Reggie Miller, Tim Legler and Steve Kerr (I'd love to name some college players, but they only stay for one or two years if they actually can shoot).

Secondly, by moving back the arc, average players would no longer be able to sit out in their back yards and shoot threes, and would thus focus on nailing their jumper, knowing that this will make them just as valuable. I know a lot of you out there in reader-land are saying that players will continue to practice the way-downtown three, but take a look at the stats. Shooting has dropped considerably since the NBA moved the arc in. With a farther-out arc, players will be much less apt to take a three that they will often miss, knowing that their coaches will bench them before they can say Wojchiehowski.

Another bonus would be that the three would regain its importance.

Teams would no longer just trade threes like Andre Agassi does airplanes. The three would again regain its mythic proportions and its ability to swing the tide of a game, something it has lost in the age of three-point magicians like Vlade Divac.

What I'm proposing is nothing mind-boggling. Most of the NBA's pure shooters never wanted to move the arc in in the first place, and if the NBA did it to help scoring then somebody tell that to Mike Fratello and the anemic Cavaliers. Something has to be done about the poor shooting in basketball, and unless the NBA can find a way to make players practice their jump shot (see Dennis "now I'm a movie star and a freak" Rodman), moving the arc is as good as any. Who knows, maybe next time the Wildcats win the championship they'll shoot 40 percent. Wouldn't that be grand.

Men's tennis fights to even season record

Jonah Half—The Bucknellian

The Bucknell men's tennis doubles team of Josh Plumb '97...

BY JARED SILLIKER

Bucknellian Staff Writer

With an even 4-4 season record, the Bucknell men's tennis team played three matches this past week and is into the thick of its rigorous 20-match schedule. Here's a look at the ins and outs of the season thus far:

The team went 2-1 on the week, downing Villanova and Towson State at home and losing to Army at West Point. The men all moved up a spot to defeat Towson State, as they were without No. 1 player T.K. Kelly '00, who sat out with a pulled stomach muscle. "The guys showed a lot of heart playing higher than they're used to," said Head Coach Bob Hammerlee.

Once thought to have a possible hernia, Kelly did not travel to UMBC Wednesday and may miss the match at Holy Cross on Saturday.

Kelly holds a 4-3 record at first singles and he and sophomore Steve Bomberger have compiled a 4-3 mark at first doubles. In Kelly's absence, Bomberger teamed up with freshman Justin Quandt against Towson State, winning 9-8 (7-5) in a close match.

Eight matches into the season, Sean Galligan '98 holds the top singles record at 6-2, while Quandt stands at 5-3. Both Galligan and Quandt scored key singles victories against Villanova to secure the win for the team. "It came down to Galligan and Quandt—we needed to win one of those matches, and got both," Hammerlee said.

However, despite their successes, this year's squad still could not make much of a dent in the Army lineup. Only No. 3 doubles won, as Galligan and co-captain Drew Thimme scored an 8-5 victory.

"Army was, as usual, very strong and very deep. I was pleased with the play of third doubles though, and Steve (Bomberger) gave a good fight at number three (singles)," Hammerlee said. Bomberger fell to Army's John Johnson, 7-6 (12-10), 6-2.

Also, both Quandt and Alex Dannin '99 took their opponents to three sets. "For a freshman and a sophomore to play like that against Army is spectacular," Hammerlee added.

The second doubles pair of Josh Plumb '97 and Adam Epstein '99 recorded its first doubles win of the season against Towson State, 8-6.

The men's next home match is Tuesday at 3:30 against St. Joe's.

Jonah Half—The Bucknellian

...and Adam Epstein '99 have helped the Bison improve their record to 4-4. Bucknell nexxt faces St. Joseph's on April 8th.

Healthy Bison break out against Holy Cross

Ed Joffe's seven goals highlight 14-5 win; team evens Patriot League record

BY E.J. CRAWFORD

Bucknellian Staff Writer

Healthy themselves for the first time all season, sophomore attackmen Ed Joffe and Michael Kennedy helped the Bucknell men's lacrosse team get well against Holy Cross, 14-5. Joffe tallied seven goals and Kennedy a goal and four assists as Bucknell broke a 5-5 third quarter tie with nine unanswered goals. Coach Sid Jamieson said that "it's no secret that [Kennedy and Joffe] are our biggest scoring threats... they have the athletic ability to [put up those kind of numbers], and hopefully they'll continue to do that."

Joffe's seven goals was one short Jim Ball's 1979 record. The Bison improve to 1-1 in Patriot League play (2-3 overall) with the victory.

The men's squad broke out to a great start, taking a 4-0 lead behind four Joffe goals and three Kennedy assists. However, the Bison momentum was stopped with just under two minutes left in the half, as the Crusaders scored to take the game to half at 4-1.

Paul Bruccoleri '98 played the entire first half in goal before giving way to Mark Stirpe '98 in the second, saving six and allowing only the one goal before the break.

Holy Cross picked up in the second half where they had left off in the first, scoring three consecutive goals to open the half, thus creating a 4-4 deadlock. The two teams then traded goals before the Bison took control.

Alexis Englehardt— The Bucknellian

Midfielders Noah Fink '98 (left) and Fritz Wisor '99 helped Bucknell attempt to right its lacrosse season with a 14-5 victory over League foe Holy Cross.

Within one minute of each other, Joffe, Kennedy (both assisted by freshman Ed Costello) and Chris Savinelli '99 all scored to give the Bison a commanding 8-5 lead, one which they would never relinquish. "We look at the game as a series of 15-minute games, and we just went out trying to win every quarter," Jamieson said.

Brad VonNostrand '00 collected two goals and an assist in the fourth quarter, while Savinelli and Mark DelGrego '98 each added a goal and an assist to lead the Bison.

"The players are beginning to get in tune with what their roles are. We've made some changes in the offense and hopefuly things will continue to progress," last year's National Coach of the Year commented.

Stirpe played the majority of the second half in goal, collecting seven saves and shutting out the Crusaders in the pivotal fourth quarter.

Results from the Wednesday night game at Navy will appear in next week's issue, and the team faces the top 10 Hobart at home the ensuing Saturday. "They are two great programs... These are traditionally powerful teams. We have to do what we can do and go out and play hard," Jamieson said

Fast Fact: Sophomore Ed Joffe became the sixth player in school history to score seven goals in a game. The reord is eight by Jim Ball in 1979

Sports Trivia Quiz

1. Before this year's championship, how many final four games had Arizona's Lute Olsen won?
2. What was the last team to follow up an NCAA championship with a runner-up performance?
3. What Major League Baseball team has currently gone the longest without a .500 season?
4. Name the two pitchers with the most active Major League victories.
5. How many majors did golfer Jack Nicklaus win?

Answers:

1. Zero 2. Arkansas, 1993-95 3. New York Mets 4. Roger Clemmens and Dennis Eckersley, 192 5. Twenty

Investigation pins wrestling program

Independent probe reveals at least 13 violations of NCAA bylaws; University dismisses longtime coach Bob Ferraro

BY CHRIS ELLIS AND E.J. CRAWFORD
Bucknellian Staff Writers

The results of a month-long inquiry into the Bucknell wrestling program were released to the public Tuesday, and the findings of the independent investigation spelled disaster for the wrestling program and Head Coach Bob Ferraro.

The Stier, Anderson and Malone law firm based in Washington, D.C., conducted an independent investigation of allegations that surrounded the program for some time, and found the Bucknell wrestling program guilty of at least 13 violations of unspecified NCAA bylaws, a finding that forced the Bucknell athletic department to impose penalties on the wrestling team.

The voluntary sanctions include the dismissal of Ferraro, who just completed his 23rd season as the Bucknell head wrestling coach. The provisions of Bucknell's plan also cut the number of official recruits the program can entertain from about 15 to six, and also cut the number of "talent grants" available to wrestlers by one-third. In addition, the program was placed on probation for two full years.

Player reaction was that of shock, and to some extent outrage. "It seems like the school is coming down on the wrestling program. I really don't feel that they respect the program that has produced four Division I All-Americans," junior wrestler Matt Mittman commented

Another contention of the wrestlers was how long the inquiry took to come out, as well as Ferraro being dismissed without releasing any formal charges. "I don't know all the details," added Mittman, "but it seems like [the University] kept saying that they had charges, but they would never actually file them... by dragging

See WRESTLING, Page 2

Ferraro contests alleged charges

Dismissal based on "bogus and fabricated" charges, he says

BY E.J. CRAWFORD
Bucknellian Staff Writer

Bob Ferraro has served as the men's head coach of wrestling since 1973, producing four Division I All-Americans. All that came to an end Monday night as Ferraro was dismissed by the athletic department amid allegations of, according to athletic director Rick Hartzell, "the improper recruitment of Mike Garcia and the extra benefits provided to Mike Garcia."

However, the reverberations of this dismissal are only beginning to be felt, as many wrestlers have rushed to support both Ferraro and Garcia, and Ferraro has plainly rejected the charges against him as "bogus and fabricated," to which Hartzell replied that "we [the University] wouldn't have gone through with a year-long investigation if it was bogus."

Hartzell said that it is "NCAA protocol to report self-violations," but Ferraro maintains that he has done nothing wrong. According to Ferraro, the following charges have been made against him:

- Ferraro provided room and board for Mike Garcia.

Bob Ferraro

- Ferraro bought Garcia gifts
- Bob Ferraro, Jr. used Bob Ferraro, Sr.'s house as collateral to buy an apartment house. In addition, Bob Ferraro, Jr. paid Mike Garcia $7 an hour to paint the apartment house, which Bucknell claims is in violation of NCAA rules.

Ferraro contested these alleged charges by explaining that his youngest daughter was dating Garcia at the time and that the room and board was simple family dinners, and that the gifts were for birthdays and Christmas and were reciprocated by Garcia. "I am disappointed that I never got to see the report and therefore had an opportunity to refute the... charges or file a grievance," Ferraro said.

Despite these claims, Hartzell maintains that the matter is not this simple, and that the dismissal is due to "the improper recruitment," but was restricted from saying more until the NCAA finishes its review of the inquiry. "We followed the NCAA protocol to the letter. The reason nobody knows about it is because we are at Bucknell and things like this do not happen very often," Hartzell commented.

Garcia maneuvers in court

BY KARIN DAVIDSON
Bucknellian Staff Writer

The University has evaluated the results of the investigation into the wrestling program, provided sanctions and sent the inquiry results to the NCAA, but a separate suit against three administrators is still pending.

Junior student-wrestler Michael Garcia has filed a suit against University officials Barry Maxwell, vice president for administration, Rick Hartzell, director of physical education and athletics, and Bradley Tufts, associate director of athletics, because he was suspended from participating in NCAA-related wrestling matches this season. His suspension was a result of a University investigation into a possible NCAA rules violation by the University's wrestling program. The University suspended Garcia indefinitely pending the conclusion of the inquiry done by the outside investigating firm Stier, Anderson and Malone.

Mike Garcia

On Dec. 24, Garcia filed his complaint in Union County. On the same date a motion was made for a preliminary injunction of his wrestling suspension. Union County Judge Bromfield dismissed the case. Reasons for the denial were not stated in the court papers.

As Garcia's suspension was not terminated, on March 6 a complaint was filed in Northumberland County, the county of Garcia's permanent residence, by Garcia's lawyer, Samuel L. Andes of Lemoyne, PA. The suit claims that plaintiff Garcia, a full-time student at the University, was heavily recruited by the University as a result of his academic and athletic accomplishments in high school and accepted to the University in the spring of 1994.

The complaint continues by explaining that because of the limited finances of Garcia and his family, Garcia was offered significant financial aid. The suit claims that in addition to other financial aid offered to him by the University, Garcia was offered an internship which would pay him $5,000 a year to assist him in meeting the financial burden of attending the University in exchange for his doing certain research for unnamed graduates of the University.

The complaint states that because of Garcia's concern about the internship complying with NCAA regulations, Tufts assured him and his family that all the details of Garcia's financial aid package, including the internship, fully complied with appropriate NCAA regulations. The suit claims that Hartzell had direct knowledge of the arrangements made by Tufts and Garcia. The court papers document a breach of contract, interference with contract and violation of academic policies and regulations. Garcia is asking the court to prevent the University from further breach of contract, full reinstatement of Garcia to participation in the wrestling program, and to cease any interference with Garcia's proper participation in athletics at Bucknell University.

On March 7, Garcia received a court injunction allowing him to participate in the East Coast Wrestling Association Championship tournament after being suspended since last November. The temporary injunction was to go to hearing on March 11. The Northumberland County Court House has no record of the proceedings of this hearing or whether or not they actually took place.

The defendants' preliminary objection, which was filed on March 27, to Garcia's complaint raised the question of Northumberland County being an improper venue for the suit. The defendants' counsel, Carpenter, Diehl, Kivko and Wilkison of Sunbury, stated in the court document that Bucknell University has its campus and principal place of operations in Lewisburg, Borough and East Buffalo Township, Union County Pennsylvania, and that the University doesn't regularly conduct any operations or business in Northumberland County.

Barry Maxwell

The file also refutes that the University or anyone acting on behalf of the University ever offered Garcia an internship in addition to normal financial aid granted by the University. Garcia was given 20 days from the day he received the request for change of venue to respond. No action has yet been taken.

Parties involved were unable to comment because the case is in progress.

CDC director will leave University

Kerr admits he was shocked by University's decision not to renew his contract in January

BY KATHRYN ARDINGER
Bucknellian Staff Writer

Mark Kerr, director of the Career Development Center, spoke candidly about his leaving the University in a telephone interview yesterday. Informed in a monthly meeting in January that his contract would not be renewed for the coming year, Kerr was surprised and said that the decision "came out of the blue."

Kerr came to the University as the assistant director of career development in January 1984 and was appointed director in June 1988.

He shared his appreciation of Bucknell students—past and present—who have made this one of the most enjoyable and memorable experiences in his professional career.

Mark Kerr

In terms of being angry and bitter, Kerr is not. Rather, he said that he was "surprised and shocked by the decision" and upset that he must leave the University.

"There seems to be a future direction for career development and there seemed to be a feeling within the administration that there may be someone else who could better affect that vision," Kerr said.

According to Kerr, there were personnel changes over the last few years and "internal concerns that were... acknowledged and addressed and that we were certainly improving."

He said that "in terms of service to students, alums and companies that recruit... it [the career development center and the services to our constituents] continues to be of top quality and really first rate."

Kerr expressed strong ties to the University. "I am very much in debt to Bucknell and all those associated with the University for the fine opportunities that I have been given," he said.

As for his future, Kerr is "looking for other opportunities in the field." He is also looking into human resource management and college relations corporate recruiting.

Richard Chapman, dean of students, who oversees the CDC, said that "It is our policy not to comment on personnel matters."

Library journal cuts draw faculty concern

BY BETH MARTIN
Bucknellian Staff Writer

A motion requesting a delay of the library's plan to eliminate many subscriptions to scholarly journals in the 1998 school year was passed by the faculty in a vote at Monday's faculty meeting. The motion was proposed by Peter Kresl, professor of economics.

Kresl moved that this "deselection process" be halted until the new associate vice-president, who will head the Bertrand library and Computer and Communication Services, is hired and "fully aware of the position of the faculty on this subject, which we see as fundamentally destructive of the teaching and research mission of the University."

According to Tara Fulton, assistant director of library and information services, Kresl's motion is in response to a tentative deselection list of 115 journals that the library has prepared for the faculty to consider whether it "can live without them."

"People are under the impression that the list is some definite, ultimate decision. It's just a starting point for negotiations," she said. Fulton added that the library will always be adding some new journal subscriptions.

Fulton said that the library formed the list because the inflation rate for journals since the mid-1980s has been 10-15 percent each year, compared to an overall inflation rate of two to five percent. The projected inflation rate of journals in 1998 is nine to 11 percent.

Although Fulton acknowledged that the library budget has steadily increased in percentage above the rate of the University's general operating budget, she said that the high cost of the journals (175 journals that the library subscribes to cost over $1000 apiece) poses "an economic reality that Bucknell, like many other academic libraries, is facing, and it means making some pretty hard choices."

Fulton said that the University presently rates second in periodical expenditures among the Oberlin Group, or its 74 frame of reference schools.

"Bucknell has been very fortunate, actually. Where many institutions already started cutting in 1984, 1985, we didn't do our first cancellation until 1991," said Fulton.

Kresl, however, said that the library has been deselecting journals since he first came to the university in 1969.

Kresl said "They're always looking at ways to get rid of journals we don't need. Some were obvious, like a journal in Norwegian... but once they do away with the obvious things then you wonder... At what point do we say that the collection is bare-bone?"

Kresl said that the list of journal subscriptions that the library has proposed to cancel have raised serious concerns among the faculty.

"The faculty are the ones who do the teaching and research... We should be central to the discussion of what the collection should be. The University is faculty, students and a bunch of books. Everything else is support," Kresl said.

Fulton said that the money used to purchase journals is part of the library budget, which, itself, is part of the larger University budget.

Kresl suggested that the University reconsider its financial priorities and allocate more funds to the library for the purchase of journal subscriptions. "It's a question of priorities. Are the number one priorities of the institution zero-risk in terms of liability, a surplus of $2 million a year, and then somewhere down the road we have the academic program?" he continued.

Kresl wrote the motion after the American Association of University Professors suggested in a meeting that the faculty make their views known to the administration in a more assertive manner. He said that by writing it, he was expressing what had already been said in letters from departments in most of the sciences, psychology, chemical engineering, economics, English and history.

Fulton attributes the high increase in the price of journals to a number of factors, including the dollar's relatively low value in Europe (the library subscribes to many European journals), the general page increase per journal and the rapidly rising cost of paper.

Fulton said that an increasing number of journals are becoming available by electronic means. The cost of receiving a specific article from a journal over email or by fax transcimile is always significantly less than a subscription to the journal. She said it is more cost-effective to obtain certain articles electronically than to subscribe to a journal that is rarely used by the University community.

Fulton said that the quality of electronically transcribed articles

WRESTLING

From Page 1

it out like that [the University] showed no respect for us, the wrestlers."

The penalties were imposed voluntarily on the Bucknell program by the athletic department after receiving the results of Stier, Anderson and Malone's four-month long inquiry. Forty-nine people were interviewed by the independent firm.

"We felt that the best way to maintain the integrity of this department and this institution was to take the initiative in this case," Sports Information Director Bo Smolka said. "This case became bigger and bigger and more and more serious until we decided it warranted an investigation."

The investigation report and list of self-imposed penalties has been sent to the NCAA offices for consideration, but athletic director Rick Hartzell doesn't believe that the NCAA will advise further sanctions against the Bucknell wrestlers.

Bo Smolka

"It's definitely to our advantage to impose these penalties upon ourselves," Hartzell said. "History shows that the NCAA sanctions are always more punitive and more stringent than ones that schools set for themselves. They could come to campus and impose more (sanctions), but at this point, that's not likely."

The allegations that prompted the independent investigation center around possible recruiting violations and side payments made to wrestler Mike Garcia '98, violations that may date back to 1994. Hartzell declined comment on specifics of the investigation, but maintained that the incident was isolated to Garcia alone.

"This is a one-athlete, one-coach, one-sport problem," Hartzell said. "There is no indication that this is anything but that."

Most significant among the self-imposed penalties was the dismissal of Ferraro as head wrestling coach. Ferraro had coached the team since his appointment as Bucknell's director of recreation in September of 1973. Ferraro's Bucknell resume included producing 44 ECC and ECWA Champions and three ECC Coach-of-the-Year honors, but accusations had swirled about his possible involvement in wrongdoing throughout the investigation. Because of the pending NCAA review, Hartzell also declined comment on Ferraro's specific involvement in the violations.

The other sanctions, which included cuts in recruiting visits and student aid are, according to Hartzell, "minor" penalties which pose no real threat to the success of the wrestling program. In placing these sanctions, Hartzell and the athletic department are trying to piece together a plan for penalty that is similar to those imposed on athletic programs with relatively similar problems.

"These (the other penalties) are relatively minor, and are penalties that are to the NCAA's liking," Hartzell said. "We tailored this plan to similar situations in which the NCAA sets penalties."

The sanctions imposed by the Bucknell athletic department will take effect immediately and will last throughout the two-year probation period. Bucknell's next task is hiring a wrestling coach to replace Ferraro, a coach that will be entrusted with the task of returning on-mat success and integrity to the program.

A meeting was held yesterday afternoon to discuss the hiring of a new coach, and Hartzell addressed the questions and concerns of the players. "He made an effort to answer our questions, but still he avoided questions directly related to the NCAA [investigation]. We appreciate that we do have a program and that [Hartzell] took the time to meet with [the wrestling team], but we don't feel like he really supports us," Mittman said.

The athletic department expects the search for a new coach to begin within a few weeks, and with substantial input from wrestlers currently on Bucknell's roster.

Rick Hartzell

"We're going to do everything we can to salvage a year of recruiting, and keep the recruits that we do have," Hartzell said. "We're going to do everything that we can to have a good program, and we're going to do it the right way."

The new coach will likely have to face pressure and external control unlike any Ferraro ever encountered. The probation restricts many of the freedoms that had been enjoyed by the wrestling program in the past.

"All coaches need some degree of autonomy to thrive, but in this case, at least for two years, that autonomy will be gone," Hartzell said. "We will be focused on every step that the wrestling program takes."

PUBLIC SAFETY LOG

April 1, 1997

LARCENY—Public Safety Officers received a report that 12 golf course flag poles and flags had been removed from various locations throughout the golf course by unknown person(s). The incident is under investigation.

April 2, 1997

INFORMATION/FIRE—Public Safety Officers responded to a fire alarm activation in Roser Hall. A fan placed on a halogen lamp was burning. The fire was extinguished, and the room occupants were treated at Evangelical Hospital Emergency Room for minor burns.

INFORMATION/ASSIST RESIDENTIAL LIFE STAFF—Public Safety Officers responded to Larison Hall to assist residential life with a loud noise complaint. A stereo was playing in an unoccupied and unlocked room. Alcohol was found in the room. The room occupants were cited, and the alcohol was confiscated by Public Safety. The incident is under investigation.

April 3, 1997

INFORMATION/STUDENT COMPLAINT—Public Safety Officers responded to Larison Hall for the report that two students had been fighting. No one was injured, and neither individual wished to press charges or to seek medical treatment.

April 4, 1997

MEDICAL ASSIST—Public Safety Officers responded to Harris Hall for the report of a student with neck pain. The student was transported, by ambulance to Evangelical Hospital Emergency Room for treatment.

MISSING PROPERTY—A University employee reported to Public Safety Officers that the carpet was missing from one of the entrances of the Biology Building. The incident is under investigation.

INFORMATION—Public Safety Officers responded to Lambda Chi Alpha Fraternity for the report of a disorderly student. The student was located in the parking lot and cooperated with the officers during the interview.

April 5, 1997

INFORMATION/ASSIST LOCAL POLICE DEPARTMENT—Public Safety Officers assisted Lewisburg Police Department in escorting two students to Smith Hall to obtain their identification. The students were cited by Lewisburg Police Department for underaged drinking violations.

ALCOHOL VIOLATION/UNDERAGE CONSUMPTION—While on routine patrol, Public Safety Officers observed a University student urinating on Moore Avenue. The student was issued a citation for underage consumption and disorderly conduct.

ALCOHOL VIOLATION/UNDERAGE CONSUMPTION—Public Safety Officers stopped a University student in the Academic Quad regarding involvement in an incident at the Langone Center. The student was issued a University citation for underage drinking.

TAMPERING WITH FIRE EQUIPMENT—A University student reported to Public Safety Officers that a fire extinguisher in Swartz Hall had been discharged. The extinguisher was replaced and the incident is under investigation.

VANDALISM/TAMPERING WITH FIRE EQUIPMENT—Public Safety Officers responded to Larison Hall for a fire alarm activation. Unknown person(s) had discharged a fire extinguisher, causing the alarm. The incident is under investigation.

INFORMATION/ASSIST LEWISBURG POLICE DEPARTMENT—The Lewisburg Police Department observed a University student with an open container of alcohol at St. Catherine and S. 6th Streets. The student was issued a citation.

INFORMATION/ASSISTED EAST BUFFALO POLICE DEPARTMENT—East Buffalo Township Police Department requested Public Safety Officers to assist in transporting a University student who was cited for public drunkenness and disorderly conduct, after the student attempted to strike a private security officer at Peking Gardens.

April 6, 1997

ALCOHOL VIOLATION/PUBLIC DRUNKENNESS—While on routine patrol, Public Safety Officers observed a University student fall in Vedder Circle. The student admitted to having consumed alcohol and was issued a citation.

VANDALISM/TAMPERING WITH FIRE EQUIPMENT—Public Safety Officers responded to Larison Hall for a fire alarm activation. The fire alarm was caused by unknown person(s) activating a pull station. The incident is under investigation.

MEDICAL TRANSPORT—Public Safety Officers responded to Vedder Hall for the report of an ill University student. The Student Security Supervisor transported the student to Evangelical Hospital Emergency Room for treatment.

MEDICAL ASSIST—Public Safety Officers responded to Swartz Hall for the report of a University student with a shoulder injury. The student was transported by ambulance to Evangelical Hospital Emergency Room for treatment.

INFORMATION/DISTURBANCE— Student security reported a disturbance near Edwards House. Public Safety Officers responded but the individuals were gone and the incident ended upon the officers' arrival. The incident is under investigation.

INFORMATION—During the cycling event, Public Safety Officers observed a non-University student fall from a bicycle on Moore Ave. The student was transported by ambulance to Evangelical Hospital Emergency Room for treatment.

LARCENY—While on routine patrol, Public Safety Officers observed that the stop sign at the intersection of Fraternity and Vaughan Literature Roads had been removed. Physical Plant was notified and the incident is under investigation.

April 7, 1997

INFORMATION/DISPUTE BETWEEN TWO PARTIES—Public Safety Officers responded to Sigma Alpha Mu fraternity to speak with a University student that had been involved in a verbal/physical altercation with another University student. Some property damage occurred during the altercation, but after meeting with Lewisburg Police Department neither party chose to press charges.

April 8, 1997

MEDICAL ASSIST—Public Safety Officers responded to the front of the Music and Arts building for the report of a University student with a leg laceration. The student was transported to Student Health Services for treatment.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

New standards threaten the future of Derby Days

Mandates from the Committee on Complimentary Activities attempt to curb alleged sexist activities in Sigma Chi event

BY KATE ARDINGER AND REBECCA KLINGLER

Bucknellian Staff Writers

Sigma Chi Fraternity may not be able to hold its annual philanthropic Derby Days next year if the event does not meet the changes mandated by the Committee on Complimentary Activities this semester.

Complaints raised by the Women's Resource Center caused the fraternity and CCA to take a second look at the philanthropic week, which has traditionally been geared for sorority participation. The complaints centered on the alleged sexist and racist nature of the lip-sync contest, said Brad Hunt '97, philanthropy chair of Sigma Chi and Derby Days co-chair.

After viewing a videotape of last year's event, the WRC "made a complaint that they thought that some of the content was sexist," Hunt said. The main gist of the Center's complaint was that "they don't want women dancing for the pleasure of men," he said.

In November, Janice Butler, director of WRC, met with CCA, representatives of Sigma Chi and the presidents of all of the sororities on campus, Michael Moyer '97, president of CCA said.

"Butler spoke for about a half hour and told CCA that a lot of women on campus were concerned with the nature of Derby Days" because it conveyed to the campus the image of "women performing for men," Moyer said.

Moyer explained that "Sig Derby has a long history here... It has been a controversial thing for at least 10 years. CCA is a University committee that is supposed to handle anything that relates to students that is not academic."

"Actually, philanthropy proposals like this do not have to go to CCA for approval all of the time. This one has been so controversial that the dean of students would like CCA to handle it," Moyer said.

Sigma Chi drafted a plan to address the concerns.

"We thought there were some valid complaints," Hunt said, and so he and Dave Shrader '97, co-chair of Derby Days, submitted a proposal to the CCA which included prior-review of the lip-synch skits to ensure they do not contain offensive material.

According to the proposal, Sigma Chi now requires that "a complete video taped rehearsal... be given to the Derby Days Review Committee composed of the Derby Days Chairmen and the Deans of Students" for prior approval. Any group who varies from its submitted videotape at the actual contest, which is to occur Saturday, will be immediately disqualified.

Ben Buckley—The Bucknellian

Derby Days co-chair Brad Hunt '97

The deans of students, who include Richard Chapman, Ruth Burnham, Joyce Bylander and Gerald Commerford, along with Hunt and Shrader have already previewed most of the skits for this year's contest.

"No routines really had to be changed," Hunt said.

Despite the fact that none of the skits warranted adjustments, Hunt still supports the policy of prior-review.

"I'd rather look at them to see if something comes up" that might be offensive to people, he said.

In addition to the prior-review, Hunt and Shrader also stated in the proposal that their goal was to make it easier for other groups to participate in the event. Traditionally, the proposal claimed, Derby Days "has been viewed as a competition for 'bragging rights' between sororities," which has "limited" participation. By changing the point system, adding a volleyball and basketball competition and recruiting other groups and individuals by extending written invitations, Sigma Chi hopes that outside participation will increase, specifically male participation.

CCA accepted the proposal, but added its own stipulation—that 20 percent of the participants in every event must be male. In order to have Derby Days next year, Sigma Chi must show that this quota has been met, Moyer said.

"The more people involved, we make more money," Hunt said, adding that he wants to see more of a campus-wide participation and not just sororities.

But he personally doesn't think there should be a quota for male participation. "I agree that more males should participate, in fact, I encourage it... but I don't believe there should be a specific number," he said.

Even so, Hunt said getting 20 percent male participation should not be a big problem, especially in the volleyball and basketball tournaments. Sigma Chi is entering its own team into the lip-sync contest, so the quota should be met.

To keep track of the number of men and women involved in the event, participants will add their name to a list according to gender. The list also serves as a petition, as the participants have the chance to show if they agree or disagree with the required quota by writing a "Yes" or a "No" beside their names.

If the numbers come up short, however, CCA has control over the fate of Sig Derby.

"They have total jurisdiction according to the evidence we give them," Hunt said.

Hunt does not believe a failure to meet the quota this year should determine whether or not the event will be allowed to occur next year. "It's impossible" to change completely the stereotype of Sig Derby in one year, Hunt said, although the members of Sigma Chi are working hard to do so.

National Briefs

Man with TWA 800 radar tape ordered to court

NEW YORK — Richard Russell, a retired United Airlines pilot living in Florida, says he has been ordered into court to explain where he got a radar tape he says proves TWA Flight 800 was downed by a Navy missile.

He said he has received a subpoena to appear April 16 in U.S. District Court in Brooklyn to discuss the tape, which he claims was placed in his mailbox with no identification or postmark.

Russell has said the tape, seized from his home by investigators last month, shows a blip he claims is a missile headed toward Flight 800.

FBI investigator James Kallstrom said the blip on the official radar tape was an unarmed Navy plane traveling through the area with a broken transponder. He did not comment on the subpoena.

The Paris-bound 747 exploded July 17 and crashed minutes after taking off, killing all 230 people aboard.

Clinton to apologize for Tuskegee syphilis experiment

WASHINGTON — President Clinton will offer a formal apology for the notorious "Tuskegee experiment," in which black men suffering from syphilis were left untreated for years so the government could study the disease, the White House said Tuesday.

The announcement came as four survivors of the experiment met at a church in Notasulga, Alabama, and held a news conference to demand a meeting with Clinton and an apology from the government. There are eight survivors in all, the youngest of whom is 87.

More than 600 African-American men were part of the secret syphilis study conducted in Tuskegee, Alabama, between 1932 and 1972, nearly 400 of whom actually had syphilis.

Although they thought they were being treated for the sexually transmitted disease, they were getting only placebos. Doctors withheld penicillin, the standard treatment since 1947, so they could study the progress of the disease.

Lockheed Martin unveils F-22 Raptor

WASHINGTON — Lockheed Martin Corp. was scheduled yesterday to take the wraps off its first production model of the F-22 Raptor, the expensive, stealthy fighter plane the Air Force claims is vital to keep the U.S. in the lead in combat aviation.

But before the F-22 even gets off the ground, the competition between the Raptor and two other "next generation" war planes has turned into a real dogfight for defense dollars.

While the F-22's clean lines and cutting-edge technology make it nearly invisible to radar, it is not invulnerable to congressional critics who rap its $80 million-per-plane price tag as unaffordable.

The Air Force argues it needs the pricey plane to make sure it not only wins future battles, but enjoys the kind of overwhelming air superiority that allowed the U.S.-led coalition to roll to victory in the Persian Gulf War with minimal casualties.

Report: Pedestrians more likely to be killed by car than gun

WASHINGTON — Pedestrians in the United States are almost twice as likely to be killed by a stranger in a car than a stranger with a gun, says a report released Tuesday.

The report also shows that while pedestrians account for 14 percent of all traffic fatalities, only one percent of federal highway safety funds are spent on pedestrian safety. The study was done by the Environmental Working Group and the Surface Transportation Policy Project.

The most unsafe cities for pedestrians, according to the report, are Ft. Lauderdale, Miami and St. Petersburg, Florida; Atlanta; and Dallas. The safest are Pittsburgh, Boston, Milwaukee, New York City and Rochester, New York.

World Briefs

Iraq defies U.N. with pilgrim flight to Saudi Arabia

SAUDI ARABIA — An Iraqi plane flying Muslims to the haj pilgrimage in defiance of a United Nations air embargo on Baghdad landed yesterday at Jeddah airport in Saudi Arabia, Saudi officials confirmed.

Earlier in the day, reporters in Baghdad saw the Soviet-built Ilyushin 76 take off from Rasheed airbase in the eastern outskirts of the Iraqi capital on its way to Jeddah, the first international flight dispatched since the U.N. Security Council banned flights in and out of the country after Iraq's 1990 invasion of Kuwait.

Diplomats in the kingdom say Saudi Arabia, as custodian of Islam's two holiest shrines, cannot be seen as denying any Muslim with a valid haj visa the right to perform the pilgrimage, which reaches a climax this year on April 16.

Italian government could fall on Albanian aid vote

ROME — Italian Premier Romano Prodi told parliament yesterday that if his Communist allies in parliament do not support Italy's military mission to Albania, he would let the president decide the government's fate.

A vote in the Chamber of Deputies, the lower house of parliament, was scheduled for later in the day. Earlier yesterday, the Communist Refoundation party confirmed it would vote against the deployment.

Prodi did not offer to step down, as the opposition has demanded, but one outcome of a meeting with President Oscar Luigi Scalfaro could be his resignation.

The Italian Senate on Tuesday approved the deployment of troops in Albania as part of a multinational mission that has put Italy's international prestige on the line.

Italy is to lead the 6,000-strong force, scheduled to go to Albania next week to provide security for humanitarian aid.

Mobutu fires Zairian prime minister

KINSHASA, Zaire — Zairian President Mobutu Sese Seko ousted the nation's new prime minister yesterday and immediately named the army chief of staff to head the government. Also yesterday, witnesses said rebels in the east captured the nation's second-largest city, Lubumbashi.

With the central African nation spiraling into turmoil, the United States urged Mobutu to resign and go into exile.

The White House comments came as Mobutu fired Prime Minister Etienne Tshisekedi, an opposition activist who was appointed to the post one week ago, following a morning of fierce clashes in the capital Kinshasa between soldiers and thousands of demonstrators supporting Tshisekedi.

It also came less than 24 hours after Mobutu declared a state of emergency and banned political rallies in the crumbling nation.

India, Pakistan break ice at talks

NEW DELHI, India — India and Pakistan held upbeat peace talks yesterday, agreeing to continue negotiations on problems that have brought their countries to war three times.

In a goodwill gesture, the Asian neighbors agreed to free several hundred fishermen held by the countries for illegally fishing in each other's waters.

Other issues at stake include trade and cultural ties, but the thorniest problem is the disputed region of Kashmir, of which India controls two-thirds and Pakistan the remainder.

Pakistan says Kashmir is the core of their problem and must be addressed first. India says because Kashmir is the toughest issue, it should be dealt with later so progress can be made on easier matters. More than 20,000 people have died in separatist conflict in the region since armed insurgency began in 1989.

India has accused Pakistan of providing material aid to separatist militants, a charge Pakistan denies.

Foundation gives grant to University

The University is the recipient of a $65,100 grant given by the Whitaker Foundation of Mechanicsburg, PA, to support the master of arts degree in chemistry for high school teachers. The grant will support the enrollment of four high school teachers from Cumberland, Dauphin and Perry counties for three summers' study each. The master's degree program was established in 1993 with the purpose of providing "high school teachers with a research-based, discipline-oriented master's degree in chemistry," according to a Public Relations press release.

MG 101 to host "Alley-Oop"

MG 101 will host a 3-on-3 basketball tournament Sunday in the Fieldhouse. "The tournament will consist of half-court games played up to 11 points with a double elimination format," according to a Public Relations press news release. All divisions will be co-ed for grades seven and eight, nine and 10 and 11 and 12. There will also be divisions for University students' teams.

The admission fee is $5 per person. All proceeds will be donated to Geisinger Children's Hospital.

The tournament begins at 8 a.m. to 11 a.m. for seventh and eighth graders, 11:30 a.m. to 3 p.m. for ninth and 10th graders and 3 p.m. to 6:30 p.m. for 11th and 12th graders. University student teams will begin at 6:30 p.m. Prizes will be awarded at the conclusion of each division.

Survey says job opportunities are up

Seniors searching for jobs look to internet, CDC listings hoping to confirm national report

BY MARNI HARRIMAN
Bucknellian Staff Writer

According to a national survey of employers conducted by Michigan State University, this year's graduates will have a better chance of landing a job than those in 1996. This annual report entitled "Recruiting Trends" boasts an increase in job opportunities since the early '90s when many businesses began to downsize. Employers stated they expected a 6.2-percent increase in the number of jobs this year.

Mark Kerr, director of the Career Development Center, found these statistics to be accurate locally. He sees the opportunities for the Class of 1997 as "brighter and more optimistic." Kerr anticipates the seniors doing well and has seen "more multiple offers from companies," which is different from the Class of 1996.

In fact, more companies are interviewing later in the season and are coming back for second recruitments. "The recruitment season has been lengthened into the spring this year," Kerr said. "In general, we found that companies have come to campus earlier in the fall when they knew of opportunities, and they project further out into the spring. The employment market has grown."

Bucknell seniors vary in reaction to the word "graduation." For most, this word equates the other looming notion of getting a job. For others, it means more school. Regardless of the path chosen, students have to search actively for opportunities.

Reality may hit graduates in different ways as they leave The Bubble, but the main question is: What do they do from here? And how do they find it?

"It can be very overwhelming in the beginning, but you have to take the initiative," said Kristin Clark, a senior who will be working for Merill Lynch in New York City.

Although employment numbers are up, for the majority of seniors, that perfect job isn't going to suddenly appear. There are many options for the Bucknell senior catapulting through the job or graduate school search, including networking personal connections, the Career Development Center or browsing the Internet.

The Career Development Center offers many outlets for job-seekers. Seniors have become accustomed to the Employer Reviews, where large businesses visit the campus to recruit. The CDC then offers resume drop-offs for students who are interested in certain positions. Many students then receive notice of an interview on campus.

The CDC publishes job listings in its newsletters and by email. Students also find its brochures on how to write resumes and cover letters useful.

Many seniors feel that the seminars on how to prepare for the future are invaluable. "You must be willing to go to their functions for them to help you," Paige Goodchild '97 said.

While the CDC can be very helpful for certain industries and geographical areas, many students find its services to be limited. "I want to go back to the West Coast and the CDC is limited in that area," Jim Watson '97 commented. "I'd like to see more opportunities outside New York City, New Jersey and Philadelphia. You seldom even see anything in D.C. or Boston."

This seems to be a common gripe for all those who do not wish to move to the Big Apple. "Seventy-five percent of the jobs that are listed are in New York and that is not where 75 percent of the seniors want to go," Goodchild said.

Susie Shindler '97 met with someone in the CDC, interested in learning about Public Relations firms in Boston or Chicago. "They gave me someone's name in New York City and sent me on my way," she said.

"They were inversely helpful," Shindler explained.

"It's ridiculous," commented Doug Hamilton '97, a management major who intends to be in Boston upon graduation. "The school should work on recruiting activities outside New York City."

"The CDC only helped me with my resume," he added.

Another complaint is that the CDC is only geared towards business, management and accounting majors. "They really don't allow other career avenues besides financial services and insurance. The whole school is like that."

"What if I wanted to go into forestry?" Watson asked.

Kerr responded that he "understands the students' concerns and the reality is that we've made numerous attempts to aid students which are not visible in campus recruitment."

The companies who are active in recruitment here tend to be larger companies that have more positions to offer, en masse, like Andersen Consulting, Price Waterhouse, and GE. They also dedicate more money into recruiting college seniors.

Andersen Consulting, for example, offered approximately 25 positions to Bucknellians this year and is one of the biggest recruiters on campus. Its Manhattan office alone has reached the 100 Bucknell alumni mark. Once Bucknellians begin their positions at Andersen, they are expected to be active in college recruitment.

As a result of its limitations, seniors are seeking alternatives to the CDC, such as personal networking. The popular phrase, "It's not what you know but who you know" rings true for many fields.

> ***Although employment numbers are up, for the majority of seniors, that perfect job isn't going to suddenly appear.***

Many seniors have found that sending their resumes and a cover letter to friends' parents or siblings or to parents' friends prove to be more successful.

The CDC is working with the Office of Alumni and Constituents Relations in terms of networking through various University clubs across the country. Students can browse through AlumNet, a database that holds a few thousand names of alumni in different fields who have volunteered to talk with students. They can identify a career path and geographical preference and find information accordingly.

Job hunting on-line has become popular among students. Without even leaving the comforts of the Bertrand Mac Lab, students can plug key words into Netscape searches and find a company's home page. Then they can look under their particular job listings and find to whom they should send a resume and cover letter.

Jeff Davall '97 found this tactic to be the best for his particular field of entertainment and sales. "The way the Internet is set up, one can specifically classify one's interests," he said.

Sometimes people can even apply for a position via the Internet.

Davall has found that employers react positively upon learning that he had found them through the Internet, since it is a new information avenue.

Corey Harbold '97 did not find his potential career choice of oil field services in the CDC job listings, so he searched the Internet with specific companies' names. "The Internet is more up to date than the CDC," Harbold said .

In addition, hundreds of employment services now have Web sites to assist job seekers. By accessing America's Employer (http://www.americasemployers.com), thousands of job opportunities in diverse fields can be found.

CareerPath (http://www. careerpath. com) lists job openings from six major newspapers in one database.

The Monster Board (http://www.monster.com) serves all job-seekers from entry-level to senior executives and offers 50,000 job listings from approximately 4,000 companies.

JOBTRAK (http;//www.jobtrak.com) is used by 180,000 employers, with more than 2,000 new jobs posted every day. Bucknell is one of 400 colleges and universities who subscribe to this site.

In early May, an organization will be visiting campus called Job-Direct (http://www.jobdirect.com), which will be registering students on-line for job access across the country. The organization is presently touring the East Coast in a 32-foot RV equipped with 15 laptops which are connected to a server. They will then show students how to use their service.

Employers actually help finance the program so there is no cost to the student. Students don't have to worry about printing out their resumes on specific paper with a specific font; all they have to do is leave it on the service and send it electronically.

This is only one of the ways the CDC is making attempts to expand and reach out to the students who have become lost in the job search. "We are hopeful and confident that this is another avenue for students," Kerr said.

One thing to remember is that not everyone has a job when they graduate in May. As one Bucknell alumni said, "There's always June, July, August, September..."

Pair of seniors plan "one last party"

Senior class contributes funds for new Ted's on the Hill Tent Party

BY KARIN DAVIDSON AND REBECCA KLINGLER
Bucknellian Staff Writers

Graduation festivities are now three days long, thanks to the efforts of Gretchen Phillips '97 and Kim Simonson '97.

The two seniors booked Ted's on the Hill the Thursday before commencement exercises for a class gathering reminiscent of the traditional tent party before President Adams' decision to make it dry. Commencement exercises are scheduled for Saturday, May 24.

"People felt like they needed more" to celebrate graduation, Simonson said, explaining why she and Phillips organized the event.

This party is "one last party, a real party for the seniors," she added. "It's something special that people will remember."

After Phillips and Simonson did the preliminary research, they presented their idea to Glen Henderson, senior class president. Henderson agreed that the idea was a good one and decided to help.

"It's a good chance for the class to get together without their parents," Henderson said. "A lot of people were going to go off and do their own thing and splinter class unity, so we provided a class event that could keep everyone together."

"I think it's just nice you can be with the class one last time," Simonson said.

Beetna Kim—The Bucknellian
Glen Henderson '97

Henderson said the class is contributing money to keep the price of the tickets down to approximately $12 to make the event accessible to all seniors who have returned early from senior week.

The organizers are hoping to sell about 500 tickets to classmates, not including faculty and guests, Henderson said. They are mailing out 1500 invites, and Henderson expects between 800 and 1,000 people at the event.

The party at Ted's on the Hill, located on Route 15 towards Shamokin Dam, will be held in an outdoor tent and will include an open bar, as well as food, a deejay, transportation to and from the event, and other entertainment. Beer, alcohol punch, champagne, wine and soft beverages are planned for the open bar.

Seniors may invite one guest who is of legal drinking age.

Students must use the provided transportation. Security will be checking the parking lot to make sure no one drove separately.

The party will run from 6 p.m. to 9 p.m.

Despite the new event, Henderson stressed that everyone should still go to the traditional tent party, which will have a "great band" and is open to families and friends.

Other graduation events include the Senior Night Finale at Skips, which will take place Thursday evening after the Ted's on the Hill tent party.

"It's really neat this year because not only will we have a final Skip's night, but Ted's on the Hill and the traditional graduation," Henderson said.

The traditional tent party will take place at 10 p.m. the next evening, following the Senior Awards Ceremony at 3 p.m. in the Weis Center, the picnic at 5 p.m., the Baccalaureate service at 7:30 p.m. in Rooke Chapel and the 9 p.m. Candlelighting Service on the Quad.

Another Baccalaureate service will be held at 8 a.m. in Rooke Chapel before the graduation ceremony at 10 a.m. Saturday morning on the Quad.

JOURNALS

From Page 1

varies. "Some of the disciplines can easily make use of these electronic alternatives. In other disciplines... you need that clarity of detail to make any use of that article. In those cases, fax alternatives are not sufficient."

She said that 23 of the journals that are on the list for possible deselection, are already available in full image and text on the Internet

Kresl described some of the potential difficulties in researching through electronic means, saying that it is difficult to determine the scholarly value of articles found on the Internet compared to articles found in print journals. "You click something down and you know what *The New York Times* is and you know what *The National Enquirer* is. You know which one you should use in a paper, but if you get everything just popping on your screen, you don't know."

Mark Neuman, professor of history, said "I am very much in favor of the motion. The University requires a degree of trust between faculty and parts of the administration that wasn't quite happening. It should be a period of settling and measured thought."

Nancy White, associate professor of economics and chair of the committee on instruction which will be instrumental in determining the influence of Kresl's motion on the deselection process, said "This is an important matter, and the next steps in response to the motion passed are not yet clear."

The Committee on Instruction will discuss Kresl's motion at its meeting next week.

SCIENCE AND TECHNOLOGY

Ancient glass artifacts studied in dungeons of Roberts

BY HEATHER SCHWEIGER
Bucknellian Staff Columnist

Down in the depths in the basement of Roberts, one of the two largest collections of glass artifacts from the Middle East are being studied. Heading up this archaeological laboratory is Janet Jones, professor of classics.

In addition to teaching, Jones is an active archaeologist who spends her summers working on several sites in the Middle East including Aqaba in Jordan, Carthage in Tunisia, and Gordian in Turkey. Once the materials are excavated in the summer, Jones then uses the school year to process one particular category of the findings from the site: ancient glass.

Jones' avid interest in glass began at William and Mary College where she was a glass-blower. "I thought glass was just the coolest material I'd ever seen because it starts out as basically sand and it turns into this stuff that you can blow and make all kind of wild shapes." Her studies eventually resulted in a Ph.D. in classical archaeology from the University of North Carolina, from which she then came to the University.

The site that Jones is presently working on is Aqaba, located on the Gulf of Jordan. Because this city was a major Roman trading site, the main issues Jones and, Elena Dodge '98 are trying to resolve is if the glass came from the Palestinian coast where most it was made in the Roman period or whether more of it may have been coming in from Egypt.

Directly related to this issue are the two central questions behind Jones' work and that of her students. Each important fragment of glass can provide mounds of information on when the major glass-making periods were and what regions were producing such artifacts.

Specifically, Jones is looking for economic data, such as who was making what, the locations of creation, where trading was taking place and possibly what the glass vessels were being traded for. She is also very interested in questions about the ancient environment. She has been spending time recently thinking a lot about "the role of glass-making and other industries that use or rely on lots of fuel-metallurgy, ceramics and what their impact was on the deforestation of the Mediterranean."

Though environmental awareness and concern has sky-rocketed in the last few decades, the effects of the human race can be seen from the very beginning of time when mankind started to tamper with the earth and mother nature.

Around the first century, during the Roman period, the discovery of glass-blowing probably originated in ancient Palestine. With this discovery, the glass industry took off, and glass vessels were being manufactured all over the place. Glass went from something only the wealthy could use to something that everybody had.

The growing glass industry subsequently caused an increased demand for fuels. This cascade of events was the first impact on the environment in a global way, since the Romans controlled the lands all the way from India to Northern Europe.

The interest in ancient glass and its secrets is a fairly new area of study that has developed only in the last 20 years. In Jones' laboratory, she receives approximately 10,000 fragments of glass to go through about every other year from the excavation sites.

Presently, her lab contains 30,000 to 40,000 fragments of ancient glass, making it one of the two largest collections of excavated glass in the United States. Although the fragments are not of museum quality, they have been retrieved from the ground and dated within a fairly narrow time frame.

Dating the samples is accomplished by looking at previous excavation reports and comparing the samples to the materials addressed in the reports. Carbon and scientific dating is rarely used. Instead, this comparative approach is used, with the dates of pottery, ceramics and coins from prior work serving as indicators of a certain period.

Consequently, several museums have come to Jones' lab asking for assistance by dating their material. Thus, a mutual keep relationship has developed between Jones and many museums. She aids them in dating their complete vessels that have been retrieved from dealers or tomb-robbers, and the museums help Jones by extracting complete profiles from her dated fragments.

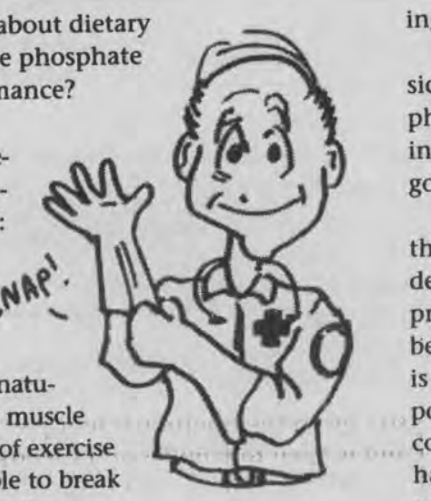
Jonah Half—The Bucknellian
Janet Jones, professor of classics, works with the ancient glass artifacts discovered on her summer trips to the Middle East.

A number of students both work and volunteer in Jones' lab, categorizing and counting the fragments. Keith DiMarco '99 spends much of his time working on mechanical drawings on the pieces of glass that result in possible pictures of the complete vessel.

Dodge spent last summer at the Aqaba site and is doing her honors thesis on that work. An intriguing subject of study, ancient glass is providing information on past civilization and environments.

Ask the Doctor: Aiding athletics with dietary additives

Question: What are your feelings about dietary supplements and additives like creatine phosphate that allegedly improve athletic performance?



Answer: The question regarding creatine phosphate is a complex one and requires addressing several different issues: the marketing of the product, the research of the product and the morality of the product.

A word about what creatine phosphate is: Creatine phosphate is a naturally derived substance that is stored in muscle to be used as fuel at the very beginning of exercise before there is adequate oxygen available to break down glucose or fat for energy. It is basically an energy source. It is found in meats that we eat, is manufactured by our liver and is stored in the muscle tissue itself. Research has shown that when using creatine supplementation there can be a 5-7 percent increase in maximum muscle strength in human cyclists. Other studies done with a few weight lifters showed greater increases of both strength and muscle mass.

Because it is a natural substance, there is no test available to screen people for Creatine's use. In other words, because there is no test, neither the Olympic committee nor the NCAA can test for it. As a result, they do not regulate its use for athletes at the present time.

Regarding marketing: Because it is considered a food supplement, it is not regulated by the FDA and does not have to meet the rigorous standards that a drug would have to meet. The manufacturing process of the product is not as closely regulated either, that is, there can be more variation in a food supplement than with a pharmaceutical product. Companies that manufacture a food supplement do not have to study the long-term side effects of their products as drug companies do.

The research done on these products is not the exacting double blind studies using large numbers of patients. Instead, when one actually reads the studies, six or twelve subjects were used, not the thousands typically used with pharmaceutical studies. The products then are marketed through muscle-building magazines and sports-oriented entertainment. There were two advertisements for creatine supplements during the Bucknell-Navy Patriot League championship game on ESPN.

If one only reads the advertisements for those products, there are no side effects; however, if one talks with trainers and sports-medicine physicians, they have seen plenty of water-retention problems, cramping and uncontrollable high blood pressure. These conditions appear to go away when the creatine is discontinued.

From a strict medical perspective, can one give a definite answer to the question is creatine safe? No. One cannot give an assurance to the degree that one could with a pharmaceutical. With tested drugs, the prescribing physician always knows the risk-benefit potential. Is the benefit of the drug greater than its potential risk? With creatine, there is evidence of its potential for enhancing performance, but have the potential risks been studied? It is not clear at this time and, as a result, I could not in good conscience, recommend its use. I will be more than happy to study any research that is given to me, including what happens 5-10 years down the road after using this product.

Finally, let's look at the morality or the ethics of using this product. To win is the ultimate goal in sports today; "Whatever it takes," is heard time and again. Competition is the foundation of our capitalistic society and has resulted in a disproportionate emphasis on performance and winning in sports today, with lesser emphasis placed on developing skills and having fun. As a result, many athletes will do things to gain advantage over their opponents including taking performance-enhancing products or ergogenic aids.

Before the 1988 Olympics, when select athletes were asked if they would take a performance-enhancing drug that was known to cause cancer, well over 80% stated they would be willing to take that risk! When I have asked athletic coaches and trainers about the use of ergogenic aids in general and creatine phosphate in particular, their response is that "Everyone else is using it; if we don't, then we are at a disadvantage."

This brings up an interesting ethical question. Does the athlete justify the use of an ergogenic aid because everyone uses it? Are rules to be followed only if others comply? Is there no inherent sense of responsibility to the spirit of the sport and sportsmanship in its purest sense that should implore those participating to do so as they are, naturally conditioned, well practiced, and chemically free? I, for one, would hope that University athletes would exemplify these tenets regardless of what the others may do for the sake of not only their personal integrity but also the integrity of the sports in which they participate.

To conclude, I would like to relate a personal story. As a first-year student in college, I made the freshman lacrosse team. In the early season which involved heavy conditioning, my father, a physician, offered me a legal prescription for a medication that was widely used in Europe and by a number of professional sports teams in the United States. This medication was thought to enhance the recovery time after exercise. In other words, one would be able to put forth maximum effort, then almost immediately be able to do the same thing again with little or no recovery time.

It sounded good to me, it was approved by the FDA and the members of the local professional baseball team were using it. I religiously took it three times a day for three or four weeks and could not honestly say it helped, but I had made the starting team, so it may have. One spring Saturday afternoon while working on a pledge project for my fraternity, I suddenly became blind. For approximately 90 minutes, I saw not; then as quickly as my vision left, it returned.

After an extensive neurologic workup at Ohio State University, no reason for the symptoms could be determined. In the course of the questioning that the small army of doctors addressed to me, the use of that particular drug came to light and, even though no problems like that had ever been reported, it was suggested that the medication be discontinued, which it was.

I never knew for sure what the cause of the sudden blindness was, but it has never recurred. The drug in question was soon after removed from the market in the United States. The take-home message here is that it is impossible to predict what the long-term aftermath will be with any drug or food additive. I believe that the combination of love of the sport, expert coaching and hard devoted practice are the ingredients of a truly winning team; leave the creatine on the shelf.

W. Stechschulte, Jr. M.D., is the Medical Director of the Ziegler Health Center

Caught in the Web: Hale Bopp sites

BY CURRAN FILER
Bucknellian Staff Columnist

We seem to have a lot of Spring semester comets at Bucknell. This week and last week are the best weeks to view the Hale-Bopp comet, which is the comet we have this year. To help people find the comet and learn a little more about comets in general I've found some sites that might prove interesting. Some are technical and some are general, but I hope they all have useful and interesting information.

Comet Hale-Bopp Finder Charts & Simulations
`http://www.skypub.com/comets/hbsims.html`

This page was created by the editors of Sky&Telescope magazine and planetary scientist David Lien, who just happens to be a professor at Bucknell and my physics teacher from last year. The charts they have created here will help you locate the comet, although they have added some things to help you find parts of the sky that aren't really there, like constellation lines. Professor Lien has also created some simulations of the comet's movement based on some amateur photos of the comet. It's a fairly detailed and informative site made by one of our own.

Izzy's Guide to Comet Hale-Bopp & Other Cometary Matters
`http://darkstar.sw.sc.k12.ar.us/hb/hb.html`

This is a layman's guide to Hale-Bopp and comets in general. It has information about the composition and history of comets for people who are just learning. The author has also included Hale-Bopp sighting reports and Hale-Bopp statistics. The section on the discovery of Hale-Bopp is pretty interesting also.

Comet Hale-Bopp at www.halebopp.com
`http://www.halebopp.com`

This site has a number of Hale-Bopp pages. The field guide has information on finding the comet, what comets are and how Hale-Bopp was discovered. On the other hand, HB magazine has pictures of the comet, Hale-Bopp discussion groups and a transcript of a press conference on the infamous Heaven's Gate mass suicide, which was related to the comet. A word of warning: I couldn't figure out which dot was the comet in the "Comet in the Clouds" picture.

Comet Hale-Bopp Home Page
`http://www.jpl.nasa.gov/comet`

This is a very popular site that claims it's the home page of the "Great Comet of 1997." It has a little background information, some mirrors for faster performance and news items on the comet. The real gems at this site are the pictures and animations. There are over 2,700 images of the comet at this site, as well as a collection of MPEG, AVI, and GIF animations of the comet. The animations are grainy but the images are good.

Science & Technology Calendar

Fri., Apr. 5	**Biology Lecture at 4 p.m. in the Rooke Chemistry Auditorium** Dr. Kathleen Susman of the department of Biology at Vassar College will present a seminar entitled "Studying Stroke in a Slice of Brain."
Tues., Apr. 11	**Physics Coffee Talk at Noon in Olin 264** Jeff Bowen will speak on "How to Find a Magnetic Monopole."

Online journals don't offer same experience

As technology advances, computers are reaching into every aspect of our lives. Our dependency on computers is not only fascinating, it's also scary. We're leaving the tangible world behind for computer chips.

The library has recently admitted that it might join this growing electronic trend. Because journal prices can be incredibly high, the library has proposed to eliminate 115 journals from its stacks, getting 23 via computer instead. Irate, the faculty voted in Monday's faculty meeting to delay this action for a year until its opinions are factored into the decision.

We applaud the faculty for its efforts. If the library is allowed to proceed, what happens to the other 92 that cannot be accessed online? Those journals that are available through computer networks fail to have the same quality images as their printed versions. Students either won't get the full effect of the journal or won't get any journal at all, at least not through the Bertrand library.

While students may appreciate the eliminated costs of photocopying because they would be able to download articles instead, the consequences of this benefit need to be considered. While photocopying does require paper, the size of a journal can be reduced so that two pages fit on one photocopied page. Downloading does not offer the same clear advantages. Assuming that students continue to favor a copy on which to write, more paper will probably be used if the journals must be downloaded.

If these journals can only be accessed online, even more people will flock to the computers in the library. It is already difficult to get a computer in the library. The ability to access the electronic journals from elsewhere on campus won't help, as the computers are already slow because of an overload of users. What would take only a few minutes to access in the library stacks may now take upwards to 10 to 15 minutes, if more.

With inflation and a tight economy these days, everyone is facing budget problems. However, the library should consider alternative ways to fund the journals before suggesting deselection. Campus fundraisers have frequently been a success. Just look at the amount of money the Capital Campaign has raised thus far. Even the local girl scout troop managed to deplete their huge supply of cookies by begging whoever walked through the Langone Center to buy a box. Surely, alumni and library enthusiasts would be more than willing to support the library, the center of an academic institution, in its time of need.

Besides, there's nothing like the real thing. How can you compare the smell and feel of the printed word to text appearing on an impersonal computer screen? Walking through the shelves of books and journals in the library is often an awe-inspiring journey into a world of academic thought, preparing and exciting the student for the research that lies ahead. A computer does not offer the same opportunities of personal contact with the research. And the fact that all of the journals proposed for deselection can't even be accessed electronically limits a student's research even more.

The library does have legitimate concerns. Despite the recent trends, however, substituting an electronic version of a journal for the real thing is not legitimate. Call us nostalgic, but it's just not the same.

OPINIONS

"The Simpsons" more than quality sitcom

BY ALLISON PRICE

Bucknellian Staff Columnist

I have to come to believe two types of people exist in this world—those who get *"The Simpsons"* and those do not.

Sadly enough, it need not be that way. Those who miss the humor on a weekly basis have deemed the series the intellectual property of the prepubescent snotnose that cut in front of you to ride the Whirl-A-Puke this summer. Alas, they have neglected the Lisa Factor.

Truth be known, I love *"The Simpsons,"* and always have. It is television's most misunderstood half-hour. What makes the show so wonderful is easily missed if you do not really watch it—kind of like loving Bob Dylan for his singing instead of his poetry.

There is patriarch Homer and the phone with the lousy father hotline while Harry Chapin's "Cat's Cradle" plays in while he is on hold. There are the teachers who hole up in the lounge chain smoking the day all the teacher edition text books are stolen.

There is the second rate field trip with students watching a Civil War recreation from a mile away due to a lack of funds. ("What, education for free?! Get them!") There's the battle with the neighboring town over the city of Springfield's sacred lemon tree. In the middle of this and so much more, there is Lisa Simpson.

There is the episode wherein Lisa visits a petting zoo, looks at her lamb chop that night at dinner and promptly decides to not eat meat. Even in the face of such opposition as her elementary school's Independent Thought Alarm ("get rid of the colored chalk!") and a meat industry propaganda film, she clings to her views and even gets to meet Paul and Linda McCarthy at the end. Only in Springfield, I thought, remembering when I, like, Lisa, wouldn't dissect that worm. Within the confines of the Simpsons' cultural niche, Lisa is a force of her own.

It is Lisa who, in a future sequence, nixes marriage to her British beau, voiced by the sublime Mandy Patinkin, because he won't wear Homer's precious heirloom piggy cuff links. Winona Ryder voices her new, equally precocious and perilously smart friend who rattles the green-eyed monster in Lisa.

It is Lisa who barrels into the kitchen during the teacher's strike screaming, "GRADE ME! EVALUATE ME!" Lisa's mother tells a wary daughter as she gets out of the car for school, "Just smile," and then as she hears her own mother's mouth forming the same words a decade ago, pulls Lisa back in the car, and speeds away.

There is Lisa winning the Miss Springfield Pageant (of course she was entered by dim and well meaning Homer) by default after a blistering rendition of "Proud Mary." And of course she gets out for refusing to toot the tobacco industry's horn (what do you expect when the poor girl gets booted out of band during the opening music for her wicked sax?)

Lisa at her absolute best (and my personal favorite) came to life when she got the Talking Malibu Stacy Doll she wanted so badly, only to hear the doll talking about shopping and how girls aren't good at math (she had put Stacy behind a podium with a presidential seal.) Of course, Lisa makes her own doll, "Lisa Lionheart," with the help of Kathleen Turner and with the looks of a young Eleanor Roosevelt. The doll doesn't sell well, even as Lisa takes solace in one little girl she reached. And they say cartoons aren't realistic?

I love this stuff—so sarcastic, so normal, so true. I really cannot say how much young girls learn from the Lisa Factor at their age. However, it simply has to be a more real and integrated lesson than what I got from Smurfette, or the cheerleader in the "Get-Along-Gang" or the Princess on Voltron who had a pink tiger and always got caught by the bad guys.

Looking at popular cartoons today, I can't say the choices are any better, for in applying the Lisa Factor a young girl is more apt to someday toot a wicked sax than be a pink Morphin Power Ranger. This is not to say that all female cartoon characters must, or even can, aspire to Lisa Simpson's level. Yet, she sets a standard.

When you get older, you are supposed to uncover all the hidden lessons of your life thus far, figure out all the cereal box decoders once and for all and for real. You end up finding these meanings in the oddest places, even as you are distracted and told where exactly to look. There is nothing more distracting than being treated as a commodity, to be catered to, lured and inevitably treated as all same in what you should like.

Truth be known, there is enough space in life to accommodate all sorts of TV shows, from *"The Simpsons"* to *"Friends"* to *"Voltron."* All the conflicting images, all fallible in seeking the ideal or the most enjoyed, fall in place when you develop a perspective.

I propose a certain "Renaissance feminism," being and inevitably liking a little bit of everything. This is the Lisa Factor, beyond the idea of a television set enabling feminism. As Lisa Simpson sits at the dinner table and muses, "Why do I have the feeling that someday I will be telling all this to my therapist?," we can't help but agree, and ask for more.

Death penalty issue doesn't need to add to problems of justice system: execute the guilty

BY SAMUEL FEENEY

In the past few years, the nation has been caught up by the horror and astonishment of well-publicized murder trials. The Menendez brothers, Susan Smith, and (of course) O.J. have been put on trial by the media and the courts for murder. Even now, the jury is being chosen in the trial of Timothy McVeigh. As everyone knows, he is being tried for the Oklahoma City bombing, which killed 168 people. The prosecutors will be pursuing the death penalty. However, one must question whether, at its present state, the death penalty will be an immediate answer to their problems.

The death penalty has been a hotly contested issue for over 50 years. However, the question does not concern constitutionality. For 1976, the U.S. Supreme Court overturned its 1972 ruling and stated that "the infliction of death as a punishment for murder is not without justification and... is not constitutionally severe." Instead, we must question the ineffectiveness with which it is currently being used. It has been used as early as Biblical times and its function was punishment. Not torture, not deterrent, but punishment. Those who oppose capital punishment feel that an attempt should be made to rehabilitate the convicted murderers.

However, most of these killers have been convicted of lesser crimes many times and have shown no signs of changing their ways. Our jails are not doing a very good job of rehabilitating criminals as it is. Should we risk the possibility of releasing a killer into our neighborhoods? We have a prison right here in Lewisburg. What if a "rehabilitated" convicted killer were set free with no real destination? Bucknell students, as well as the residents of Lewisburg, would be easy pickings for someone without direction or a desire to start anew. In fact, in the states without capital punishment, the average convicted killer spends just 11 years in prison. Fortunately, Pennsylvania is a proponent of the death penalty, especially with Tom Ridge as governor.

At its present state, the average Death Row inmate waits over 10 years before his execution. According to reports, there are over 2,500 inmates on Death Row awaiting execution. These people eat, sleep and breathe every day courtesy of Mr. and Mrs. Johnny Q. Taxpayer. There is an obvious solution to the overcrowding of jails when there are over 2,000 "dead" men and women in cells. One thing that makes the death penalty a mockery is our current appeals process. Inmates have free access to legal help and can file numerous appeals. Each appeal must be dealt with before the inmate may be legally executed. At this time, Congress is attempting to limit the number and types of appeals that may be filed by a Death Row inmate. This should be a catalyst to a more effective and efficient punishment system.

You're saying, "OK, smart guy, what's your solution to all of our problems?" My answer: "Five years." If a person is convicted of first degree murder and sentenced to death, he or she has five years to "get busy living or get busy dying." That is ample time to dig up evidence, find a new lawyer, and file appeals. Then, the inevitable must occur. Only after a murderer has been executed has he or she paid his or her debt to society. There is always the risk of convicting and killing the wrong person. However, the wrong person, if not executed, will spend the rest of his or her life anyway.

There are no absolutes in our current justice system. Until that utopia can be reached, there will always be problems. The death penalty doesn't have to be one of them.

OPINIONS

Jackie Robinson's legacy has not yet been realized

BY BRETT TOMLINSON

Bucknellian Staff Columnist

In 1947, Jackie Robinson stepped onto the baseball diamond at Ebbetts Field prepared to endure a career of insults and bigotry in the name of racial equality.

Fifty years later, Robinson is admired as a hero for all Americans, and African Americans, as well as Latin and Asian Americans, continue to be extremely successful in professional baseball and other sports. By breaking the color barrier, Robinson changed the entire shape of American sports, but how much have sports really done for racial equality in the United States?

> ***On the fiftieth anniversary of Robinson's monumental feat, it's important for us to realize that the road to racial equality is still being paved in America, and the current stereotypes about black athletes are a harmful detour from the straightest path.***

Obviously, some African Americans are making millions of dollars in professional sports, but the disproportionately low numbers of African Americans in front office and coaching positions show that professional sports still carry some racist stereotypes.

The stereotypes about African American athletes are abundant, even at Bucknell. I personally have heard some disturbing and grossly misinformed comments from people who, quite frankly, should know better.

I'm not talking about the clichés about black players versus white players. You know, a black player is always "tremendously gifted and naturally talented," while white players are always "gritty, hard workers who make the most of what they've got." Those stereotypes are certainly not acceptable (and in most cases, they're not true) but relatively speaking, they are harmless.

The real problems come from stereotypes about the intelligence of black athletes. It may be true that certain marquee players at big time schools do not belong in college, but in my experience as a sportswriter, that is not the case at Bucknell. Our athletes, both black and white, are generally very articulate, and as the statistics in the media guides show, they do quite well in the classroom.

I would be willing to bet that white athletes would be among the first people to shoot down the misconceptions about black athletes. It is much easier to stereotype people you really do not know.

Perhaps part of the problem is that people just do not know their history. Perhaps if people know what black athletes have endured, they would respect today's black athletes more. Perhaps if some of today's immature, overpaid young athletes realized what black athletes have endured, they would exhibit the dignity and courage of Jackie Robinson instead of talking trash and trying to show up their opponents.

Robinson was spiked, spit upon, insulted and even pelted with bottles from the stands when he took the field in 1947, but he still managed to play well enough to win Rookie of the Year honors. The pain did not end with Robinson, though.

Scores of legendary stars like Larry Doby, Roy Campanella, Hank Aaron, Elston Howard and Frank Robinson encountered similar barriers as they made their way to the majors. Aaron almost quit baseball when he was integrating minor league ball in the deep south, but he kept his composure and ended up shattering Babe Ruth's seemingly untouchable record of 714 career home runs.

On the fiftieth anniversary of Robinson's monumental feat, it's important for us to realize that the road to racial equality is still being paved in America, and the current stereotypes about black athletes are a harmful detour from the straightest path.

Stereotyping Bucknell's black athletes may not seem like a big deal, but consider what it means to the athletes involved. We owe it to Jackie Robinson and every other black athlete who has endured the pangs of racism to do anything we can for racial equality.

"Bucknell Brat" syndrome easily corrected

Bucknellians must realize that their conduct in town reflects badly on the University

BY NORA DANIELS

Bucknellian Staff Columnist

Even though Bucknell is not an Ivy League school, it does have a certain distinctive reputation. In academic circles it is acknowledged to be a quality university, and when high school juniors and seniors look through catalogues, B.U. is described as a great place to receive a good education. It's ideally sized, not too small or too big, and its degree programs are greatly varied. And the campus is beautiful... in many ways, Bucknell seems to be a wonderful place to call home for the four years we all spend in preparing for employment, more education and everything else the "real world" will bring.

So it makes sense, to me at least, that many students here are seen as self-confident and self-assured. Sometimes, though, this confidence and satisfaction comes across as a negative quality instead of a positive one. Hence, the "Bucknell Brat Syndrome" develops.

> ***As a full-time Lewisburg resident and B.U. student, I have had many opportunities to see both sides of this syndrome. I have been the person behind the counter at the store where Bucknellians come across as snobs, brats and just plain old conceited.***

As a full-time Lewisburg resident and B.U. student, I have had many opportunities to see both sides of this syndrome. I have been the person behind the counter at the store where Bucknellians come across as snobs, brats and just plain old conceited. I have actually heard customers say, "Well, I go to Bucknell..." as if that makes everything negative become positive.

At the same time, I have also been the customer who explains that my bill can be addressed to my campus box, and that I need to order my food right away because I have to be on time for my next class.

Most of the time, I must admit, Bucknell students (myself included) are not seen as much different than the average consumer from Lewisburg, Mifflinburg, Milton or Warrior Run. The "average" people who call this area home are not any more perfect or flawed than Bucknellians are. But when someone who is blatantly a B.U. student is less than perfect, the businesses and the locals take note of the action and blame the "Bucknell Brat Syndrome." It doesn't matter that the person is acting individually; Bucknell University suffers from the bum rap of being indirectly to blame for the imperfection. And since there are so many of us out there spending money in all sorts of businesses, the syndrome grows.

Suddenly then, the students are not seen as regular, everyday customers, but they become people to watch out for because they may very well be brats.

I'm not condoning such a view from any person, business owner or store employee, but at the same time I understand it. If you were behind the counter, and over a few hours one weekend evening, 10 customers gave you a hard time and at least five were sporting a Bucknell sweatshirt/t-shirt/cap, you'd probably begin to wonder: Why do these Bucknellians have such attitudes? It's not fair to the majority of students who are not bratty, complaining or generally irritating, but it's human nature to find their common connection, in this case B.U., and place the blame there.

So this syndrome is alive and thriving even now. It won't die by itself, of that I am sure. I think each of us, though, can try to combat this image. Next time you are at a store or business, and you want to complain, be bratty or make a scene, think about if you want to be labeled a "Bucknell Brat." Probably, you don't want to be seen as such a person, but even if that label doesn't faze you, do you want Bucknell to be seen as a training ground for brats of all shapes and sizes? We're here to get a good education and have fun, not to damage this place that will prepare us for the "real world."

Opposing opinions must be respected in name of diversity

BY BRIAN WALSH

Bucknellian Staff Columnist

While perhaps more evident in America's judicial system and entertainment industry rather than in its towns and cities, the counterculture attitude of the 1960s is not only alive and well, but is growing from the educational level on up.

Today on college campuses throughout this country, the politically-correct movement is spreading like a wildfire that is fanned daily by the partisan lectures of our "experts" in academia. However, just as the various radicals of years ago have evolved from young hippies into members of our academic and cultural elite, the methodology with which they propound their views has changed as well. It is becoming increasingly apparent that the new leaders of this movement have learned through the experience of rejection, as the marches and sit-ins of yesterday have since been replaced with the more soothing sounds of acceptance and diversity.

With the honed skills of a savvy political operator, various groups whose agendas are not commensurate with the values and beliefs of most Americans have come to realize that subliminal propagandizing is a much more effective weapon than confrontation. While these groups pride themselves on their purported devotion to diversity, they are in fact guilty of the highest degree of hypocrisy, as those individuals who dare to disagree with them are quickly ostracized as narrow and bigoted. It is this two-pronged approach of propaganda and fear that has enabled the politically-correct movement to trample over the very freedoms and rights that they claim to support. An end result has been that on the university level, the word education has been replaced with indoctrination, and on the political level, the word conservative has been replaced with intolerant.

Is Bucknell guilty of this? Or rather, are our educational priorities slowly being distorted and our traditional values being rejected? The answer is that although the strength of this movement at Bucknell is far greater at larger universities such as Harvard and Berkeley, it is increasing each year and the voices of opposition are slowly being extinguished, be it through apathy, propaganda or fear.

On the academic level, the credentials of Bucknell's faculty are outstanding. Furthermore, no one can criticize their constant devotion and loyalty to both the student body and the university as a whole. What I have learned to question in my four years at Bucknell, however, is the political agenda that many of them seem to share.

As a liberal arts major it came as no surprise to read in *The Bucknellian* last year that virtually every member of the political science, economics and English department is a registered Democrat. In my years here there have been numerous instances in which ideologically-driven diatribes have been passed off as factual, nonpartisan lectures. Is this the type of diversity that Bucknell is striving for? As students, what is more important academically in the long run: the color, gender or sexual-preference of the student sitting next to us or the individual who is charged with our actual education? Based on his continued calls for diversity in the former sense and his complete ignorance of it in the latter, one can only surmise where President Adams stands on this issue. The attitude of indifference adopted by University administrations towards intellectual diversity has not only deprived students of hearing both sides of an area of study, but it has also given credibility to the tactics employed by fringe groups who demand that we accept their agendas.

The recent passage of Jeans Day provides a fitting example to highlight this point. Sponsored by gay and lesbian organizations throughout the country, students were asked to wear jeans to show their support for the homosexual community. Last Friday, I was approached by a denim-clad woman in the mailroom who apparently noticed my khakis and asked me if I was aware that it was Jeans Day. When I assured her that I was, she called me a homophobe and stalked off.

Am I the only one who sees the complete hypocrisy in her actions? This is an individual who supports diversity but apparently only if it agrees with her belief system. Unfortunately, the reliance on personal attacks in response to perceived injustices is becoming an increasingly valid form of expression in the realms of education and politics. Looking at the aforementioned example in this new context, since I did not wear jeans I must automatically hate all homosexuals. Intelligent debate has been reduced to playground name-calling due to the single reason that the homosexual agenda is one that is not supported by the vast majority of Americans. However, is that not the essence of diversity? Groups of different Americans living together under the same flag, but still recognizing each others' right to personal thought and opinion.

The problem is not, as members of the politically-correct movement state, that the playing field is uneven, but rather, it is that they are not willing to play by the same rules. Instead of open forums of debate, they have infiltrated those positions in the entertainment and academic community that provide them with a perceived degree of credibility and mythical moral pulpit from which to preach from. The hypocrisy of their actions needs to be challenged. If diversity is what they truly hope to achieve, then those who choose to disagree with them deserve to be heard without the name-calling tactics that those who oppose them have stooped to.

The pen can't be mightier than the sword if you don't use it. Start writing for Ops and feel the power. Call x1520.

ARTS & ENTERTAINMENT

Cranford to perform a piano recital on a lighter note

BY RACHEL DOEBBER
Bucknellian Staff Writer

"Music is a lifestyle," said Jill Cranford '97. "You either do it or you don't."

A music education major, Cranford has made music her life.

"Music will be a part of my life no matter what I may do," Cranford said.

Even though she gets frustrated with practicing every day and jealous of those who get to hang out, Cranford feels that "the performer has a higher incentive in order to be good. [They] have to love music, people, and the environment they're performing in."

Although she practices three hours per day, Cranford still feels nervous and scared about her upcoming piano recital that is required of all bachelor of music majors. She has prepared for this recital since the middle of last semester, because she knew she would not have time to devote herself fully to her music this semester as she student teaches at Lewisburg Middle School.

Cranford will be performing many selections for her half-recital including five Chopin Preludes, three Debussey Preludes, and a premier piece entitled "Distances" which was written for Cranford by Karissa Krenz '95, another music major. Nat Dose '97, an engineer, will be performing on piano for the second half of the recital.

Cranford chose these particular pieces because she understands and relates to them. "When I understand a composition, I can play it easier."

In addition to studying the piano for the past 11 years, she also plays French horn and several other brass instruments for the Bucknell Symphonic band and sings in the University Concert Chorale.

"I picked the piano to study because I liked the different sounds and ideas that are produced. It isn't always pretty. I can express my mood through the loud and soft sounds like the bass and treble," Cranford explained.

Growing up in the Salvation Army where her parents were both officers, Cranford was constantly surrounded by music in the house. She continued her interest in music into middle and high schools by participating in the Greater New York Youth Band, various singing groups and her church band.

As a senior, Cranford feels that the music program is small enough to offer individual attention and support."The first year students feel accepted and the seniors are not out of touch. The music department really wants you to succeed," she said.

When asked who has influenced her in her music, Cranford said her mentor, Lois Svard, who is also a professor of music, has been very encouraging.

"I respect Svard. She pushed me to be what I can be, to my potential, and not anything less or mediocre."

Another major influence on Cranford and her music was her semester abroad in Ghana last spring. While living with several families in Ghana, Cranford learned about African art and culture, and how music is a part of the people's everyday lives. While abroad, Cranford learned about the history of Ghana and the musical instruments that are a part of Ghana's culture.

"It has changed my perspective on music. Music is a necessity of life in Ghana,it represents life in the past, the future, the dancers who imitate the music, the musicians who play it; everything."

Cranford's piano recital is at 8 p.m. this Tuesday in Bucknell Hall.

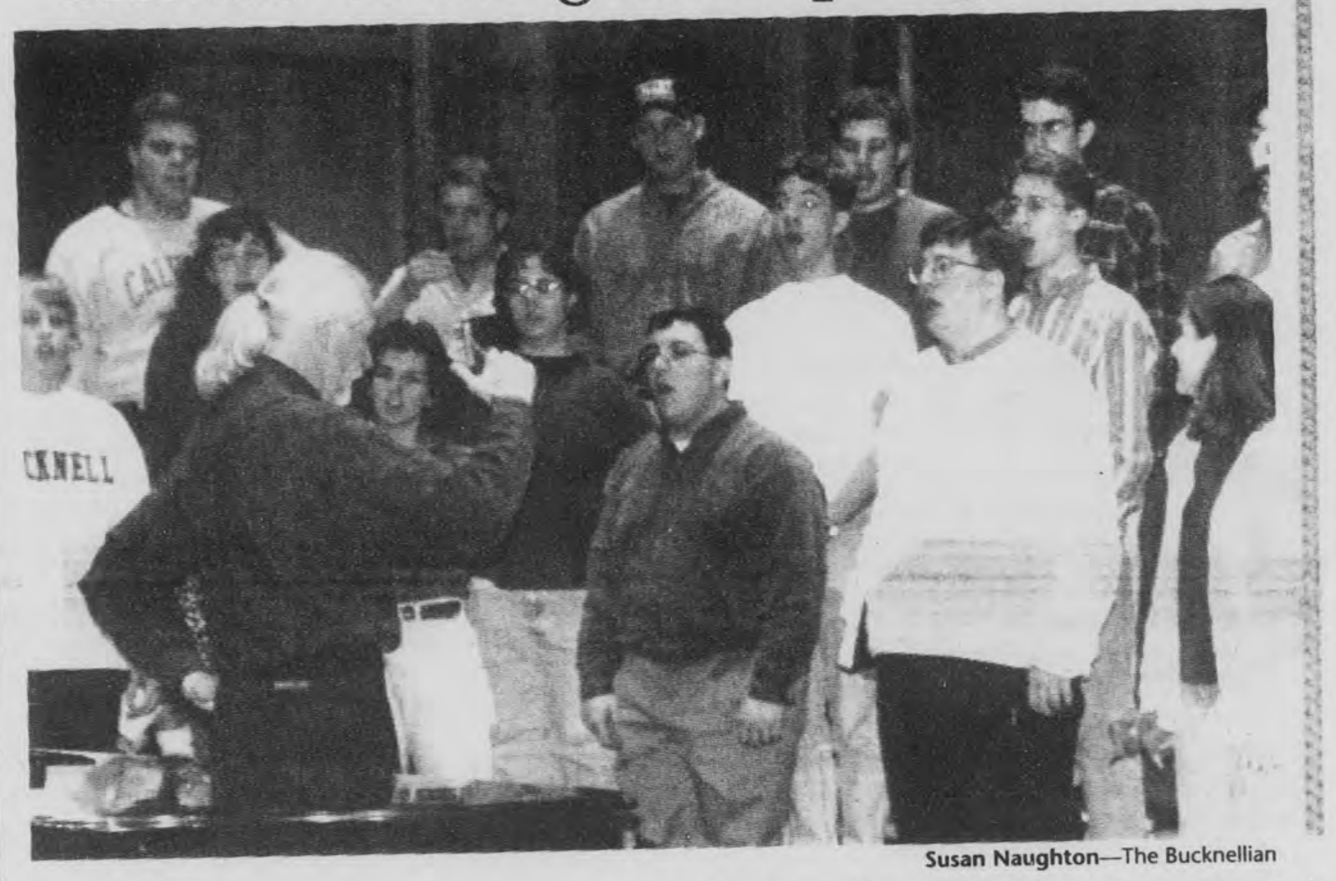
Jonah Half—The Bucknellian

Jill Cranford '97, a music education major, was influenced by her semester abroad in Ghana, as well as by her mentor, Lois Svard. She practices for three hours a day in order to prepare for her upcoming recital, in which she will be performing selections that she can relate to.

Pianist to perform classic pieces

Pianist Awadagin Pratt will perform a program that includes works by Franck, Beethoven, Bach, Schubert, Brahms, Chopin, Rachmaninoff and Scriabin. Tickets for the concert are $15. For ticket information, contact the Weis Center Box Office 11:30 a.m. to 5:30 p.m. Tuesday through Friday, or call 717-524-1000. Pratt will be performing at the University on Friday, April 11, at 8 p.m. in the Weis Center.

Chorale to bring in its spring show



Susan Naughton—The Bucknellian

Dr. William Payn conducts members of the University Concert Chorale as they rehearse for their spring performance. The show will be held this Sunday at 7:30 p.m. in the Weis Center.

Seven sins send Company onto the stage in "Hell"

BY ROBIN REITZES
Bucknellian Staff Writer

Calling an evening and afternoon of theatre performances all written, directed and performed by students "Company is Going to Hell" may seem a bit odd. On the contrary, it makes perfect sense.

This title "started as a joke," said Rich Dionne 'GR, writer and director of *Gospel According to Miriam of Magdala*. Dionne's play is one of the four that will be performed as a part of the program. Dionne further added that although naming the event "was a joke at first, everyone involved realized that it was a pertinent naming because of the issues being dealt with in all the plays." Dionne's play deals with almost all of the seven deadly sins.

Dionne explained how his previous life experiences influenced his play. "I spent a lot of time in the Pentecostal Church, which was a traumatic time in my life. There are many issues that I am still dealing with because of my religious background."

Saying he did not want to give too much of the plot away, he added, "It is very different from the traditional Gospel stories."

Dionne wants the audience to understand that there were many Gospel stories that were not included in the Bible. "What we read in the Bible is not truth with a capital 'T' My play is just another way to see it," he said.

Stressing that his play is not his version of the "Truth," Dionne insists that he is not trying to change anyone's beliefs or convert them.

Who is Kampf is another play on the agenda for Company's upcoming event which was written by and stars Elena Dodge'98. The play is, "autobiographical to some extent," Dodge said. "It is something humorous; it is about things in life you end up learning from."

Dodge is also trying to send the audience away with some valuable messages. "My play makes a statement about womanhood. Bad things happen, but you pick yourself up. You can overcome anything. You don't have to have a reason to explain why you are the way you are."

"*Seduction* has a nice mix of comedy and romance, and besides, Neil Simon is one of my favorite playwrights," Kelly George'00 said when asked why she chose to direct it as a part of "Company is Going to Hell's" program.

"*Seduction* is a more traditional play and is less important themewise than the other plays performing for Company," George explained. It is about a seducer who seduces woman all day long.

This is only George's second time directing and she is very grateful to Company for offering her the chance to direct as a first year student.

"It is important, I feel, for a director to have acted in the past in order to understand how to communicate what you want in a positive and effective manner," George said on the trials and tribulations of directing.

Erik Marthinson '97 chose to direct *Footfalls* because he is a Samuel Beckett fan. Beckett is a playwright from the genre "Theatre of the Absurd" and is known for his avant-garde style of writing.

The play is about human frailty and strength. The one line in Footfalls which attracted Marthinson to the piece was, "Will you never have done revolving at all?" Meaning, "will you never be able to get over things," commented Marthinson.

Marthinson feels that each member of the audience will walk away with a different message. He ideally would like the, "audience to walk away with a mood," and he wants people, "to walk away and think to themselves 'that was cool'."

"Company is Going to Hell", presented by Company, a branch of Cap & Dagger, will be in Tustin Studio Theater performed at 5 p.m. tomorrow and at 2 p.m. this Sunday. Admission is free but seating is limited. It is suggested that you arrive well in advance in order to get a good seat.

Beetna Kim—The Bucknellian

Kristy Westphal '99, Jennifer Stoll '99 and Erik Marthinsen '97, who is the director, rehearse lines and go over scenes for the upcoming play, "Footfalls." This production, from Samuel Beckett's original play, is about human frailty and strength, and Marthinsen hopes that it will instill a new mood in the audience. Here, within the play, Marthinsen is creating his own "Theatre of the Absurd."

Cara Mickelsen—The Bucknellian

David Carpenter '00 gets hung up during Rich Dionne's play. This production, according to the director, is not his version of the "Truth" concerning the Gospel, but simply another way to see it. Many influences aided in the direction of the production, particularly his religious upbringing. The play deals with almost all of the seven deadly sins, thus sending the players straight into the depths of hell.

Cara Mickelsen— The Bucknellian

Sandie Pisieczko '00, rehearses her part in Rich Dionne's play. This production is no ordinary take on the Gospel. The name "Company is Going to Hell" began as a joke but is pertinent for the issues concerning the sins in this play are within this theme.

Orchestra conducted by Para to give a performance

Members of the Bucknell University Orchestra rehearse diligently for their concert to be held this Saturday at 8 p.m. in the Weis Center. Conducted by Christopher Para, the orchestra will perform "Overture to the Magic Flute" by Mozart, Bizet's "Carmen Suite No. 1" and "Symphony No. 9 in E minor" by Dvorak. Admission is free.

Reporter to give comedy lecture

Dan Zevin, a Rolling Stone Magazine reporter and author of the post- college humor book Entry Level Life, will be visiting on Sunday, April 13 at 7 p.m. to give a comedy lecture about life after college. Anyone interested in writing, publishing or journalism should lan to attend this lecture, which will be held in the Forum.

Cooking with Katie

Apple Cider Marinated Chicken

The season is a little off, but the apples are still bobbing and chicken is forever in need of a makeover. This recipe throws a spin on the dull and traditional, exhibiting flaming color and subtly sweet flavors. It is a little taste of New England, incorporating Macintosh apples, fermented apple cider and real maple syrup. The secret here is the trick behind low-fat cooking: infuse the food with a balance of rich and calm flavors which tempt the palate and satiate the belly.

- 1 whole boneless chicken breast
- coarse salt & freshly ground pepper
- 1 cup plus 1 and 1/3 cups fermented apple cider
- 1/2 red onion
- 1 garlic clove
- 1 Macintosh apple
- 1 teaspoon cinnamon
- 1/2 teaspoon ginger
- 1/2 teaspoon ground cloves
- 1 tablespoon maple syrup
- 1 teaspoon olive oil

1. Carefully trim fat and skin from the chicken breasts, and split. Season generously with salt and pepper, place in one cup of cider and set aside. The chicken breasts may be refrigerated in the marinade for up to two days.
2. Pour remaining 1 1/3 cups cider into a 10" skillet and bring to a slow simmer over medium-high heat.
3. While the cider heats, peel and slice apple; begin by removing the skin, then cut wedges away from the core. Cut wedges into 1/8 inch slices, and add to the cider. Slice the onion as thinly as possible, and quarter the garlic clove; add both to the cider.
4. Sprinkle spices over cider, stirring gently.
5. When the mixture comes to a simmer, add chicken breasts and cover. Allow them to cook for 2-3 minutes, and then flip them. They will obtain a deep amber color. Re-cover and continue cooking for another minute or two. Remove chicken from the liquid and place on a cutting board. Slice each into four strips; the insides will still be pink. Place strips back into the liquid and cook another minute.
6. Heat a small skillet on high, add oil, and reduce to medium. Remove chicken from the cider and place into hot skillet. Sear all edges, making sure that they are cooked through. Be careful not to overcook or they will become very tough.
7. While chicken is finishing, reduce the cider to about one third on medium high with the maple syrup. The apples and onion will be pulp-like. Stir occasionally.
8. The sauce will require more time than the chicken, so place the chicken on a plate and reserve. When the sauce is reduced, taste, and season accordingly. Spoon all but the garlic cloves over the chicken, and serve immediately.

As a sweet and savory combination, this recipe requires very simple accompaniments. Try pan-steamed asparagus and couscous flavored with onion: Bring approximately 12 ounces of chicken stock to a boil with one half of a coarsely chopped red onion. Add 1/2 cup couscous, cover, and allow liquid to absorb. Season with salt and pepper.

An education 'on the rocks' or 'with a twist?'

For some students, bartending and waiting tables is the best job around

By Ted Burnes
Bucknellian Staff Writer

It's almost the end of the year, and you're broke. You have a stack of bills, your declining balance just ran out, and you really want to take a vacation with your friends. Looks like it's time to get a job. According to the Office of Financial Aid, over 60% of University students are employed some way or another.

One off-campus job in particular is one that more and more students are considering. Student bartenders and waitpersons are serving drinks while hitting the books... and they're laughing all the way to the bank. Although it's a lot of work, the hours are great, the schedule is flexible, and the money is outstanding.

"It's a great job because it's a change of scene and you meet lots of cool people," said Anne Demutis '99 said. Demutis started working at Rusty's in Lewisburg in early December right before winter break as a hostess, and then also started waitressing and bartending. "The hours are really flexible," Demutis said. "I usually work weekends and maybe one evening a week, which is perfect because I can get my work done. Usually I work until a little after 10 p.m. The latest I ever get out is midnight, but that is extremely rare."

"It's a real enjoyable way to earn money," agreed Mike Ruggiero '97, who is currently employed at the Brynwood Inn. Ruggiero tends bar at special events both on and off the Brynwood premises. He usually works three or four times a month, and he enjoys it immensely.

"The people I cater to are usually not students, and they always spark up great conversations. Everyone always talks to the bartender," he said.

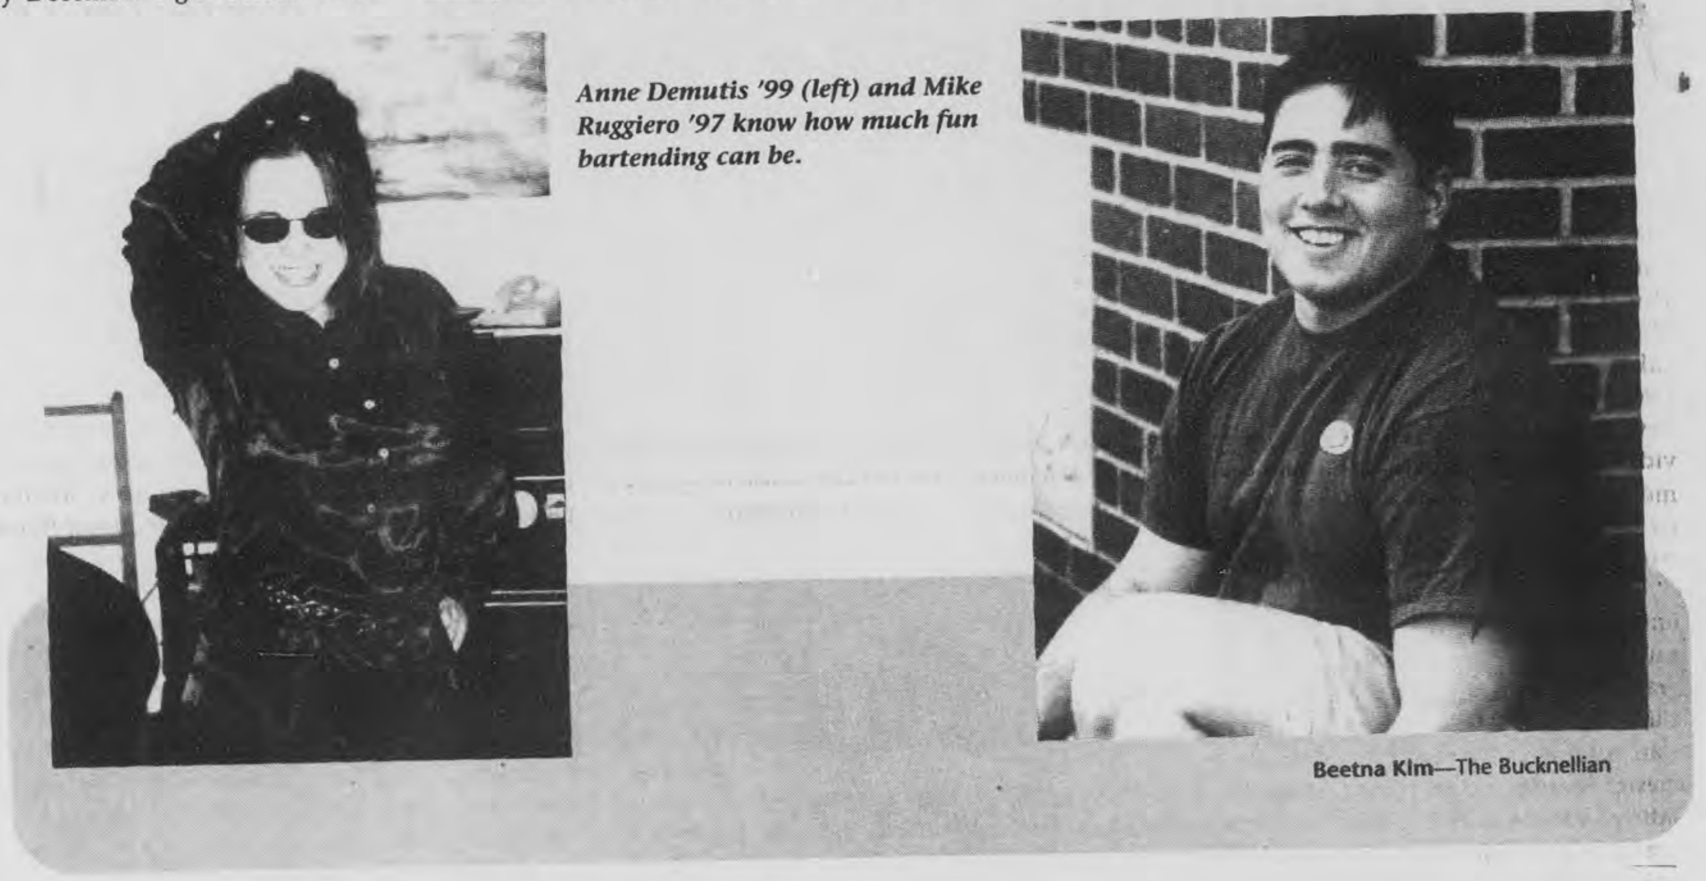
When asked what he talks about, Ruggiero said, "When they find out I'm from Bucknell, they usually ask me questions about the school and if I like it. The topic of conversation is never particularly dominated by any one topic... whatever is on their minds, really."

We all know that no job is perfect, but are there any problems in this line of work? "No, not really," Demutis said. "It really depends on the establishment you work in." Demutis also works at a nightclub at home, where people tend to drink a lot more than at Rusty's. "You just have to know when to cut people off so it doesn't become a problem."

"It does depend on the type of person you cater to," said Ruggiero. "I have catered student fraternity parties, and they go wild. In that situation, it depends on the quantity of alcohol, not on the quality of drink. At other events I cater, I have never really encountered a problem."

How do other employees feel about students bartending? "There are many advantages to hiring students," said Jennifer Golomb, an employer at the Brynwood Inn. "We are very inclined to hire students. Their schedule is seasonal, and so is ours. They are primarily available at night and on the weekends, which is when we need them. The only time we've ever had a problem is on Parent's Weekend or on Graduation, because we are really busy and they have their own commitments. Other than that, we really don't have a problem."

Other people feel differently. "I'm the only student that works at Rusty's," said Demutis. "It's a job that requires a lot of responsibility, and they are afraid students won't take it seriously. A lot of students have many obligations and activities and can't devote as much time to the job as they need to. I just have a good time doing it," Demutis said. "And, it gives me a chance to get off campus and work in a different atmosphere. I can't think of a better job."



Anne Demutis '99 (left) and Mike Ruggiero '97 know how much fun bartending can be.

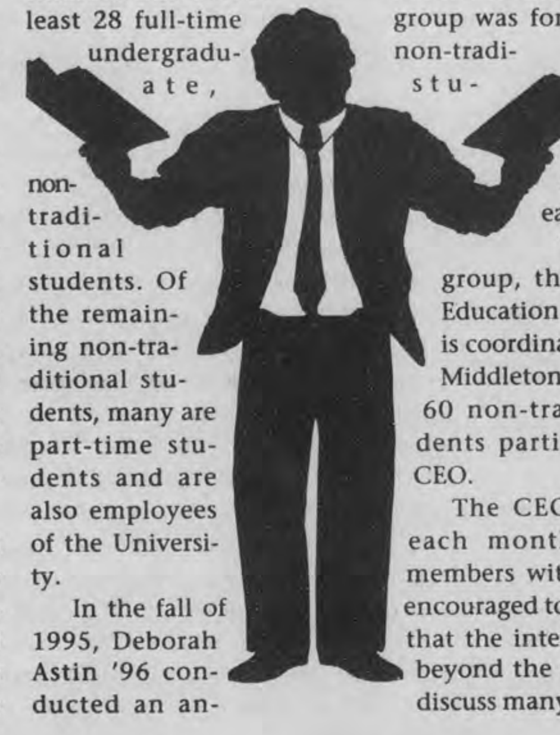
Juggling more than just assignments

Non-traditional students share views on the University

By Caryn Richman



Imagine having to deal with all the stress that comes along with being a University student and add to that a family, a full-time job, or even worse, both.

In order for a student to be considered non-traditional, he/she must be over 24 years old. Although the number of non-traditional students at the University has more than doubled over the past year, there are still many problems which set these students apart from the traditional University student.

Currently there are 246 students at the University who meet the criteria making them non-traditional students, up from about 100 non-traditional students here last year.

Of the 246 non-traditional students, 131 are graduate students. There are at least 28 full-time undergraduate, non-traditional students. Of the remaining non-traditional students, many are part-time students and are also employees of the University.

In the fall of 1995, Deborah Astin '96 conducted an anthropology project to determine the needs of non-traditional students. As a result of Astin's findings, a support group was formed to allow non-traditional students to lend advice and assistance to each other.

This support group, the Continuing Education Organization, is coordinated by Wendy Middleton '97. About 50-60 non-traditional students participate in the CEO.

The CEO meets once each month and those members with families are encouraged to bring them so that the interaction can go beyond the students. They discuss many problems that are foreign to traditional students including certain housing, educational and social issues.

> *"I had one professor who told me that he thought some older people would be acting more maturely. And I said 'If we were that mature, we would have finished college a long time ago'."*
> *—Wendy Middleton*

When non-traditional students first come to the University, they are not made aware of the CEO. Because of this, Middleton is currently trying to get funding from Bucknell Student Government so that the group can afford to contact these new non-traditional students.

Another issue facing non-traditional students is that they do not necessarily get the opportunity to take advantage of the activities which are offered to other students. "We pay an activities fee, but we're not going to participate in most of the activities. The movies are at 10 p.m.," Middleton said. She believes there should be more activities offered for families, since many non-traditional students have children at home.

Many non-traditional students would prefer to live on campus, but because of their families, this is rarely an option. Although the faculty court housing area was originally built in the 1940s for married students and their families, today this area is mainly filled by faculty members. This forces non-traditional students to search off-campus for housing.

When asked how non-traditional students are treated in the classroom, Middleton responded, "Due to the added life experience, sometimes faculty expect a lot more [from non-traditional students]."

Classmates often look upon non-traditional students as assistant professors, or as a liaison between the class and the professor. "[Students often] ask me to ask the professor something and it puts me in a weird situation," Middleton said.

Although many non-traditional students feel that they don't really fit in with traditional students, their main complaints are directed toward the administration. There are many little problems encountered by non-traditional students which the administration has never had to deal with.

One issue which the CEO has been able to solve, with the help of the administration, involves academic advisors. When a non-traditional student first comes to the University, they are known as a special student. According to Middleton, a special student is "allowed to take classes, but it's on a probationary set-up. You have to get a certain level of grades."

Middleton explained, "as a special student, you're not given an advisor [in the department you're majoring in] other than the main advisor, John Pyper [associate dean of arts and sciences]. [Pyper] does his very best, but it's not really fair for him to have to give all the information."

As a result of this situation, the CEO sent out an e-mail to all faculty asking if "they would be willing to be an informal advisor to older students," Middleton said. "I got a great response. I got 50 people." Middleton then gave this list of informal advisors to Pyper and he has been steering people in the right directions.

Although she realizes that non-traditional students make up a small percentage of the student population, Middleton worries that there is no permanent office or administrative advisor to oversee the non-traditional students.

"[The CEO] is not the kind of group that should be running on its own. This should be part of the administration," Middleton believes.

Although there are many differences between traditional and non-traditional students, eagerness and enthusiasm for learning are common traits.

"I had one professor who told me that he thought some older people would be acting more maturely. And I said 'If we were that mature, we would have finished college a long time ago'," Middleton said.

This is the first article in a three-part series focusing on non-traditional students at Bucknell. Next week I will focus on Mary Wyeth '98, a mother and non-traditional student who lives on campus with her family.

Seventh Street House provides home for African-American studies program

By Alison Dugan

A combination of homemade dumplings, Sunday barbecues and card games on the front porch, Seventh Street House is not the typical residential facility. Nestled in the center of campus, Seventh Street House provides a warm and playful atmosphere which lends itself to the African-American studies program.

In order to live in Seventh Street House, students must first apply to the program and then must take a class related to African-American studies either in the semester during or prior to residing in the house, according to Nicole Diaz '98, the resident assistant.

Although members share a common interest in African-American Studies, the bonds between these residents go much deeper. Payton Rawls '99, describes the members of the house as "close knit" and feels comfortable because many residents share common backgrounds and experiences.

Rawls said that Seventh Street House is a place where people "understand me, understand my humor." Because of the friendships formed in the house, Rawls said that the house is a place where he can always "laugh loudly."

Joel Toluba '99, was originally placed in Seventh Street House because of a low room pick number. Admitting to being a "little nervous at first," Toluba now feels as if he is a part of a "tight knit community."

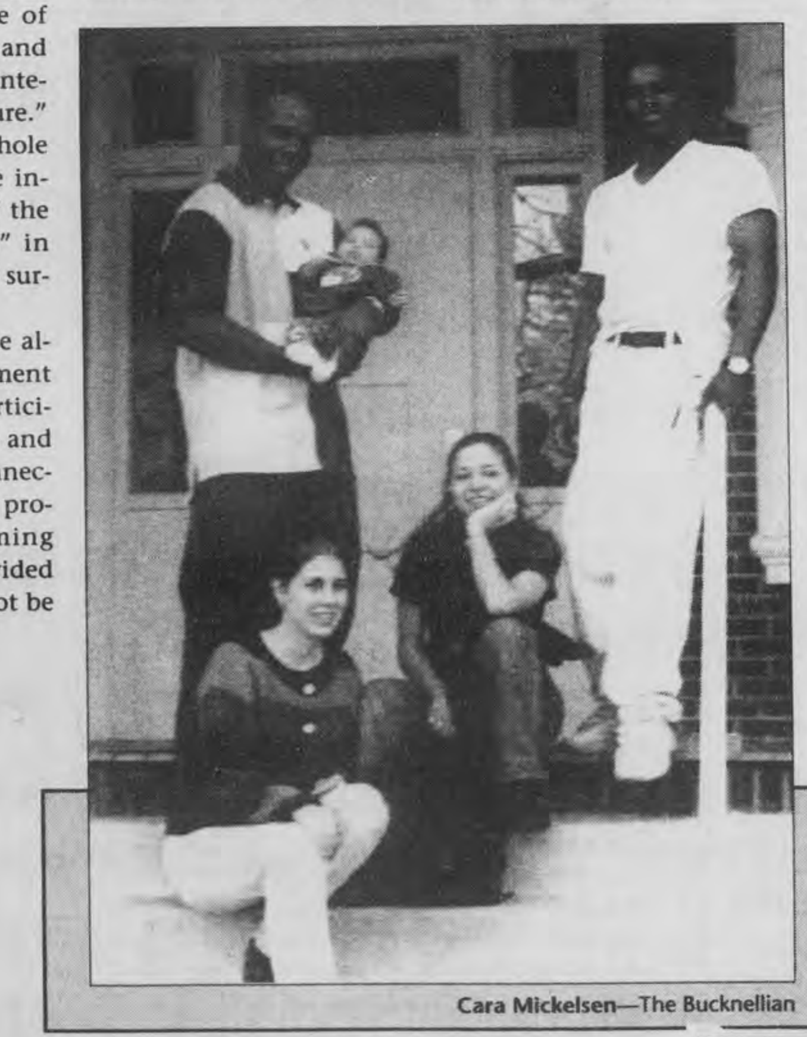
In addition to the academic requirement, students in the African-American studies program will be taking trips and sponsoring lectures next year. These activities and the "warm and friendly atmosphere" is why Lori Ann Woods '98 chooses to live in Seventh Street House.

Although the African-American studies house is taking measures to further develop the program, a low number of applicants threatens the future of the house. Jim Wiltgen, Jr., assistant director of housing and residential life, feels that a weakness of the house is the large numbers of students on campus who are not aware of Special Interest Houses and are consequently not "integrated into campus culture." Wiltgen feels that "the whole community needs to be involved with the idea of the special interest houses" in order for the program to survive.

Wiltgen said that the alternative living environment enables students to participate in special activities and campus programs in connection with an academic program. "The programming and opportunities provided for these students cannot be re-created in a residence hall environment," Wiltgen said.

The loss of Seventh Street House to the African American Studies Program would not only signify a lack of interest in the program, but also of a living environment unlike any other. Gone would be the afternoons on the porch, late night trips to Perkins and card games in the lounge. The house now allows old friendships to be strengthened and new friendships to be formed. As Rawls simply stated, "this house is important."

This is the first article in a four-part series focusing on special interest houses at Bucknell. Next week I will focus on Leiser International House.



Cara Mickelsen—The Bucknellian

Students find Seventh Street House to be more than just a place to stay during the semester. Lauren Abate '99, Ingrid Rodriguez '99, Payton Rawls '97, Tiana Rawls-White and Alex Obe '99 find the front porch to be a great place to relax.

Baseball falls to third after weekend split

Bucknell, Army trade sweeps in doubleheaders; Lafayette next for 5-3 Bison

BY JEFF CAMPAGNA
Bucknellain Staff Writer

Erin Leidl— The Bucknellian

Cleanup hitter Peter Cann '97 raised his season average to .393 after the weekend series with Army, but it wasn't enough to keep the Black Knights from splitting the series.

The Bison baseball team lost some ground in the Patriot League race this week, dropping into third place at 5-3 behind Navy and Army. Though Bucknell swept this past Saturday's doubleheader against Army, the Black Knights returned the favor on Sunday, taking both halves of the second twin bill.

The Bison took the field for their first match-up with their number one starter, Mike Anders '98, on the mound. Though Anders had been roughed up in his previous starts, he came through with a strong effort and received enough support from his offense to pick up a 4-2 victory.

Bucknell used a big fifth inning to open up a 1-0 ballgame. Centerfielder Mike McCarthy '99 led off with a single and after stealing second base, came home on second baseman Dave Apollon's '98 double. Right Fielder Alex Inclan '97 then hit a shot to the wall, clearing the bases with an inside-the-park home run to put the Bison up 4-0.

Eric Junge '99 came in to close out the game during the sixth inning, slamming the door on an Army rally.

Bucknell finished the sweep in the nightcap, as starter Sean Huss '99 allowed only one earned run over five innings, pitching his way out of several tight spots to move his record to 4-0.

The top four of the Bison batting order did most of the damage, picking up all but one of Bucknell's nine hits. The Bison broke things open in the bottom of the third, scoring three runs during a one-out rally to take a 3-0 lead. Bucknell picked up several more insurance runs to close out the 6-1 win.

Each of the Bison's one through four hitters—McCarthy, Apollon, Inclan, and catcher Pete Cann '97—collected two hits while knocking in a run and scoring once in the victory.

"We were pleased to get the sweep on Saturday," Coach Gene Depew commented. "I think we put things together. We took advantage of good defense to get out of jams and made use of timely hitting."

Bucknell was unable to carry Saturday's momentum into the following day, as they dropped

Growing pains continue for men's lacrosse

BY E.J. CRAWFORD
Bucknellian Staff Writer

Beetna Kim—The Bucknellian

Ed Joffe '99 scpred eight goals and had two assists in the two games against Navy and Hobart, but it wasn't enough as the Bison dropped a pair of games to the nationally ranked teams.

"It's been a painful learning experience." That is how Coach Sid Jamieson described the maturation of the young Bucknell lacrosse team. Last year back-to-back wins over Hobart and Navy propelled Bucknell into the national spotlight on their way to an undefeated season. But this year the Bison became mere victims of two strong teams on a roll.

In the games, the Bison fell to Navy, ranked tenth in the country, 17-7, and then dropped an 18-8 decision to a Hobart squad that handily defeated League favorite Army.

The two losses drop the Orange and Blue to 2-5 for the season, while they remain 1-1 in Patriot League play.

Against the Midshipmen the men's squad jumped out to a hot start behind sophomore Ed Joffe's goal one minute into the game. Unfortunately it would be the only lead for the Bison, as Navy caught fire in the second quarter, outscoring the Bison 9-3 and taking an 11-4 halftime lead.

"[We] started out playing well, but made a couple of errors clearing the ball and they went on a run... They're just too good for us to do that," Jamieson said.

Navy continued their domination in the second half, moving ahead 16-6 after the third quarter en route to their 17-7 victory.

Joffe followed up his seven-goal performance with five goals and Paul Bruccoleri '98 and Mark Stirpe '98 had 19 saves, but all that wasn't enough to overcome being outshot 52-24 and losing 18 of the 27 face-offs.

"The difference is that they're very strong up front and quick on the midfield," Jamieson said, adding that "we were very poor on face-offs."

The Hobart game opened in a similar fashion as Joffe and Mike Kennedy '99 (assisted by John Golaszewski '97) scored within the

Throwers dominate at Colonial Relays

BY CHRIS ELLIS
Bucknellian Staff Writer

It was a meet with more opposing teams and more of the nation's top competitors, but for the Bucknell women's throwing team, the end result was more of the same.

The Bison trio of Lisa Allen '97, Tria Tyler '99 and Joylyn Brown '98 combined to earn seven top-five finishes in three throwing events held last week at the Colonial Relays in Williamsburg, Virginia.

No other competitor at the meet earned as much hardware as Tyler. The sophomore earned first place in the discus throw, third place in the shot put and second in the hammer throw.

Allen also had an impressive weekend, finishing fourth in the shot put and winning the hammer throw with a toss of 153 feet, six inches, breaking her own school record by four feet.

Brown finished fifth in the discus throw and her 147-foot, four inch toss in the hammer throw was good for third place, giving the Bison a 1-2-3 finish in that event. Brown's hammer throw at Williamsburg was a career-best effort.

On the men's side, Bucknell's Darryl Volpicelli '98 qualified for the season-ending IC4A meet in the hammer throw with a 175-foot, 3 inch throw. Volpicelli, who finished fourth in the IC4A shot-put championships last year, qualified for the hammer throw competition for the second consecutive year.

Brian Schiding '00 also had a career day at the Williamsburg relays, recording a personal best jump of 23 feet, 3/4 iches in the long jump. Schiding was the only freshman to place in that event, and his mark stands as the fourth best in school history.

The Bison resume their dual-meet schedule at home this Saturday with a meet against Cornell, Syracuse, Towson State and Duquesne. The meet will be the only home meet of the outdoor track season.

Flash in the Pan

All in the family: In the NHL, it seems, all personal relationships are thrown out the window once a game starts. Never was this more true than in Monday's game between Hartford and Buffalo. At the 17:00 mark of the second period, Buffalo's Wayne Primeau took exception to a Hartford player crashing the net and into Buffalo G Dominik Hasek. Unfortunately for Mr. Primeau, that player was his brother, Hartford C Keith. The brothers tussled briefly in front of the net, then erupted into fisticuffs just seconds later. Both were given fighting majors. For the record: Keith got the upper hand in the fight and the game, as his Whalers won, 4-2, to inch closer to a playoff spot.

Death of a sportsman: Washington Redskins owner Jack Kent Cooke, 84, died Sunday from cardiac arrest in a Washington hospital. Cooke, who spent 23 years as majority owner of the Washington Redskins, also owned the Los Angeles Lakers, and several minor league hockey and baseball teams. Cooke was the owner of three Super Bowl Champion Redskin teams.

Adieu, Mario: Mario Lemieux played the final regular-season home game of his career in front of a standing-room only crowd at Pittsburgh's Civic Arena. Lemieux took a career-high 11 shots in the game, but was not able to score in the Penguins' 3-1 victory over the Boston Bruins. Still, the crowd gave Lemieux a standing ovation for the final 5:00 of the game and erupted when he returned to the ice to be named the game's "Co" #1 star. Lemieux will return to the Civic Arena ice for playoff action in two weeks.

Back to business: Roberto Alomar, fresh off of his five-game suspension for spitting on umpire John Hirshbeck at the end of last season, returned to the Oriole lineuup on Monday to a chorus of boos from the home crowd in Kansas City. Alomar went 2-3 in the game before leaving due to a sprained ankle in the 8th.

Postponed... again: The Mike Tyson-Evander Holyfield rematch scheduled for May 8th was postponed three weeks due to a cut over Tyson's left eye, which was reportedly opened in sparring this week. It was the third time Tyson has postponed a fight since leaving prison and the seventh time Tyson's camp has postponed a fight overall. In fact, befoe prison Tyson pulled out of a fight with Holyfield because of an alleged rib injury, and it took five yeras for the two to actually fight again (due to Tyson's imprisonment). Holyfield was scheduled to receive $35 million and Tyson $20 million for the fight.

Bison women fall to earth against Lafayette, Rutgers

7-0 start comes to an end with 13-6 loss to Leopards

BY HALEY FUTTERKNECHT
Bucknellian Staff Writer

Jonah Half—The Bucknellian

Amy Green and the women's lacrosse team opened Patriot League play 1-1. The team faces defending champion Lehigh this week.

The Bucknell women's lacrosse team had its final taste of perfection this week, extending their undefeated record to 7-0 before setbacks against league foe Lafayette and perrenial powerhouse Rutgers.

Against Shippensburg, the women squandered an early 5-1 lead, only to fall behind 6-5 at halftime—the first time they've trailed all season.

Coming out with more momentum in the second half, Bucknell poured in 11 goals to come up with the win, 16-14.

The Bison twice held a three-goal lead in the second half, but the Raiders cut the gap to one goal each time. Bucknell suffered its highest goal allowance all season. The Bison outshot Shippensburg by a mere 35-32.

Liz Murphy '99 helped to spark the Bison in the second half with a career-high five goals. Meredith Barrows '97 added three important goals for Bucknell and Heidi Hammes '99, Kate McIlvain '97 and Lauren Coyne '99 all scored twice in the victory. Hammes also added two assists.

Ali Toombs '97 tended goal for Bucknell and provided 13 saves.

In the latest national statistics, released prior to the Shippensburg game, Toombs ranked fifth in the nation in save percentage at .696. Up to this point, Bucknell ranked fourth in the nation in scoring defense, allowing only 4.33 goals per game.

The women's hopes of an undefeated season ended Saturday as Lafayette used long passes to hand the Bison their first loss of the season, 13-6.

Alison Cox '97 made her first appearance back on the field battling back from her second torn anterior cruciate ligament injury.

"In order for us to score against teams such as Lafayette, we need to play smart and execute plays efficiently and effectively," Murphy commented.

Murphy put in three goals for Bucknell while McIlvain, Coyne and Megahn Hallahan '97 all had single contributions. Lafayette outshot Bucknell 33-19 in holding Hammes scoreless for the first time this season.

Hammes has become a marked player by all of Bucknell's competitors. Teams have done their research and attempt to shut down the six-foot, left-handed Hammes. This provides her with less opportunities to aid in the offense.

"Lafayette utilized their great speed and beat us on fast breaks. Once they settled it down by the goal cage, our defense took care of them," Hammes said.

Goal was tended by Toombs, who made 17 saves for the Bison.

Bucknell experienced its second loss against Rutgers, 11-3, on Monday. The women's squad came out strong despite the knowledge that Rutgers defeated Lafayette earlier.

Rutgers had speed and endurance that never ceased, along with an excellent goalkeeper.

"Rutgers beat us on midfield turnovers which we're looking to improve upon when we battle Lehigh this Saturday," Murphy noted.

The defense had an excellent showing against Rutgers. Toombs shone brightly as she made 15 saves for the Bison.

Sarah Moosbrugger '98 put Bucknell on the scoreboard in the first half, allowing for a halftime score of 6-1.

Hammes added a pair of goals for Bucknell in the second half. Hammes performed well for the Bison despite being intensely marked by Rutgers. Rutgers outshot Bucknell 32-16.

Murphy stands at second on the team in scoring with 16 goals and one assist. Hammes leads with 25 goals and eight assists.

The Bison endured three tough games in a row with more to come.

Bucknell goes into its next game, at defending league champion Lehigh on Saturday, with a still respectable 7-2 overall record and a 1-1 record in the Patriot League. The Bison travel to Drexel on Sunday and play their fourth Patriot League game Tuesday at Colgate.

"Our scores have improved tremendously from last year. We have much smaller point margins in regards to losses. We're a tough team to beat that makes the competition work hard for their goals," Murphy said.

Profile: women's lacrosse coach Barbara Jordan

Enthusiastic first-year coach has women's lacrosse rolling

BY ERICA FRIEDLANDER
Bucknellian Staff Writer

Cara Mickelsen— The Bucknellian

Bucknell women's lacrosse coach Barbara Jordan, known for her enthusistic coaching style, has helped her team jump to a 7-2 start, which included a seven-game winning streak to start the season.

The Bucknell women's lacrosse team may seem a little bit excited this season. This is probably because they are one of the most successful teams on campus and because they are led by a talented and compassionate new head coach, Barbara Jordan.

Jordan was raised in Media, Pennsylvania, and she can recall that as early as junior high school she had a major interest in lacrosse. "I wanted to be a part of a team," Jordan said as she remembered her first years as a player.

The first-year coach's desire for involvement began when she first watched the game, intrigued by its beauty and speed. Jordan continued to play throughout high school and college, where her extreme athletic ability became well known.

A three-time All American while playing at Penn State University, Jordan was chosen as a member of the U.S. National Squad on which she played for eight years.

In 1986, she was a starter on the World Cup Team that went on to win a silver medal. Jordan then served as a team captain for the United States Under-23 Team in 1987, where she was able to travel and play throughout Europe.

Her incredible list of achievements in lacrosse eventually caused her to be widely recognized, and in 1992 she was given with the "Beth Allen Award," presented annually by the United States Women's Lacrosse Association. Jordan was honored as "... the lacrosse player at the National Tournament who exhibited highly developed skills, discipline and a sense of sportsmanship and spirit for the game."

Jordan graduated from Penn State University with a bachelor of science degree in Recreation and Parks with emphasis on Therapeutic Recreation. She went on to teach and coach at a high school in Washington, D.C. where Jordan stated that she was, "involved in all levels of coaching."

In 1995, Jordan was offered a position on the coaching staff at Vanderbilt University in Tennessee. She served as the assistant coach for the lacrosse team for the 1996 season. Her time spent coaching at Vanderbilt eventually led her back to Pennsylvania, and in June 1996, she announced that she would be taking the position of head coach at Bucknell. " I wanted to get back to the east coast and be close to my family," Jordan said when asked what prompted the move back to Pennsylvania.

Jordan's communicative coaching style and optimistic attitude has led the women's team through a smooth transition and ultimately has helped the team to achieve its current record of 7-2. "We work really well together. We're all open about our expectations that we have of one another. It's really important to just talk to one another," Jordan said.

In the coming years, Jordan hopes to build and expand upon Bucknell's lacrosse program, trying to make it one of the strongest in the Patriot League. When asked about Bucknell's current status in the league, Jordan stated, "Bucknell has caught some people's eyes in the Patriot League. We're really growing in strength and number." Jordan feels that Bucknell attracts excellent student/athletes and that the athletics department can help by providing more opportunities for those people.

Jordan stressed the need for an increase in student support for the women's lacrosse team in the future. "If people would just come out to the field, I'm sure that they would enjoy what they see. It's fast, fun to watch. Lacrosse is just a really beautiful sport."

BASEBALL

from page 13

their first game 5-1 despite junior starter Mike Tomko's giving up only one earned run over five plus innings of work.

Unfortunately the Bison managed only three hits, pushing across their only run in the fourth inning to tie the score 1-1. Army scored when it counted, rallying during the final two innings, scoring once off Tomko and three times off reliever Ed Soley '00 to finish out the victory.

Offense picked up in the final contest, as Black Knights prevailed in a 15-9 slugfest. Though the Bison were able to take a 4-3 lead after three innings, Army roared back in bunches, scoring six runs in the fourth and seventh innings.

Bucknell starter Doug Hoffman '97 was tagged for six runs over three plus innings, but the Bison were able to provide some firepower of their own, coming back to tie the score 9-9 by the bottom of the fifth. Reliever Junge was unable hold off Army in the seventh inning, as the Black Knights worked him for six runs to go up 15-9.

Inclan continued to wield a hot bat, as he picked up a double and a homer while leading the team with four RBI's. Left fielder Mike MacNeely '98 exhibited some power of his own, clubbing a three-run homer in Bucknell's four-run fifth inning, while third baseman Tyler Prout '00 banged out three hits.

In his first season, Prout has been a pleasant surprise at third base for the Bison. He had some big shoes to fill in the form of All-Patriot League performer Kevin Silverman; Prout has made the most of his opportunity so far, batting over .400 with four home runs.

"In the beginning I didn't feel as much pressure in fall ball, but as things developed I began to feel a little more," Prout commented. "In Florida, I realized I had a spot to fill, and so far, it's been great."

The Bison travel to Worcester for a pair of doubleheaders against league-rival Holy Cross this weekend.

CYCLING

from page 16

Ducharme was the top Bucknell finisher in a pack ripped apart by the only massive crash of the day. The crash occurred on the final lap right before the finishing straight. It was an unfortunate end to a pretty good day.

The team was proud and lucky to have the services of the Vitesse guys and a strong showing of alumni who came to help out.

Men's tennis survives without top player

BY JARED SILLIKER
Bucknellian Staff Writer

With number one player T.K. Kelly '00 just coming back from a pulled stomach muscle, the men's tennis team survived a week without him, going 4-0 and upping their season mark to 8-4.

The team handled UMBC, Holy Cross, Fairfield and St. Joe's to push its winning streak to five, and have won six of its last seven matches.

"With T.K. out, I thought we might have some trouble with Fairfield, but the guys were up to the challenge, winning 5-2," Head Coach Bob Hammerlee said.

In the four matches this past week, Bucknell lost only one doubles match (No. 3 vs. UMBC) and four singles matches, two coming against Fairfield.

"We even had more fans at both Holy Cross and Fairfield than they did. A lot of family and friends were there from Massachusetts and Connecticut to support us, which was certainly a bonus," Hammerlee said.

Kelly returned to action Tuesday, playing doubles with Steve Bomberger '99 against St. Joe's, winning 8-3, but he did not play singles. Bomberger had teamed with Justin Quandt '00 to win four straight matches in Kelly's absence, and he is 9-3 overall in doubles with both Kelly and Quandt.

The number three doubles team of Sean Galligan '98 and Drew Thimme '97 is also 9-3 on the season. Galligan holds the top singles record 12 matches into the season at 9-3, while Quandt stands at 8-4. Alex Dannin '99 also holds a 6-1 record, most recently at No. 5 singles.

"Dannin and Galligan are playing so well right now. With T.K. coming back, I should have a lot of flexibility in the singles lineup," noted Hammerlee.

Jonah Half— The Bucknellian

Drew Thimme '97 (above) teamed with doubles partner Sean Galligan '98 won two of their three matches during the week.

Crew crushes Bucknell Invitational field

The Bucknell crew team , here enjoying a rare moment out of the Susquehanna River waters, n early pulled a clean sweep of the six events held at this weekend's Bucknell Invitational.

The Bison women won all four of the events they entered, earning top honors in the novice four- and eight-man races as well as in the varsity four- and eight-man races.

The men nearly followed suit, earning a victory in the men's varsity four-man race, but finishing a close second in the novice four-man race.

Jonah Half—The Bucknellian

BISON

from page 13

first five minutes before the Statesman rallied for a 4-2 first quarter and an 8-3 first half lead.

The Bison hung around at the beginning of the second half, closing the gap to 9-5 before a seven-goal fourth quarter by Hobart put the game out of reach. The final score was 18-8.

Joffe and Kennedy again led the way for the Bison with three and two goals, respectively, while junior Mark DelGrego added a goal and an assist in the loss. In addition, goalie Bruccoleri made 15 saves in the contest before leaving late with a concussion.

"We are very good at times; we just need to sustain that," Jamieson noted, adding that "we need to develop confidence, which is very difficult... with the nature of the competition we face," including seven nationally ranked teams this season.

The road does not get much easier for the weary Bison, as they face 17th ranked Maryland-Baltimore County (UMBC) and a very strong Lehigh squad this upcoming week. Both games are away, with the Lehigh game being a crucial league contest.

Golf rebounds to win Lafayette Invitational

BY ERIC KEBER
Bucknellian Staff Writer

Coming off a disheartening 16th place finish this weekend at the Navy Spring Invitational, the Bucknell Golf Team came back to defeat Lafayette, Rider and Fordham on Tuesday in a one day invitational.

The Invitational took place at Lafayette's home course, the 6,296-yard Northampton Country Club.

Bucknell's team score of 416 was 20 strokes ahead of Lafayette's who came in second with a score of 436. Rider finished third with 447 and Fordham ended the day with 464 strokes.

Bucknell was lead by Todd Schneider '99, who shot a day low seven-over par 79. The Bison also captured the second and third lowest scores as Josh Hartman '98 and Mark McGinly '97 shot 80 and 84 respectively.

Sophomore Tony Calandra's 86 and freshman Brad Borman's 87 rounded out Bucknell's scoring.

In the two-day Navy Spring Invitational this past weekend at the U.S. Naval Academy Golf Course, Bucknell finished with a team total of 634. Penn State won the event with a score of 593 with Temple (602), Navy (604), George Mason (607) and Georgetown (608) completing the top five.

"It was frustrating to be only four shots away from 12th place," Hartman said. "It was a good showing though, against some of the most challenging competition of the season."

Head Coach Tommy Thompson was not disappointed, but felt the same way as the team.

Hartman was Bucknell's lowest scorer with a 13 over-par 155 (78-77). Calandra was two strokes behind with a 157 (79-78). Schneider (161), Eric Shortz '98 (162) and Bryan Sun '99 (167) also competed for Bucknell.

The Bison will play at the Rutgers Invitational in New Jersey tomorrow Friday and Saturday. This will be the team's last chance to qualify for a season ending tournament.

Engineering, Computer Science, Math & Physics Grads (BS, MS, Ph.D)

Unfortunately the only organization with more advanced technology than Northrop Grumman isn't hiring at the moment.

Want to begin your career with immediate exposure to advanced technology? There is no better place to look than Northrop Grumman right now. From our work on the E2C Airborne Early Warning System to the Joint Surveillance Target Attack Radar System (Joint STARS) to the Vehicular Intercommunications System (VIS), Northrop Grumman's Electronics Systems Division continues to prove that the impossible is indeed possible.

At our Electronics Systems Division facility in suburban Chicago you'll find one of the world's most capable and experienced designers and manufacturers of highly specialized electronic systems. Our product technologies include Radio Frequency (RF) electronic systems and electro-optic/Infrared systems. These products have continuing near and long-term business opportunity. In fact, at Northrop Grumman our strategic thrust into defense electronics is estimated to exceed $10 billion by the year 2000. Current areas of opportunity include:

MMIC/ASIC

Northrop Grumman Electronics Systems continues to be an industry leader in the development and use of monolithic microwave integrated circuit and analog and digital application-specific integrated circuit technology. Through this technology, complex circuits have been dramatically simplified, resulting in 70% fewer parts, a 10:1 reduction in weight and volume, and increased performance and reliability, compared to conventional implementations. A dramatic example of maximizing miniaturization can be found in the microwave power module, the smallest power transmitter ever designed and constructed.

Advanced Technology

Here is where the leading edge of today's electronic countermeasures technology is created. The Advanced Technology section provides engineers with an applied research environment to simulate state-of-the-art advances in analog, digital, RF, microwave, electro-optic/Infrared, and electron tube technologies along with the attendant computer aided modeling and simulation techniques.

EO/IR

ES-RM infrared jamming systems provide military aircraft with protection against a vast array of heat seeker missile threats and are compatible with virtually all modern military and commercial aircraft and armaments. All electro-optical/Infrared countermeasures systems provide stand-alone protection against surface-to-air, air-to-air and air-to-ground missiles providing the flexibility to program specific countermeasure technology against varying threats. These high-powered efficient jammers are capable of protection against multiple infrared homing missiles.

Embedded Software

Northrop Grumman is at the leading-edge of mission planning and system software development, with expertise gained from working on Attack Missile Mission Planning Software (MPS), as well as state-of-the-art next generation "smart" weapons system software. A joint government/industry team, using the maturity scales has rated Northrop Grumman among the top high technology software development companies in the industry.

JOIN US !

At our Electronics Systems Division you'll find exposure to advanced technology and tremendous career opportunity. In addition, our location offers high quality housing, education facilities and the excitement of Chicago's sports, entertainment and cultural activities. To find out more, send your resume as ASCII text to resumes@eiws.esid.northgrum.com. Or you can mail or fax your resume to: Attn: Professional Employment, Advanced Technology, Northrop Grumman, 600 Hicks Road, Rolling Meadows, IL 60008. Fax: 847/590-3189. An equal opportunity employer M/F/D/V.

NORTHROP GRUMMAN

Bison women fall to earth against Lafayette, Rutgers

7-0 start comes to an end with 13-6 loss to Leopards

By Haley Futterknecht

Bucknellian Staff Writer

Jonah Half—The Bucknellian

Amy Green and the women's lacrosse team opened Patriot League play 1-1. The team faces defending champion Lehigh this week.

The Bucknell women's lacrosse team had its final taste of perfection this week, extending their undefeated record to 7-0 before setbacks against league foe Lafayette and perrenial powerhouse Rutgers.

Against Shippensburg, the women squandered an early 5-1 lead, only to fall behind 6-5 at halftime—the first time they've trailed all season.

Coming out with more momentum in the second half, Bucknell poured in 11 goals to come up with the win, 16-14.

The Bison twice held a three-goal lead in the second half, but the Raiders cut the gap to one goal each time. Bucknell suffered its highest goal allowance all season. The Bison outshot Shippensburg by a mere 35-32.

Liz Murphy '99 helped to spark the Bison in the second half with a career-high five goals. Meredith Barrows '97 added three important goals for Bucknell and Heidi Hammes '99, Kate McIlvain '97 and Lauren Coyne '99 all scored twice in the victory. Hammes also added two assists.

Ali Toombs '97 tended goal for Bucknell and provided 13 saves.

In the latest national statistics, released prior to the Shippensburg game, Toombs ranked fifth in the nation in save percentage at .696. Up to this point, Bucknell ranked fourth in the nation in scoring defense, allowing only 4.33 goals per game.

The women's hopes of an undefeated season ended Saturday as Lafayette used long passes to hand the Bison their first loss of the season, 13-6.

Alison Cox '97 made her first appearance back on the field battling back from her second torn anterior cruciate ligament injury.

"In order for us to score against teams such as Lafayette, we need to play smart and execute plays efficiently and effectively," Murphy commented.

Murphy put in three goals for Bucknell while McIlvain, Coyne and Megahn Hallahan '97 all had single contributions. Lafayette outshot Bucknell 33-19 in holding Hammes scoreless for the first time this season.

Hammes has become a marked player by all of Bucknell's competitors. Teams have done their research and attempt to shut down the six-foot, left-handed Hammes. This provides her with less opportunities to aid in the offense.

"Lafayette utilized their great speed and beat us on fast breaks. Once they settled it down by the goal cage, our defense took care of them," Hammes said.

Goal was tended by Toombs, who made 17 saves for the Bison.

Bucknell experienced its second loss against Rutgers, 11-3, on Monday. The women's squad came out strong despite the knowledge that Rutgers defeated Lafayette earlier.

Rutgers had speed and endurance that never ceased, along with an excellent goalkeeper.

"Rutgers beat us on midfield turnovers which we're looking to improve upon when we battle Lehigh this Saturday," Murphy noted.

The defense had an excellent showing against Rutgers. Toombs shone brightly as she made 15 saves for the Bison.

Sarah Moosbrugger '98 put Bucknell on the scoreboard in the first half, allowing for a halftime score of 6-1.

Hammes added a pair of goals for Bucknell in the second half. Hammes performed well for the Bison despite being intensely marked by Rutgers. Rutgers outshot Bucknell 32-16.

Murphy stands at second on the team in scoring with 16 goals and one assist. Hammes leads with 25 goals and eight assists.

The Bison endured three tough games in a row with more to come.

Bucknell goes into its next game, at defending league champion Lehigh on Saturday, with a still respectable 7-2 overall record and a 1-1 record in the Patriot League. The Bison travel to Drexel on Sunday and play their fourth Patriot League game Tuesday at Colgate.

"Our scores have improved tremendously from last year. We have much smaller point margins in regards to losses. We're a tough team to beat that makes the competition work hard for their goals," Murphy said.

BASEBALL

from page 13

their first game 5-1 despite junior starter Mike Tomko's giving up only one earned run over five plus innings of work.

Unfortunately the Bison managed only three hits, pushing across their only run in the fourth inning to tie the score 1-1. Army scored when it counted, rallying during the final two innings, scoring once off Tomko and three times off reliever Ed Soley '00 to finish out the victory.

Offense picked up in the final contest, as Black Knights prevailed in a 15-9 slugfest. Though the Bison were able to take a 4-3 lead after three innings, Army roared back in bunches, scoring six runs in the fourth and seventh innings.

Bucknell starter Doug Hoffman '97 was tagged for six runs over three plus innings, but the Bison were able to provide some firepower of their own, coming back to tie the score 9-9 by the bottom of the fifth. Reliever Junge was unable hold off Army in the seventh inning, as the Black Knights worked him for six runs to go up 15-9.

Inclan continued to wield a hot bat, as he picked up a double and a homer while leading the team with four RBI's. Left fielder Mike MacNeely '98 exhibited some power of his own, clubbing a three-run homer in Bucknell's four-run fifth inning, while third baseman Tyler Prout '00 banged out three hits.

In his first season, Prout has been a pleasant surprise at third base for the Bison. He had some big shoes to fill in the form of All-Patriot League performer Kevin Silverman; Prout has made the most of his opportunity so far, batting over .400 with four home runs.

"In the beginning I didn't feel as much pressure in fall ball, but as things developed I began to feel a little more," Prout commented. "In Florida, I realized I had a spot to fill, and so far, it's been great."

The Bison travel to Worcester for a pair of doubleheaders against league-rival Holy Cross this weekend.

Profile: women's lacrosse coach Barbara Jordan

Enthusiastic first-year coach has women's lacrosse rolling

By Erica Friedlander

Bucknellian Staff Writer

Cara Mickelsen— The Bucknellian

Bucknell women's lacrosse coach Barbara Jordan, known for her enthusistic coaching style, has helped her team jump to a 7-2 start, which included a seven-game winning streak to start the season.

The Bucknell women's lacrosse team may seem a little bit excited this season. This is probably because they are one of the most successful teams on campus and because they are led by a talented and compassionate new head coach, Barbara Jordan.

Jordan was raised in Media, Pennsylvania, and she can recall that as early as junior high school she had a major interest in lacrosse. "I wanted to be a part of a team," Jordan said as she remembered her first years as a player.

The first-year coach's desire for involvement began when she first watched the game, intrigued by its beauty and speed. Jordan continued to play throughout high school and college, where her extreme athletic ability became well known.

A three-time All American while playing at Penn State University, Jordan was chosen as a member of the U.S. National Squad on which she played for eight years.

In 1986, she was a starter on the World Cup Team that went on to win a silver medal. Jordan then served as a team captain for the United States Under-23 Team in 1987, where she was able to travel and play throughout Europe.

Her incredible list of achievements in lacrosse eventually caused her to be widely recognized, and in 1992 she was given with the "Beth Allen Award," presented annually by the United States Women's Lacrosse Association. Jordan was honored as "... the lacrosse player at the National Tournament who exhibited highly developed skills, discipline and a sense of sportsmanship and spirit for the game."

Jordan graduated from Penn State University with a bachelor of science degree in Recreation and Parks with emphasis on Therapeutic Recreation. She went on to teach and coach at a high school in Washington, D.C. where Jordan stated that she was, "involved in all levels of coaching."

In 1995, Jordan was offered a position on the coaching staff at Vanderbilt University in Tennessee. She served as the assistant coach for the lacrosse team for the 1996 season. Her time spent coaching at Vanderbilt eventually led her back to Pennsylvania, and in June 1996, she announced that she would be taking the position of head coach at Bucknell. "I wanted to get back to the east coast and be close to my family," Jordan said when asked what prompted the move back to Pennsylvania.

Jordan's communicative coaching style and optimistic attitude has led the women's team through a smooth transition and ultimately has helped the team to achieve its current record of 7-2. "We work really well together. We're all open about our expectations that we have of one another. It's really important to just talk to one another," Jordan said.

In the coming years, Jordan hopes to build and expand upon Bucknell's lacrosse program, trying to make it one of the strongest in the Patriot League. When asked about Bucknell's current status in the league, Jordan stated, "Bucknell has caught some people's eyes in the Patriot League. We're really growing in strength and number." Jordan feels that Bucknell attracts excellent student/athletes and that the athletics department can help by providing more opportunities for those people.

Jordan stressed the need for an increase in student support for the women's lacrosse team in the future. "If people would just come out to the field, I'm sure that they would enjoy what they see. It's fast, fun to watch. Lacrosse is just a really beautiful sport."

CYCLING

from page 16

Ducharme was the top Bucknell finisher in a pack ripped apart by the only massive crash of the day. The crash occurred on the final lap right before the finishing straight. It was an unfortunate end to a pretty good day.

The team was proud and lucky to have the services of the Vitesse guys and a strong showing of alumni who came to help out.

Men's tennis survives without top player

By Jared Silliker

Bucknellian Staff Writer

With number one player T.K. Kelly '00 just coming back from a pulled stomach muscle, the men's tennis team survived a week without him, going 4-0 and upping their season mark to 8-4.

The team handled UMBC, Holy Cross, Fairfield and St. Joe's to push its winning streak to five, and have won six of its last seven matches.

"With T.K. out, I thought we might have some trouble with Fairfield, but the guys were up to the challenge, winning 5-2," Head Coach Bob Hammerlee said.

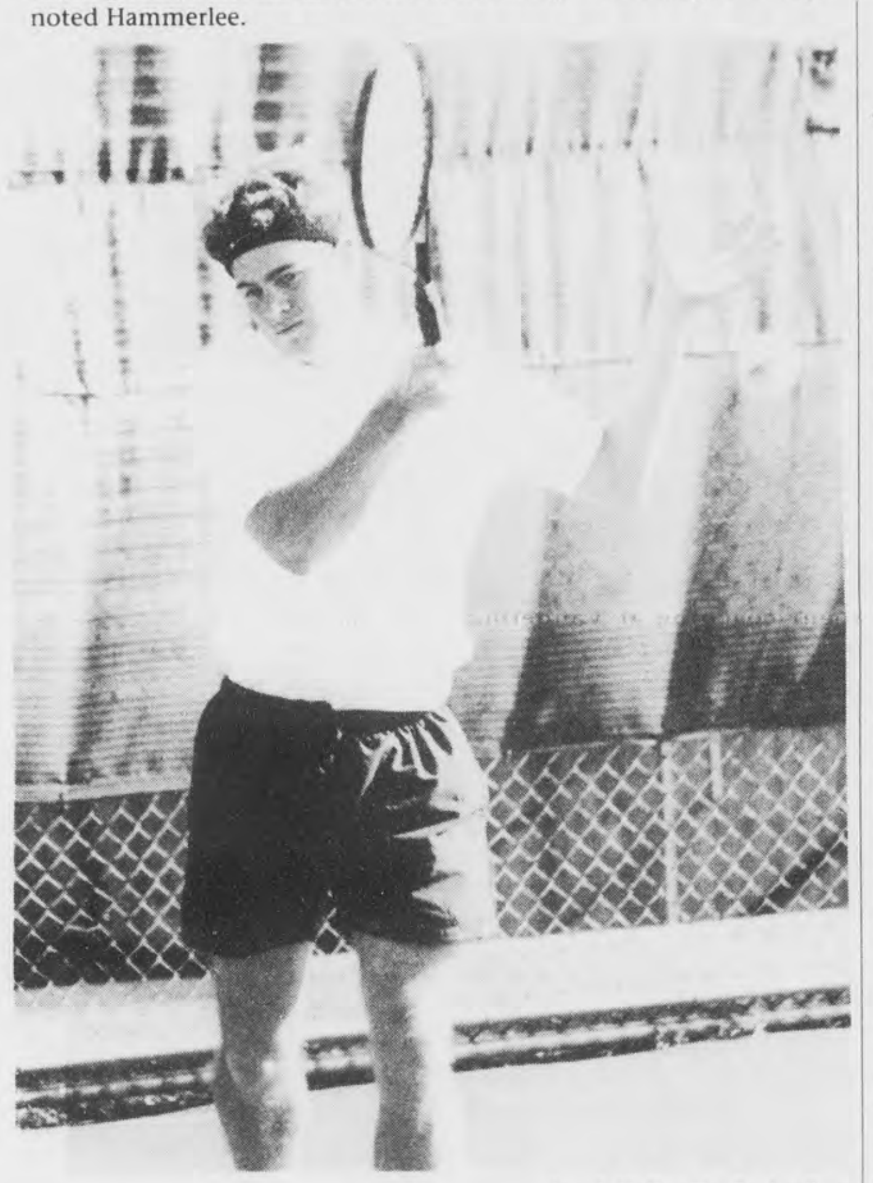
In the four matches this past week, Bucknell lost only one doubles match (No. 3 vs. UMBC) and four singles matches, two coming against Fairfield.

"We even had more fans at both Holy Cross and Fairfield than they did. A lot of family and friends were there from Massachusetts and Connecticut to support us, which was certainly a bonus," Hammerlee said.

Kelly returned to action Tuesday, playing doubles with Steve Bomberger '99 against St. Joe's, winning 8-3, but he did not play singles. Bomberger had teamed with Justin Quandt '00 to win four straight matches in Kelly's absence, and he is 9-3 overall in doubles with both Kelly and Quandt.

The number three doubles team of Sean Galligan '98 and Drew Thimme '97 is also 9-3 on the season. Galligan holds the top singles record 12 matches into the season at 9-3, while Quandt stands at 8-4. Alex Dannin '99 also holds a 6-1 record, most recently at No. 5 singles.

"Dannin and Galligan are playing so well right now. With T.K. coming back, I should have a lot of flexibility in the singles lineup," noted Hammerlee.



Jonah Half— The Bucknellian

Drew Thimme '97 (above) teamed with doubles partner Sean Galligan '98 won two of their three matches during the week.

Crew crushes Bucknell Invitational field

The Bucknell crew team , here enjoying a rare moment out of the Susquehanna River waters, n early pulled a clean sweep of the six events held at this weekend's Bucknell Invitational.

The Bison women won all four of the events they entered, earning top honors in the novice four- and eight-man races as well as in the varsity four- and eight-man races.

The men nearly followed suit, earning a victory in the men's varsity four-man race, but finishing a close second in the novice four-man race.

Jonah Half—The Bucknellian

BISON

from page 13

first five minutes before the Statesman rallied for a 4-2 first quarter and an 8-3 first half lead.

The Bison hung around at the beginning of the second half, closing the gap to 9-5 before a seven-goal fourth quarter by Hobart put the game out of reach. The final score was 18-8.

Joffe and Kennedy again led the way for the Bison with three and two goals, respectively, while junior Mark DelGrego added a goal and an assist in the loss. In addition, goalie Bruccoleri made 15 saves in the contest before leaving late with a concussion.

"We are very good at times; we just need to sustain that," Jamieson noted, adding that "we need to develop confidence, which is very difficult... with the nature of the competition we face," including seven nationally ranked teams this season.

The road does not get much easier for the weary Bison, as they face 17th ranked Maryland-Baltimore County (UMBC) and a very strong Lehigh squad this upcoming week. Both games are away, with the Lehigh game being a crucial league contest.

Golf rebounds to win Lafayette Invitational

By Eric Keber

Bucknellian Staff Writer

Coming off a disheartening 16th place finish this weekend at the Navy Spring Invitational, the Bucknell Golf Team came back to defeat Lafayette, Rider and Fordham on Tuesday in a one day invitational.

The Invitational took place at Lafayette's home course, the 6,296-yard Northampton Country Club.

Bucknell's team score of 416 was 20 strokes ahead of Lafayette's who came in second with a score of 436. Rider finished third with 447 and Fordham ended the day with 464 strokes.

Bucknell was lead by Todd Schneider '99, who shot a day low seven-over par 79. The Bison also captured the second and third lowest scores as Josh Hartman '98 and Mark McGinly '97 shot 80 and 84 respectively.

Sophomore Tony Calandra's 86 and freshman Brad Borman's 87 rounded out Bucknell's scoring.

In the two-day Navy Spring Invitational this past weekend at the U.S. Naval Academy Golf Course, Bucknell finished with a team total of 634. Penn State won the event with a score of 593 with Temple (602), Navy (604), George Mason (607) and Georgetown (608) completing the top five.

"It was frustrating to be only four shots away from 12th place," Hartman said. "It was a good showing though, against some of the most challenging competition of the season."

Head Coach Tommy Thompson was not disappointed, but felt the same way as the team.

Hartman was Bucknell's lowest scorer with a 13 over-par 155 (78-77). Calandra was two strokes behind with a 157 (79-78). Schneider (161), Eric Shortz '98 (162) and Bryan Sun '99 (167) also competed for Bucknell.

The Bison will play at the Rutgers Invitational in New Jersey tomorrow Friday and Saturday. This will be the team's last chance to qualify for a season ending tournament.

SPORTS

Money is important, but Leyland makes Marlins baseball's biggest fish

Commentary

Chris Ellis
Sports Co-Editor

Dateline: Pittsburgh, Pennsylvania, October, 1996. Jim Leyland, the manager that had led the Pittsburgh Pirates to three straight division titles in the early 1990's and had said repeatedly that he would never leave Pittsburgh, had finally seen enough.

His team, with its dwindling attendance and small-market position, had lost more talent in the past five season than most major-league teams even saw. The list of players that left Pittsburgh for greener pastures reads like a roll call of All-Stars: Barry Bonds. Doug Drabek. Bobby Bonilla. Denny Neagle. Andy Van Slyke. The list could go on forever, but the desire announced by new Pirates owner Kevin McClatchy to trim the Pirate payroll to $10 million was too much for the embattled Leyland.

Fast forward to April, 1997. The Florida Marlins, Leyland's new team, had spent lavishly on nearly every player that was to Leyland's liking in the off-season. Leyland had spent his entire major league career penny pinching and had made his career getting something out of nothing, now was on the other end of baseball's free-wheeling free-agent bonanza.

Expos outfielder Moises Alou signed a five-year, $25 million deal to patrol Florida's outfield. Alex Ferdandez defected from the White Sox for $26 million over five years to anchor a starting rotation that includes stars Kevin Brown (17-11, 1.89 ERA) and Al Lieter (16-12, 2.93). Jim Eisenriech, Joe Orsulak and John Caneglosi are other role players that benefited from Marlins' owner H. Wayne Huizenga's deep pockets to come to the Sunshine State. The final testimony to Leyland's newfound fortune, though, came when the Marlins resigned outfielder and Triple Crown threat Gary Sheffield.

Sheffield's six-year contract will pay him an average of $10.5 million per year. The Pirates' 25-man payroll will take home a collective $9.3 million.

Still, big money is no assurance of big success—just ask Baltimore Orioles owner Peter Angelos, whose league-high payroll last season translated into a second-place finish. Florida, will have more than just talent, though— they have a man that can mesh all that talent into a winning team.

Because of his dismal situation in Pittsburgh, Leyland's success as a manager cannot be measured in wins and losses (he is nine games under .500 for his career). Just keeping his sanity while all of his players jumped ship in Pittsburgh is reason enough to believe that he can do the job with a winning team. Instead, his ability to motivate his players will be what pushes Florida over the top this year.

The list of players who dropped off the face of the baseball earth after they left Pittsburgh is just as lengthy as the list of talented players who have departed. John Smiley, Gary Varsho and Mike Kingery are just a few of the players who never regained their touch after leaving the Steel City.

Now, Leyland's bullpen will consist not of Danny Darwins and Bill Landrums, but of players like Florida's Rob Nenn (35 saves, 1.95), who is one of baseball's best. His cleanup hitter will no longer be Mark Johnson, a player who makes $1 for every $23 the average cleanup-hitter makes, but the powerful Sheffield, whose 42 home runs were second in the league. The tables are different for Leyland now, and he will spend the final few years of his career making the most of them. Come October 1997, the Atlanta Braves' reign of the National League will be over.

• Fresh off my prediction of Arizona as the 1997 NCAA Champion, I'm coming to you again with another round of picks, this time for the 1997 major league season.

•*Cleveland*, bolstered by the addition of Dave Justice and Marquis Grissom in a recent trade, will earn the American League Pennant, defeating *Baltimore* in the league final. The Indians, despite the loss of Albert Belle, still have one of baseball's most potent lineups. Matt Williams, added in a free-agent deal over the off season, will help mease the thing from Belle's loss. Charles Nagy, Orel Hershiser, and Jack McDowell form a top-notch starting staff, and the bullpen, whether or not it will be anchored by Jose Mesa (whose rape trial went to jury this week) will still be solid. Other AL Playoff teams: *Seattle, Chicago.*

• *Florida* will reign as the 1997 World Series Champion, unseating *Atlanta* as the NL East champ and knocking them off again in the playoffs. Other NL Playoff teams: *Los Angeles, Houston.*

Softball rebounds from a dismal start

Fourteen straight losses a distant memory as team opens Patriot League play 2-2

Beetna Kim—The Bucknellian

Chris Mayrhofer '98 helped the women's softball team to split a pair of doubleheaders with Army and Holy Cross.

BY BRETT TOMLINSON
Bucknellian Staff Writer

After a sluggish 5-17 start in non-league play, the Bucknell softball team got back on track with two splits against Patriot League opponents Army and Holy Cross last weekend.

The Bison opened Sunday's doubleheader in Worcester, MA by dropping an 11 inning heartbreaker to Holy Cross and last year's Patriot League pitcher of the year, Genoa Grosch.

Bucknell hurler Stacy Waite '99 allowed only five hits in 10 and one third innings, but the Crusaders finally cracked the 1-1 tie in the bottom of the eleventh stanza.

For Waite, pitching extra innings was nothing new. She had pitched two extra inning contests this year before the Holy Cross game, but battling against Grosch provided some added tension.

"It's just an emotional roller-coaster," Waite commented. "First you think you've won it, and then you think you've lost it."

Bucknell recovered from the rush of emotions and beat the Crusaders 4-2 in the second game.

Second baseman Jenn Gombos '97 went 3-for-3 at the plate, and pitcher Melanie Kulis '98 surrendered just six hits and one earned run.

A three run outburst in the top of the sixth proved to be the difference for Bucknell. Three consecutive singles by Chris Mayrhofer '97, Jen Delardo '98 and Jen Jasionowski '97 brought two runs across, and shortstop Jenny Snyder '99 doubled to knock in Jasionowski.

Saturday's split with Army included a three-hit complete game victory by Waite and a 6-2 loss in the second contest.

With a 2-2 record in the Patriot League, things are looking up for a team which had lost 14 games in a row earlier this spring.

"We have three seasons: the spring, the Patriot League season and the [Patriot League] Tournament," Waite explained. "Right now, we're just trying to play well and get tuned up for the tournament."

So far, the Bison have been solid on the mound, with the dynamic duo of Waite and Kulis combining for a 2.83 earned run average, but at the plate, the team has struggled, batting .276.

Bucknell's opponents have a batting average of .313.

"We need to be a little more aggressive at the plate," Waite said. "We're a great hitting team in practice, but we need to be more aggressive in games."

Bucknell has not scored more than four runs in their past seven games, which could be a problem in league play, but Waite remains confident that the team can turn things around in the wide-open league schedule.

"Holy Cross is a good team, and Lehigh is always good, but I think the league is pretty much up for grabs this year," Waite said.

The Bison resume Patriot League action vs. Lafayette today.

Club Sport report: Cycling

Three hundred cyclists flock to Bucknell invitational

BY DIRAN AYANDALE

Jonah Half—The Bucknellian

Riders in the men's criterium race take to the streets of Lewisburg in this weekend's cycling event

Last weekend the Bucknell University Cycling Team hosted a two day racing event in which 35 schools and nearly 300 racers participated. The weather was perfect for racing and most of the races went off without a hitch.

Ryan Steneken '98, the race promoter, led the team towards its goal of having the best run-race in the conference. Unfortunately the pressure of hosting the race was a bit much for Steneken and some of the others as they were unable to race effectively even with the home court advantage.

On Saturday, the team held its first ever road race which consisted of laps repeatedly crossing the Shamokin ridge, the highest ridge in this area. It was one of the hardest courses ever used in collegiate cycling races in this area.

Highlights of the day included two top 20 performances by Marc Ducharme '98 and Tim Gernitis '98 in the Men's A road race. Other riders who rode well were Diran Ayandele '98, Brett Bailor '00 and Erin Hemler '98.

All races went off well despite initial problems with some local volunteer organizations. The team received praise from the officials for a job well done.

The next morning everyone woke up early to set up the criterium course.

The weather was once again beautiful, and crashes were few and far between, making for a pleasant and exciting day of racing. In the morning a strong showing by the Bucknell women led to points placing by Erin Hemler '98 in the A race and some good experience for Maryann Cielesz '99 in the Women's B field.

The action heated up in the afternoon with the Men's B race in which Bucknell entered and finished four riders. The best performances came from Brian Hill '98, who took fourth, and Ayandele who placed sixth. "I was behind the whole field until the left side opened up so I shot the gap and won the field sprint," Ayandale commented.

Strong performances also came from Brett Bailor '00, who had mechanical difficulties early on but managed to hang in there, as well as sophomore Whit Yost.

The final and top race of the day was the Men's A race. Bucknell was unable to do anything spectacular due to the fact that half of its team withdrew from exhaustion and illness.

THE BUCKNELLIAN

Wrestling sanctions spark war of words

Former coach contends he was unfairly targeted; Hartzell says Ferraro's comments are simply "not true"

BY E.J. CRAWFORD

Bucknellian Staff Writer

Last week the results of a semester-long inquiry into the recruiting of Michael Garcia '98 resulted in the dismissal of wrestling head coach Bob Ferraro and a one-year suspension of Garcia.

Ferraro's dismissal brings his perspective to the forefront. "The inquiry started out as a witch-hunt and I've become a scapegoat," Ferraro said.

In response, Athletic Director Rick Hartzell said "[The inquiry] started out as a possible NCAA violation and he [Ferraro] was the one who broke the rules."

However, despite the fact that Ferraro was found guilty in the inquiry run by the Stier, Anderson and Malone law firm in Washington, D.C., he claims that the charges are "bogus and fabricated," and further insists that the University wanted to get rid of him and used the Garcia case as a means to that end.

"Mike Garcia is an unfortunate pawn to get to me. [The inquiry] gave Rick Hartzell and the University the opportunity to do what it wanted to do all along—fire me."

Furthermore, Ferraro disagrees with the treatment that Garcia received in being suspended. "No one ever charged Mike and he never had a hearing. This is why Mike Garcia was able to get the injunction [that] allowed him to wrestle in the conference tournament]."

However, Hartzell said that these allegations by Ferraro are simply "not true." He also discounts any personal vendetta on his part, saying that "I'm in a position where I have to answer to a lot of people, and I don't think we had more problems than anyone else."

In addition, Hartzell insists that the inquiry was an "objective look at the incidents with the hope that they would find nothing."

As to the objection of using Garcia, as well as his being suspended for the season, Hartzell says that "the minute we had a suspended violation we prohibited him from wrestling. [The suspension] was mandated by the NCAA and we followed the NCAA law to the letter."

The University has not released its reasons for initiating the investigation and subsequent inquiry into the recruiting of Garcia, although Ferraro asserts that "[Manager of Development Communications] Bob Gaines... brought the matter to the Athletic Department's attention."

This matter becomes complicated, as Gaines once worked for Bob Ferraro as Editor in Charge of Sponsorship and Advertising Dollars for the National High School Coaches Association (NHSCA). However, both Gaines and Hartzell refute the claim that Gaines was the one who tipped the University off to possible violations.

Said Gaines, "I was questioned but didn't bring it up. The investigators came to me."

Hartzell calls the claim that Gaines prompted the inquiry "absolutely, one hundred percent false."

Elias Abelson, general counsel of the University, declined comment on the origins of the investigation.

However, of all the differences of opinions the greatest regards a paid internship given to Garcia the January after he enrolled at the University. Although Hartzell could not state specifically, he did admit that the internship was a major part of the inquiry.

The complicated matter begins with Garcia being hired as an intern for the NHSCA, a wrestling organization founded by Ferraro and run out of Lewisburg. The internship was arranged by Steve Stamos, professor of international relations who did not return calls regarding the matter. Stamos was also the NHSCA Associate Executive Director.

The details of the internship were completed by the law firm of Fleming, Haile, Shaw and Gundlach. The money was then supplied by Joe Fleming of the law firm ($2,000), with an additional $3000 coming from William A. Graham, President of the Graham Company.

However, in a memo from Vice President of Administration Barry Maxwell sent to Ferraro, he says that the Inquiry found that "Garcia was seldom present for work

NCAA bylaws alleged to be violated:

13.2.2 Specific Prohibitions.

Specifically prohibited financial aid, benefits and arrangements include, but are not limited to the following:

(b) Gift of clothing or equipment;

(e) Cash or like items

(f) Any tangible items; including merchandise

(h) Free or reduced cost housing;

13.2.4 Employment of Prospects.

13.2.4.1 Subsequent to Senior Year. The arrangement of employment by an institution for a prospect shall be permitted, provided the employment does not begin prior to the completion of the prospects senior year in high school.

13.2.4.2 Transportation to Summer Job. An institution or its representatives shall not provide free transportation to and from a summer job unless it is the employer's established policy to transport all employees to and from the job site.

Shoe business is all in the family...

Beetna Kim—The Bucknellian

JoAnn, Angelo and Gina Guinta stand at the counter of Angelo's Shoe Store, their family owned business which opened on Monday. JoAnn and Angelo own the store, while their daughter Gina is the manager.

"At Angelo's, there is a wide selection of dress and casual shoes for women and men," JoAnn said. "Our original business is Champion Shoe" in Lewisburg which has been in business for 40 years, JoAnn said. April 28 marks the start of the week long Grand Opening celebration.

University plans new buildings

$30 million of capital campaign funds allotted for construction

BY DEREK POWELL

Bucknellian Staff Writer

Of the $150 million the five-year capital campaign hopes to raise, $30 million of those funds will be used for the construction of new facilities on campus. Twenty million dollars will be allocated to the actual construction of the buildings, while $10 million will be earmarked for building maintenance endowments.

Three of these proposed new buildings, a music building, an art building and a psychology/geology building, will replace facilities that are outdated or obsolete, and will provide students with a more centralized learning environment.

Although the need for such upgraded facilities has been apparent for many years, especially regarding the music and art facilities, serious planning for replacement facilities is a recent development, tied in part to the capital campaign.

Once the plans for the capital campaign were solidified, studies were performed on the need for such facilities, and to test the level of potential donor interest.

"We retained an architectural firm (Burt Hill Kosar Rittelmann Associates) last year to do preliminary feasibility studies for each of these projects to test the level of potential donor interest," said Barry Maxwell, vice president of administration. "As a result of a four- to five-month study—the architectural firm worked with the departments—[the architects] put together a rather comprehensive, intensive facilities feasibility study."

The outcome of this study resulted in preliminary sketches of the new facilities, as well as determining the fate of the buildings vacated by those academic departments. "During the course of that study, the architects recommended that the Carnegie and the music and arts buildings be razed," Maxwell said.

Acting from a cost-related standpoint, the architects concluded that those two buildings would prove too costly to renovate or restore. This suggestion, Maxwell believed, was two-fold: that the buildings were too dilapidated for restoration, and the vacation by the departments would mean that they would serve no special purpose.

According to Maxwell, "The architects conducted an analysis indicating what would have to be done to each of those buildings in order to put them in shape for any other department, or any other intended use, and according to preliminary figures, the least expensive solution was to tear the buildings down."

Maxwell stressed that the proposed demolition of the Carnegie and Music and Art buildings was only preliminary, and that for both buildings, topics such as aesthetic, architectural and especially historical issues figure prominently into the decision.

"Whenever we're confronted with this issue of demolition, I suspect there will be very strong opinions, whether to tear the buildings down, as well as to keep them, or to tear down one and keep the other," Maxwell said.

Though the construction of new buildings will very likely result in the demolition of one or more older buildings, the funds, as well as the plans, are far from final. Together with the architectural firm H2L2 of Philadelphia, the University continues to revise these plans. The official campus development plan is separated into several components: Site Planning, Roads; Parking, and Circulation; and Campus Edges, Features, Appearance, and Image.

The construction of the new buildings is factored into the first component: Site Planning. According to a memorandum from Maxwell to the Faculty dated April 9, this component includes analysis of preliminary site plans for the buildings and proposed demolition of the Carnegie and Music and Art buildings.

Although the plans for the new buildings are tied into the capital campaign, the prospect of the appearance of one of these buildings in the near future is unlikely. Because the plans cannot be approved until the funding goal has been attained, any definite decisions—and the actual construction of the buildings—are a few years away.

Maxwell sees the project commencing in a few years, depending on the amount of donor interest and of available funds. "This is not going to be a decision for this year, or next year—it will be several years before the funds are in hand to construct the buildings," Maxwell said. "Once we've raised the sufficient funds, it will probably take a two and a half year period—to select an architect through the programming phase, prepare design drawings and then go into construction phase. All of this will take a 30-36 month process. That's from start to end."

See page 16 for an in-depth look of the Carnegie and Music and Art buildings.

Changes aim to unify Swartz

BY ERIC BLOEM

Bucknellian Staff Writer

Students living in Swartz Hall next year should anticipate some changes to the organization of the residence hall. Swartz is the University's largest living environment, housing approximately 450 students. In the past, students have lived on theme halls which have since been done away with and will be replaced with "houses."

Victor Arcelus, Residence Director for Swartz Hall stated that it would not be beneficial to leave the residents living in Swartz without some type of community. "I thought that we needed a unifying system," he said.

Theme halls, Arcelus said "create a horizontal community" where students tend to relate to those individuals living on their halls. A more appropriate system of unification would be one that is vertical and allows students to interact with people on other floors, Arcelus said.

Valerie Stetts '99, a residence assistant in Swartz this year, agreed with Arcelus. "Because students already know everyone on their hall, they do not believe that hall programming is necessary."

As an alternative to the theme hall program, Arcelus has proposed a house system. He believes

Concussions stymie men's lacrosse squad

New helmets suspect in recent head injuries

BY E.J. CRAWFORD

Bucknellian Staff Writer

Confusion. Nausea. Splitting headaches. Delusion. No, this is not a description of a student's state after pulling an all-nighter, but the results of a massive trauma to the head—a concussion. Concussions can be scary and dangerous, and now four men's lacrosse players have suffered one this year.

Sophomore attackman Mike Vallone said "I just wanted to go to sleep," and defensive midfielder Fritz Wisor '99 described it as "a hole in time."

Wisor was the first to suffer a concussion this year, in which he missed three practices and one game, whereas Vallone suffered from post-concussion syndrome and missed 10 days and two games: "It took me a week just trying to get my head back to normal," Vallone said.

See CONCUSSIONS, Page A12

Jonah Half—The Bucknellian

Four men's lacrosse players have suffered concussions this season. Some players think that the new helmets are partially responsible.

National News

McVeigh prosecutors unruffled by report on FBI lab

DENVER—Prosecutors in the Timothy McVeigh bombing trial are unfazed over an inspector general's report criticizing the FBI's crime laboratory.

The report strongly criticized FBI Explosives Unit examiner David Williams, saying he "repeatedly reached conclusions that incriminated the defendants without a scientific basis and that were not explained."

But the investigation "did not substantiate the vast majority of the hundreds of allegations" against lab examiners.

Sources close to the prosecution say the report has not changed the government's courtroom strategy and will not hurt their case.

McVeigh is charged with murder and conspiracy in the April 19, 1995 bombing of the Oklahoma City federal building, killing 168 people. He faces the death penalty if convicted. His Army buddy Terry Nichols has also been charged in the bombing and will be tried at a later date.

Baseball honors Jackie Robinson; Commissioner retires No. 42

NEW YORK—Standing in the infield at Shea Stadium, President Bill Clinton honored baseball pioneer Jackie Robinson April 15 as a man who "changed the face of baseball and America" 50 years ago.

Clinton's appearance capped a 50th anniversary tribute to Major League baseball's first African-American player. Robinson broke the color barrier, overcoming a barrage of racist abuse, on April 15, 1947.

And as the president noted, Robinson's precedent had profound implications not just for sports, but for society at large.

Also on hand was Robinson's widow, Rachel, and his grandson, Jesse Sims, who threw out the ceremonial first pitch before the game between the New York Mets and the Los Angeles Dodgers.

Despite the gains made by the civil rights movement, Robinson's message of inclusion still applies to contemporary society, Clinton said. "We can achieve equality on the playing field, but we need to establish it in the boardrooms of America."

Military to allow American Indian soldiers to use peyote

ALBUQUERQUE, New Mexico—Marine Staff Sgt. Shawn Arnold has spent the past 18 years protecting the freedom of others but has been banned from a practice that is central to his religion.

That changed Tuesday when the military said it will allow American Indian soldiers to use peyote—a plant with psychedelic properties— in their religious services.

"If they're using peyote in their religious practice, it's a sacrament, not a drug, just as sacramental wine is not considered a drug," said Air Force Maj. Monica Aloisio, a Pentagon spokeswoman.

For Arnold, 38, the decision ends years of frustration.

"My record book says I can't go to church. I've been threatened, two times, with courts-martial," said the platoon commander stationed at the Marine base in Quantico, Virginia.

The new policy applies to any of the 9,262 American Indians in the military who use the plant to follow their faith.

Peyote is a small cactus that grows naturally in the Southwest. While it is illegal for most people to use, federal law permits peyote use by the 250,000 members in 20 states of the Native American Church.

Author Dorris faced child abuse investigation before suicide

CONCORD, New Hampshire—Michael Dorris, the award-winning author of a ground-breaking book on fetal alcohol syndrome, was facing a child sex-abuse investigation in Minneapolis when he committed suicide last week.

Minneapolis police would not give details of the allegations, and Jennifer Fling, spokeswoman for the Hennepin County attorney's office, said the police file would become public after the case is closed, probably within a week. Closing a case is routine when a suspect dies.

The 52-year-old writer was found dead last Friday in a Concord motel room, where he had checked in under an assumed name. Police said he took over-the-counter sleeping pills, drank vodka and suffocated himself with a plastic bag, leaving a note that said he would be "peaceful at last."

Dorris' attorney, Douglas A. Kelley, cautioned that Dorris had not been charged with a crime.

World News

Netanyahu attorney: Police recommend his indictment

JERUSALEM—Israeli police investigating an influence-trading scandal in the Israeli government have recommended that Prime Minister Benjamin Netanyahu be indicted, according to his attorney, Yaakov Weinroth.

Weinroth confirmed reports on Israeli television this evening that police made the recommendation after concluding a 12-week investigation Tuesday.

According to the Channel One television story, reported by the same journalist who originally broke the story in January, the investigators have recommended that Netanyahu be charged with fraud and breach of trust for his part in the appointment of an alleged political crony as attorney general.

Government officials allegedly appointed Roni Bar-On as Israel's top lawyer to gain favorable treatment of a political ally who faced corruption charges. The tradeoff was allegedly the support of the religious Shas Party for Israeli troop withdrawal from most of the West Bank town of Hebron.

Saudi diplomat: Hajj fire was an accident

MINA, Saudi Arabia—A Saudi Arabian diplomat said yesterday a fire that killed hundreds near the holy city of Mecca was an accident with no political ramifications.

Meantime, two million Muslims—chanting and clad in white robes—began the climax of this year's ill-fated Hajj pilgrimage as authorities tried to identify victims of the wind-spread fire that swept their tent city on Tuesday.

Diplomats and witnesses said the blaze was caused by gas cylinder explosions, but Saudi officials gave no cause.

Saudi state-run radio said yesterday the death toll had climbed to 343—more than 100 higher than previously reported.

Some were trampled to death as pilgrims fled the fire.

The fire roared through 70,000 tents at Mina erected by pilgrims performing the annual Muslim pilgrimage to the nearby holy city of Mecca, home of Islam's holiest shrines.

Zairian rebel leader to meet Mandela

CAPE TOWN, South Africa—Zairian rebel leader Laurent Kabila arrived in South Africa yesterday for a whirlwind round of talks aimed at easing his country's political crisis.

Kabila was to meet with U.N. special envoy Mohamed Sahnoun and South African President Nelson Mandela, who were believed to be trying to broker a cease-fire. It was unclear whether he also would talk directly with Zairian government representatives.

The rebel leader departed for Cape Town at 11:40 a.m. after a two-day visit to Zaire's second largest city, Lubumbashi, to mark his rebels' capture of the mineral-rich Shaba province.

Speaking to reporters from the Lubumbashi airport, Kabila again stressed that nothing would halt his drive to oust Zairian President Mobutu Sese Seko.

Rebels have captured about half of the nation since October and have urged Mobutu to resign or go into exile.

Japan seeks criminal charges against nuclear officials

TOKYO—The Japanese government filed a criminal complaint yesterday against its own nuclear development agency for filing a false report last month about a fire at a nuclear fuel reprocessing plant.

The Science and Technology Agency's action against the Power Reactor and Nuclear Fuel Development Corporation—Donen in Japanese—followed a series of accidents and cover-ups that inflamed public opinion. The complaint asks police to pursue charges against Donen.

Prime Minister Ryutaro Hashimoto said he was "disgusted" with the nuclear power corporation and promised to "investigate them thoroughly and beat them into shape."

The complaint filed by the agency involves an explosion and fire at the Tokaimura plant on March 11. Donen falsely reported to the government that someone had confirmed the fire had been extinguished. Donen acknowledged that the report had been falsified, and demoted five officials. At least 37 employees were exposed to low-level radiation during the accident.

PUBLIC SAFETY LOG

April 9, 1997

INFORMATION—A University student reported to a Public Safety Officer that unknown person(s) had placed a tack in a tire valve, while his vehicle was parked in the Bucknell West lot.

LARCENY/THEFT BY UNLAWFUL TAKING—A University student reported to a Public Safety Officer that a bookbag had been taken from Larison lounge. The incident is under investigation.

April 10, 1997

INFORMATION—A University student reported to a Public Safety Officer a vehicle accident on Moore Ave. The damage was minor and no injuries occurred.

INFORMATION—A University student reported to a Public Safety Officer being harassed by another University student. The incident is under investigation.

April 11, 1997

INFORMATION/SUSPECTED ODOR OF MARIJUANA—A University student reported to a Public Safety Officer the odor of marijuana in Swartz Hall. The report was determined to be unfounded.

SMOKE ALARM ACTIVATION—A Public Safety Officer responded to Bucknell West Mod for a smoke alarm activation caused by a smoke bomb. Charges will be filed.

INFORMATION/ASSIST RESIDENT ASSISTANT—A Public Safety Officer responded to Larison Hall to assist a Resident Assistant on a noise complaint. Alcohol was confiscated in a room search authorized by the occupants. Citations were issued.

April 12, 1997

ASSIST LEWISBURG POLICE DEPT.—While on routine patrol, a Public Safety Officer assisted the Lewisburg Police Department with a University student who was arrested for driving under the influence of alcohol.

INFORMATION/DOMESTIC DISPUTE—A Public Safety Officer responded to Roberts Hall for the report of a fight in progress. The incident was determined to be unfounded and no action was necessary.

INFORMATION/PREVENTION OF ALTERCATION—Student Security reported to a Public Safety Officer a potential confrontation at the rear of the 7th St. Cafe. The situation was resolved to the satisfaction of the two University students involved.

INFORMATION/POSSIBLE ACT 64 VIOLATION—A Public Safety Officer responded to Harris Hall for the report of the odor of marijuana. The incident was determined to be unfounded.

INFORMATION - A Public Safety Officer responded to the railroad underpass on St. George St. for the report of a hit and run accident. The vehicle of a University visitor had been damaged. The operator of the second vehicle returned to the scene and the incident was referred to the Lewisburg Police Department.

INFORMATION/DAMAGE TO PARKED VEHICLE—A University student reported to a Public Safety Officer that a vehicle had been scratched while parked on Fraternity Road. East Buffalo Township Police Department was notified and the incident is under investigation.

April 13, 1997

INFORMATION—A University student reported to a Public Safety Officer of having received harassing phone calls and that the Milton Police Department is conducting an investigation.

April 14, 1997

VANDALISM—A University employee reported to a Public Safety Officer that five soap dispensers and one towel dispenser had been damaged in bathrooms in Dana and the Computer Center. The incident is under investigation.

INFORMATION/PRANK—A University student reported to a Public Safety Officer that unknown person(s) dropped a water balloon, made from a plastic bag, from the window of Vedder Hall. The area was searched with negative results.

April 15, 1997

INFORMATION—A University employee reported to a Public Safety Officer of finding a suspicious message on a blackboard in Dana. The incident is under investigation.

VANDALISM—A University employee reported to a Public Safety Officer that the front porch of Lowry House had been damaged. The incident is under investigation.

HARASSMENT—A University student reported to a Public Safety Officer having received harassing e-Mail messages and phone calls. The Lewisburg Police Department was notified and will assist with the investigation.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

B.S.G. Election Preview 1997

The Bucknell Student Government is holding congressional elections today and tomorrow. Students may vote via the Internet until Friday evening or in the uphill Langone Center on Friday from 9 a.m. until 6 p.m.

Listed below are the candidates and a brief personal statement if they chose to write one.

Class of 1997:
Alumni Class President: (Vote for 1)
William Vogt
Alumni Class Reporter:
Sara Bloom

Class of 1998:
President: (Vote for 1)

Elise Arsenault—I am running for re-election as the class of '98 president, because I hope to utilize my past three years of experience within BSG and various University committees to help make senior year as well as commencement a positive and memorable experience for the class of '98.

Lisa Bellofiore

Raj Thangavelu—I am running because I would like to have an influence in the direction that Bucknell is taking during my senior year. I feel that some changes need to be made at the University and would like to be directly involved in that process.

Coleen Zoller

Vice President: (Vote for 1)

Celeste Erwain

Brett Perricelli—I have served as the vice president of the class during freshman and sophomore year. After taking a year off to serve as the vice president of BSG, I have decided to return to serve the class. With my elected co—officers, I plan to have a large amount of Senior Nights and some kind of closing activity in conjunction with tent party.

Preston Wells—I am running because I feel that there are many things left to be done for the class of '98. As the vice president this year, I experienced first-hand some of the problems that the seniors experienced and therefore have the knowledge to help guide our class in the best way possible... to the top!

Secretary—Treasurer: (Vote for 1)
Heather Murphy
Congress: (Vote for 8)
Lisa Bellofiore
Celeste Erwain

Doug Frankel—I am running for re-election to BSG Congress, because I feel that I could use my past experiences along with new ideas to continue helping improve the Bucknell environment and student body.

Nancy Panettieri
Brett Perricelli—See above.
Tracy Sakowski
Kristin Speaker
Adnaan Tapal
Raj Thangvelu—See above.
Coleen Zoller

Class of 1999:
President: (Vote for 1)

Colby Cooper—The reason I am running is to increase the productivity and involvement of the class of 1999 in the Bucknell community. As students we are facing critical issues surrounding many of our lives here at Bucknell. It is important that we are represented by someone with leadership, commitment, and integrity so that our voices are heard, and opinions considered. I feel that I am that candidate, and ask for the Class of 1999's support in this election.

Justin Jarkowski—With my current experience on BSG and my new ideas, I feel I could add to the position. I hope to publicize the actions of the class of '99, bring greater participation to our class cabinet and in general bring our class closer together.

Vice President: (Vote for 1)

Robert Brooks

Becky Frazzano—In my last year as a congress member, I have learned a lot about the runnings of BSG, its responsibilities, and contributions to Bucknell. I hope, if elected as vice president and congress member of the junior class, to use this experience to continue to represent the students by actively involving myself in BSG and addressing any concerns.

Steve Greenwood

Secretary—Treasurer: (Vote for 1)

Colby Cooper—See above.

Ryan Mastil—I feel the treasurer needs to keep an honest budget, and also one that benefits the school community.

Kevin Mehaffey

Congress: (Vote for 8)

Christine Boschen—In my last two years of involvement in BSG, I have been able to see lots of positive changes take place on campus as a result of BSG's efforts. I'd like to continue to be a part of these changes and help improve Bucknell in whatever way I can.

Vanessa Bovo
Robert Brooks
Bevin Butler

Heather Coulter—I am running because I would like to make a positive contribution to Bucknell and my classmates.

Kelly Creech—I believe that congress needs to represent the feelings of the student body. This past year I have worked hard to make a difference on topics that students have addressed as being important. I hope to be able to continue my service on congress and continue to make positive changes at Bucknell.

Becky Frazzano—See above.
Steve Greenwood
Linda Ha

Page Hall—For the past two years, I have served on BSG as a congress member, as well as a member of the Academic Affairs committee. This semester I am chair of the committee. In addition, I serve as a student representative on the Committee of Instruction. I would like to continue to serve my fellow classmates, especially as the congress reviews its effectiveness on campus. I feel that some exciting changes are taking place in BSG and that I will be able to provide good leadership for the junior class.

Justin Jarkowski—See above.

Kirk Jones—I live to be a leader and I want to take our class as far as we can go— then a step forward!

Dave Ledgerwood—I am a new comer to the Bucknell political arena. Should I be elected, I plan to involve myself in such student concerns as diversity and such academic concerns as the problems that are already arising with the new BANNER system of class schedules. I would also like to be involved in the development of the new alcohol policy on campus. Finally, I would like to address such issues as recycling on campus and the development of computing and internet resources for Bucknell.

Blakely Lowry—Having been on Congress this semester, I want to remain an active member of the Bucknell community.

Kevin Mehaffey
Jon Morocco
Jessica Romm

Holly Stuart—I am interested in representing our class in anything they feel is especially important or in anything that they would like to see changed at Bucknell. I am here to represent my classmates.

Class of 2000:
President: (Vote for 1)

Jessica Jackley—I am running for re-election as President of the Class of 2000. I love Bucknell and I am proud to be a member of our class, and I would be very happy and grateful to have the chance to use the momentum and experience I've gained already to fill this position again. I will continue to improve the job I am doing, to find ways to do even bigger and better things together as a unified group of students, and to make sure that, as a whole, our wants and needs here are as fulfilled as I possibly can make them. Thank you!

Mustafa Ostrander

Vice President: (Vote for 1)

Gbenga Akinnagbe

Chris Caldwell—I have only served on BSG for a short period of time, but in that time I have learned much about what goes on in BSG to help out the student body and think I could be of good use as a student representative. Also I have been working with some other people on BSG to help publicize the efforts that are being made by BSG so students can see what is being done.

Matthew Johnson

Supriya Joshi—I served as a member of class congress this past year, and would like to continue to represent our class. I have and will continue to be hard-working, enthusiastic, and dedicated to serving the Class of 2000 in any way that I can.

Secretary—Treasurer: (Vote for 1)

Winnie Clark

Lara Coleman—I believe that it is important for our class to have a responsible and experienced individual in the leadership position of secretary/treasurer. Another quality that is necessary is the ability to work well with others, to contribute ideas and listen to those of others. From my experience as both a Congress member and as the previous Secretary/Treasurer, I feel that I possess these qualities and I will continue to work hard and do my best if re-elected.

Samantha Jackson—Before you vote, think about how the communication has been for the class thus far and think about how you want that to change. I know that many of you have ideas that you approached me on and I will do all I can to fulfill these goals. I believe *you* are the most important part of the class. I know that many of you have been frustrated with BSG. I want you, however, to be a watchdog on my year and make sure I achieve my goals. I hope that the class of 2000 will allow me this opportunity to give back something I believe in. As well, thank you to those who have supported my campaign—it has meant so much!

Congress: (Vote for 8)

Gbenga Akinnagbe
Chris Caldwell—See above.
Winnie Clark
Lara Coleman—See above.

Barry Cunningham—I am up for re-election in BSG. I currently serve on the multicultural committee. I believe it is important for students to have responsible and active representatives in congress in order to make sure that their views are heard. Responsibility combined with experience allow me to better serve my classmates and the entire student body.

Eileen Freytag—I'd like to take this time to introduce myself if I haven't already made your acquaintance. I'm Eileen Freytag and in the class of 2000. Now that I've figured out time management, it's time to take that active role for our class. I'm looking forward to serving as a representative to BSG and will be available for questions and concerns.

Erin Healy—I am currently a member of BSG, and work with Social Service Committee. I look forward to representing our class and helping the community again next year if elected.

Jessica Jackley—See above.
Samantha Jackson—See above.
Matthew Johnson
Supriya Joshi—See above.

Jennifer Klein—As a member of the Class of 2000, I am sincerely interested in becoming a Congressional member of the Bucknell Student government. I will utilize my knowledge and experience to represent and serve the needs of the student body as a member of congress.

Michelle Laryea
Megan Leaderer
Mustafa Ostrander

Anne Putnam—Last year I worked on many things in BSG, notably Fiscal Affairs and the Sesquicentennial Committee. On Fiscal Affairs, I organized an inventory system for campus groups' equipment and materials. I also solicited and arranged the Birthday Celebration raffle for the Sesquicentennial Committee. I am enthusiastic to be a candidate, and eager to represent the Class of 2000.

Keith Scarfo—I am running for a Congressional position because I would like to continue working with BSG. I enjoyed the work I did with the social service committee and would like to help out again next year for the Class of 2000.

Hugh Tigger—I would like to be on Congress next year because I enjoyed the experience I had serving it on last year. As a member of the Academic Affairs Committees we made proposals for course and teacher evaluations. For the Curriculum Committee, we just finished reviewing the Common Learning Agenda, and for the Elections Board we elected the Community Judicial Board. I feel that it has been a rewarding experience and look forward to the opportunity to do it again next year if I'm re-elected.

Ben Wullschlager

University maintains off-campus numbers

Effective approval process is key to Community relations, Cullen explains

BY MELISSA ROVERTS

Four hundred and twenty students were granted permission to live off campus for 1997-98, which is the same number that received approval for the current school year, according to Leslie Cullen, the off-campus living coordinator. Five hundred and twenty students applied overall, although some withdrew their requests.

Even though figures have somewhat declined in recent years, the University expects to maintain this number in the near future. Cullen noted that three or four years ago, the number was 465 and for 1995-96, it was 430.

Cullen explained the rationale behind the decreasing number of students permitted to live off-campus. In the 1980s, the number of students living downtown was very high and led to a great deal of complaints by the local community. In recent years, the University has sought to improve this relationship.

Cullen believes that there is now open communication between the University and Lewisburg residents and that the University is a "good listener." In fact, the figures are expected to remain steady because the method of containing the numbers and denying privileges to students with disciplinary problems has been effective. Cullen believes that, for this reason, it has been a "quiet year" with few off-campus incidents.

Cullen also explained the approval process. Timeliness is a very important factor; applications are accepted on a rolling basis and there are currently 26 (of the original 520 applicants) on a waiting list. Cullen explained that before granting approval, she had to review each student's record of disciplinary incidents for the current school year. Students who have had problems are then brought before the Off-Campus Living Review Board to determine eligibility. Although some positions are subject to change, the review board currently consists of: Teresa Amott, faculty representative; Kari Conrad, director of housing and residential life; Michelle French, Lewisburg Borough Council Appointee; and two students, Matt Moyer '97, chair of Committee of Complimentary Activities and Sean Galligan '98, chair of Student Life Committee.

History resurfaces on *Titantic* anniversary

Emma Bucknell, wife of the University's namesake, survived the disaster 85 years ago

BY KATHRYN ARDINGER
Bucknellian Staff Writer

Tuesday marked the 85th anniversary of the sinking of the Titanic, perhaps the most tragic shipwreck in history. One of the approximately 866 survivors of the shipwreck was the third wife of the University's namesake, William Bucknell.

Mrs. Emma Ward Bucknell was 60 years old when aboard the ill-fated Titanic and was said to be returning from a journey to Italy where her daughter, Margaret, the Countess of Pecorini lived.

Married to William Bucknell in 1873 at the age of 18, Emma was 44 years her husband's junior.

According to an obituary published shortly after her death on June 28, 1927, "Mrs. Bucknell never recovered fully from the exposure she suffered when the Titanic sank in 1912. She was aboard the liner returning from a visit with her daughter, Countess Pecorini at Rome and was one of the survivors picked up by the Carpathia. It is believed her experiences at that time were contributing causes to her death."

Mr. and Mrs. William Bucknell had four children, Dr. Howard Bucknell, the Countess, Mrs. J. Gould Day and Mrs. Samuel Price Wetherill, Jr.

Mrs. Bucknell has been mentioned in a documentary on the Titanic, as well as in a few publications about the infamous shipwreck. For instance, she was depicted as a friend of the "unsinkable" Molly Brown (Mrs. J.J. Brown) in an ABC television movie entitled the "SOS Titanic" televised on Sept. 23, 1979.

The Truth about the Titanic, a publication by Colonel Archibald Gracie in 1913 makes mention of Mrs. Bucknell, as Gracie recounts the story of the shipwreck as it was told to him by Mrs. J.J. Brown of Denver, Colorado.

Evidently, Mrs. Bucknell had "feared boarding the ship [The Titanic] because she had evil forebodings that something might happen." Both Mrs. Bucknell and Mrs. Brown were rescued in lifeboat number six.

There are also two references to Mrs. Bucknell in *Maiden Voyage*, a book about the Titanic by Geoffrey Marcus, published in 1969.

Campus Briefs

Bucknell Graduate Running for New Jersey Governor

United States Congressman Robert Andrews '79 announced last week that he will run for governor in New Jersey.

If Andrews wins the Democratic primary election in June, he will run against incumbent Republican governor, Christine Todd Whitman, in November.

Among the many issues Andrews, a four-term House member, is advocating are smaller classrooms in grade schools, an expansion of pre-school programs, and a re-prioritizing of New Jersey's annual revenues of about $20 billion.

Reinventing the American Dream

Tonight the University will hold one of over two dozen national forums, called "The American Dream... Reinvent It!", in honor of the first National Deliberation Day, a day devoted to reinventing the American Dream for Generation "X."

According to Pamela Brennan, a member of the national Foundation for Individual Responsibility and Social Trust which is sponsoring the forum along with the University's Leadership Education and Developing group, "This isn't a gripe session... It's about showing that we're not 'slackers' and that we can make a difference!"

The results of these discussions will be presented to President Clinton, George Bush, Nancy Reagan and Colin Powell during the Volunteerism Summit in Philadelphia from April 27-29.

The University's forum, open to young adults ages 18-35, will be held in Wall's Lounge in the Langone Center at 7 p.m.

Bucknell Graduate Awarded Rosebush Professorship

Susan H. McFadden '70, a professor of psychology at the University of Wisconsin-Oshkosh, has been named the University's 1997 John McNaughton Rosebush Professor.

McFadden joins 32 UW-Oshkosh faculty members who have been named Rosebush Professors since 1980. The Rosebush is one of the University's most coveted awards.

McFadden has published 20 articles, co-authored the book, *The Role of Emotions in Social and Personality Development,* and co-edited a book on emotions and another on religion, spirituality and aging.

SWARTZ

From Page A1

that this system will function well because Swartz Hall has four separate wings. Each wing could then function as a house.

Arcelus divided his proposal into three steps. The first step toward creating the housing system would be to give each house an identity by naming it. Arcelus stressed that "this is still Swartz Hall, we are simply naming the living units" within the building.

The second step would be to restructure the Residence Hall Association within Swartz. Presently Swartz votes for a secretary, treasurer, vice president of campus, vice president of Swartz and president. Next year each house will vote for its own president, and all of Swartz will vote for a chairperson. The remaining duties will then be divided up among the presidents of the houses at the first RHA meeting. In addition each hall will have two representatives.

Arcelus stated that the reasoning behind the new system is "to empower the students and to split Swartz into four smaller parts where RHA might function more effectively as a whole."

The final step is to bring together the RA staff and RHA representative. Once or twice a month the RHA executive board, which includes the four presidents and the Chairperson, will come to the RA meetings. Arcelus said that members can then "breakdown into houses where they can address any concerns and focus on community building."

Arcelus further added, "This is the key: to bring the leaders of the building together to better represent their residents."

From the perspective of an RA, the house system, "will allow RAs from each house to work together in devising hall programs, hopefully making it more effective," Stetts said. She further added that "this will make the relationship between floors, halls and staff members much closer."

In the long run, the house system is "to empower the students, to get more students involved, and to take ownership of their living environment and the types of activities that they would like to take part in," Arcelus said.

WORDS

From Page A1

and was being compensated at a rate that was excessive for the kind of work performed—or was supposed to have performed—for the NHSCA."

Ferraro claims that the reason he was "seldom present" was that much of his work "was research at the library and computer work [in addition to] a lot of work compiling mailing lists and stuffing envelopes," and thus would not be in the actual office often.

A further dispute is whether the NCAA approved this internship. Ferraro claims that he, Garcia and Hartzell received a signed letter of approval from the NCAA regarding the internship, while Hartzell insists that he "never received the copy. I had no knowledge of the internship [at the time]."

As to the other violations discovered by the inquiry, Ferraro was found guilty of providing free room and board to Garcia, as well as gifts during the time of recruitment. In addition, there is the charge that Garcia did paid work for Bob Ferraro Jr., painting his house the summer he entered Bucknell, thus constituting an "extra benefit." Also, the memo claims that the "painting work was done in conjunction with renovations to prepare the building to house the NHSCA's office... [and] that the money used to pay Garcia came indirectly from [Ferraro]."

Ferraro's contention is that Garcia was dating his youngest daughter at the time, and these were simple family dinners and gifts that were exchanged during Christmas and birthdays, thus not constituting a violation.

Hartzell responded by saying that although their dating might be true, "it is still an illegal recruiting advantage" and therefore in violation of NCAA bylaws.

Finally, the University contends that Ferraro "violated bylaw 10.1 by knowingly furnishing false or misleading information concerning [these] matters."

Again, this is a charge that Ferraro vehemently denies.

8 p.m.—Junior Recital, Melissa Wharton, soprano, and Elisabeth Stevens, soprano, Bucknell Hall

EDITORIAL

The Bucknellian examines campus role

Because of recent events, *The Bucknellian* staff has had reason to examine and clarify what it believes to be the newspaper's role on campus.

It may seem to be a straightforward or trivial question to some. However, it's not as easy as it seems. The controversial nature of journalistic principles, which is especially cloudy for a college newspaper, makes it a difficult question to answer.

After a lengthy discussion, *The Bucknellian* staff arrived at the following conclusions:

Our job is not to be a public relations vehicle for the University. As with any newspaper, *The Bucknellian*'s function is to disseminate information, whether or not the University comes out smelling like roses.

We may be collegiate, but we are still a newspaper. Out of all the grave issues facing a newly-established nation, the country's founding members thought our right to freedom of speech so important that they ascertained this right in the First Amendment.

The Bucknellian realizes that with the freedom of the press comes certain responsibilities, which we take very seriously. We strive to be fair in our coverage and to present the issues as objectively as we can. We would never intentionally abuse our power and spread falsified or slanderous rumors. We must give our readership the facts. If we do not, our journalistic integrity is at stake.

We may be a part of the University, but we have no obligation to keep certain facts from our readership simply because the University feels we should. In fact, *The Bucknellian's* obligation falls in direct contrast with this withholding of information. As mentioned before, we have a responsibility to relay the facts to the community.

As a student newspaper, the administration should be here to serve us, not the other way around. It should be willing to share with us any information about the University, because it is our University. We're paying well beyond $20,000 a year for an education. The student newspaper is an extension of this education.

An education not only involves the assessment of information, but it also includes learning by doing. While there is a certain risk in having an autonomous newspaper, the same could be said of everything at the University. The University should be proud that its students have the opportunity to gain valuable hands-on experience. MG101 is heralded for the same realistic simulation of running a company. *The Bucknellian* should be treated no differently.

LETTERS

Bucknell bureaucracy indifferent about students' concerns

TO THE EDITOR:

An Open Letter To The "Powers That Be" at Bucknell University:

I graduated in December of this year with a major in elementary education, a minor in sociology and a 3.9 GPA. I have volunteered countless hours in organizations and schools in this area, including Head Start, local elementary schools and after-school programs. I am currently the director for an after-school program in Turbotville where I am responsible for children ranging in ages from six to 11. I am extremely interested in art, photography and sports.

This is how my cover letter starts, but believe me, this is not a cover letter. It is a letter that I have been waiting to write for a few months now, but have just recently been able to compose myself enough to write it. To put it bluntly, I am truly disgusted with this university.

I transferred here after spending one year at New York University—where my father has taught for nearly 30 years. I attended NYU for free and truly loved the academic aspects of the school. Unfortunately, though, the fast-paced, and often impersonal atmosphere of New York City and the bureaucracy at NYU wasn't for me. I decided I would be much happier at Bucknell. I was right. I found wonderful friends in a beautiful setting in Central Pennsylvania. Fortunately, my extremely supportive parents didn't mind shelling out the approximately $25,000 for me to come here; my happiness was more important than money, they assured me. To help defray the costs a little bit, and to get a head start on the job hunting process, I decided to take a course each summer at NYU (a total of three courses) that would allow me to graduate a semester early. I never knew that such a decision would have such grave impacts upon me.

I discovered in late fall of 1996 that although I had a 3.9 GPA, the highest recognition I could get at graduation would be cum laude, (indicative of a 3.5 GPA) rather than summa cum laude (indicative of a 3.9 GPA) because of the number of course credits that I had at Bucknell. I have earned 23 credits while at Bucknell. In order to graduate summa cum laude one needs to have 24 credits. The credits I earned while at NYU do not count towards this distinction. Dean Pyper explained to me that the reason the credits from NYU could not be counted was: what would happen when someone from East Nevada State (a fictional institution) would ask for the same consideration? I wondered why Bucknell—such a fine institution would accept someone from there at all! Learning all this was a great disappointment, but in the broad scheme of things, I knew I could live with it. What instantly ran through my mind was: with the hundreds of hours of volunteer service that I have had is there no way this one credit can be waved? Well, rules are rules, I told myself. I was disappointed with this, but my disappointment did not stop there.

Shortly after writing a letter to President Adams telling him my tale of woe, my mother received a letter from Dr. Adams that contained quotes from the catalogue page on which the "distinction" rule was made. Not once did he make a point of congratulating me for my achievements. In his closing sentence, he assured my mother that he hoped that I would attend graduation and receive my degree *cum laude* (his italics.) The letter was so insulting and impersonal that my mother tore it up. She was disgusted.

OK, so I discovered that there was as much bureaucracy at Bucknell, if not more, than NYU (an institution with tens of thousands of students.) I also learned that pettiness and small people (and I'm not talking physical measurements) are everywhere. My discoveries didn't stop there; I just recently learned that I am out of the running for Phi Beta Kappa—the national honor society. Why? In order for one to be considered for this society at Bucknell, one has to have at least 20 Liberal Arts credits. Yes, I do have that. Oh, but EDUCATION COURSES DON'T COUNT TOWARD LIBERAL ARTS CREDITS, and neither do transfer credits. This is comparable to saying, yes, education classes are a big fat joke, since they do not count toward this distinction. Education majors, and education professors should be outraged. To take a page from President Adams' book, on page 129 of the course catalogue, it says, "Phi Beta Kappa members are elected from the upper eighth of the junior class and upper fifth of the senior class." Instead it should say, "Phi Beta Kappa members are elected from the upper... but if you are an education major you better just forget about it, because your hard work doesn't really count, nor does your desire to serve in one of the most socially important roles in our society, because you are not the same caliber as the other majors at this school."

I originally thought after all of these pleasant experiences that I would not attend graduation, but I do not like cutting off my nose to spite my face. After my parents have supported me during my 21 plus years, I do think they deserve to see me walk down the aisle to receive that little piece of paper from those little people. Please forgive me, though, for not shaking any hands of the "powers that be." I would feel like a hypocrite if I did. I earned my distinctions. Whether a few people choose to recognize that or not is inconsequential to me. This letter is to merely inform the masses of the small injustices that I feel have taken place.

Sure, I will never have the financial resources to become a trustee of this university, nor be able to donate large amounts of money to Bucknell. From an economic standpoint, I am a nobody. I am planning to follow in the traditions of my family and be a teacher, something that I am very excited about and something for which I feel the benefits are far more rewarding than any monetary sum. My mother, a high school teacher, has already discouraged a number of students from attending Bucknell due to the unpleasant experiences I have had here with the administration. I make sure I tell everyone who asks what happened to me. As a teacher, I feel that I have the responsibility to stop injustices and teach others to so the same. I will always think of my years at Bucknell as extremely happy ones, but I will not forget how petty some people can be and that all rules and regulations need to be reevaluated and changed when the need arises. Call me crazy, but it just doesn't make sense to punish those who seem to deserve rewards or at least some recognition for their accomplishments. The time for change is long overdue in my eyes.

Wrestling coach wronged in inquiry

TO THE EDITOR:

Isn't it just like the weak to point out where the strong seemingly stumbled? The dismissal of Bob Ferraro as Head Wrestling Coach at Bucknell University is an embarrassment to Darwin and his principle of survival. There is no question, there are very few individuals whom I've met over the years that can match Bob's achievements, levels of energy or the extent of his caring for students.

If Coach Ferraro was guilty of anything remotely deserving these most drastic actions, the University administration would have just suspended him with pay pending an investigation. In that way, when the facts of his wrongdoing came out, the administration would look like a caring employer doing everything they could do to preserve the rights of the individual before they were forced to let him go. However, that was not the case here. Instead, as is often the case, when the facts and the spines of decision-makers are weak, draconian measures become the norm.

Unfortunately for the University, Bob's dismissal will hurt the school more than it will the Ferraro family, because the hotter the fire you put winners through, the stronger their humanistic metal becomes. Champions are not only capable, but thrive on turning adversity into triumph.

As for the school and the notoriety Coach Ferraro has brought them, during his tenure:

- He is the sole individual responsible for the creation of the highly successful National Wrestling Coaches Association's Annual Convention.
- He is the organizer of the National High School Wrestling Championships, the largest tournament of its kind in America.
- He is the architect, past president and current executive director of the National High School Coaches' Association.
- Coach Ferraro is the number one recruiter of minority student-athletes at the University. Given Bucknell's current student ratios, this should alarm everyone.
- He has consistently produced a winning team without scholarships against a schedule chock-full of scholarship programs.
- He is the author of the University's faculty assistant coaching program.
- He is the mastermind behind the athletic Hall of Achievement program which annually brings in thousands upon of dollars to the University.
- He annually raises more money through his wrestling booster club than does football, or any other sport at the University for that matter.
- His wrestling program regularly finishes in the top twenty academically out of all the other Division I institutions nationally.

The problem seems to be that anyone who moves quickly along the achievement highway causes friction. Doers can't help it, Bob can't help it, it's a byproduct of motion and a law of science. Unfortunately, it appears this friction has grated the egos of some administrators who are envious of Bob's success and the notoriety he brings to campus.

In closing, there is little doubt that time will favor Coach Ferraro and indict the actions of those cold and timid University officials who have neither tasted victory nor defeat.

Sincerely,
Wade Schalles
Distinguished Member
National Wrestling Hall of Fame

Greek system beneficial, but unappreciated

BY BRIAN WALSH
Bucknellian Staff Columnist

While the recent policy change regarding Tent Party may be a sign of things to come in the realm of social life at Bucknell, there is a much more alarming social trend that has not only been taken to heart by outspoken and uninformed egalitarians on this campus, but throughout the entire nation as well. This has to do with the increasingly popular labeling of the Greek system as an institution based on elitism, alcohol consumption, sexual harassment, or whatever abusive attacks can be contrived by our moral leaders in the politically-correct movement. Across the country, students are beings deprived of their First Amendment "freedom of association" by college administrators and faculty who not only view the Greek system as antithetical to the goals of a university experience, but in fact view themselves as the guardians of equality, opportunity and general educational virtue.

Although the attempt put forth several years ago by the faculty to eliminate the Greek system at Bucknell was ultimately blocked by the Board of Trustees, the disdain and disrespect with which many on this campus hold for Greeks is completely evident in their original actions. The ultimate failure of this frontal assault has led these individuals to look for new ways in which to debase and ultimately eliminate a system that has contributed more socially and philanthropically over the years than any other organization at Bucknell. While at times this dictatorial attitude is disguised as a plea for social parity, a call for academic excellence, or an imploration for alcohol awareness, it is more often an outright attack based on nothing more than distorted stereotypes, exaggerated facts, and opprobrious statements.

Inappropriate, yet singular actions by individuals who happen to be members of the Greek community, coupled with the false images of an Animal House community have provided the fodder that these individuals use to demonize the system. To be sure, there are instances in which rules set down by the Interfraternity Council are broken by houses, however, the infractions of illegal parties and occasional underage drinking do not even remotely approach the mythical reports of sexual harassment and abusive hazing. In fact, the minor problems related to fraternity houses are no different than those that occur in residence halls and downtown apartments every weekend. Unfortunately, in spite of the enormous steps that the Greek system has implemented to limit potential problems, it continues to be a target of attack on an entirely separate level.

This has caused me to wonder over the past four years, if those members of the faculty and independent community who have partaken in this mudslinging have even the slightest idea of the amount of community service that every fraternity and sorority partakes in, to say nothing of the leadership skills and strong interpersonal relations that are fostered within each organization. Dozens of events are planned and carried out each semester by Greek organizations that not only serve as the primary public relations bridge between the Town of Lewisburg and the entire Bucknell community, but also result in the financial contributions of thousands of dollars to a multitude of needy groups and foundations.

The sad irony though is that while members of both communities automatically look to the Greeks when there is money to be raised or service to be done, these same individuals are the first to condemn them when there is even the slightest hint of wrongdoing. Unlike virtually every other organization at Bucknell, including those based entirely on community service, Greek organizations are supported solely on the dues of their members and receive no financial support from the University. More often than not, however, the administration's response to the charitable acts of this self-supporting community has been increased regulation and condemnation. When successful philanthropic events are held such as Sig Derby Days, the University gives more credence to the baseless claims of the Woman's Resource Center rather than focusing on the charitable contributions that will emerge from this voluntary event. The sad result has been that over the past several years, the story has not been the successful fundraising of Sigma Chi but how through their willing participation, women are being exploited. This is a nonsensical issue that has been taken to absurd lengths by individuals who place more emphasis on what is politically-correct rather than on what is truly correct.

At no point in the last two hundred years have Greeks been under a more intense attack from such a hypocritical opponent. The forces of purported righteousness have aligned themselves against a system that has accomplished more than its antagonists can ever hope for. If the system is to remain strong though, Greeks must not allow acts of individual perversion to speak in place of the innumerable acts of good will that each organization carries out. Fortunately, the administration has made a move in the right direction by hiring an individual such as Dean Baker who, in the brief time that he has been here, has shown himself to a be a strong advocate for the Greek system. Therefore, it is up to each member of this community to work with him to ensure that the Greek system will continue to grow each year and ultimately win over those who currently oppose them.

Cults, recent California mass suicide produced by larger problems within society that cause spiritual "voids"

BY NICOLE MAESTRI
Bucknellian Staff Columnist

I remember writing to my French penpal, Stéphanie, over two years ago and telling her I had joined a sorority. I guess my explanation of the Greek System was not to clear because she wrote back to me and warned me to be wary of cults and asking if had I heard to the mass suicide that had recently taken place in a cult in Switzerland.

After laughing at myself for my obviously horrible explanation of a sorority and at the thought of what was racing through Stéphanie's mind, I went to the library to xerox a page out of an encyclopedia and sent her a copy of a real definition of a sorority. Whatever the encyclopedia said had to be better than what I'd written.

But, all of this miscommunication aside, whenever the word cult arises, it automatically ignites a reaction of fear and a sense of urgency. Cults are horrible; they brain wash their members; their leaders are all frauds who are just trying to get rich quick; they all end with tragic mass murder-suicides.

Heaven's Gate is a perfect example of this cult hysteria. Cult leader Marshall Applewhite's new recruits packed up their belongings to join Heaven's Gate, leaving sons, daughters, husbands and wives behind. Members began to cut their hair in similar styles and dress alike, as they became more and more entrenched in Applewhite's teachings. Following the tradition of other infamous cults, the 39 members committed suicide. In the end, they gave everything they had, including their lives, to their leader.

Full coverage of the Heaven's Gate suicides was found in the media. Newspapers were filled with glaring headlines of the deaths, the evening news replayed clips of Applewhite's sermons, photographs were run showing the bodies lying peacefully still on their deathbeds. In a sick way, the public was relieved that Applewhite was so scary looking —his unrelenting stare and his eerie melodic drone fit the perfect image of a psychotic cult leader. It was no wonder his followers committed suicide, they had easily fallen under his spell.

But, Applewhite isn't completely to blame for his followers' deaths. The sad truth is that cults are fulfilling a void that is missing in their members' lives. Cults do not kidnap their members, rather they draw them in with their preaching and their philosophies.

Granted, people who join cults are usually pulled in deeper than they would have ever bargained for, but they were drawn in initially because something in there lives was missing.

It was obvious that Applewhite practiced what he preached— he too killed himself in the same fashion as his dutiful followers. Once Applewhite had his revelation and saw his vision, he wanted to share it with others so they could fill their void and sense of isolation in the world. Maybe it will be here, in this group of wayward wanderers and social outcasts, that they will find the niche our society never created for them. Granted, people who join cults are usually pulled in deeper than they would have ever bargained for, but they were drawn in initially because something in their lives was missing. If these people felt complete, they would not have felt a need to follow Applewhite.

This past Sunday, 35,000 people flocked to Sarajevo to attend a papal mass. Many of these attendees traveled overnight from Croatia and parts of Bosnia to witness this amazing event. They would not have come if something did not call them to make the pilgrimage. The Pope preached a message of forgiveness and a message of tolerance to the crowd asking, "Has not that time now come?"

We are all looking to fill our voids, to maybe have our own life changing revelations and find a vision. The reasons cults cause hysteria is because they represent the extreme. With the same ease that the Pope can draw a crowd of 35,000 in a winter storm, cults can draw their followers if their message is right.

"Has not that time now come?" the Pope asked the crowd, referring to a time of peace to end the violence that has racked Sarajevo and its peoples. But has the time not also come to address the violence that racks each and everyone of us, in our effort to a place in the world? Cults are not solely the product of psychotic leaders, intent on preying on innocent victims. Rather they are the product of a society that has failed to offer its members the security and acceptance they deserve as individuals and a vision that can be fulfilled.

University's attempts to censure student voices Unconstitutional, violation of First Amendment

BY AMY YOUNGGREN
Bucknellian Staff Columnist

With the conclusion of Sigma Chi Derby Days, it became obvious to me that many people were upset with the changes in policy that were made this year. As many of my friends and I attended Sig Derby activities last week, we were ask to sign a petition which required that 20 percent of the participants at Sig Derby activities needed to be male in order for that particular activity to remain part of the weeks events.

Almost all of the people attending these activities signed the petition against 20 percent male participation. Sig Derby has always been a success and has remained one of Bucknell's largest traditions, especially for the Greek community at Bucknell. Therefore, most of the students and especially sorority members did not find it necessary for there to be mandatory male participation.

It was quite obvious during the week at many of these events that the main and greatest turnout of participants were females and the greatest amount of participation came from the sororities. Although Sig Derby has always been open to everyone's participation, it was even encouraged more this year that fraternities and other organizations participate. It just holds true that the tradition is already in place and that it will do nothing but hurt the philanthropy of Sigma Chi to place more restrictions on the week.

It was also a nuisance to many of the participants that the routines for the lip sync on Saturday afternoon had to be video taped and previously screened. It was actually kind of insulting that the administration did not trust us as adults to create and perform an upstanding lip sync number for competition. The reason that this restriction was placed upon the groups was because of the provocative numbers from sororities in the past. However, we are all grown adults at this university and should be able to exhibit each and every one of our First Amendment rights during this competition.

This brings up another point. Why is it that the administration and faculty can put limits and restrictions on the kind of performances that are displayed at Sig Derby lip sync? This is really the same violation of our First Amendment rights as it would be if someone were to tell us what could be published in all of our on campus newspapers and publications. This would definitely not go over well with the student body here at the University, because it is not OK for anyone to be defining what we can or cannot say and do.

It was actually kind of insulting that the administration did not trust us as adults

I understand the problems that many people have had with the lip sync routines in previous years, these are all valid complaints. However, although Bucknell is a private institution, it is still not within the authority of the administration to take away the First Amendment rights of its students.

Most importantly, I think it should be noted and remembered that this is all for a good cause. Everything that goes on during Sig Derby Days is to benefit a local cause in our surrounding community. It is most important, and I would think the administration would agree, that all of our students, and especially our Greek community, be invested and involved in the welfare of the surrounding community of where we go to school. This should be the main issue. I believe that by getting caught up in the minor restrictions and formalities of a fun event like Sig Derby, takes away from its initial intent. Lets keep things in perspective!

Next week:

Men's Lacrosse vs. Lafayette

Baseball vs. Holy Cross

BUCKNELL UNIVERSITY

SPORTS THURSDAY

Athlete of the week:

Bison dominate at home track Invitational

Brian Schiding '00 takes home two victories; women set three school records

BY CHRIS ELLIS

Bucknellian Staff Writer

The weather wasn't exactly perfect, the conditions weren't exactly ideal and the competition wasn't exactly top-notch, but last week's Bucknell track-and-field invitational served a larger purpose for head coach Art Gulden and the Bison—it provided a springboard to the Patriot League Championships in three weeks.

In last Saturday's rain-soaked meet, both the men's and women's teams scored impressive team victories. The men earned 225 points to win their six-school meet, holding off second-place Cornell (166 points) and Towson State (81). The women breezed to a victory over six teams, winning 255 points, outdistancing second-place Cornell by nearly 100 points. The win exacted a measure of revenge for the two teams, as both fell to the Red Raiders in an indoor meet held earlier in the year.

"This was a much better performance than when we went up there in the winter," Gulden said. "We were ready to beat them this time."

The men's team was led by Brian Schiding '00, whose long jump of 23 feet, 2 inches won the competition by more than two feet over second-place Darrione Hall of Canisus. Schiding also eked out a victory over to Syracuse jumpers in the triple jump. In addition, he also ran the leadoff leg for the men's 400-meter relay team which finished second.

"We try to get him involved in multiple events regularly, something that's hard for a freshman to do," Gulden said. "I've tried to do things like that in the past, and at times, it's backfired on me. As long as he continues to show he's ready, though, we'll continue to put him in tough situations."

Steve Williamson was also a multiple-event winner for the Bison, earning a solo victory in the 400-meters before running the second leg of the victorious 4x400-meter relay team. Mike Ditzel '98, Brian Cagno '97 and Brett Warner '97, the other three legs of the 4x400 team, rounded out the top four places in the individual 400-meter race.

Brian Torres '98 recorded another impressive showing in the 800-meter run, finishing the damp course in 1:54.62 to post a one-second victory over Cornell's Trent Stellingwer-

see TRACK, page A9

Baseball continues fight for playoff berth

BY JEFF CAMPAGNA

Bucknellian Staff Writer

Jonah Half—The Bucknellian

The men's baseball team split a doubleheader against Lehigh this week to hold on to third place in the Patriot League. The Bison stand at 16-16-1 overall and 7-5 in the league.

With two more four-game division series left to play, the Bison baseball team remains in third place in the Patriot League, still jockeying for one of three playoff spots.

Bucknell (16-16-1 overall) did not pick up any ground this past weekend, going 2-2 Saturday and Sunday against a weaker Lafayette squad. Navy (8-2) and Army (9-3) remain atop of the Patriot League, in front of the 7-5 Bison. Bucknell looks to strengthen its position this weekend, when the team travels to Worcester to play four games with the occupants of the league basement, Holy Cross.

In out-of-league action, Bucknell split a doubleheader with St. Bonaventure last Wednesday, blasting the Bonnies 16-4 in the opener, and then dropping a close one at 7-6. Ed Soley '00 started and picked up the win for the Bison, despite giving up four runs over four innings. Doug Hoffman '97 finished off the effort, shutting out St. Bonaventure the rest of the way. The Bison sticks were booming right off the bat, as they picked up 10 runs in the first two innings. Second baseman Dave Apollon '98 had a busy day, knocking a homer and stealing two bases while driving in two runs and scoring three.

After all of that offense, things calmed down at the start of the second game. St. Bonaventure took a 2-1 lead into the bottom of the fifth, only to have it spoiled by a five-run rally by the Bison. But the Bonnies did not die, tagging relievers Matt Potalivo '00 and Mike Anders '98 for five runs over the final two frames, to pull out a 7-6 victory. DH Erich Muzi '99 turned in a fine performance, going 3-5 with a triple, a stolen base, and an RBI.

Muzi continued to hit with authority Saturday against Lafayette, once again pounding out three hits. Anders turned in a masterful performance, scattering three hits over seven innings to pick up his fourth win of the season, 9-1. The Bison did most of their damage late, scoring two runs in the fourth and fifth innings, and then pushing across four runs in the sixth. Apollon jacked his fifth homer of the year, a solo shot, in the sixth, while SS Joe D'Orazio '98 hammered a two-run blast in the fourth. Unfortunately for Bucknell, the second game was postponed until Sunday due to inclement weather, which resulted in a rather uncommon occurrence of a tripleheader.

McIlvain, women's lacrosse upset Lehigh

Jonah Half—The Bucknellian

The women's lacrosse team improved to 2-1 in the Patriot League.

BY HALEY FUTTERKNECHT

Bucknellian Staff Writer

Bucknell women's lacrosse proved that the beginning of its season was no fluke as the team picked up two back-to-back wins this past weekend over Lehigh and Drexel, before the beleagured squad fell to Colgate.

The Bison scored an emotional 7-5 win against Lehigh in the rain. This first-ever win over the Mountain Hawks in 20 meetings puts Bucknell at 2-1 in the Patriot League. Lehigh previously defeated Rutgers, a team that had defeated the Bison earlier this season.

Lehigh, the defending Patriot League champion, game out confident but Bucknell's attitude was at a new level of togetherness. "Right from the beginning we got all the scrappy balls, got our checks off and picked up players in the midfield. Our attack came together allowing us to settle and gain possession," Heidi Hammes '99 commented.

Bucknell frustrated the Mountain Hawks, applying constant pressure. The Bison's previous trouble with ground balls seemed to be rectified beautifully against Lehigh.

One of the most intriguing aspect about the Bison is that there is no player that is a constant standout. Kate McIlvain '97 was the standout against Lehigh with her four-goal contribution. Amy Green '97, Coyne, and Hammes all contributed single goals to the effort. Liz Murphy '99 added an assist as Bucknell outshot Lehigh 21-14.

Bucknell's practice on its free position shots definitely showed against Lehigh. McIlvain baffled the Lehigh goalkeeper with a beautiful fake followed by a goal on an free position shot.

The defense excelled with a patience that frazzled Lehigh, making them unable to get their cutters through and their passes off. Jen Rose '97 was an obvious defensive standout as she single-handedly halted

Flash in the Pan

Master of the Game: In a feat not panelled in recent times, 21-year-old Tiger Woods became the first black man and youngest-ever player to win the Masters Golf Championship this past week in Augusta. It was Woods' first Grand Slam as a professional, and he played it in style, shattering the mark for largest victory margin in winning by 12 strokes, as well as breaking Augusta National's course record for both 72 holes and tying the mark for 54 holes. Lagging considerably behind Woods was Tom Kite, who finished at six under par. In other noteworthy Masters news, last year's champion Nick Faldo and runner-up Greg Norman both missed the cut this year at Augusta.

Honoring Robinson: All around the country this past Tuesday baseball honored the legendary Jackie Robinson's 50 year anniversary of breaking the color barrier in the Major Leagues. In a special tribute to Robinson in New York, play was stopped for 15 minutes during the Mets-Dodgers game to commemorate the occasion and announce that the number 42, Robinson's number, will be retired by every Major League team to honor the legend. Robinson played for the then-Brooklyn Dodgers and went on to win both the Rookie of the Year and MVP awards.

NHL Playoffs Set: The New Jersey Devils edged out the Philadelphia Flyers to claim the top seed in the East, and the Colorado Avalanche struggled down the stretch but still claimed the top seed in the West as the NHL playoffs began yesterday. In Eastern conference play, the Devils face the #8 Montreal Canadiens, the second-seeded Buffalo Sabres face the Ottawa Senators, the #4 Florida Panthers face the New York Rangers and, in Mario Lemieux's final playoffs, he and the Pittsburgh Penguins face off against the Flyers.

In the West, the defending Stanley Cup champion Avalanche take on the Chicago Blackhawks, the surprising Dallas Stars, seeded number two, take on the Edmonton Oilers, the third-seeded Detroit Red Wings face the St. Louis Blues and the Anaheim Mighty Ducks will take on the Phoenix Coyotes.

Blown Away: The Windy-City Chicago Cubs set a National League record Tueday against the Colorado Rockies by losing their 11th staright game to open the season. The woeful Cubs broke the record of 10 games, set by the Atlanta Braves in 1988. The Major League record is 21 games, set by the Baltimore Orioles in 1988.

Golden-Boy: In the fight for the claim to best pound-for-pound fighter in the world, Oscar De la Hoya defeated champion Pernell Whitaker in a unanimous but controversial decision. All three judges gave De la Hoya a considerable victory, but those in attendance felt that the fight was dead even, leaving many calling for a rematch.

Golf ends season at Rutgers Invitational

Josh Hartman '98 fires a one-under 70 as team finishes fifth overall at Rutgers

BY ERIC KEBER

Bucknellian Staff Writer

The Bucknell golf team concluded its spring season last Saturday with an impressive fifth-place finish at the Rutgers Invitational in Piscataway, New Jersey. Josh Hartman '98 turned in a noteworthy performance with a carrier-best one-under par 70 in the first round of competition on Friday, and eventually finished second overall for the Invitational.

The Bison finished with a total of 476 shots. The 36 hole, two-day tournament was shortened to 27 holes because of rain on Saturday.

Seton Hall won the invitational with a score of 460 followed by Princeton and St. John's both at 469. Western Kentucky finished one stoke ahead of Bucknell with a score of 475.

"We had a really good performance," co-captain Mark McGinly '97 commented. "Josh played really well. He sort of carried us through. There were 19 teams there, so anytime we come in fifth [it] is a good performance."

Hartman shot a 109 for the 27 holes played, shooting 39 on the second day of competition. "In some ways it was nice but in others it was frustrating, " Hartman said of his performance. "It was a nice way to end the season but it is little consolation for not getting into the season-ending tournaments."

Hartman's score tied him for first individually with Princeton's Ben McConahey, sending the two to a sudden death playoff. On the first hole of the playoff McConahey shot par while Hartman bogeyed to place second in the individual competition.

Todd Schneider '99 was Bucknell's second lowest scorer with 119. Eric Shortz '98 shot 123, Tony Calandra '99 shot 125 and McGinly shot 129 to complete the Bison's scoring.

The team was a little frustrated at not being selected to go to any post-season tournaments. "We did well, really well. Oddly enough we've done worse in the past and been closer to making the tournaments," Hartman stated. "This year we were just overlooked."

"We had a lot better season than people thought we were going to have," added McGinly.

McGinly, the sole senior on the squad, will be missed next season. "We lose Mark, who was one of the co-captains, but we will return six players," Hartman commented. "We hope to be getting some good recruits and Coach Thompson is really looking forward to next season."

Bucknell's Welch earns Patriot League scholar-athlete honors

Bucknell's Tom Welch '97 has been selected as the Patriot League scholar-athlete in the sport of men's basketball. Welch, a management major with a 3.8 GPA, scored a career-high 20 points in his last collegiate game, a 76-75 loss on ESPN to Navy. He was also named to the Patriot League all-conference tournament team along with teammate J.R. Holden. On the season, Welch started 26 of 28 games, averaging 7.6 points and 4.2 rebounds to help Bucknell to an 18-11 record. He was also a tri-captain for the Bison. Off the court, Welch was named to the GTE/CoSIDA District II Academic All-American squad. He is also an active member of Bucknell's NCAA Student-Athelte Advisory Committee.

Bucknell runners (from left) Brian Herf '99, Jason Trollope '99 and Dave Bofenbrenner 'challenged the steeplechase at Saturday's Bucknell invitational.

Jared Silliker—The Bucknellian

Brian Schiding '00 won the long jump and triple jump at this week's Bucknell invitational.

TRACK

from page A8

ff.

"Brian's getting ready to run really fast," Gulden said. "He just needs some more competition to really push him over the top."

Bison men were also winners in three other events. Ron Hess '00 (1500m), Brian Volpicelli '98 (discus), and the 4x800m relay team all enjoyed first-place finishes.

On the women's side, the Bison throwers once again outclassed all comers. The women earned three of the top five places in the shot-put, four of five in the discus, and all five positions in the hammer throw. Senior Lisa Allen's hammer throw of 157 feet, six inches broke the existing school record in that event. Joylyn Brown '98 (150 feet, one-half inch) also broke the previous hammer throw record.

"We run very deep in those kinds of events," Gulden said. "we can just point you with numbers, and the points pile up quickly."

Tria Tyler '99 added to the throwers' successful afternoon by winning the shot put event. A Bucknell woman has won the shot put in every meet the Bison have entered this season.

Two other school records toppled in the women's meet. Sophomore Julie Sweitzer's time of 4:37.09 in the 1500-meter run was good enough to beat Cornell's Miranda Kaye by nearly eight seconds, and sophomore Pamela Richardson's 2:12.93 in the 800-meters was a new Bucknell women's record.

Kate Dei Cas '97 (long jump), Kim McGrath '00 (triple jump), Annie Hamlin '99 (3000m) and the 4x800 relay team all added to the women's victory total.

The Bison travel next to Shippensburg in what will be their only dual meet of the season. The traditionally competitive and characteristically fierce meet with Shippensburg has been dominated by Bucknell in recent seasons, but Gulden expects the meet to be yet another crucial test in preparation for the League Championships. Shippensburg runs nearly as deep as the Bison, and have improved the quality of their program in recent years.

"It's unfortunate that this meet has to be at Shippensburg this year, because it's going to be a very competitive meet," Gulden said. "We don't like them, and they don't like us. We really want to win this one."

"So he said to me, 'gunga-la-gunga,' which means upon my death bed, I'll be able to write sports, so I got that going for me, which is nice." --Write Sports and see what the dalai lama gives you

Jonah Half—The Bucknellian

Leftfielder Jen Jasionowski '97 helped the Bison to a 3-3 league record last week. Bucknell hosts a pair of doubleheaders this week.

Softball upsets Colgate; continues turnaround

BY CHRIS ELLIS

Bucknellian Staff Writer

Being handed 14 consecutive losses is a fate that no team wants handed to it. For the Bucknell softball team, though, its abysmal early-season stretch could be paying unlikely dividends. Dividends coming in the form of wins where the games really count—the league standings.

After beginning non-league play 5-18, including the 14-game losing streak, the Bison have rebounded to take five of their first eight Patriot League games, moving into a second-place tie in the league. Bucknell split a pair of games against Lafayette last weekend before sweeping a doubleheader at Colgate. The Bison lost both games of a non-league doubleheader vs. Cornell.

Again, the concentration on good defense paid dividends for Bucknell in the 3-3 week. The Bison made just seven errors in the six games, including an error-free doubleheader at Colgate.

In the first game of the doubleheader against Lafayette, pitcher Melanie Kulis '98 improved her overall record to 5-9, scattering three hits and allowing just one unearned run in the 3-1 victory. The Bison scored two unearned runs in the bottom of the sixth to break a 1-1 tie.

The Leopards, behind solid pitching by relief pitcher Erin Hall, came back to take the nightcap 2-1. The outcome wasted a fine outing by pitcher Stacey Waite '99, who retired the first 12 batters she faced and allowed only four hits.

Bucknell then traveled to Colgate and pulled a pair of upsets over the former Patriot League front runners. The Bison rebounded from a 1-0 deficit in the first game of the twinbill, scoring one run in the fifth inning and a pair in the sixth. Waite earned the win on the mound, allowing nine hits but no walks in the complete game.

Bucknell pounded out 10 hits in the nightcap, scoring three runs in the first inning and never looking back en route to a 6-3 victory. Kulis, Jenn Gombos '97 and Jen Delardo '98 each had two hits for Bucknell and Kulis went the distance for the five-hitter.

The Bison lost both games of a mid-week home doubleheader with Cornell to close out the week's schedules. Bucknell could only manage a meager four runs in the two games, losing by 2-0 and 5-4 scores.

The Bison, now 10-22 overall and 5-3 in league play, will host Rider and Lehigh in doubleheaders this weekend.

BASEBALL

from page A9

early Sunday in the first of three games, as Lafayette starter Jeff Mellick held them to one run on five hits. Apollon and first baseman Steve Rutkowski '97 each collected two hits, while starter Mike Tomko '98 gave up six earned runs, absorbing the 7-1 loss.

However, the Bison quickly broke out of their mini-slump and pounded the ball with authority the next game, scoring an astonishing 21 times—their highest total in 10 years. When the smoke cleared, the Leopards were left licking the wounds of a 21-4 whipping. Starter Sean Huss '99 picked up the victory for the Bison to move to 5-0 for the season. Huss gave up three earned runs, but he didn't have much to worry about. Apollon nearly hit for the cycle in a 4-4 performance that included two doubles, a homer, and five RBI's. Ben Sauers '98 picked up three hits and three RBI's from his DH spot, while right fielder Alex Inclan '97 went 3-4 with a triple and two RBI's. All-in-all, 12 Bison collected hits in this slugfest.

A letdown was soon to follow, as the Bison dropped the final portion of the day's trifecta, 8-7. Doug Hoffman '97 was tagged for six runs while lasting just over two innings. Lafayette was shut out for the final three innings, but Bucknell's one run during this time was not enough to bring them back from an 8-6 deficit. Cann hit the lone dinger for the Bison from his DH spot, a three-run blast, for his sixth of the season. Apollon remained hot at the plate and fleet on the basepaths, picking up two hits and three stolen bases. For the week, Apollon batted a scorching .542 with three homers, three doubles and 11 RBIs while swiping five bases. Though Bucknell's second baseman has let his balanced game shine through on the field, the Bison have had trouble putting all aspects of their game together at the same time.

"We're just not managing to get the key hits when we shut the other team down, or we're not getting the pitching when we're not hitting," said Apollon. "We have good chemistry, but we're not doing the little things."

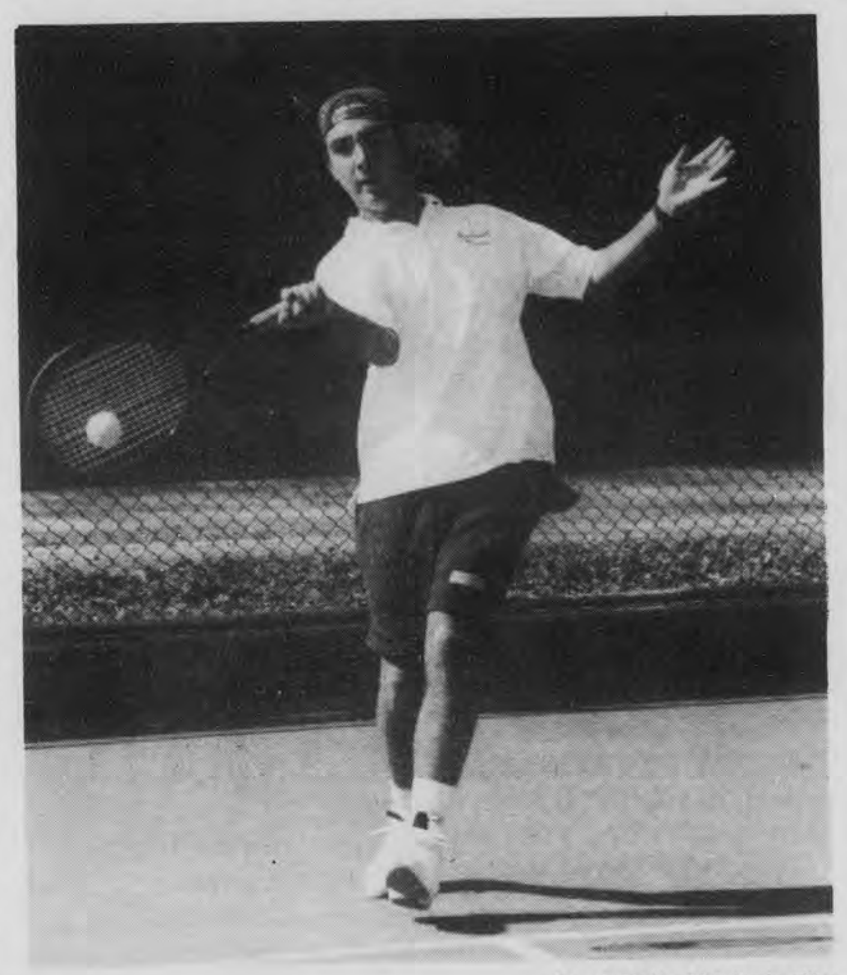
This weekend's Holy Cross series is a key to the Bison's hopes to stay afloat near the top of the Patriot League. With a huge series against first-place Navy looming on the horizon, league wins are of the essence.

T.K. Kelly shuns tennis elite for Bucknell's charm

Florida native turned down scholarship offers; is No. 1 singles player as a freshman

BY JARED SILLIKER

Bucknellian Staff Writer



Jonah Half—The Bucknellian

T.K. Kelly '00 has hit with several tennis professionals and was the #32-ranked player in Florida in high school. Kelly is 6-5 as the #1 singles player for Bucknell this season.

He could have played for a more prestigious tennis program.

He could have collected lucrative athletic scholarships.

Yet freshman T.K. Kelly chose Bucknell for its academic reputation and is already the Bison's No. 1 player, setting the standard on the tennis court.

Kelly had Division I offers from North Carolina State, Illinois, Furman (S.C.) and Colgate. North Florida (Div. II), which ranked as high as #2 in the nation last year, also recruited him. He could have also walked on at the Florida state schools and played his way to a scholarship. But the Patriot League, which gives no athletic scholarships, reeled Kelly in.

So what drew him to Lewisburg?

Kelly, who doesn't qualify for any type of aid at Bucknell, said simply, "I wanted to use tennis to get into the best school possible, and visited here and loved it... Plus my parents are originally from Pennsylvania and have always encouraged me to keep Bucknell in mind. Between the academics, social aspects and overall size, Bucknell was just a good fit."

Ranked as high as 32 in Florida during high school, Kelly has played No. 1 singles from the very beginning for the Bison and holds a 6-5 record this spring. The last freshman to play at No. 1 was Mark McGuire, who did so briefly during the 1991-92 season.

Kelly is there to stay, but has some big shoes to fill as McGuire ranks second in Bucknell history in overall wins with 79. Kelly currently has 12 wins as he and sophomore Steve Bomberger have teamed up at No. 1 doubles, where the tandem is 6-5 on the season.

"There's always pressure on a freshman in the starting lineup, and even more so at No. 1, " head coach Bob Hammerlee said. "But T.K. is the type of kid who can handle it—he possesses such a cool composure."

Although he's been thrown into some elite competition early in his college career, Kelly doesn't see his "baptism by fire" as overwhelming pressure. "It's so much more fun playing college tennis. It's more team oriented than in high school," said Kelly. "Also, playing in tournaments during high school, there was a lot of pressure knowing that if you if you beat this guy, you'll improve your ranking."

Also helping to ease the pressure was the level of competition in Florida junior tennis, giving Kelly invaluable experience.

"Getting a ranking as high as T.K. earned in a top area like Florida says a lot about the level of tennis he's capable of playing," Hammerlee said.

Kelly was quick to be thankful for living and playing tennis in Florida. "I had a great opportunity living in Florida—it really opened my eyes, and made me realize how hard it is to get to a high level of tennis."

Kelly's opportunities didn't stop with just living and playing in Florida.

Kelly lived in Ponte Vedra Beach (near Jacksonville) until this past summer when his family moved to Tampa. And in Ponte Vedra, across the street from his house to be exact, is where Kelly capitalized on possibiy his greatest opportunity.

There stood the ATP Tour headquarters, where many top pro players, including Todd Martin and MaliVai Washington, train along with those trying to make it on the tour. Kelly started out in clinics with other juniors, but soon worked himself into the training routines with the pros.

"As my tennis improved, they saw I could keep up and incorporated me into their programs," Kelly said.

This, along with constant playing in USTA tournaments across the state of Florida, and the nice weather that permits year-round play, Kelly had a tennis haven in which to tune his game.

"The USTA tournaments are non-stop in Florida, and there's so much competition. I just kept trying to improve and have learned a lot in junior tennis," Kelly said.

Not only has Kelly made it to a University that he loves, but with experience that few college players his age have acquired, he has eased into the nucleus of a young Bucknell team with a calm coolness. "A year ago, I might not be playing number one, but everything's come together over the past year. Coach Hammerlee and I both felt I could handle the spot, and I've felt real comfortable all along," Kelly said.

Kelly's true reasons for coming to Lewisburg are simple. He is a player who isn't concerned about big name schools, full scholarships and the glamour that goes along with it all. Kelly is a player that simply loves to play the game—period.

LACROSSE

from page A9

multiple fast breaks. The defense was anchored in goal by Aly Toombs '97.

The following day, Bucknell went on to surprise Drexel in an amazing comeback game that finished in a 6-5 Bison victory. This win ties the school record for wins in a season.

It didn't look good in the first half for the Bison, who allowed Drexel a 4-0 lead at halftime. The team was mentally and physically exhausted after its tough win against Lehigh.

"We weren't going after balls and our cradles were weak, allowing us to get checked," Hammes noted.

After halftime something clicked with the Bison, and the tide was turned. After the first and last goal scored by Lehigh in the second half, Bucknell took control and scored six goals in a row.

"We realized what we were capable of in the second half. Once we come together and work as a team, we're unstoppable," Hammes stated.

Murphy led the scoring barrage with three goals, one of which was the winning goal scored with 5:10 left in the second half. Hammes contributed two goals for the Bison and Megahn Hallahan '97 scored once. McIlvain added an assist for Bucknell.

"Our fan support at Drexel was amazing. They were extremely rambunctious and really helped to pump us up to pull out the win," Jen Gallagher '98 remarked.

Bucknell had many shots on the Drexel goalkeeper in the first half, but her skill overrode the team's efforts. The Bison smartly studied her technique and made the adjustment in the second half enabling Bucknell to get the ball in Drexel's goal.

Toombs tended goal for Bucknell and contributed eight saves.

The exhausting week finally took its toll as the team battled Colgate. Bucknell travelled to Colgate on Tuesday only to finish their Patriot League schedule disappointed. The Red Raiders added a fifth straight win to their record when they finished with the Bison, 16-6.

Hammes led Bucknell with four goals, followed by Murphy with two. Ashley Rust '00 contributed an assist. Colgate outshot Bucknell by a mere 32-28.

The win moved Colgate (9-1 overall, 2-1 league) into third place, ahead of Bucknell (9-3, 2-2) in the league standings.

The Bison are back at home on Saturday as they battle St. Joseph's allowing for a perfect spectator family activity. Bucknell travels to Lock Haven on Monday in their last away-game effort.

Jonah Half—The Bucknellian

Doug Hoffman '97 picked up a save in a 7-6 win over St. Bonaventure this week, but was lit up for six runs against Lafayette.

Cycling earns strong finish at ECCC Championships

BY WHIT YOST

Bucknellian Team Correspondent

Members of the men's A Bucknell cycling team (from left) Tim Gernitis '98, Marc Ducharme '98 and Ryan Stenken '98 earned a 25-second victory in last weekend's race at Army.

This past weekend, the Bucknell Cycling team traveled to West Point, New York for the 1997 Eastern Collegiate Cycling Championships at Army. Despite adverse weather conditions and a large amount of driving, the team managed to provide one of its most stellar championship performances.

The racing began late Saturday morning with the Men's C race. Mike MClane '98 and Mike Rizzi '00 both rode strong races to cross the line in the front group. In the Women's B race, Maryann Cieliesz '99 climbed well to finish in the top twenty in her race. Towards the end of the first set of races however, a strong storm blew in, sending down hard rain and dropping temperatures into the forties. In the Men's B race, only Whit Yost '99 was able to complete most of the race until a mechanical problem ended his hopes for a high placing.

"I was feeling really good," Yost said, "The weather really suited my riding style. With one lap to go I lost my chain on the last climb, and my fingers were too numb to put it back on. By the time I did, my race was over."

In the Men's A race, the same weather took its toll on most of the starters. With most of the race finished, only Marc Ducharme '98 and Tim Gernitis '98 remained. On the last lap, Ducharme got into a break of about six riders. The break rode to a lead of almost three minutes. He held-on up the last climb to beat all of his breakaway companions save one, earning him second place. Gernitis exploded up the last climb to drop everyone in his group to take 7th place.

"I just went as hard as I could," Gernitis said . "Nobody could stay on my wheel."

The next morning started with the Team Time Trial. The Men's B team of Yost, Diran Ayandele '98 and Brett Bailor '00 rode well together to capture 7th place. Erin Hemler '98 teamed-up with Cieliesz to garner 8th place in the Women's A division. Last but certainly not least, was the Men's A competition in which Bucknell was the defending Eastern Conference Champions. Gernitis, Ducharme, Ryan Steneken '98, Dan Doolan '00 and Brian Hill '98 combined to win the event by an astounding 25 seconds. The win represented the largest margin of victory for the team in the last two years.

That afternoon, the team traveled into the center of Army's campus to compete in the Criterium. The Men's B race went well as Hill and Ayandele showed that they are two of the conference's best sprinters by riding to 7th and 8th places respectively.

The highlight of the day though, was once again the Men's A race. Ducharme, obviously not tired from his second place in the Road Race the day before or first place in the team time trial that morning found himself in yet another breakaway with 8 laps remaining. On the last lap, Ducharme led for most of the way, not allowing anyone to come around him. No one could match his speed up the final section, and Ducharme became the 1997 Eastern Conference Criterium Champion.

"I can't believe it!" he said. "After yesterday and this morning I was really unsure how I would ride this afternoon. Me and the Princeton guy decided to work together on the last lap, and I guess I was the strongest. I'm thrilled!"

Thanks to his consistency, Ducharme was second overall for the combination of all events that weekend. It was the best overall finish ever for a Bucknell rider.

It was the perfect end to a nearly perfect weekend. This week the team will take its longest trip of the 1996-97 season to compete in races at Williams College and the University of Connecticut.

CONCUSSIONS

from page A1

Others to "get their bell rung" were Koichiro Oe '99, who suffered his during practice, and goalie Paul Bruccoleri '98. Bruccoleri actually suffered his concussion delivering a hit during a game.

Concussions are common in today's sports culture, but few people actually understand what a concussion is or its reverberation on the athlete.

> ***"Concentrating on anything hurts your head."***
>
> ***—Mike Vallone '99***

"Concentrating hard on anything hurts your head," Vallone said.

Wisor concurred, adding that there is "an inability to think... I had a splitting headache for a week."

When a player suffers a concussion, what is actually happening is, "localized swelling of the brain and adequate blood supply may not be getting there... It is a relative compromise of normal functioning," said Dr. David Stechschulte, medical director of student health services.

In layman's terms, upon receiving a blow to the head, the brain tissue swells as would any other bruise to the arm, leg, etc. The difference with the brain is that it is locked in the cranium and there is no room to swell.

However, despite the horror stories about concussions, Stechschulte maintains that most are not critical injuries.

"If treated properly, even a grade III (very severe) concussion will heal without problem."

As part of the healing process, the player who suffers the concussion must sit out a week of practice or contact until they are asymptomatic, meaning that they have gone a week without any problems, headaches or other symptoms. The reason for this week off is what Stechschulte referred to as second impact syndrome. This syndrome means that if there are two minor head injuries within 7-10 days, it can result in a severe situation.

The four concussions on the men's team have all been either Level I or Level II concussions, which is moderate and usually the patient is able to return to action in a week.

So what is responsible for the sudden rash of concussions, as current players and coaches do not remember a single concussion in the last four years. The popular culprit is the new lighter helmets the players are wearing this year.

Wisor and Vallone both brought up the helmets as the major factor for the recent trend. "I think the helmets are definitely a factor. They're too light and have limited padding," Vallone said.

However, men's lacrosse coach Sid Jamieson cites the physical play of today's lacrosse as the major factor. He did acknowledge the influence of the new helmets by admitting that "this [rash of concussion] is more than we've had in the last couple of years," but quickly added, "lacrosse is much more physical today... kids need to learn that the helmet shouldn't be used as a battering ram," as was the case with Bruccoleri.

As for Vallone's case, Jamieson thinks that more of the damage was done when "Vallone fell over backwards and whiplashed his head against the ground."

Mudsharks do battle at William and Mary's "Funkengrooven Fest"

BY DROOPY O' BRIEN

Bucknellian Team Correspondent

The Bucknell Mudsharks competed in last week's tournament at William and Mary.

Last weekend the Bucknell Mudsharks traveled to The College of William and Mary to take on a host of talented teams at the Funkengroovin Fest. The team carried only two seniors, as the rest of the team was underclassmen preparing to do battle with an experienced field.

The first to challenge the Sharks was the athletic hosts of the tournament, William and Mary. Right out of the gates Bucknell faced a team that could have easily walked all over them. The Mudsharks dug in however and in the end fought their way to a 13-6 loss. This set the theme that stayed with the team all weekend—that in the end, effort and good spirit would win the day.

The next opposition stood from an intense team from Duke University. This team, which eventually went to the finals of this tournament, jumped out to a quick lead on the Sharks. Despite the best efforts of the Sharks to regain their composure, Duke rolled on to an easy victory.

The brackets not relenting a bit, the Mudsharks faced Lehigh in their third game. It was a well-fought contest that saw Bucknell starting to breathe some life back into its team. Teams exchanged scores for a while but the eventual champions, playing with a number of alumni, proved too solid for the Sharks, who lost the spiritual leader, Chris Williams '96 with two stitches over his right eye. Although they walked away defeated, spirits stayed high for their last contest of the day.

As perfect playing conditions settled over the day, the team prepared to play what was to be its best game of the tournament. Fighting off a cold rain and increasing mud the Sharks were ready to put a bite into the University of Richmond. The game began as the teams traded points until half-time, which showed Richmond up 7-5. In the second half Richmond came out strong, as the team pushed its lead to 12-7, one point away from victory. Once again the Sharks refused to quit, and led by the advice of one Mr. Magoo, they fought back. Every member of the team stepped up the intensity and brought the score to an electrifying 12-11. Even though Richmond finally punched in the last score to take the game, the Mudsharks showed who the real winner on the field was.

The last game of the tournament came on Sunday when Bucknell prepared to play the University of Virginia. Virginia was forced to fight off the unmatched tenacity of Allison Kenney '99 before they finally put the Sharks away.

Overall the weekend was full of spirit and good times. Led by the antics of Brian Gale '97 and solid play by the entire team, the Mudsharks are ready to face off at Swathmore again this weekend.

Women's water polo splits four games at Penn State tourney

BY AMANDA WOLL

Bucknellian Team Correspondent

Last weekend the women's water polo team traveled to Penn State for a league tournament, splitting four games against Villanova, Princeton, Maryland and Penn.

In their first game, the Bison defeated rival Villanova, who is coached by a Bucknell Alumna, Vicki Gorman '92, in a close competition.

Sharon Gashlin '97 led the team with five goals as the team won by a final of 12-9. Amanda Woll '97 and Captain Kim Tierney '97 contributed two goals each. Again, the women's strong defense, led by goalie Kristin D'Agistino '00 contributed to the women's victory. D'Agistino's consistently solid performance in the cage has proved to be an asset to Bucknell's team this year.

In its second game of the weekend, Bucknell lost to the University of Maryland in another tough match. The women played a strong first half of defense, but had trouble keeping up with its opponents for the duration of the second half.

On Sunday morning, Bucknell faced Princeton University, a tough competitor. The Bison began their game with tenacity, but Princeton's offense proved to be strong. This was the first game that Bucknell lost against Princeton in the past few years. Tierney '97 led the team with four goals.

That same afternoon, the Bucknell women bounced back into competition and defeated Penn 17-2. Solid defense and heads up playing by the entire team contributed to the win. After a significant lead had been achieved, Coach Wooster put an entire team of new players in the pool.

By dynamic movement on offense as well as defense, these women proved that the Bucknell women's water polo program has a positive future. Sarah Johnson '00 had three goals, while Diana Martin '99 and Kate Wood '00 each contributed.

After the results of the women's season were tallied, Bucknell is seeded fourth for the Southern Division Playoffs, which will be held at Princeton this weekend.

In their opening game on Saturday morning, the Bison will play Villanova. This season Bucknell is 1-1 with the Wildcats and are hoping to defeat them again.

The top four seeds from Southerns will travel to Harvard next weekend to compete in the Eastern Championships.

Ramblings from a Bucknellian sports veteran

Commentary

Brett Tomlinson

Brett Tomlinson
Sports guest Columnist

In my return to the world of sports commentary, I had planned to extol the virtues of baseball and forever shoot down the notion that our national pastime is somehow too boring to appeal to our television-warped, short-attention-span generation. Fortunately, real news in the sports world took my mind off of my pet peeve and gave me some topical things on which to comment.

First of all, I cannot let the events that transpired at last week's Masters go unnoticed. For years, golf fans have been searching for the next Jack Nicklaus. They never realized that what they were really waiting for was the first Tiger Woods.

Of course, if Woods keeps dominating majors like he did at last week's Master's championship, professional golf could become boring due to large margins of victory. Then again, a 12 stroke Woods victory is still more exciting than watching Payne Stewart line up putts for five minutes in his hideous knickers.

Woods could very well become to golf what Michael Jordan is to basketball: simply the best to ever play the game. That is the truth, not just a potential shoe advertisement. He's the best thing to happen to golf since *Caddyshack*. Six months ago, I wrote in this column that Woods probably would not be able to dominate the game like the young Nicklaus, but he would boost interest in golf and be an incredible asset to the sport. In his first major tournament as a professional, he proved that he's everything Nicklaus was, and frankly, I'm glad. It's fascinating and exciting to realize that the best golfer in the world right now is only a year older than me. Of course, it cuts down on my excuses when my father beats me on the links, but I'll get by.

In other news around the sporting world, I'd like to give my appreciation to boxing commentator Larry Merchant for telling it like it is during last weekend's Pernell Whitaker-Oscar De la Hoya fight. In the overly hyped, utterly scripted world of boxing, it's rare to see the blunt honesty and common sense Merchant displayed before, during and after the fight.

Before the fight, a mariachi band played inside the ring "to honor Oscar De la Hoya's Mexican roots," but Merchant pointed out that De la Hoya was born and raised in the United States and the band was simply a promotional ploy to draw in Mexican fans. Merchant summed it up beautifully, risking his job to comment, "This sucks."

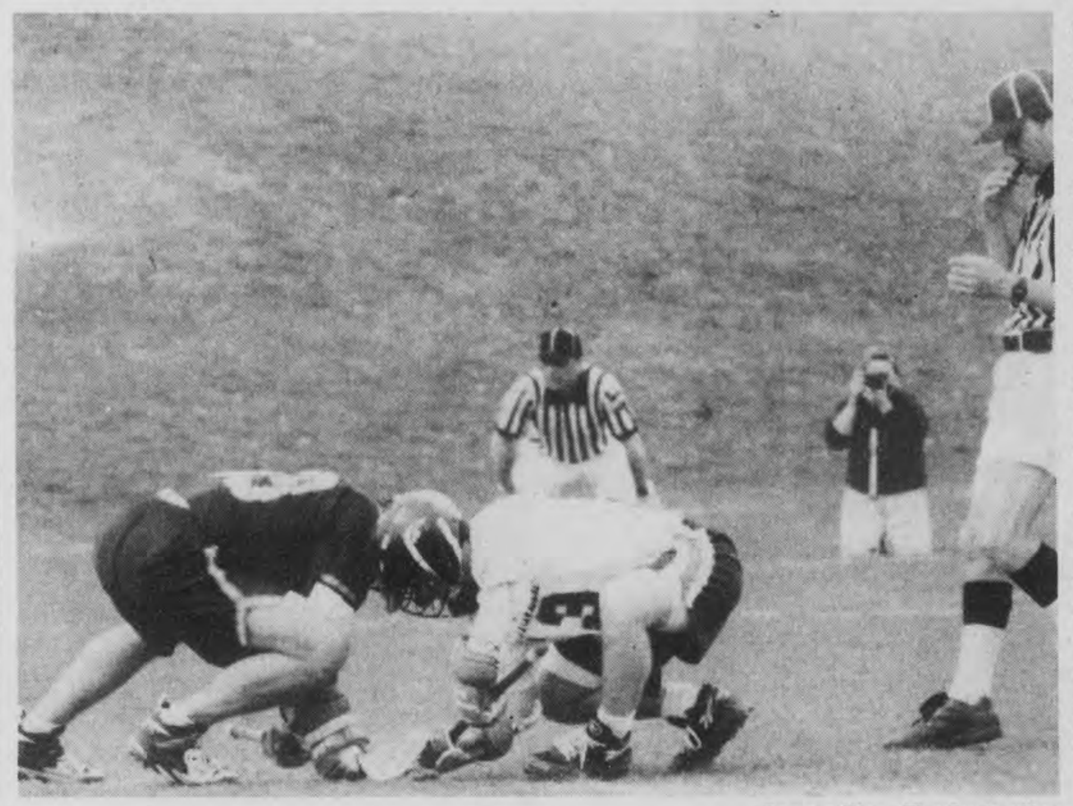
During the fight while Jim Lampley tried to subtly build up De la Hoya with jargon about "power punches," Merchant fearlessly said that he was not impressed by the young star. In fact, Merchant scored the fight as a Whitaker win, disagreeing with all three judges, and he told that to the cameras after the post-bout interviews.

Realistically, the fight was too close to call. It did not live up to the hype, but hopefully, the rematch will. The problem with boxing is that with so few fights and with viewers paying such a high price for each one, the commentators have to lie through their teeth to make everything seem like the best fight ever. Otherwise, pay-per-view does not work, and what's boxing if you can watch the fight for free? Merchant did not sell out to the pressure of fooling viewers to keep the cash flowing, and I'm one grateful boxing fan.

Finally, as sports fans brace themselves for the three months of hockey playoffs and two-and-a-half months of basketball playoffs, I cannot help but wonder how anyone can consider baseball the boring sport. The regular season still means something in baseball (granted, it's not as important as it once was). Realistically, the regular season is just a series of shows for hockey and basketball. Any championship-caliber team could take a month off and still make it into the playoffs. I guess it just goes to show that common sense is not what it used to be. At least we still have Larry Merchant.

Frustration continues for men's lacrosse

Losing streak reaches four games after loss to Lehigh; team falls to 1-2 in league



Beetna Kim—The Bucknellian

The men's lacrosse team's record fell to 2-7 after a pair of losses last week.

BY E.J. CRAWFORD
Bucknellian Staff Writer

What was once a learning experience is turning into frustration for the Bucknell men's lacrosse team.

The men's losing streak reached four games after lopsided losses to UMBC and league rival Lehigh, 16-7 and 15-5, respectively. The losses drop the Bison to 2-7 overall (1-2 in league play) and the team has lost its last four games by a total of 39 goals, albeit to very tough competition.

"It's a situation where we play okay for a while and then have some serious breakdowns... We're trying to win games with younger people who don't have the game sense and experience [yet]... to do well for 60 minutes," Coach Sid Jamieson said.

The inability to play a solid game was painfully evident against nationally ranked UMBC, as the Retrievers ran off the first 10 goals in cruising to an 11-1 halftime lead. Jamieson largely blamed turnovers and impatience for the tough start, saying that "we'd turn the ball over at the midline and then they'd have the transition. Offensively we have to play with more patience and control to take some heat off the defense."

Things did not improve much for the Bison in the second half, as UMBC continued to pour it on, holding a 15-2 lead after three quarters. The Bison responded in the fourth, but it was only cosmetic as UMBC cruised to a 16-7 victory.

Michael Kennedy '99 and John Golaczewski '99, moved from midfield to crease attack, led the way for the Bison with three goals each, while Ed Joffe '99 was held to only a single goal by the Retrievers' stifling defense.

Bucknell then travelled to Lehigh hoping to get back on track and make a dent in the Patriot League. Unfortunately it was just more of the same, as Lehigh broke out to an early 6-1 lead after the first quarter and led 11-2 after three quarters.

As was the case against UMBC, Bucknell was unable to get on track as it was plagued by turnovers and badly outshot (43-22 for the game). The Bison made a late fourth quarter rally, but it wasn't enough as they fell to the Mountain Hawks 15-5.

Goalie Paul Bruccoleri '98 made 15 saves in the loss, and Golaczewski added two goals, but it wasn't nearly enough.

A major factor in the loss was the back problems of Joffe, as well as the fact that many defenses are starting to key on the star attackman. Said Jamieson, "They took him out on the extra man by covering him with single coverage, and [both teams] shadowed him for the rest of the game."

When asked whether the team is getting frustrated with the losses, Jamieson replied, "Everyone in the world gets frustrated when you don't have success; it's only natural... I just try and tell the team that there's honor in what we're doing out there... There are big games left and we just have to continue to make improvements in areas where we're struggling."

The struggling Bison get a little bit of a break this upcoming week, as they head into the heart of their Patriot League schedule with games against Colgate and Lafayette, before returning home to face second-ranked Virginia to finish up the season.

In the late-night Wednesday game, the Bison fell to nationally ranked Penn State 14-7.

Men's tennis defeats archrival Lehigh; ends road trip 8-1

BY JARED SILLIKER
Bucknellian Staff Writer

Fifteen days, nine matches, eight wins and two long van trips.

Yet the Bucknell men's tennis team is still ticking. Not only are the Bison ticking, but also managing to defeat arch rival Lehigh in dramatic fashion, 4-3, on the 15th day, in addition to defeating Mt. St. Mary's and Duquesne to complete a perfect week.

The three wins improved Bucknell's record to 11-5.

Bucknell's only lapse in energy came against Delaware Sunday afternoon, as the men lost 5-2. "After crawling out of the van after midnight the night before, most of the guys were really flat," said head coach Bob Hammerlee.

Against Lehigh Tuesday, it was a different story. The day didn't start out so glamorous, though.

The No. 3 doubles team of Sean Galligan '98 and Drew Thimme '97 won easily, but after No. 2 doubles lost, the doubles point came down to T.K. Kelly '00 and Steve Bomberger '99 at No. 1 doubles.

Many onlookers murmured that this could mean the entire match, expecting a tough singles lineup from Lehigh. In a match that saw many lead changes and significant crowd support, Kelly and Bomberger fell 9-7, and Lehigh won the doubles point.

Bucknell then needed to win four out of the six singles matches. Behind impressive wins by Justin Quandt '00 and Adam Epstein '99, the Bison did just that.

"Justin [Quandt] played some of his best tennis of the season. His match was a very good one, though, with two freshmen baseliners battling out long points," Hammerlee said. "And Adam [Epstein] just caught fire at number five."

Quandt won, 6-1, 3-6, 6-3 at No. 4 singles, while Epstein rolled 7-5, 6-1. Josh Plumb '97 and Galligan also won their singles matches, at No. 2 and No. 6, respectively.

Kelly, who sat out five matches with a pulled stomach muscle, returned to action, going 2-2 in singles play during the week.

"T.K. really hasn't shown any ill effects from his lay off," Hammerlee said.

The men travel to Lafayette and Navy this Thursday and Saturday.

Jonah Half—The Bucknellian

Adam Epstein '99 helped the Bucknell tennis team to an 8-1 record on its recent road trip. The team's overall record stands at 11-5.

Looking for love in all the wrong places

Mistaken identity, comic inversion and double entendre set the pace in *Love for Love*

by Katryna Andrusik
Bucknellian Staff Writer

Gracing the University Theater's stage this Spring Parents Weekend will be *Love for Love*, a production of the Department of Theater and Dance. Written in the late 1600s, *Love for Love* is a restoration comedy, written mainly for the rich audience who would attend the theater to watch others, not the stage. Playwright William Congreve tells the story of Valentine and his quest to capture Angelica, one of the play's few women characters.

The play, which acts as a reflection of Congreve's society, tends to reveal the man as a domineering force and the woman as far less powerful. Shannon Kearns '97, acting the part of an unfaithful, ironically controlling female, Mrs. Foresight, said that *Love for Love* "must be taken in context of the author's time" in order for the sarcastic and brisk humor to be enjoyable. The play must be watched as an attempt "to contact those universal human truths which will be communicated to the audience," said Bob Gainer, professor of theater and director of *Love for Love*. He hopes the onlookers will "be enchanted, entertained and illuminated."

This year's production required a talented cast which can adapt to the sarcastic and formal speech of the day. After auditions were held in early February, the cast of 21 actors began a daily rehearsing schedule. While there are 13 male roles, only six women were needed and therefore cast.

Kearns believes that "the cast works as a unified whole,"

See Love, Page B2

Beetna Kim—The Bucknellian

Todd Ross '98 (seated), Janellen Duffy '00, and Shannon Kearns '97 star in the upcoming production of *Love for Love*.

28th annual Arts Festival furnishes family fun

by Kristen Colyer

Photo courtesy of Ebby Schubert

Artists, performers, food vendors and local participants will be coming together again this weekend for the 28th Annual Lewisburg Arts Festival. This week-long celebration will begin on Friday and extend through the week as guest artists will perform each night and art exhibits will be open daily.

The 28th Annual Lewisburg Arts Festival kicks off its week-long celebration tomorrow, just in time to provide a multitude of events for both students and parents to enjoy this Parents Weekend. Sponsored by the Lewisburg Arts Council, this festival promises something for everyone.

The Lewisburg Arts Council has been a strong supporter of the arts in the community for over 30 years. Among its other functions, the council promotes local artists, conducts an art auction in the fall and finances an annual scholarship for a local high school senior. This weekend's Arts Festival is its biggest event of the year. Council President Ebby Schubert and a team of 20 other volunteers began planning the week of festivities in October. Many hours of volunteer labor have gone into bringing together all of the artists, performers, food vendors and local participants.

The result? A schedule of events which packs in enough entertainment to keep you and your parents busy all weekend long.

Throughout the week, art exhibits are open every day and performances by guest artists occur nightly. This year's theme, "Celebrate Lewis

Pre–meds seek advice

Professor advises students preparing for medical school

by Tracy Thiffault
Bucknellian Staff Writer

The medical profession, while extremely competitive, has recently been the subject of a nationwide trend with college students. As a result of the move toward careers in this field, the University has witnessed a doubling of the number of applicants to medical school in the past three years.

While the University has no formal pre-medical program, these students opt to fulfill medical school requirements while completing a standard four-year degree program. John Tonzetich, associate professor of biology, acts as the pre-medical adviser to these students.

The University has a good reputation with acceptance into medical schools. Eighty-five percent of students with a grade point average of 3.4 or higher are accepted. The remaining 15 percent of students usually don't get accepted because of difficulty taking the MCAT, the six hour medical school entrance examination.

Unlike the University, some schools have a cutoff GPA for those eligible to apply to medical school. Tonzetich said that while there is no cutoff here, he usually discourages students with a GPA less than 3.4 to apply in the nationwide pool of 47,000 students vying for 15,000 available positions.

When evaluating an applicant, medical schools typically focus on three main areas: the student's GPA, well-roundedness and evidence of a pre-medical internship. According to Tonzetich, a student's well-roundedness "really defines them outside of academic achievement." He also said that medical schools like to see a

See PRE-MED, Page B12

> ***"The University does provide many opportunities for getting into med school, and most students are comfortable once they get there and do well."***
>
> *—John Tonzetich*
> *associate professor of biology*

Arts & Entertainment

Valentine's quest for love in "Love"

From page 1

although because the cast is so large, people are not as close as in other plays in which she has performed. Jeremy Walker '00, who is participating in his first theatrical performance at Bucknell, said that "the cast has been incredibly friendly and that I have enjoyed the opportunity the work with everyone."

The scenery of this five act drama unfolds in a surprising manner, while the costumes (reminiscent of the 1600s) easily reflect the author's time period with frilly shirt collars, high heeled shoes and long hair wigs. Three of the costumes designed by Karen Anselm, guest costume designer from Bloomsburg University, have been made entirely from scratch.

The stage work and lighting involve the efforts of not only F. Elaine Williams, professor of theater, and Heath Hansum, lecturer in theater but also of University students. Danna Frangione, professor of dance, helped the actors to understand the dance movment of the time, and Barry Kur, graduate student from Penn State, coached them in the type of voice and inflection needed to reflect the 17th century. A harpsichord and violin will be played by students during scene changes, dance numbers and as general underscoring for the text. All effort has been focused into assuring the audience that it is England in the 1600s.

Gainer hopes that the production will be well received by its audience. The departments try to bring different types of plays to the stage each year in an attempt to diversify the artistic material the University community experiences. Last spring, *Our Town* was presented, whereas other musicals and Shakespearean plays have also been a part of the recent repertoire. Gainer strongly believes that a major responsibility of the theater and dance departments is to educate through their performances. A restoration comedy is a form of drama not often acted out at Bucknell.

Love for Love runs tomorrow, Saturday, Sunday and Monday nights starting at 8 p.m. in the University Theater in Coleman Hall. Tickets are $5, $4 for senior citizens on Friday and Saturday, but on Sunday and Monday there will be a discount for students when tickets will cost $4.

Below: Todd Ross '98, Randy Faust '98 and Chris Scholl '99 are among the 13 male actors in this restoration comedy, which reveals the man as the dominant force within society.

TWELVE MEN, FOUR PARTS AND A CAPPELLA

Beetna Kim—The Bucknellian

The Bison Chips, with their energetic harmonies, will be singing five new pieces for this year's Chipfest. The tightness of the group gives its performance the support and encouragement they need in order to give the comic and melodious concert that has proved to be such a success for the past 23 years.

by Shetal Mithani
Bucknellian Staff Writer

She sat down to listen to the performance, not quite knowing what to expect. Soon, sounds of snapping, clapping and energetic voice melodies filled the room. She found herself tapping her foot and laughing aloud at the comedic performers. This was Ellen Rizzi's '00, first encounter with the Bison Chips.

"They're so relaxed and they seem to always have fun. They give out a comfortable atmosphere," Rizzi said.

As one of the many events offered on Spring Parents Weekend, the Bison Chips are performing their annual Chipfest. Two other a capella groups, the Penn Harmonics from Penn State and the Class Notes from Cornell University, will also be performing at the Chipfest, according to Trey Helms '98, a third year chip.

The Chips will open up the concert, with the two groups performing afterwards. Follwing the intermission, the Chips will perform again. The Chips will be singing nine new pieces, but not wanting to give away the names of the songs before the performance, Helms said, "We are performing songs from classic rock to folk music."

This is the 23rd year that the Bison Chips have been performing, and the Chipfest has also been around for that long.

"The Chipfest is our big annual concert. It's the concert that we work toward," Helms said.

Recently the Chips released a CD called*When the Chips hit the Fan* and according to Helms, the group probably won't put out another one for a couple of years.

In addition to performing at the University several times this year, the Chips also performed in Pittsburgh for the University's capital campaign kick-off about a month ago.

"We want to do what we can for Bucknell. If we can help Bucknell in any way, it's great," Helms said.

"The group spends a lot of time together, pumping each other up. We have this adrenaline going before the performances and it's a natural high. During the sound checks we just chill together and get pumped, and when we get on stage we're energized and ready to sing. It's a great group of guys and we've all learned a lot," Helms said.

Chipfest begins at 8 p.m. tomorrow night in the Weis Center.

Aspirations heard and voices soar in soprano concert

by Laura Vaccaro
Bucknellian Staff Writer

"It was my mother that kept me involved. I didn't want to take piano, but now I'm really grateful," said Melissa Wharton '98, commenting upon her upcoming recital.

Wharton only began studying vocal techniques here at the University, but she has sung since the age of four in her church choir. Since then, she has gone on to become a member of the Gospel and Chapel Choirs, Concert Chorale, has played the piano at proclamation and is on the volleyball team. "I can be overwhelmed with all the practices, especially during volleyball. Spending three hours in the gym a day can be really tiring," she said. Time management would be a problem for some, but as Wharton explained, "in season I can do better, because I force myself to a set schedule."

Jonah Half—The Bucknellian

Only studying vocal techniques here at the University, Melissa Wharton '98 has cited her mother and Joan Sutherland as voices that have influenced her singing style and techniques. She hopes to record Christian music and to become involved in singing for various outreach programs.

A recital is required for music majors but for Melissa, a Bachelor of Arts major, it is not mandatory. "Music majors normally perform recitals, but our voice teachers recommended it would be a good idea that we should do it as well," she said.

Contemporary gospel singing is Wharton's primary choice, so she has chosen four spirituals by John Carter, four Brahms pieces and one Italian aria from the opera *Rigolleto* by Verdi. "My teacher selected the pieces that went best with my voice—those that would really bring out its best qualities." She cited Joan Sutherland as a major voice that has been an influence on her sound, as well as her mother.

Wharton reflected back to her childhood when she hated to sing and how her mother would often push her to continue with music, signing her up for piano. Now, Wharton looks upon her mother as a great influence, and like her, hopes to record Christian music.

"My mother sings, and in fact, she has recorded a Christian worship music CD," she said. But Wharton's aspirations reach higher than just recording. "I'd like to sing in many different outreach programs near to where I live in Pittsburgh," she explained.

She continued to sing the praises of the music department here at the University, as Wharton feels that the small size of the classes "really gives me the individual attention that is necessary for me to improve and grow as a singer, as well as offering me the kind of criticism that I need to develop my voice further." She also mentioned that "all of the music students really support one another; we all go to each other's performances and offer encouragement."

In addition to her own selections, Wharton will sing a duet, "Elijah Rock" with Elisabeth Stevens '98. "Many performers like to have one singer perform and then another, but we decided to intermerce our singing to make it more interesting" said Wharton.

Stevens laughed as she said that she has always wanted to do a recital with Wharton, which makes the performance all the more enjoyable for her. She doesn't maintain one particular style in her singing, "because everything helps you grow, and after all, where's the variety and diversity in your art?" she said.

Similarly to Wharton, Stevens mentioned that her mother sang, played piano and was the director of her church choir, which provided her with an interest in music very early on in her life.

Susan Beckley, Steven's voice teacher, as well as her grandmother, have also influenced her progress. Her involvement in the Opera Company, Concert Chorale, Chapel and Gospel Choir has displayed her love for music and hard work through the years.

For her portion of the recital, Stevens will be performing three French songs, "Romance," "L'heure exquise" by Renaldo Hahn and "Villanelle" by Hector Baileose. In addition, she and her teacher selected two Italian Renaissance pieces, an aria from "The Marriage of Figaro" by Mozart and four spirituals. Stevens and her teacher chose these pieces in conjunction so that they would challenge her voice and help it to grow.

Stevens hopes to go to graduate school and study performance and its history, as well as African American music and the ways in which it influences other forms and types of music.

"African American music is really not studied and is an unrecognized area; it's not celebrated enough. Because of who I am, and having been subject to so many different types of music, as well as being submerged in classical music, I find this is something that I need to do," Stevens elaborated.

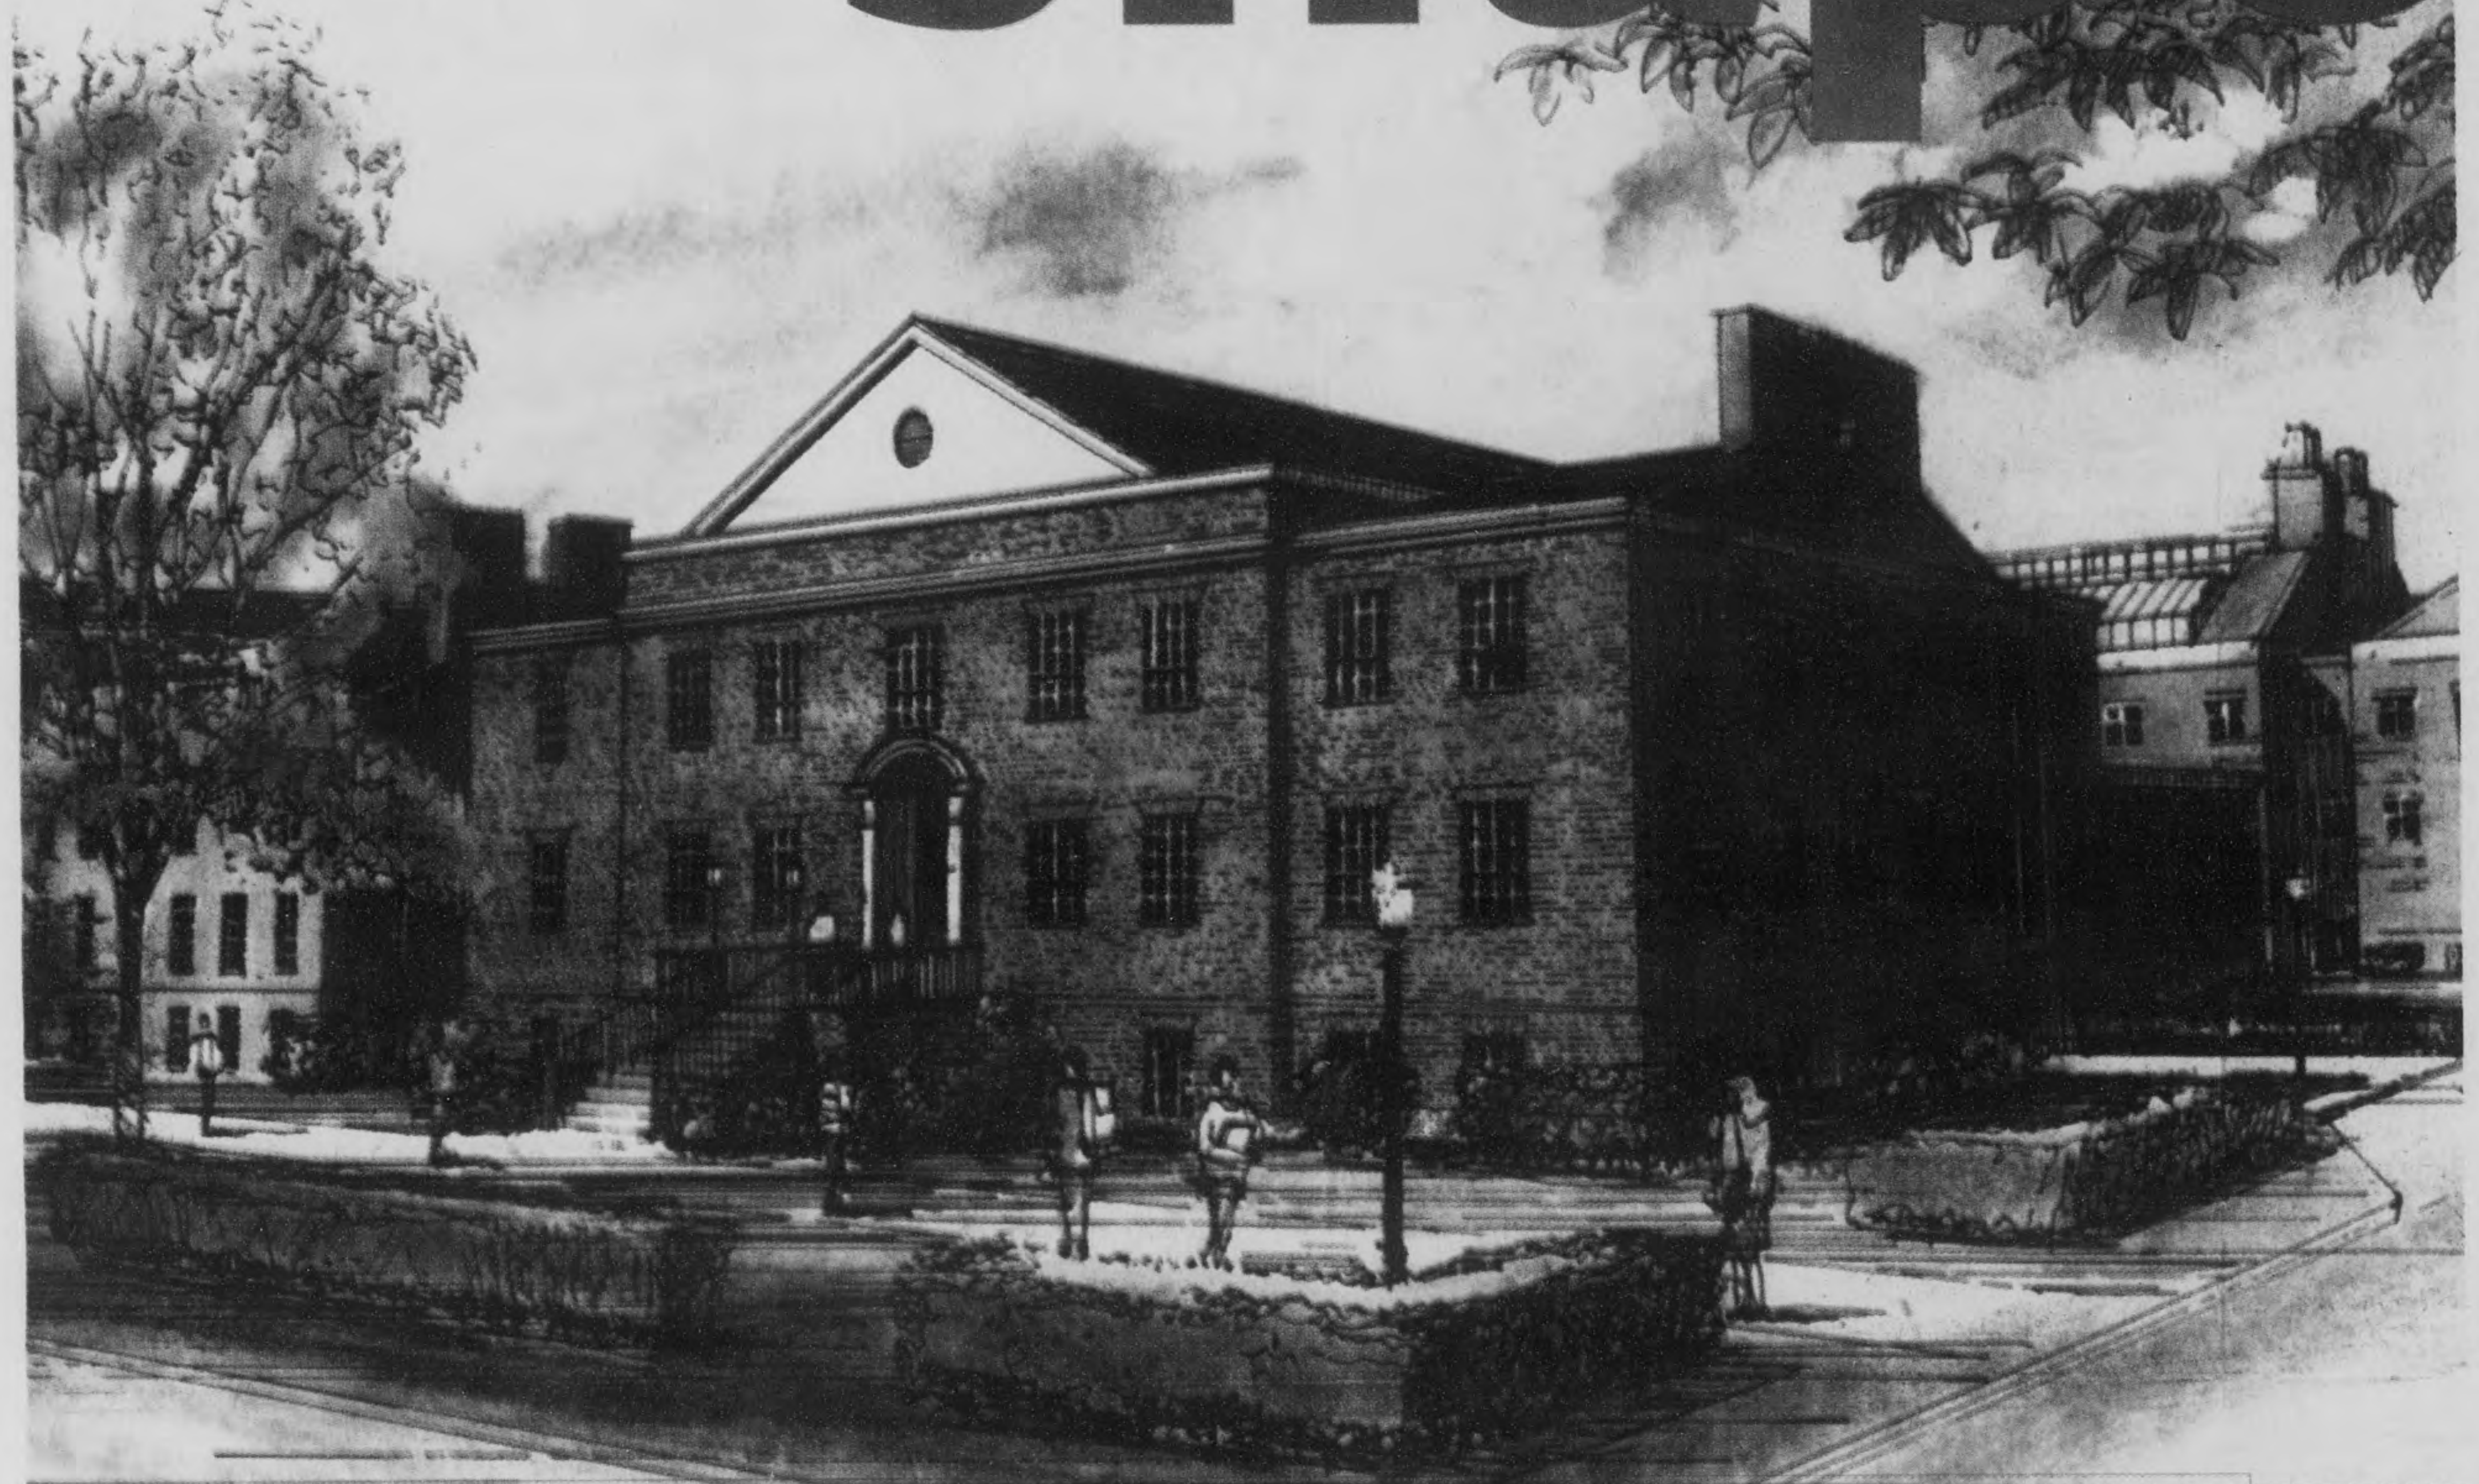
Like Wharton, Stevens strongly feels that the music department supports amd guides its students in their studies and performances. "We know all the professors, and the professors can really see where I am slacking off, which is good, because it gets me back on track," Stevens added.

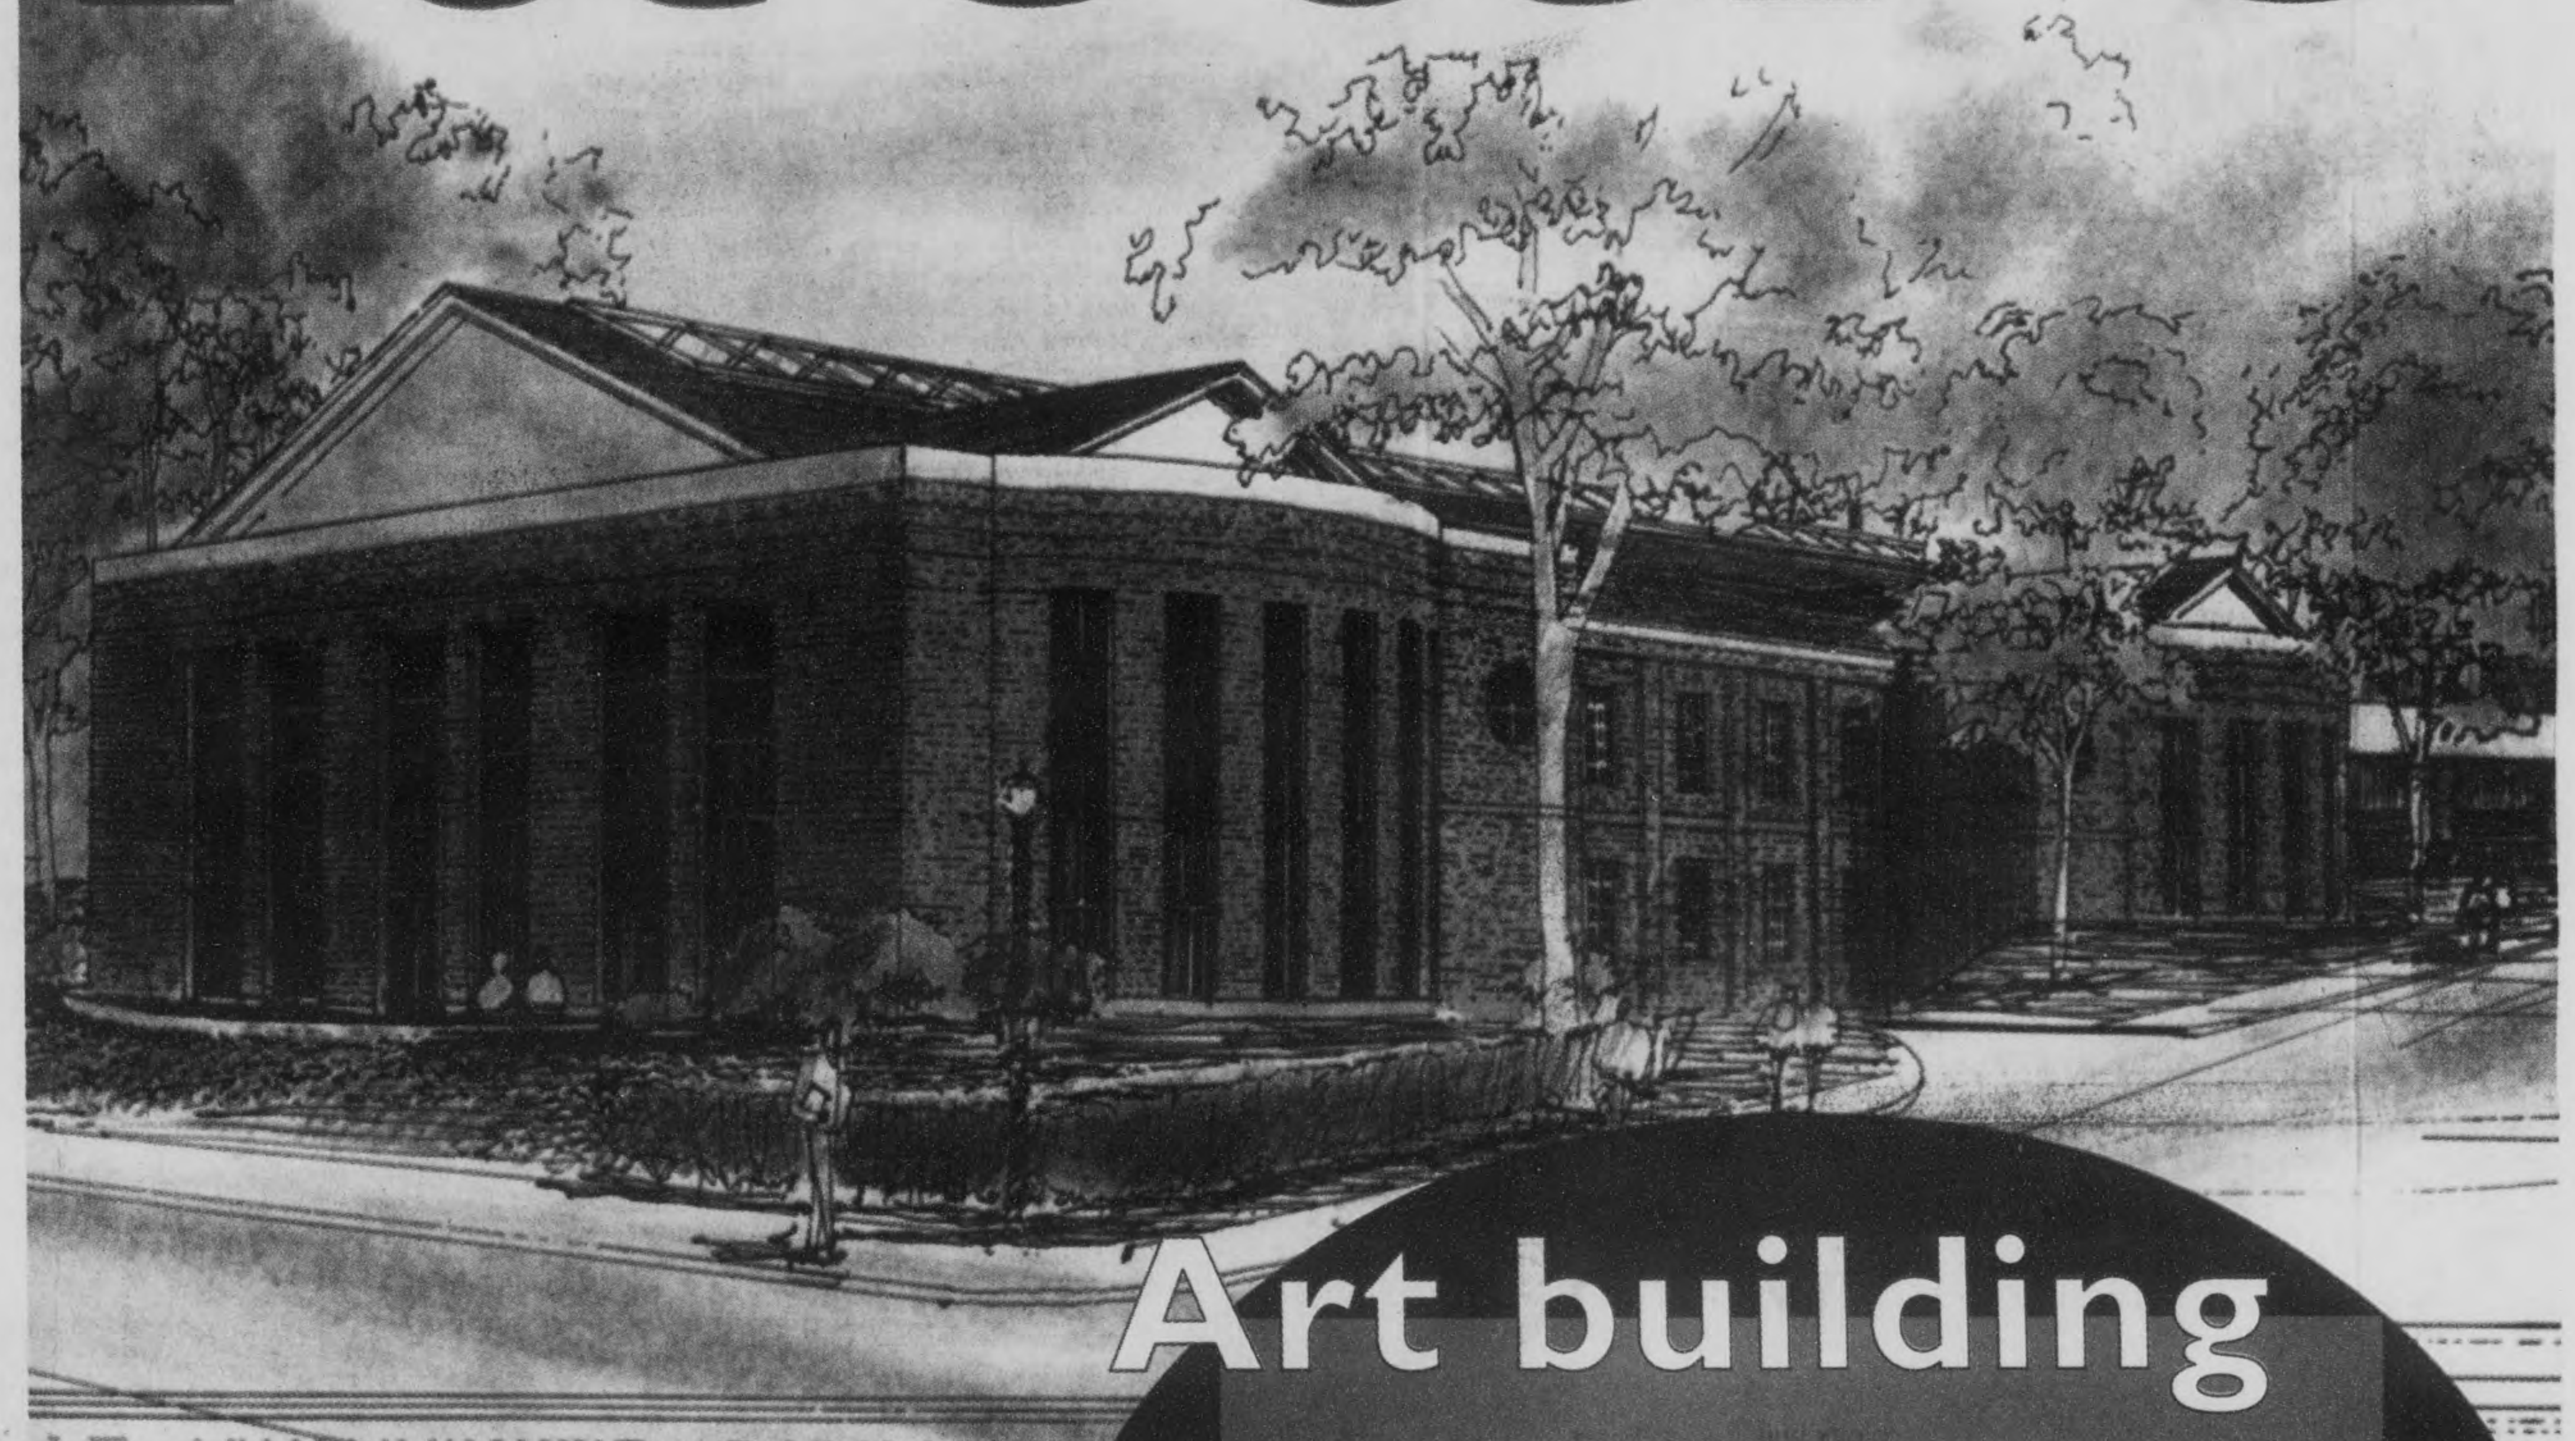
Jonah Half—The Bucknellian

Elisabeth Stevens '98 prefers a diversity in her music in order to help her voice grow as well as to challenge it. She will be performing a duet with Wharton called "Elijah Rock."

Wharton and Stevens will give their soprano performance next Thursday at 8 p.m. in Bucknell Hall.

The shape of the future



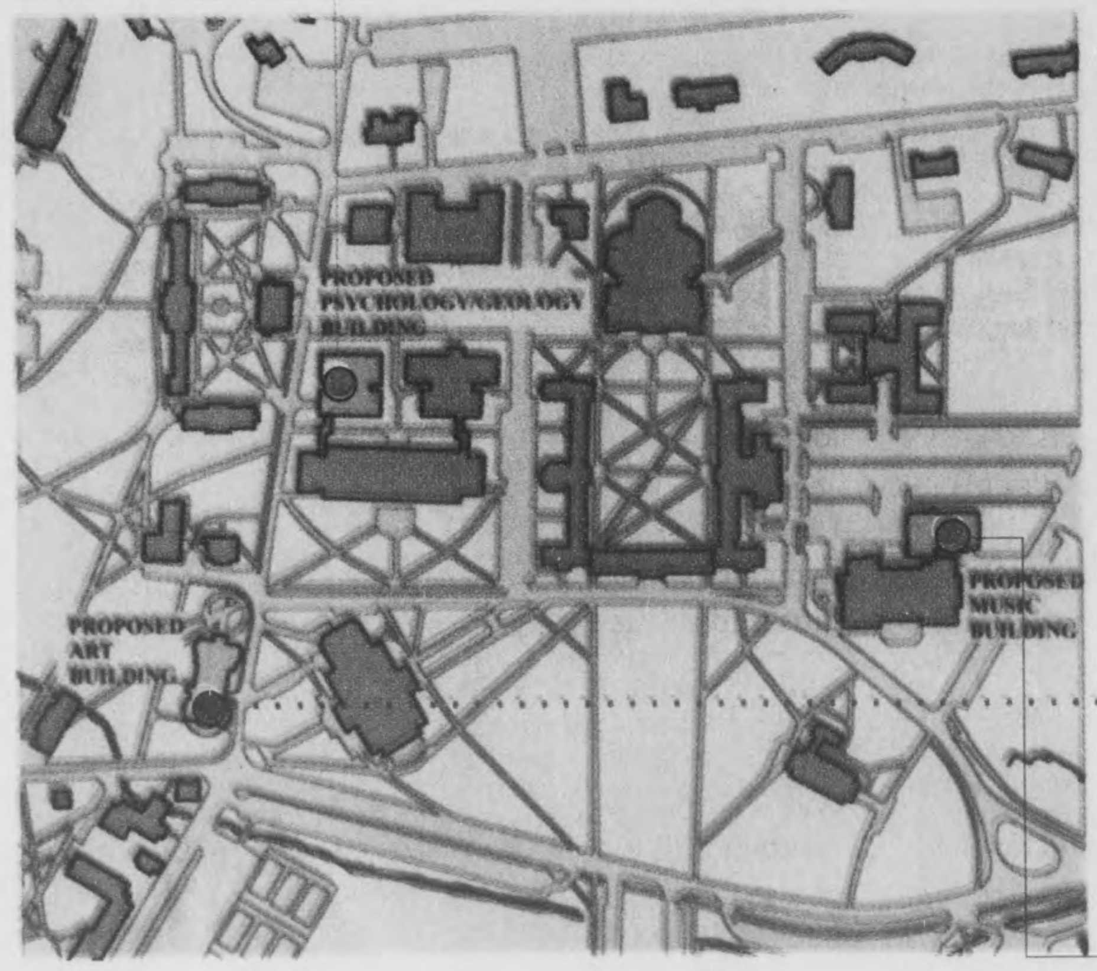


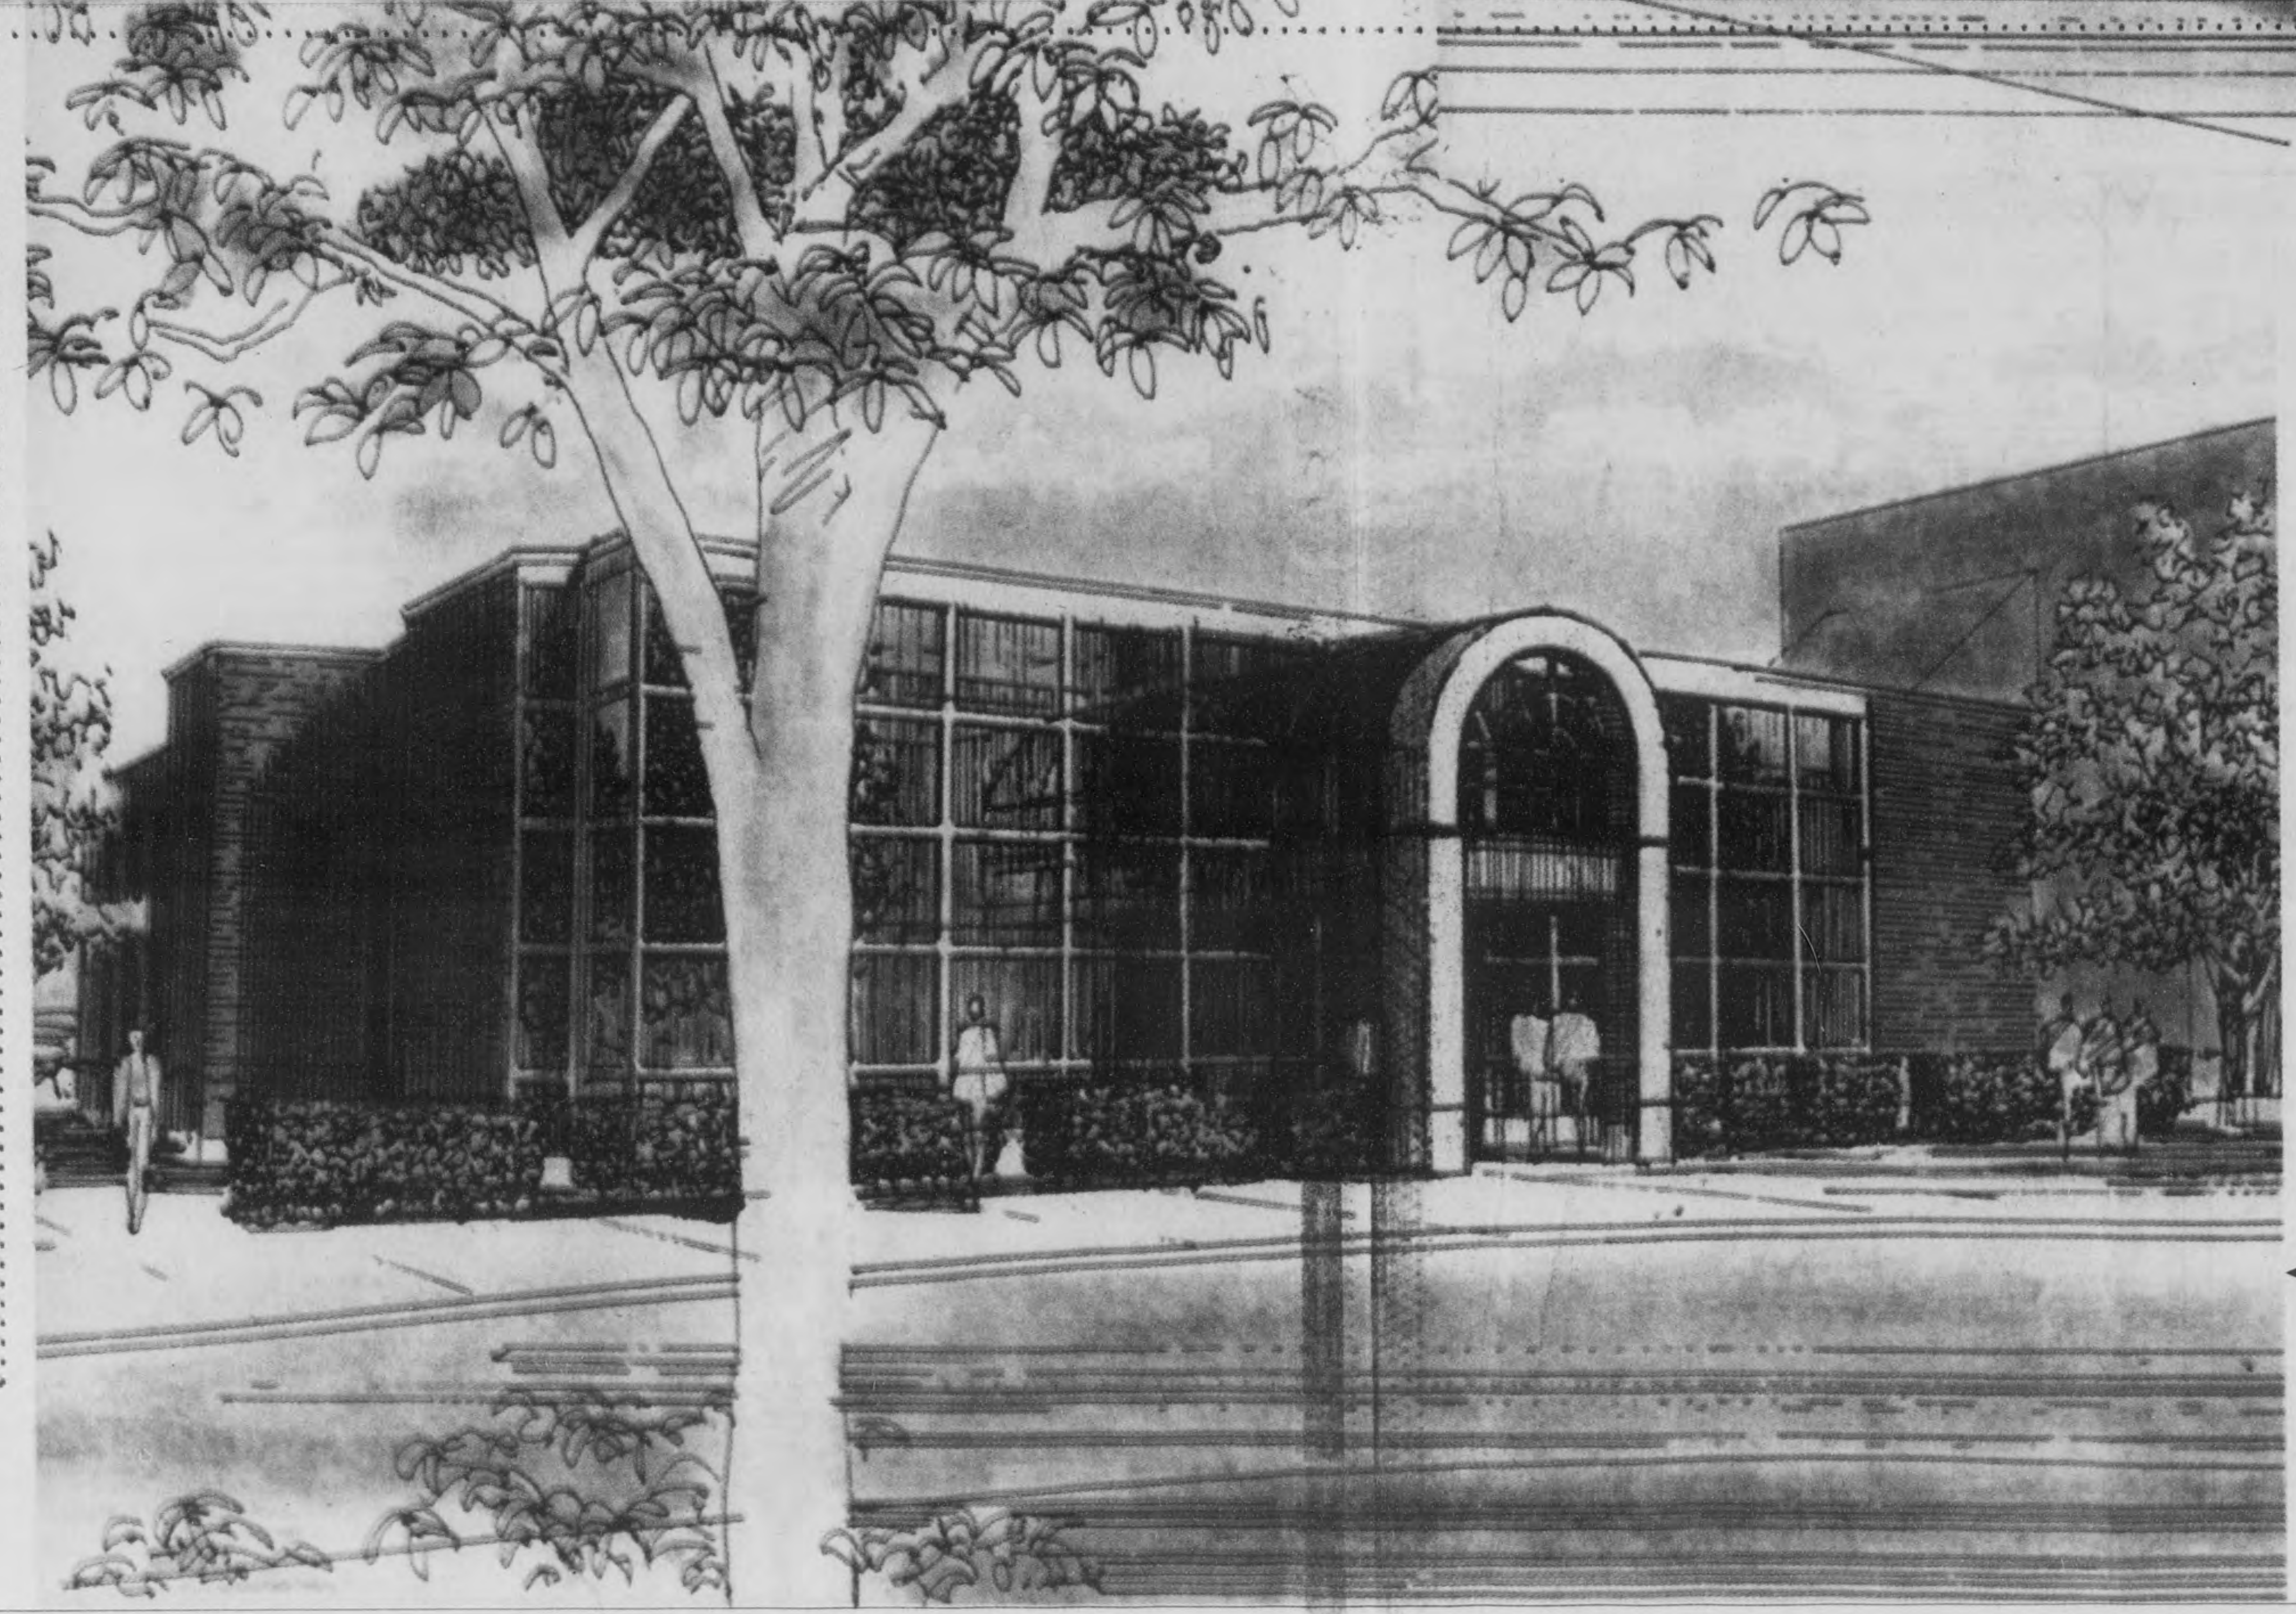
Psychology and geology building

The construction of the psychology and geology building will allow the University to consolidate all of its science departments in an integrated facility. In the proposal, this new building will be attached to both Olin Science and Rooke Chemistry, and will be situated at the corner of the Dana/Olin parking lot and Seventh street.

The psychology department, which is currently housed in three different locations across campus, will be able to unite all of its facilities within the same building. At present, there is a lack of training and teaching labs in Coleman, and in the primate house. The psychology department will inhabit the upper two floors of the building, supplying faculty and students with office space, research facilities, classrooms, and laboratories.

The geology department is currently located in Carnegie, which has been converted from its open-spaced layout to a building with cramped quarters and dilapidated lab space. In addition to the modern facilities that the new building would offer, the geology department would benefit from a tremendous increase in working space. The lower level of the building would contain special equipment and labs for water and soil analysis, rock preparation, X-ray diffraction, a flume for modeling rivers, and other specialized testing and analysis laboratories. Classrooms, general laboratories, a student research area, and faculty offices will be located on the second floor.





Art building

The proposed art building would bring the studio art and art history programs together in one building, obviating the need for students to travel across Route 15 to the Art Barn. The proposed location of this building would be on the corner of Seventh Street and Walker Street, across from the Langone Center.

The new art building would contain classrooms, seminar rooms, and studios for painting, drawing, photography, and printmaking. The main lobby would provide space for student art exhibits. A special area on the first floor would house the art department's slide collection.

Music Building

The proposed music building would be located adjacent to the Weis Center, with a soundproof hallway connecting the two buildings.

The first floor would contain a large classroom, seminar room, and piano lab, along with a number of studios and an instrument storage area. A special room would display the Harold E. Cook collection of rare musical instruments. Also located on the first floor would be the music library with its own listening room and workroom.

The second floor would contain faculty studios, a computer lab, private practice rooms for students, and a student lounge.

AN AUTHOR RETURNS TO THE OLD COUNTRY FOR A PERSONAL HISTORY LESSON

by Rachel Doebber
Bucknellian Staff Writer

"At a certain point in one's life, you look back at the coming of age," said Peter Balakian '73 in a telephone interview, when asked what inspired him to write his most recent book, *Black Dog of Fate*. "My life was shaped by remarkable people and enormous events that needed to be written about," he said.

Balakian returns to the University next Thursday to give a lecture, "Poetry, Rock 'n' Roll, Genocide: Writing a Memoir About Growing Up in the Suburbs," as part of the annual LaFayette Butler lecture series. Now a Professor of English at Colgate, Balakian will talk about *Black Dog Fate* which begins with his childhood memories of growing up in a New Jersey suburb in a closely-knit extended Armenian family. In his book, he recollects how, as he and his Armenian grandmother would bake choereg, or bread, she would tell him magical stories about "the old country."

It was not until after college that Balakian learned what actually happened to his family in the old country. Through body counts, government documents, eyewitness reports and family narratives, Balakian discovered the details of the torture his family suffered as a result of the Ottoman Turkish government's plan to exterminate the Armenians in 1915, which was this century's first genocide.

"My whole family was shaped by this event," Balakian said, "yet they could not talk about it."

Balakian describes his process of learning about his family's history as a "slow, complex journal from childhood into adolescence." The definitive moments happened when he was a young poet in his early 20's, when he happened to pickup a U.S. Ambassador to Turkey's memoir on the events of the genocide.

According to Balakian, the purpose of this literary memoir consists of three fundamental realities. "The first is to explore something significant about the growth of evolution as a human being. Second is to explore the moral significances of genocide. And the third, as a poet, is the allegiance to making the best art I can -- to give life to language that I hope will be rich and lasting."

Several chapters of the book are devoted to his and his family's experiences at the University which Balakian described as one of his homes on his life's map. Balakian also commented on the story of his mother, Ara Aroosian '48. Her story is "a moving story which is inseparable from the genocide," he said.

Other members of the Balakian family have also attended the University: a brother Jim from the class of 1978 and a sister Janet who graduated in 1983.

When asked how his family felt about the publication of his book, Balakian said that most of the family members were excited because it was a healing book for them. However, "others found it difficult to see themselves represented," he said.

Balakian said his years at the University were a positive experience. "I quit football and became a writer in the middle of my Bucknell years. Jack Wheatcroft's mentoring and friendship was decisive in my life. He is a great teacher and a great friend."

Balakian had returned to the University at Wheatcroft's request to teach during several January semesters in the mid 80s as well as for several poetry readings.

Black Dog of Fate is the Border's Book of the Month for May and has also received positive reviews in Publishers Weekly's boxed and starred review, which features the 40 best books of the year. He also has written and published four books of poetry.

Copies of *Black Dog of Fate* are available for purchase in the University bookstore.

Balakian's lecture begins at 8 p.m. next Thursday in the Traditional Reading Room of the Bertrand Library.

Peter Balakian reflects upon the fact that his family was shaped by the Ottoman Turkish government's impact on his family in his novel, *Black Dog Fate*. He has created this memoir to explore the aspects of genocide, the growth of human beings and to produce the best literature he can.

John Wheatcroft: No need to be humble

by Anne Putnam
Bucknellian Staff Writer

I sit downstairs in the basement of Bucknell Hall and try to capture my thoughts from my recent interview with John Wheatcroft, emeritus professor of English, poet, novelist and playwright. A selection of biographies of his preferred poets is on the table beside me. From the room above, a peaceable melody played from a piano is interrupted by strong chords of excitement and ambition. Such is the description of this remarkable man.

This complex person, known to most simply as Jack, has made a positive impact on the University campus for many years. Wheatcroft taught at the University for 47 years in addition to directing the Stadler Poetry Center. His contributions do not end there, however. For all that he has done for the University, Wheatcroft has recently been recognized by the Association for the Arts Academy for Artistic Achievement.

I glance over the pages of *Our Other Voices*, one of his many published books, to further explore the talents of this man who sat across from me yesterday. And again, he is personable to even the reader when he writes, "When you listen to our poetic voices, hold us to every word, every sound, yes, every silence."

At the height of his writing career, Wheatcroft has gained recognition by the University community. The honor the Association for the Arts is bestowing upon him was, according to Wheatcroft, "created to honor members of the Bucknell community who have devoted themselves to the arts as creators, performers, or supporters."

Wheatcroft had his start in writing very early on. His earliest influence was his clergyman father, a Baptist. His mother also impacted his future. As a family, they would read the King James Bible with particular attention to language. Other family activities included taking turns reading aloud with his sister. These early experiences were very important in establishing his foundation in literature.

Wheatcroft describes poetry and writing as a way of life. In second grade he read poetry aloud and made a connection with the rhythms he heard. This started his writing involvement. Temple University catered to his writing abilities, where he began studying literature. However, World War II interrupted his college career. He spent three years in the U.S. Navy and then came back to the U.S. to finish his undergraduate degree in English literature at Bucknell University.

However, Wheatcroft's experiences in World War II severely interrupted his creativity. "After being involved with the destruction during the war, I found it difficult to be motivated to write," he said. His experiences had not been conducive to expressing himself in writing. According to Wheatcroft, he "stopped dead" from writing for some time.

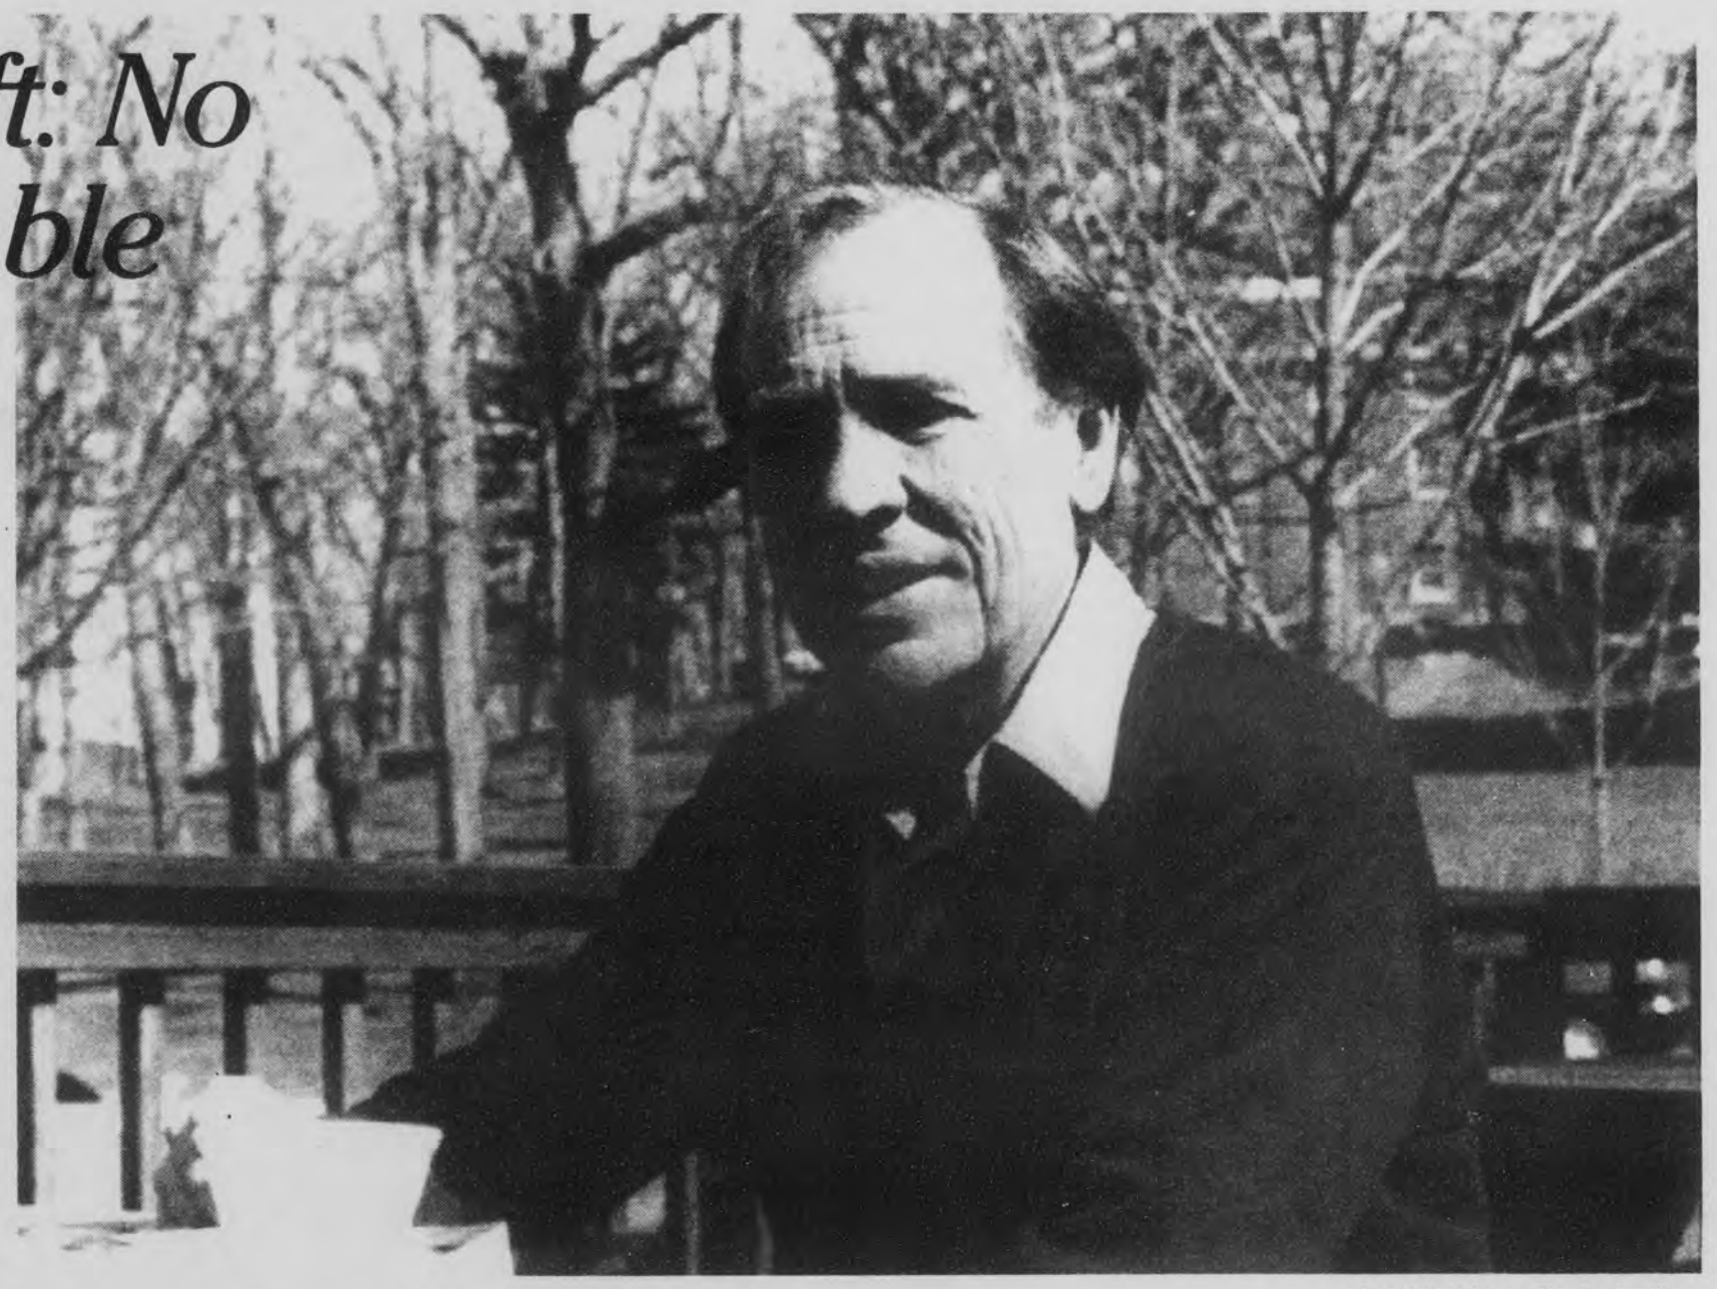
Little by little, writing worked its way back in to his life. The distance allowed him to "wait and absorb. It's not that poets are uninformed or unintelligent, but they must do their own work. Only as they absorb ideas do the ideas feed into the work," he explained.

Subsequently, his teaching career began, accentuated by his continued writing. Wheatcroft was able to incorporate writing into his daily activities, yet he truly had to "squeeze writing in to publish."

Wheatcroft felt compelled but gained gratification rather than satisfaction from writing. This personal drive is also reflected in his teaching modes. The courses he taught concentrated on literature and he instructed by having his students "respond to their writing themselves because he believes that a writer is his own critic."

A new novel Wheatcroft has just completed, *The Education of Malcolm Palmer*, centers around a brief interlude [illegible]s. A voyager at heart, Wheatcroft explores the world [illegible] nd has found inspiring events to write abo[illegible] sets the scene for his new sto[illegible] eets and must go to [illegible] describes, "It's not only the passport, credit cards, and money, but changing into a non-person without a provable identity." This novel focuses on that rediscovery.

At ease with himself and interaction with others, Wheatcroft's modest attitudes portray a humble character. He will be recognized not only for his five volumes of poetry, seven novels, collections of short stories and his made for television play "Ofoti," but for the person he is at a banquet this Saturday at 5:30 p.m. in the Terrace Room.



Cara Mickelsen—The Bucknellian

John Wheatcroft, retired professor of English, has gained recognition from the Bucknell community for his involvement in the arts. His poetry and writing have become a way of life for him as he incorporates writing into his daily activities.

Michael S. Weaver is Bucknell University's poet-in-residence for the spring semester. He will give his second reading on Sunday, April 20 at 8 p.m. in Bucknell Hall. The reading is open to the public without charge. Weaver teaches creative writing and African American literature at Rutgers University.

Cooking with Katie

POPPYSEED MUFFINS

Why is it, I wondered, that some things are better from a mix than from scratch? Brownies, for instance; there are none better than the "just add eggs and oil" varieties. This theory has long applied to a certain "scoop and bake" muffins that I've been enthralled by for years... wrapped around poppy seeds galore is a cake-like muffin body rampant with indulgent sweetness, perfectly balanced with the slightest hint of lemon. Eager to eclipse the realm of frozen batter, I set out to formulate my own recipe for these luscious treats. Armed with an insatiable sweet tooth, I set out, with mixing bowl and whisk, honey and sour cream and emerged with a tasty solution to my poppy seed dreams.

* 2 cups flour
* 1 and 1/2 cups sugar
* 2 teaspoons baking powder
* 2 eggs
* 4 egg yolks
* 16 ounces (1 pint) sour cream
* 1/2 cup canola oil
* 3/4 teaspoon salt
* 3 tablespoons honey
* 1/2 cup poppy seeds
* 1 teaspoon lemon zest

1. Sift together flour, baking powder and salt. Set aside.
2. Lightly whisk together whole eggs, egg yolks, sour cream, sugar and oil. Be careful not to overwork, or the texture of the muffins will be tough.
3. Add honey, zest and poppy seeds.
4. Fold in flour mixture, mixing only until all ingredients are well incorporated.
5. Fill greased muffin cups with batter, at least three-quarters full.
6. Bake at 375 degrees for 20-25 minutes, or until set and golden brown. Tops should crack slightly.
7. Remove from oven and allow to cool for 5 minutes in pans. Loosen with a knife, remove from pans, and cool completely.

This recipe yields approximately one dozen large muffins. They should be wrapped in plastic and refrigerated.

Gabriel's offers true Victorian appeal

by Micah Schweizer
Bucknellian Staff Columnist

If you come from New Jersey or Long Island, Lewisburg might seem like a small town. Drive 15 minutes into the country and you will find tiny New Berlin, almost untouched since the nineteenth century. The jewel in this town is the Inn at Olde New Berlin, which comprises a collection of historic homes. Run by gracious and personable John and Nancy ('83) Showers, who have traveled extensively but have chosen to remain true to their local roots, the inn opened in 1993. As well as offering unique and memorable lodging, the Inn also houses Gabriel's Restaurant, the 1996 selection for best restaurant in the Susquehanna Valley. This restaurant offers the diner a truly unique regional dining experience, which, given the upcoming Parents Weekend, I decided to investigate with my mother.

Set in a gorgeous 1906 Victorian mansion, originally the summer home of a Philadelphia merchant, Gabriel's Restaurant beautifully combines Victorian elegance and relaxed intimacy.

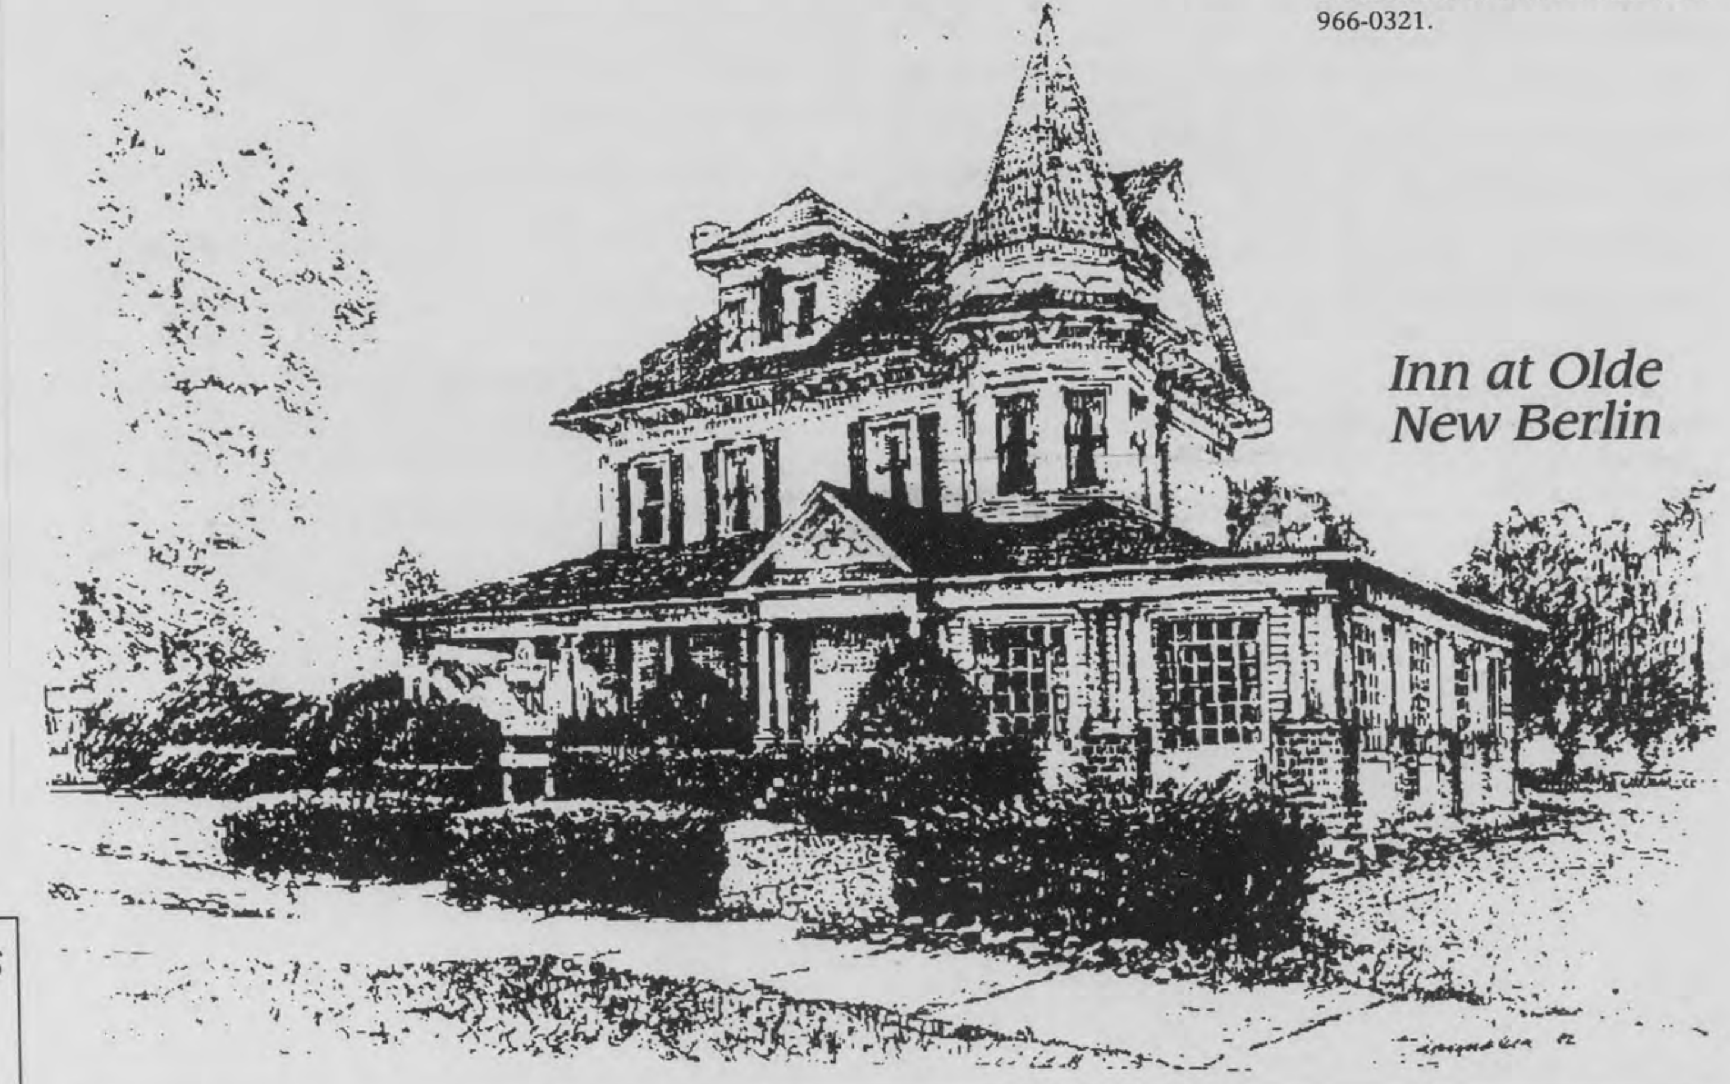
The rich ornate woodwork framing the two dining rooms is softened by opulent floral wall and floor coverings and lace at the windows. Each table is dressed in quiet forest green and adorned with fresh flowers and a shaded candle.

After our server explained the daily specials, we perused the small but well chosen menu offering something for everyone. The selections are cosmopolitan and contemporary, with a strong regional flair reflecting the Pennsylvania German preference for sweet and sour flavors. There is an appealing array of appetizers, a daily soup and several salads offered for starters. The entrées range from beef medallions with seven peppercorns to southwestern style pork to tortellini primavera in vodka sauce, the sole vegetarian offering.

We decided to share an appetizer and a salad. Raclette was my choice for an appetizer since I consider myself a connoisseur of this Swiss melted cheese dish. Indeed, I was not disappointed: the cheese was authentic and melted to the perfect consistency and served with the requisite sour cornichons, pickled pearl onions, and boiled potatoes. My companion relished her ample salad of mixed baby greens, pickled cucumbers, and Stilton cheese with a buttermilk peppercorn dressing. Family members, dining at Gabriel's on another occasion, report that the mini crab cakes are moist and delicious, and the Key Lime Caesar Salad is an intriguing twist on a standard.

We opted for the lighter side of the entrées. My companion decided to try one of the specials—tilefish in lemon dill sauce. Unfortunately it was not up to expectations. The fish was slightly overdone, and the sauce, though nice and lemony, lacked the zing of enough fresh dill. But the accompanying fan of carrot slices and snow peas was cooked to perfection and the seasoned rice was moist and flavorful. My roulade of chicken was delicious, delicate, yet fresh and lively with its stuffing of carrots and asparagus. The presentation of all the dishes at Gabriel's is a visual delight. Portions are ample, so we decided to share a dessert. A chocolate mousse cake was an easy choice, rich and loamy, set off by a dollop of whipped cream and a perfect red strawberry. Dinner for two without wine (although the wine list, like the menu, is small but comprehensive) runs about $50.

The menu changes roughly every four months. For Parents Weekend a fixed menu is offered. It includes a non-alcoholic beverage; asparagus and herb soup; champagne, grape and fig salad; a choice of five entrées, among them roasted garlic chicken and veal roulade; and a selection of Gabriel's decadent desserts for, depending on the entrée, $24.75 to $29.75. Tax, gratuity, and bar are not included. Reservations are still available for Parents Weekend; call 966-0321.



Inn at Olde New Berlin

Directions to the Inn from Bucknell

Traveling Rt. 15 South
9 miles
15-20 minutes

1. Head south on Rt. 15 for about 3 miles. At Winfield, look for a Rt. 304 sign. Turn right onto Rt. 304 West.
2. After the equivalent of a block, turn right to continue on Rt. 304. Please be cautious—be sure to turn right rather than continuing straight up the hill.
3. Proceed 7 miles. Rt. 304 becomes Market Street in New Berlin. Our Inn will be on this street on your right (it is the second house on the right after you pass through the town's main intersection).

Traveling Rt. 45 West
9 miles
15-20 minutes

1. Head west on Rt. 45 (West Market Street) out of Lewisburg.
2. After 4 iles, turn left and head south on Dreisbach Church Road. (At this turnoff, there is a sign with a cross for Dreisbach Church, as well as a sign for New Berlin).
3. Proceed 5 miles through one stop, over a mountain, and into New Berlin. In New Berlin, turn right at the first stop sign to whick you come. Our Inn is the second home on your right... 321 Market Street.

Getting an education away from the city

New atmosphere provides student and family more quality time together

by Caryn Richman

Did you ever wonder what it's like to transfer to the University from an inner city community college? Did you ever wonder what it's like to raise your children while trying to get a degree?

Enter Mary Wyeth '98. Because she has several siblings, Wyeth was not able to go directly to college after high school.

"I just was working full time and I thought 'is this it?'" Wyeth said. She decided it was time to go to college.

After spending time at a community college in inner city Philadelphia, she came to the University as a non-traditional student through the Step Program.

As Wyeth explained, "the Step Program stands for Student Transfer Enrichment Program. They try to bring students here who wouldn't normally have an on-campus experience."

Students at community colleges in Philadelphia who maintain a certain GPA are invited to participate in a summer school session here at the University. "They want to try to encourage students with diverse backgrounds or more life experience to come to the campus," Wyeth said.

"The community college is just for an associate degree. They want you to consider Bucknell when you're thinking of going on in your academic career," Wyeth clarified.

"I decided on Bucknell because of the [small] class sizes. I also thought this would be a great setting for my kids because it would get them away from the inner city," Wyeth said.

Wyeth is majoring in English with a minor in African American studies. She eventually plans to go on for her doctorate in cultural studies.

Wyeth claims that the most difficult thing she's had to adjust to at the University is "dealing with people who are not traditionally from a working class background. I feel that I also have to speak up and offer some other sort of perspective on life."

Another difficult thing which Wyeth has had to deal with at the University is her age. "I walk into a classroom and people think I'm a professor until I sit down," Wyeth said.

Cara Mickelsen—The Bucknellian

She has also run into the same sort of attitudes within the administration. "When I go and register, they automatically think I'm a graduate student or that I'm a professor playing a joke on them," Wyeth said.

Wyeth has two daughters, Tracy, age 11, and Janet, age 7. "This has been a really positive experience for us because before I had to work full time. Now we spend a lot more time together. I feel less pressure," Wyeth explained.

"Another thing is that I live on campus but because I'm not a traditional age student and my responsibility is as a parent, I don't hang out with students. But I'm also not really part of the community. [The faculty] do go out of their way. I have made friends with faculty," Wyeth remarked.

Wyeth was able to find housing in faculty court for her and her family. "Housing and residential life was great. They made special facilities available because of my situation," Wyeth said.

"The faculty always make me feel very welcome in the classroom because I bring this other real-life experience. Once students get used to me, they're fine," Wyeth said.

On campus, Wyeth is involved in the Continuing Education Organization, the Women's Resource Center, FLAG & B, and Kaleidoscope.

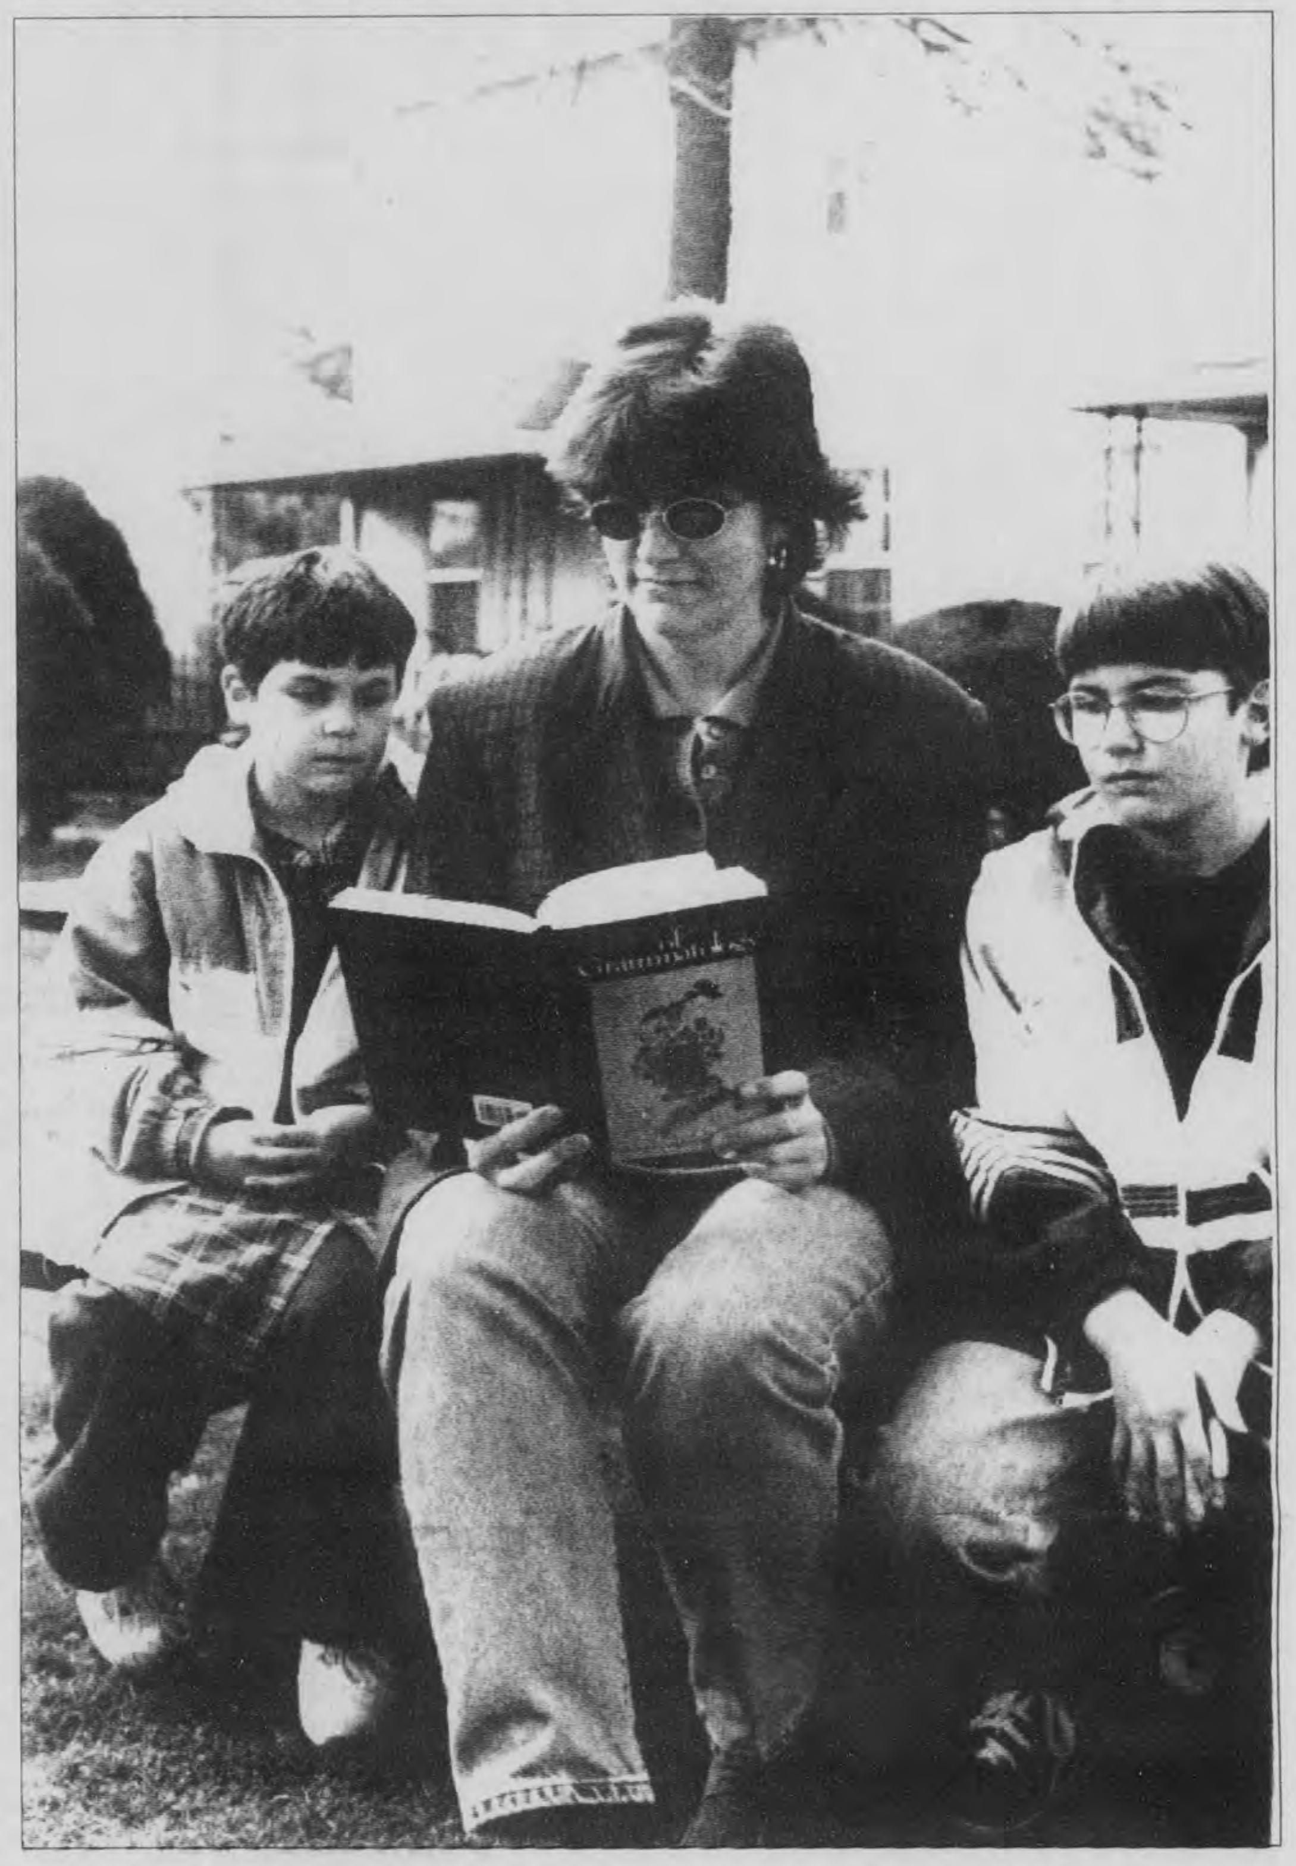
"I did have a position on the BSG. I resigned because some of the issues they were concerned with I just felt like I couldn't give positive input or perspectives," Wyeth explained.

Although Wyeth is involved in many groups on campus and is raising her two daughters, she still finds time to work as a research assistant for Marilyn Mumford, professor of English.

Wyeth wants everyone to remember "my profile isn't everyone's profile. The CEO comes together as a group, but since we have so many other responsibilities, we can't always make arrangements to meet with one another. There's still a sense of unity among non-traditional students, but we're still kind of separated."

Overall, Wyeth feels that coming to the University has definitely been a positive experience for her and her family. Wyeth asserted that "the administration has always bent over backwards for me. I don't ever feel like I'm stonewalled."

This is the second article in a three part series highlighting non-traditional students at the University. Next week there will be a profile on Doug Didyoung '99, an English and anthropology major and a resident assistant.



Cara Mickelsen—The Bucknellian

Mary Wyeth '98 has a full schedule as a non-traditional student. She enjoys spending as much time as possible with her daughters, Janet (left) and Tracy (right).

Arts Festival

From page B1

burg," is emphasized in the *Victorian Family Evening*, Sat. April 26, 7 p.m.-midnight at The Lewisburg Club, 131 Market St. Festivities include a mask-making workshop from 7-8 p.m., a slide show of Victorian Lewisburg from 7:30-8:30 p.m., and a master magician from 8:30-9:15 p.m..

Whatever your interests are, you will surely have no trouble finding activities which will instruct and entertain. "It's nice, because it gives you something to do with your parents," Schubert said. Isn't that what we all are desperately searching for this Parents Weekend? Take advantage of this opportunity to enjoy Victorian Lewisburg with your parents and you won't be disappointed.

Photo courtesy of Ebby Schubert

The Lewisburg Arts Festival provides craft lovers with many opportunities for shopping.

This weekend's Arts Festival highlights:

- Fri., April 18, 7-9 p.m. *Annual Art Exhibit Opening Reception.* This juried art exhibit features the work of local artists and presents awards for both art and photography. Located in the Kelly Gallery of the Packwood House Museum, 15 N. Water Street, this event begins the week of festivities.
- Sat., April 19, 9:30 a.m. *Children's Pet Parade.* Start off your day with those early-rising parents by coming to see local children parade down Market Street with pets of all sizes.
- Sat., April 19, 10 a.m.-5 p.m. *Market Street Outdoor Craft Show and Sale.* Arts and crafts, food and entertainment abound as over 100 craftspeople gather to sell their wares on Market Street. A full schedule of events for the week is available at the Arts Council Information Gazebo, located on 4th and Market.
- Sat., April 19, 10 a.m.-4p.m. *Middle Ages Encampment.* This event, presented by The Society for Creative Anachronism, will be located in Soldiers' Park, Market and N. Water St. The performance will involve dancing and combat demonstrations.
- Sat., April 19, 10 a.m.-5 p.m. *Packwood House Museum.* Tours of the museum, located at 15 N. Water Street, as well as the garden are available throughout the day. Be sure to check out the Scholastic Art Exhibit of local high school artists on display in the museum.
- Sat., April 19, 1-3 p.m. *Community Child Care Celebrates the Arts.* The Community Child Care Center, 116 N. 2nd St., will be showing original mixed media works by artists ages 1-6. Come discuss the pieces with the artists and enjoy the refreshments.
- Sat., April 19, 2 p.m. *Sunshine Generation Spring Show.* This group of performers, ages 3-teens, delight their audience with songs (from Elton John to Grease!), skits and dance. Come see them in Soldiers' Park, Market and N. Water St.
- Sun., April 20, 7-9 p.m. *Classical Jazz.* This local 7-piece jazz orchestra will rock Rusty's Banquet Hall, 15 S. 6th St., with its arrangements of your favorite jazz tunes.

. . .everyone else does!

Easing the transition

New hall established for study abroad students

Lindsay Rosenberg '99

by Raj Thangavelu

A large majority of Bucknell students have thought about studying abroad at one time or another. For them that involves many decisions including where to study, when to go and many more. However, one thing that is usually not thought of at first is where to live for the semester that you are on campus.

Well, there is now a solution to that problem.

Thanks to the hard work of Lindsey Rosenberg, '99, a Resident Assistant in Smith this year, a hall for study abroad students has been created. Rosenberg felt this was necessary because she noticed that many people "were frustrated about getting put on random halls" during their semester at Bucknell."

This plan has been enthusiastically embraced by the Office of Housing and Residential Life including Jim Wiltgen, the assistant director of housing and residential life. "I am very excited about the opportunities the floor creates for our students. It provides students who are abroad in the spring with an opportunity to work with other students who will be abroad," Wiltgen said.

This plan also provides students who return to our campus with an opportunity to share what they have learned with student who have just been through a similar experience.

The spring students "can also feel more comfortable in a community where all students are starting at the same time rather than adjusting to a floor that has been together for the previous semester," Wiltgen said. Wiltgen has also said that the hall would "be on the ground floor of Trax to accommodate the large interest for single rooms."

Why is all this needed? It is because study abroad is so popular at the University and is constantly growing in popularity. The Office of Study Abroad reports that this semester alone, 191 students are studying abroad. Last semester the numbers were lower but still significant as close to a hundred students were away from the University. These numbers are higher than they were just a year and a half ago when the University ranked fifth in a list of the top 15 bachelor institutions with 235 people abroad according to the Nov. 10, 1995 issue of the *Chronicle of Higher Education*.

PERSONAL EXPERIENCES

What makes study abroad so popular? I spent last fall studying in Copenhagen, Denmark and while I was there mostly to learn more about new cultures, I have to admit that I was looking to add a little extra to my resumé. However, there was a lot more to my reasoning for studying abroad. I looked at it as a challenge, as an opportunity to prove my independence and reaffirm my abilities to be able to handle different situations on my own.

This sentiment is shared by other people as well. When asked what she gained from her experiences abroad, Linda Wiegand '98, who studied with Bucknell in London last fall semester said, "It was a worthwhile experience, especially the independence such as traveling around by yourself."

For other people, studying abroad is seen as an opportunity to be able to get away from their regular routines at the University. Laura Stolting '99 will be studying in London next spring. She wanted to study abroad so she could "experience life in a different country and to gain insight into different cultures." Rosenberg, who hopes to study in Bath, England next fall hopes to "gain a more heightened learning experience [while away]."

While studying abroad is never easy, the hardest part could be coming back to the University. I don't think I could ever forget coming back to here in January and looking at the changed Bison. I felt like a first-year student all over again.

Wiegand felt that the hardest thing she has had to deal with since coming back is that, "going abroad, you experience so many things and coming back to Bucknell you are reminded of how constrained you really are."

This is a rice field offering for the Gods in the village of Munduk Pakel, Bali.

You know you're not in Lewisburg anymore when...

...people are intentionally driving on the wrong side of the road.

...cars actually stop for pedestrians in crosswalks.

...30 degrees is hot.

...everybody says G'day mate!

...classes are held around picnic tables.

...there are kangaroo guards on all the cars.

...every street has 50 lamp posts, but no lights.

...when animals besides reindeer pull Santa's sleigh.

...half of your class isn't wearing shoes.

...the sheep outnumber the squirrels.

...you have noodles or rice for EVERY meal.

...when 15 year olds are served in the bars.

...you go to Hungry Jacks for a Whopper.

To study abroad, or not to study abroad... that is the question

by Jeremy Flick
Bucknellian Staff Writer

It wasn't too long ago that I was asking myself this very question. Should I leave the familiar Bucknell campus that I had become so accustomed to over the past two years? What about all the friends I wouldn't be able to see? Was it really worth my while to study abroad? These and numerous other questions were racing through my mind as I debated whether or not to go.

After a great deal of thought, my answer was yes. I knew it wouldn't be easy, but it promised to be one of the most exciting experiences in my life. Then the real work began. Between application forms, essays, passport and visa forms and course approvals, I began to think that I would never be leaving U.S. soil. I quickly became aware that the mere decision to study abroad was the easy part. Don't forget one of the hardest decisions that needs to be made. What to pack in your two suitcases and a carry on to get you through an entire semester! It makes you wonder why when coming to Bucknell it usually requires a carload!

Having completed a semester abroad, was it really worth it? Unquestionably yes. I learned more about myself and what I am looking for in my future than I could have ever imagined. I found that I could adapt to things easily and that I wasn't afraid to try new things. I also realized the importance of knowing what is happening in the world. Up until last semester, I never really cared about what happened abroad because it just didn't seem to affect me. I know now that this is wrong. My experience gave me a whole new outlook on life and was probably the single most important event in my college career.

Without question, I see several reasons to study abroad. First is the educational experience. For me, class sizes were generally much larger than I am used to, at least six times larger than my classes at Bucknell. This size makes professor interaction almost non-existent, if at all. Because of the large class sizes, most of my learning came from independent research. I think it was a real benefit to me to have experienced this type of education.

Learning about another country was another highlight of studying abroad. It was funny to hear my friends talk about going to the beach for Christmas, or seeing Christmas decorations where santa's sleigh was being pulled by kangaroos. I had lunch at a bush picnic and experienced some Aboriginal culture. It wasn't just me learning though, as a friend and I were able to share the American Thanksgiving dinner with some foreign friends we met.

Meeting people and making friends from all over the world is another benefit of studying abroad. The only negative thing I see with meeting many foreign friends is the huge phone bill you will have after returning home. E-mail has reduced this barrier though.

Seeing the world is the fourth reason I have for studying abroad. There is so much out there to experience that everyone needs to start early if they want the chance to see it all. I also found that the college years tend to be the prime time for travel as this age group has few constraints on their life at this time. Many of the activities in which I participated were designed for college-age participants, which was ideal because you could travel and make friends at the same time.

Lastly, the main reason to study abroad is to have fun! The experiences will last a lifetime and you may never have the opportunity again. Whether it be rock climbing or snorkeling, camping in a rainforest or partying with your friends, the time you have will be the best and without a doubt, you'll have tons of photos to prove it. I still remember thinking about my friends being in class at Bucknell while I was white water rafting down a river halfway around the world...

SCIENCE & TECHNOLOGY

Unofficial pre-med program yields high acceptances

PRE-MED

from Page B1

visible record of volunteer work.

"While the student's GPA is crucial, it is extremely important to do well in the required sciences," Tonzetich said. Your science and non-science GPA is separated on the application.

Internships are limited in the area around the University. Only 14 total internships are available between the Geisinger and Evangelical Hospitals. Those students not accepted into these hospitals are forced to look elsewhere.

"One of the weaknesses of the University is the ability to achieve on the MCAT," Tonzetich said. Because we do not have a formal pre-medical program, "[professors] are not forced into demanding knowledge on the exam."

Many schools like the University discourage formal pre-medical programs because they do not promote a true liberal arts education. If a student does not receive acceptance into medical school after completing a pre-medical program, he or she is left with few options.

Tonzetich said, "the University does provide many opportunities for getting into med school, and most students are comfortable once they get there and do well. There is not a stressful, competitive environment at the University as in regular pre-med programs."

Prior to acceptance into medical school, a student must complete one year respectively of biology, organic chemistry, inorganic chemistry and physics. Some other schools require a year of English. The University does not because of the writing requirement included in the common learning agenda.

While the major of a medical school candidate is irrelevant, 80 percent of pre-medical students at the University major in biology. This is primarily because the medical school requirements are built into the biology degree program. The remaining 20 percent of candidates consist of all disciplines including sociology, engineering, and one East Asian studies major.

Chris Lupold '97 is a pre-med, engineering student. He said, "I didn't want to go the traditional path." Lupold also said that the biology department can become somewhat stressful with so many pre-medical students within the department. Lupold has been accepted to Jefferson Medical School and will begin his study in the fall.

"I like helping people," he said. "I thought [becoming a doctor] was the best way to apply my skills."

The University usually receives around 30 total acceptances each year to a variety of medical schools. Some of the most common include Jefferson University, the University of Pennsylvania and Johns Hopkins University.

A student has the best chance of getting accepted into a school in the state of their home residence.

"The interest of many incoming students change after their first year as they develop a diversity of professional interests," Tonzetich said. Usually close to 100 first-year students show an interest in medicine, but by their senior year, between 50-60 apply.

For those who do not get accepted after their first attempt, there are numerous options to pursue in order to prepare for an eventual medical career. These options include earning a graduate degree, doing post-bachelor work, or acting as a physicians assistant.

The average age of medical students has increased in the past several years to 26. Today's college students are forced to compete with adults who have had several years experience after completing their degree.

Jonah Half—The Bucknellian

John Tonzetich, associate professor of biology, is the pre-med advisor for students who are interested in medicine. Although not a formal program, 85 percent of students with a GPA of 3.4 are accepted into med school.

Students typically apply to medical school during the spring of their junior year. The MCAT is offered in April and August. According to Tonzetich, it is a full year before the applicant is notified of acceptance.

Tonzetich began his position as the University's pre-medical advisor in 1981. According to Tonzetich, he is "a resource to students in terms of what they should be doing in preparation for a medical career." He prepares evaluations for students and provides lecturers and visitors for the pre-medical society.

Lupold believes the numbers of applicants will eventually dwindle down to past figures, but as for now he said, "I'm excited and ready for a new environment."

Caught in the Web: The politics of political sites

by Curran Filer
Bucknellian Staff Columnist

Anyone who has tried to follow politics these days knows that it's confusing. There are so many complex and emotionally charged issues. But as complex as these issues are, to really be a participating member of this nation, we must be informed on the issues if not engaged in the discussion. Somehow we must try to make sense of all the opinions and issues. One way to do this is through the Internet. Many of the best political publications in the country now have on-line versions. Also, many political organizations have web sites. In fact, in my opinion, the Internet is the best thing to happen to political discussion in a long time. Through the Internet, not only can you view other people's opinions and writings, but you can present your own more easily than ever. I've tried to be non-partisan in writing this column, but I can't guarantee that it has no unintentional bias.

The Harvard Political Review
`http://hcs.harvard.edu/~hpr`

The Harvard Political Review is one of the country's preeminent political journals. It also happens to be an undergraduate journal. It was founded in 1969 by a group of Harvard students (Al Gore was one of them) and tries to be non-partisan and non-extreme. It's published every month and includes editorials, interviews, book reviews and feature articles.

The Political Science Quarterly Home Page
`http://epn.org/ psq.html`

The Political Science Quarterly is published by the Academy of Political Science. Started in 1886, it bills itself as the "most widely read and easily accessible scholarly journal on government, politics, and public policy, both international and domestic". It's a nonpartisan journal geared towards the political science specialist as well as the general reader. It has feature articles and lots of book reviews.

Welcome to George Magazine
`http://www.georgemag.com/toc.html`

George, the political magazine edited by John Kennedy, offers an offbeat view of politics. It has interesting stories, but fairly cursory editorials from Kennedy. You can find links to all the major political parties and some smaller ones in the "Virtual Politics" area.

Welfare Reform: An Analysis of the Issues
`http://www.urban.org/welfare/overview.htm`

This site is an in depth, on-line analysis of the issues in the welfare reform debate. It is provided by the Urban Institute and is edited by Isabel Sawhill. It defines the arguments against the current welfare system and then goes on to assess how accurate the criticisms are and how different plans will deal with these criticisms. It also has nice graphics to go with the writing.

THE URBAN INSTITUTE

The Democratic National Committee
`http://www.democrats.org`

This is the home page of the Democratic National Committee and the Democratic Party. It has Democrat news, events and information on how to get involved. The DemoFAQ answers frequently asked questions about the DNC, like where it's located and what its structure is.

Welcome to Republican Main Street
`http://www.rnc.org`

This is the web site for the Republican National Committee and the Republican Party. It has generally the same stuff as the Democrat's site, but has a "Main Street" theme. Go to the News stand to get the latest RNC news, and to the Cafe to play some games.

Center for Responsive Politics
`http://www.crp.org/index.html-ssi`

Center for Responsive Politics

The Center for Responsive Politics is a non-partisan, non-profit research group that studies Congress and the influence that money has on its actions. Its work is aimed at creating a more involved citizenry and a more responsive Congress. It's funded by a number of private charitable trusts. The CRP site is a good place to learn about the effect and extent of PAC spending and campaign contributions.

The Capitol Steps Home Page
`http://www.capsteps.com`

After all that heady political punditry I thought I'd provide something a little lighter. The Capitol Steps is a comedy group made up of current and former Congressional staffers that lampoon Congressional activities. Its site provides us with audio clips of the group's humor as well as humorous reporting.

Capitol Steps

Science & Technology Calendar

Fri., Apr. 18 — **Biology Seminar at 4 p.m. in Rooke Chemistry Auditorium, 116**
Dr. Roy Hammerstedt, professor of biochemistry at Penn State University, will present a seminar entitled "All Men are Not Created Equal and Cannot Equally Create: A Conflict at Fertilization."

Sat., Apr. 19 — **Observatory Open House from 8 to 11 p.m.**
Telescopes will be used to observe Mars, the Moon, comet Hale-Bopp and other astronomical objects. There will also be a presentation about comet Hale-Bopp.

Tues., Apr. 22 — **Merck Lecture at 7:30 p.m. in Rooke Chemistry Auditorium, 116**
Dr. Thomas A. Baille, vice-president of the Department of Drug Metabolism, Merck Research, Rahway, NJ, will speak on "Application of Mass Spectrometry to Studies in Drug Metabolism and Toxicology."

BRAIN TEASER

The Josephus Problem

Hegesippus tells us that after the Romans captured Jotapat, Josephus and 40 other people took refuge in a cave. All but Josephus and a friend declared they would rather kill themselves than be captured. To save himself and his friend, Josephus is thought to have persuaded everyone to agree that they would arrange themselves in a circle and that every third person be killed until one was left, who would then supposedly commit suicide! In which positions did Josephus place himself and his friend?

Answer:

Josephus placed himself and his friend in the 31st and 16th positions.

Students and business cooperate to protect wetlands

Central Builders, Craig Kochel, professor of geology, and his students team up to protect the delicate Montandon Marsh

by Natalie Elsener

Just across the Susquehanna River, north and south of Route 45, is one of the most unique wetlands in the state of Pennsylvania, but its beauty can hardly be recognized because of rusted cars, litter and abandoned gravel pits from mining in the '50s and '60s.

Fortunately, Central Builders, a company planning to mine a portion of the southern marsh, has made several environmentally conscious efforts to preserve the protected wetland area in the marsh.

Water fowl instinctively follow the Susquehanna River during migration. The quiet area encompassing the Montandon Marsh provides a desirable resting place to relieve their exhaustion. The blue heron along with several species of hawk and sparrows depend on this land to nest, feed and mate year after year.

Additionally, the swamp-like environment of the marsh is home to the best quality of river bullrush *Scirpus fluviatilis* (a grass-like sedge that stands about six feet tall) in the state, and another species *Carax bullata* (a bull sedge adapted to the swamp conditions) that only remains in one other location in Pennsylvania.

Leatherleaf, poison sumac and cranberry thrive in this area, only elsewhere to be found in the Poconos and Allegheny plateaus. The bogs, ponds, damp forest and ancient sand dune of the marsh provide a variety of habitats.

Glacial run-off of sand and gravel some 20,000 years ago formed this unique ecosystem by creating a series of channels throughout the Susquehanna Valley. Eventually the channels dried up, becoming Pleistocene outwash terraces or abandoned floodplains thick with gravel. The water drained leaving the broad Susquehana River and protected wetlands throughout the marsh.

Central Builders has purchased the marsh south of Route 45 with the intent of mining the area in between the protected wetland and the river within the next year. It is a disturbed area which has been farmed over the years for corn.

Threatening mining which occurred during the 1950s has brought forth concern about developing the adjacent wetland. The ponds and lakes viewable from route 45 today are old gravel pits that barely support any life forms.

Additionally, peat moss was taken from the wetland years ago, disrupting the intricate natural balance. Young forests near Route 45 are also evidence of the destruction of older trees during the threatening mining.

Central Builders wants to avoid threatening the protected wetland. Over the last six years, they have given grants to the University's geology and biology departments to research and provide additional information about water flow, wildlife and environmental hazards that could develop.

Research has been funded since 1991. Wayne McDiffett, professor of biology, said, "It is the best situation we can hope for. It is a good relationship."

Well installations, water level monitoring and water quality studies over the years have provided speculation about the future of the wetland.

Research by Craig Kochel, professor of geology, and his students indicates that mining of the highlands area will not affect the wetland. Since the water flows in a western direction from the wetland through the terraces and down to the river there is hardly a threat that the wetlands will be drained. Kochel explained that pumping is not planned, but if this were the case then there might be threatening effects.

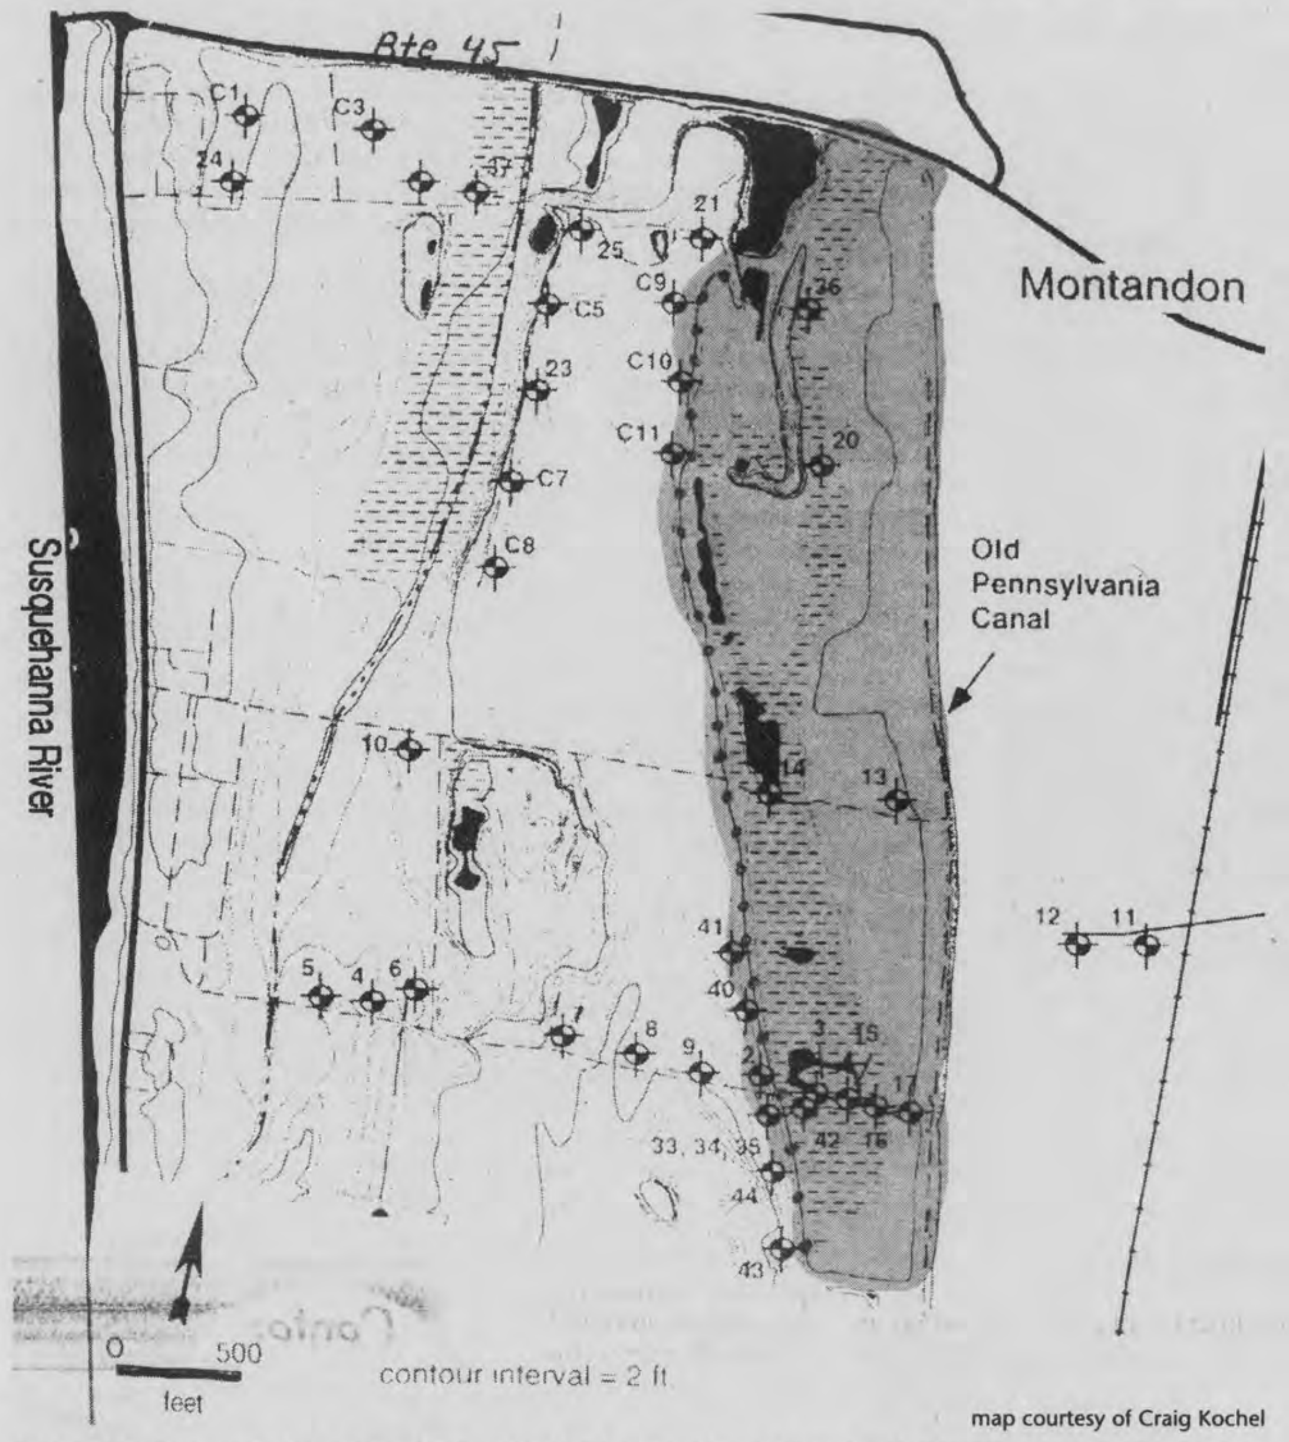
This is such a positive opportunity for the students to be able to participate in the environmental planning of Central Builder's property because, Kochel said, "they will be allowed to research their impact while mining takes place," and modifications in the mining process will be made if threatening conditions arise.

Warren Abrahamson, professor of biology, seems optimistic about the future of the marsh. The mined highlands will be brought to the level of the protected wetlands, and the entire marsh will eventually develop into a conglomeration of wetlands among the remaining sand dunes.

The primary wetland will become like a seed establishing an array of plants and fauna throughout the man-made wetlands, and it will continue to keep the balance of nature by filtering water and mitigating flood threats.

Central Builders has satisfied the uncertainty about the future of the marsh. In this age of commercialism and building, the company's innovative approach to the development is a unique situation for a developer to create. University professors and students have been given the rare opportunity to work with the company throughout the entire phase; their research and hands-on experience have been invaluable.

Through the efforts of Central Builders, birds will continue to have a place to stop on their long journeys, and the rare fauna will flourish for years to come. Central Builders and the University's faculty and students show through their careful research and responsible conservation plans that the delicate wetlands will survive.



map courtesy of Craig Kochel

The map represents the southern half of the Montandon Marsh that Central Builders owns. The land in the shaded gray area indicates the protected wetlands while the rest will be mined for sand and gravel.

Student committee plans celebration of Earth Day

Although Earth Day is a nationally celebrated holiday, students take the time to plan and participate in a local extravaganza

by Karen Fadely

Many University students consider Earth Day to just be a day to sit in the sun and listen to bands, but Earth Day is a nationally celebrated holiday with a history.

Earth Day is officially on April 22. It was created by Senator Gaylord Nelson of Wisconsin. In 1963, Nelson, troubled by the lack of attention to the environment, approached President Kennedy to give the issue national visibility. In the fall of 1963, President Kennedy started his conservation tour with Senators Hubert Humphrey, Gene McCarthy, Joe Clark and Gaylord Nelson. The tour did not raise environmental issues to the headlines but did plant the idea of Earth Day.

Nelson came up with the idea of Earth Day in July 1969 while speaking out west. He was moved by the anti-war teach-ins in protest of the Vietnam War occurring on college campuses. He decided that a nationwide teach-in on the environment would be perfect to raise awareness.

In the fall of 1969, Nelson contacted state governors, mayors of major cities, and college newspapers explaining the event, and in December of that year, he opened the National Clearinghouse for Earth Day to handle inquiries and activities.

The first Earth Day occurred on April 22, 1970. It is estimated that 20 million people participated in peaceful demonstrations with 10 thousand grade and high schools, two thousand colleges and one thousand communities involved.

The University has been celebrating Earth Day for years. The Earth Day Planning Committee meets each year in the fall to prepare for a week long of events ending with a big Earth Day celebration on Sunday. This year Earth Day will be celebrated on Sunday, April 20 on the first year quad. The day will be full of bands, speakers and activities. Numerous on and off campus organizations are sponsoring booths with activities and information. Check out the schedule.

Karen Fadely—The Bucknellian

Molly Moffe '00 and Brad Bernstein '99 of the Earth Day planning committee helped to prepare for the week long events beginning on Sunday, April 20th. The events will be held on the first year quad.

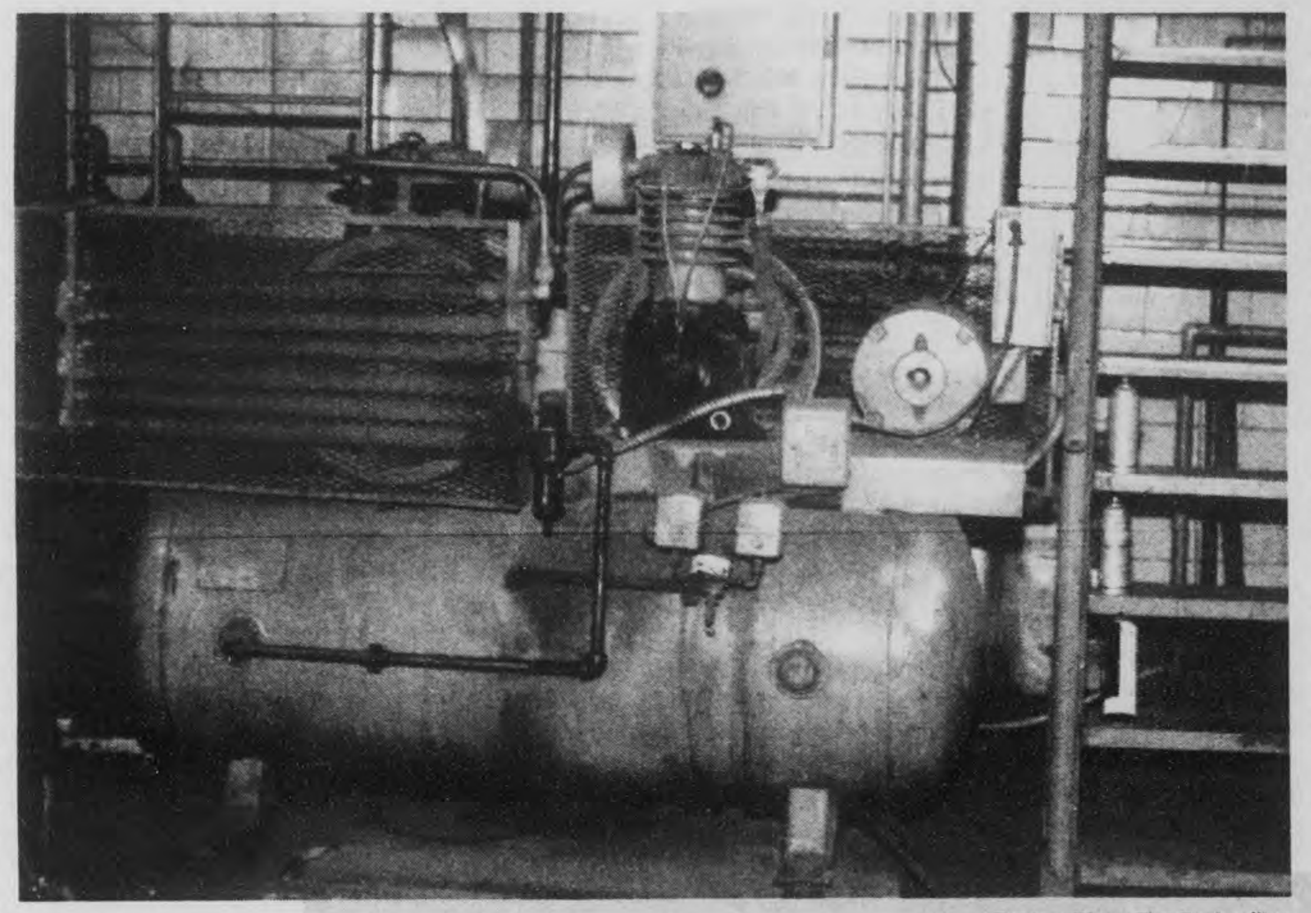
New "co-generational" power plant provides mutiple benefits over old

By Catherine Fahey
Bucknellian Staff Writer

THE OLD PLANT

Debate has surrounded the University's antiquated coal-fired power plant for years, but finally, early in March, the construction phase of the University's transition from the coal-fired, 50-year old technology to a modern natural gas fueled plant began.

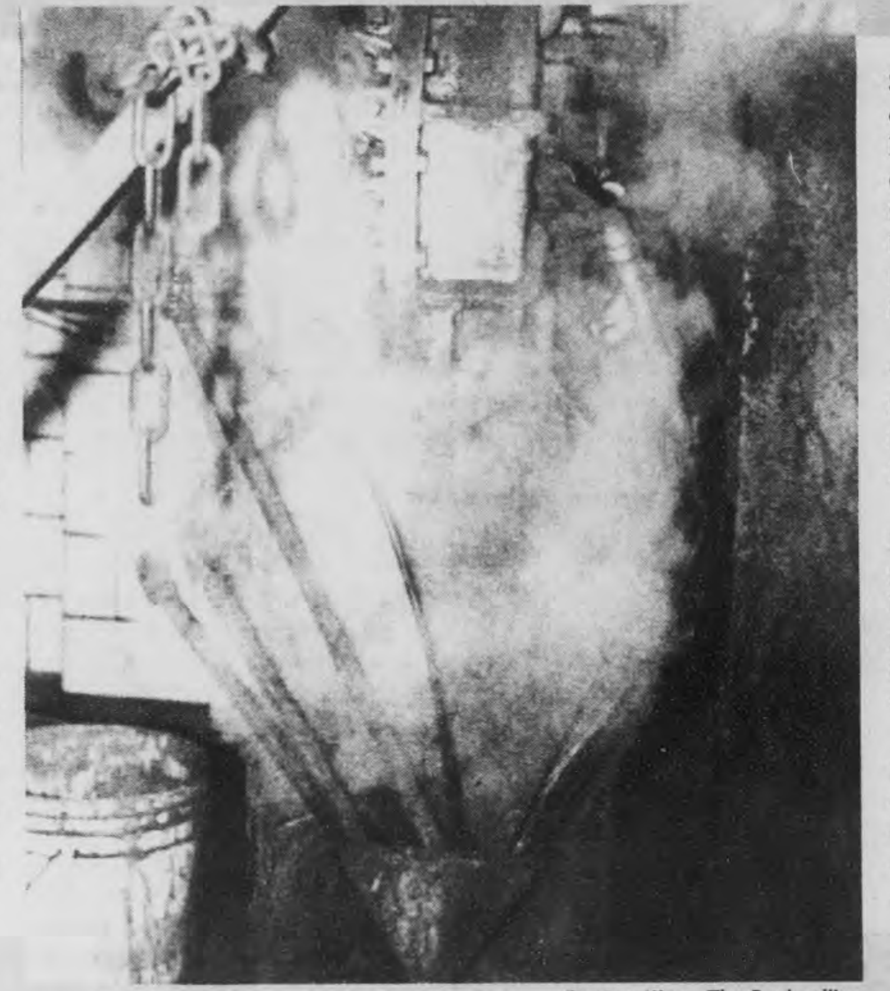
Dan Spadoni, community relations coordinator of the Pennsylvania Department of Environmental Protection (DEP), said, "they are moving forward and we're pleased."



Beetna Kim—The Bucknellian

Above: The main air compressor supplies air for the controls of the main power house. The air helps burn the coal, which in turn produces electricity in the plant.

Below: According to federal regulations, the hot water produced from the plant must be collected in some form. The resulting steam from the hot water is controlled with a fan unit. The hot water is collected in the vertical drains and directed toward the funnel at the bottom of the photo.



Beetna Kim—The Bucknellian

Below: An old 75 kw generator is used to produce electricity for the old power plant. The steam from the water caused by the burning coal turns this turbine to produce electricity. The new plant will be "cogenerational," that is, it will produce heat and electricity simultaneously using the same fuel. The old coal process does not produce steam and electricity simultaneously, and two separate ways are required. The new plant will still have the steam turbine, but it will burn natural gas in the gas turbine rather than using fuel directly.

Beetna Kim—The Bucknellian

FUTURE PLANS

Within the next several weeks, project manager James Knight explained that the coal boilers will be shut down, and the new gas boilers will be in operation at a temporary site while the power plant is inwardly stripped of the coal machinery.

After the removal of the coal-burning equipment, the gas boilers will be moved to their permanent position within the plant.

Over the past semester, the campus and the community has observed tangible evidence of the University's project: roads were closed to install gas lines and power outages resulted in association with the gas boilers brought in two weeks ago. Despite the progress, questions still linger as to the continued environmental effects of the coal burning, and when the end will be reached.

Although only recently has the action become evident, the project was actually started in 1991, Knight said. "We recognized we were going to run out of steam capacity within a few years." The present plant produces steam to heat and air condition the buildings on campus. "Now when we get a very cold day," described Knight, "the plant is unable to heat the buildings suitably."

Another concern is the reliability of the present plant, which was built in 1949. Knight said the real question lies in what would occur if this project was not undertaken. He stated he was "very concerned with having 50-year old equipment," adding the University has been very "fortunate" that the equipment has continued to work. If it ever was to fail, "serious problems" would result.

WHY THE NEW PLANT?

Acknowledging the University's growing energy needs, the University began examining different options. The decision was made to construct a plant that used natural gas as its fuel rather than coal, in part because a new coal-burning plant was estimated to cost approximately $30 million. The chosen design will be completed for $12.5 million, paid for by money borrowed through issued bonds.

Knight described that a natural gas plant is "much easier to build," for one does not "need the pollution controls" required with a coal plant "because natural gas is a much cleaner fuel." Knight said a great deal of equipment is required to reduce pollution emissions levels, which "adds substantially to the cost" of a modern coal plant.

Knight also emphasized that the new plant will essentially "pay for itself." Whereas currently the majority of the University's electricity must be purchased, the new plant will enable the University not only to meet its own electrical needs, but also to produce an excess of energy that could be sold. With the capacity to produce more energy than is presently required by the University, Knight said, "we will have the capability to meet the demand for energy on campus for the next 20 years," as the University's demand rises. Through generating its own energy, and thus, eliminating the costs of purchasing outside energy sources, "we will be saving to pay back [the money] we used to build [the new plant]," Knight said. There will be a "positive economic effect" upon the University, he added.

Assistant director for technical services and utilities Mike Noll said that although the University "had to borrow money," it spent "less money than if it had not done the project." He described that the new plant will be "virtually 75 percent efficient" versus the present coal plant's approximate 33 percent efficiency. Noll refers to "a window of opportunity" that was open, driving the choice of the new plant design. Noll explained the new plant would allow the University "to solve our pollution problem, to redo 1949 technology, have it pay for itself," and additionally provide more energy for the campus over time. "All indicators were positive," Noll said.

DESCRIPTION OF THE NEW PLANT

The new facility will be what is termed a "cogeneration" power plant. Knight explained this means the same fuel will be used to produce both steam and electricity. Currently, while both steam and electricity are produced through the burning of coal, the process is different. The coal is burned in the boiler to produce steam for heat. The steam is then put through a turbine which reduces the pressure. The steam then spins the turbine, generating electricity.

"In the new plant, we will still have the steam turbine, but rather than using fuel directly, we will burn natural gas in the gas turbine. The burning will produce heat and the heat causes the air to expand. That force [of expansion] drives the rotation of the turbine." Essentially, the cogeneration process produces heat and electricity simultaneously, while the coal process required two separate steps.

"When the gas comes out of the turbine, it is still hot, about a thousand degrees," said Knight. He explained this gas from the turbine is put through the boiler to produce more steam for heat. "What would normally be wasted energy" is able to be utilized, Knight asserted. Cogeneration is a "very efficient process."

ENVIROMENTAL ISSUES ABOUT THE CURRENT PLANT

Much concern has been raised in the past over the environmental consequences of the current plant's fuel. In August 1995, the University received a "notice of violation" from the DEP for exceeding allowable opacity limits. Opacity is a measure of the light passing through the plume of smoke emitted from the smoke stack. A high opacity indicates that little light is passing through the material, and signifies that a high level of pollution is present.

Spadoni said that the DEP had not issued a notice of violation to the University since August of 1995. However, Spadoni emphasized, "I don't think it is correct to say they [the University] are currently in compliance all of the time. They may be out of the opacity regulations at times. They will be in full compliance once they complete the transition to natural gas."

The present plant burns coal very inefficiently, producing about 1,000 tons of pollution a year. "Coal is a relatively dirty fuel," Spadoni said.

Dr. Craig Kochel, professor of geology, described the many pollutants the burning of coal releases into the earth's atmosphere. "The main product is particulate matter—ash, very fine grained." Kochel said this is the "'soot' that accumulates on the window sill," pointing to the geology building ledge.

Many students often complain of the fine layer of black dust that often coats their cars when parked uphill. Lewisburg residents of River Road also complain of the "black soot" that dirties their homes. Kochel described this as "ash fallout," and said that this pollutant is not a tremendous problem aside from being a "nuisance." Kochel stated the ash "could be a problem for people with respiratory problems," and because it is fairly abrasive, the glass of a car's windows may become scratched. All in all, Kochel described the ash product as less of an environmental problem and more of a "visual, aesthetic problem."

Kochel stated the real danger lies in the gases emitted from the burning of coal. Certainly, he stated, some are not harmful, such as water vapor. "That's just steam, which is no problem," he said. But some gases are very problematic environmentally. Kochel said when coal is burned, it releases sulfur dioxide, "the chief player in the enhancement of acid rain."

Kochel explained there are impurities present in the coal, and that one does not only burn pure carbon, but these impurities as well. Sulfur dioxide originates from pyrite material within the coal, described Kochel. Pyrite becomes oxidized in the burning process, and releases sulfur dioxide.

Spadoni stated "the resulting sulfur dioxide combines with oxygen and water vapor in the air to produce acid rain." Spadoni said that "the principal sources" of acid rain were "smoke stacks of fossil fuel power plants, industrial plants, and some automotive exhausts." However, he emphasized the collective impact of these sources—no one point of origin is solely responsible, but rather the problem is a sum of many sources. "Acid rain is an extremely widespread problem that extends beyond the boundaries of Pennsylvania. It is very difficult when we are talking about a whole section of the United States to focus on one small source."

Kochel added that acid rain is often a problem that affects those "downwind from the source," rather than affecting the area of origin. Spadoni said that presently this problem is being addressed by a federal law, describing that state laws could not control the problem "because how can you keep emissions from traveling across state lines?"

Kochel said that devices called scrubbers, which either physically filter out particulate pollutants or filter the sulfur dioxide and other gases via chemical reactions, are available to reduce the pollution released into the environment. The University plant did examine the possibility of using scrubbers. However, considering the tremendous cost of the equipment for only a few years use, this option was determined to not be feasible.

The present plant burns a mixture of both hard and soft coal, approximately a "fifty-fifty mix", Knight said. Kochel explained that there are different grades of coal. Anthracite, or hard coal, "burns much more completely than bituminous," or soft coal. He explained that anthracite has undergone "more metamorphism," more changing processes, and that the heat of these processes has driven off the impurities, such as those resulting in the release of sulfur dioxide. He states there is "much more carbon" in anthracite coal. He described it as the "best to burn" because it produces more heat than bituminous coal and it produces less contaminants. "It is a more pure form of carbon," he said.

Despite the environmental benefits, Noll explained that 100 percent anthracite cannot be used in the coal boilers. While the "original boilers were designed as hard coal boilers, they were modified to burn cheaper soft coal when the energy crunch came," Noll said.

He states that in response to the energy crisis, "the then Physical Plant director decided to go to this [present system]," an "economic" decision added Knight. Knight stated that the present plant does not "have the capability to burn 100 percent anthracite." He explained that the plant "can't sustain the heat output" of anthracite coal.

The emissions levels are "within acceptable ranges," Noll said. He described the fifty-fifty mixture of anthracite and bituminous in terms of the sulfur dioxide problem only, as a "compromise between economics and pollution."

THE INFAMOUS COAL PILE

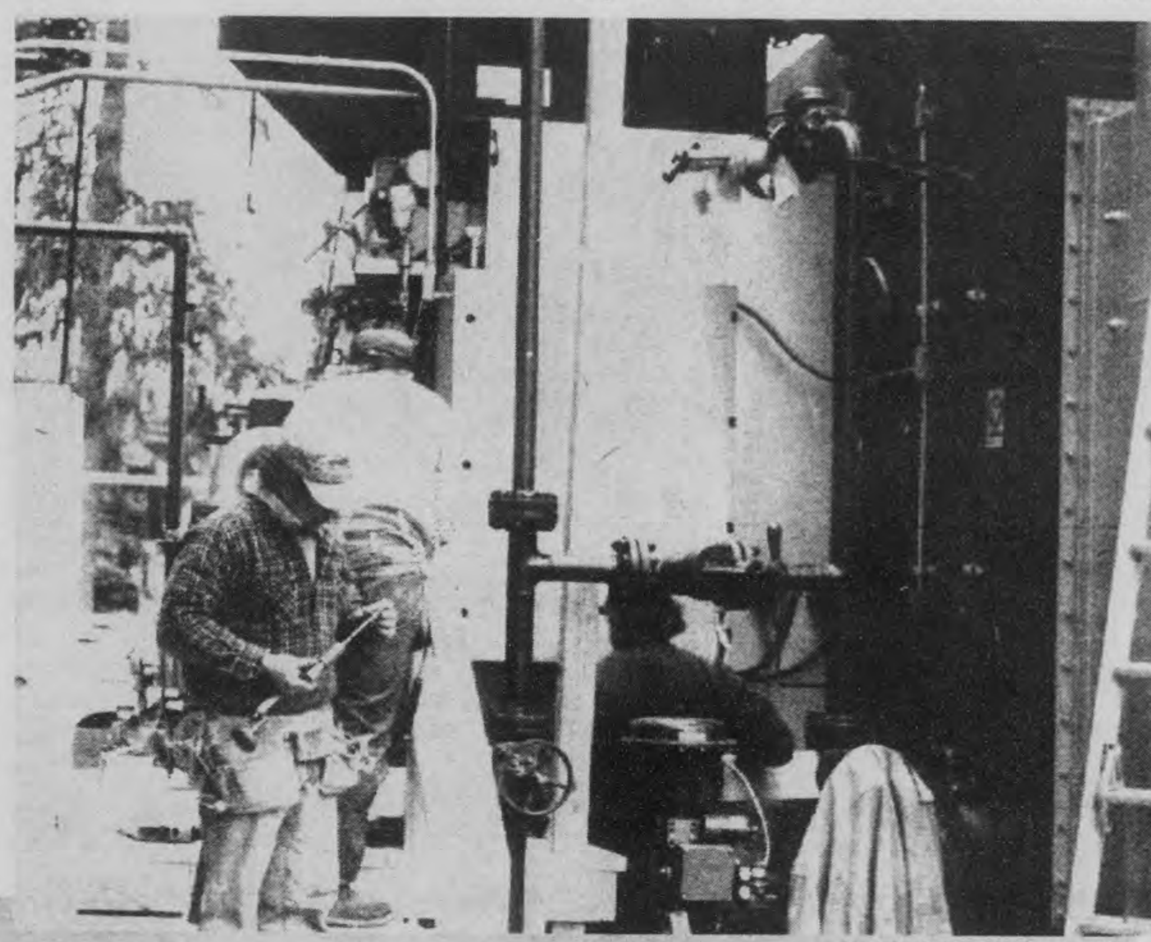
Concern has recently been raised over a coal pile, lying dormant for many years across Route 15 on Smoketown Road, and the possible environmental implications. While the pile has laid there for years, in the last months of the coal plant, it is now being utilized.

Noll stated this coal was stored there "in the event there was a coal strike," as a "cushion," a reserve supply, and that currently the plant was "in the process of using up" that coal. While both anthracite and bituminous were stored there, presently only anthracite is left.

Knight said coal is very stable, and that it is very typical for plants to store coal for long periods of time without the possibility of it releasing anything that could be environmentally harmful. Knight commented that they had spoken with the DEP and that there were "no regulations that govern storage because of the minimal impacts."

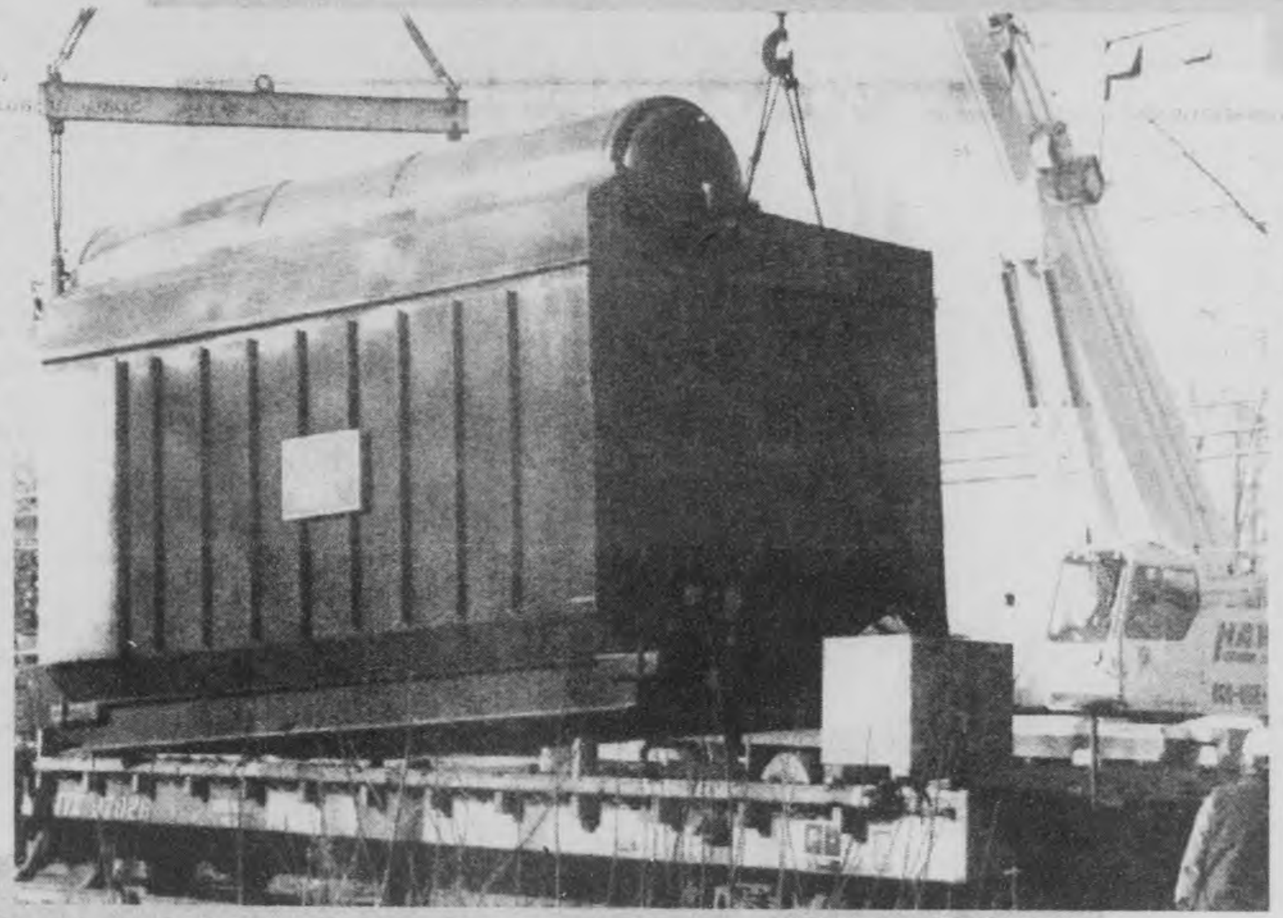
Addressing the possibility of polluting the stream close to the pile, Knight said that the coal was "pretty isolated from the stream bed," that a tree line separated the two. Professor of biology, Wayne McDiffett, said that several students in the past have performed studies of the stream. "We never saw any measurable difference in the water that could be attributed to coal," McDiffett said. He added, however, that this "might be a function of when we did it," describing that a hard rainstorm would have the capability to wash coal material into the stream.

McDiffett stated, "while it could have had some effect on the stream," it was "by and large, pretty benign." He called the effect "relatively small," and stated this was because the coal was "not in the stream, but adjacent to it." He added, though, that the pile has been an "eyesore." Knight related that once the coal supply is depleted, the area where the coal has been stockpiled will be restored with the planting of grass.



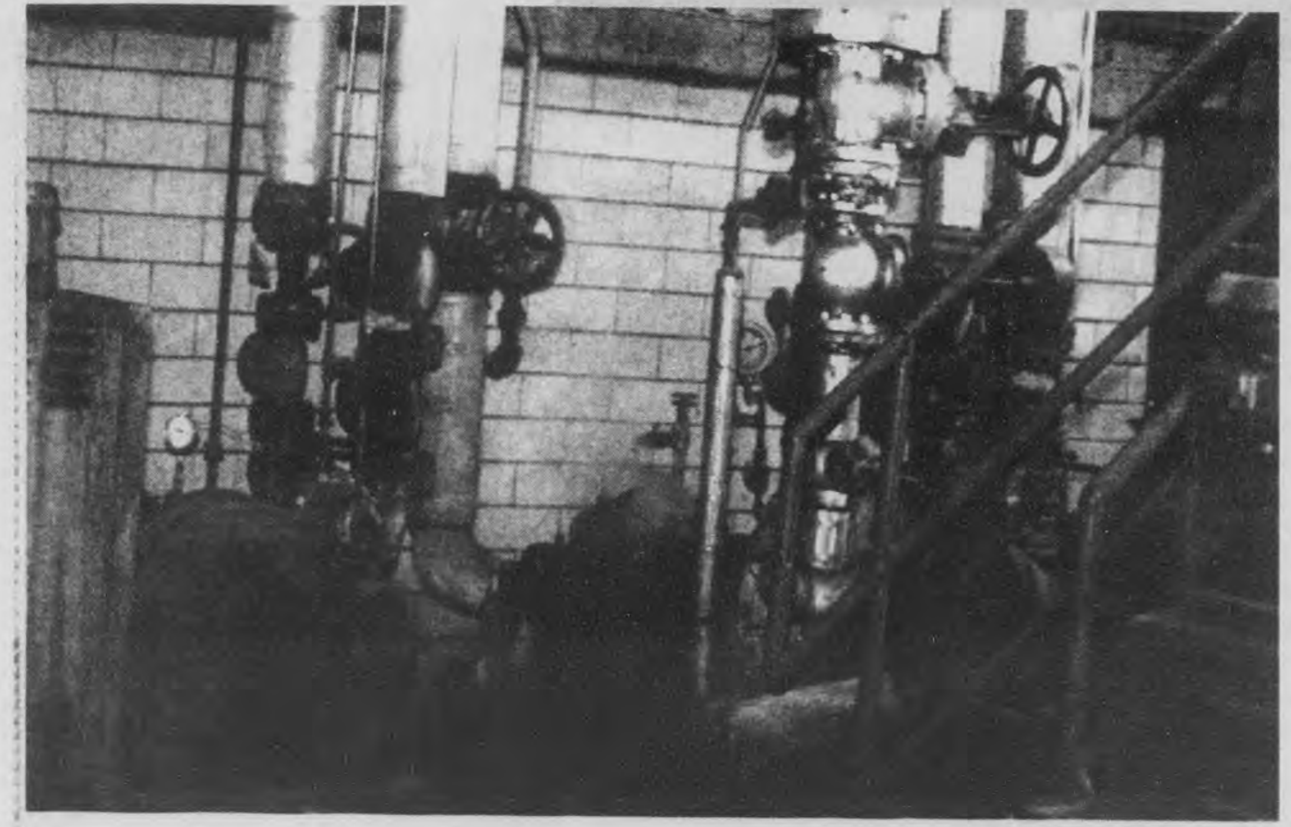
Beetna Kim—The Bucknellian

Above: A carpentry crew builds a platform to reach the boiler controls for plant operations. With the completion of the power plant project, the University will see four major benefits: a reduction of environmental pollution, an increase in the energy production, an economic benefit in that the power plant pays for itself, and the ability to handle the "winter Peak."
Below: The new boiler is lifted into the power plant.



Mitch Stewart—The Bucknellian

Below: The new boiler will be fueled by both steam and electricity. The right set of pipes is the steam-driven boiler feed pump. The left set is the electric driven feed pump. Both pumps will be used to supply water to the boilers. The coal is burned in the boiler to produce steam for heat. The steam is then put through a turbine which reduces the pressure. The steam then spins the turbine, generating electricity.



Beetna Kim—The Bucknellian

CHANGING TO NATURAL GAS

The transition to natural gas as a fuel source will show tremendous improvements environmentally. Knight stated that "the emissions levels will be much lower of every pollutant, simply from the fact that natural gas is cleaner." Kochel described that natural gas undergoes "relatively complete combustion." Knight added that the soot coating on homes and cars will "disappear." This will be the case, Kochel explained because there are "no particulates because you are burning a gas."

Noll emphasizes the hidden environmental benefit of the "displacement of pollution at utility plants." Not only will the University burn the cleaner natural gas, but because it will be producing all its own energy, it will avoid buying energy from plants that would produce energy through pollutive processes.

Presently, a dark plume of smoke is emitted from the stack. Knight described that with natural gas, on cold days, you will see a white cloud that is just harmless water vapor, and on warm days "you couldn't tell from looking at the stack if the plant was operating or not." Kochel stated that the burning of natural gas "probably releases a little carbon dioxide and carbon monoxide, but not in very large quantities by comparison" to the burning of coal. Spadoni stated that while the "ultimate goal" exists, "we haven't reached the technological achievement to have zero emissions." He described natural gas as contributing to environmental problems in "a much smaller way," calling it "an environmentally wise decision by the University."

THE CURRENT STATE OF THE PROJECT

While great measures have been accomplished through the power plant program, much still remains to be done. "At this point, we're about a quarter of the way through the project," with about 50 percent of the engineering complete, he said. Over the next year, the transition to the permanent system will take place. A third boiler will be purchased and installed in the future, and an addition, the housing of a gas turbine, will be built on to the front of the physical plant. Knight commented that there may be occasions when roads will be closed to bring in equipment.

Knight stated the project is "doing well" in meeting its deadlines. "We are still on schedule to meet that target of June 1998."

"This is the single biggest project the University has ever done, and that is one reason why it has been scrutinized," Knight stated. He explained the project has taken so much time because it is a "very complex project." Knight described that many options had to be considered, and the trustees permission had to be received for every phase of the project.

Knight also commented that one of the great difficulties was that this plant was being constructed while simultaneously "keeping the system that keeps campus going." Knight stated, "if we had the space, we could build the plant right next to the old one." Instead, the new plant is being built inside the old plant. It is a "real challenge," he said.

Noll added that he has visited universities where the process has taken up to 10 years. "It may seem to be a long process, but we've been working towards an end throughout," he stated.

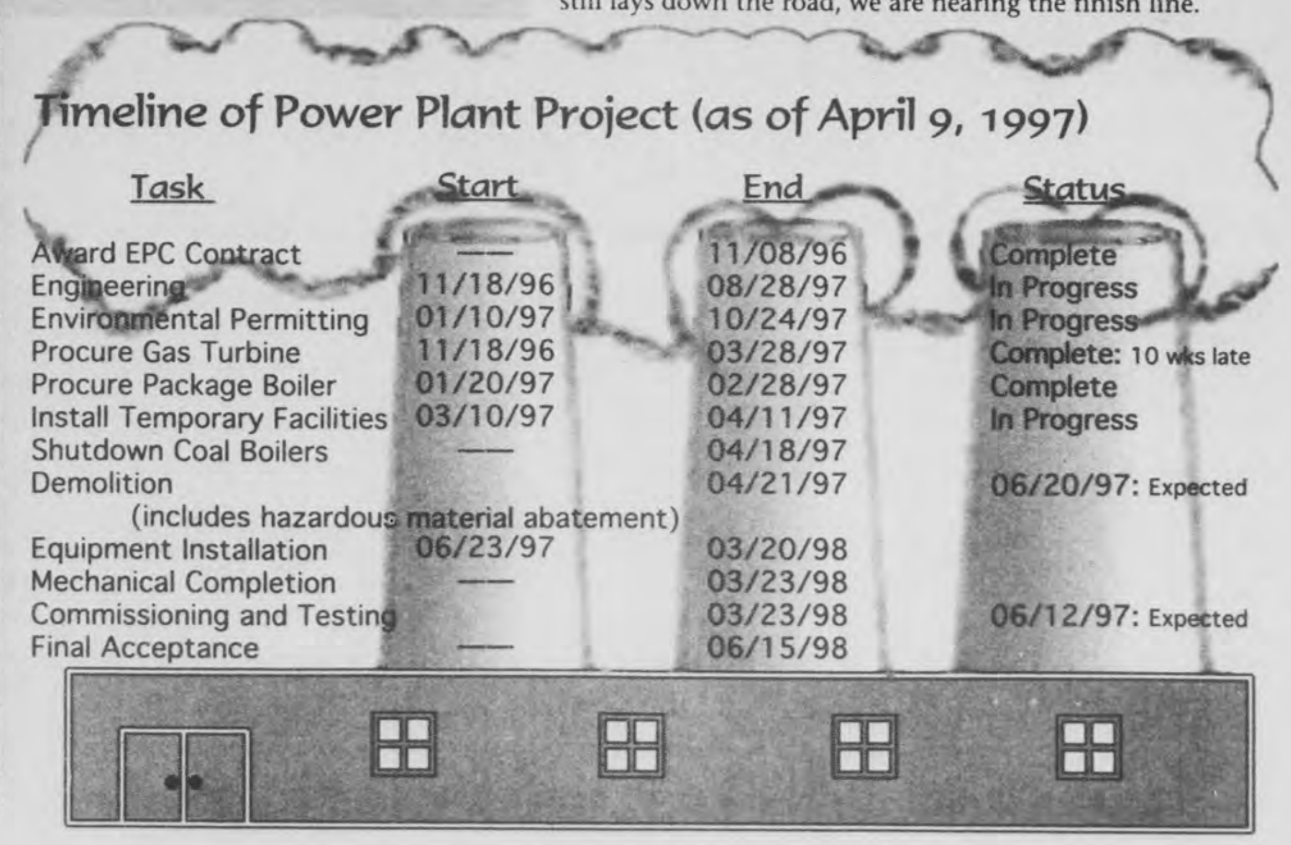
Aside from the length of the project, the complaints and the problems involved, within the next year the University community will witness a complete change from present conditions. Not only will the campus' demands for energy be filled over the next 20 years, but pollution will decrease. "Local folks will no longer have ash on their roofs," Noll said. He also stated the University's past opacity violations would no longer be a problem.

Noll added another benefit was more of a "humanistic" one. He described that to keep the coal plant clean and operating was a "tough job." Kochel commented that unlike coal, which requires a great deal of management with its storage and clean up, natural gas was much easier to handle. Natural gas is brought in via pipelines with "nothing left when it's finished," Kochel explained. Noll stated the coal boiler is not even automatic. "We are jumping to very modern technology," he said. He described the move as "positive for the operating personnel."

BENEFITS OF THE NEW PLANT

With the completion of the power plant project, the University will see primarily four major benefits, explained Knight. There will be the reduction of environmental pollution, and the increase in the energy production capacity of the plant. Also, the University will no longer worry about the reliability of the power plant, while gaining the ability to handle the "winter peak." Additionally, there exists the "economic benefit" as the plant "pays for itself," Knight said.

Certainly, these are all gains for the University community, in a project that has been a long time coming. While the end still lays down the road, we are nearing the finish line.



Timeline of Power Plant Project (as of April 9, 1997)

Task	Start	End	Status
Award EPC Contract	——	11/08/96	Complete
Engineering	11/18/96	08/28/97	In Progress
Environmental Permitting	01/10/97	10/24/97	In Progress
Procure Gas Turbine	11/18/96	03/28/97	Complete: 10 wks late
Procure Package Boiler	01/20/97	02/28/97	Complete
Install Temporary Facilities	03/10/97	04/11/97	In Progress
Shutdown Coal Boilers	——	04/18/97	
Demolition (includes hazardous material abatement)		04/21/97	06/20/97: Expected
Equipment Installation	06/23/97	03/20/98	
Mechanical Completion	——	03/23/98	
Commissioning and Testing		03/23/98	06/12/97: Expected
Final Acceptance	——	06/15/98	

Tradition... or demolition?

As the Capital Campaign solidifies plans for more modern facilites, the fate of these old buildings hangs in the balance

Music and Art

1894

Laboratory

by Melissa Renzi
Bucknellian Staff Writer

While the more is most often the merrier, within the existence of the Music and Art Building we find the exception.

Music and art are ready to bid each other a fond farewell, as plans for two separate buildings to house the respective departments are in the works.

The building that was originally constructed in 1890 as the Chemical and Physical Laboratory, and in 1955 became Music and Art, is now a little cramped in space. Not to mention the added smush that comes each spring as the creek that flows right under the building floods and its water brings wildlife right into the practice rooms, seminar rooms and offices.

Squirrels find their way inside through nooks and crannies, and also by following unsuspecting music or art students up the stairs and right through the doors.

Although faculty and students are feeling the crunch of sharing the building with another department, they will definitely miss its location. On the corner of Moore and University Avenues, the Music and Art Building overlooks a hillside full of trees and paths, the Seventh Street Cafe on the other side, and shares the block with Bucknell Hall.

William Payne, chair of the music department, is more than ready for the department to move. "We are just bursting at the seams at this point," he said. With 50 students in the department, as well as countless others involved in one way or another through the orchestra, choirs, opera company and the band, the building is filled to capacity and beyond. "This fall we had to get rid of tables in one of our seminar rooms because we didn't have enough room to fit the class," Payne said.

The Art Department is also anxiously anticipating the possibility of a new, separate building. While the location is one aspect that faculty aren't quite ready to say goodbye to, the reality of the plans makes the farewell a little easier.

"This building has a beautiful view—it's gorgeous. I love the location, the hillside and the creek. We have wonderful offices," said Jody Blake, who has been teaching art history in the department since 1990.

Though beautiful outside, there's some frustration among classes inside. Blake, half laughing, yet completely serious, tells of the tuba practice or opera singing that rises up to the art history classrooms from their second floor home. "Everything is accompanied by music here," Blake said. "It must be extremely aggravating for the students to have music competing... all of a sudden tuba practice will come up through the floor in the middle of a class. It's terrible for the students."

This floor houses primarily the art history space, a seminar room, a lecture hall, the slide library and the art historian's offices. There is also a drawing room that is used for most of the introductory art courses, as well as drawing and graphic design. The basement is home to a clay room.

Looking back on her years in the department, Blake recalls "occasionally a bicycle buried halfway in the ground out back... some kind of conceptual art or art agitation going on. Last fall, when the pink flamingo found itself on our roof, security removed it right away."

Requests for the new building include "an expanded sculpture area around the art department to bring in artists. Sculptors are always looking for places to show their work," Blake said.

Mareta Digan has been secretary of the art department since 1973. Digan joined the department right after it reorganized after the flood in 1972. "It was the biggest flood in this area, the presses in the basement filled with water. They were then moved over to the Art Barn," Digan said.

One thing that current students and faculty may not miss is the studio in the building's attic—in fact, many may not know it even exists. Left empty since about 1973, the studio was a fire hazard when the new stairwell was built. Digan has seen this studio and considers it "a neat space because of the light that comes in through the skylights."

Perhaps the oldest memories of the building available to this reporter came from Tom Warner. Warner came to the University in 1968 and stayed for 23 years in the music department. Now retired, Warner owns the Lewisburg Inn and would love to see the department have a new building designed specifically for music facilities.

Though Warner recalls that "thirty years ago, in 1968, there was talk of a new music building," his patience for the new building persists because he realizes that "the most important things are the faculty and the students."

Warner looks back on his first encounters with the building, when resources were even more minimal than they are today. "When I came, the record and score library was in three file cases. It's a small library now."

He also recalls the departments' attempts to make the building appropriate for their respective needs. "The practice rooms should be soundproof, what they did was the only thing they could do—put carbon on the walls. that deadened the sound. When the floods came, there was a muddy, musty smell for months after," Warner said.

"I remember I got a call from the president in the middle of the night—'come over here. We've got to move the pianos'," Warner laughs. "I used to call the place the Frank Lloyd Wright building. You know, Fallingwater."

Floods and squirrels may fit right into the existing building, but Payne sees the new building as more than necessary for the music department. "We have an excellent faculty and wonderful students, and they deserve better," Payne said.

"Both departments have always felt that they've needed more room," Digan said. "We're adding new people and they have no place to keep their things or to do their work."

Internally ravaged by countless renovations, the façade of Carnegie still stands strong

by Kim Chittim

As one of the oldest buildings on campus, the Carnegie building offers a unique history all of its own.

In 1903, the trustees of the University asked Andrew Carnegie for assistance in building a library. He agreed with the stipulation that he would only donate $30,000. The Carnegie library was completed in September, 1905. The total cost was $30,004.63, entailing the University to provide $4.63 towards its construction.

The first librarian in the new building was Professor William Martin. He had an amazing memory which was necessary in directing the students to the books they needed. He was succeeded by his daughter, Eliza Martin, who had the revolutionary task of creating a card catalog system. She also greatly expanded the number of books and resources available to the students and faculty. In September 1933, the library became universally accessible to both men and women when Martin showed that there was not enough money to build a second library which would be necessary to ensure equal opportunity for women.

Since the construction of the Carnegie building, it has housed many organizations and departments. The building was remodeled in 1951 after the library was relocated to Bertrand Library. The new space was filled by the University Bookstore, Alumni Association offices, the Placement offices and counseling services.

Renovations occurred again in 1960, providing new classrooms, and soon after the geology and geography departments moved in. The Career Development Services and WVBU have also been located in the building at one time. The Carnegie building even contained the Museum for a time. Today, it is the home of the geology department and several classrooms.

There have been no definite decisions to whether Carnegie will be renovated or completely torn down.

Cost issues suggest that Carnegie be torn down, because in order for the building to be in compliance with regulations, the whole building would have to be gutted. Once the building is ready to be refitted, an immense sum of money would have already been spent on removing windows, existing partitions, and all the electrical, mechanical, fire protection and plumbing systems.

Aesthetic issues point in both directions—on one hand the arguments point to Carnegie being torn down because it blocks a strong axis between the library and Roberts.

However, the opposite view is that the building closes off the grounds between Kress, Trax and Roberts providing a quad between the buildings.

The Carnegie building seems to have a strength of its own as it withstands renovations and generations. Despite its apparent demise, the history behind Carnegie may serve to sustain its existence for years to come.

B.S.G. looks to revamp Constitution

Students will have opportunity to ratify revised document on Wednesday

by Melissa Roverts
Bucknellian Staff Writer

Next Wednesday students will have the opportunity to ratify extensive changes to the Bucknell Student Government (BSG) Constitution. Current BSG president, Tracey Gray '99 said, "I think the new constitution is going to open up lines of communication between BSG and the students." He believes this will be a huge step in the direction of providing a better way to get feedback and suggestions.

In a recent interview with Toby Anderson '97, one of the students chiefly responsible for this revamping, he explained the results of this process which he has been involved in for a year.

The document was clarified and updated from its mid-80s version.

Articles I and II, which outline the name and purpose of the organization are essentially the only components which have remained unchanged. Major changes begin with the creation of a bicameral congress consisting of the "Representative Assembly" and the "Officer's Forum" as well as an additional branch called the "Constitutional Review Board."

The Representative Assembly has basically the current BSG congress' composition, functions, and election procedure. The new constitution mandates that the Officer's Forum will consist of one representative from each "BSG recognized organization." Therefore, each organization on campus will have a voice in BSG activity although "no one person can represent more than one organization."

Anderson foresees only one significant problem with this new body. The revised constitution opens the possibility that the Executive Committee has the power to reject recognition of any student organization, thereby denying it a place in the Officer's Forum. He feels, however, that this problem can easily be remedied by a future amendment.

The basic duties of the Officer's Forum are agenda-setting and evaluating BSG's goal fulfillment for the semester and year.

The Constitutional Review Board has been created to ensure accordance between the constitution, the by-laws and BSG activity. The CRB will consist of one member of the BSG committee designated to deal with constitutional concerns (elected by that committee), the Vice President of Administration, one member of the Representative Assembly (elected by the RA), one member of the Officer's Forum (elected by the OF) and one student (unaffiliated with BSG) approved by congress.

Article VI explains the voting procedures involving by-laws, amendments to by-laws and resolutions, while also declaring any of them "invalid" if contradictory to the constitution. The CRB is named as the body to scrutinize any issues involving invalidity.

While the current constitution names only the Dean of Student Life as the organization's advisor, Article VII of the revised document provides that it "shall be one or more members of the Administrative Staff or Faculty of Bucknell."

Ratification of the new constitution would also involve changes in the way that amendments are proposed, publicized and ratified. The most notable change in proposal procedure is that petitions brought to Congress, which had previously required 30 percent of the campus' signatures, now only are required to represent 10 percent of the student body. Anderson explained that this change was necessary to allow more petitions to be considered.

He further pointed out that current voting statistics show that only about 30 percent of the student body is even participating in elections.

As for publicity, a proposed amendment shall now be "publicized at least three weeks prior to voting by the student body," as opposed to the current requirement of one week. While ratification still requires the majority of those voting, effectiveness is now designated to be at the start of the following semester.

Finally, the revamped constitution mandates that master copies must be maintained by the Office of the Dean of Students, the Executive Committee and the BSG Web Page and that each copy must be updated with any changes within two weeks of ratification.

Anderson explained that the process which has resulted in these extensive revisions began in Spring 1996 with the "Constitutional Review Committee," which operated independently of BSG. Although this initial attempt at modification was not successful, it was nonetheless important in that it laid the foundations for work undertaken this semester, receiving recognition from Gray.

Shortly after he began his presidency in the fall of 1996, Gray created the "Internal Affairs Committee," which currently consists of Anderson, Gbenga Akinnagbe '00, Chris Caldwell '00, Kevin Mehaffey '99 (all BSG elected representatives), and Joe Vizcarrando '00, who Anderson describes as an interested student who sought a place for redress within BSG. Anderson has stated that, although his committee is small, his co-workers are all extremely "motivated" and declares that "they have done an incredible job."

> *"I think the new constitution is going to open up lines of communication between BSG and the students."*

Jonah Half—The Bucknellian

Student artists display talents

Students of all abilities can take advantage of the University's art programs in the Art Barn. "Jonah and the Whale" (above) by Jonathan Maley GR, student assistant to the Elementary Sculpture Class, is one of many works on display.

Story on Page 9.

Security increased for weekend

by Beth Martin
Bucknellian Staff Writer

Increased security measures will be taken by Public Safety starting tomorrow in preparation for House Party Weekend.

Vincent DeCerchio, director of public safety, said that the number of personnel working this weekend has been doubled from two daytime officers to four and from four nighttime officers to eight.

Public Safety will conduct patrols inside and outside of designated party areas and will also hold "party checks as usual," DeCerchio continued.

The local police will have an increased presence and patrol in the Borough of Lewisburg and on campus.

DeCerchio advises students planning to attend House Party events not to carry any refreshments outside the designated party areas or they will be cited by Public Safety and the local police.

"There are corresponding consequences to both responsible and inappropriate behavior. Respect the community and regard those neighbors as if they were your parents or your friends at home," he said.

Vincent Magyar, president of the Intrafraternity Council, said that fraternities are "internally taking a more active role in patrolling themselves" as compared to past years during House Party.

He said all fraternities "are working to ensure a fun time and a safe time."

IFC House Party Weekend Regulations

The following guidelines have been proposed by the Interfraternity Council (IFC) for House Party Weekend:

•House Party is BYOB.

•House Party guidelines require that all outside bands (and other types of music) end at 10 p.m. on Friday and Saturday nights. In discussions with local and state police, we have been told that at the time of the first complaint, all outside music at all houses must be turned down immediately. At the time of the second complaint all outside music at all houses must be turned off. No discussion. Please note that possible complaints also could occur in the afternoon. Because of possible problems with noise, groups should end all outside bands and other types of music at 10 p.m. on Friday and Saturday nights.

•All outside band and disc jockey speaker locations must be approved by the IFC president and the assistant dean of students.

•Alcohol may be consumed only during Registered Social Events on Friday, April 25 at 5 p.m. to Saturday, April 26 at 3:00 a.m. and Saturday, April 26 from noon to Sunday, April 27 at 3 a.m. No exceptions.

•Each University student of age (minimum of 21) must present his/her Bucknell University ID to receive a wristband for the weekend. He/she will be responsible for that wristband for the weekend. All wristbands will be numbered and an

See REGULATIONS, Page 2

Nine faculty members announce retirement

At least nine members of the faculty and staff will be retiring after the close of this academic semester. While some of those retirees will be highlighted in this week's edition, the remainder will be featured in the final edition of *The Bucknellian* this semester on May 1.

•William Becker, chair and professor of religion joined the University staff in 1964, having earned his Ph.D. in religious studies at Harvard University. While at Harvard, Becker was a Danforth Foundation Graduate Fellow. Becker received his bachelor's degrees from Colgate University and Harvard Divinity School.

•Ann de Klerk, director of library and information services, came to the University in 1981. Prior to joining the staff at the University, de Klerk had been the associate director of university libraries at Carnegie Melon Univer-

Faculty outcry over periodical deselection gets mixed results

by Beth Martin
Bucknellian Staff Writer

Faculty received a letter responding to its vote recommending a motion that would suspend the periodicals de-selection process from Daniel Little, vice-president for academic affairs, yesterday. The motion was proposed by Peter Kresl, professor of economics.

The vote, which took place on April 7, was a reaction to the tentative list distributed to faculty members of 115 journals that the library would no longer subscribe to in the 1998 school year.

Little wrote that, although the library will continue with the de-selection process, faculty input regarding specific journals on the list are invited through the spring, summer and early September. However, the library is prepared to delay the cancellation rate, even by an additional year, if results of faculty reactions to the list justify this action.

In an interview, Little said that the current de-selection process has been underway for about two years, and his role in the project has "always been an oversight responsibility," but he does not "directly determine the policies—that is done at other levels."

Little stressed that the motion does not have legislative effects within the University, but is "advice" from the faculty to the administration.

"But as chief academic officer, I'm concerned about faculty opinion. I'm concerned that the faculty should have confidence in decisions that are being made in ways that serve the academic missions of the University. As a result, I'm very concerned about the motion itself and the faculty concern which led to the motion," Little commented.

He said his letter addresses the concerns of the faculty, but that "it is necessary for us to continue the de-selection process."

Little said that he does not necessarily believe that the faculty's concern with the de-selection process is part of a broader dissatisfaction with the administration. Instead, he believes that faculty anxiety over the de-selection process is due to the nature of the issue. "It's right at the core of the academic mission, so I think it's understandable that they have a very elevated level of concern," he said.

According to some professors at the faculty meeting, the Office of the Vice President for Academic Affairs was sent letters from the departments of most of the sciences, as well as psychology, chemical engineering, economics, English and history before the tentative list of journals to be de-selected was sent out. Many were upset that Little did not address these letters before distributing the list.

Little said, "I think it's unfortunate that people have that impression.. There were two letters—one letter arrived the day after the list was sent out. The other had been in my folder for a couple of days, and I simply hadn't gotten to it."

Little does not believe that there are others sources in the University's budget that might be reduced in order to permit continued growth of the periodicals budget at the rate of nine to 11 percent each year.

Little said, "We spend a lot of money on things that are not directly related to the classroom. These are parts of the budget that are essential parts and do contribute to the overall mission of the University. For exam-

REGULATIONS, From Page 1

accurate corresponding listing will be maintained at all wristband distribution locations.

•All guests of the University students must have two (2) valid forms of ID to receive a wristband, and the Bucknell University student must register his/her guest. The guest will be responsible for his/her wristband. The University student will be responsible for his/her guest(s) and their behavior at all times.

•Underage individuals who are non-students and alumni who are in violation of any of these rules and regulations will be escorted off campus and not permitted to return. Individuals who are intoxicated or uncooperative will be arrested.

•University students of legal age (21 or older) with an approved wristband must carry his/her University ID at all times. All guests of University students of legal age (21 or older) with an approved wristband must carry his/her driver's license or other appropriate identification at all times.

•Public Safety officers will randomly check the IDs of individuals with wristbands to ascertain that they are of age.

•The wristbands for the weekend will be available Thursday, April 24 from 11 a.m. to 1 p.m. and Friday, April 25 from 9 a.m. to 4 p.m. near the Office of the Dean of Students. Wristbands will also be available at a Greek Monitoring Team (GMT) station at the intersection of "Fraternity Road" and Coleman Road on Friday, April 25 from 6 p.m. to 11 p.m., and on Saturday, April 26, from noon to 4 p.m. and 6 p.m. to 8 p.m. No exceptions.

•All Greek organizations hosting social events will share in the cost of the wristbands.

•All consumption of alcoholic beverages must occur within designated uphill and downhill areas. These areas will be designated by yellow tape.

•No kegs or bottles are to be used during the weekend.

•No beer deliveries may take place.

•No open containers of alcohol are permissible outside the designated areas.

•Individuals will be cited who are:

(a) in possession of open containers of alcoholic beverages without wrist bands;

(b) in possession of open containers of alcoholic beverages outside the designated areas;

(c) in possession of open containers of alcoholic beverages underage; or

(d) otherwise in violation of any of these House Party or University regulations.

•Individual chapter houses are required to have a segregated serving area inside of the chapter house.

•GMT and Public Safety Officers will monitor all parties. Public Safety will make random checks throughout the weekend. GMT will begin rounds on Friday at 8 p.m. and midnight. GMT will begin rounds on Saturday at 3 p.m., 8 p.m. and midnight.

•Responsible house officers must be available at all times. The chapter president is always the preferable contact person.

•The dean of students and the director of Public Safety will be visible throughout the weekend.

•Greek organizations must prohibit people from leaving their house with open containers of alcoholic beverages.

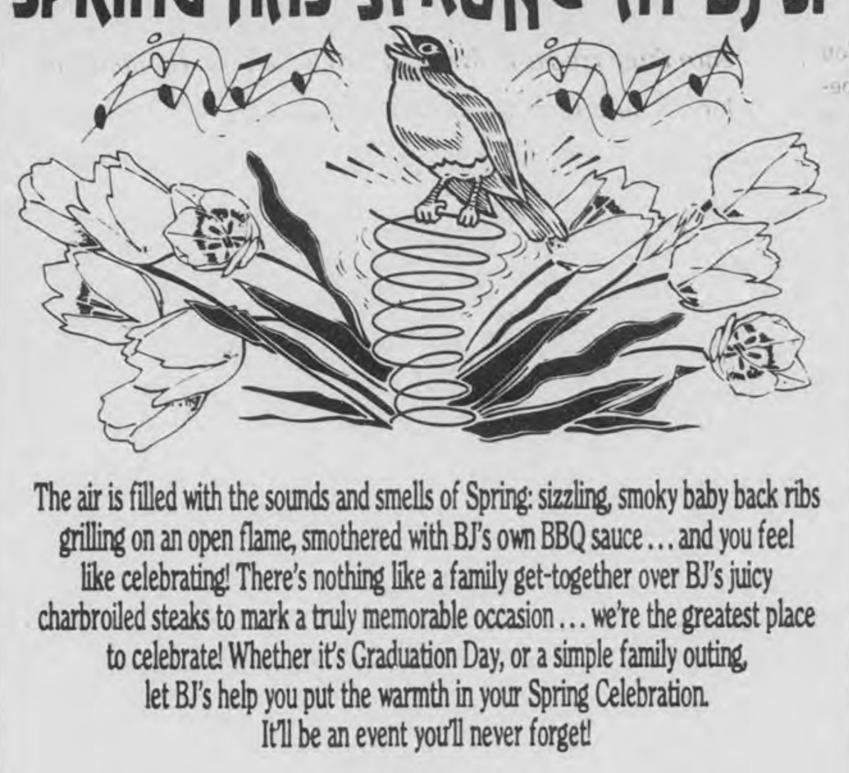
•No pools are permitted.

•Each chapter will be responsible for maintaining the grounds surrounding its respective chapter house at all times throughout the weekend. Each chapter should have a grounds crew schedule available to provide for the cleaning of their property. Greek organizations that have not complied with this regulation will be cited and possibly placed on probation and/or fined.

•Downhill fraternities must notify neighbors about House Party Weekend and ask to be contacted should problems arise. Copies of these letters must be on file in the Office of the assistant dean of students no later than Fri., April 18, 1997 at 4:30 p.m.

•In addition to the above, all other University, Interfraternity and Panhellenic Councils personal and social conduct regulations remain in effect.

SPRING HAS SPRUNG AT BJ'S!



The air is filled with the sounds and smells of Spring: sizzling, smoky baby back ribs grilling on an open flame, smothered with BJ's own BBQ sauce ... and you feel like celebrating! There's nothing like a family get-together over BJ's juicy charbroiled steaks to mark a truly memorable occasion ... we're the greatest place to celebrate! Whether it's Graduation Day, or a simple family outing, let BJ's help you put the warmth in your Spring Celebration. It'll be an event you'll never forget!

Stadler Semester Poets to Give Reading

Established in 1989, the Stadler Semester for Younger Poets allows two talented undergraduate poets to participate in a program of concentrated writing at the University. Only two students nationwide are selected each spring.

The two students chosen this semester were Aimee Record and Brett Warman.

Record is a senior majoring in literature at the University of Southwestern, and Warman is a senior majoring in literature at the University of Pittsburgh. They will read their works next Thursday at 8 p.m. in Bucknell Hall.

University Hosts Talk by Mramor

Dusan Mramor, chairman of the Securities Market Agency of Slovenia, will give a lecture called "Going Private: A Country in Transition."

Mramor will focus on the privatization process, the valuation of socially owned enterprises and the profound effects that privatization can have on society.

Mramor, a faculty member at the University of Ljubljana, has pioneered the valuation of socially owned enterprises in Slovenia and has done extensive research on the privatization process. The lecture will be tonight at 7:30 p.m. in the Olin Science Auditorium.

Kester Named Dunkak Professor of Finance

George Kester, professor of management, has been named the William H. Dunkak Professor of Finance.

"The Dunkak chair honors William H. Dunkak, who served as a member of the Bucknell board of trustees from 1968-74 and trustee emeritus from 1974 until his death in 1983. Dunkak received an honorary doctor of laws degree from Bucknell in 1977," according to a public relations news release.

The appointment to the newly endowed chair recognizes Kester's skill asa teacher and his nationally and internationally known work in the fields of market efficiency and corporate policy, said Daniel Little, vice president for academic affairs.

As Dunkak Professor of Finance, Kester will teach about and support personal and student research in the area of finance.

Patten to Give Poetry Reading

Author of *The Impossible Reaches*, a book of poetry, Karl Patten, professor of English, is cofounder and coeditor of *West Branch*, a twice-yearly magazine of poetry and fiction.

Patten is a graduate of Williams College and holds masters and doctoral degrees from Boston University where he was an instructor prior to joining the University in 1956.

He will give a poetry reading on Sun., May 4, at 8 p.m. in Bucknell Hall.

PUBLIC SAFETY LOG

April 17, 1997

INFORMATION—A Public Safety Officer responded to a Bucknell West Mod for the report of sparks coming from an exhaust fan. An electrician responded and made the necessary repairs.

INFORMATION—A Public Safety Officer responded to Hunt Hall for the report of a water balloon thrown from a window. The incident is under investigation.

April 18, 1997

VANDALISM/TAMPERING WITH FIRE EQUIPMENT/PULL STATION ACTIVATION—A Public Safety Officer responded to Vedder Hall for a fire alarm activation caused by an unnecessary pull station activation. A search of the area met with negative results and the incident is under investigation.

MISSING PROPERTY—A University employee notified a Public Safety Officer that a bench was missing from Taylor Hall. A search of the area met with negative results. The incident is under investigation.

April 19, 1997

INFORMATION—A Public Safety Officer responded to Kappa Sigma Fraternity for the report that a University student had been assaulted. The report was determined to be unfounded but the student was transported by Student Health Services to Evangelical Hospital Emergency Room for treatment of a facial laceration from an accident.

TAMPERING WITH FIRE EQUIPMENT—A Public Safety Officer responded to a false fire alarm activation in Swartz Hall. Officers noticed that the seal of the fire extinguisher had been broken for a reason unrelated to the alarm activation. The incident is under investigation.

INFORMATION—A Public Safety Officer responded to Roberts Hall for the report of two suspicious visitors. After speaking with a University student who resides in the building, the report was determined to be unfounded. The visitors willingly complied with a request to leave the property.

STUDENT HEALTH SERVICE TRANSPORT—A Public Safety Officer responded to Bertrand Library for the report of an unconscious University student. A Student Health Service driver transported the student to Evangelical Hospital Emergency Room for treatment.

April 20, 1997

ALCOHOL VIOLATION/UNDERAGE DRINKING—While on a routine fraternity party check at Tau Kappa Epsilon Fraternity, a Public Safety Officer found an underage student in possession of alcohol. A citation was issued.

CRIMINAL MISCHIEF—A Public Safety Officer responded to Phi Gamma Delta Fraternity for the report of a smoldering tire on a vehicle in the parking lot. The fire was extinguished prior to the officers' arrival. Lewisburg Police Department was notified and the incident is under investigation.

INFORMATION/ACCIDENT—A University student reported to a Public Safety Officer that unknown person(s) did break a vehicle window while the car was parked in the C.A.L.V.I.N. and H.O.B.B.E.S. parking lot. The incident is under investigation.

INFORMATION—A Public Safety Officer responded to a fire alarm activation in a Bucknell West Mod. A University student had extinguished a fire on the stove top. Arrangements were made to have the unit repaired.

April 21, 1997

INFORMATION—A University student reported that a vehicle tire had been punctured on a car parked in the 7th Street parking lot. Theincident is under investigation.

INFORMATION—A University student reported to a Public Safety Officer that a vehicle was damaged while parked on Fraternity Road. The incident is under investigation.

ACCIDENT—Two University students reported to a Public Safety Officer a vehicle accident that occurred between Dana and Olin Science buildings. There were no injuries and the vehicles sustained minor damage.

INFORMATION/MISSING PROPERTY—A University student reported to a Public Safety Officer that CDs, a case and a calculator were taken from an unlocked Roberts Hall room. Lewisburg Police were notified and the incident is under investigation.

DISORDERLY CONDUCT—A Public Safety Officer responded to Sigma Alpha Mu Fraternity to the report of a student who admitted to causing property damage in his room. In addition to this incident, the student reported money missing from an unlocked room in the fraternity house. The incident is under investigation.

INFORMATION/POSSIBLE HARASSMENT—A University student reported to a Public Safety Officer receiving harassing phone calls. Upon request of the victim, the Lewisburg Police Department was notified. The incident is under investigation.

DISORDERLY CONDUCT—A University employee notified a Public Safety Officer that a University student had, without consent, placed an alcoholic beverage in another student's drink, while they were in Coleman Hall.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

IN THE NEWS...

National

Florida to sue Washington over welfare reform

TALLAHASSEE, Florida—The state of Florida plans to sue the federal government over changes in the welfare system affecting elderly, poor and disabled legal immigrants, becoming the first state to sue over welfare reform.

The claim, in the suit to have been filed yesterday in federal court in Miami, is that the U.S. government is disproportionately shifting the cost of balancing the federal budget to the states, said April Herrle, spokeswoman for Democratic Gov. Lawton Chiles.

More than one million legal non-citizens live in Florida, and about 175,000 receive one or more benefits, according to the state. Under the federal welfare reform enacted last year, more than 100,000 will lose one or more of their welfare benefits in August.

Under the changes in federal law, about 95,000 Floridians will lose an average $76 per month in food stamp benefits, and 54,000 will lose an average $342 per month in supplemental Social Security payments.

Jury chosen in McVeigh trial

DENVER, Colorado—A panel of jurors was chosen Tuesday in the Oklahoma City bombing trial of Timothy McVeigh, and extra precautions were taken to preserve their anonymity.

Opening statements are to begin today, when the jurors will be officially sworn in. Court was in recess yesterday to give jurors time to inform their employers and get their personal affairs in order.

Although the jurors' names, backgrounds, attitudes and races were not disclosed publicly, sources said there are seven men and five women on the jury. Three men and three women are alternates.

Despite the lack of juror descriptions, CNN has learned that most of them are white. Many have said they are Catholics, but do not adhere to the church's opposition to the death penalty.

Defense rests in Aberdeen rape trial

ABERDEEN, Maryland—Defense lawyers in the Army court martial of Staff Sgt. Delmar Simpson rested their case Tuesday, after witnesses testified that two of his alleged victims had said their sexual encounters were unpleasant.

Two witnesses, including Army Spec. Hannah Pitt, who had been called to bolster the defense argument that Simpson only had consensual sex with female trainees, said two of the six women he is accused of raping had said they were either unhappy or angry with Simpson.

Pitt had previously told investigators the trainee and Simpson had consensual sex.

Simpson, 32, is charged with 19 counts of rape involving six women and with 35 other counts including indecent exposure, battery and maltreatment. He has pleaded innocent to those charges but has admitted 11 counts of improper sexual intercourse with trainees and five of propositioning.

Suzuki accuses Consumer Reports publisher of rigging tests

WASHINGTON—American Suzuki Motor Corp. accused the Consumers Union on Tuesday of rigging test results about the Suzuki Samurai, but the nonprofit group promptly denied it.

The auto manufacturer released what it said was evidence that CU, which publishes Consumer Reports magazine, rigged results in 1988 to make the vehicle look bad and boost magazine sales.

Suzuki presented a written statement by former CU employee Ronald Denison, saying he had heard a CU executive tell testing personnel: "If you don't find someone to roll this car, I will."

At a news conference, Suzuki also played what it said was a videotape made by Denison of one of the tests of the vehicle. Laughter can be heard off-camera, and a Suzuki executive said it was by CU test personnel and proves the group was out to get Suzuki.

But the consumer advocate group, which has tested products for decades, stood by its report and said the laughter heard on the videotape proved nothing.

World

Peru, Japan relieved by hostage rescue

Lima, Peru—An eerie calm and a sense of relief hung over the Japanese ambassador's residence in Lima, Peru, yesterday, the morning after the stunning end to a four month hostage siege.

The compound remained sealed off and heavily guarded as Peruvian troops and firefighters scanned the area for explosives and booby-traps set by the Tupac Amaru rebels during their standoff with the government. It could be at least a couple of days before non-security personnel can get into the residence.

In Japan, Prime Minister Ryutaro Hashimoto—who was caught unaware of Peru's attack to end the crisis—thanked President Alberto Fujimori yesterday for taking the gamble.

At an earlier news conference, a clearly irritated and abruptly awoken Hashimoto expressed his regret at the lack of advanced warning of the operation. Japan had been urging a peaceful end to the crisis, which began on December 17.

Hashimoto later said Fujimori had told him that Lima could not have given advance warning due to the "delicate situation."

China, Russia sign pact

MOSCOW—The leaders of Russia and China signed a joint declaration yesterday pledging to seek a "multipolar" world with no one country dominating the international order.

Chinese President Jiang Zemin and Russian President Boris Yeltsin signed the declaration in Moscow on the second day of Jiang's five-day state visit.

"Some are pushing toward a world with one center," said Yeltsin, apparently referring to the United States, after the signing. "We want the world to be multipolar, to have several focal points. These will be the basis for a new world order."

Russian and Chinese officials were quick to say the declaration was not aimed at a specific country, however.

"The very suggestion of plans to create some counter-blocs are wrong and counter-productive," Yeltsin spokesman Sergei Yastrzhembsky told the Interfax news agency.

China's official news agency, Xinhua, quoted the declaration as saying that "no country should seek hegemony, practice power politics or monopolize international affairs."

sity. She received a B.A. in German language and literature from the University of London and a master's degree in library science from the University of Pittsburgh.

•Jack Harclerode, professor of biology, joined the faculty in 1965, serving as department chair from 1968 to 1978 and from 1986 to 1990. Harclerode holds his B.S. degree from Shippensburg University and his M.S. and Ph.D. from Penn State. Prior to teaching at the University, he taught at Ohio University.

•William Hauck, professor of education, served as a research associate at the University from 1961 to 1963 and conducted a post-doctoral study on campus from 1967 to 1969 prior to joining the faculty in 1969. Hauck received his B.S. in mathematics and physics, as well as his M.Ed. in educational psychology from the University of Pittsburgh. Hauck holds his Ph.D. in counseling and educational psychology from the University of Wisconsin.

•James Heath, associate professor of classics, came to the University in 1966. Prior to joining the faculty at Bucknell, Heath taught at Kenyon College and Rice University. Heath received his A.B., M.A. and Ph.D., all in classics, from Princeton University. While at Bucknell, Heath served as chair of the classics department and as an editor of the Bucknell Review.

•Karl Patten Jr., professor of English, arrived at the University in 1956. Patten received his A.B. degree from Williams College and both his A.M. and Ph.D. degrees from Boston University. Patten once served as an instructor of English at Boston University.

•Hans Veening, chair and professor of chemistry, came to the University in 1958. He had previously been a visiting research chemist at American Cynamid Company. Veening earned his A.B. degree from Hope College, and both his M.S. and Ph.D. degrees in analytical chemistry from Purdue University. In 1989, Veening was appointed a Presidential Professor.

Anderson, Smith chosen for award

Kori Anderson '99 and Joshua Smith '98 were named Barry M. Goldwater Scholars for the upcoming academic year. Two hundred and eighty-two scholarships were awarded to sophomores and juniors nationwide.

Kori Anderson '99

The scholarship in honor of Senator Goldwater was "designed to foster and encourage outstanding students to pursue careers in the fields of mathematics, the natural sciences and engineering," according to a public relations news release. Seven University students have been recipients of the scholarship since the program's inception in 1986.

"Anderson is one of only 10 engineering majors selected on the basis of academic merit from a national pool of 1,164 mathematics, science and engineering majors nominated by the faculties of colleges and universities nationwide," the release said.

Joshua Smith '98

Smith is one of 69 dual majors awarded the scholarship on the basis of academic merit from the same national pool.

PERIODICALS, From Page 1

ple, we spend a lot of money to maintain buildings. You might say this is not educational. But, it is clearly, because the quality of the experience in the classroom is very much dependent ... on the building's infrastructure, the lighting, the equipment..."

Lara Coleman '00, student representative on the University Library Committee, said, "From listening in on the discussion, it's a shame that they have to cut them. But the journals they are cutting are the ones that have been heavily inflated. The library has put a lot of thought into it for a long time. They've investigated pretty thoroughly so that the ones they are cutting are those that they would like to have, but are not absolutely necessary."

EDITORIAL

Bucknellians show initiative through recent projects

University students, faculty and staff should be commended for having positive attitudes, open eyes and a willingness to act.

The collective social conscience on campus seems to be waking up and becoming perceptive, as evident by a number of actions that have taken place this past semester.

In an effort to increase team unity, members of the women's soccer team collected 20 bags of garbage when they patrolled River Road for litter earlier this month.

Toby Anderson '97 organized a group of interested individuals to examine the current student government constitution in order to suggest pertinent revisions.

Sandra Morris, professor of English, sent an email to everyone at the University to make us aware of the death of Michael Dorris, a Native American writer, an event which many of us might have otherwise missed. Not only did she impart this knowledge, Morris organized action, encouraging us to keep our Native American focus semester in mind and to honor Dorris' work.

Sororities and fraternities have been holding fundraisers the entire semester for their philanthropies, donating time and energy for a good showing. Using upcoming events as examples, Delta Upsilon will be performing its annual demi play, where all proceeds benefit the March of Dimes.

No one specifically asked these individuals to structure their schedules to allow time for these activities which consume precious hours. And these are just a sampling of the community service activities on campus.

It is all too easy to focus on the inadequacies of individuals or groups. It is important to recognize the merits that these people have as well. Not only does it encourage those who are already active in the community, it may also inspire others to become involved.

However, in being commended, it is not time to relax and gloat. Self-recognition is acceptable, but ceasing in community awareness and action is not.

Students, faculty and staff alike should look around them to see what else is being done and what is being missed. One should constantly strive to maintain and increase action. Support for individuals and groups acting in a socially responsible manner is essential.

We commend all of you who are extending yourselves by increasing your outreach.

OPINIONS

Death of a literary icon, passing of a movement?

Tragic death of Allen Ginsberg illuminates the life of an activist, and the causes he fought for all of us

Thoughts...

and ramblings

By Todd R. Zeranski
Opinions Editor

In seeking to do justice to the death of Allen Ginsberg, I find Walt Whitman to be particularly appropriate:

> When lilacs last in the dooryard bloom'd,
> And the great star early droop'd in
> the western sky in the night,
> I mourn'd, and yet shall mourn with
> ever-returning spring.

Ginsberg was that star. He was much more than what many people perceive him as: a prominent Beat Generation poet. Rather, he was the brightest star, the visionary behind the Beat Generation that questioned the political and social excesses of the 1950s which laid down the antecedents of the counter-culture revolution, the "flower power" (a term Ginsberg himself authored) movement of the 1960s. That phenomenon itself was the impetus behind a decade characterized by the truly compassionate domestic agenda of the Johnson Administration (which will always receive high marks from historians), the establishment of programs that the American public now sees as injurious or at least in need of serious reform: Medicare, Medicaid, welfare, affirmative action—an activist and proactive Federal Government.

This is not to say that Ginsberg was intimately behind all of this. However, I do contend that his influence and spirit provided the fuel to the fire that was the social deconstructionism of the 1960s. It was much more than "Hey hey, LBJ, how many kids did you kill today?" It was an era marked by protest of the malfeasance of government gone mad: abject aggression in Vietnam, the barriers placed in front of racial integration and the struggle for true civil rights. Yet, it was not only protest.

The 1960s witnessed the genesis of a new perspective, to posit a new way of living in harmony together—not to merely coexist. Its images are marked indelibly in us all: Robert Kennedy weeping as he held the emaciated African-American children of the South; Martin Luther King, Jr. and his movement of dignity marching valiantly through the water cannons and ferocious police hounds as the leering and spiteful looked on and threw stones and bottles; the tragedy at Kent State.

Where do we go from here, Allen? Where has all of our compassion gone? Welfare "reform" ignores the merits of a safety net to buffer the malevolence of degenerative and exploitative American capitalism and neo-mercantilist trade policies; it is the most recent manifestation of how easy it is to truly demonize and abuse the poorest of the poor, the weakest of the powerless. The draconian steps last year by the House of Representatives has taken to dismantle programs that have safeguarded environmental protection and health standards for us all since the early 1970s—the Clean Water Act, Clean Air Act and the Endangered Species Act: all steps taken to make maniacal, profit-addicted industry accountable for what their business practices and for the harm that they do to us all. The steps that same 104th Congress took to increase the Pentagon's budget last year (even appropriating more money than the Defense Department requested), funds that could be used for education in improving the decaying public schools of the inner cities, better AIDS prevention and treatment, promoting more research and development of renewable energy resources, aiding our ailing and underfunded National Park. Will we ever learn, Allen?

A few years ago, I was watching Late Night with Conan O'Brian. One of Conan's guests that night was Allen Ginsberg, who delivered a fervent poetic cry against our government's counter-intuitive policy towards tobacco and marijuana. He made the absurd so apparent: why does our government and legislators continue to bow to the alter of tobacco, subsidizing, receiving influence money and perks, and condoning what is essentially an industry of death while conducting a fruitless and wasteful war against something as benign as marijuana? This, a few years before Proposition 215 in California and Arizona made the notion of medicinal benefits of marijuana a reality, before Drug Czar General Barney McCafferey grudgingly announced government research into the concept that this object of attack, the target of billions of dollars of local, state and Federal expenditures may not be so bad after all, *and may even help some people.*

Ginsberg spoke with the same urgency that harkens back to his excoriation of the Pentagon in anti-war demonstrations of the 1970s, that same inextinguishable fire and unbearable weight of purpose that reinstills within us that true justice is attainable and only requires our voices, our participation, our hearts. Although the issues have changed over time, the structural violence that plagues our society still exists within us all. Although he has gone to a different place, his soul still resides among us. Lead us onward, Allen Ginsberg.

"Numbers game" unrealistic measure for Bucknellians

Ponderous emphasis placed on numerical scoring not a fair measure of valuable and attractive characteristics

by Nora Daniels
Bucknellian Staff Columnist

SATs. Class rank. Exam grades. Term paper grades. Midterms. Finals. From the time you decide to apply to college till the time you start to think about what you're going to do when you graduate, life is a number game. Everything, it seems, is related to a score or a grade, and it never lets up. A week doesn't go by that you don't worry about how well you have to do to pass a course, get an A or make up for that bad grade you got on the first exam.

Everyone knows that real life doesn't rely on numbers, at least not numbers like the crazy college digits. Sure, taxes, income and other money matters are numerical, but it's not as if these are the focus of life. No one is ever going to ask you what you got on your English final (that one you slaved over) and class rank won't ever matter again...

Even when you're applying to graduate schools, numbers aren't the all-important measures they were when you applied to BU. So what, you had a 3.5—so did other people, and they had internship experience... You might get in, you might not, how does the rest of your application look, anyway?

Numbers, some might say, are the only way to tell if you're actually learning in comparison to others; America is, after all, the land of comparisons and competitions. And I know that it would be unrealistic to expect grades, SATs, and all the other numbers to vanish, but I have decided not to focus so much on grades, numbers and everything that goes along with them. This has nothing to do with the fact that I didn't do so hot on the last exam I took... really. I think that experience and real learning are more important, and they're what will matter in the long run.

Though I'm only a freshman, I can tell you right now that no one anyplace, but here, will care that you passed your English class with flying colors. But they will care if you can communicate reasonably well and if you know at least a little about some kind of literature. Learning and experience, not numbers, will make or brake you in the future... as for the present, I guess I'm aiming for a 4.0 just like everyone else.

LETTER

Firing of wrestling coach detriment to Bucknell

To the Editor:

I would like to comment on the recent firing of Bucknell head wrestling coach, Mr. Robert Ferraro. Regardless of the personal differences between Mr. Ferraro and the Athletic Department, I do not agree that it is in the best interest of the University or its athletic program to remove Mr. Ferraro before an official ruling by the NCAA.

Bucknell has lost the most creative individual in our sport. The "Main Event", halftime intermission, the formation of the National Wrestling Coaches Association, the National Coaches Convention, and the National High School Coaches Association and Championships are but a "short list" of the programs Bob has introduced.

As the Tournament Director of the high school event, I admire those individuals in life who go out and get the job done. Mr. Ferraro has always displayed that intensity. Perhaps Bucknell's loss will now allow the wrestling world to take full advantage of Mr. Ferraro and his many talents.

LETTERS

Address U.S. military officers correctly, please

To the Editor:

An excerpt from the Army Officer's Guide, 47th Edition:

"Each member of the Army has a military grade, private to general, and this grade becomes his or her military title by force of regulation and custom. In official documents a member's grade, or title, always accompanies his or her name. Through custom and usage, military titles are used between civilians and the military just as custom has established the usage of "Doctor," "Professor," or "Governor." A person who has attained a military title carries it permanently, if so choosing, including into retirement."

We submit to you, Bucknell University, a petition of a sort. It is also an argument to fight the injustice perpetrated by this institution. It is not the first, and surely will not be the last, in a series of measures that continues to show a lack of respect for the students and their achievements while at this institution.

As many of you probably know, during graduation and other official functions, members of the faculty, administration and the trustees are addressed by their academic title or position of responsibility. For example, President Adams or Dr. Adams would be appropriate for the president of our university. One is a title given by this local private institution, and the other is a title given by the realm of academia, both of which are established elements of our society.

As many of you may not know, during graduation and other official functions members of the military should be addressed by their appropriate military titles. However, this university refuses to do so. They assert that they can not address newly commissioned Lieutenants as "Lieutenant," because then they would have to grant every little group that asks the same right. An example used to support this hypothesis was that of Phi Beta Kappa. They are a group that has sought to have their members acknowledged when they receive their diploma. This unfortunately, but not surprisingly, is a very poor example. Phi Beta Kappa, while very prestigious and laudable as an organization, can hardly be considered an accurate test for this situation. Phi Beta Kappa is an honor society, not an official title or term of address. Doctor, Dean, Lieutenant Colonel and Lieutenant are official titles. Phi Beta Kappa is also conferred by a private society, whereas the terms Doctor or Lieutenant are conferred by centuries old institutions of our society: academia and the military (or the U.S. Government).

Were we to have Gen. Norman Schwarzkopf, or Gen. Colin Powell speak at our graduation ceremonies, how likely do you think it would be that this university would blow off their officially earned titles, which were given to them by the oldest institution in the United States of America, the United States Government? Not likely. It is also interesting that the trustees, faculty and alumni who have served in the military could allow such disrespect for one of the few institutions in our society that demands a selfless sacrifice of those who join it, therefore showing disrespect to those who have served in it. That sacrifice is the willingness to give up your life to defend your country, which only members of the military are legally bound to do.

Another argument that has been stated is that the military is not an academic pursuit and therefore should not be acknowledged in an academic environment. However, not only does this view bring up a largely irrelevant point, it is wholly untrue. The members of the administration have not done anything academic to receive their *administrative* titles, yet they are called by those titles at graduation. To address the academic nature of ROTC, it is necessary to point out that all but two of the cadets in the senior class received ROTC scholarships. These scholarships are highly competitive academically. To receive one of these scholarships is a sign of significant academic achievement. As well, the curriculum for ROTC participation is far from light, in spite of what those who haven't participated in it think. In fact, the ROTC courses are more difficult than many of the academic courses we have taken to receive our bachelor's degrees. Especially rigorous are the junior and senior years in the ROTC program. Therefore, contrary to the belief of the administration, the requirements to receive the title "Lieutenant" are quite rigorous academically. The title itself is the culmination of these academic achievements.

It is clear that the argument brought by the university against addressing military officers by their appropriate, legal and societally accepted titles is gravely flawed. There is an obvious difference between the case of Phi Beta Kappa and the argument to address military officers by their appropriate titles. Additionally, if the president of the University can be addressed by an administrative title that is conferred on him by an institution that is only a century and a half old, then surely a title conferred by an institution almost twice the University's age, our national government, should be considered just as valid. Why show so much disrespect in the defense of such a minor policy? Just change it and show us how much Bucknell respects its students, trustees, faculty and alumni.

Basketball team gives thanks

To the Editor:

As this school year winds down, we on the basketball team would like to thank the students for the support that you gave us throughout this past season. From the beginning of the season to the League Championships, we never encountered any group of students as enthusiastic as the ones in Davis Gym. The support that you provided during home games made a difference to all of us and gave us a decided home— court advantage. More than once did opposing players remark on how great it must be for us to have so many loud students at the games.

The team would especially like to thank those of you who cheered us on during the Patriot League Championships. Every game that we played over that week and a half had the feel of a home game. Your presence helped us all overcome some of the pressures and distractions of the moment.

We thank you all for the dedication and support that you have shown for our team and look forward to playing in front of you next year. For although our season ended up one basket short of our goal, we enjoyed sharing it with you.

Well, you see... when this years graduating seniors' names are called and they walk forward, the administration cannot announce which Honor Fraternities they belong to, worked hard for, and joined. It discriminates the lazy from the hard working...
...and this year, we can't use titles before names, such as Doctor, Lieutenant, Prince, Mister, and Miss because it promotes differences. And we can't have that at Bucknell...
... And this year, they won't read our names because some names are better than others. For example, "Bob" is a better name than "Steve". WHAT A Crock of SH!T! This University sucks. I'M leaving.

Students lose out over tenure policy

Too great an emphasis is placed upon student evaluations, yet many faculty members have research degrees rather than teaching degrees

To the Editor:

Bucknell has a reputation as a private liberal arts college where you can receive a quality education. Unfortunately, Bucknell's programs no longer support their reputation. The quality of education at Bucknell is declining due to the sacrifice of a fundamental educational paradigm: *academic freedom.*

Academic freedom is simple: it is the "right" to pursue any line of educational inquiry without the fear of university reprisals. But with this freedom comes the responsibility of including you, the student who is paying money to apprentice to a master scholar, in this search for knowledge.

Academic freedom is disappearing for two reasons: faculty assessment methods and economic pressures.

An instructor's "teaching" ability is usually assessed by 1) a self-statement describing goals and achievements; 2) classroom visits by review committee members; 3) materials presented to the students; and 4) student course evaluations.

Numerous studies have shown that student course evaluations are meaningless as a measure of teaching ability (cf., "Academic Freedom, Tenure, and Student Evaluation of Faculty: Galloping Polls in the 21st Century, R. Haskell, EPAA v5 n6, 1997 (http://olam.ed.asu.edu/epaa/v5n6.html)), and that they can be manipulated easily (cf., "How to Improve your Teaching Evaluations Without Improving your Teaching,'' I. Neath, Psychological Reports, 78, 1363, 1996). And yet, not only are student course evaluations used as the *primary* indicator for teaching effectiveness, but they are enthusiastically endorsed by both the faculty and the administration!

Most of the faculty have *research* (not teaching) degrees, and are not eager to exchange a system of measurement that they can manipulate for one in which they might be held accountable for their actual abilities. And the review committees like them, since any negative retention decision can be justified easily from the numerous negative comments on course evaluations, *regardless of the writer's intent*!

Sadly, the written conclusions from the review committees do not have to be logical; they only have to stand up in court (oddly enough, courts accept unsigned evaluations as viable assessment tools instead of as inadmissible hearsay evidence).

Bucknell's "criteria" for promotion are arbitrary and capricious. Indeed, the chair of CAFT summarized them eloquently when he wrote: " ...they (the URC) consistently point out what their expectations for the future are and *that expectations change from one review to the next*'' (italics added). We must guess at what will be on our next test!

Course grades should reflect the student's actual (usually average) ability. But average grades result in average GPAs, consequently many challenging courses are avoided. Since a department without students is a department without funds, there are strong departmental pressures to keep course enrollments high. As a result, courses are now designed to yield good student course evaluations, not good students.

Bucknell is also putting a great deal of pressure on the faculty to publish research papers. The URC now states *explicitly* that they expect at least one peer-reviewed publication between reviews—a clear violation of the precepts of academic freedom.

The Bucknell mission statement reads in part: "The university's responsibility is to provide wide educational opportunities within a collegiate setting to a controlled number of talented men and women.'' Shouldn't Bucknell's goal be to encourage research experiences for its students and then assess the faculty by the presentations their *students* produce? The faculty will not spend time on something for which they will not be rewarded, which is why they are spending more time on research and less on teaching.

Unfortunately, CAFT has remained ambivalent about this problem, as they do not see the administration's economic and assessment policies as a direct assault on academic freedom, despite the abundant evidence to the contrary.

But is change really needed? Students rarely ask for more difficult work, the faculty receive large raises every year, the administration continues to pull in tuition dollars and the parents receive excellent grades from their complacent children. Why ruin things just because the final product can't read, write, do simple math or think complex thoughts?

I was recruited 7 years ago to create a challenging astronomy curriculum, to develop an outreach program for the community at the Observatory and to incorporate undergraduate students into my research program.

According to the Physics Department, I achieved my goals, and they unanimously recommended me for tenure.

According to the URC, I didn't publish enough papers and I received too many negative comments on my student course evaluations.

Guess what lessons other non-tenured faculty have learned from this?

I have placed all of my tenure review materials on reserve in the library for those interested in reading an unsuccessful tenure review. I certainly hope that the next institution I teach for actually lives up to its ideals and promises.

Death penalty discriminates by class and race

To the Editor:

Who are the guilty? We all are. When we condone the use of capital punishment, we are all just as guilty as the murderer sitting in the electric chair. If, as suggested in The Bucknellian editorial section two weeks ago, we use the death penalty solely as a means of punishment, what makes us any different from each and every murderer on death row?

Is it because the government is sanctioning this death? To be honest, that frightens me the most. Our justice system is fraught with bias. The rich white man will most times serve life whereas the poor minorities will be sentenced to death. This unfair reality is due to the expense of a good lawyer in comparison with the unqualified public defenders who are assigned to those who cannot afford their own lawyer, as well as to the prejudices of the chosen jury. We cannot, as it stands today, separate the issue of the correctness of the death penalty from the issue of the injustices of the judicial system.

For those who are in favor of the death penalty and are secure enough to trust the government to execute citizens, shouldn't they be secure enough to trust the government to keep them behind bars? If not, then obviously the justice system needs help. Right now, the system is not working. It may put criminals back out on the street because it is in dire need of good rehabilitative programs. These programs can be made financially possible if we abolish the death penalty and all its extraneous costs. As for "Mr. and Mrs. Johnny Q. Taxpayer," abolishing the death penalty completely will save them thousands of dollars. Each death sentence costs approximately $3.18 million compared to the cost of life imprisonment (40 years) of about $516,000.

It is very easy for us as Bucknell students, who live for the most part in the lap of luxury, to judge from a distance who should live and who should die. We are very detached and too many times unaware of the struggles many people face. We must look at the situation as a whole, not just the singular criminal act. Were their rights observed? Had their basic needs been met? Did they experience equal opportunity, employment and education? These injustices are obviously not excuses for committing murder, but we need to realize that in most of these cases, there is a pattern of societal abuse.

In the twentieth century, the United States (which, by the way, is the only industrialized nation still to use the death penalty even as our crime rates continue to soar high above those of other nations) has executed eight innocent men. We, as citizens of this country, murdered eight innocent people. They could have been set free if they were serving life sentences. Now, there is no way to right our wrongs. We are guilty of premeditated murder.

There will most likely never be a utopian system, there will always be problems and there will always be bias. The death penalty does not have to be a part of this ailing system. But, this will only occur when we abolish it.

FEATURES

Not the traditional non-traditional student

by Caryn Richman

This is the third article in a series of three about non-traditional students at the University.

Although the classification is sometimes inevitable, some non-traditional students would prefer to do away with that occasionally misleading title.

Meet Doug Didyoung '99, who came to the University through the Step Program.

"I was a chef in Philadelphia and I wanted to pursue an education. I went to community college for two years and then I went for a summer here through the Step Program," Didyoung said.

"I was kind of getting tired of the city, so I thought Bucknell would be a good place."

Didyoung is an English and anthropology major. He eventually hopes to go on to graduate school to pursue a MFA degree in creative writing.

According to Didyoung, the most difficult things to which he has had to adjust upon coming to the University are that "all my friends are in Philadelphia and New York and the fact that there's not much to do here except study, which is okay.

"I feel that I'm at a disadvantage, because I really didn't pay attention in high school. I'm playing catch-up in a lot of study skills and stuff like that," Didyoung said.

Didyoung is one of the few non-traditional students who lives on campus. "I'm an RA in Edwards house," Didyoung explained.

When asked if the students and faculty treat him differently because of his status as a non-traditional student, Didyoung responded, "I don't think so. No, they definitely don't. Because I'm only 27, there isn't a huge difference."

One group in which Didyoung has chosen not to participate is the Continuing Education Organization (CEO), the group for non-traditional students.

"The CEO, I don't know what that means, because we're all taking courses, we're all students, and we all get graded the same way," Didyoung remarked.

"We're all here for the same thing. I just feel that setting myself away because of my age, setting myself apart from the main population of Bucknell, is sort of like prejudicing traditional students. I wouldn't want them to do that to me," Didyoung said.

"It comes down to doing the work and having a professor grade your work. Maybe you could find a common bond with people your own age, but I just feel like you can learn a lot from the people who go here. Just because they're younger doesn't mean they don't have life experiences," Didyoung said.

Didyoung does not have any regrets about putting off college for a few years. "I've learned a lot as a chef and I learned a lot about life and had a lot of experiences that will benefit me as a writer. I think a lot of people should take some time off before going to school," Didyoung said.

Many people tell Didyoung that "he's the exception to the stereotypical non-traditional student rule. The only reason I'm the exception is because I don't limit myself because of age," Didyoung said.

The advice Didyoung offers is that "We all are here for an education. The only boundaries are in your mind."

> *We all are here for an education. The only boundaries are in your mind.*
>
> *—Doug Didyoung*

Doug Didyoung '99 feels confident that he made the right decision of delaying college for a few years.

Cara Mickelsen—The Bucknellian

Cooking with Katie

Pizza! Pizza!

Crunch into a crust bursting with sweet onion as it tickles you with a laughing nip. The crust on this one is a twist on that of *focaccia* bread, an Italian flatbread, a recipe I stumbled upon at the restaurant that warily employs me at home. I've eliminated the "fresh herbs" in an attempt to allow the toppings and the goo of the cheese to stand out.

- 1 large Spanish onion
- 3 tablespoons olive oil
- 6 cloves garlic
- 1 and 1/2 cups hot water
- 1/4 ounce yeast
- pinch sugar
- 1 tablespoon coarse salt
- freshly ground black pepper
- 1 cup hot milk
- 2 teaspoons sugar
- 6 to 6 1/2 cups flour
- cornmeal
- toppings
- tomato sauce
- grated cheese (mozzarella, parmesan)

1. Chop onion into a medium dice, and sauté in olive oil over medium heat.
2. While onion is cooking, peel and finely dice the garlic, and add to the onion. When the mixture is soft, remove from heat and add salt and pepper.
3. Whisk together the yeast and one half cup of the water, adding a pinch of sugar. Allow to become bubbly, approximately four minutes.
4. Combine onion mixture, remaining one cup of water, milk and yeast mixture in a large bowl. Reserve pan.
5. Whisk in four cups of flour, one cup at a time. Add remaining flour, stirring to incorporate, and knead lightly for one minute. Coat dough in oil by rolling in reserved pan.
6. Place dough in a large bowl, cover tightly with plastic, and allow to rise until doubled.
7. Punch down and divide into 6 sections. Place on a sheet pan, recover and refrigerate.
8. Prepare toppings, and heat oven to 450°.
9. Stretch dough into 8-10" rounds, pressing lightly in cornmeal.
10. Spread a thin layer of sauce, toppings and grated cheese.
11. Bake for 10-15 minutes or until golden brown and crusty.

Some suggestions for toppings include onions, wild mushrooms, steamed broccoli, fresh herbs, roasted peppers, scallions and cherry tomatoes. Be careful with the broccoli as it tends to release water when baking, which will result in a mushy crust.

SCIENCE & TECHNOLOGY

Womens' soccer steps into the environment

by Natalie Elsener

As you jog or drive down River road, you can't help but notice the charming way it roles along the broad Susquehanna and past quaint old farm houses. But the old beer cans and decaying paper products that lay on the road side can really distort and taint the beauty of this scene. Recently, the women's soccer team joined the Adopt a Highway program to preserve the beauty of the historic route and keep it clean.

April 6th was their first attack at the garbage and litter. The team was successful in collecting about 20 bags full of rusted beer cans, cigarette packs and other waste. Over a mile was covered, and the team's concerted efforts made an impeccable and noticeable difference.

To coach Tobi Lovecchio, the team's participation was very meaningful. "It just gives you a good feeling when you are out there, and to see it after you got it all done," Lovecchio said.

After speaking with a homeowner on River Road, Lovecchio learned that the area had not been manicured in many years, and the cleanup was long overdue. The area near the Physical Plant had been previously neglected. Now a large blue sign clearly claims that this area is the team's responsibility.

Player Bridget Hannon '98 added, "We really did not realize how much trash was there, but there was a ton to clean up as we went along."

Lovecchio stressed that the team's participation in the service will continue as long as the soccer program remains, because it is such an accessible way to help the community. In other words, it is a great way for the players to direct their energy and potential as a team toward the accomplishment of a variety of goals.

The team chose River Road because of its access to the campus and the abuse done by heavy traffic, especially in the morning. Lovecchio expressed his satisfaction that the team's efforts would bring a positive change for both the town and college community as the road is cleared up.

"The importance of community service in anyone's life," Lovecchio emphasized As a team, it was an especially important activity to bring the women together by working off the soccer field. Captain Kate Fink '99 supported her coach's suggestion. "It was nice to do something as a team, and also to help the community at the same time," she said.

Fink acknowledged that even though it was the coach's suggestion, the team was supportive of the idea, and they were excited to help. "The players for next year all took part, and everyone was willing to contribute," she said.

In little over an hour, this group of women and their coaches beautified the road that so many of us use. Next fall, during their hectic season, the team will journey again to collect a spring and summers worth of litter left behind. Few take the time to notice our environment, but at the University, groups such as the womens' soccer team show respect and concern for their community.

Courtesy of Womens' Soccer

The womens' soccer team is one of many campus organizations concerned about the environment. The team joined the "Adopt a Highway" program and collects garbage and waste along River Road in the spring and the fall.

Caught in the Web: Search for yourself

by Curran Filer
Bucknellian Staff Columnist

This is the last Caught in the Web. I'm sorry, you'll just have to find somewhere else to turn for direction in life. But I don't want to leave my loyal readers without any way to find things on the Web. You guys have made me the happiest columnist in the world, and I wanted to give something back. I've decided to make my last column a tutorial in how to do what I do every week. To compare the different search styles and features of the major search engines I did a sample search on all of them. I searched for "jobs" on Excite, Lycos, Yahoo, Infoseek and Webcrawler. By comparing what they each came up with for that topic, I hope you can get a general idea of what each search engine will do for you.

Excite!
`http://www.excite.com`

When I searched for "jobs," Excite found 523,571 matches. The top five, in order, were a Yahoo web page, Medzilla (a job resource page for professions in medicine, biotechnology and science), a list of civil service jobs in the D.C. area compiled by the George Washington University, the Entry Level Job Seeker Assistant and the World Wide Web Employment Office. Excite doesn't group anything into categories and subcategories. It matches up the word you search for with all the pages it has and gives you a list based on percentage match (100 percent is a perfect match). If you like a page you can click on the "more like this" link beside each page's listing to get more like it. Excite isn't very organized, in my opinion, and even though it has lots of pages in its archives, it's hard to find things with it.

WebCrawler
`http://webcrawler.com`

Webcrawler found 31,767 matches for "jobs". Its top five were the Molloy Building & Construction Trades Council page; "A Company of Businesspeople," which is an article about management; "Budget 96 - Minister's Statement," which is an Australian government document, an article by Arthur Waskow about economic issues and spirituality and CareerWeb. There is no "more like this" feature, but you can run your query on Excite if you click on a little link at the bottom of the page. WebCrawler seems to be even less helpful than Excite.

Infoseek
`http://www.infoseek.com`

Infoseek is the big winner in the overkill department, logging 1,136,041 sites matching "jobs." It also had a number of related categories to go to at the top of the page. Its five were Employment Opportunities and Resume Postings, Job Smart—Northern California Job Banks, The Phone Zone—Telecomm Job Mart, Colorado Online Job Connection and Jobs in Higher Education. Infoseek also uses a percentage match system, but none of the top five got a match of over 35 percent. One nice feature is that you can hide the summaries of each listing that Infoseek provides. Infoseek doesn't provide categories and subcategories either, but it is better than both WebCrawler and Excite.

Lycos
`http://www.lycos.com`

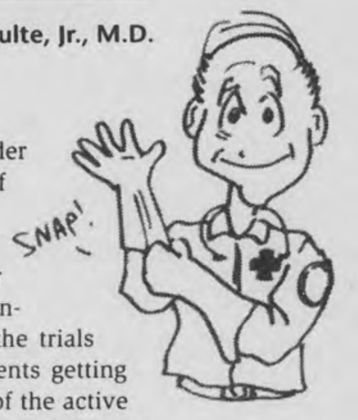
Lycos got 20,037 pages with a match for "jobs". The top five were The Hartford Courant News Page (the first story had to do with jobs), "Muf Reference—condition print-jobs," which is a page from technical help reference, the St. Joseph County Public Library Hotlist—Jobs, the Tele.net/News Usenet newsgroup listings for "jobs" which only had ab.jobs for Alberta, Canada, and Jobs in Statistics designed to help statisticians find jobs. Obviously, Lycos' sites are either irrelevant or just plain useless, unless you live in St. Joseph County. All of those five sites got a match percentage of over 90 percent. If you add to that the fact that Lycos seems to be slow whenever I use it, I think Lycos also belongs in the "not helpful" category.

Yahoo!
`http://www.yahoo.com`

I left this till the end because it's the one that I use and I think I have a personal bias towards it. The best part about Yahoo is that it uses categories and subcategories. This makes it easy to zoom in on a specific topic starting from a general topic. While other search engines may just give you a bunch of sites with the keyword in them, Yahoo actually gives you sites that deal with the keyword you are looking for. When I searched for "jobs" I found 42 category matches and 1,883 site matches. The first 20 or so categories were sites having to do with jobs in a specific area, like "Health:Employment:Jobs." The "Computer and Internet" category had a large number of companies advertising openings as well as employment services for the computer industry. For my money, Yahoo seems to be the only organized service, and that's the reason I recomend it.

Ask the Doctor: Prescribing pot

by D.W. Stechschulte, Jr., M.D.



Question: Would you ever consider prescribing pot for the treatment of such things as glaucoma?

Answer: My off-the-cuff answer would probably be "No." While an intern, I was involved with some of the trials with THC for nausea in cancer patients getting chemotherapy. This was a pill form of the active ingredient in marijuana. The results were not promising and, to my knowledge, the studies were discontinued.

The new laws in Arizona and California regarding medicinal use of smoked marijuana have generated large amounts of press coverage and a negative response from the Clinton administration who on Monday, April 21, 1997, ordered a raid on San Francisco's "Flower Shop," a buyer's outlet for high-quality marijuana that is sold for medicinal purposes. The medical press has called for bonafide studies using smoked marijuana to prove once and for all whether or not pot does help with medical conditions. There may well be justified use of the product, but I, too, feel it needs to be rationally studied.

Once it is proven that marijuana is or is not a valid medical treatment, we as a nation still need to come to grips with this politically charged topic. Presently, as the DEA's raid on the "Flower Shop" shows, there is a conflict between state and national policies. There are also some very interesting aspects regarding the use of hemp fiber which comes from the stems of marijuana plants. Hemp is a much more efficient source of pulp used in making paper than the current wood pulp method. It takes 10 acres of hemp to make the same amount of paper grown on 40 acres of woodland. It takes nine months for the hemp to grow and close to 100 years for the trees–but that's another issue.

Marijuana is a very volatile and political topic and needs objective investigation on which sound decisions can be made. Until then, I for one will not be prescribing it.

Dr. Stechschulte is the Medical Director of the Ziegler Health Center.

Seniors present recitals

Susan Minsavage

"Preparing literature for solo performance is the most fulfilling type of work I do at Bucknell. I look forward to developing a recital program each year, and consider these performances to be some of the most important events for me in the school year."

A mezzo-soprano and a Bachelor of Music candidate with a vocal performance major, Susan Minsavage will perform her fourth recital at the University 7:30 p.m. this Sunday in Bucknell Hall. Her recital will include pieces by a number of different composers, including Gabriel Faure, Richard Strauss, Mario Castelnuovo-Tedesco and John Musto, in order to "provide a representative selection of foreign language and English art songs that touches a wide scope of stylistic musical idioms," Minsavage said.

This recital is Minsavage's second this semester. Because she was the recipient of the University's Barbara Watson Grever Prize for Music, she prepared a lecture-recital which was presented in March.

Her accompanist for Sunday evening is Lou Ann Porter, a musician who works out of Harrisburg. Minsavage is exicted about her performance: "The main thing is that I plan on having fun with some amazing vocal literature on Sunday," she said, "and I'd love to share that with as many people as are interested."

Drew Edwards

"My recital is a composition recital, so its all pieces that I've written, and I'm not performing them, other students and faculty are. I chose pieces that I've written in the past two years that are representative of the direction I'm now going in."

Although he is required to give a senior recital to graduate, Drew Edwards said he would have given one anyway.

"I'm excited to finally have someone other than my professors hear my music," said Drew, a Bachelor of Music candidate with a Theory and Composition major.

Since this is a composition recital, other musicians will be perfomring works that Drew composed.

Edwards credited his three composition professors with influencing his work: William Duckworth, professor of music, Jackson Hill, professor of music, and Kyle Gann, professor of visiting assistant professor of music.

"Each has influenced me in a different way and I think that has really shaped my music," he explained. "I also listen a lot to so-called 'minimalist' music."

The recital will be held at 8 p.m. Tuesday in Bucknell Hall.

Megan Allen

"Cabaret is seriously composed music with the purpose of being performed in a smoke-filled room and having people get up and walk around."

With this ideal in mind, Megan Allen plans to tell people to make themselves comfortable and to feel free to move around during her cabaret performence at 8 p.m. next Thursday in Bucknell Hall.

This is "music that has a message," said Allen, a Bachelor of Arts candidate with a double major in music and English, explaining the misconceptions and loose usage of the term cabaret. "Once I got interested in it, I realized that this was serious music."

A result of a semester-long independent study, the lecture-recital seeks to define cabaret within an American setting, something that people have thus far not done.

"I approach the music in a historical, social, and literary context," she said.

All I photos by **Cara Mickelsen**—The Bucknellian

Composer/Performer and his Musicians create a style in their own rhythmic fashion

Steve Reich's music incorporates many styles and rhythms, including Western Classical music, cantillation (chanting) of Hebrew scriptures and jazz.

This composer/performer will be bringing many of these styles to the Weis Center stage as he presents five original compositions: Nagoya Marimbas, Genesis XVIII & XXI from the Cave, Sextet, Drumming and Proverb.

The Cave, which is a music theater video piece, explores the Biblical story of Abraham, Sarah, Hagar, Ishmael and Issac. The five screen, 18 musician production consists of edited documentary video footage mixed with live and sampled music.

Proverb, his most recent work, was written for five voices, two keyboards and two percussion and is set to text by Ludwig Wittgenstein.

Drumming features four pairs of bongo drums and three marimbas with two women's voices.

Reich graduated from Cornell University in 1957 with honors in philosophy, has studied composition at Juilliard School of Music and went on to receive his M.A. in Music from Mills College in 1963.

Since then, he has studied drumming at the Institute for African Studies at the University of Ghana in addition to other forms of East Asian music in Seattle and Berkeley, California.

Reich's music has been performed by several major orchestras around the world including the New York Philharmonic, Saint Louis Symphony, Boston Symphony Orchestra and the Brooklyn Philharmonic Orchestra.

Reich and Musicians start their concert at 8 p.m. this Saturday in the Weis Center. Tickets are required and can be purchased at the Box Office Tuesday through Friday 11:30 till 5:30 pm or by calling 524-1000.

Love Boat will soon be making another run

by Anne Putnam
Bucknellian Staff Writer

What do the Pacific Princess cruise ship, development of character and babies' health have in common? Why, these are the three essentiel elements for this weekend's kick-off event to House Party Weekend. Delta Upsilon is directing and performing its Demie Play based upon the Love Boat TV show to fund their philanthropy, the March of Dimes. Already a bit confused? Don't worry, their production April 24 and 25 will calm the waters.

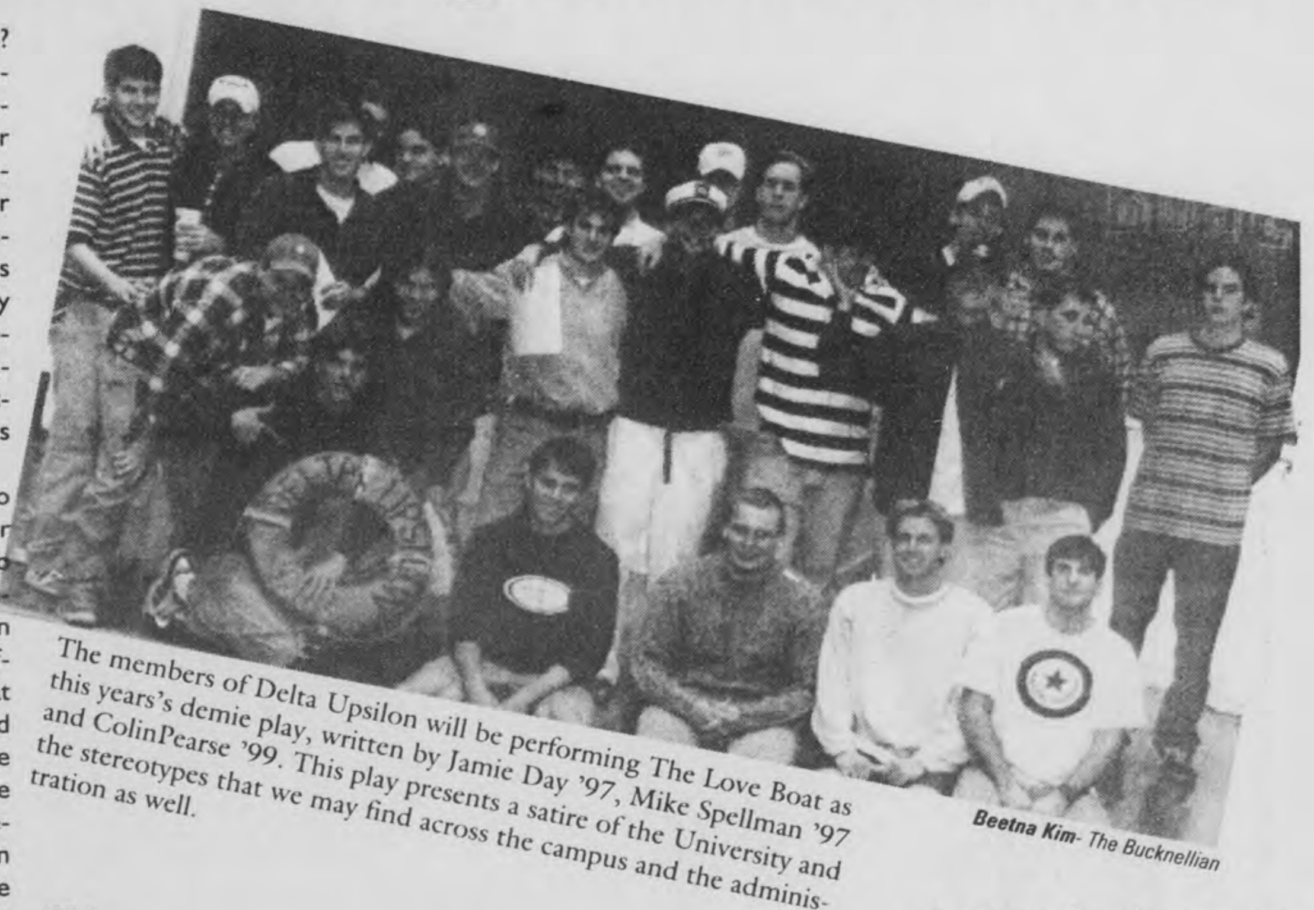
The Love Boat television show sailed the seas in the Pacific Princess and the Island Princess. Its stars meanwhile, coped with insignificant problems which they solved on each show. As character Captain Merrill Stubing of the original show described it, "Each crew member was always ready to fall in love each week (again), and usually scheming to try to get something over on the 'stern.'" The show's entertainment was enticing enough for three brothers of Delta Upsilon.

Jaime Day '97, Mike Spellman '97, and Colin Pearse '99 are the writers and directors of this year's Demie Play. Their fraternity, Delta Upsilon, has four founding principles, one of which they integrate naturally: the promotion of friendship. The three chose the theme of the Love Boat because of its obvious connection to a University's spring break trip. The background of the 70s show gave them a theme to create a satire of the University. The DU brothers developed the stereotypes on campus in order to step back and "poke fun of ourselves and administration."

In February, Day, Spellman, and Pearse began writing the play. Every day since February, they have been together to generate ideas and write the script. The script involves every brother in the chapter, with additional jobs to design sets and organize costuming. Others are involved in contacting local businesses, alumni and parents to sponsor the playbill. The two Business Directors, Pat Bartels '97 and Nick Bockh '97, coordinate these efforts to assist the financial involvement.

So where does the money go? Another principle for the DU brotherhood is the advancement of justice. Associated to this, the chapter at Bucknell provides a sizeable donation to the March of Dimes. For those who are not aware of the mission of this nonprofit organization is to improve the health of babies by fighting birth defects and infant morality. Birth defects due to mental and physical problems are battled through research and programs funded by the March of Dimes.

The guys are looking forward to pulling off their Demie Play in order to support this cause. The last two fraternal principles, the development of character and the diffusion of liberal culture, support their efforts. In addition, reputation is at stake because of the 82-year-old tradition, but the results so far are rewarding. "Students should come out to laugh, see the guys act (as females in some cases), and have a fun time for charity," Spellman said. The two- hour production won't be just a Love Boat episode, Spellman also said to "expect more than that with a hybrid from movies and plays. You'll really enjoy the character of Captain Stubing by Tom Broyles '97."



The members of Delta Upsilon will be performing The Love Boat as this years's demie play, written by Jamie Day '97, Mike Spellman '97 and ColinPearse '99. This play presents a satire of the University and the stereotypes that we may find across the campus and the administration as well.

Beetna Kim- The Bucknellian

A three-week crunch has pulled all the elements together. Every night the 80 brothers assemble to rehearse. At 8 p.m. tonight and tomorrow in the University Theater of Coleman Hall, the brothers will introduce their event to the campus. "The Love Boat promises something for everyone, set a course for adventure, your mind on a new romance. It's the Love Boat!"

"Go, have a great time, and celebrate after the finish," Day said.

Students harvest creativity over in the art barn

by Rachel Doebber
Bucknellian Staff Writer

Under Route 15 and through the mods to the Art Barn students go...

Tucked back in what once was a farmer's field off Smoketown Road stands a large white barn, cilo and all.

It is here in the Art Barn, amidst the drone of a chainsaw, oil paints and the smell of wet clay that the students in William Lasansky's, professor of art, Elementary Sculpture class and Rina Banerjee's, professor of art, Projects in Painting course begin, labor over and complete their masterpieces.

"You go at your own pace," said Michael Diamonds '00, one of the students in Lasansky's sculpture class. "You do as many projects as you can. It's just like a studio art class."

Diamonds' untitled piece constructed out of wood, stands over six feet tall. He needs to add another base to better support his almost complete piece.

When asked what his piece symbolizes, Diamonds replied, "It means whatever the public interprets it to mean."

Sara Bloom '97, who has been working continuously on her piece since the beginning of the semester, started with a 10 foot board.

"The grains represented topography to me," she said while explaining her not yet titled sculpture. "The stacking shapes are similar to the shapes in the wood and this piece eventually grew into a tree."

The shape of Jonah and the Whale, a steel and wooden sculpture by Jonathan Maley, student assistant to the Elementary Sculpture class, developed as Maley began working with the steel.

"The idea evolved as I played with the top central form by bending the two pieces of steel," he said explaining how the sculpture took its final shape.

Many of the sculptures and paintings by these students, including those above, will be exhibited in the Annual Student Art show held in the Center Gallery. Each professor selects several pieces from his/her class and asks the students if they would want to display it in the show.

"This is a real life experience for students," Banerjee said. "It gives them experience like that of a gallery show."

Banerjee's class has centered around the use of technology in art and how it has changed or influenced art. Her students have discussed ideas in art through looking at historical paintings and then compared these ideas to those of today where computer generated art is becoming increasingly popular. As part of her class, students had to complete two projects.

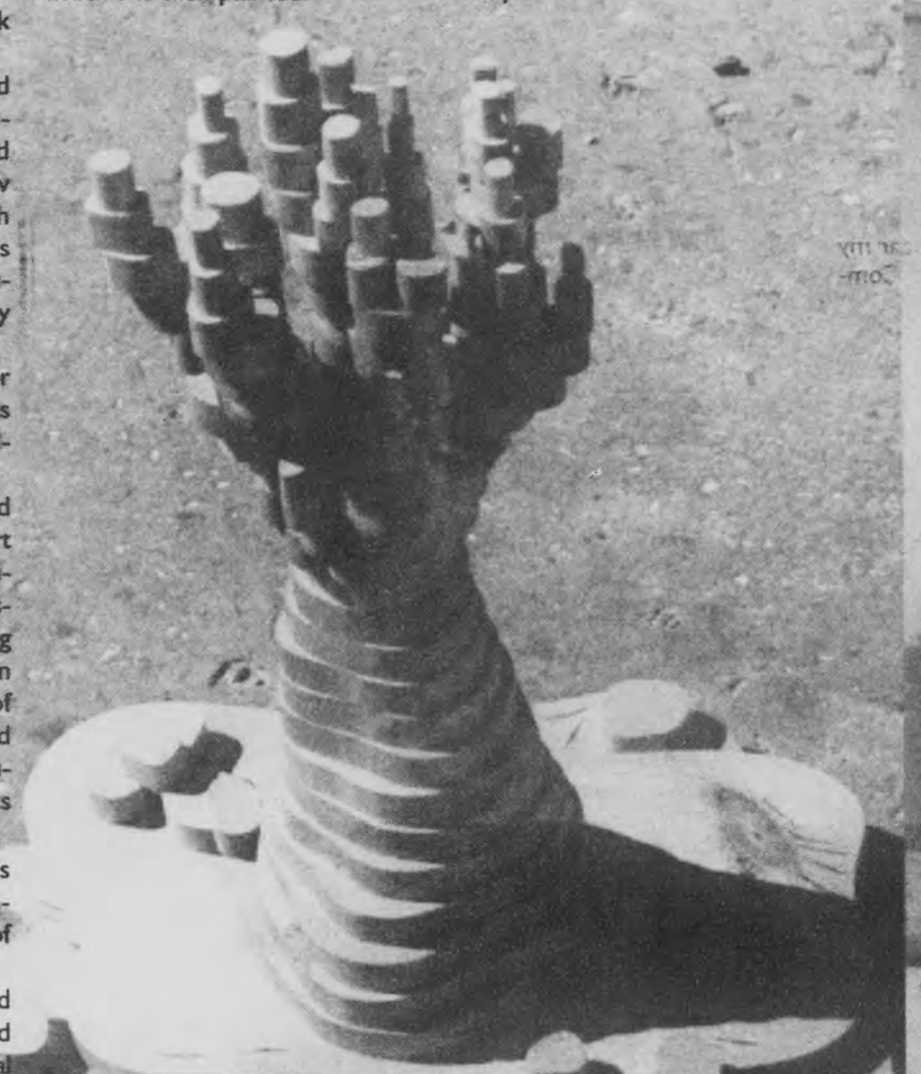
The first, portraiture in the 90s centered around the use of technology in art and the acceptance of technology in art.

The second involved mixed media where students explored how mixed media defies traditional painting and why mixed media is still considered painting.

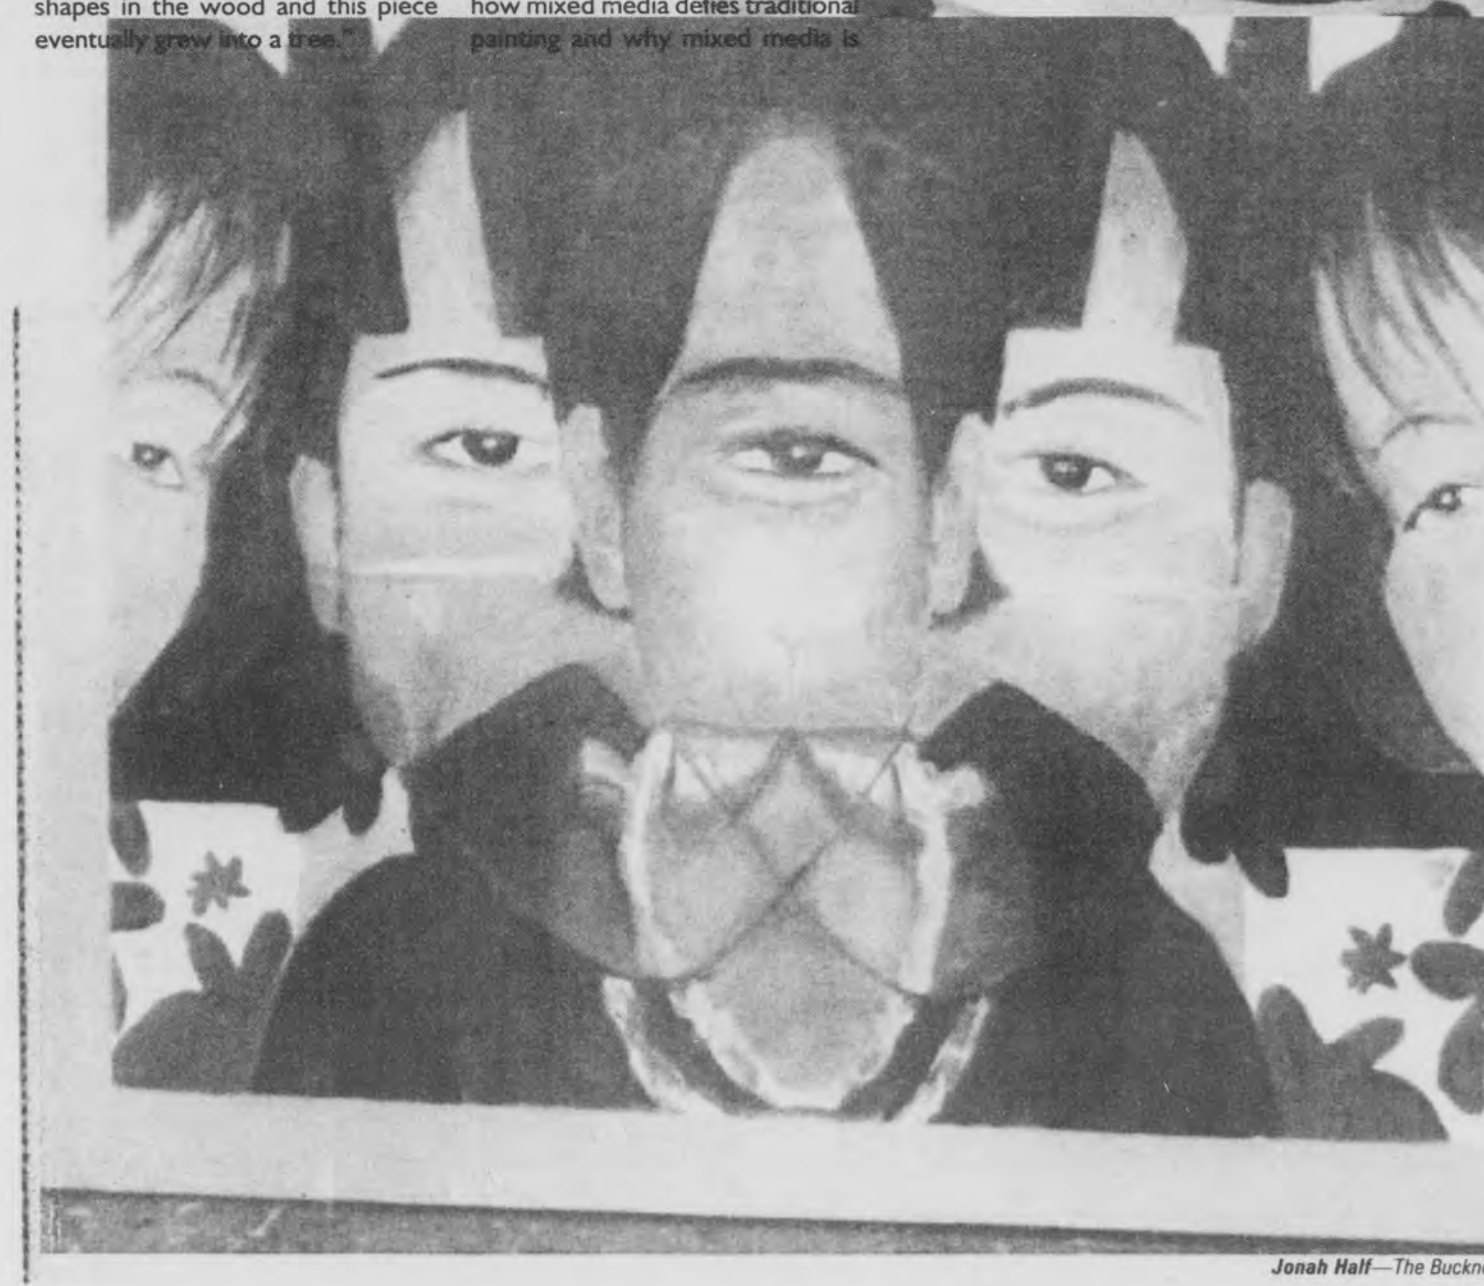
For her Portraiture in the 90s piece, Anju Mulchandani '00 took pictures of herself and another person. Using a scanner, she enlarged the photos, made transparencies out of them and overlapped the transparencies to create an image which she then painted.

"The project took me two weeks to complete. The idea grew as I worked on it," Mulchandani said then added, "In this piece, I wanted the technology to show through."

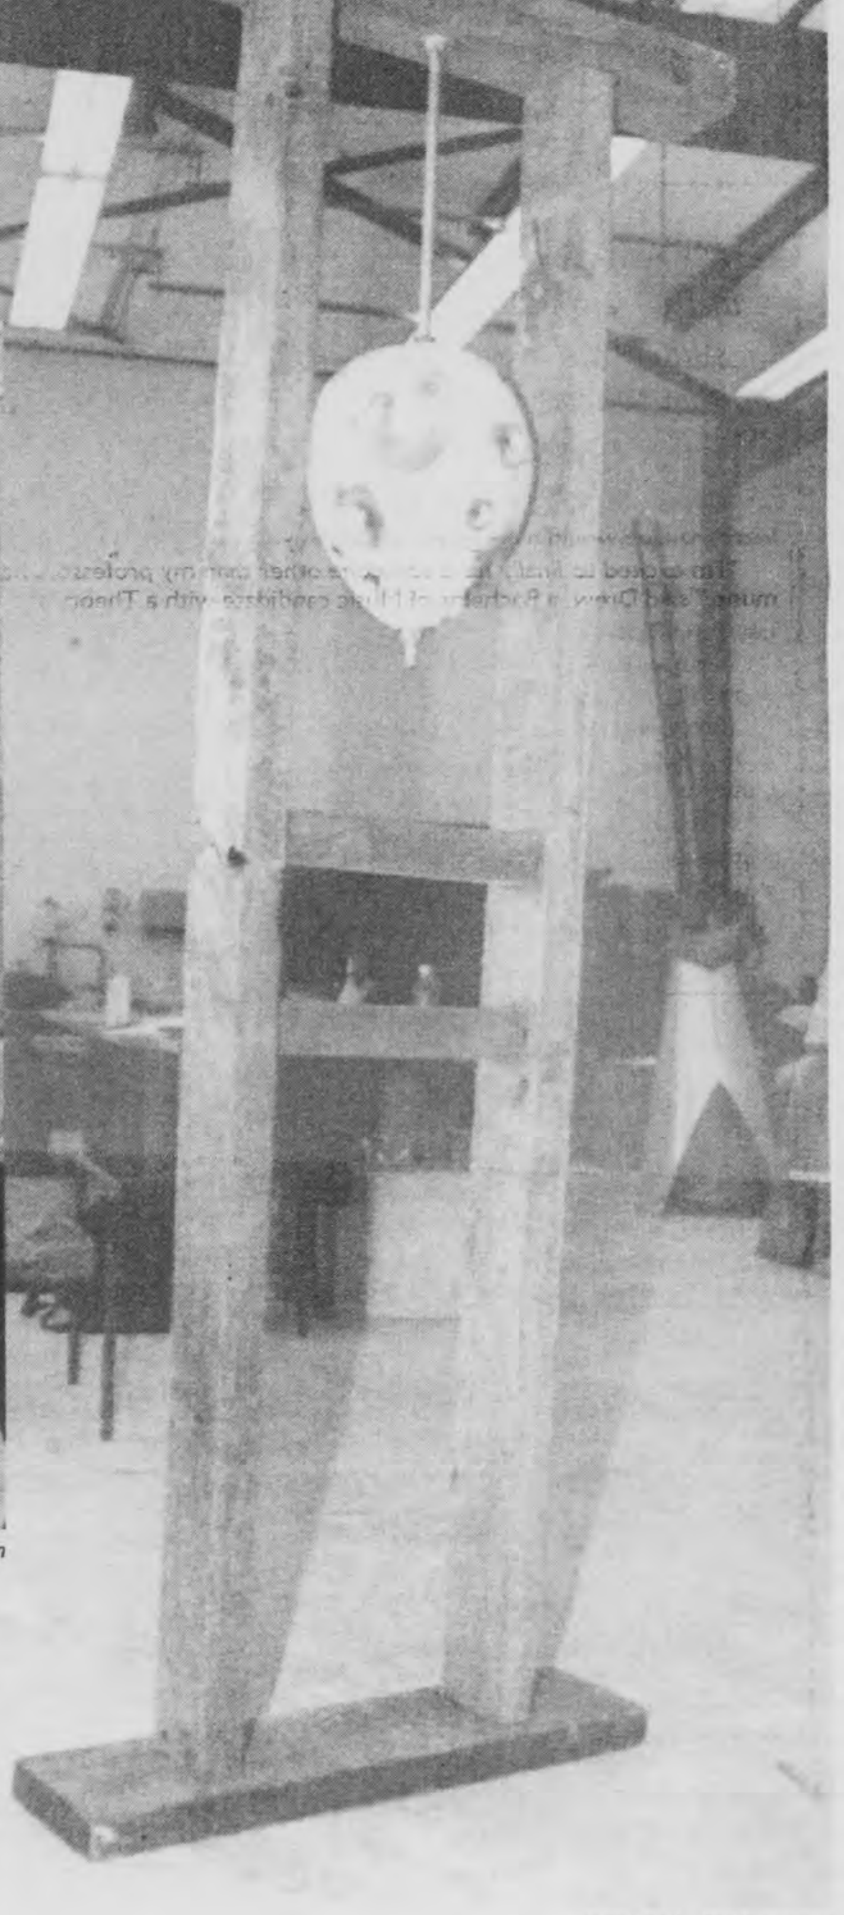
These pieces and many others, are on display in the Annual Student Art Show held in the Center Gallery.



Jonah Half—The Bucknellian



Jonah Half—The Bucknellian



Jonah Half—The Bucknellian

Above left: Senior Sara Bloom's wooden piece was transformed from a mere piece of wood into a tree, and as pictured at left: the painting by Anju Mulchandani '00, as yet untitled, used actual pictures of herelf and another person, and with scanning and other modifications. She then painted the image that resulted. As captured at above right, Michael Diamonds '00, created his piece from wood which stands at over six feet tall, and still needs its base. He maintains that the interpretation of his work is to be left open to the minds of his public.

When asked what his piece symbolizes, Diamonds replied, "It means whatever the public interprets it to mean."

Sara Bloom '97, who has been working continuously on her piece since the beginning of the semester, started with a 10 foot board.

"The grains represented topography to me," she said while explaining her not yet titled sculpture. "The stacking shapes are similar to the shapes in the wood and this piece eventually grew into a tree."

The shape of Jonah and the Whale, a steel and wooden sculpture by Jonathan Maley, student assistant to the Elementary Sculpture class, developed as Maley began working with the steel.

"The idea evolved as I played with the top central form by bending the two pieces of steel," he said explaining how the sculpture took its final shape.

Many of the sculptures and paintings by these students, including those above, will be exhibited in the Annual Student Art show held in the Center Gallery. Each professor selects several pieces from his/her class and asks the students if they would want to display it in the show.

"This is a real life experience for students," Banerjee said. "It gives them experience like that of a gallery show."

Banerjee's class has centered around the use of technology in art and how it has changed or influenced art. Her students have discussed ideas in art through looking at historical paintings and then compared these ideas to those of today where computer generated art is becoming increasingly popular. As part of her class, students had to complete two projects.

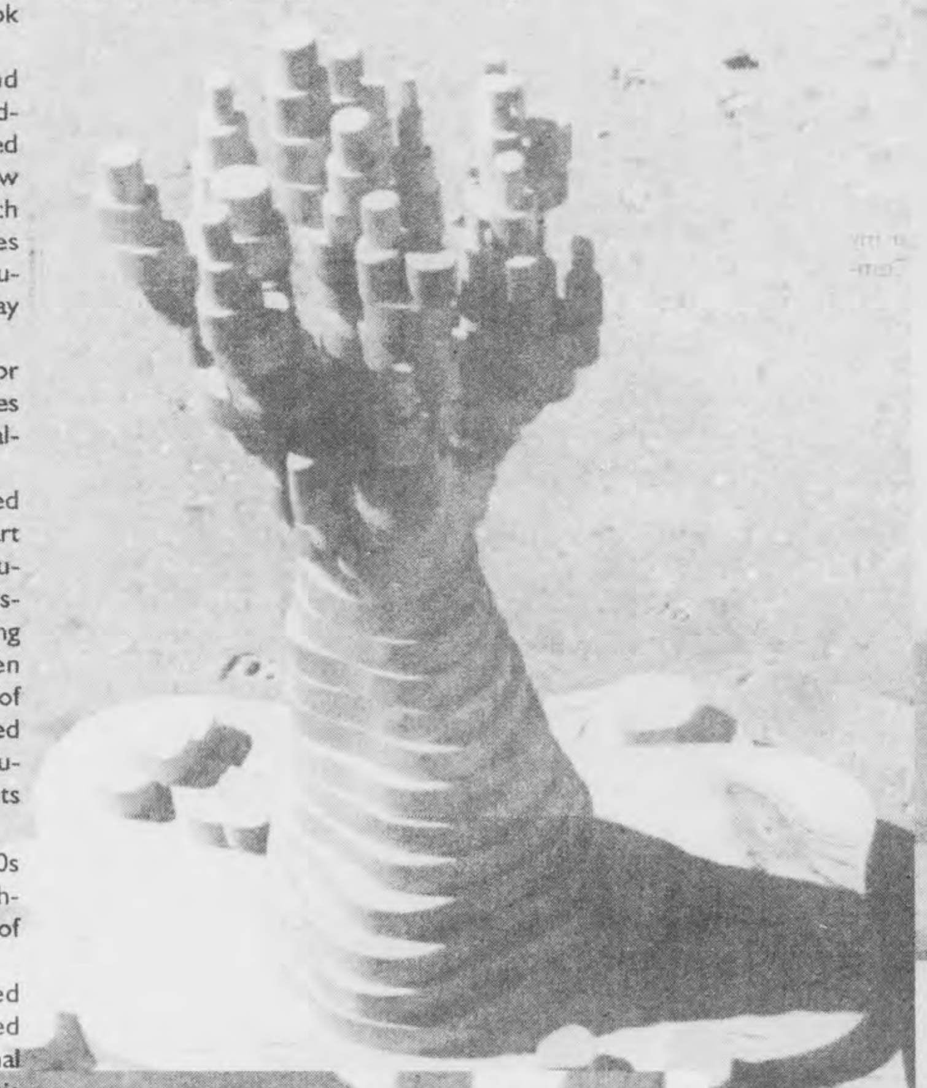
The first, portraiture in the 90s centered around the use of technology in art and the acceptance of technology in art.

The second involved mixed media where students explored how mixed media defies traditional painting and why mixed media is still considered painting.

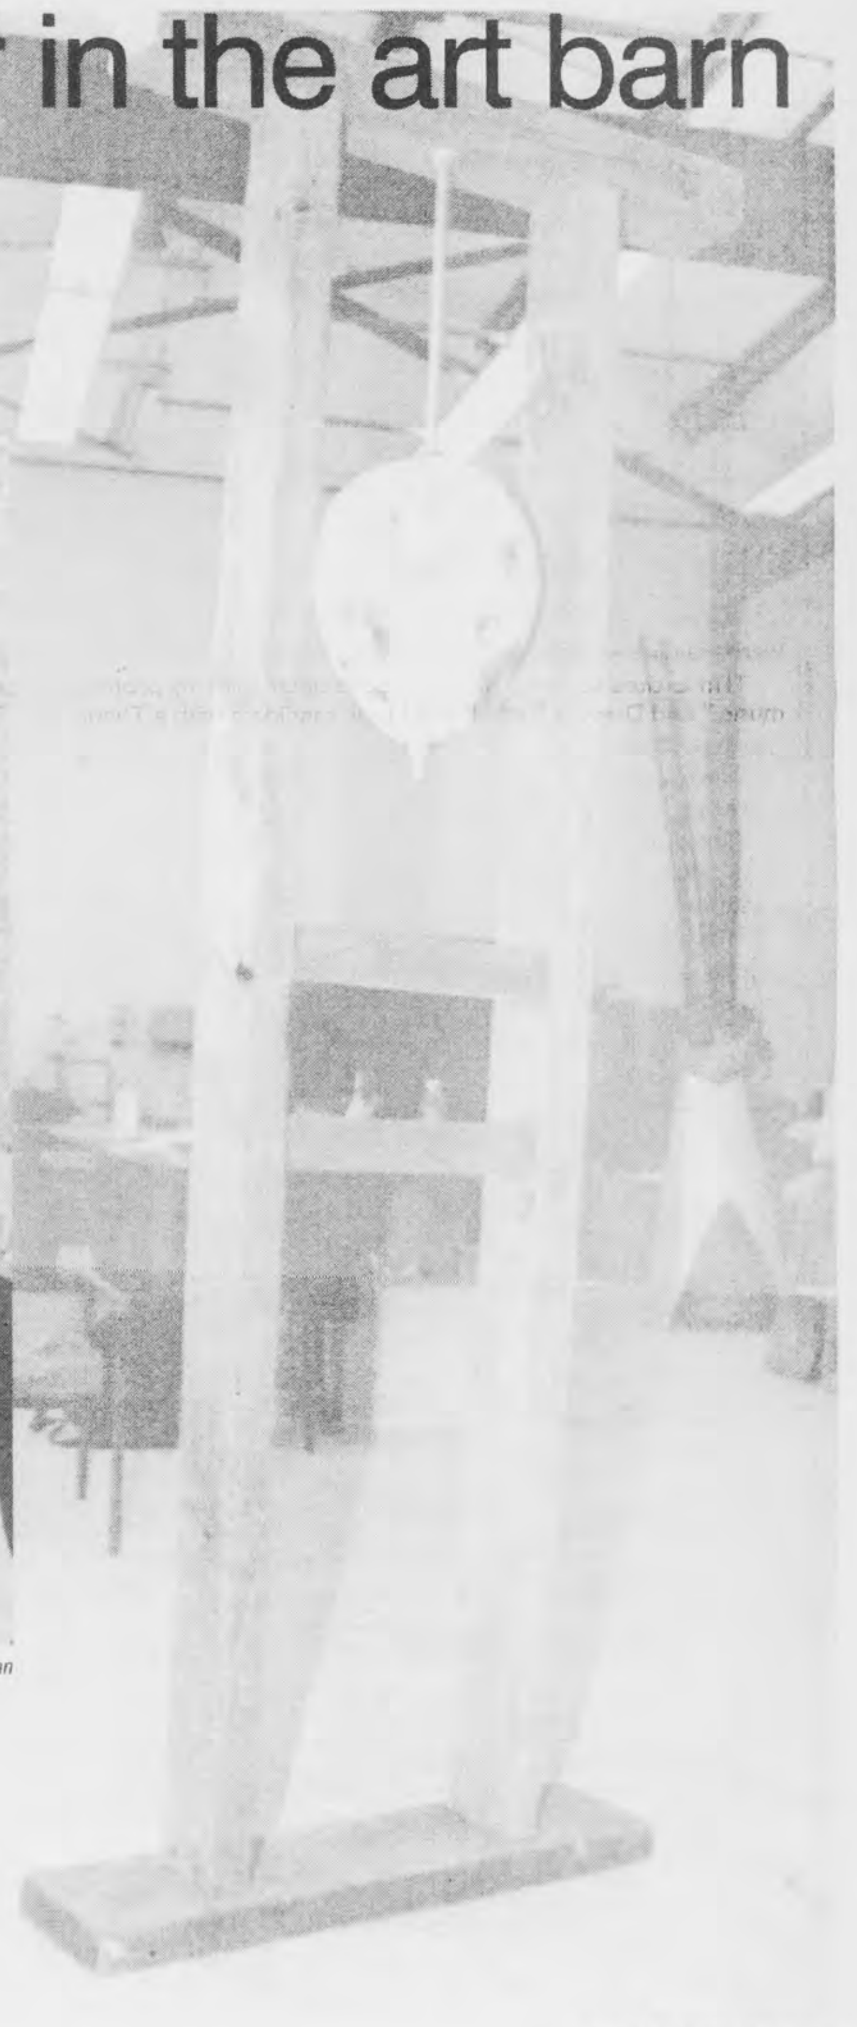
For her Portraiture in the 90s piece, Anju Mulchandani '00 took pictures of herself and another person. Using a scanner, she enlarged the photos, made transparencies out of them and overlapped the transparencies to create an image which she then painted.

"The project took me two weeks to complete. The idea grew as I worked on it," Mulchandani said then added, "In this piece, I wanted the technology to show through."

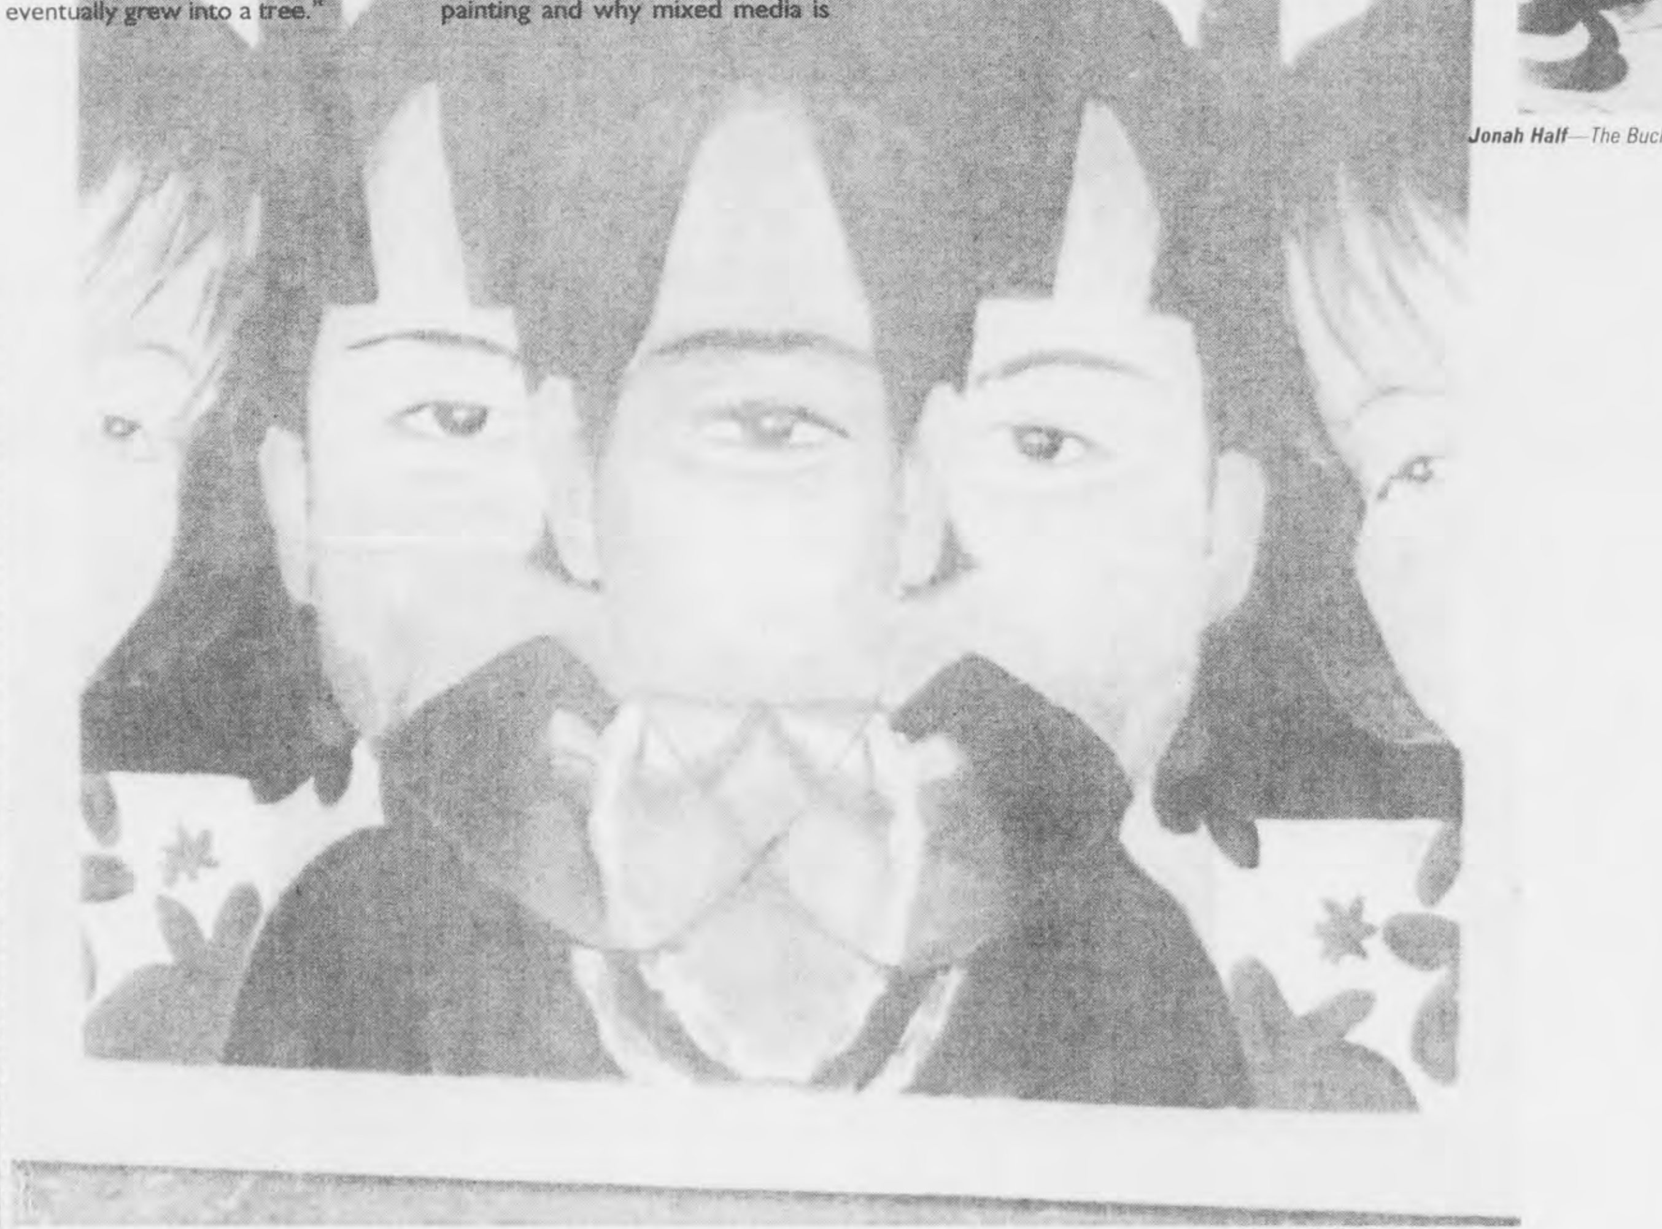
These pieces and many others, are on display in the Annual Student Art Show held in the Center Gallery.



Jonah Half—The Bucknellian



Jonah Half—The Bucknellian



Jonah Half—The Bucknellian

Above left: Senior Sara Bloom's wooden piece was transformed from a mere piece of wood into a tree, and as pictured at left: the painting by Anju Mulchandani '00, as yet untitled, used actual pictures of herelf and another person, and with scanning and other modifications. She then painted the image that resulted. As captured at above right, Michael Diamonds '00, created his piece from wood which stands at over six feet tall, and still needs its base. He maintains that the interpretation of his work is to be left open to the minds of his public.

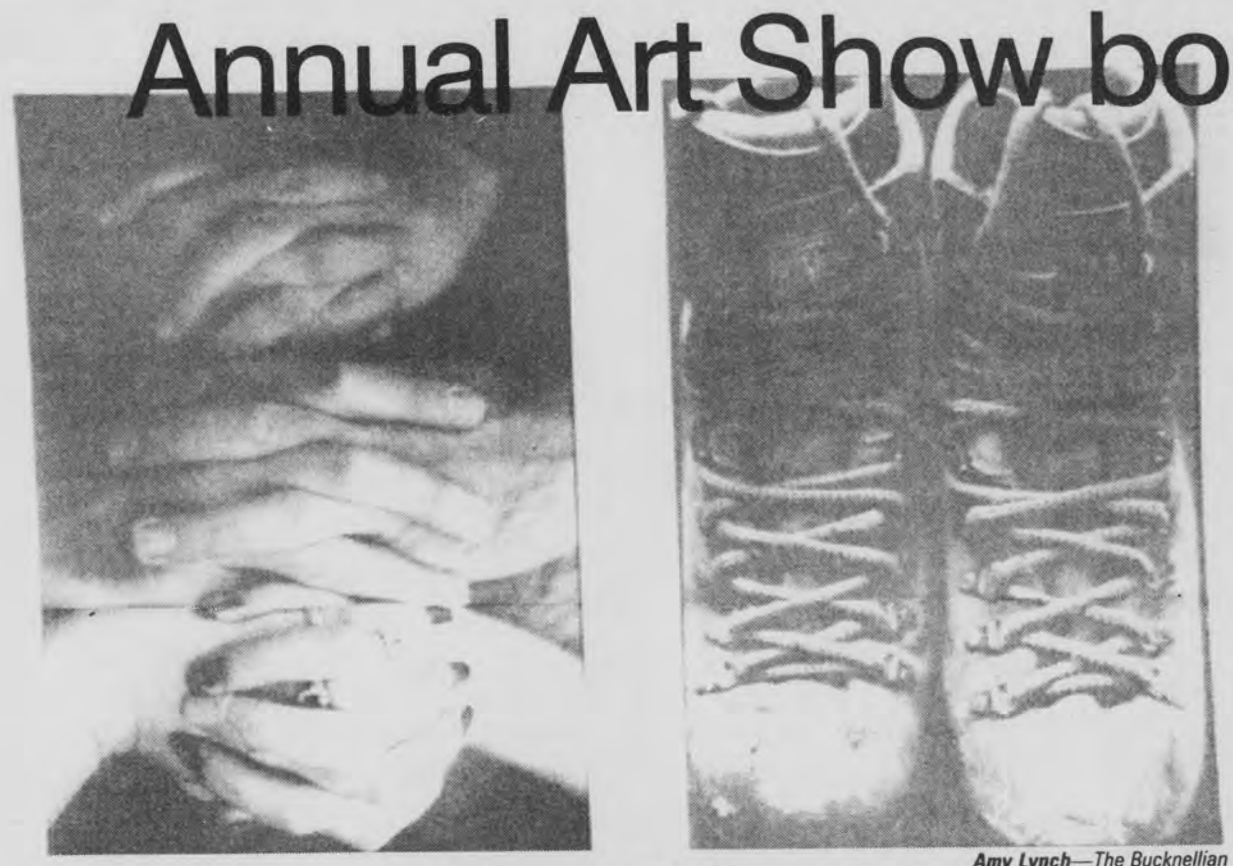
Annual Art Show boasts student talents



Amy Lynch—The Bucknellian

This untitled piece was produced by Scott Bryant '97 and is now on display in the Center Gallery.

by Rachel Doebber
Bucknellian Staff Writer

Large mural paintings; metal, oragami and wooden sculptures; black and white photographs; pencil drawings...These pieces, all created by University students, now decorate the walls and podiums of the Center Gallery on the third floor of the Langone Center, for the Annual Student Art Show.

According to Cynthia Peltier, coordinator of the Center Gallery, the Annual Student Art Show has been held in the Center Gallery ever since 1983, when the Gallery itself opened.

Professors of several art classes including Printmaking, Graphic Design, Sculpture and Painting select pieces by students and ask those students if they would want to display them in the exhibit.

Vanessa Reyes '99, an art major, has several pieces on exhibit including three prints, a painting entitled "White Tiger", a self portrait and a painting of a young girl wearing a blue hat called "Maria". She also has an untitled clay sculpture on display.

Reyes, in addition to the art classes at Lewisburg High School, took art classes at the University during her sophomore year of high school.

"White Tiger" took her the entire semester to complete in Neil Anderson's, professor of art, Advanced Studio Art class.

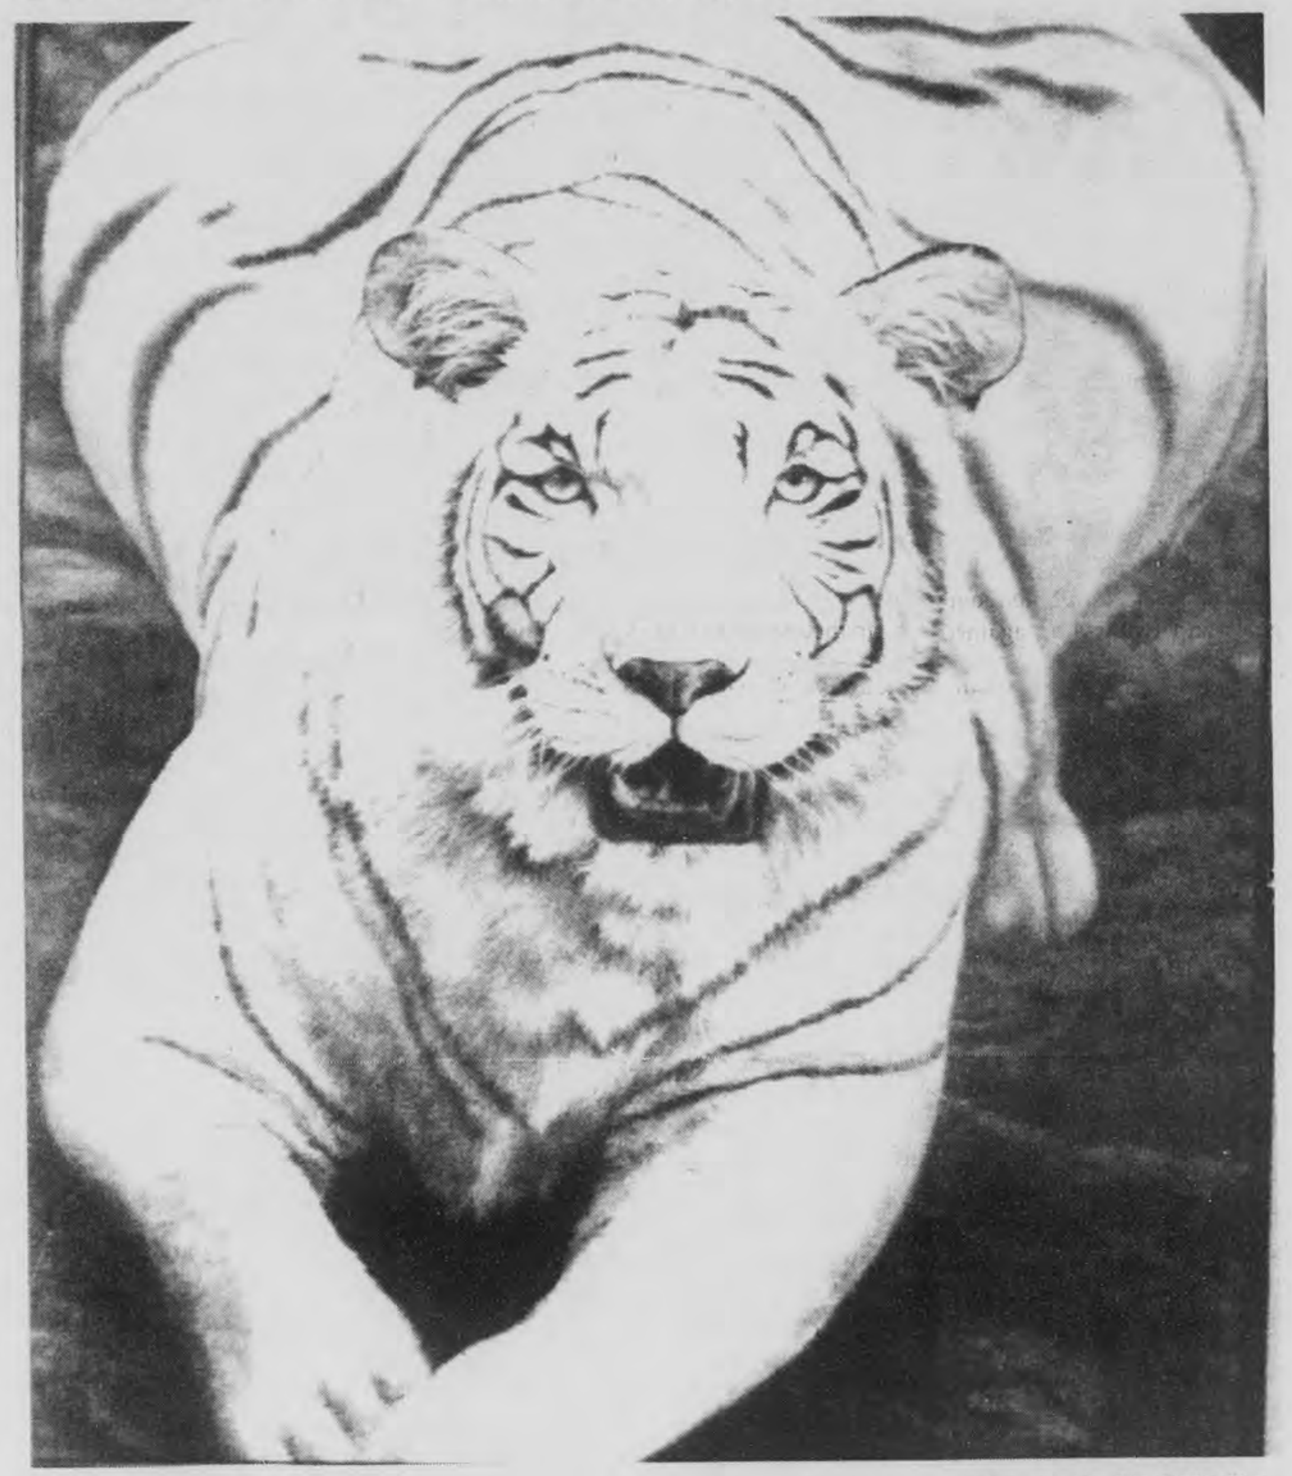
"I painted from a photograph," Reyes explained. "The animal looked so beautiful with all the detail in its fur coat. The eyes also attracted my attention."

In William Lasansky's, professor of art, Elements of Sculpture, which is Reyes' first experience with sculpting, she completed her untitled piece of four women's heads.

"I started to do a bust of a woman but I could not fire the clay. So, instead, I made a mold of her head and began replicating it into several sculptures," Reyes said on how the idea for this piece developed. "It was supposed to be a Greek column but I thought it would look more interesting the way it turned out."

The Annual Student Art Show runs until May 3 in the Center Gallery. The Gallery is open from 11 a.m. to 5 p.m. Monday through Friday and 1 p.m. to 4 p.m. Saturday and Sunday.

Amy Lynch—The Bucknellian



Amy Lynch—The Bucknellian

At right, Vanessa Reyes '99, painted this white tiger from a photograph, taking the semester to complete her piece. The tiger's eyes and the dimensions of its coat attracted her to choose this concept to work with for her project. At left: Reyes has replicated several heads of a woman. Originally intended to be a Greek column, this piece has become a sculpture of more dimensions than the artist had anticipated.

Men's lacrosse vs. Virginia

Sports

Player of the Week:

Brian Schiding '00 (track) won both the long jump and triple jump at last week's meet vs. Shippensburg.

Women's lacrosse routs St. Joes, breaks school record for wins

Heidi Hammes '99 fights through injured hamstring, closes in on 40-goal mark; team enters USLA National poll at No. 16

By Haley Futterknecht
Bucknellian Staff Writer

Cara Mickelsen—The Bucknellian

Lauren Coyne '99 and the women's lacrosse team rose to No. 16 in the national women's lacrosse poll after a 17-1 win over St. Joe's. The team's record is now 10-3.

Bucknell women's lacrosse broke the school record last Saturday for wins in a season with their 10th victory, beating St. Joe's 17-11. The record was set in 1984 with an overall record of 9-6.

The Bison stand at 10-3 for the season.

The Bison also accomplished another first as a team on Saturday. The women enjoyed the opportunity to compete on Davis Field, chiefly the soccer and men's lacrosse field.

"This was the first time that I could actually sense somewhat of a parity between the men's and women's lacrosse programs," commented father Tom Coyne, who has attended every Bison game this season, home and away.

After Heidi Hammes '99 contributed the first goal of the game, she suffered a pulled hamstring which left her seated for the remainder of the Bison victory. With a season total of 33 goals, Hammes needs seven more to become just the fourth person in school history to score 40 goals in a season, a record that might be impeded by her injured hamstring.

Bucknell led by a mere 6-4 at halftime before Jesse Eaton '97 stepped up to pick up the offensive slack. After only scoring five goals thus far this season, Eaton contributed four goals and two assists against St. Joe's.

"We handled the ball well, making great connections and getting the pass off successfully," commented Lauren Coyne '99.

In the second half Bucknell pulled ahead with five consecutive goals. Liz Murphy '99 put four goals past the Hawks' goalkeeper, and Kate McIlvain '97 and Meredith Barrows '97 each had two goals for the Bison.

McIlvain was honored this past week as the Patriot League offensive player of the week.

Aly Toombs '97 turned away eight of the Hawks' shots, as the Bison outshot St. Joe's 40-24.

Bucknell added another victory to their winning record with a win over Lock Haven, 13-7, on Monday. Playing without leading scorer Hammes, the Bison struggled early offensively.

The game was tied 3-3 at the half. But in the second half, the Bison poured in 10 goals to pull out the win. They led a balanced attack which all came together in the second half.

"In the first half we tended to play down to their level of poor stick skills causing rampant checking on our parts. We pulled it all together, though, and shut down their top scorer in the second half," noted Jen Gallagher '98.

Theresa Frezzo '99, Sarah Moosbrugger '98 and McIlvain all contributed two goals to the win. Frezzo also added two assists.

"In the past few games the offense has been very patient and executed plays well and with precision," Frezzo stated.

The Lock Haven victory displayed the strength of the Bucknell bench. "The people off the bench helped us the most against Lock Haven, which is extremely promising to the future of our program," Gallagher commented.

Frezzo agreed, adding that "it is good to see the players come off the bench strong, because when we lose starting seniors, we are assured to have people to adequately fill those spaces."

Toombs turned aside 10 shots for the Bison.

After the wins this week, Bucknell entered the United States Lacrosse association's top 20 poll as the number 16 team in the country. This squad is the first Bucknell women's lacrosse team to achieve this.

There are two games left to add to the new school record for victories. Bucknell played UMBC yesterday at home. The Bison close their season at home on Saturday against Columbia at 11a.m.

Bucknell overcomes Shippensburg in "old fashioned" track meet

By Chris Ellis
Bucknellian Staff Writer

About a decade or so ago, track meets were not the multi-team impersonal invitationals that they are now. It was rare when more than a couple teams tangled in a meet, and this head-to-head competition provided by dual meets created some intense matchups. With budget cuts stripping some programs to the bare bone, though, the time of the dual meet has nearly died. Bucknell still has one such meet on its schedule, though, a yearly matchup with Shippensburg that has evolved into an intense rivalry.

Saturday, Bucknell continued its dominance over Shippensburg in the annual event, with both the men's and women's teams posting 22-point victories. The Bison men knocked off Shippensburg 88-66, while the women prevailed 83.5-61.5.

"I wish we could have meets like this more often," Head Coach Art Gulden said. "I have a passion for dual meets and the competition they bring."

Unlike most of Bucknell's other meets this season, this one was close for most of the way. Shippensburg, the reigning Pennsylvania state school champion, ran nearly as deep as the Bison and matched strengths well.

The Bucknell men earned victories in 11 of the meet's 18 events to claim victory. Brian Schiding '00 helped to clinch the victory by winning the long jump and triple jump, a pair of the meet's latest events. Schiding fouled on his first two jumps in both events, but rebounded to win both events by nearly two feet. His long jump of 23 feet- 4 1/2 inches qualified him for the season-ending IC4A championship meet.

The men also dominated the track distance events, winning the 400, 800, 1500, and 5000-meter races in addition to the 3000-meter steeplechase. The trio of Steve Roeser '97, Matt Kodak '99, and Chris Kearney combined to sweep the top three places in the 5000-meter event, putting Bucknell atop the meet's point standings for good.

'00 Dave Pomfret's victory in the pole vault sealed the win for the Bison. Pomfret, who had been forced to compete in several events in recent meets, had seen his pole vault success wain as a result of overexertion. At Shippensburg, though, Pomfret competed solely in the pole vault, and responded by clearing a winning height of 14 feet, 6 inches, outdistancing teammate Tim Evans '99 by six inches.

The Bison women won 10 of 17 events en route to their 20-point victory. In past meets, Bucknell's throwers have helped push Bucknell over the top, but with the Bison earning just four of the top nine places in the shot put, discus, and javelin events, the Bison had to look to others to lead the way to victory.

The women's jumping team responded to the challenge, winning all three jumping events and earning 8 of 9 top-three finishes in those events to seal the victory for the Bison.

"Our throwers had bailed us out in other weeks, but our jumpers bailed us out last week," Gulden said. "We had really strong finishes in each of the jumping events."

Bucknell's Jen Rice '98 stood out as the meet's dominant female athlete, winning both the high jump and triple jump and finishing second to teammate Kate DeiCas '97 in the long jump. DeiCas' long jump of 18 feet, 3 inches was the third best jump in school history.

Julie Sweitzer '99 also earned two victories for Bucknell, trouncing the field in both the 1500 and 3000-meters. Shippensburg's Stephanie Yingling is one of the state's top runners in the 1500-meters, but finished second to Sweitzer by nearly four seconds.

"She (Yingling) thought she could just coast and beat Julie," Gulden said. "She just didn't know who Julie was."

Bucknell will spend this weekend at the Penn Relays in Philadelphia, PA.

Jared Silliker—The Bucknellian

Ron Hess'00 helped Bucknell's men to a 22-point win over Shippensburg.

Flash in the Pan

Setting the Pace: Six foot, six inch, 330 pound Orlando Pace from Ohio St. became the first offensive lineman in the past two decades to be selected with the number one overall pick in the draft as he was selected by the St. Louis Rams. The draft yielded many trades but few surprises. After Pace the Raiders selected defensive tackle Darrell Russell from USC and the Seahawks grabbed cover-corner Shawn Springs from Ohio State with the third selection overall.

Basketball Playoffs Set: In the right to face the Chicago Bulls, the Washington Bullets came back to defeat the Cleveland Cavaliers in Cleveland. The winner of the game would have faced the East's top seed. In other East match-ups, the second seeded Miami Heat will face the beleaguered Orlando Magic, the Hawks will square off against the Pistons, and the Knicks will face the Charlotte Hornets and former teammate Anthony Mason.

In the West, the battle for the second seed was won by the Supersonics as they edged the Lakers for the Pacific Divison crown. The Rockets that earned the home-court advantage until the Western finals by a head-to-head matchup against the Sonics. The top seeded Utah Jazz face the surprising L.A. Clippers, while the Suns, Timberwolves and Trailblazers will face the Sonics, Rockets and Lakers, respectively.

Irabu to the Yankees: The Hedeki Irabu saga has finally ended.. almost. The Yankees agreed to trade prize prospects Ruben Rivera and Rafael Medina for Irabu and three padre prospects. The catch is that Irabu now says he will sit out the year and become a free agent next season. He had formerly said that he only wanted to play for the Yanks.

Giant Steps: In early baseball action the surprising San Fransisco Giants have claimed the best record in baseball. The Giants boast a totally new infield and Barry Bonds is slumping while seeing few good pitches, but the Giants pitching staff has stepped it up to push the Giants to best in baseball. The Baltimore Orioles boast the best record in the American League.

Finally: After 14 tries, the Chicago Cubs have finally done it. The Cubs, who set the National League record for consecutive losses to start a season, survived a two-run New York ninth to earn a 5-4 win over the Mets and end the losing streak. Turk Wendell picked up the Cubs' first win of the year. The next day, the Cubs defeated the Mets again.

Kiss and Make Up: Nearly six months after their highly-publicized "spitgate" event last year, the Baltimore Orioles' Roberto Alomar and American League umpire John Hirshbeck shook hands before Baltimore's game with the Chicago White Sox Tuesday. The umpires threatened to boycott the postseason after Alomar received only a five-game deferred suspension for his actions, but Hirshbeck said Tuesday that he was simply ready to "put the whole matter behind him." Baltimore won the game, 3-2.

Two new faces grace football coaching staff

Head Football Coach Tom Gadd has added two new faces to the Bison coaching staff this spring, and one familiar face has been promoted to offensive coordinator.

Dave Warner, a former quarterback coach at the University of Kansas, and Gary Campbell, an offensive assistant at Johns Hopkins, will team up to work on the Bison air attack as quarterbacks coach and wide-receivers coach, respectively.

Bison offensive line coach Norries Wilson will take over as offensive coordinator, replacing Craig Moropoulos, who left Bucknell for a position on the staff at Boise State in January.

Wilson, a 1989 graduate of the University of Minnesota, was a captain for the Golden Gophers in his playing days. He will continue to work with the offensive line while fulfilling his new duties.

Warner, who is originally from Lehighton, Pa., played his college football at Syracuse, where he was a three-year letterman. For the past nine years, he has coached the signal-callers at Kansas, serving as a mentor for four of the Jayhawks' all-time passing leaders.

With the graduation of two-time All-Patriot League quarterback Jim Fox, Warner will be in charge of grooming a new signal-caller for the Bison. Jim John '99 looks to be the most likely successor, but Donnie McDowell '00 and Kevin Boulden '00 will also be vying for the position.

Campbell, who hails from Berwick, PA. and once caught passes from Notre Dame star Ron Pawlus, is scheduled to earn his masters degree in education from Johns Hopkins this May.

He caught 52 passes and scored three touchdowns as a college freshman at Johns Hopkins, but a shoulder injury hampered his career. He began coaching for the Blue Jays in 1994.

The defending Patriot League Champion Bison began spring practice in early April and will wrap up their formal off-season sessions with the annual Spring Game on Saturday at 3 p.m. at Christy Mathewson Memorial Stadium.

Softball gears for league tourney run

BY CHRIS ELLIS
Bucknellian Staff Writer

The Bucknell women's softball team may not go into this week's Patriot League tournament as the favorite to take home the league title, but, if nothing else, the Bison have to be recognized as the league's most dangerous team.

Two weeks ago, Bucknell knocked Colgate from the league lead, sweeping a doubleheader from the Red Raiders by scores of 3-2 and 6-3. Last week, Bucknell handed new league leader Lehigh only their second Patriot League loss in the first game of a doubleheader, pasting the Engineers 7-4. Lehigh came back to take the second game by a 6-0 score, but Bucknell had already staked their claim to a high seed in the tournament.

In the first game, the Bison broke open a 4-4 tie by scoring three runs in the bottom of the sixth inning to pull out the victory. Senior Jenn Gombos' triple knocked in the go-ahead run for the Bison. Kristen Sandel '98 went a perfect 4-4 in that game.

In the nightcap, though, the Bucknell offense, which had collected a season-high 16 hits in game one, suddenly fell silent, managing only two singles and a double off of Lehigh pitcher Patty Goodwin. A two-run double by Lehigh rightfielder Stephanie Rapel in the third inning was all the offense the Engineers needed.

Earlier in the week, Bucknell spilt doubleheaders with both Maryland and Rider.

Cara Mickelsen—The Bucknellian

Kristen Sandel '98 (throwing) and Jennifer Delardo '98 (#16) look to upset their way through the Patriot League tournament. The team's league record stands at 6-4.

Bucknell heads into the Patriot League tournament as one of the league's hottest team. The Bison's season record was a lowly 13-25, but Bucknell enters the tournament having won 12 of its past 21 games. Sandel led the Bison at the plate with a .369 average, and Gombos (.328), Jenny Snyder '99 (.317) and Stacey Waite '99 (.309) all hit above the .300 mark. On the mound, Waite finished with a 5-13 record in her 18 starts, but that mark belies her 1.96 ERA and 43 strikeouts. Melanie Kulis, a .284 hitter on the season, finished with a 8-11 record and 3.15 ERA. Kulis also struck out 44 batters.

Bucknell opens tournament play this Saturday in Allentown, Pennsylvania.

Club Sport Report: Cycling and Ultimate Frisbee

Cycling dominates New England races

by Dan Doolan
Bucknellian Team Correspondent

The Bucknell Cycling team traveled to Williams College and the University of Connecticut last weekend to compete in two races.

Unfortunately, Saturday's event at Williams was cancelled due to snow, but luckily the sun came out on Sunday to make for a beautiful race at U Conn.

Bucknell was successful in two of the races led by excellent performances in the Men's B race by Brett Bailor '00 and Brian Hill '98 and in the Men's A race by Tim Gernitis '98, Marc Ducharme '98, and Ryan Steneken '98.

The course was the deciding factor in both races, which were held around a hilly 22-mile circuit, with the B race completing two circuits of the course and the A race consisting of three laps. Each lap contained 2000 + feet of climbing and finished at the end of a two mile hill.

The B race stayed together in a pack for the two laps, only breaking apart on the last two-mile climb. A strong effort by Bailor led the race in for Bucknell with 10th place. Hill was second for the team at 12th overall. These high finishes by Bailor and Hill served to further establish Bucknell as a force in the B-field.

The A race took on a bit of a different format; with break-aways and a very high pace, attrition was high. On the first major climb the extremely strong field of racers turned on the pressure. From this point on, the race was contested at a very high speed, whittling down the 50 racers one by one until a field of only 15 remained.

The race saw a number of break-aways despite the high speed, though none of them were successful. Stenken was everpresent at the front of the race sacrificing himself for the overall standing by chasing down these break-aways.

Thanks to Steneken's efforts at the front, Ducharme and Gernitis were able to conserve their efforts before the final hill. This strategy worked well and as the race came to a finish, both Ducharme and Gernitis were well positioned for top finishes. With one kilometer to go, Gernitis gave a powerful effort that saw him go solo off the front for the team's third victory of the year.

Behind Gernitis, Ducharme charged in to beat out the national champion and win the field sprint, for a Bucknell one-two finish. Afterwards, an ecstatic Gernitis said, "I just waited until there was one kilometer to go, then I attacked and no one could answer."

With these top two placings, Bucknell dramatically increased its chances to earn itself a berth to nationals. The official results of the national's qualification will be divulged after the Princeton and Cornell races this weekend. No matter what the results, Bucknell has had successful spring campaign which has included three top placings.

In 10 of the 13 races the team has entered, it has not only turned heads, but has also established Bucknell as a consistent and feared team in the Eastern Collegiate Cycling Conference.

Mudsharks grow up at Swarthmore Invite

by E.J. Crawford
Bucknellian Team Correspondent

It looks like the young Mudsharks finally grew up.

The inexperienced Bucknell Ultimate Frisbee squad finally found a way to win the tight games this past weekend at the Swarthmore Invitational Tournament. The men's team, boasting all sophomores and freshman, put quite a scare into far more experienced competition, finishing the weekend 3-3 and earning a surprising third place in the eight-team field.

The Mudsharks arrived at Swarthmore looking at a tough draw that included UPenn and Haverford, two teams that had easily handled Bucknell in previous outings. However, everything changed in one point, as Dan Heckman '99 hit Sanatan Golden '99 for a score on the very first point of the game to show the UPenn Void that this team was one that would not fold. With a ferocious wind making it difficult to score upfield, the game was a constant see-saw battle until the end, as the Void's experience won out in a 13-11 Mudshark setback in the tournament's longest game.

Things didn't get any easier for the Mudsharks, who boasted only two subs at this point. They next battled Haverford's Seven Deadly Sins, a squad that had handled them easily just two weeks before. Early on, the Mudsharks showed the effects of the previous game, falling behind 3-0. Unfortunately, this proved to be decisive as, despite fantastic layouts by Scott DiPerna '99 and Sheldon "Why does everyone make fun of me" Wallbrown '99, the Mudsharks still fell 13-10, although they drew compliments from the Haverford squad for their tough play and improvement. A further setback was suffered as Steve Grimes '99 went out with a back injury, and Diperna was slowed by a bout of flu that eventually put him out of comission.

Although the Mudsharks lost the games, the squad rallied behind the wacky mind of E.J. Crawford '99 and the James Brown-toting of Gregg Lithgow '99 to finish the weekend 5-0 in cheers, including the memorable A-Team cheer, and subsequent cheers inspired by Yoda and The Godfather of Soul.

Tired and beaten, the Mudsharks rebounded to defeat an equally inexperienced Eastern squad 13-7 to finish off first round play at 1-2.

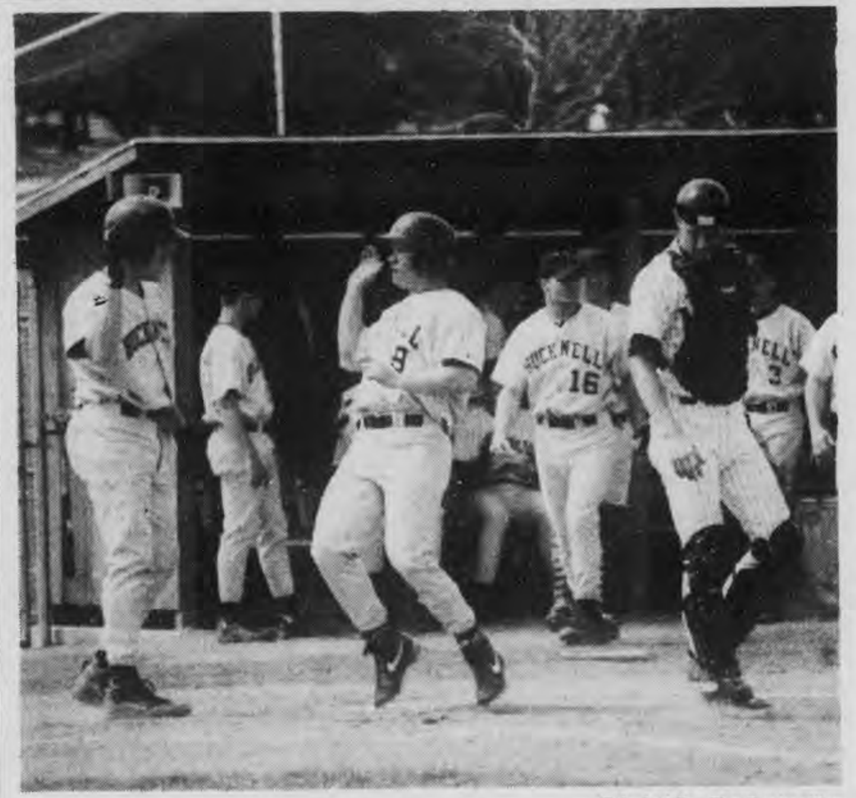
The beleaguered squad then went on to face eventual winner Swarthmore in the second round with weary legs and only one substitute. The Mudsharks fought with great grit and spirit, but it wasn't enough to overcome the fresh legs and long throws of Swarthmore, pushing the Sharks into the consolation round.

The Mudsharks woke to find a forgiving draw that included a forfeit by Drexel. Based on their good showing from the day before, the Mudsharks earned the right to battle UPenn for third place.

Upenn was fired up after a close loss to Swarthmore, and opened trying to prove that Saturday's close game with the Sharks was a fluke. On the other hand, the Sharks, now devoid of subs, were weary and desperate in the face of playing an entire game of "savage sevens." Thus the game began as expected, with UPenn jumping out to a 3-0 and 5-2 lead.

But the Sharks proved they weren't dead, as Crawford hit Pete "the Garbage Man" Wise '00, and Lithgow fought off a foot injury to find Mike O' Brien '00 in the back of the end zone to start a memorable 8-1 run that pushed the surprising Mudsharks to game point. UPenn fought back to win the next point, but the Mudsharks refused to die and finally Heckman connected with Golden to win the game for the exhausted Mudsharks.

The Sharks hope to carry their new-found momentum into next weekend's sectionals at Princeton, the true test of how far this young team has come.



Erin Leidl—The Bucknellian

The Bucknell baseball team's season record currently stands at 19-18-1. The Bison are holding onto the third and final playoff spot in the Patriot League.

Baseball fights for final Patriot League playoff spot

by Jeff Campagna
Bucknellian Staff Writer

The Bucknell baseball team (19-18-1), the defending Patriot League champion, is precariously holding onto the third and final spot for the playoffs.

A disappointing split of four games with last-place Holy Cross this past weekend left the Bison vulnerable, with Lehigh chasing at their heels. This coming weekend's four-game series against Navy is crucial to the Bison, who rank third in the league behind Army (12-4) and Navy (9-5), and ahead of Lehigh (8-8). Bucknell holds the tie-breaker advantage against Lehigh, who will be playing Army this weekend to round out top-four action.

In out-of-league action, the Bison shelled Bloomsburg 18-6 last Thursday. Bucknell jumped out to a 4-1 lead in the third inning on a pair of home runs by left fielder Mike MacNeely '98 and right fielder Alex Inclan '97. The stadium just could not contain MacNeely the next inning either, as he jacked his second home run of the game, a three-run blast. The 11 runs scored by Bucknell over the third and fourth innings built the Bison an insurmountable 11-2 lead.

A last gasp rally by Bloomsburg wasn't nearly enough, as Eric Junge '99 picked up the 18-6 victory.

Bucknell then traveled to Massachusetts looking to take at least three of four games from the lowly Crusaders, but the Bison received a surprise in Worcester. The Crusaders swept the first doubleheader, which was postponed until Sunday due to inclement weather. Mike Anders '98 started the first game and gave a clutch performance, going the distance while giving up only four hits and striking out five.

However, Anders' performance was all for naught as he received only four hits from the Bison bats in a gutwrenching 1-0 loss.

Things didn't get better in the nightcap, as Holy Cross bombed starter Sean Huss '99 and then reliever Matt Potalivo '00 for six runs apiece over the first four innings. The Bucknell offense got going in the top of the third inning, scoring on RBI triples by MacNeely and Mike McCarthy '99.

Inclan sent one into the seats to complete the scoring for that frame, leaving the score at 10-4. The Bison pushed across two more in the next inning, but that was all that they could manage, as the Crusaders held on for a 12-6 win.

"Mike threw as well as he had all year on Sunday. We had a lot of scoring opportunities, but we didn't put the ball in play when we needed to, leaving runners on base and striking out 11 times," Coach Gene Depew commented. "Overall, we just didn't get the job done when we needed to get it done."

Bucknell shook out of its funk on Monday, sweeping both halves of the make-up doubleheader 7-2 and 6-5. Junior starter Mike Tomko's pitching was sharp in the first game, as he held the Crusaders to only two hits and two runs in a complete game effort. Inclan remained dangerous at the plate, going 2-3 with a home run, a stolen base, and three RBI's. In addition, shortstop Joe D'Orazio '98 hammered out four hits in the 7-2 victory.

The Bison closed with a 6-5 win in the nightcap to escape with a .500 record in the weekend series against the Crusaders. Starter Doug Hoffman '97 was banged around for two runs in the first, but settled down and let the Bison give him a lead with a six-run third inning Hoffman let up another run in the fifth, and was then relieved by Junge.

Junge got out of the inning allowing two unearned runs and then shut down the Crusaders the rest of the way. Six different players each drove in a run for the Bison as they squeezed out a 6-5 victory.

Bucknell must go into this weekend's series at Navy prepared to do what it takes to insure a playoff spot. Though the Bison hold the tie-breaker against Lehigh, Bucknell needs to provide as much of a cushion as possible, and still has a chance of finishing in second place.

"We have to get ourselves mentally ready and make sure that we understand the importance of these games ahead of us," Inclan said.

Crew earns strong finishes at Philadelphia's Murphy Cup

by Amy Dietterich and Philip Schmehl
Bucknellian Team Correspondents

As the sun rose this past Saturday, the crew team boarded the aerodynamic yet roomy Bucknell bus en route to Philadelphia, PA and the annual Murphy Cup. With hopes that the weather would be nicer than the previous week's frost bitten scrimmage at Lake Findley, NY hosted by Mercyhurst, the team fended off the three hour bus ride and managed to gear up for the day's challenges.

The novice women's four sported the most impressive victory of the day. Composed of Erica Matthews '00, Kelly Wanger '00, Katie Measley '00 and Caroline Murphy '00, they took the only gold medal of the day by winning their five boat final.

Matched up against traditionally stronger Philadelphia-based crews Temple and Drexel, the women's novice four, along with coxswain Jen Ciotta '00, crossed the finish line three seconds ahead of their closest competitor, Drexel.

The varsity women's four also flexed their muscles by placing second to a very strong Rochester boat. The women outplaced tradtionally strong Temple and New York University by more than nine seconds.

The women's varsity eight, although rowing hard throughout the 2000 meter piece, claimed fourth place.

The novice women's eight also performed well this past Saturday. By placing third in their qualifying race and beating some talented women's crews, they moved on to the final heat.

The final heat, however, proved to be extremely competitive, and the boat was taken hostage by the mutated fish of the Schuykill River and came in last.

The rowers overcame this disaster and are looking forward to rowing on much cleaner waters.

On the men's side, the lightweight eight, after having the qualifying heat cancelled, proceeded directly to the final where they came in a strong fourth, beating crews from the University of Pittsburgh and La Salle.

The novice men's eight, after making a rather auspicious start in the qualifying heat, faltered and lost to the eventual winner by 19 seconds.

The men's novice four took second in their final, losing by a slim five seconds to a strong Temple crew.

The men's varsity four, in constant rivalry (with what should be a stronger) Temple boat, lost by 1.9 seconds in the third event of the day.

Water polo takes bronze

by Amanda Woll
Bucknellian Team Correspondent

The women's water polo team finished third at the Mid-Atlantic Championships this past weekend.

In their first game on Saturday morning the Bison defeated Villanova in double overtime. At the end of the regular game, the score was tied 15-15. The first overtime consisted of two three-minute quarters.

The Bison nearly won the game, but Villanova scored with two seconds left on the clock to tie the score 16-16. The game went into double overtime, sudden death, in which captain Kim Tierney '97 lobbed the ball, from the whole set position, over the goalie's head to win the game, 17-16.

Goalie Kristin D'Agustino '00 played a strong game in goal and helped Bucknell record a win. Tough hole defense by Sharon Gashlin '97 helped to shut down the Wildcat's offense.

Tierney '97 had 10 goals, the highest any Bucknell player has scored in a game this season. Sharon Gashlin '97, Mary Anne Kurucz '97, and Amanda Woll '97 each contributed two goals while Dana Cull '99 added one in the victory. Saturday evening, the Bucknell women played Slippery Rock and lost in a tough game. After a long and exhausting win over Villanova, the Bucknell women were fatigued.

As a conclusion to the weekend, the Bison defeated Princeton, 9-8, to take third place at Mid-Atlantic Championships.

Tierney again led the team, this time with six goals. Rachel Herring '98, Kurucz and Woll each contributed. The team played strong defense throughout the entire game. Despite Princeton's speed, it was Bucknell's skill and determination that ultimately won the game.

As a result of their outstanding performance throughout the weekend, Tierney received first team All-Tournament Honors and Gashlin received second team All-Tournament Honors.

After six months, new graduates are often waiting for their first job.

Our Co-op MBA's are waiting for their first paycheck.

Getting your first job isn't easy, unless you're part of Northeastern's Co-op MBA Program. After six months of study, you'll work another six months in a paid professional-level position. A final nine months of school completes your degree. At the end of the program, you'll have built a solid resume and gained the valuable contacts and experience necessary to launch your career. To find out how you can have a great job in six months, call us at (617) 373-5960 or visit our web site at www.cba.neu.edu/gsba. But, don't wait too long, the next class starts in June.

Advice for all the armchair athletes: give the kids a break

"Tiger Woods is cocky. Allen Iverson is a punk. Shaq will never lead that team to a title." So it goes. With the recent rash of youngsters excelling in sports, there has been a recent rash in criticism of these youngsters. I have two words for all those people criticizing from their armchairs. Shut up.

Actually, for the large part I'm as guilty as anyone in regards to criticizing young players, but with every criticism comes the realization that these guys are no older than me, and how would I handle the constant media attention, stardom and money? Particularly when most of these young people, particularly in basketball, come from a disadvantaged background where they never had that upper-middle background where they had a chance to learn how to handle money, greedy agents, etc.

"Iverson is a punk." Allen Iverson never had a chance in basketball. As soon as he started hanging out with his friends, notice I didn't say his "gang," people have been criticizing him. When he braided his hair people said he was a "just another ghetto punk." What Allen Iverson is a 20-year-old kid figuring it out amidst a sea of Michael Jordans and Grant Hills. This is not an easy assignment. Do I agree with everything Iverson has done? Certainly not, but it is not like Dennis Rodman dressing up like a glittered Miss USA to get attention, it's just a kid having a good time. Given, on the floor Iverson has made more mistakes than the Jets on draft day, but he's also electrified a team and city desperate to forget the Barkley trade and Shawn "I weigh as much as Mugsey Bogues" Bradley. And attacking a guy for hanging out with his friends. I know that if I moved to a big city with as much pressure as is being thrust on Iverson, I'd certainly want my friends around too. And to say he's a punk because he braided his hair, that is shortsighted and stereotypical.

Commentary

E.J. Crawford
E.J. Crawford
Sports Co-Editor

"Shaq doesn't care about basketball, I don't think he's that good." Shaquille O' Neal is a major force. A major force. Do I think he's got that killer instinct and team leadership? No. Is he only 25 years-old? Yes. Hakeem Olajuwon is supposed to be the best and the archetypical NBA center. The leader with a heart of gold. Well, Akeem Olajuwon was, only five years ago and older than Shaq, considered to be selfish and a trouble-maker, and was nearly traded by the Rockets. Now he's one of the best all-time centers. Shaq works and plays a lot harder than most people think, and should have been a serious contender for the MVP at least twice In my opinion, should already have one MVP as well as at least one All-Star game MVP. Unfortunately, people won't vote for him because of the stereotype that's been perpetuated. Shaq may have a big back with which to carry a load, but it's not big enough to carry the complaints of a million bored and disgruntled sportswriters.

"Tiger Woods is cocky." Finally, one of the most troubling aspects of these criticisms is the Tiger Woods backlash. While most of the world has gladly welcomed the Boy Wonder, there is a million tabloids and sceptics saying that he dumped his girlfriend, didn't attend a dinner or donate both kidneys to child in Bosnia. Give the kid a break, because he's just that—a kid. Tiger Woods is a 21-year-old with a tremendous gift, but he's still 21.

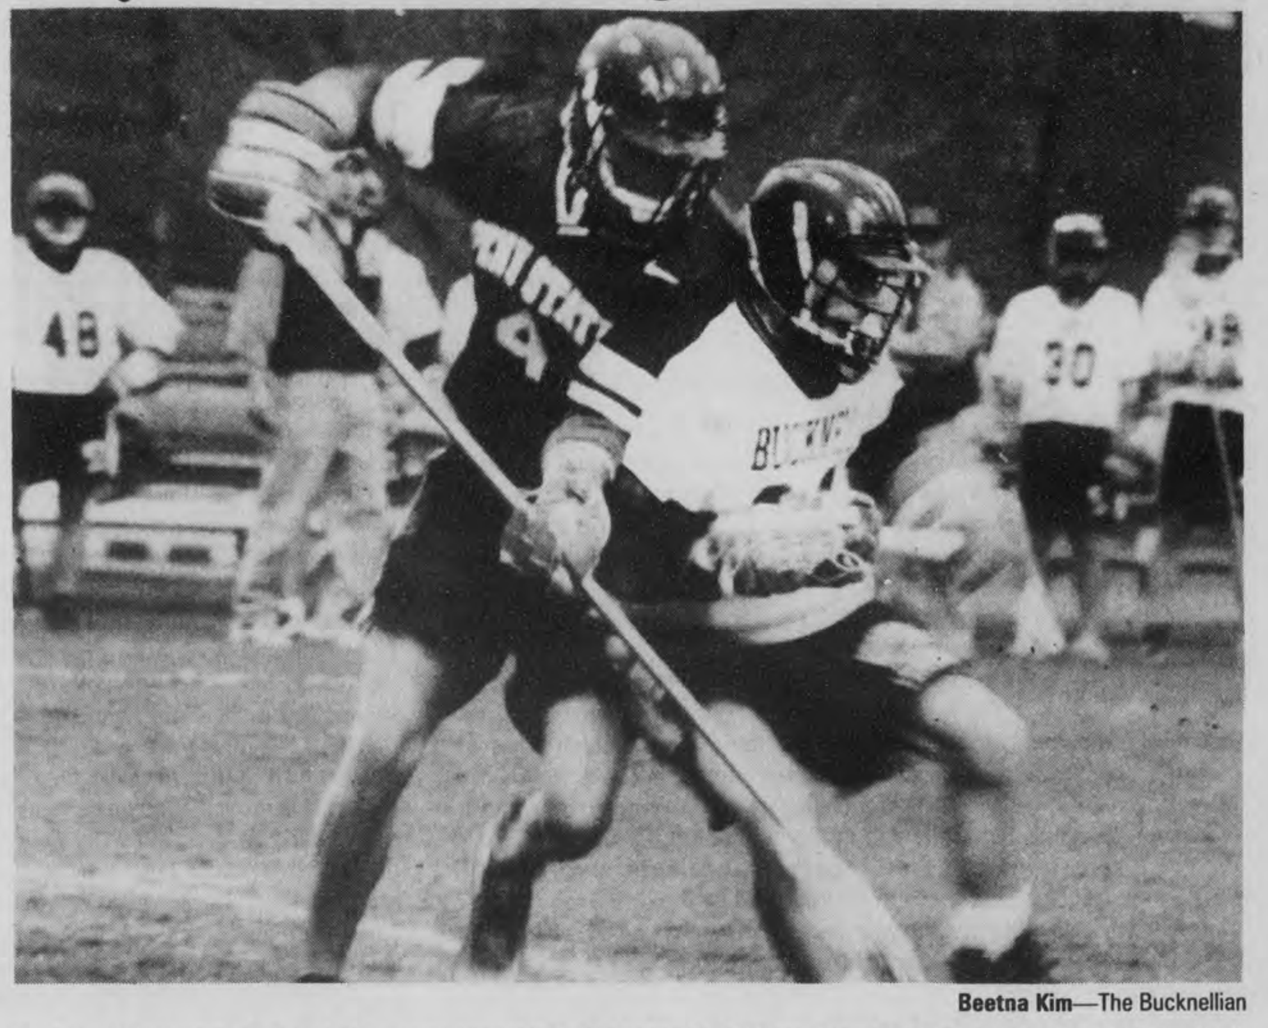
On that note, finishing off with a digression, I really want to applaud Jack Nicklaus for the grace and sportsmanship with which he has handled the Tiger Woods media blitz. When asked about Woods' record at Augusta, Nicklaus never applauded himself, but said that Tiger accomplished his feat on a much more difficult course than the one Nicklaus played, and declared that Woods would win 10 green jackets. In a day when most athletes, even golfers, just say that Woods is a great player, or that he's "good for the game," the greatest golfer that ever lived is saying that Woods is even better than himself, and saying it without a hint of pretense. That's class.

Before I finish my last column as sports editor of the *Bucknellian*, I'd be remiss to question the Jets' draft. How can you hold the number one draft pick and end up with James Farrior and a bunch of no-names. Linebackers are the only thing the Jets have, so they draft another! And to make it worse, the Celtics only won one game in their division and the Mets just lost a series to the hapless Cubs. I might be one of the first fan to sweep last place. I think I'm going to become a jai-alai fan, then I can just switch allegiances to the winning teams. It could be worse, one of my teams could have paid an average quarterback 25 million dollars—oh well, maybe next century.

At least I can count on Michael Irvin, Mike Tyson, and Dennis Rodamn to do dumb stuff that I can make fun of.

Lacrosse finally breaks out against Lafayette

by E.J. Crawford
Bucknellian Staff Writer



Beetna Kim—The Bucknellian

Jim Egan '00 scored the first goal of the game against Colgate, but the Red Raiders rebounded to trounce Bucknell 19-6. Bucknell defeated Lafayette 10-5 last night, but faces national No. 2 Virginia this week.

The Bucknell men's lacrosse team, behind sophomore John Golaszewski's five goals, broke a six-game losing streak yesterday with a 10-5 comeback victory against league foe Lafayette.

Captain Luke David '97 called the victory a "big relief. We've been working so hard all season it was nice to see the results."

However, the Bison did not fare as well earlier in the week, dropping a 19-6 decision to Colgate. After the week's play, the Bison stand at 3-9 overall, and finished 2-3 in Patriot League play.

It appeared as if the men were on their way to a seventh straight loss after mustering only one goal in the first half, as well as missing star attackmen Ed Joffe '99 and Michael Kennedy '99, both out with injuries.

Bucknell finished the half down 3-1.

The Bison stepped it up in the second half, outscoring the Leopards 5-1 in the third quarter to take control of the game. The squad then added four more goals in the final quarter to defeat Lafayette 10-5.

"We settled down in the second half and finally just said enough, we're not going to let these guys beat us," David said.

"Everyone on this team had to step it up with [Joffe and Kennedy] injured," Golaszewski added.

Golaszewski's five goals were a career high, and he has been the Bison's major offensive contributor since being moved from attack to midfield. He leads the Bison in scoring the last three games, and is now second on the team behind Joffe with 14 goals.

"I feel a little more comfortable [at attack]," Golaszewski said, adding that "it's just a matter of getting more opportunities."

Midfielder Mark DelGrego '98 had two goals and two assists, while Alex Gibson '00 had a goal and two assists in the Bison win.

Paul Bruccoleri '98 had 12 saves for the Bison, and Mark Stirpe '98 added two as the Bison moved into fourth place in the league.

The team did not fare as well against the Colgate Red Raiders, as Colgate used a 7-0 third quarter to blow the game open, coasting to a 19-6 victory and avenging last year's 11-3 loss.

Midfielder Jim Egan '00 gave the Bison their only lead of the game with a goal only two minutes into the game, but Colgate responded with four consecutive goals, three of which came within a 30-second span.

The Bison then seemed to come alive in the second quarter with two of the first three goals, but then the Red Raiders went on a 9-0 run to put the game away.

DelGrego led the team with two goals and one assist and Golaszewski added two goals for the Bison.

Bruccoleri and Stirpe split the time in the cage, as Bruccoleri collected eight saves and Stirpe three.

The Bison finish their season Saturday with a game against consecutive two-time NCAA tournament runner-up Virginia, who is hungry fresh off their ACC tournament victory.

Virginia is the second ranked team in the country.

Men's tennis gears for Patriot League Championships

by Jared Silliker
Bucknellian Staff Writer

Amy Lynch—The Bucknellian

Josh Plumb '97 recorded a 2-1 singles record this week as the Bison finished their regular season 13-6.

With five of the six regular singles players in double digit wins for the season, the Bucknell men's tennis team finished the regular season with a 13-6 mark, and will be seeded fourth at this weekend's Patriot League Tournament at Colgate.

The 13 wins is one behind last year's total, which could have been equalled had the league match at Lafayette been completed.

The Bison are seeded behind Army, Navy and Colgate, respectively, in the tournament, and will play No. 5 seed Lehigh on Saturday.

Last week Bucknell snapped a six-match drought, beating Lehigh for the first time since 1991. Should Bucknell down Lehigh once again, they would face Army in the semifinals.

No. 6 player Sean Galligan '98 led the team in singles wins with 14, while Steve Bomberger '99 (11 wins), Adam Epstein '99 (11), Josh Plumb '97 (10), and Justin Quandt '00 (10) rounded out the double-digit win club. The only regular singles player left out was No. 1 player T.K. Kelly '00 who missed five matches and finished the season at 7-7.

Galligan, along with Drew Thimme '97, compose No. 3 doubles team, which led the entire team in wins, going 15-4 on the season.

In its final week the men's team tallied wins against both Franklin and Marshall and LaSalle, while falling to Navy. Franklin and Marshall's 10-game win streak was broken in the Bison's 5-2 win Monday.

Most notably, Quandt played in his team-high 10th three-set match, losing to Franklin and Marshall's Andy Taleghanug, 6-7 (3), 7-5, 7-6 (7). Quandt has been victorious in six of his 10 three-set matches.

"Justin has really been the king of three setters, and battled through another long and tough match Monday," Head Coach Bob Hammerlee said.

Bomberger also went three sets against Franklin and Marshall, winning 6-1 in the third set. "Steve just turned it up a notch, and never let the guy get going in the third set," Hammerlee said.

Plumb, Epstein and Galligan all won in two sets to secure the win over Franklin and Marshall. "Josh beat a very, very good player at No. 2 in Matt Bird," Hammerlee commented on Plumb's 6-2, 7-6 (2) win.

No. 1 player T.K. Kelly lost to F&M's Sherif Abdel-Misih, 7-5, 6-2, who now holds a 60-20 career record.

The Bucknellian

Three more professors to retire

In addition to the retiring professors featured in last week's issue, three other professors have announced retirement at the close of the academic semester.

- William Holzberger, professor of English since joining the University faculty in 1969. Holzberger earned his Ph.B. (bachelor of philosophy), M.A. in philosophy, English and a Ph.D. in English, all from Northwestern University. He then taught high school English in Chicago before coming to Bucknell.
- John Murphy, professor of English at the University since 1968, having arrived from Wisconsin State at Osh Kosh. Murphy received his A.B. from Wayne State University before collecting his A.M. and Ph.D. from the University of Michigan.

Vice-president for administration Barry Maxwell '59, who recently announced his retirement from the University, will have more time to spend working the land on his 120-acre farm. Maxwell, who entered Bucknell as a freshman in 1955, has maintained his ties with the University for 42 years. Story on Page 5.

Abroad students will foot full bill

Class of 2001 will pay Bucknell tuition for all programs abroad

By Beth Martin

The University recently announced that it would charge University tuition to students studying off campus and in turn finance the cost of the program each student is participating in through these funds. The new policy will be enforced for members of the Class of 2001 who decide to study off campus.

According to an international and off-studies campus pamphlet sent to all students entering the Class of 2001, "Students receive all financial aid while off campus on an approved program, except for work study awards. Aid eligibility should remain the same as if students stayed on campus, since all students pay Bucknell's tuition for the semester(s) spent off campus. Bucknell then pays the tuition component of any non-Bucknell program, but students pay all remaining costs directly to the program."

Barbara Rowe, director of the office of international education, said the reason for the policy change is a "financial issue" due to the "big surge" of students who have decided to go abroad in the past few years. She also said that many of the University's frame-of-reference schools charge their tuitions to students going abroad on programs outside of the school.

The University will benefit financially from the new policy, because the majority of programs that University students enroll in have a less costly tuition than Bucknell.

Dan Little, vice president of academic affairs, said, "There will be some small difference in the total tuition minus the total program fees but altogether it is a tiny part of the tuition."

He also said that, in some cases, the cost of the programs are greater than University tuition, "so that the average will be pretty close."

Little said the new policy was primarily created because "Bucknell could do a better job of monitoring the quality of the programs."

Rowe said that the University's budget is "built on enrollment. There are many variables affecting it: how many juniors will return as seniors, how many sophomores will return as juniors, how many first year students will return as sophomores, and then you subtract the number who are abroad and are not paying tuition."

Rowe also said that the University is considering putting a cap on how many students may study off campus in the spring, due to the recent popularity of study abroad programs in the spring and the subsequent tuition loss for the University. She said, "There are discussions to deal in making a balance" between the number of students studying abroad in the spring and the fall.

If the University does decide to cap the number of students studying

See TUITION, Page 2

The Bucknellian People of the Year — 1996-97

Energetic Randall takes initiative

First-year music instructor dives into campus activities

Beetna Kim—The Bucknellian

Assistant professor of music Annie Janeiro Randall is a familiar face at campus events in just her first year at the University.

By Beth Martin

You may have seen her talking with students over coffee at the Seventh Street Cafe, or cheering on the women's basketball and softball teams, or even playing basketball with other faculty members.

Though this is her first year at the University, Annie Janeiro Randall, assistant professor of music, has impressed students and faculty with her enthusiasm and involvement on campus.

When asked why she thinks she was chosen as the Person of the Year, Randall responded, "I don't know, probably because I'm around a lot."

However, she said that faculty's involvement in student life should be an individual decision for all faculty members, because it takes "every type of faculty member" to comprise a successful university.

She said that "some are really focused on the classroom, some on administration, and some on extracurricular activities, which makes up a good balance." Randall, nevertheless, seems to focus on all three elements in the balance.

She tries to assure that students both enjoy and learn in her classes. Randall said that she really enjoys her Music 100 class, because "I am able to talk about music with nonmajors and expose them to music that they probably wouldn't hear otherwise." She said that she thinks students in the class are satisfied with their experiences, as well. "I am really pleased with the quality of their work, which is a good indicator that they are learning," she said.

Randall is also involved in administrative and faculty affairs at the University. She is a member of the library committee, and attends "various faculty discussion groups that have to do with teaching and what goes on in the classroom."

She is also "trying to establish more of an interdisciplinary connection" between the music department and other University departments.

Randall said that she is working with the English, history, art and philosophy departments to include a medieval music course as part of an interdisciplinary minor.

She is also trying to foster interdisciplinary relationships between the music department and other University programs.

Perhaps Randall's greatest attribute to the University is her involvement in student activities.

Having played basketball in high school, and even competing in the Junior Olympics, Randall said she is especially "supportive of women in sports, particularly women's basketball."

In fact, last November Randall founded a faculty support group for the women's basketball team called Hoop's Group, or Friends of Bucknell women's basketball. She said "Thirty faculty members, both men and women, are actively involved [in the group] showing a lot of fan and institutional support." Randall said she attends many other University sporting events, as well.

See RANDALL, Page 4

Senior keeps wheels turning

For Toby Anderson '97, opportunities are everywhere

By Karin Davidson

The wheels of his mind are constantly turning, bringing him up to speed and carrying him way ahead.

The name is Toby Anderson '97 and he is everywhere, speaking up, but also listening very carefully.

Anderson came to the University in January 1994, after spending a year and a half in the military. "When I first got here, I was really eager to learn; I had a hunger for learning," he said.

Anderson said that the Russian Language School, an army school he attended while based in Monterey, CA, was rigid, structured and limiting in a way. However, upon leaving there he was conversational in Russian and had an appreciation for the capabilities of a liberal arts education.

When he arrived at the University, Anderson took advantage of the many opportunities while creating many of his own. He got involved in rugby, Model UN, Alpha Phi Omega, Catholic Campus Ministry and writing opinions pieces for *The Bucknellian*. The political science and Russian major became involved in Bucknell Student Government by serving on the appropriations committee, chairing the committee on internal affairs and acting as the non-Greek representative for the committee on Greek life.

At the beginning of his sophomore year, Anderson started Campus Forum, an organization that has since fizzled, but was intended to sponsor campus debates such as the one it did sponsor—a program on extracurricular activities and their relation to academic life at the University.

Campus Forum's apparent lack of success did not prevent Anderson from taking the initiative again. After losing the race for BSG president last year, the current senior pursued an item on his platform and formed the constitution review committee. Anderson said that initially he managed the project poorly, but with experiences in ROTC and Model UN he has been able to revise the constitution and prepare it for student ratification.

Cara Mickelson—The Bucknellian

Toby Anderson '97 has been involved in a plethora of campus activities since coming to Bucknell from the army in 1994.

Anderson believes that there are numerous opportunities for students at the University. The example that he used was his frequent visits with the trustees, with whom he visited for three consecutive years on trustee access day. "Anyone can go to them, talk to them and ask them questions," he said.

Anderson said he gained maturity and the desire to learn in the year and a half he was in the military before coming to Bucknell, as well as the interactions with so many different people in all of his activities in his time at the University. As an up-and-coming law school student, he has reason to want to learn as much as he can.

Anderson considers himself a planner who has been on the catch-up plan since high school. Part of his motivation comes from his feeling that he is a step behind—after switching high schools, he had to repeat a year. In addition, he spent time in the military immediately after completing high school. Even at 23, after finishing his Bucknell education in three and a half years, he considers himself still one year behind many college graduates.

However, Anderson said he has known for a long time the direction he wants his life to go. After spending the next six months in an officer basic course for field artillery and another nine months making money and possibly traveling to Russia, Anderson will enroll in law school, specializing in international law. Eventually Anderson sees himself running a business. Enjoying being in charge, he readily accepts the challenge of "ultimately being ac-

Clark resigns, plans to pursue offers

By Kathryn Ardinger

"It's been an interesting and for the most part enjoyable and certainly enlightening almost three years," said Reginald Clark, special assistant to President Adams, who will resign from his post effective June 1.

"I am leaving because I have been approached by a number of institutions since I have been here, as well as a couple of companies in the private sector," Clark said.

"Now I am in the process of considering where I am going. I have three offers of employment and I want to take the time to make a decision," Clark continued.

Clark has been at the University since August 1994. He served a "brief stint" in the admissions office as assistant director for multicultural recruitment before assuming the position of special assistant under Adams' administration. When Adams came to the University, he asked Clark to take the position.

"As special assistant, I have dealt with many of the University issues related to institutional diversity," Clark said.

He continued, saying that "almost anything that comes to the President's office that he wants to delegate to me" falls within his duties.

Clark assisted in the formation of the Task Force for Diversity and serves as a member. He has also been involved in the Strategic Planning process for the past two years. Correspondence and dealing with a number of student groups and student concerns have also been some of Clark's responsibilities as special assistant.

Before coming to the University, Clark held a similar position at the College of William and Mary in Williamsburg, Virginia. He was the assistant to the President for Campus and Community Relations at William and Mary for seven years.

"I have found it a tremendous challenge at Bucknell because it is an institution very unlike where I have come from or had a history," Clark commented.

Jonah Half—The Bucknellian

Special assistant to the President Reginald Clark has resigned after three years at the University.

"I think Bucknell is a tremendous challenge in many areas, none more challenging than the idea of diversity," Clark reiterated, adding that "I think President Adams is very committed to that. I think that Joyce Bylander, Veronica McFall and Chris Simpson are very critical to that whole process, not to mention the Board of Trustees."

While at the University, he has "gotten to know a lot of students." Clark said, "I truly believe you do not miss institutions as much as you miss people."

B.S.G. appropriates annual funds

Over 100 campus organizations considered for funding needs

By Jessica LoDato

Each spring the Bucknell Student Government (BSG) approves financial budgets from the 105 student-run organizations on campus, as well as from club sports. Depending on the nature of the group, BSG appropriations provide funding for speakers, transportation, lodging, study breaks and any other activities that support each groups' mission statement.

Funding for BSG comes straight from the student activities fee, which is $130 per student. Out of this sum, BSG is allocated $109.50. This fee then becomes BSG's revenue for each year. After appropriations are allocated, BSG maintains a reserve, which this year is about $70,000. This money serves as a safety net for BSG in order to supplement additional appropriations as well as budgets for newly recognized groups on campus.

This year 15 organizations were recognized by the vice president of operations. Guidelines are becoming increasingly strict in forming new organizations in order to prevent the overlapping of mission statements. This policy alleviates the burden of additional budgets that would be funding the same, or nearly the same, budgets.

As vice president of finance for BSG, Michelle McAllister '99 has made sure that all groups that have applied for BSG funding at least receive operating costs. This includes money for phone calls, postage and photocopying. Though funding is available for all organizations here at the University, each organization must follow strict guidelines for attaining BSG funding.

Each organization applying for funding for the '97-'98 school year must follow a process newly revised by BSG this spring. Each member of the appropriations committee is assigned to a Bucknell organization as a liaison for the budgeting process. Each group was to submit a proposed budget for next year, stating where the funding will go specifically.

The liaison is in close contact with the organizations as their group's budgets are formed, answering questions and helping with technicalities. Budgets were to be submitted to the appropriations committee for evaluation by April 14 at 8 p.m. The appropriations committee then evaluates each budget, questioning the liaisons about each group and the importance of the allocations for specific projects. The revised budgets are then approved and funding is placed in each individual group's account.

In order to access the money in an account, checks must be signed by the treasurer of the organization, the accounts manager of BSG and someone in the BSG finance office. "This process ensures that funding is allocated for the specific purpose that was previously approved by the Appropriations committee," McAllister stated.

Next fall, if organizations are unhappy with a change in their budget that the appropriations committee has made, they may appeal for reevaluation within the first three weeks of next year's fall semester. This three week policy was not strictly enforced this year, and so it led to a large amount of appeals as late as December of this year. This will hopefully be avoided next spring through the strict enforcement of the policy.

Also, if organizations feel that they need additional funding throughout the year, they may go before the appropriations committee and present a written proposal with the signatures of their advisor, treasurer and president. The committee evaluates the proposal and allocates additional funding form the reserves in its budget for valid claims. The people who decide on the validity of these appropriations are not a loosely structured group. On the contrary, the appropriations committee is a panel of 15 selected students.

Out of the 15 members, there are nine members who are selected through an interview process by graduating seniors currently on the committee. This selection is annual, and all members must reapply. Also on this committee is the chair of the fiscal affairs committee, as well as a non-voting accounts manager and an alternate who is also a non-voting member. "This selection process keeps new ideas and opinions circulating through the committee, giving each organization a fair chance at funding."

The overall tightening of the appropriations process this year will hopefully eliminate unnecessary spending for BSG. Further strict adherence to current guidelines as well as new processes such as the liaisons to each organization for budgeting help will make the appropriations process more solid and fair for each organization.

Campus Briefs

Library links up with government documents

Last week, the Bertrand Library unveiled a new government research workstation, thanks to an $8,000 grant from the Edna M. Sheary Trust.

State Representative Russ Fairchild was on hand for the ceremony to open the link, which should cut down the time it takes to research government documents.

Librarian Pat Scott guided Fairchild through the capabilities of the new workstation, which is equipped with "hot-links" to several government websites.

In an interview with the *Milton Standard/Journal*, Scott commented, "We all pay taxes, so the information belongs to us all." All government documents are required by law to be made available electronically by 2004.

Persistence pays off for Bucknell Harvest

After two years of persistence on the part of its organizers, Bucknell Harvest finally stands on firm ground. In operation since last Monday, the participants in the project transport the extra food produced by Dining Services to local shelters.

Matt Eng '97 and Bill Groover, professor of management, picked up this year where previous organizers left off. Because Eng is a senior and they were having problems getting the project approved, they turned to BSG.

Keith Scarfo '00, a member of BSG's Social Services committee, thought the idea was a good one, and decided to join forces with Eng and Groover. "It just sounded like a great cause," Scarfo said.

Their efforts finally paid off. The University Council approved the project, and since then there have been three food drives each week.

Now the Bucknell Harvest chair, Scarfo plans to oversee the project until he's a senior. Haven Ministries is now the only shelter to receive Bucknell Harvest's services, but Scarfo is planning to expand next semester. He also hopes to recruit more drivers so that the same people do not have to transport the food every week.

Public Safety Log

April 22, 1997

INFORMATION—A University employee reported to a Public Safety Officer having found six rugs, similar to property missing from Leiser House and Larison Hall, in the basement of Sigma Alpha Mu Fraternity. The incident is under investigation.

RECOVERED PROPERTY—A University student reported to a Public Safety Officer that a wallet was missing from a Davis Gym locker room, but the wallet and its contents were later located.

INFORMATION/POSSIBLE ACT 64 VIOLATION—A University student reported to a Public Safety Officer having smelled the odor of marijuana at Sigma Alpha Mu Fraternity. Upon investigation, the incident was determined to be unfounded.

April 23, 1997

VANDALISM/CRIMINAL MISCHIEF/BROKEN WINDSHIELD(S)—A University student reported to a Public Safety Officer that the windshields of two vehicles parked in Vedder Circle were broken. Another University student admitted to throwing water balloons from a Vedder Hall window. University citations were issued and charges from Lewisburg Police Department are pending.

INFORMATION—A University employee reported to a Public Safety Officer that a lamp post in upper Harris parking area had apparently been damaged by a motor vehicle. The incident is under investigation.

INFORMATION—A University student reported to a Public Safety Officer having used a fire extinguisher to extinguish paper that was smoldering in a cigarette receptacle in Smith Hall.

April 25, 1997

INFORMATION—A University student reported to a Public Safety Officer that someone spit into the window of Calvin and Hobbes house. A search of the area did not produce any suspects that could be positively identified as the actors. The incident is under investigation.

INFORMATION—A University employee reported to a Public Safety Office that unauthorized entry had been made into a Roberts Hall office. Nothing appeared to be missing from the room. The incident is under investigation.

UNDERAGE CONSUMPTION—While on routine patrol, a Public Safety Officer observed an underage individual consuming alcohol outside of the designated drinking area. A citation was issued.

April 26, 1997

INFORMATION—A Public Safety Officer responded to Phi Kappa Psi Fraternity for the report of a University student being harassed. East Buffalo Township Police were notified and conducted the investigation. Charges are pending.

DISORDERLY CONDUCT/UNDERAGE CONSUMPTION—While on routine patrol in the area of the Langone Center, a Public Safety Officer observed an individual carrying a fire extinguisher. East Buffalo Township Police responded and citations were issued for disorderly conduct and underaged drinking.

INFORMATION/MISSING PROPERTY—A University student reported to a Public Safety Officer that a stereo speaker was missing from a Vedder Hall room. The investigation is continuing.

INFORMATION—A University employee reported to a Public Safety Officer that a vehicle was damaged, while parked on Vaughn Lit Road. The incident is under investigation.

INFORMATION/ALLEGED HARASSMENT—A University student reported to a Public Safety Officer that unknown person(s) had removed property from a room door in Sigma Alpha Mu Fraternity. The victim perceived the action as harassment. The incident is under investigation.

INFORMATION/MINOR VANDALISM—While on routine patrol, University student security observed that the sign from Roberts Hall had been removed from the ground. The incident is under investigation.

LARCENY—A University student reported to a Public Safety Officer that a bookbag had been taken from Rooke Chemistry Building. East Buffalo Township Police were notified and the incident is under investigation.

VANDALISM—A University employee reported to a Public Safety Officer that eggs were thrown on the seat of a vehicle parked on Vaughn Lit Road. East Buffalo Township Police were notified and the incident is under investigation.

TAMPERING WITH FIRE EQUIPMENT/PULL STATION—A Public Safety Officer responded to Kappa Delta Rho Fraternity for a fire alarm activation. Unknown person(s) had activated a pull station. The area was searched with negative results and the incident is under investigation.

VANDALISM—A University employee reported to a Public Safety Officer that an unknown person had thrown a beer can through a plate glass window at the Library. East Buffalo Township Police responded and the incident is under investigation.

VANDALISM/TAMPERING WITH FIRE EQUIPMENT—A Public Safety Officer responded to a fire alarm activation at Chi Phi Fraternity. Unknown person(s) had activated a pull station and the incident is under investigation.

April 27, 1997

INFORMATION—A Public Safety Officer responded to Vedder Hall for the report of a fight. One student was transported to Evangelical Hospital Emergency Room for treatment of minor injuries.

UNIVERSITY PROPERTY DAMAGE—A Public Safety Officer responded to Trax Hall for the report of a broken window. A search of the area met with negative results and the incident is under investigation.

UNDERAGE CONSUMPTION/DISORDERLY CONDUCT/MEDICAL TRANSPORT—A Public Safety Officer responded to Delta Upsilon Fraternity for an injured juvenile. The youth was transported by ambulance to Evangelical Hospital Emergency Room for treatment. Public Safety is assisting East Buffalo Township Police with the investigation.

UNDERAGE DRINKING/POSSESSION—While in Vedder Hall on an incident, a Public Safety Officer observed two University students carrying two cases of beer in the hallway. A citation was issued to each student, and the beer was confiscated.

DISORDERLY CONDUCT/UNDERAGE CONSUMPTION—A Public Safety Officer responded to the Walker Street. foot bridge for the report of a male urinating in public. One University student and three visitors were in the group, all of whom were uncooperative. Citations were issued by Public Safety and Lewisburg Police Department.

INFORMATION/TRASH CAN FIRE—While on routine patrol, Public Safety Officers discovered a fire in a trash can at the rear of Vedder Hall. Officers extinguished the blaze and the incident is under investigation.

INFORMATION—Public Safety responded to Vedder Hall for the report of a fight. Upon investigation, the officers determined that no serious altercation had taken place.

LARCENY/THEFT BY UNLAWFUL TAKING—A University student reported to Public Safety that an unknown individual entered a Swartz Hall room, allegedly through the window, and took money from the student's wallet. East Buffalo Township Police were notified and the incident is under investigation.

CRIMINAL MISCHIEF—A University student reported that a vehicle parked in Gateway Lot had been scratched by unknown person(s). The incident is under investigation.

UNIVERSITY PROPERTY DAMAGE—A University student reported to Public Safety that a window in Swartz Hall had been damaged. The incident is under investigation.

April 28, 1997

INFORMATION—Public Safety responded to Lambda Chi Alpha Fraternity for a fire alarm activation caused by a private contractor relocating a pull station. The matter was referred to University authorities.

INFORMATION—A University student reported to Public Safety that a tire was damaged while the vehicle was parked in Gateway lot. Lewisburg Police Department responded, and the incident is under investigation.

MOTOR VEHICLE ACCIDENT—A University employee reported to Public Safety that a University student operating a University van had scraped the vehicle against another car.

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are in-

Changes to affect study abroad students

TUITION, From Page 1

abroad in the spring it will not affect students studying off campus in the upcoming academic year.

She said, "It's all very iffy. If it does happen it will be after discussions in the fall. The faculty may reject it and come up with different solutions" to the University's impending financial losses when many students study off campus.

Rowe attributed the increasing number of students studying abroad to many factors.

She said, "Students are getting the message that we're part of a global market. There is a more diverse faculty with more diverse experiences who are more actively encouraging students to go abroad. There is an increase in the number of University scholars who are required to go abroad, and strides in encouraging more engineering students to go abroad.

"There are new opportunities that didn't exist before; for example, there are new environmental studies programs in places like Tanzania and Madagascar. Management majors are attracted by internship opportunities. More parents are open to having their children study abroad. Returning students are encouraging others to go abroad and setting up networks for returning students."

"What a great place to put a University!"
Summer Sessions at the Jersey Shore
MONMOUTH

SESSION I *(4 or 6 weeks)*
Classes begin May 19
Classes end June 16 or 30

SESSION II *(12 weeks)*
Classes begin May 19
Classes end August 11

SESSION III *(4 or 6 weeks)*
Classes begin July 2
Classes end July 30 or August 13

How's this for a plan?
Take a few classes and then head for the beach
(only a mile away.)

Talks break off in Texas separatist standoff

NEAR FORT DAVIS, Texas — Separatist Richard McLaren yesterday ceased contact with Texas officials, dashing hopes for a swift resolution to an armed standoff.

Texas Department of Public Safety spokesman Mike Cox said McLaren, the head of an armed separatist group that claims Texas is a sovereign country, stopped communicating via fax and telephone with officials a day after it appeared both sides had a tentative agreement to end the siege.

Early yesterday, CNN affiliate KPRC reported that McLaren had agreed to surrender—a report that Cox disputed. "We can't reach a settlement as long as no one is talking," Cox said.

While stressing a determination to enforce outstanding felony warrants, Cox stressed that Texas officials were seeking to avoid a violent clash. "We're not contemplating an assault. we want to resolve this peacefully," he said.

Defense grills prosecution witness as drug-using liar

DENVER — In a scathing cross-examination, Timothy McVeigh's defense attorney yesterday attacked a star prosecution witness, calling her a drug abuser and a liar trying to profit from tragedy.

Moreover, lawyer Stephen Jones blasted Lori Fortier, wife of McVeigh's former Army buddy Michael Fortier, for accepting immunity from prosecution.

He also questioned her as to whether she was telling the truth now or when she issued earlier public statements that McVeigh was innocent of the Oklahoma City bombing that killed 168 people.

Fortier's testimony was the most incriminating so far against McVeigh, who is accused of planting the bomb that destroyed the Alfred P. Murrah federal building on April 19, 1995.

His friend Terry Nichols is also accused in the crime and will be tried at a later date. Both face the death penalty if convicted.

Army rape case results in conviction

ABERDEEN PROVING GROUND, Maryland — Staff Sergeant Delmar Simpson, 32, was convicted Tuesday of raping six female trainees a total of 18 times in the most serious case yet to come out of the sex scandal that has shaken the Army and prompted investigations at installations worldwide.

He could be sentenced to life in prison at a hearing on Monday. The verdict will be reviewed by Army judges and could be appealed by Simpson.

He previously pleaded guilty to having consensual sex with 11 trainees, including five of the rape victims. Sexual relations between Army superiors and their underlings can lead to prosecution against both parties, even when the sex is consensual.

Since the scandal involving Simpson and other soldiers accused of sexual misconduct broke in November, the Army has fielded more than 1,200 sexual misconduct complaints and opened more than 300 criminal investigations at installations around the world.

JonBenet's parents finally meet with police

BOULDER, Colorado — The parents of JonBenet Ramsey had their first formal interviews with police yesterday, four months after the 6-year-old beauty queen was found slain in the family's home.

According to the district attorney's office, the meetings marked the first time John and Patricia Ramsey sat down separately to be formally questioned by police with their attorneys present, although both parents discussed the killing with police in the hours after their daughter's body was found.

Yesterday's interviews followed weeks of negotiations over the terms of the sessions. A statement released by Boulder Police Chief Tom Koby and District Attorney Alex Hunter did not say how long the interviews lasted, and district attorney's office spokeswoman Jana Petersen would not release any details.

A statement from Ramsey family lawyer Hal Haddon said the Ramseys were available from 9 a.m. to 5 p.m. and "discretion was left to the police to use that time in any way they saw fit."

World

Major, Blair jockey for last-minute votes in Britain

LONDON — With British elections less than 24 hours away, Prime Minister John Major appealed yesterday for Britons to give his long-governing Conservative Party another chance. Opposition Labour Party leader Tony Blair, meanwhile, urged voters to usher in a new government.

The Labour Party holds a record eve-of-election 20-point lead in a Gallup poll released yesterday. If Thursday's vote mirrors the polls, Blair could win by the biggest landslide since Labour ousted Winston Churchill at the end of World War II in 1945.

Attempting to shore up last-minute support among the nation's 44 million voters, Major insisted he could still win, blasted his rival and said a Labour victory would lead to "an explosive backlash of nationalism."

Blair, 43, campaigned through Labour heartlands in Scotland and northern England, where he maintained his party would not let up until polling booths close Thursday evening.

News Analysis

Holocaust educator speaks with passion

By Melissa Roverts

Holocaust rescuer, educator, author and speaker, Dr. Irene Gut OpDyke, delivered a passionate speech at 7 p.m. on Sunday at Rooke Chapel. The event was sponsored by Hillel.

OpDyke has been responsible for saving hundreds of Jews' lives during World War II as a teenager in Poland. She served as a smuggler of food, supplies and information to Jews hiding in the forest and in the Tarnopol Ghetto. In addition, she sheltered 12 Jews in the basement of a German major's villa where she was employed.

When the war was over, OpDyke found herself on Russia's "most wanted" list. She was aided in her escape from the country by some of the Jews she had hidden.

After spending some time in the United States, she became reacquainted with a man from the United Nations who had interviewed her before leaving Europe. He invited her to dinner, and they were married six weeks later.

OpDyke's work continues today, as she travels around the country telling her story everywhere she gets invited to speak. She believes that her mission is as a peacemaker and that her appearances are part of an effort to raise funds for the United Jewish Appeal, although she herself is Catholic.

OpDyke tries to impress upon the young people in her audiences the importance of stopping hate groups, and she believes that it is very important to deliver her message among the youth who inevitably will control the future. She teaches them to be strong and proclaims that, although she has received three neo-Nazi phone calls at her home, "I am not afraid."

OpDyke's courageous efforts have earned her a number of distinguished titles and awards, which include the Israeli Holocaust Commission naming her a "Righteous Gentile." In 1982 she received the Israel Medal of Honor. Her photograph is displayed in the United States at the Holocaust Memorial Museum in Washington, D.C. In 1994, Haverford College in Pennsylvania presented her with an honorary degree of "Doctor of Humane Letters" and in June of 1995 she was bestowed a "Blessing" from Pope John Paul II, a blessing which was followed by an invitation to visit the Vatican in 1996. Finally, in 1992, she published a book, *Into the Flames, the Life Story of a Righteous Gentile.*

Sunday evening she told her story, impacted with examples of tragedies which she witnessed during the war. She spoke of the implications of harboring Jews in "Jewish-free towns." She had witnessed a Polish family and a Jewish family that had been publicly hanged in the market square because of their disobedience.

OpDyke was fortunate to escape such a punishment for herself, although the German Major had learned of the hidden Jews in his basement. She has also survived personal calamity with the knowledge of the death of her father and disappearance of her mother and four sisters. Through her work in the United States, she has not only been reunited with some of the 12 Jews, and their families, which she had helped, but she has also rejoined her sisters.

Her youngest sister currently resides with her in her home in California, while the others remain in Poland.

In her inspirational speech, OpDyke stressed that people need to "learn from each other and love one another."

OpDyke's story is featured in two Academy-Award nominated films, *The Courage to Care* and the documentary *The Reporters.*

Following her speech, OpDyke greeted a line of the audience members who stayed to give her hugs and kisses, a common occurrence after she speaks. In addition, a number of people remained to participate in a ceremony in honor of Holocaust Remembrance Day, or Yom Hashoah, which was held in Rooke Meditation Chapel.

The script for this ceremony was compiled and edited in the spring of 1995 by four students including current Hillel President, Emily Schreiber '98, Karen Reiser '97 and former Hillel president Frank Dewaskin '95.

Through the course of this symbolic ceremony, six white candles were lit in remembrance of the more than six million people who died as a result of the Holocaust.

While signing copies of her book at the end of the evening, OpDyke offered a bit of inspiration of which she herself is living proof. She exclaimed, "One person can make a difference!"

Professors Holzberger, Murphy and Wheatcroft announce retirement

THE KATHERINE OAK
PLANTED IN HONOR OF
KATHERINE WHEATCROFT
ADVISER TO THE BUCKNELLIAN

Cara Mickelsen—The Bucknellian

"The Katherine Oak," donated by Jack Wheatcroft, will honor retiring adviser to *The Bucknellian* Katherine Wheatcroft.

RETIREES, From Page 1

• Katherine Wheatcroft, lecturer in English since 1969 in addition to being the advisor for *The Bucknellian*. Wheatcroft holds a B.A. from Hollins College and an M.A. from Bucknell, both in English. In addition, she worked as a writer/editor for the *Richmond Times-Dispatch* and the *Long Island Daily Press.*

Bucknellian staff reloads for fall

As another year at *The Bucknellian* wraps up, the staff looks ahead to next year.

In the biggest shift, Katherine Wheatcroft steps down from her post of adviser, and will now be replaced by Jim Lee.

Kathryn Wrightson '98 will return from a semester abroad in Italy to take over as the Editor-in-Chief for the Fall semester of 1997.

Wrightson will be assisted at Managing Editor by Mitch Stewart '99, who moves from Science and Technology.

Replacing Stewart at that position will be Julie Eiden '99, while Science and Technology co-editor Tracy Thiffault '00 will move on to become the assistant news editor.

The revamped news section joined by Thiffault will reunite former sports editors Brett Tomlinson '99 and E.J. Crawford '99. Tomlinson moves to News from his managing editor position, while Crawford will move over from sports.

Chris Ellis '00 remains as one of the few editors not to switch positions, and Jared Silliker '00 will join the staff as his new co-editor.

In conjunction with sports, Jacob Lipman '98 will remain on as the statistics editor for the coming semester.

At Arts and Entertainment, both Rachel Doebber '98 and Laura Vaccaro '99 will step down to be replaced by Allison Dugan '99 and Arienne Allen '99.

Junior Jeremy Flick leaves the Features section after two year of service to become the layout design editor, with co-editor Melissa Renzi '98 now taking over the full-time duties.

In the photography department, Jonah Half '00 will continue as darkroom editor, but photography editor Cara Mickelson '99 will hand over the reigns to Beetna Kim '00.

In business and advertising, Kirsten Vincentsen '98 and Nicole Collins '99 will stay on as Business and assistant Business manager, while Sarah Gillifan '99 will stay on at local ads rep. However, Deborah Jancek '99 will be replaced by Meredith Dodson '99. The new national ads rep will be Haro Gurdoglanyan '99.

BANNER system frustrates scheduling

By Anne Monoky

As University students head to the registration office this spring, they will notice the changes made in the registration process. The University has recently implemented the BANNER system in place of the former CP 6.

The registration office explained that the main goal behind the change is an attempt to provide students with a final schedule to which there would be little modification. However, many students found this change to be quite frustrating, as they were continually closed out of their required classes right at the registration window.

Lauren Mehl '00 commented that "I am a management major, and unfortunately I didn't register until the last day. When I got to the registration office, not only was every management class that I could take closed, but also every other class that I needed to fill requirements. Needless to say, I am not taking any classes that I wanted to."

John Miller, professor of management, confirmed these problems for management majors. He commented that the system is set up on a first come, first serve basis with multiple sections for classes, such as his Management 101 class. He pointed out that the popular time sections were filled immediately, and by the time that last students registered, only few options were open.

"Because these students have little flexibility with their schedules, they are being completely cut out of classes or put on a waiting list. While with the old system, we might have been able to accommodate these students, with the new system, the classes are full with the students who registered first, regardless of their class schedule," Miller noted.

Don Fox, registrar, clarified that students never used to fill out the alternative schedule forms, consequently the registration office would be swamped with students' complaints of class selection. He went on to explain that the BANNER system would eliminate such problems: "Instead of students coming back after the summer with different schedules than they originally selected, they are being informed of these changes right at the registration window," he said

Furthermore, Fox explained that now departments are able to review their class list before the academic term, both on the waiting list and the class roster.

Waiting lists also form a new addition to the registration process. Student's true intents can now be recorded with the waiting list, and class rosters are being changed every day with attempts to get the students on the waiting list into their classes.

Both management and engineering majors have felt the effects of these adjustments. Timothy Sweeney, professor of management, concluded that "in the marketing and finance classes, we are having trouble fitting those students who plan to travel abroad because they are trying to pack in their requirements in the first semester."

"Because so many students, like myself, are planning to go abroad second semester, everyone needs to take similar classes," Jessica Romm '99 complained.

"Because the first students to register get these classes, many other students are being closed out. This does not allow students to complete the necessary class requirements to travel abroad."

The registration office feels that this change has come as a great success. Fox said that "Bucknell prides itself as being a university that graduates students on time."

Despite minor faults, the registration office stresses that overall this change will benefit the University's registration process. The University will continue to improve the system, mainly through feedback and suggestions from departments and students.

Market Street construction frustrates local merchants

Since the beginning of April, workers have been repairing Market Street, the center of Lewisburg's shopping district, disrupting business and frustrating several merchants.

According to a recent report in the *Milton Standard/Journal*, the Lewisburg Business and Professional Association has petitioned the borough council to consider offering free parking in the North Third Street municipal parking lot to compensate shoppers for the inconvenience caused by construction.

The council turned down a similar request last month, but the idea is being reconsidered. The construction project is expected to be completed by late August.

Anderson, Randall named People of the Year

ANDERSON, From Page 1

countable for what goes on."

Anderson's goal is to be successful, but successful on his terms. He wants to be happy with his work, have enough money not to have to worry, and have a family. "I don't like mediocrity (according to my standards). I will always be fighting not to be mediocre," he said.

In addition, Anderson encourages students to get involved. "Take advantage of all the opportunities," he said, pointing out the large number and wide variety of important people who speak here and the numerous cultural events accessible to students. "Look and find these neat little things that are offered to you," adding, "I haven't taken advantage of half of them."

In addressing the complaint of apathy among students on campus, Anderson has his own take on the situation. "Freshmen lose their enthusiasm—at Bucknell they lose it really fast. We need to find a way to keep that enthusiasm," he said.

His suggestion is to look to the faculty for inspiration, citing its power.

"Professors can make or break our motivation and interest. Their job is to inspire; if they don't, they fail."

RANDALL, From Page 1

Randall is also a "vocal supporter in helping the Residential College system develop a larger presence on campus."

Randall plans to become even more involved with student life when she is "better able to understand where students are coming from. I'm still getting to know how students function at Bucknell. I've been listening and observing, but I'm not there yet."

When Randall is not engaged in teaching or other aspects of campus life, she does research in her field. "I am following up on a number of articles I've written for academic journals. I will have an essay in a book about German cultural studies about the role of women in musical culture during the time of Goethe in the 1780s."

She is currently collaborating on a book about the newly discovered letters of the opera composer, Giacomo Puccini.

When she has free time, Randall enjoys playing tennis at a club in Williamsport. She recently won the Women's Singles Tournament.

Randall also plays basketball every Sunday afternoon with John Waldron, visiting professor of modern language, Vincent Renstrom, visiting assistant professor of modern language, and Mark Jendrysik, visiting assistant professor of political science. She said "I try not to hurt them too much. I try to hold back."

She also likes "getting out of town to see professional music or to have an interesting meal, or just to see some human diversity." She added, "It's been hard adjusting to ethnically homogeneous Bucknell."

She continued, "Lewisburg has definitely been a culture shock. I've never lived in a place like Lewisburg before."

Before moving to Lewisburg in September, Randall taught at Mills College in Oakland, California. Prior to teaching there, she received her doctorate at the College Conservatory of Music at the University of Cincinnati, and her master's degree in composition at DePaul University of Music in Chicago.

Randall received her undergraduate education at the University of Kent in Canterbury, England, majoring in early modern European history.

Graduation speaker to receive award

By Rebecca Klingler

This year's commencement speaker, George Rupp, president of Columbia University, will be given an Award of Merit in honor of his accomplishments. The search committee decided that the Award of Merit, which is different from an honorary degree, would "add an academic flavor" to the graduation ceremony.

Mary Evelyn Tucker, professor of religion and search committee member, said that "this is ...simply done to raise up the level of academic excellence at this occasion."

When the search committee met at the beginning of last semester, it made a long list of potential speakers. After the list was prioritized, President William Adams began extending invitations.

Rupp, who Tucker said was one of the top people on the list, "responded immediately and with enthusiasm, which is good for Bucknell. He's a very distinguished individual."

The Award of Merit is to recognize and honor Rupp's dedication to all facets of academic life.

"We felt it was important to give ...him a sense that we celebrate his accomplishments," Tucker said.

"That's what we should be doing as a whole at graduation—celebrating accomplishment," she continued.

Before he became president of Columbia in July 1993, Rupp was president of Rice University for eight years. Before that, he was the John Lord O'Brian professor of divinity and dean of the Harvard Divinity School.

In addition, Rupp has written four books, received his bachelor of arts degree from Princeton, his bachelor of science degree from Yale and his doctorate from Harvard. He also received an honorary doctorate of Letters from Columbia.

Tucker credited Rupp with making major changes in the undergraduate curriculums at Rice and Columbia, as well as introducing women's studies, studies of other religions, ethical issues and many other programs of study.

"This is a person of integrity, a person who has put aside a career [at the Harvard Divinity School] for a larger common good... This is also something we want to signal for one another" at an occasion like graduation, Tucker said.

The University does not grant honorary degrees, the result of a controversial vote by the faculty in 1986. Although the faculty wanted to grant that year's speaker, E.P. Thomas, a historian who was often classified as Marxist or leftist, an honorary degree, the trustees refused their request.

As John Peeler, professor of Political Science and faculty chair, said in an email interview, no degree "may be awarded without action by both the faculty and board." Thus, because the faculty decision still stands, the University does not grant honorary degrees.

When does a date become a crime?

It happens when a man forces a woman to have sex against her will.
And even when it involves college students, it's still considered a criminal offense.
A felony. Punishable by prison.
So if you want to keep a good time from turning into a bad one, try to keep this in mind.
When does a date become a crime? When she says "No." And he refuses to listen.

Against her will is against the law.

University veteran plans to retire to a life of farming

Barry Maxwell, vice president of administration, works half the day in his office, and spends the rest on his 120 acre farm

By Heather Schweiger

Barry Maxwell, vice president of administration for the University recently announced his retirement during the summer of 1998. However, while he is leaving his job with the University, he will not be abandoinng his other interest: farming.

There isn't a "typical day" in the life of Barry Maxwell, vice president of administration, although each start early in the morning. Coming to the University in 1955 as an entering freshman, Maxwell has maintained his ties with the University for the past 42 years.

After graduating from the University in 1959, Maxwell spent two years in graduate school and then two years in the army. Following this, he returned to the University in 1963 as a faculty member in the mechanical engineering department. When the opportunity presented itself 16 years later, Maxwell then continued his contribution to Bucknell by becoming the dean of engineering. However, change was again imminent as he settled into the position of vice president of administration, which he has held for the last 11 years.

In response to his history with the University, Maxwell commented, "It's an unusual career track—in a sense that I went from faculty position to an administrative position in the educational area, and then got completely out of the educational area in coming over here to this position, which is not directly associated with engineering."

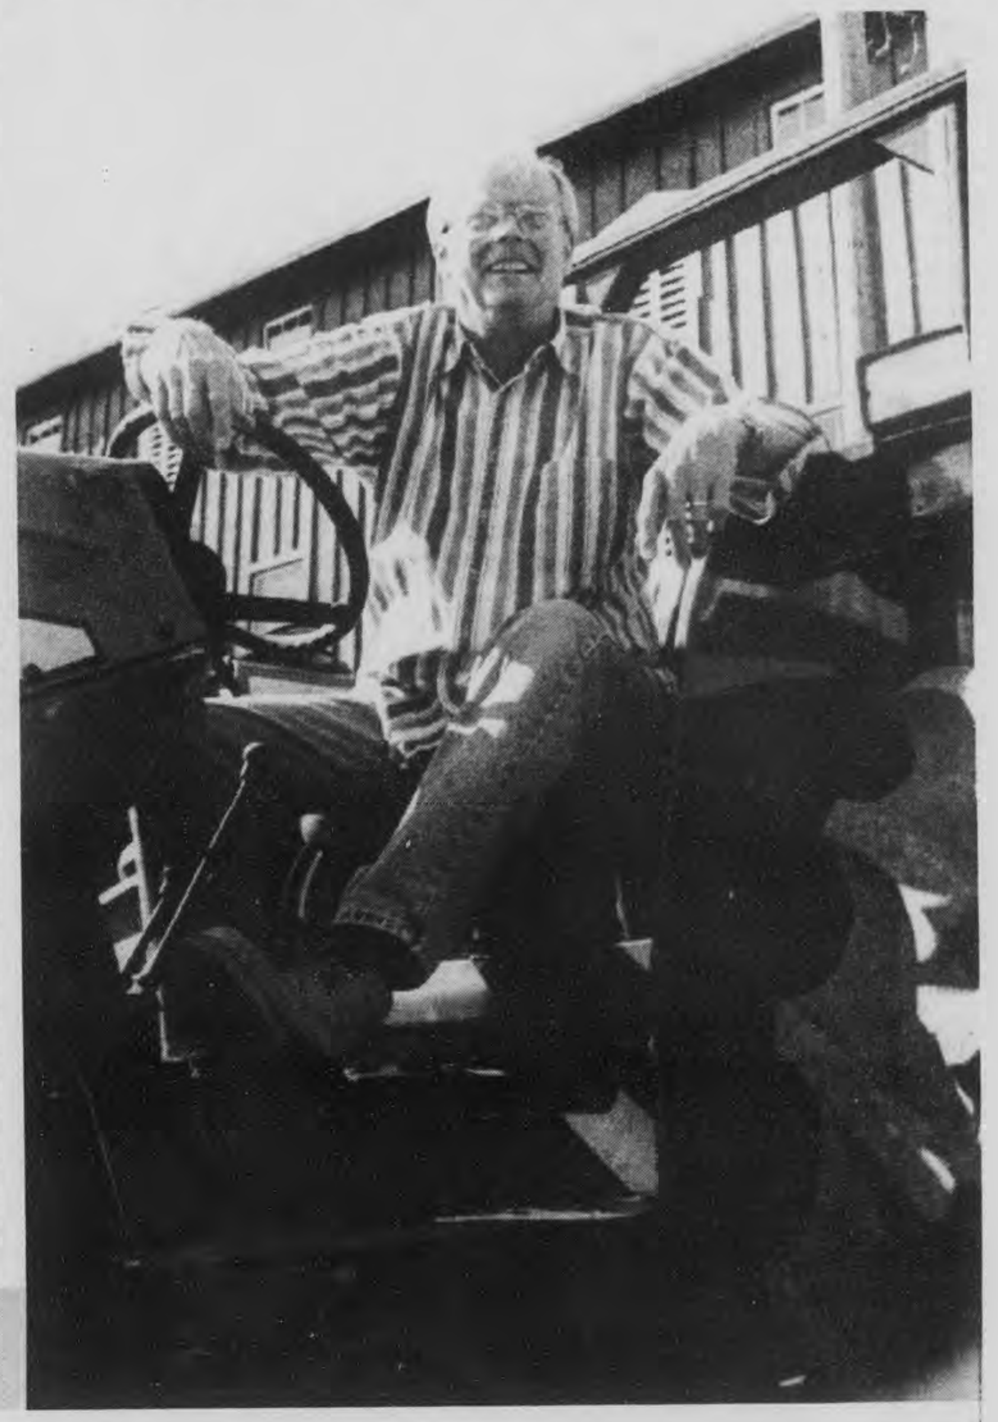
As vice president of administration, Maxwell's areas of responsibility include finance and business functions, purchasing, personnel, public safety, dining services, the bookstore, physical plant, conferences, and program and administrative services. Essentially, he's in charge of all of the non-academic and non-developmental affairs.

Days are full of meetings and planning. He works closely with the managers and directors of the various facets of the University and provides administrative oversight in helping them reach their respective goals and objectives. This administrative structure "is very similar to models and structures at other organizations, where you have a vice president that is involved in the administrative support functions."

Maxwell's days don't end when he leaves the office, however. He and his wife own two contiguous farms, totaling about 120 acres, located three miles from the University. Their "home farm" was purchased in 1963. In addition to hay, grain and other crops, they were boarding up to 15 horses, many of them belonging to University students.

Today, with their three children grown, horses can no longer be found on the farm. Instead, Maxwell raises corn, soybeans and wheat on 55 acres of land. He then rents out 30 acres of apple orchards and the 40 acres of remaining farm land.

Being both farmer and vice president of administration has presented Maxwell with experiences in two such diverse communities. "I get a lot of satisfaction, lot of enjoyment and sense of progress from farming. Whether I'm plowing or cutting grass or regardless of what I'm doing, on a tractor all you have to do is turn around and see progress. Whereas so much of what we're involved in here at the University, you can see progress, but not on an instant basis—it takes a day, a month, it may take a year."



Both photos taken by ***Jonah Half****—The Bucknellian*

Above: Barry Maxwell, vice president of administration, has moved up the ranks within the University from freshman, to faculty, to dean and finally to administration. Right: Maxwell goes home to his second job, taking care of his 120-acre farm .

Professor's photography hobby results in children's book

By Tracy Thiffault

Deep in the basement of Coleman Hall and across Route 15 near the animal cages resides Owen Floody, professor of psychology. Also an amateur photographer, Floody has recently had photographs of his various trips to Africa published in a children's book about animals.

African Animals, written by his good friend, Caroline Arnold, contains photos and descriptions of various animals native to Africa. The subjects include grassland creatures ranging from antelopes to warthogs, forest creatures such as leopards, and desert animals such as camels. Floody contributed approximately half of the photos for this 48-page book.

Floody's interest in photography began while studying at Yale University for his undergraduate degree. While in graduate school in 1971, Floody spent five months in east Africa in the countries of Uganda, Tanzania and Kenya. It was during this trip that most of the published photographs were taken.

Floody's combined interests in animal behavior, photography and travel have taken him all over the globe. He has traveled extensively in both East and North Africa and also in Europe, Costa Rica, New Zealand and parts of the United States.

Usually traveling with his wife, Floody likes to create his own itinerary when traveling. It is on his trips that most of his photographs are taken.

Floody attended graduate school at Rockefeller University in New York City with Arnold's husband. Arnold, a writer of over 100 children's books, knew of Floody's photos from Africa and asked that he contribute them to her book.

In addition to animals, Floody also enjoys photographing landscapes, weddings and other formal events. This is the first book in which a collection of his photos have been published, but he has had some photos published in various professional journals. He does not actively seek places to publish, but will work for friends or colleagues.

Originally from New Jersey, Floody has been at the University since 1974, where he met his wife, Andrea Halpern, professor of psychology. He does not have any children and considers photography "just a hobby. I don't plan on going out to look for books in which to publish," he said.

Published by Morrow Books in New York City, *African Animals* is currently being sold nationwide. "The quality of reproduction is quite good," Floody said, "Some of the photographs came out better than I expected." The pictures he took were published from slides.

In the book, text is placed over the photos. Therefore, when selecting photos for the book, Arnold couldn't always choose the best photos, but rather whose the photos with the animals in the best positions. "Some of her choices actually surprised me, but she had to consider things that I would not have thought of," Floody said.

Along with Floody, photos for the book were contributed by Arnold's husband, Art, several other friends, and herself. "I'm pleased to have the opportunity to contribute to her book," Floody said.

As a whole, Arnold likes to write about subjects related to science, especially animals. Her other books include *A Guide Dog Puppy Grows Up* and *Zebra.*

Now that the book is finished, Floody has used the money from his photos to invest in a new camera.

Owen Floody, professor of psychology, took pictures of African animals and they were recently published in the children's book *African Animals.*

BRAINTEASER

Logic Puzzles

Lewis Carroll is widely known for his books about Alice, but in practice he was an Oxford logician. The following 10 statements are attributable to him, and you are invited to deduce the unique conclusion which they all contribute to!

1 The only animals in this house are cats.
2 Every animal is suitable for a pet, that loves to gaze at the moon.
3 When I detest an animal, I avoid it.
4 No animals are carnivorous, unless they prowl at night.
5 No cat fails to kill mice.
6 No animals ever talk to me, except what are in this house.
7 Kangaroos are not suitable for pets.
8 None but carnivora kill mice.
9 I detest animals that do not talk to me.
10 Animals that prowl at night always love to gaze at the moon.

Solution

I avoid Kangaroos!

University consideration to limit off-campus study detrimental

The chance for students to study off campus is an amazing opportunity. It should be preserved at all costs.

Because it is losing money with the great number of students who are studying abroad in the spring, the University is now discussing whether or not to place a cap on the number of students who can have such an experience. In addition, instead of students paying their study abroad programs directly, starting with the class of 2001, they will be giving their normal semester's tuition to the University. The University will then pay the program, and depending on the prices, will pocket any money left over.

Even if the semester at this University or abroad are somewhat equivalent in cost, this method does not take into consideration the extra costs a student has when studying off campus, such as travels and food.

Granted, the University needs to look after itself financially. Something has to be done in order to prevent a significant loss of money. But discouraging students from going abroad or limiting the number of students who can study off campus is not the appropriate way to deal with this situation.

Spending a semester in an environment other than Bucknell can result in an large number of incredible experiences unavailable in Lewisburg. Many off campus study programs offer internships which are beneficial in getting a job upon graduating.

In most cases, students going abroad will be in areas less homogenous than this University. Learning to interact with different kinds of people is important.

Frequently there is the opportunity to learn or enhance current knowledge of a foreign language while studying abroad; an important asset the current state of global interconnectedness.

It seems as though students who spend a semester away from campus come back with new insights about themselves and those around them. It is not uncommon for students to draw on experiences at different universities and apply them to class work here.

Even the discussion of a cap on the number of students who can study off campus is a scary prospect, considering students in certain majors are required to go abroad. The students who are required, by their majors, to go abroad are the same ones most likely to go abroad after graduating. For some students, college is the only time they will have the chance to encounter another country. However, even if there are opportunities after college, it is impossible to recreate the atmosphere of a student in an off campus experience.

Don't sacrifice a student's education for money.

Staff thanks adviser

We'd like to take this opportunity to pay tribute to our adviser, Katherine Wheatcroft, who is retiring at the end of this year.

For over a decade Katherine has led *The Bucknellian* staff onward and upward. She is the first consistent adviser the paper has had, and she has had a tremendous influence.

At the same time, Katherine has allowed the paper to remain student-run. It's impossible for students to have professional newspaper experience, but Katherine has been our link to that world.

Katherine has supported, encouraged, and been there for us. Thank you, Katherine.

LETTERS TO THE EDITOR

Wrestler Mike Garcia deserves praise for his dedication and athletic accomplishments

TO THE EDITOR:

As a result of Rick Hartzell's decision to fire Bucknell University's head wrestling coach Bob Ferraro, a young man's career as a standout in wrestling has been put to rest. Unknown to loyal Bucknell alumni and those who support Bucknell's athletes is the precise reason Mike Garcia is suspended for a second year for "possible" recruiting violations. As Voltaire said "it is better to risk saving a guilty man than condemn an innocent one." Those of us who are interested in the future of Bucknell athletes must question why Mike Garcia has been denied the opportunity to wrestle for Bucknell University. Is it possible that Garcia was used as a way to a means within the athletic department? Moreover, can Rick Hartzell, Bucknell's Athletic Director, justify this punishment?

I am an alumna of Bucknell University's graduate program. It has been my experience that students involved in sports at Bucknell must work extra hard to achieve both academic and athletic success. Additionally, as all Bucknell alumni know, it is not just an educational experience. More importantly, it is about preparing individuals according to their abilities to go out in the world and contribute. A young man like Mike Garcia required skill, motivation and persistence to attain his status as an elite athlete.

While at Mt. Carmel high school, Mike Garcia made a conscientious decision to strive for excellence as a wrestler. Consequently, Garcia had to sacrifice much of his personal life to achieve this goal. Mike Garcia had a goal to be an elite athlete and his actions proved this. He focused on this one area of profound excellence with constant discipline, pushing his body to total exhaustion. Those of us who are in contact with elite wrestlers realize that this is not a sport for the weak in mind or body. Mike earned his chance to wrestle at the collegiate level by scholastic wrestling, club wrestling and as a member of the USA Cadet Wrestling team. Year-round training resulted in Garcia wrestling not only in the USA, but in countries such as Czechoslovakia and Poland.

One of the biggest challenges any young adult will go through is the environmental and emotional changes from high school to college. It has been my sad experience to observe many young, gifted college students fail to adapt. This did not occur with Mike Garcia. As Mike grew from high school to college, so did his desire! He simply held onto his unfaltering desire to be a leader in sports and learn, both indispensable to each other.

At this point one asks why individuals like Garcia push themselves so hard? In Garcia's case, it is because his new future goals after Bucknell are to educate others through his experiences. As a future Bucknell alumnus, Mike has much to offer young, interested wrestlers as well as those with limited opportunities. As an education major, Mike Garcia definitely has new goals. The years of daily training coupled with no substance abuse make Garcia a healthy role model for young high school students. Personally, I strongly feel local youth would benefit tremendously from such a role model.

As Dwight Eisenhower said, "What counts is not necessarily the size of the dog in the fight, it is the size of the fight in the dog." Keep fighting, Mike garcia. You'll achieve your ultimate goal in helping others with their skills. My plea to Bucknell athletic department is to put aside all departmental grievances and let Mike Garcia focus on his future: as a college athlete and as a contributor to our future wrestlers!

Professors express concern over periodical policy revisions

TO THE EDITOR:

In order to correct any possible misconception that might arise with respect to *The Bucknellian* interview with Mr. Little reported 24 April 1997, re: Deselection of Journals from the library, we wish to point out for the record the following matters of fact:

1. Mr. Little is quoted as saying "… one letter arrived the day after the list was sent out. The other had been in my folder for a couple of days, and I simply hadn't gotten to it." The letter described as being in Mr. Little's folder "for a couple of days" is the subject of our concern.

2. John Cooper: In fact this letter, dated March 26, which protested deselection procedures and policy and was co-signed by the chairs of Economics, Geology, Biology, Chemical Engineering, Chemistry and Physics, was hand-carried by me early Thursday morning the 27th of March to Mr. Little's office and hand delivered to his secretary, with the instructions that it was "Special Delivery."

3. Mark Neuman: I am a member of the University Library committee. At the meeting of the ULC on Friday the 4th of April Mr. Little asserted categorically that he had not received the letter of concern from the six chairs (hand-carried to Mr. Little's office eight days before, on the 27th of March). Mr. Little's statement is contained in the approved minutes of this ULC meeting.

Susquehanna Dean sets record straight

TO THE EDITOR:

I would like to clarify Ms. Beth Martin's interpretation of Susquehanna University's alcohol policy in the Feb. 27, 1997 issue.

1. "Susquehanna does not have a BYOB policy." Please see page 10, Section 6C of the 1996-7 Student Handbook which clearly states fraternities must comply with the BYOB regulations.

2. "Sororities may serve alcohol in private rooms." Nowhere does the policy state this. Individuals 21 and over may consume alcohol in their private rooms.

3. "Policy makes no reference to whether alcohol is permitted at graduation events." Please see page 10, Section 8 which states that regardless of location, no alcohol may be present at any campus event open to all students. This includes commencement.

Bucknell wronged by Ferraro firing

TO THE EDITOR:

Coming from Pa. and having a wrestling background, I have taken a strong interest in the latest developments regarding the firing of your longtime wrestling coach Bob Ferraro. No doubt, Bucknell is a fine institution and has a great reputation for its academics, as well as it's athletics. However, any institution which treats one if its finest coaches (someone who has dedicated 23 YEARS to building a very reputable program) in the manner in which it did, deserves to be ridiculed. The accusations against your coach were unsubstantial and without merit. This is clearly a pathetic attempt to begin the process of eliminating the wrestling program at Bucknell.

Maybe your institution should concentrate on hiring a more qualified Athletic Director who actually makes Bucknell athletics his first priority rather than spending most of the time down in Tobacco Road officiating ACC basketball. Then, when actually in town, tries to bring down one of the school's most successful programs. I have known many people in the wrestling community, and no one has upheld the integrity and sportsmanship of the sport more than Coach Ferraro. It's a shame what happens when the wrong people are put in power and an administration thinks with it's pockets instead of it's heart.

Twenty three years and that's what he gets? Pathetic. Bucknell should be ashamed.

Reminds me of the way NC State treated the great Jim Valvano. They realized too late they were the ones who let outside forces tarnish a University's reputation, not the coach who gave all he could to the University and his players.

OPINIONS

Final reflections on life at Bucknell

A longtime *Bucknellian* Staff Columnist comments on the benefits and failures our our University—and what it can teach us

By Allison Price

I have been writing columns for *The Bucknellian* for about three years now, and I suppose this is the mythical last dance, final column of my college career. I have spent much time contemplating what should go into this—the sum total of my Bucknell experience and the ritual of getting it all out of myself and onto paper each week. As I sit here writing this, I really don't know what exactly to say and feel that I cannot rise to the level of this issue. Maybe, I have finally realized that most of life is comprised of moments and the true test of experience is the ability not to be able to neatly tie it together in one parting shot or narrative.

I do remember that my first column was an atrocious piece of writing. It was sprawling and vastly devoid of focus, beginning with a William Greider quote and the symbolism of campaign signs. I knew what I wanted to say, and could not commit it to language. Ironically, I think for most of us this has been the essence of the Bucknell experience, starting somewhere with some notion you know is painfully cloudy yet inherently wonderful and worthwhile. The rest of the journey of sorts comes down to navigating this conflict, preserving the wonder and the beauty as you find a way to clear, or at least understand and use, the clouds that surround you.

When I came to Bucknell, everything was to be understood and changed through politics, government service and the elegant intricacies of policy. I still have not joined the bandwagon which derides the responsibilities of government which do not entail coddling the great American capitalist benefactors and will always have a soft spot for the nobility of government activism. However, somewhere along the line it all left me at Bucknell. Along with speaking out the response you always must anticipate is the wanton evil and greed in resistance. That is too much to see after a while, and as we commentate we are inevitably detached. There is always that dark side of Bucknell's casual affluence and cruelty, and if you lose who you are, there are the corresponding evils of joining in or possibly even worst, becoming indifferent.

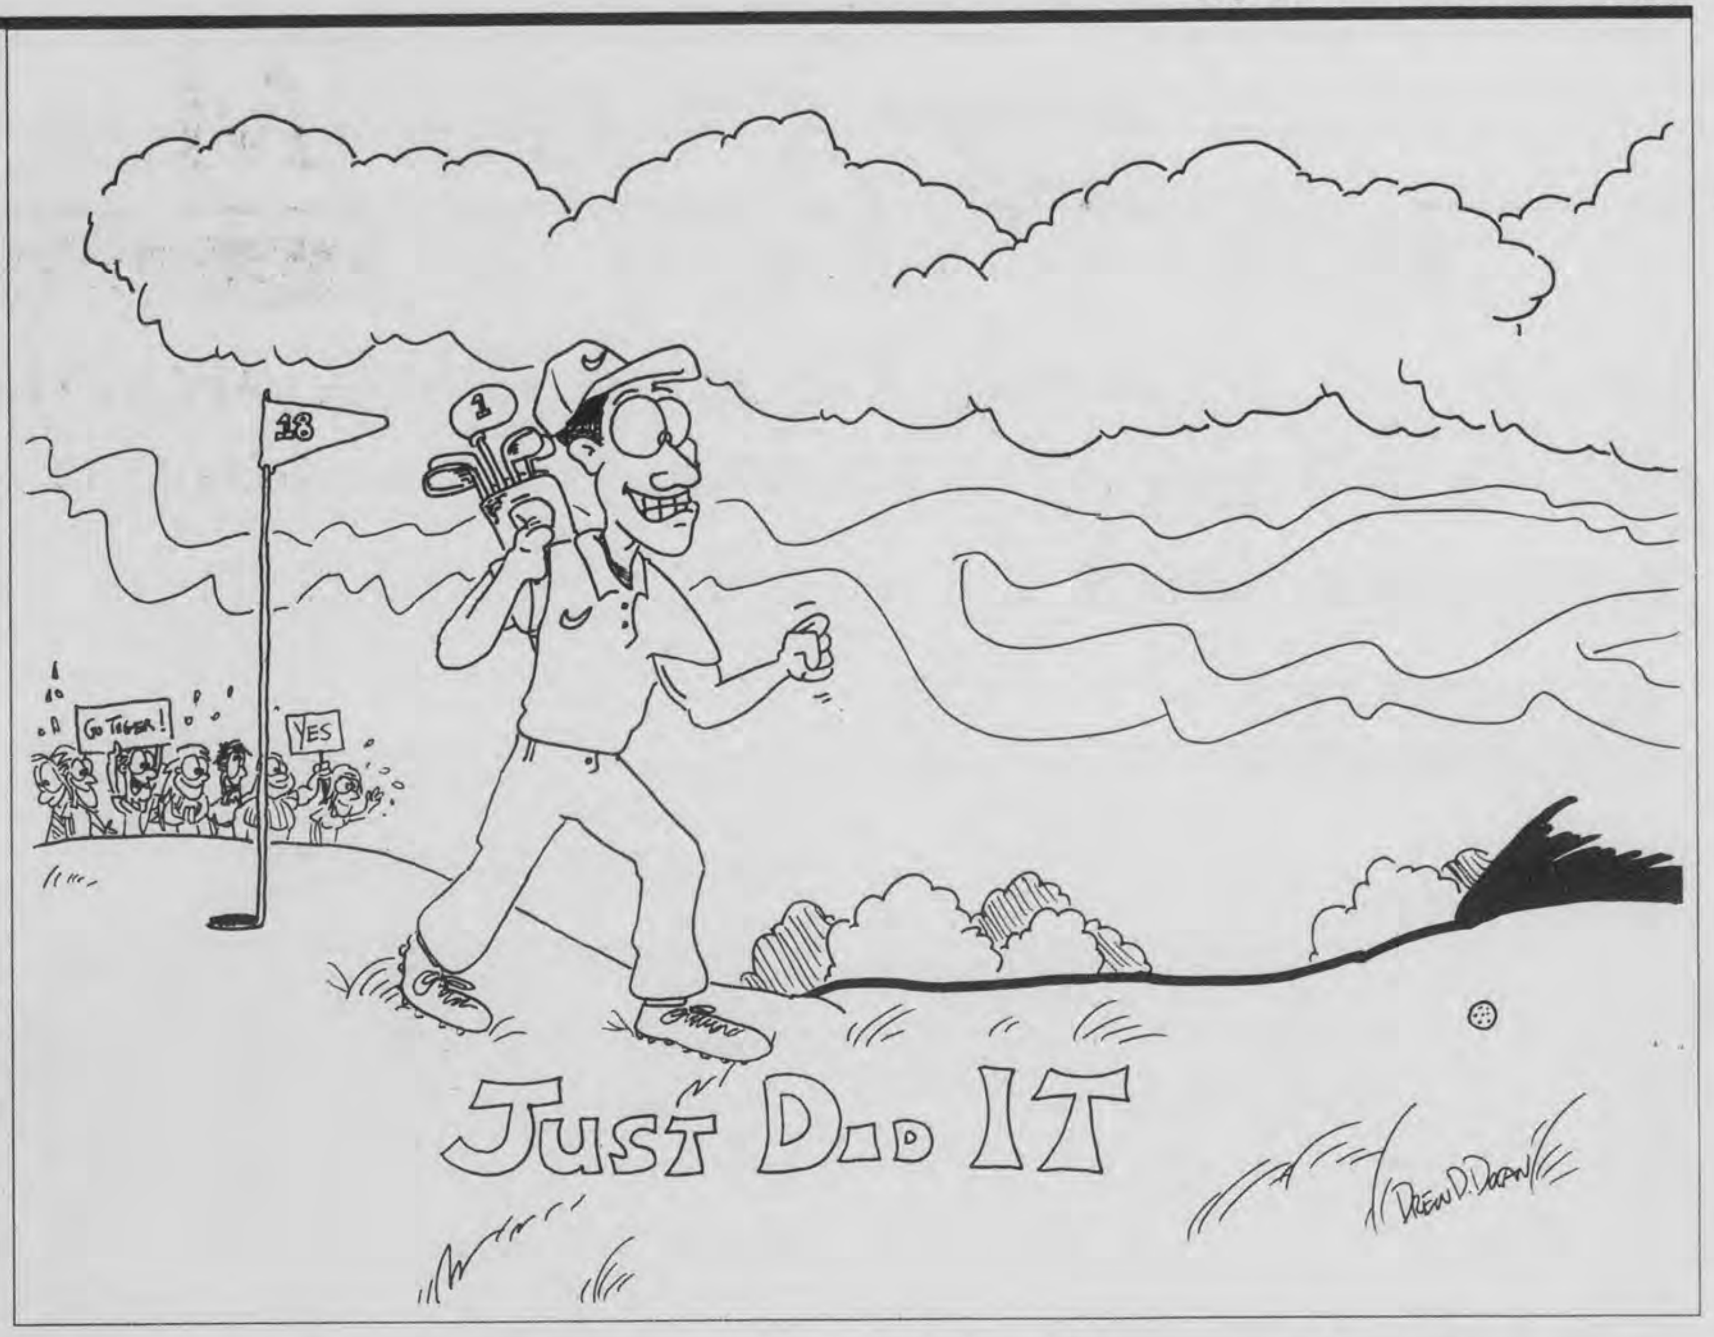
> *Bucknell has been a series of sweeping moments for all of us—indefensible hypocrisy from so many sources from student to administrative, the sheer idiocy of the Greek mentality and the stranglehold it has on our little paradise*

Bucknell has taught me that silence is the voice of complicity, and far worse than any other fate. In the end, I switched to education. Don't get me wrong, there is no moral high horse to be found in this, just the choice to get in with it all in my way. Ironically, for all the easy opportunities and issues that have been brought to my attention, I cannot write my "education column." It is just too much, and in the end not enough.

Bucknell has been a series of sweeping moments for all of us—indefensible hypocrisy from so many sources from student to administrative, the sheer idiocy of the Greek mentality and the stranglehold it has on our little piece of paradise (remember the advice of the Rush t-shirt, life's a waste of time, time's a waste of life, so get wasted all the time and enjoy life!) and the conspicuous consumption and casual compliance that I think this institution has encouraged us to embrace and strive for as our birthright. In some complicated way, all these issues end up forming a whole which in different ways brought many of us closer to the meaning of outrage while still pushing us away from truth and authenticity. Bucknell has managed to teach me what I do not want to become. It is kind of like how the song goes… "Look what they've done to my song."

In the end, I would give the advice to never write a columnist in response to something they have written. It is one of life's little lessons—it makes her or his day. I have also learned that all the outrage doesn't amount to a hill of beans when it comes down to taking time to frame an intelligent response. A friend once told me she has more conversations with me absent from the room than sitting with her—and that is wonderful. Bucknell has had its great moments, and I think you need to understand the dark to embrace and even appreciate the light. I spent House Party weekend in the company of some truly incredible people whom I have grown to love over the years, warts and halos alike, and I never would have thought this possible a couple of years ago. I have gotten some very affirming reactions to my columns, and which I could have spent this column thanking the countless people who gave me feedback and the columns a purpose beyond myself. In the end, the columnist is nothing and that is not an admission of futility.

In many ways, I really don't think I am any closer to a defined purpose than when I did that first column. We are a thousand untied ends, thoughts, notions, disappointments, outrages and joys. You know, focus is vastly overrated.



A pensive senior's advice: take the road less traveled

Although many seniors are now faced with uncertainty after graduation, don't forget your dreams

By Nicole Maestri

At the end of May, I will be graduating from Bucknell. In the fall, it will be my mother who will be the one going back to school.

For the past four years, I have been the college student. I have worked hard while I've been here and always done things pretty much by the book. I double majored (along with everyone else here), I studied abroad and got involved with campus organizations. During the summers I got internships to add to my resume.

> *My best friend asked me in the middle of my job search what my ultimate job would be, what I would love to do. Ironically, my response had nothing to do with any of the jobs that I was interviewing for or the one I took.*

In the spirit of my same old predictable way of doing things, I started interviewing for jobs in October, received my offers by January and had a job chosen by February. I already know when I'm starting, where I will be living and what I will be doing this summer.

This all sounds great, but lately I've been asking myself if it is enough or if it is important. Is it enough to always play by the rules, meet everyone else's expectations and succeed in other people's eyes? I'm beginning to think that the answer is no. This safeness, this planning, this security isn't really going to get me very far in the long-run.

As I begin to venture into the real world, my mom is turning in her briefcase for a book bag. This isn't the first time that she has gone back to school. She had her BA, worked, went back to school and got her Ph.D. when I was in the fifth grade. Since then, she has not found a job she truly enjoys or one that is really fulfilling. Doing genetic research and teaching graduate school classes, she has become frustrated with the politics that surrounds the world of academia and scientific research.

At 50, my mother has decided it's not worth working just for the sake of working. Having followed the expected path for 30 years, she realizes it isn't enough. While she had a good job, she was always working on someone else's project and someone else's grant application. Now it's time to work on her own project.

There was a story I read in *The Washington Post Magazine* over winter break that has stuck in my mind. It was about a guy who had graduated from Georgetown, Class of 1996. While all of his friends were now working, making money and using their degrees for their intended purposes, this guy decided he wanted to produce an independent film. Taking out a loan from his family and friends, he was in the middle of shooting a film on a budget of $25,000. He had never made a film before in his life.

To everyone who thought he was crazy and wondered why on earth he'd taken on such an obviously doomed project he replied that he would never regret not giving it a try. He might wind up a broke failure in other people's eyes, but to himself he would be a success because he hadn't let other people's expectations dictate his life.

I'm not suggesting that we should take our classes less seriously, quit our jobs or push our responsibilities aside. I'm proud of the fact that I did well at Bucknell and have a good job to look forward to. But what I think we can learn from my mother (I can't believe I'm saying that) and the novice film-maker from Georgetown is that you should never allow your life to become a routine, a script of someone else's expectations.

My best friend asked me in the middle of my job search what my ultimate job would be, what I would love to do. Ironically, my response had nothing to do with any of the jobs that I was interviewing for or the one I took. At 21, with nothing to lose, I was too scared to pursue that job or do the unexpected.

What would my mother would have told me? She would have told me to think about it. What would the novice filmmaker have said to me if I told him my ultimate dream job? He would have told me to go for it. I know that eventually I will go for that ultimate job. Whether it will be the same one it was before or whether it will change as I grow up, I know that I can't always follow my predictable path or the expectations of others. While I know the outcome of doing what's expected, how will I ever know what I could have been if I don't do the unexpected?

Bucknellians must remember the good times and the bad, the joys and the tragedies, to truly appreciate their school

"Hooray Bucknell!": The experience was well worth the future memories

Students must remember the good times and the bad, the joys and the tragedies, to truly appreciate Bucknell

By Brian Walsh

As the school year slowly comes to an end, many Bucknellians begin to prepare for final exams and upcoming summer jobs. For the senior class however, while the above is true to some extent, memories of the past four years and a wonderment about what the future may hold seem to have taken a stronger grasp on our minds. As many put the final touches on their senior design projects or honors theses, one cannot help but reflect on our years here at Bucknell, and the changes we have both seen and undergone ourselves. Although the oft-used term "it has gone by so fast" may have seemed cliche six months ago, the fact is, it really has.

Many of us can remember our first day of orientation freshman year, the people we met and the feeling that we were finally on our own for the first time in our lives. The long wait that was the summer before freshman year was finally over and here we were at Bucknell ready to begin what everyone had told us would be the best years of our lives. Four years, it seemed like an eternity at the time, but only in the best possible sense. The confusion over what clubs or organizations to join and the uneasiness of living for the next year with a complete stranger were perhaps our initial impressions of this oasis in the middle of Pennsylvania farm country. Somewhere there was this mythical place called Fraternity Row and the night before our first college class we spent time with our new friends and hallmates poring over campus maps to ensure that we ended up in Coleman rather than Carnegie.

As the months passed by though, we began to look at Bucknell not as a foreign land that we were simply visitors in, but rather, as our home away from home. Each year provided new challenges and decisions before us, but each August the comforting anticipation of seeing our friends and returning to our beautiful campus was there before us. The first week back would find people who had not spoken in months arm in arm at the Bison sharing summer stories and talking about how this year would be the best one yet. Rather than wondering if we were in the right class or not we would spend the first day seeing what friends were in the same class with us.

> *As the days until graduation begin to approach the single digits, all of us cannot help but feel how lucky we are to have spent the past several years here at Bucknell.*

Granted, life was not always perfect, there were always the very high and very low points of each semester. Unlike several of the classes before us, tragedy struck our class not once but twice with the unfortunate deaths of Michael Mullins and Michael Flora. For those of us that knew them and for those who perhaps only knew them in passing, we must always keep their memories with us. Incredibly unfortunate events such as these, though, coupled with the sufferings witnessed around the world each day really put things into perspective. As the days until graduation begin to approach the single digits, all of us cannot help but feel how lucky we are to have spent the past several years here at Bucknell. While each of us has had a different experience, memories of our time here will remain with us for the rest of our lives.

Perhaps then it is the uniqueness of each of our Bucknell experiences that makes it hard to find a commonality in such a small article. We have all traveled in different circles and although in retrospect it may be hard to believe, there are many of us who have never met. Nonetheless, what we will all have in common as we leave here in a few weeks, is a remembrance of time spent at this great institution. This attachment and love for our school may certainly not be as evident in the waning days of senior year as we are still around one another and worried about the coming months, however the years of reminiscing that are ahead of us will provide us with an increasing loyalty and pride for our school.

Alumni, it was a word that not too long ago appeared to be delegated to those much older than us. Whether or not reality is rearing its ugly head for some of us or is a welcome relief to move on in life for others, alumni is what we will be in a very short period of time. Therefore, it makes these next few weeks all the more important for the senior class. Sure, there will certainly be reunions and there are Bucknell alumni clubs throughout the country, but at no point for the rest of our lives will we experience the feeling of togetherness and belonging that is exuded from the academic quad down to senior nights at Skip's. Let us all make the most of these coming days and never forget those that have already passed. Hooray Bucknell!

Cooking with Katie

Bagels

For those of you out there who are tempted by the low/no fat marketing scam, try leaving behind for a minute the green labels advertising a myriad of artificial ingredients. Sure, it's not easy to resist indulgences such as chocolate, but to replace them with "LOW FAT, chocolate *flavored*" seems ridiculous to me. Instead, try foods that are naturally low in fat, those that offer not only a "healthy choice," but also flavor and nutrition. Aside from an "apple a day" and broccoli, are breads and grains, which heartily maintain the number one slot on the food pyramid, and are, besides, the best part of a meal. Bagels are unique in their flexibility. Whether toasted for a quick breakfast, dressed up sandwich-style for lunch, or dipped in hot soup for a light dinner, they retain a distinctive crunch on the outside, a coy chewiness on the inside. All this with no added fat. Not to mention the infinite amount of alternatives to *plain*... poppy seed, sesame, onion, garlic, cinnamon and raisin, rye...

- 1 teaspoon yeast
- 2 cups hot water
- 2 tablespoons sugar
- 1 teaspoon dark corn syrup
- 4 and 1/2 cups flour
- 4 teaspoons coarse salt
- white cornmeal
- 1 tablespoon dark corn syrup

1. Dissolve yeast in hot water, whisking gently to incorporate.
2. Add sugar, 1 teaspoon corn syrup and salt.
3. Begin by whisking in flour (about 3 cups) and finish by stirring.
4. Turn dough onto a well floured board, and, with enough additional flour to prevent sticking, knead for approximately 5 minutes.
5. Place dough in a bowl, cover with a wet towel and allow to rise for one hour (or until doubled) on the top rack of a warm oven. The oven should be set at the lowest baking temperature; place a shallow pan of boiling water on the bottom rack to simulate the steam in a proofing oven.
6. After the dough has risen, remove from the bowl (it will be slightly sticky) and place again on the floured cutting board. Prepare two sheet pans with a layer of cornmeal.
7. Turn dough and cut into 12 pieces. Take each piece and stretch until it's approximately 1 inch in diameter, and 8 inches long. Twist slightly and place on sheet pan, pinching ends to form the bagel. Repeat, placing 6 bagels on each pan.
8. Allow to rise again, until bagels are nearly doubled in bulk.
9. Preheat oven to 450 degrees.
10. Bring a pot of water to a boil, adding 1 tablespoon of corn syrup.
11. With a strainer, dip each bagel into the boiling water, flipping after 10 seconds.
12. Remove from water, shake to extract excess water and replace on the cornmeal dusted sheet pan. Repeat with remaining bagels.
13. Bake bagels at 450 degrees for 20 to 25 minutes, or until golden brown.

If you dare to "spike" your bagels, following step 12, submerge top of boiled bagel in seeds/minced onion/garlic, flip over, and place seed-side-up on the sheet pan. The cinnamon raisin variation requires a bit more ingenuity... at step 7, form dough until it's half an inch thick, and sprinkle with cinnamon and raisins; roll up, then cut the 12 pieces. Bagels, like all breads, are best consumed right after baking, but since nobody can eat a dozen at a sitting, try refrigerating for up to a week (then toasting), or freezing for up to a month.

Local trails offer natural study break

By Micah Schweizer

Are you convinced that a conspiracy which has developed and there is direct relationship between weather and homework, where the nicer the weather becomes the more homework you are assigned? Do you find yourself at the freak-out point, where if you have to sit here and write another paper you might pop? Save yourself from such an unpleasant demise by taking a jaunt in the sunny countryside—yes indeed, Union County can help you to get away from it all, recharge your dying batteries and clear the clutter from your mind.

"What, a sandy beach dappled with colored umbrellas and slinky waitresses serving pina coladas along the Susquehanna?" I'm afraid I cannot offer anything so glamorous, but there are a number of beautiful areas for walking close by, two of which are the subject of today's Local Color.

The first of these is the Lewisburg River Walk, which is ideal for a short stroll along the river. The mulched path begins by the water at the end of St. George St. and runs south towards Mill St. and parallel to Brown St. Walking along this flood plain, which is at least partially under water at least once a year, you will notice a number of interesting features such as newly deposited soils and a number of interesting species of vegetation, which must be able to survive submergence and moving water. Due to the unpredictability of this environment, many of the plants here are of the fast growing variety.

Beetna Kim—The Bucknellian

Your Local Color columnist Micah Schweizer '00 finds peace away from the books as finals roll around.

Patient observers may also spot a number of animals. I have seen muskrats, and I have even heard tell of mink being spotted. The Lewisburg River walk is maintained by the Otzinachson Group of the Sierra Club and the Lewisburg Garden Club.

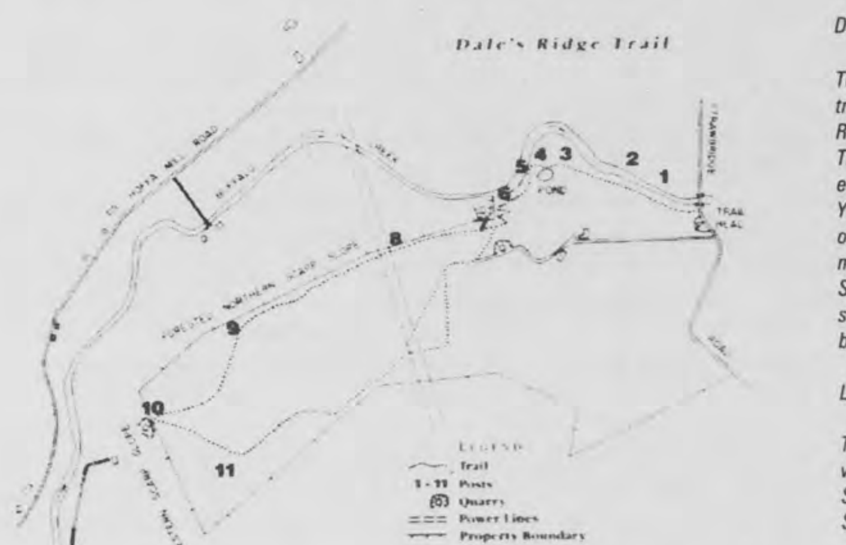
If you are interested in more than just a brief excursion, Dale's Ridge Trail offers a beatiful walk in the countryside only about 10 minutes by car from Bucknell, and can also be reached by bike, although bicycles are not permitted on the trail itself. Dale's Ridge Trail is two miles long and is located on the 13 acre property of Charles and Ros mary Walker and is maintained b the Merrill W. Linn Conservanc The trail is fairly level with the e ception of the switchbacks whic lead up a 160-foot rise, on top which there are three scenic view points.

The trail is divide into nine posts, each on presenting a specific ec system or site of interes such as a floodplain, Federal style house da ing back to the early 19t century, a creek, a pon scenic views, and woodland. The brochur available at the begi ning of the trail indicat specific species of faun and flora that can b seen at the various post

To reach Dale' Ridge Trail, turn left fro Rt. 15 North at the traff light by Bechtel's Resta rant onto Rt. 192 Wes where you will trav (according to my estim tion) four to five mile You will find a larg white barn on your rig shortly before you mak a right turn onto Straw brige Rd. There is par ing before the one-lan bridge on Strawbridg Rd.

Both the Lewisbur River Walk and Dale' Ridge Trail are the hom of some fierce attack po son ivy armed to th teeth with shiny leave clustered in threes, so few words of caution a in order: don't roll in i Additionally, Local Col will not be held respo sible for trauma an fright due to close co tact with bugs.

Both of these trail offer an excellent chanc to escape from modern ty, so to speak, and thi is an ideal time of year t see some of the wonde ful offerings nature ha in store for those who a interested.



Dale's Ridge Trail

Turn left from Rt. 15 North at the traffic light by Bechtel's Restaurant onto Rt. 192 West. Travel (according to my estimation) four to five miles. You will find a large white barn on your right shortly before you make a right turn onto Strawbrige Rd. There is parking shortly before the one-lane bridge on Strawbridge Rd.

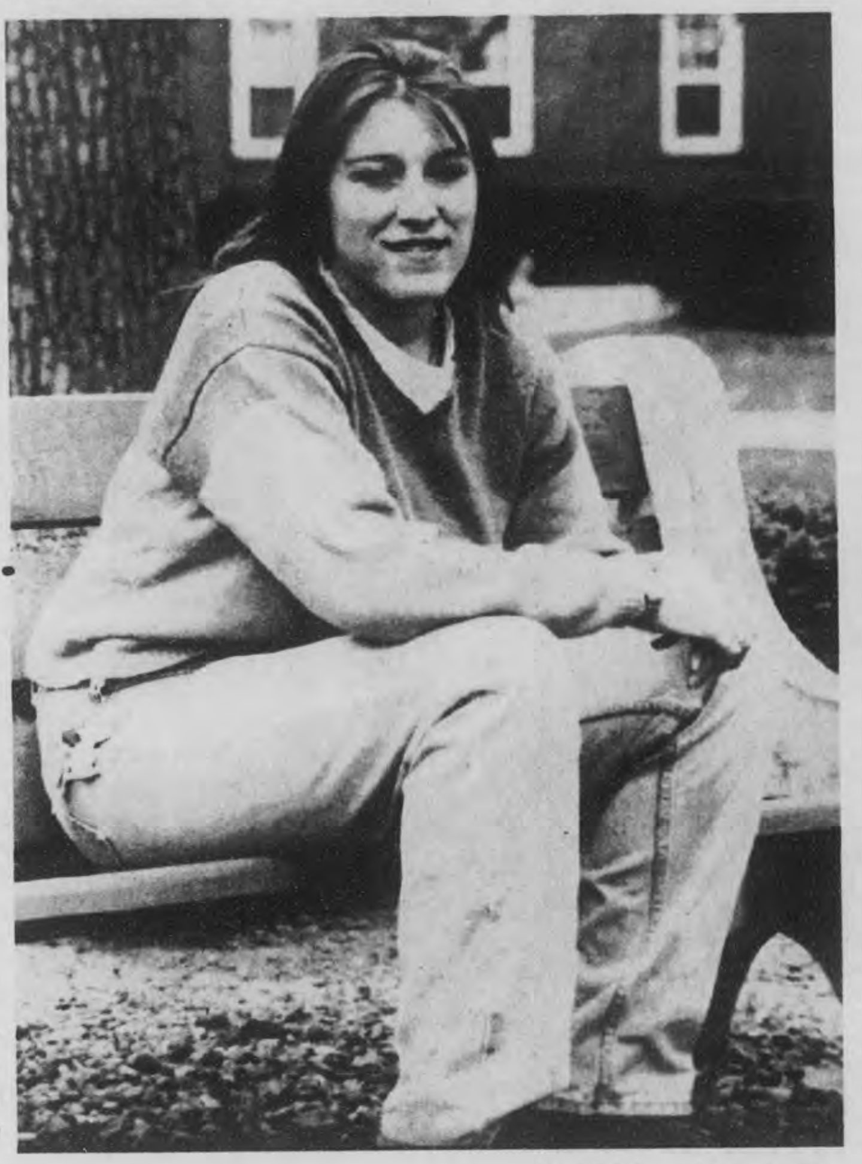
Summer at Bucknell... more than just books

By Ted Burnes

Well, it's that time of year. Put away your jacket and get out your bathing suit, because summer is almost here, and the year is ending fast. With the three months of relaxing vacation almost upon us, many students are planning to rest and relax, go on vacation and get a job in order to keep the bank account afloat. However, just because most students leave campus does not mean the campus closes. Many activities and programs are being held this summer, making summer at the University a fun and active place to spend a few months.



Cara Mickelsen—The Bucknellian

Lindsey Rosenberg '99 will remain on campus to continue work with the Bethesda Day Treatment Center in conjunction with the Sociology department. Rosenberg is part of a team that will work to develop a manual on undergraduate case-study writing.

Summer school is one of the most popular summer activities on campus. Between 500 and 750 students, most of whom are Bucknellians, spend their summer taking classes on and off campus to get ahead or keep up with their major or to fulfill those pesky requirements. "The clientele is usually about one-quarter graduate students," said Marion Lois Huffines, director of the University's summer school program.

"Many of these grad students are education majors. Since many teach and intern during the year, they come and take classes during the summer in order to receive their certification. Education classes are really popular during the summer," Huffines said. In addition to the classes taught on campus, the University offers classes abroad as well, such as courses in the Caribbean Studies and Economics programs taught in Barbados.

In addition to different summer classes, many students are staying to pursue different programs and internships. Stephanie Bischoff '98 is working with a summer program sponsored by General Electric Company. G.E. gives a grant to sponsor students in the development of computer software for the classroom. "There are different topics to work with, and I'm working with engineering and economics. It's a really great program," Bischoff said. "I receive free room and board, a small stipend, and since I work only 20 hours a week, I can take a class as well."

Matt Hennig '99 is staying this summer to take part in a program for engineering and management majors. The Institute for Leadership in Technology and Management is a two-summer program that starts the summer after the sophomore year. It picks 10 engineering majors and 10 management majors out of a pool of applicants, and the chosen few spend their summer being paid to take classes in areas such as public speaking and problem solving. "It should be a lot of fun," Hennig said. "At the end of the summer, the students involved have a final project, which is usually a large problem that real corporations are faced with. It teaches us how to deal with all types of problems in the business world."

Hennig says that the program is invaluable due to the internship possibilities. "Because I've taken this program, I've been guaranteed an internship the summer after my junior year. Many corporations recruit from this program, and I will definitely be working next summer."

Sociology major Lindsey Rosenberg '99 is working on a research project in conjunction with Carl Milofsky, professor of sociology. Rosenberg is involved with a team of people trying to develop a manual on undergraduate case study writing. Rosenberg will be collecting information by interning at the Bethesda Day Treatment Center. "I do a lot of tutoring with young children, and I play with children," Rosenberg said. "While doing this, I am collecting data for the case studies I am working on with Professor Milofsky."

Biology major Alex Grieco '00 will be staying on campus to do research. Grieco was granted a fellowship by the University to do research on cell physiology with Kathleen Page, professor of biology. "I am really excited about the project," said Grieco. "I had to apply and give a description of my project, and only a few were chosen from the many applicants."

So, what's the campus like during the summer with fewer people? "There is a misconception that the campus is lifeless," Huffines said. "This is not true. The school sponsors many trips, such as bus trips to Washington, D.C. and New York City. We've already scheduled a bus trip to Baltimore's Inner Harbor, and reserved tickets to a Baltimore Orioles game which should be fun." Huffines also said that besides summer classes, there are many different workshops and programs non-university affiliated that bring people to campus. "There's a cheerleading camp and different workshops that come to campus as well. The University grants them space and provides them facilities," she said. Most of the facilities are open as well, including the athletic facilities and the Writing Center.

Are any of these hard-working Bucknellians going to miss their summer of fun at home? "I live right near New York City, on Long Island, and I'm used to spending most of the summer in the city. It will probably be a big change," Hennig said. "But, I am getting paid to take classes, and I'll probably make about the same in six weeks than I would have all summer." Hennig says that he can now spend the little free time he has this summer relaxing instead of working hard.

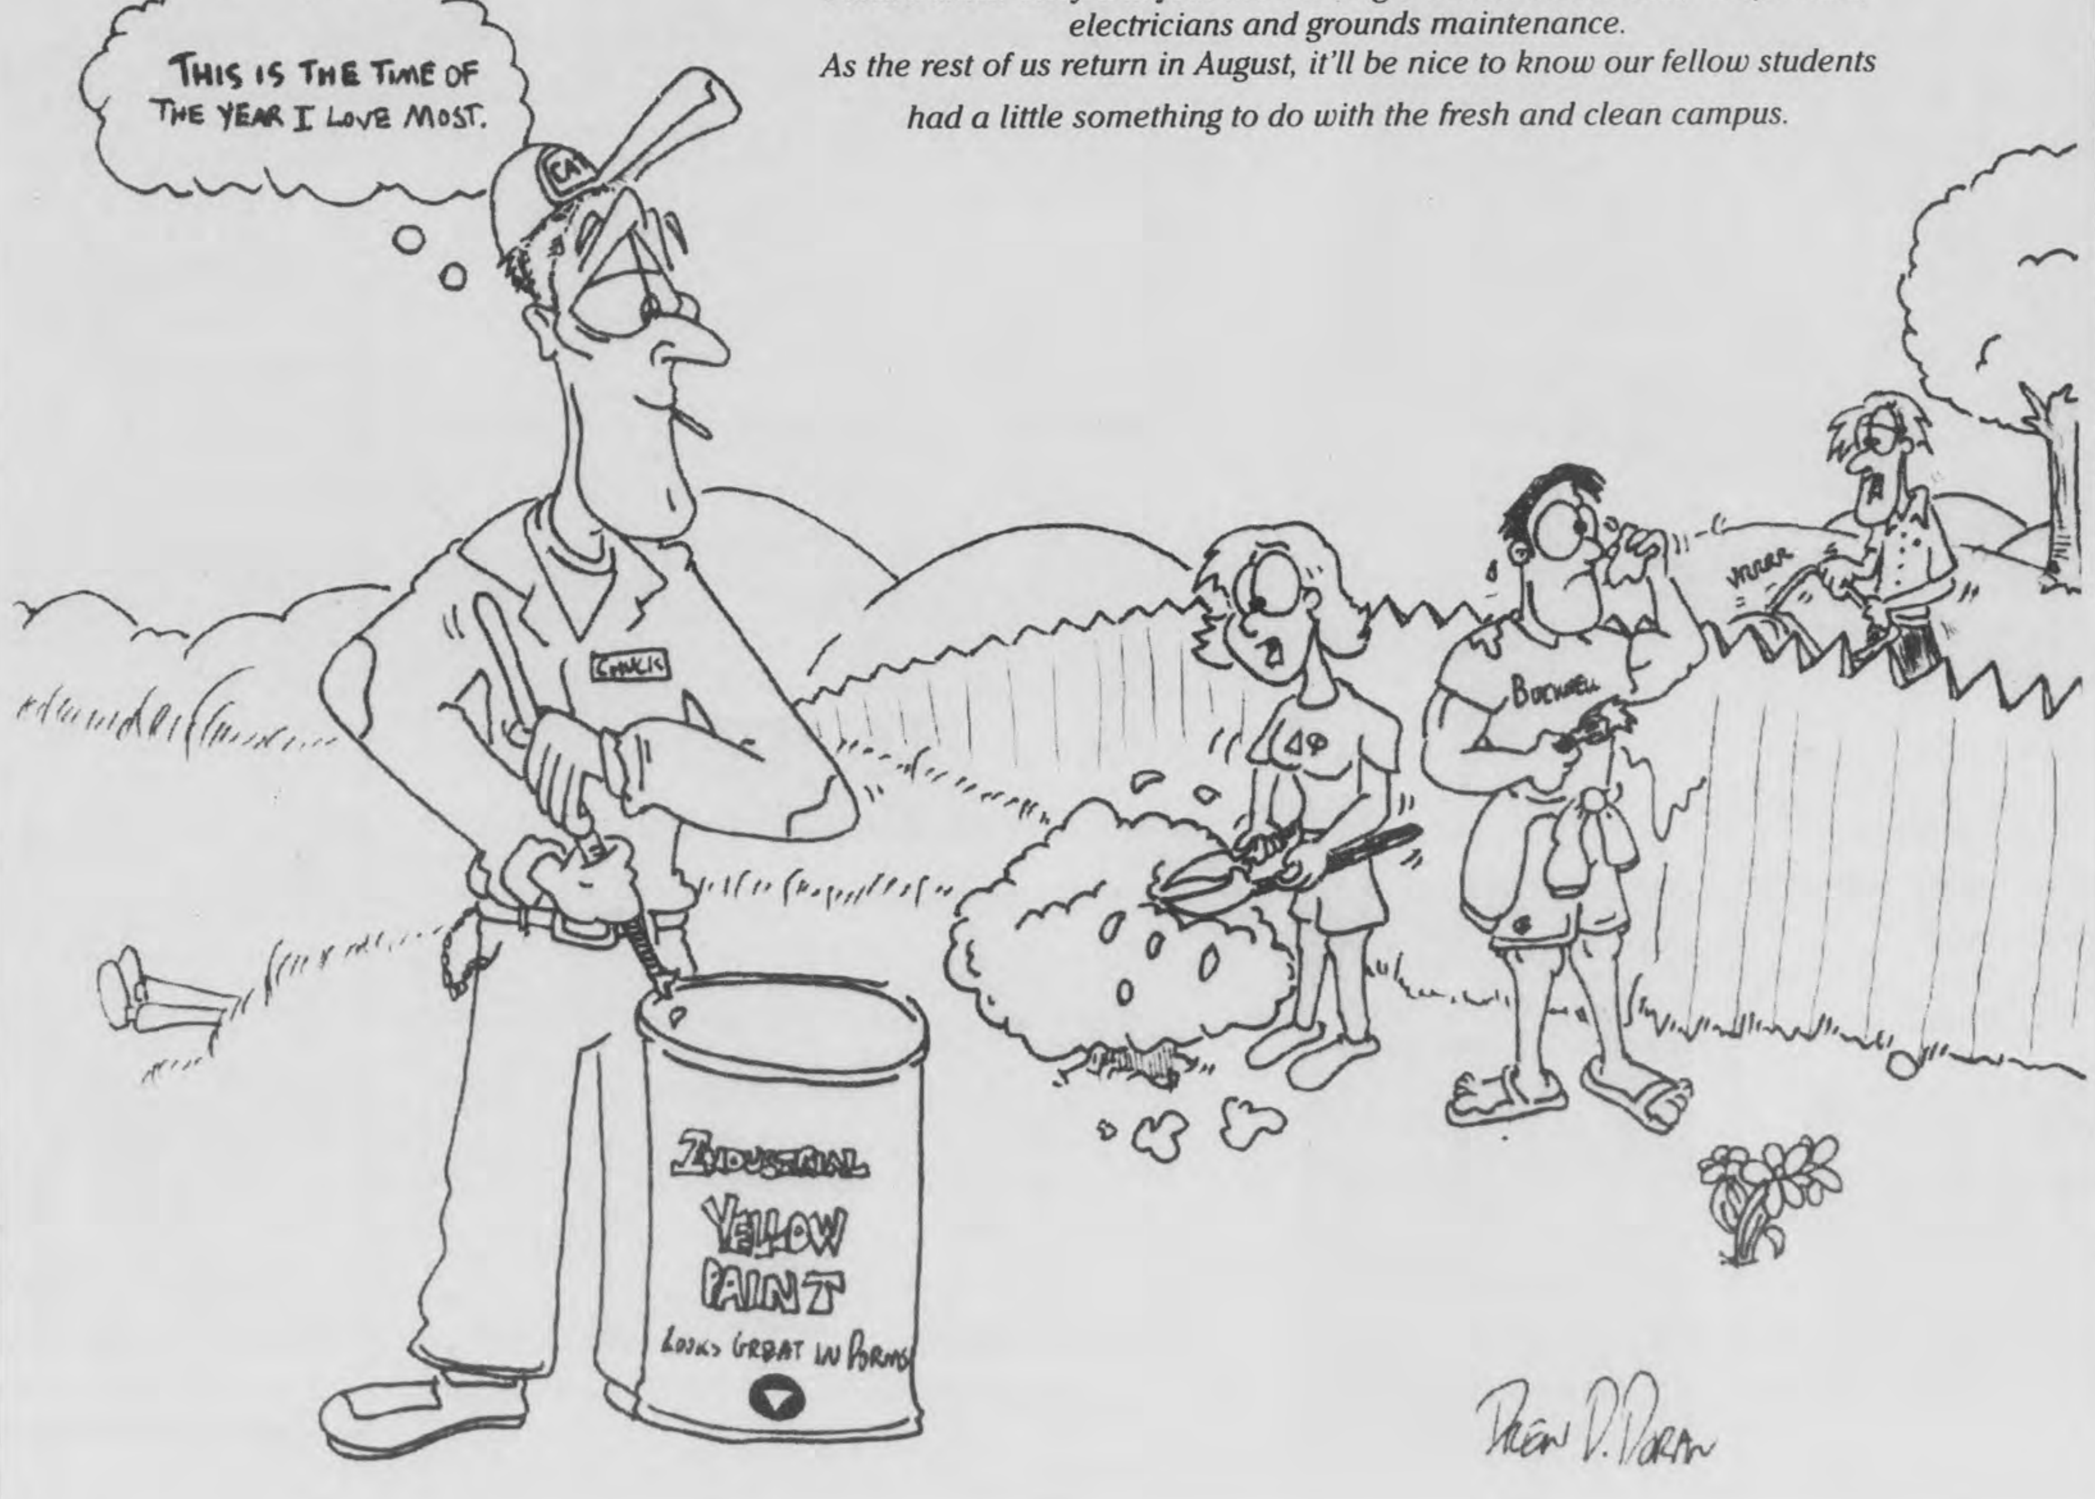
"I will miss working and making a lot of money," Rosenberg commented. "But I'm going to have three very cool roommates, and I'm going to do a lot of painting. I also hope to go home on weekends. I'll miss my friends from home, but this is a chance to get my work published, and I am going to benefit a lot more from that in the long run."

There you have it. Despite the many students tanning on beaches worldwide, the campus here will be alive and swinging with many different programs and activities. "I know I won't get a vacation," Rosenberg said, "but I am getting experience... this will look better in my resume than being a waitress for the summer."

Beetna Kim—The Bucknellian

Alex Grieco '00 looks forward to a summer working on campus with Kathleen Page, professor of biology. Grieco was granted a fellowship for research on cell physiology.

This summer, 27 Buckellians will remain on campus as part of Physical Plant's crew. They will join the existing crews of custodians, carpenters, electricians and grounds maintenance.
As the rest of us return in August, it'll be nice to know our fellow students had a little something to do with the fresh and clean campus.



Camp Sussex
Enjoy a helpful and rewarding summer at Camp Sussex which is located in the beautiful mountains of northern New Jersey and is about one hour from New York City. We need M/F counselors, Head pioneering, social worker, LPN/RN/Student Nurse, Jewish Cultural program. Salaries are attractive! Please call for more information or write to: Camp Sussex

Dreaming inspires Patten's poetry

By Erin McCallister

"I dream whole poems." These are the words of Karl Patten, professor of English. They are not words from his poetry, however; they are words from himself.

At a reading this Sunday, Patten will present some older poems from his book *The Impossible Reaches* and some newer poems, many of which are inspired by Dante. These poems frequently take place in Tuscany or some other part of Italy, where Patten has visited many times.

A few years ago, Patten taught a seminar on the *Divine Comedy* and, inspired by Dante's way of writing and by his language, he created many poems.

Other themes emerge in Patten's writing. Uncomfortable with the word "inspiration", Patten describes his poetic themes and subjects more as obsessions. He has written a great deal of poetry about his father, who is no longer living.

He has also written much about cows. "I like cows," Patten said, "They're very pacific. They're animals of peace, they like to travel and they give things. A lot has to do with the fact that I don't like aggression; I don't like war."

Other strong influences on his writing have been his wife and his two sons.

"I sometimes like to say I began writing about the time Rimbaud quit." While this French poet stopped writing around age 19, Patten began writing poetry at age 18 when he was at Williams College in Massachusetts. Starting out as an engineer, he soon changed to a history major. After receiving his Ph. D. in English from Boston University, where he was an English professor for two years, he came to the University in 1956.

As a creative writing professor, he advocates much of what he follows in his own life. "I do not seek, I find," Patten says, quoting Picasso. "This is true for writers in general and for me. I don't know where a poem is going when I start. I have no idea what will happen to it. It will develop, but not without a fair amount of attention to form, lines, white space and stanzas."

To Patten, part of poetry is making something out of nothing. The whole process of *making* is what he views as most important. He describes his motivation to write as "the desire to make something that is really worthwhile when all you've got is a blank page and some words."

Where does he get these words? Many of them come from dreams. "I dream words, see written words, and write them down as fast as I can, but this is just the start," he explained. When his poems emerge from dreams, he tries to be faithful to those dreams, not cutting or changing them very much. He often does not know the themes of his poems until after he has written them, and even then, he might not know.

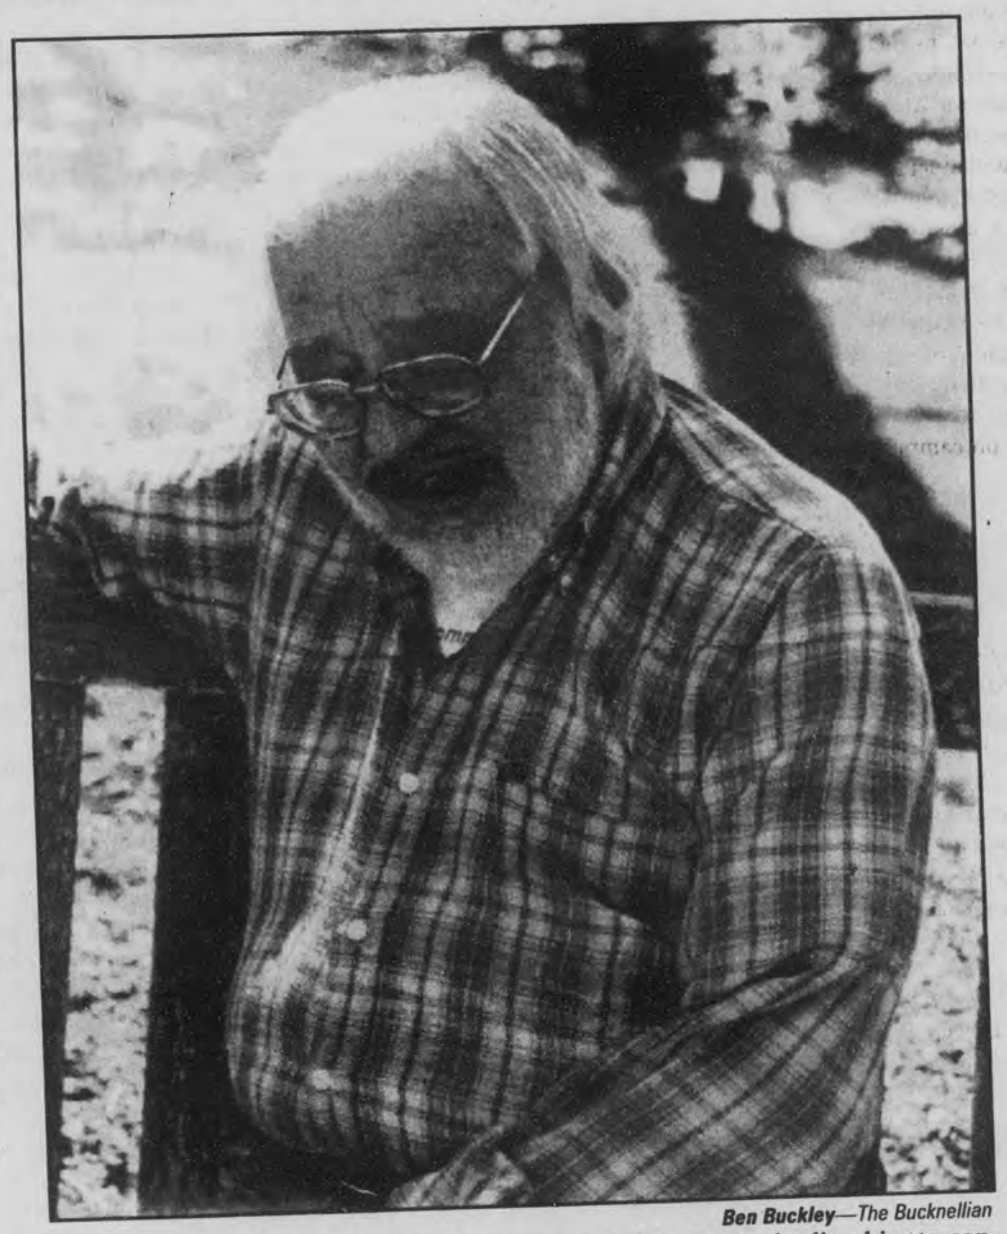
According to Patten, his poetry has not changed much over the years. "I wrote the way it felt right for me, and I keep doing it. I'm not trying to be something different." In fact, *Painted Bride Quarterly*, a Philadelphia magazine, has recently published what Patten calls his "first real poem," which was written decades ago about Charlie Chaplain.

When asked about the accomplishments which were most meaningful to him, Patten did not mention any of his awards or publications. He named being cofounder of the Lewisburg Prison Project, a prisoners' rights organization for which he serves as a paralegal, as well as working for the local American Civil Liberties Union (ACLU) chapter.

After more than 40 years of teaching, his advice for aspiring poets is to write as much as possible, to learn to revise, which often means cutting, and to be hard on oneself, asking "Is this really right?"

For those who have not yet developed an appreciation of poetry, Patten offers this: "Life without poetry is no life at all. This materialistic consumer society is a dangerous place to live. We live in an increasingly barbaric society, and it saddens me. Poetry brings life to things. Materialism is dead stuff, is inert. Material riches are nothing; all the riches are spiritual, internal."

The riches of Patten's poetry are free at 8 p.m. this Sunday in Bucknell Hall.



Ben Buckley—The Bucknellian

Karl Patten, professor of English, has been inspired by Dante, leading him to conduct a seminar on the *Divine Comedy*. As a creative writing professor, he allows his poetry to develop on its own, paying attention to its form and white spaces.

Dance Company taps into a series of performances

by Katryna Andrusik

The Bucknell Dance Company, in its final performance of the year, will be performing its spring concert. The dancers include both alumni and present students, and exhibit the choreoraphy of new faculty, members of the company and two commisioned pieces. The evening will include classical ballet, tap dancing, modern and jazz and is open to both students and the local community.

The dancers have been rehearsing these works since the beginning of the term and have produced an "accessible, gracious, funny and 'living'" series of performances, according to Danna Frangione, professor of Dance and advisor to the dance company. Nine pieces will be performed on the two nights, each exhibiting the various talents of a chosen number of dancers.

The dancers were chosen for each work based on their personal strengths and the choreographers' desire to have them in the piece. Each dancer plays a part in as many pieces as any other member of the company.

Frangione said that the women are challenged in their roles and encouraged to grow through their efforts. Choreographers include Er-Dung Hu, professor of dance who creates a beautiful Chinese modern ballet with large fans and graceful movements, and Nicole Bradley, a senior whose work adds some jazz to the night.

Commissoned artists include Robert Atwood of the Alvin Ailey American Dance Center and Yi-Jun Zhou, a graduate student at the Tish School of the Arts.

While the dancers and choreograhers will bring the stage to life, they will be aided by the lighting designs of Larry Hugo, who has traveled with dozens of dance companies and assisted the Bucknell Opera Company for the past four years.

The talents of various costume designers, including Elaine Williams, who teaches scenography here and has helped prepare other Bucknell productions, and Lisa Forrest, a designer who has worked around the country with various companies, will also be displayed.

The Bucknell Dance Company Spring concert begins at 8 p.m. this Friday and Saturday at the Weis Center. Tickets will cost $5/$4 for senior citizens and children.

This production has been made possible through the help of the Bucknell Student Government and the Bucknell Association for the Arts.

Amy Brillinger '00 and Lauren Rabadeau '00 will be performing in Robert Atwood's piece "Through A White Veil" in the annual spring dance concert. The concert will include classical ballet, modern, jazz and tap dance, as well as featuring two newly commissioned dance pieces staged by freelance choreographers Atwood and Yi-Jun Zhou.

Music Festival to raise spirits, money for AIDS

By Robin Reitzes

"The Festival is a week before finals. This event will help people take their minds off finals and also raise money for a good cause," commented Mike Hauser '97, who helped to coordinate the 1997 Kappa Sigma Music Festival and Fund-raiser for AIDS Awareness.

Tattoo Bill and His Star Wars Lunchbox and *Godammit*, two campus bands, will be providing the musical entertainment which will help raise money for AIDS Resource Alliance Incorporated, an organization based in Williamsport.

"AIDS Resource Alliance Incorporated was not getting the attention it deserves by the Bucknell campus. It is a large organization and was thrilled to be chosen by our fraternity as the recipient of the fundraising activities," Hauser said. "Hopefully, this event will help heighten AIDS awareness on campus."

The idea for the festival was spontaneously generated by Hauser and the two bands involved. Hauser is friends with members of both bands. "These bands are well-known and extremely popular on campus," he said.

Matt Rhoads '97, who is a member of *Godammit*, explained, "I talked to Mike Hauser at Kappa Sigma and he expressed interest in having a benefit."

Other members of *Godammit* are Brendan Smith '97, Alex Necochea '98, Aditya Joglekar '98 and Joel Mack '98. The band hopes that a lot of people show up not just to hear them play, but also to help raise money for a wonderful cause. This event is particularly important to Rhoads. "I'm a senior and this is one of the last times I will be able to perform at Bucknell," he said.

Godammit will be playing some of their original songs along with classic and modern rock.

"Not only will it be fun to play outside and enjoy the day, but we will be involved with raising money for a great AIDS charity," said Ed Sullivan '97, a member of *Tattoo Bill and His Starwars Lunchbox*.

Neil Harrison '97, Scott Bryant '97 and Tattoo Bill Skorupski SPEC are part of *Tattoo Bill and His Starwars Lunchbox* as well. They will be playing all their originals, along with classic rock cover tunes.

Tickets for the Music Festival will be on sale in the L.C. mall from 11 a.m. until 1 p.m. tomorrow. Tickets are $2 and can also be purchased at the door. The Music Festival is this Saturday from 1 p.m. until 6 p.m. at Kappa Sigma.

Above right: Aditya Joglekar '98 and Alex Necochea '98 of *Godammit* reherse for the upcoming Festival to raise money for AIDS awareness. They will be playing some original songs as well as some classic and modern rock. At right: Matt Rhoads '97, also a member of *Godammit*, wants to make this benefit memorable as well as a success. As this is his last year here at the University, he hopes that every time that he gets a chance to play will be a fun and entertaining show for all.

Movie Review: Cusack and Driver help to make Grosse Point Blank hit its mark

By Chris Nichols

Grosse Point Blank Ω ☆☆☆½
Starring John Cusack, Minnie Driver, Joan Cusack, and Dan Aykroyd

What happens when a hitman (John Cusack) goes home for his ten year-high-school reunion, but has a job in town at the same time? What happens when the same hitman runs into the sharp tongue of the girlfriend who he left waiting on prom night (Driver) when he went off and joined the army? What happens when that same hitman won't join a hitmen union that a once- partner (Aykroyd) is trying to put together? The results is *Grosse Point Blank*, Grosse Point from the name of the town outside of Detroit, Blank is the hitman's last name. This interesting story paints a painful picture of what it can be like for some to travel home particularly from those who have disappeared. Blank's character was expected to go to a top college before he bailed out on school and life when he joined the service. He eventually worked as a special agent and then entered into the private sector without changing his job description. Now he's an unhappy killer who sees a shrink who's scared of him and who's placed in an awkward position because of what his client does. Joan Cusack does an excellent job playing Blank's pushy secretary and organizer for his hits. The two work surprisingly well as a brother/sister duo, though much of their communication takes place over the phone. Aykroyd does a great job in a role that is funny, but more serious than a lot of his sillier work. It was refreshing to see him in this role. Minnie Driver, however, is the bright star of this film. She contrasts Cusack's dark character well, and through the course of the movie is really able to help him mature into a character that is likeable despite his profession. This movie is funny and dramatic and even comes with a little action at the end.

Athlete of the week:
Kristen Sandel '98 was named Patriot League player of the week as the Bison won the League title.

Bucknell gridders spring into action

By Luke David

Amidst the commotion of House Party weekend, if you listened hard enough, above the cries of fraternity row, above the noise of several bands that were performing, you could hear the familiar crack of football helmets in Christy Mathewson Stadium. Although this noise may seem out of place in the Spring, it's a tradition that has been going on for years and one that is necessary for a team that will attempt to defend its Patriot League title in the Fall.

Each spring, the football team practices for fifteen days, mostly scattered over Tuesdays, Fridays, Saturdays and Sundays, including the climactic 'Spring Game' that took place this past Saturday. On the Monday preceding the game, next year's seniors split into two groups, and selected the players that would compose their team in an actual draft. Once the teams were assembled, they practiced on Tuesday and Friday in anticipation of Saturday's big game. Because there was a shortage of depth at several positions, graduating seniors Brandon Little, Bart Griffith, Jack Boyle, George Horwanitz, and Rich Miller pitched in to give the teams a hand in a few spots.

The purpose of the game, as well as the practices, is to give the coaches a better idea of what they will have to work on when August football camp rolls around. The competition gives the players a chance to prove to the staff that they deserve a starting spot and gives them a measuring stick with which to gauge their strength and skill improvements when they return from summer break.

Mark Imbertson '98, a defensive lineman from Jupiter, Florida, said "The Spring Game is nice because a lot of the younger guys get the repetitions that they might not have seen in the Fall."

A big concern for the Bison, besides the task of filling the shoes left by record-breaker Rich Lemon '97, is who will get the nod at quarterback. The position is up for grabs because of the graduation of two-time all-league performer Jim Fox. At this point, it seems to be a coin toss between Jim John '99 and Don McDowell '00, both of whom saw some time on the championship squad. Whoever is throwing the ball will have plenty of protection from an offensive line that gained valuable experience in the Fall.

All in all, the Spring practices are a good way for the players to get used working hard and actually competing in game. The hard work, however, does not end there. Hunter Adams '98, the Patriot League's preseason pick as defensive player of the year feels that "the work that we put into football in the Spring is important," but without hard work in the weight room and on the track during the summer, we will have a hard time winning the league again."

Softball wins title in 19-inning thriller

Championship game is longest in league history; Kulis goes distance for victory

By E.J. Crawford

Beetna Kim—The Bucknellian

Kristen Sandel '98 earned Patriot League Player of the Week honors as the softball team captured the league championship.

The Bucknell softball team turned a disastrous start and seemingly lost season into Patriot League gold this past weekend, upsetting Lehigh before defeating Colgate 4-1 in 19 innings for the Patriot League title.

The win gave coach Terry Grieb her first-ever championship in her 18 seasons at Bucknell.

Melanie Kulis '98 pitched all 19 innings in the victory, the longest game in Patriot League Championship history, giving up only seven hits and one earned run. The squad will now face Brown on May 8th in a play-in game for an NCAA Tournament berth.

"It hasn't really sunk in yet. No one gave us a prayer before the season, but this team plays with a lot of heart and desire," Grieb commented, also noting that the Bison were picked to finish fifth in the Patriot League this season.

Kulis and Colgate's Patriot League pitcher of the Year Tara McGoff battled for 16 scoreless innings before Bucknell finally broke through on an RBI-double by Jenny Snyder '99 that scored Jen Jasionowski '97.

However, Colgate would battle back in the bottom of the inning to knot the score at one.

Despite Colgate's reply, coach Grieb "never thought we were out of it. Once they didn't score with that leadoff triple [in the 15th inning] I knew that someone wanted us to win."

The game remained scoreless for only one more inning, as McGoff, who pitched 52 innings over the weekend, began to tire and the Bison bats warmed up.

Jasionowski opened the gates by reaching on an error with one out in the 19th, and moved to third on a double by Snyder. Jenn Gombos '97 then dealt Colgate the biggest blow of the game, a bases-clearing triple that put Bucknell up 3-1. Patriot League Player of the Week Kristin Sandel '98 then singled in Gombos to extend the lead to 4-1. Kulis then finished off the Red Raiders to collect the victory.

For the week, Sandel hit .529 with three doubles and four RBIs and, along with Snyder, Gombos and Abby Lighthart '97, led the Bison with three hits in the title game.

Grieb noted that "Kulis pitched great in the 1-0 victory against Lehigh, and then the 19-inning game the next day. She was unbelievable."

The title is even more surprising considering the squad's rocky start, which included dropping its first 14 games this season. However, Grieb doesn't regret it one bit, saying that "we played better competition to get better in the long run, and it did make us better. It helped to prepare us for some of the pitching we've seen this tournament."

But it was not an easy road to get to the Championship game. Bucknell, seeded second behind Lehigh, drew a bye in the first round before dispatching of Holy Cross in the second round, setting up a winner's bracket match against top-seeded Lehigh.

Kulis then pitched a gem to defeat the Mountain Hawks 1-0 and push Bucknell into the Championship series against the winner of the Lehigh-Colgate play-in game in the loser's bracket. The tournament was played in a double-elimination format.

Colgate then defeated Lehigh to set up a series with Bucknell, in which Colgate had to win twice, while the Bison only needed a single victory.

However, Colgate's McGoff outdueled Bison pitcher Stacey Waite '99 5-2 to force the deciding game.

Bucknell next faces Ivy League champion Brown in a play-in series for the right to an NCAA tournament berth.

"We're right there and the kids know that now," Grieb said, adding that "hey, we're on a roll, we might as well keep that going."

Men's lacrosse falls to second ranked Virginia

By E.J. Crawford

Beetna Kim—The Bucknellian

The sun set on a disappointing lacrosse season with a 24-4 loss to Virginia.

Last year the men's lacrosse team would have been playing Virginia to prove they belonged in the NCAA tournament. This year they were simply playing for pride.

The men's squad finished up its season at 3-10 (2-3 in Patriot League action) after a 24-4 defeat at the hands of second-ranked Virginia.

The game started out relatively close, as the Bison put up much more of a fight than most observers would have expected.

Head Coach Sid Jamieson commented that "our close defense played very well against some very good players," one of whom, Doug Knight, set the UVA record for career points in the game.

However, for all the tough defense, the unrelenting Cavalier attack made it difficult for the Bison offense to get on track, as the squad managed only one first-half goal, by Ed Joffe '99 off a feed by Eric Stewart '97, as the team trailed 9-1 at the half. Goalie Paul Bruccoleri played the majority of the first half before giving way to Mark Stirpe '98.

Virginia's potent offense erupted in the second half, as they exploded for 10 goals while shutting out the Bison en route to a 19-1 lead.

The Bison then stepped it up in the fourth quarter, but it was too late as the Virginia lead was insurmountable, as the Cavs cruised to a 24-4 victory.

The surprise of the game was freshman goalie Andy Smith, who stepped in for Stirpe and contributed 13 saves in the final 20 minutes. Brad VonNostrand was the only Bucknell player to register a two-point game, as he managed a goal and an assist for the Bison.

"I think our kids played terrific... they weren't intimidated and didn't play scared at all," Jamieson said.

Although this season may appear to be a disappointment after last year's undefeated squad, Jamieson was "quite pleased with the good progress" that the team made. In addition, the squad returns its entire defense and nine of its top 10 scorers, including the top six.

Another major problem this season was injuries, particularly those to attackmen Joffe and Michael Kennedy '99.

"Injuries to our two key returning players had a crucial role in our inability to score, particularly with the inexperience of the defensive kids," Jamieson said.

The rash of injuries to a number of players also forced Jamiseon to "continually shuffle personnel, thus making continuity difficult, particularly with such a young and inexperienced team." Added Jamieson, "Hopefully we can get a solid lineup for next season."

For the season, Joffe was the leading scorer with 25 goals and 28 points overall. Mark DelGrego '98 finished second in points while leading the team with 24 points. Other high men for the Bison included Kennedy with 12 goals and 10 assists, and John Golaszewski with 14 goals and five assists.

Bruccoleri led the team in saves with 134 for the season, and posted a .543 save percentage. He also led the team with a goals against average of 13.23.

Flash in the Pan

Over and out: Mario Lemieux's stellar 13-year NHL career came to an end last week as his Penguins fell to the Philadelphia Flyers 4-1 in a best-of-seven first round series. Lemieux's career didn't end, though, without one more miracle. With less than one minute left in his final home game and the standing-room only crowd in the midst of a 20-minute standing ovation, Lemieux took a pass at center ice and beat Flyer goaltender Garth Snow through the pads for his final goal at home. Lemieux added another goal in game five, a 6-3 Philadelphia win.

Mighty Ducks IV: The Anaheim Mighty Ducks continued their storybook season in game seven of their first-round playoff series with Phoenix Tuesday night. The Ducks advanced to the second round of the NHL playoffs with a 3-0 win over the Coyotes. Guy Hebert stopped 27 shots for the shutout win.

Business as usual: The Washington Bullets were the only NBA team to outscore the Chicago Bulls this season, but the playoffs have been a different story for Jordan and the Bulls. Chicago has jumped to a 2-0 led in the series, and Jordan hit for 55 points in the Bulls' game one victory.

Finally unseated: Martina Hingis, currently the No. 1 women's Tennis player in the world, will miss at least three tournaments after having surgery to repair her right knee. Hingis injured the knee during a fall from a horse last week. Hingis was uninjured in a fall from the horse two months earlier during the Austrailian Open.

Chase to Maris: Although it's still early, one has to wonder if this will be the season that Roger Maris' home run record will fall. Ken Griffey Jr. broke the major league record for homers in April when he hit his 14th last week. Griffey's Mariners were leading the AL West with a 15-10 mark at week's end.

Right where they left off: The Atlanta Braves seem poised to defend their National League Pennant this season, using the first month of the year to assert themselves as the clear favorite. The Braves opened the season with an 18-5 start, led by a pair of undefeated pitchers (Tom Glavine, 4-0, and Denny Neagle, 3-0) and two .400 hitters (Kenny Lofton, .423, and Jeff Blauser, .411).

SPORTS PEOPLE OF THE YEAR

Men's rookie of the year—Tyler Prout   Men's coach of the year—Pat Flannery   Women's rookie of the year—Kate Wood

Prout steps in nicely at the hot corner

By Jared Silliker

Heinz says, "The best comes to those who wait."

Tyler Prout '00, Bucknell's starting third baseman, has a slightly different take. Prout's motto: "The best comes to those who change."

A second baseman throughout his high school career, Prout moved to third base this fall when Bucknell's regular cornerman went down with an injury.

With the change, Prout hasn't waited at all, starting 42 of the Bison's 44 games thus far. He is currently fifth on the team in batting with a .341 average (47-138).

"The transition was really weird having spent my whole life at second, but I had no objection if I was going to play," Prout said.

Prout had some big shoes to fill, though, as he replaced last year's Patriot League Player of the Year, Kevin Silverman '96, as Bucknell's regular third baseman.

Although Prout's defensive flexibility gave him a place to begin, his bat has been more than formidable. Prout ranks fourth on the team in home runs with five and in RBIs with 30, and is second in the nation in triples with seven.

"There was a little pressure being the only freshman starting, but I got enough at bats in the fall to prepare me well for this spring. I've just felt real comfortable and relaxed at the plate," Prout said.

The starting job and immediate hitting success caught Prout by surprise, though. "I just came in open-minded and had no idea what to expect. At first, I thought maybe it was just a lot of adrenaline," Prout said.

Prout wasn't the only one surprised. He relayed a quote from Alex Inclan '97 from early in the season, "Prout, are you on a hot streak, or are you good?" to which he responded with a simple, "I don't know."

"I just didn't know what to think [of the success]. Baseball is all about getting in a groove, and I've just been seeing the ball real well all season."

With all his hitting accolades, Prout has still had to battle through some slumps throughout the season. One in particular was Bucknell's home doubleheader against St. Bonaventure, during which Prout went 0-for-8, with six strikeouts.

"After that, I thought my season was over. I called my parents, and said, 'Why is this happening?'" Prout said. "But they encouraged me to stay positive and aggressive, and I realized that I was just in the wrong mindset and was too tentative."

Since that series, Prout has put his swing back together hitting .313 (15-48) over 15 games, while collecting three triples, a home run and 10 RBIs.

Beetna Kim—The Bucknellian

In his first season as Bucknell's third baseman, Tyler Prout sports a .341 batting average and is second in the nation in triples.

Basketball's Flannery exemplifies class on and off the court

By Chris Ellis

The first fortnight of April, 1994 was, to put it mildly, a very exciting period in the life of men's basketball coach Pat Flannery.

The then five-year basketball coach of Lebanon Valley College saw his team win the National Division III championships in thrilling fashion, defeating New York University 66-59, he was named the National Division III coach of the year, and his wife, Patti, gave birth to his first child. And, oh yes, his alma mater called. Mr. Flannery, would you like to break into the elite position of coaching Division I basketball at the same university that you played Division I basketball?

"To say the least," said Flannery, "It was a very exciting and satisfying time in my life."

As it turns out, life just got better from there.

In three seasons as head coach of the Bison, Flannery has led his team to three winning seasons in the Patriot League and has won two league coach of the year awards—sharing the honors this season with Navy's Don Devoe.

Basketball wasn't always this sweet for Flannery. Despite having a stellar college career at Bucknell, leading the team in assists during each of his four seasons, Flannery found it very difficult to break into the coaching ranks. From 1981 to 1989, Flannery endured the thankless, merciless task of assistant coaching, bouncing from Bucknell to Drexel to William and Mary and finally back to Drexel.

After all his years of assisting, Flannery was in 1989 awarded his first head coaching position in collegiate basketball. The problem was, his job took him to a Division III school in disarray—the Lebanon Valley program he inherited had not enjoyed a winning season in 18 years.

As it turns out, that losing tradition was exactly the challenge he was looking for. In his first season as Lebanon Valley's head coach, Flannery led his overachieving team to a 17-9 record, and recorded five consecutive winning seasons, having his Lebanon Valley career culminated with a 28-4, National Championship season in 1993-94.

Then Bucknell came calling.

"I was very happy at Lebanon Valley—I liked the people and players that I was surrounded with," Flannery said. "But from the first day, Bucknell has been everything I thought it would be."

Even at Bucknell, though, Flannery hasn't always had it easy. He was entrusted with the task of replacing legendary head coach Charlie Woolum, who patrolled the Bucknell sideline since Jim Valvano last handled the coaching duties in 1975, and took the reins of a team that had just suffered through its first losing season in 12 years. The players and staff were, obviously a bit reluctant to tamper with Woolum's style that netted him 318 wins in 19 seasons.

It seems that everything that men's basketball coach Pat Flannery has done at Bucknell has been a success. From being a four year team assists leader during his playing career...

"We spent a lot of time trying to mesh the old program with the new," Flannery said. "I was a bit unsettled as to my role in the program."

Despite the problems, though, Flannery picked up right where his Lebanon Valley career had left off. His first Bucknell squad rebounded from an 0-8 start to win the Patriot League, earning the rookie coach Patriot League coach of the year honors. His second team posted a 17-11 mark, falling to Adonal Foyle and Colgate in the league tournament.

The 1996-97 season provided Flannery with the opportunity to coach a team that had played the bulk of their college careers under his system, but also brought a new challenge. The challenge of replacing all five starters.

"The starters (from last season) were gone—it was time for the young kids to take control of the program," Flannery said. "We knew we'd have to work very hard to win games."

Observers couldn't help but be pessimistic about the team's chances. No major publication picked Bucknell to finish higher than fourth in the league, and many saw them considerably worse than that. After struggling through some exhibition games and a win against lowly Robert Morris, something happened. The "young guys" began to gel.

"We suffered through some growing pains, but they helped us to find our way," Flannery said. "By being able to win some of those early games, we developed some confidence. I felt we could be a very good team."

The highlights for the 1996-97 squad speak for themselves. A 30-point victory over Delaware. An overtime victory over Princeton on the road, placing Bucknell in elite company—only North Carolina, Indiana, and California also defeated Princeton this season. A strong showing in a loss to then-No.10-New Mexico.

The team that almost everyone in the league forgot had made it all the way back. In fact, save for a furious final-minutes comeback by Navy, the Bison would have made in to the NCAA tournament for the first time since 1989. Still, being one point away from an NCAA tournament birth isn't bad for a team that nobody took seriously, right?

"It took me until a couple days ago to watch the final seconds of that game," Flannery joked.

For his efforts in doing a speedy rebuilding job on the Bison, Flannery was rewarded with another league coach of the year honor. He, along with assistant coaches Don Friday, Carl Danzig, and Terry Conrad, are arguably the most respected staff in the Patriot League. Friday was a carryover from Flannery's Lebanon Valley teams, while Danzig and Cornad both assisted Woolum.

"We've meshed into a very good team," Flannery said. "I can't say enough about what those guys have done."

So, with three coach-of-the-year honors, a national championship, and a .648 career winning percentage under his belt, what does the future hold? After all, Army's Dino Gaudio left the Patriot League for a more prestigious job at Loyola, and the phones are most definitely ringing off the hook with job offers for Flannery.

"I didn't even want to take those calls," Flannery said.

It seems like, after coaching more than 15 years to get back to his alma mater, Flannery just wants to relax and enjoy the view.

"I love the way I'm treated at Bucknell by students, alumni, friends, administration, and everyone else," Flannery said. "When you're treated this well by everyone around you, you have to give back—I try to do as much as I can to give back to this community.

"I'm in this business because I enjoy basketball and I enjoy young people—not because I want to be a millionaire or coach in the Big East or Big 10. If I ever want those things, I feel that I can achieve them, but for now, I don't want to talk to anyone else. I like Bucknell, and I'm very happy here—I plan on continuing to work to make this program as good as it can be."

... to being a two-time league Coach of the year in his first three seasons at the helm.

"Freshman sensation" rules the Bucknell pool

By Erica Friedlander

Kate Wood '00, the record-setting swimmer, owes quite a bit to her childhood friends. It seems that her simple childhood desire to spend time with her friends eventually blossomed into an award winning season for the freshman swimmer who has set six records in her first season at Bucknell.

Wood began to swim at the age of five, but it was only when she observed her friends taking part in competition that she quickly gained interest. She never believed that winning would come this easily however. Due to her severe asthma, doctors informed the Texas native that she should take part in athletic activity, and by swimming regularly, her breathing would become more comfortable. With some persuasion from family members, Wood continued to practice at the sport that would later make her so well known.

The record-breaking swimmer competed for two teams during her high school career, as she was a member of a club and a school team. "We swam about four hours every day, plus running and weight lifting. The [club] team was really competitive because of where I was from."

Later, Wood decided to come to Bucknell University after writing a letter to the Bison swimming coach, Lyn Katchmarik. The Texan came to swim for the orange and blue soon after. Despite the fact that many of Wood's closest friends attended college in the south, she adjusted quickly to the new atmosphere and the new team. "We all get along really well together. It's a great bunch of people. I like that we are all able to practice together as well. It really keeps the team strong." At Bucknell, Wood's practice schedule is quite similar to the one that she held in high school. The Bison lift weights several mornings a week in addition to their two hour practices every evening. The practices help the swimmers work on strokes and assist in building skill.

Beetna Kim—The Bucknellian

Kate Wood set six school records in her first year as a Bucknell freshman swimmer.

Wood also seemed to strengthen her endurance and speed. Within the first two weeks of the season, the swimmer had already begun to make a name for herself at Bucknell. She set several records and was becoming stronger. "It all happened so fast. I beat the records so quickly that I thought that I would have to keep beating them every week. It was a little bit of pressure for me that made me work harder."

The freshman sensation dominated during her first season at Bucknell, setting six records including the 1000-yard freestyle and the 200-yard butterfly for both the pool and the school. Wood also made a trip with several members of Bucknell's swim team, to the Eastern Championship Athletic Conference (ECAC) where she was one of the 15 highest point scorers for the weekend of competition.

Wood's achievements in her first year of competition for Bucknell's swim team have caused her to stand out not only among the members of her team, but in the Bucknell community itself. Because of her incredible speed, endurance and skill, Kate Wood is appropriately named the Female Rookie of the Year.

SPORTS PEOPLE OF THE YEAR

Women's coach of the year—Art Gulden   Women's player of the year—Melissa Wharton   Men's player of the year—J.R. Holden

Wharton just plain does it all for Bucknell

By Jacob Lipman

Though there were many talented, hard-working athletes considered for Bucknell's 1996-1997 Female Athlete of the Year, Melissa Wharton '98 could not be denied this honor.

With the departure of Katie Steele, a four-time All-Patriot League first team performer for the volleyball team and also the 1995-1996 Female Athlete of the Year, Wharton became the focal point of the Bison offensive attack. She flourished in this role and was honored as a member of the All-Patriot League first team for the second season in a row. Coach Cindy Opalski remarked, "It was obvious when we began recruiting Melissa that she was an extraordinarily talented woman."

After a tremendous sophomore season, in which she set a Patriot League record for hitting percentage (.445), and Bucknell records in total blocks (187) and kills (358), Wharton managed to outdo herself.

She finished this season with a .410 hitting percentage—tops in the Patriot League—and broke her own Bucknell record for kills with 421. Wharton, who is one of the most powerful hitters in the region, ranked seventh in the nation in hitting percentage this year, just a bit lower than the previous year when she ranked second.

Wharton is also a key to the Bison front-line defense. She accumulated 165 total blocks (60 solo, 105 assisted) this past season, which was good enough for second in the Patriot League. Wharton also ranked 11th in the nation in this category. On top of all this, she is only two blocks shy of Steele's career record of 497.

Statistical records and awards show the extent of Wharton's talent and dedication. However, she makes it clear that her success has also been aided by her team members and coaches. "I never would have accomplished as much as I have without my teammates and coaches. They are very special to me," Wharton said.

Next season the Bison will miss five key players who are graduating, but with the return of Wharton as a team captain, they will be contenders for the Patriot League title once again. Wharton has a positive outlook towards next season. She feels the team members are very close to each other and have good chemistry on the court. She adds that this, along with an influx of freshman, will hopefully give the Bison what they need to win the Patriot League championship.

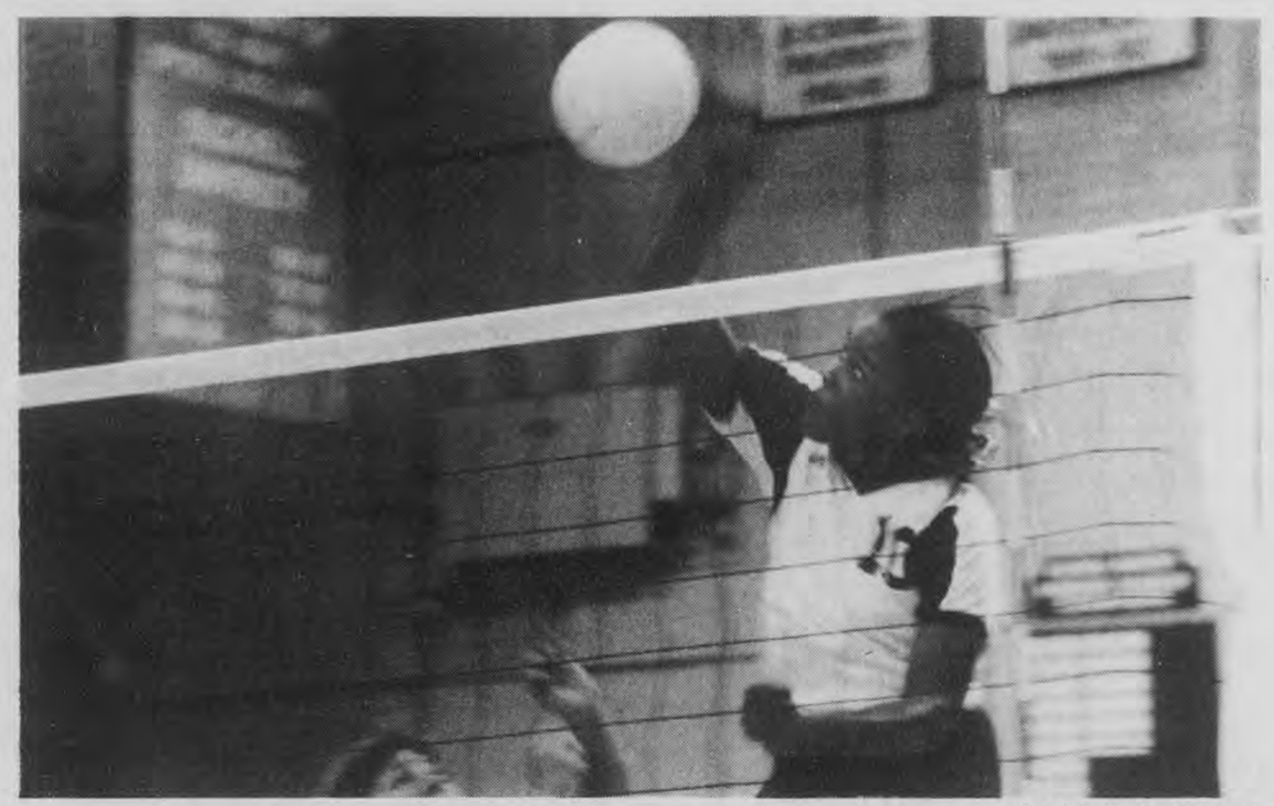
Referring to the time period when she was recruiting Wharton, Opalski commented "Not only was she an exciting volleyball player with tremendous offensive firepower, but a poised and talented musician."

Wharton is majoring in music with a concentration in voice and piano. She is a member of the Gospel and Chapel Choirs, and Concert Chorale. Melissa is also often heard singing the national anthem at home volleyball games.

"Sitting at her recital last week and listening to all the brilliant performances... I said to myself 'this is what being a true student-athlete is all about,'" Opalski said.

As for her goals after graduation, Wharton would like to record Christian music and possibly go to graduate school, though not immediately. She mentions that she hopes to continue to play volleyball competitively. "I've been playing volleyball since I was 12 years old. I just can't see myself not playing after I graduate," she said. Wharton also harbors a dream. That dream? To one day play in the Olympics.

A not all too unrealistic dream in her case.



Jonah Half—The Bucknellian

While on the volleyball court, Melissa Wharton '98 lets her play, not her mouth, do the talking...

Jonah Half—The Bucknellian

...but off the court, she's a member of the school's Gospel Choir.

Gulden's discipline leads to unrivaled success

By Brett Tomlinson

The door to track coach Art Gulden's office is invariably open, and while this detail might seem insignificant to fieldhouse visitors, it has made a world of difference for the veteran coach.

"I hate being behind this dumb desk," Gulden quirked in a recent interview, referring to the paperwork that goes along with being a track and field coach. Gulden says the real pleasure of coaching comes from "working with the kids," both on and off the track.

That includes counseling athletes on everything from scheduling and academic major problems to family issues.

"That's what's kept me here at Bucknell: the need to be needed by the kids," Gulden commented. "It's just a flat out wonderful place to be."

Bucknell should be grateful. Gulden has built one of the finest cross country and track programs in the east, recruiting athletes who excel both on the track and in the classroom.

Entering this weekend's Patriot League Championships, his women's track and field team stands undefeated after rewriting the school record book during the regular season.

"I think it's fair to say that this is the best team we've ever had," Gulden said. He credits depth and quality for the unprecedented success of the women's squad.

Of course, the modest Gulden downplays his own role in the growing success of his program. "Just having the numbers is not going to be enough," Gulden said. "We have to work to develop athletes, and my assistants are extraordinary at doing that."

As far as recruiting is concerned, Gulden claims that the secret is simply to "target the right kids."

"We tell recruits 'school is first and running is second,' and just ask them to give their best effort in both," Gulden said.

He keeps his training and motivation simple as well.

"I'm not a Knute Rockne-type speech giver," he said. "When you do the work and dedicate yourself, the rest follows I don't have to say much. I just ask for their best."

No one can argue with the results from Gulden's dedicated crew. Many of his athletes compete in three seasons, training six days a week for the entire school year.

"It comes from a good work ethic," he commented. "When you know you work hard, your confidence builds."

Gulden is hoping that this year's Bison squad has enough confidence to achieve their ultimate goal in the Patriot League: beating Army.

"Track is the second most important sport at Army, next to football," Gulden noted. While competing with the Cadets has been an uphill climb, he thinks that it has helped the program to progress.

Whether or not this is Bucknell's year to beat Army will be decided this weekend, but regardless of the outcome of the league championships, Gulden knows one thing: his athletes will give their best, and that enough to make any coach happy.

Beetna Kim—The Bucknellian

Cross-country and track coach Art Gulden has produced a pair of undefeated women's teams this season.

Cara Mickelsen—The Bucknellian

J.R. Holden '98 was an all-Patriot League selection and an all-tournament selection in his first year as a Bucknell basketball starter.

J.R. Holden burns for a shot at the 'Big Dance'

By E.J. Crawford

Last season he was the sixth man, a sophomore learning from an all-senior starting five. This season J.R. Holden '98 stepped out of the shadows to lead the Bucknell men's basketball team to the Patriot League Finals and within one basket of an NCAA tournament berth.

For all these reasons and more, Holden has been named the *Bucknellian's* Male Athlete of the Year.

For the season, Holden averaged 18 points per game in addition to 114 assists against only 92 turnovers, which coach Pat Flannery calls "the biggest factor, as J.R. constantly had the ball in his hands."

For all his offensive accomplishments, Flannery also feels that his defense is often overlooked. With his remarkable quickness and agility Holden was, according to Flannery, able to "put tremendous pressure on the opposition," as evidenced by his 60 steals.

Also remarkable was the durability and endurance that Holden showed, as he averaged 39 minutes (out of 40) per game.

So what made the difference between this year and last? "He got an opportunity to play," Flannery said, "he has always been prepared, he just sat behind the seniors."

Holden seconded this notion, adding, "I go into every season preparing the same way. You never know when you'll be called on to play. Just this season, I knew a lot more would be put on my shoulders."

And his shoulders seemed very capable. In addition to his personal achievements, Flannery emphasized most notably that he "has great leadership abilities... He's the guy the players look to," adding, "he has one of the most winning attitudes I've ever seen."

Said Holden, "I try to be a leader... I don't have to lead the team in scoring or assists, but just go out and lead by example."

His leadership and care for his teammates came to the forefront this offseason, as Holden, a tri-captain last year, was voted as the sole captain of next season's team by the players. "For them to pick me means a lot. It means that [the team] respects you as a player and a person."

Much of Holden's success this past season, as well as his first two years, were a result of his punishing work ethic as well as his respect for his teammates. "That's what makes him so special, he's a very positive kid while still being critical of himself. He never points the finger at anybody else. He's a real pleasure to work with," Flannery commented.

In addition, Holden studies game film religiously, prompting Flannery to refer to him as a "real student of the game, only the third such point guard I've ever come across in respect to film study and hard work."

But Holden would never tell this to you himself. During the interview he constantly turned question away from himself, crediting the whole team for this season's effort. "Everyone really enjoyed each other. Even the bench got really involved and the whole team came together... It really made basketball a lot of fun," Holden said.

He especially thanked seniors Tom Welch and Gordon Mboya for helping with the transition from last season. "Tommy Welch was great all season and Gordon and I really bonded off the court and on the court."

Holden's only regret is that the squad missed making the Big Dance, but feels as if next year's team has a great shot. "Missing the NCAA's was one of the toughest things for me, and especially for the seniors, but I feel very confident in our team, and hopefully we'll be there next year."

Whether or not the Bison land in next year's tournament, it is for sure that Holden has left his mark on Bison basketball and all those that played with him. Said Flannery, "He's just a real special kid."

Equestrian chases Penn State at regionals

By Samantha Utaski

Seven riders of the Bucknell equestrian team qualified to compete at the Region III finals Saturday, the 19th, held at Wilson College. Of the seven riders, five advanced onto last Sunday's intercollegiate Zone III horse show after placing in the top three Saturday.

This year's team consists of about 30 riders who compete in horse shows throughout the year against colleges such as Penn State, Scranton, West Virginia and Pittsburgh.

In competition, riders aim to accumulate as many points as possible to place in their respective classes. The classes range from beginners in the Walk/Trot division to the advanced riders in the Open division where riders jump 3'6" fences. By reaching a certain point total, riders qualify to advance to the year-end Regional and Zone competitions.

This year, under the tutelage of Jan Phillips of Milton, the team increased its number of advancing riders from last year.

The team's only competing senior, Kaitlin Sheppard, finished second at both the Regional and Zone shows in the Intermediate Flat division. With her finish at the Zone show, Sheppard qualified to compete at the National show to be held next week at Mount Holyoke College. Sheppard is the only rider from a school other than Penn State in this region in over two years to compete at Nationals.

Missy Achenbach '99 won the Open Flat class, a title won by Alexandra Petrillo '98 last year. Petrillo is currently studying abroad. The team's captain, Samantha Utaski '99 placed second in the same class.

Utaski also placed third and fifth in the Open Fences division at the Regional and Zone shows, respectively. Utaski was the Region III, Zone III Reserve Champion High Point Rider accumulating 71 points over the year.

Ashley Rust '00, the only freshman to qualify for both the Regional and Zone shows, placed second in the Intermediate Flat division and third in the Open Fences class at Regionals, and followed with a third place finish in the intermediate fences division at the Zone show.

Caroline Eckersdorff '99 took fifth and sixth at the Regional show in the novice division.

Jackie Sumer '99 qualified for the advanced Walk/Trot/Canter division and placed second and third at the Regional and Zone shows, respectively. Alexandra Baum '99 also qualified to compete at the Regional show in the advanced Walk/Trot/Canter division.

In all, the team competed at ten shows this year before the Regional and Zone shows and was constantly nipping at Penn State's heels to capture the Champion High Point Team Award at each show.

Gale leaves Ultimate team as a winner

By E.J. Crawford

Five years ago a tall and somewhat skinny freshman came to Bucknell and came out for Ultimate Frisbee. Now Brian Gale '97 leaves the team as its established leader and captain and certainly a lot more fun than when he entered.

It is actually difficult to refer to Gale as a captain, as he was more of a friend and mentor for the younger players, the prime example of the founding beliefs of Ultimate Frisbee—tough competition within the framework of spirit and sportsmanship.

"He typifies what spirit is in the game. He gives one hundred percent effort but still has fun on the field. You can tell that he really loves the game," Scott DiPerna '99 commented.

Though not fleet of foot, Gale was always hustling after the disc and would not hesitate to lay out (dive) after the disc if was within thirty feet of him. He would keep that same composure and spirit regardless of playing a team with no spirit or a team with as much spirit as Gale instilled in the Mudsharks.

Gale was also a great leader for a young and inexperienced team, as, in addition to his constant hustle, he never tried to take control of the team and was always tolerant and even-handed in his critique. He would never yell, swear or get angry at a player, but would address the team and encourage hard play.

As Alex Gregory noted, "For Gale, winning is important, but fun and spirit are the biggest priorities."

Pete Wise '00 remembers "the first day I came to practice Gale came right up to me and introduced himself and really made me want to be out here. He's a great leader and really represents what the game is all about."

Beyond all else, fun is the major force behind Gale's game. He is the kind of guy that could have a good time at the dentist or taking the SAT's, the kind of guy you want on your side when trying to win a party, play the dizzy bat game or tear off a shirt, a la the Incredible Hulk, after a score.

Despite some tough losses, he always kept the team loose, a perfect example to younger players of what Ultimate is all about, although Gale took the spirit and enthusiasm to a higher level.

"It is going to be hard to find someone with as much spontaneity and dedication to the sport," Gregory noted.

A man that can quote *Caddyshack* and *Fletch* with the best of them—Brian Gale, may his antics live on forever in Mudshark lore.

University to introduce new, improved intramural system

By Jacob Lipman

What do roller hockey, walleyball, inner-tube water polo and a tricycle derby (well maybe not the last one) have in common? These are all sports that could be coming to Bucknell next fall. The recreation program at Bucknell is being restructured. Some new intramural programs will be added and you can help decide what those programs are by completing the intramural survey.

The recreation program at Bucknell is not being revamped, but rather improved upon. The overall format of the intramural system will remain the same.

There are four intramural seasons, and at the beginning of each, there is a meeting for entering a team during that season. For each team sport, there are different divisions for students who want to play at different levels of competition. Division A is for the most competitive, while Division B is for those who are less competitive.

Each team accumulates points for participating in and winning games. For individual sports, the athlete accumulates points for his or her organization by participation as well as success. The male group whose teams and individuals totals the most points during the course of the academic year win the Pangburn Trophy. This underlying structure will remain.

One question the new survey asks is what sports should be kept. Another purpose, is to gain feedback on sports that students would like Bucknell to offer in its intramural or recreation program.

One of the reasons for restructuring the recreation program is to put more of an emphasis on the equality of women's sports. Currently, there is a 25-to-1 male to female ratio in Bucknell's intramural system. Student director of intramurals Jeremy Eckenroth '00 said that a better balance between male and female participation needs to be obtained.

"We want a more vibrant, more developed intramural program for women," agreed Cindy Opalski, director of recreation at Bucknell. Opalski commented that they are looking for feedback on what types of recreational programs would generate female interest. One other improvement in the works is the addition of the Rose Ewan award. This award will be given to the female group that totals the most points, using the same system as described above.

Another concern is that the Intramurals program is dominated by Greeks. Though fraternities are an important part of the Intramurals program, it is important that all students have an opportunity to join. One way this will be accomplished is that information regarding the Intramurals programs will be given to Residential Assistants. Intramurals are a great way to meet new people and could possibly be done as hall programs, Opalski suggested.

Another possibility for the new Recreation program, is the addition of teams, made up of administration or faculty members. These teams would compete against students.

Once the survey results have been obtained, a committee will base their decisions for next year's program on those results. Beginning next September, these changes will be implemented, but the changes will not end there. "Each year we want to be improving on this program," said Opalski. Eckenroth add-

Cycling qualifies for Nationals

By Whit Yost

The Bucknell Cycling Team finished its season this past weekend with races at Princeton and Cornell. It was a fitting end to a successful season as the team garnered four top-three placings in various races. The weekend ended with the team receiving its third consecutive invitation to attend the 1997 Collegiate National Championships to be held in Durango, Colorado.

The racing started off on Saturday with a criterium at Princeton. In the Women's B race, Erin Hemler '98 and Maryann Cielesz '99 rode dominating races to finish in fourth and seventh places respectively.

The Men's B race was fast from the start. The group stayed together though, with numerous riders being dropped from the back. Brian Hill '98 held tough, and on the last lap he attacked the field, quickly gaining a gap. He held the pack off for most of the lap and rounded the last corner alone. Suddenly, a Millersville rider leaped from the field and overtook Hill at the line. It was a photo finish, with Hill just a few centimeters behind.

In the Men's A race, a two-rider breakaway went off the front midway through the race. Bucknell was content to let other riders work though, because the break proved no threat to its standing. On the last lap, Tim Gernitis '98 led the field around at 38 miles per hour with Ryan Steneken '98 on his wheel. Ryan jumped out of the last corner to beat the rest of the pack and gain third place.

The next day was a long one with a circuit race at Cornell that lasted late into the afternoon. The Women's B race was first, and Hemler once again rode well, only this time she gained second place. The hills suited her riding style.

In the Men's B race, the hills also were the determining factor. Brett Bailor '00 rode a superb race, chasing back to regain the field after an early crash put him behind. He held-on to the group despite this effort, and ultimately finished 14th.

The Men's A race was also decided on the hill. Mid-race, a group of ten riders including Gernitis and Marc Ducharme '98 broke free. This group stayed away for the remainder of the race. On the last lap, a Middlebury rider jumped clear of the group to win the race solo. Gernitis, in an awesome display of power, leaped from the remaining group members to take second. Ducharme came home in ninth.

Overall, the Men's A team finished fourth in the conference, their highest placing ever. Tim Gernitis and Marc Ducharme finished the season as the second and fourth ranked individual riders overall. It is the first time Bucknell has placed one, let alone two riders in the Top Five overall. In the small school division, the entire team finished third, a very respectable result. Nationals will prove to be a tough challenge for the team, but the riders are optimistic about their chances.

Water polo fifth at Easterns

By Amanda Woll

This past weekend the women's water polo team traveled to Harvard for Easterns Championships. The team had a rocky start to the tournament, losing its first three games, but the Bison bounced back into action to win their final two games of the weekend. The team finished the weekend in 5th place.

On Friday night, Bucknell lost to the Maryland, the tournament's No. 3 seed. The Bison played a strong first half, but Maryland's speed proved to be too much for the Bison defense. Maryland ended the weekend in first place by defeating number one seed Slippery Rock.

In its first game on Saturday morning, Bucknell lost to UMass, the No. 2 seed of the tournament. UMass concluded the weekend in third place. Again, the Bison played a strong first half, but had trouble keeping up.

Bucknell's weekend didn't get any easier in a Saturday afternoon loss to Brown.

Saturday night, Bucknell stepped up its level of playing to defeat Harvard, 12-11. It was a close match, but the Bison maintained a lead they established in the first quarter of the game. Strong hole defense was played by Sharon Gashlin, '97 and Mary Anne Kurucz '97. Goalie Kristin D'Agustino '00 played a solid game. Captain Kim Tierney '97 led the team with eight goals. Gashlin and Kurucz both had two.

Sunday morning, the Bison concluded the tournament with another game against Brown. This time, the Bison defeated Brown 13-6 to take 5th place in the Easterns Championships. Bucknell put pressure on Brown from the beginning of the game. Alyson Kienle '99 scored the first goal of the game for the Bison. Kim Tierney again lead the team with eight goals. Amanda Woll '97 scored two, while Gashlin, Kienle, and Meghan Reilly '99 each contributed one. Heads up defense and solid offense was played by the entire team. Dana Cull '99, Courtney Watson '99 and Emily McKnight '00 all had exceptional performances during this game.

Tierney received Second Team All-East Honors as a result of her strong performance throughout the tournament.

The Easterns tournament concluded the 1997 women's water polo season. The team will graduate 4 seniors: Sharon Gashlin, Mary Anne Kurucz, Kim Tierney, and Amanda Woll. Gashlin and Tierney are the only players on the current team who had played water polo prior to their Bucknell career.

In addition, assistant coach Jay O'Neil will graduate. O'Neil's coaching ability and dedication to the sport of water polo during his three year association with the program proved to be an asset to the team.

Next year, the team will look to the return of current underclassmen, as well as to the entrance of four first year women with high school water polo experience.

Gymnasts bring home first trophy

The Bucknell women's gymnastics team finished their first season with a strong performance at the 1997 Lehigh University Invitational. With all team members placing in at least one event, the women proved that they will be a force to contend with next season.

Amy Matheson '98 posted the highest finish of the team on the vault, Denise Lamoreaux '00 on the uneven parallel bars, and Jessica Thomas '98 on the balance beam. Beam and floor, as expected, were the strongest events for the team as a whole, with Lamoreaux and Thomas posting season high scores on the floor exercise. In addition to its success at Lehigh, the team performed well at the Navy Invitational in February, bringing home the first Bucknell Gymnastics trophy ever.

Due to studies abroad, the team consisted of only three competitive members, making it difficult to compete with larger teams. Next year, however, with the return of at least two gymnasts, the team hopes to take some of the pressure off of the three current team members.

Although its season has ended, the team is currently back in the gym practicing hard. The members are eagerly anticipating the '97-'98 season with consistent hard work and dedication. The first season for any team is always a test. Bucknell Gymnastics passed with flying colors, and only bigger accomplishments are expected for the future,

Bison's Men's Basketball Team is looking for managers and videopeople — male or female for the 1997-1998 season. For details, please call X1267

Baseball limps into Patriot League playoffs

By Jeff Campagna

The Bucknell baseball team is playoff bound once again, as the Bison backed into postseason play by dropping three of four games this weekend to the eventual second-place finisher, Navy.

Regardless, the third-place Bison (10-10) will travel to West Point, the home of the first-place Cadets (15-5), this weekend to meet Navy (12-6) for a one game series. The winner advances to face Army in a best-of-three series to determine the Patriot League Champion. Regular season records don't matter after a team reaches the playoffs, and often times a hot streak by one of these evenly matched teams is enough to propel a squad to a league title.

This past weekend was a tough one at the plate for the Bison, who ran into four formidable Midshipmen hurlers. In each of the four games, no starting pitcher for Navy lasted less than a complete game or gave up more than four earned runs.

Top Bison starter Mike Anders '98 turned in a solid performance in the first contest, but faded late as the Bison bowed 4-1. With the score tied 1-1, the Midshipmen pushed across three runs over the fifth and sixth innings to pull away. Top hit men for Bucknell included catcher Pete Cann '97 and designated hitter Erich Muzi '99, who each went 2-3 with a double.

Things continued to go downhill in the nightcap as sophomore Bison starter Sean Huss (5-2) was hit early, leaving Bucknell down 5-3 after the fifth inning. The Bison rallied in the top of the sixth to tie the score, but the Midshipmen refused to sink, scoring three of their own in the bottom frame to take what would be a final 8-5 lead. Cann continued to feast on seafood, knocking in two runs against Navy pitching while smacking his seventh homer of the year.

Navy pitching baffled the Bison in the first half of the next day's next day's twin bill, as Bucknell was limited to a paltry five hits. Bison starter Mike Tomko '98 turned in his second sharp start in a row, throwing a complete-game four-hitter while letting up one earned run and walking six. Tomko's effort just wasn't enough, as the Bison ended up on the short end of a 2-1 score.

Bucknell finally broke through the wall of Navy pitching, coming back in a nail-biter to pull out a 7-6 win in extra innings. Navy went on the attack early, building a 6-2 lead by the bottom of the fifth while going through three Bison pitchers.

Bucknell refused to fold, though, scoring two runs in both the sixth and the seventh innings to tie up the game. Navy nearly pushed a run across in the bottom of the seventh, but the Midshipman was gunned down at the plate thanks to a frozen rope from center fielder Mike McCarthy '99.

Bucknell continued to play stellar defense into extra innings, as right fielder Alex Inclan '97 snow-coned a gapper, robbing Navy of an extra base hit in the top of the eighth. That gave the Bison the time they needed, as they manufactured a run in the top of the ninth to go up 7-6. Eric Junge '99 came in and slammed the door for his school record sixth career save.

With his seventh homer of the season in the game, second baseman Dave Apollon '98 set a Bucknell record for extra base hits in a season, with 24. Apollon knocked in three runs to lead the team, while first baseman Steve Rutkowski '97 picked up three hits to raise his average to a team-leading .372.

"We've been playing less than our best the last three weekends. I think it's just a momentum thing that we need to overcome," commented coach Gene Depew. "I hope coming back and winning the last game against Navy is the catalyst we need to get us back in the positive frame of mind."

After facing Midshipmen pitching for the first time this season over the past weekend, the Bison will be more familiar with Navy's offerings for this weekend's Patriot League Tournament. Bucknell looks to defend its status as reigning Patriot League Champion starting Saturday.

Pete Cann '97 leads the baseball team in home runs with seven.

Crew gets washed out at Patriot League regatta

By Amy Dietterich and Philip Schmehl

The weather was deceiving: a beautiful, cloudless morning. The elated rowers sprung from the Bucknell bus with expectations of bringing home yet another championship for the Bison. As the novice squads readied themselves for the first races, though, the water began to swell. By the time the novice women's eight race launched, the tumultuous devils of the underworld, currently residing under the lake, had awoken. Although the race proceeded, it was soon delayed as the Colgate boat, already behind the Bucknell eight, called for a restart. After losing their concentration (and a significant lead), the novice women fell to the Colgate boat.

The second race of the day, the novice men's eight, was also permitted by the devils to race. Matched up against two Army boats, Colgate, Holy Cross and Hamilton, the novice men were one of only three boats to not sink after or during the race. Coming in third place, the men beat an Army boat which swamped with 250 meters left, the other Army boat and a considerably weaker Hamilton boat.

The third race of the day was the varsity women's four. After being delayed several minutes by the previous race's casualties, the varsity women's four came in third place, beaten by Holy Cross and Colgate. The devils only gave the women a thorough soaking, and claimed no victims.

The fourth, and, as it turned out, final race of the day was the men's heavyweight four. Using their socks to absorb and then squeeze the water out of their boat, the varsity men took the only gold of the day, solidly beating the weaker competition of Lehigh and Colgate. After the gods captured the Colgate boat in this race, the cadavers mounted up and the whitecaps became too numerous to count. The race officials tried to move the race to a more calm area of the lake, but to no avail. In the end the regatta was canceled for the second year in the row, much to the chagrin of all of the rowers.

Ewan resigns as women's tennis coach

Rose Ewan, the Bucknell women's tennis coach of 18 years, resigned her post effective this May. Ewan will continue to serve her other role as associate director of athletics for women's sports after her resignation.

Ewan, who enjoyed a 183-120-1 record in her 18 seasons at Bucknell, helped the team to its first ever Patriot League title in 1992 and another league crown in 1994. She was named league coach of the year during those two seasons. Her best season was a 16-1 campaign in 1991, and the Bison compiled a 25-match winning streak over the 1991 and 1992 seasons.

Bucknell has earned a dual match record of 84-21 in the 1990s and finished 12-6 this fall. Two Bucknell players finished in third place in this season's Patriot League individual tournament.

Thanks, Katherine!

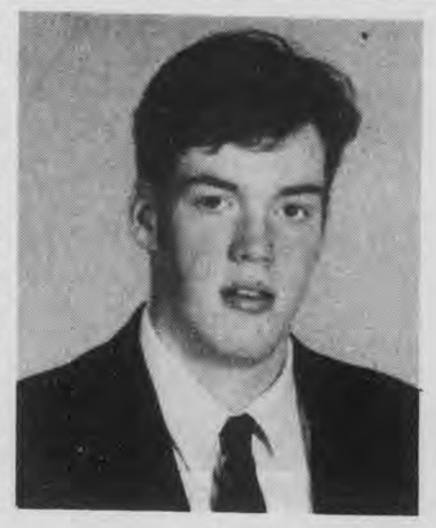
Three recruits to join Bison basketball

By Chris Ellis

Best formula for an ulcer: you're trying to recruit the very finest for your basketball program. You have a player sold on the campus, sold on the program, and academically able to achieve what Bucknell demands. You also stick him with a $26,000 price tag. Bye, bye marquee player.

With no athletic scholarships available, basketball head coach Pat Flannery has to rely on other methods to lure players to his campus. His first strategy: common sense.

"We have to get kids that are interested in more than just basketball," Flannery said. "We ask them straight out—what are you going to be doing in five or 10 years? We have to see how serious they are about academics."



Terence Skyrm

If the players can accept the demands—and sometimes exorbitant price—of playing Bucknell basketball, then Flannery moves in for the kill. Selling players on the school and his program is one of the coach's best talents, and he used his skills this season to land three players to replace the Bison's three graduating seniors. An overview of the recruits:

—John McBride, is a 6'9" forward from McLean, Virginia. McBride was a starter on his sophomore team that went 27-1 and won the Virginia state championship. He won another state title in his senior season, earning All-Tournament honors as well.

"He's a very athletic kid and runs well for his size," Flannery said.

—Nyambi Nyambi, is a 6'1" point guard who led Oakton High School in Herndon, Virginia to its first winning season in 25 years. Nyambi averaged 12.4 points, 5.7 assists, 4.9 steals, and 5.0 rebounds in his senior season. Nyambi is regarded as a dangerous three-point threat.

—Jacob Ramage, a 6'4" player from Moorestown, New Jersey, may be the best of the pack. Ramage was an honorable mention All-State selection at Morrestown High School and was also a McDonald's All-American nominee. His senior team posted a 25-4 mark and won the District Two South Jersey Championship last season. Ramage scored 19.3 points and grabbed 5.6 rebounds per game for Moorestown.

"Jacob's just a scorer, plain and simple," Flannery said.

In addition, next year's Bison will regain the services of 6'10" center Terrence Skyrm, who sat out all of last season with a knee injury, but is expected to make a full recovery for the 1997-98 season.

"Terrence has been in our system, and he's been around the program for a year now," Flannery said. "I think he'll be a real pleasant surprise and compete for some quality time."

The Bison open their schedule at Robert Morris on November 15.

One more time: the top 10 of 1996-97

With this being the final issue of the 1996-97 school year, I thought I would take some time to reflect on a few events that rocked the sporting world during the past season. Fans who aren't entrusted with the job of actually knowing this stuff may not have heard all the news that hasn't penetrated the Bubble, so I feel it to be my responsibility to inform and educate the Bucknell public (wow, I almost feel like an authority figure...). Here now, in a highly scientific analysis debated and discussed by a panel of one, are the 10 most important sports-related milestones/events that occurred during this year (disagreements are welcome)...

10) *Rocketing to Canada*—After a decade of success with the Boston Red Sox, Roger Clemens was the latest superstar to be bitten by the big-money free agent bug, signing a deal with the deep-pocketed Toronto Blue Jays. Before getting roughed up by Ken Griffey and the Seattle Mariners last week, the Rocket had posted a minuscule 0.42 ERA in his first five starts.

9) *Try laughing now*—Last season, despite having arguably the best player in the game in the person of G Dominik Hasek, the Buffalo Sabres sputtered through the NHL regular season, missing the playoffs. The Sabres were given little chance again this season, but Hasek and Buffalo responded by unseating Pittsburgh as Northeast Division Champions and entering the playoffs as the No. 2 seed. Still, even those who conceded that Buffalo's dream season wasn't a fluke still had their doubts—the Sabres, they claimed, were a one-man team—without Hasek, they were as good as dead. Well, Buffalo proved those doubters wrong again. After losing Hasek in Game two of their first-round series with Ottawa, Buffalo rebounded behind goaltender Steve Shields and a tough trapping defense to win the series, setting up a second-round matchup with Philadelphia.

Chris Ellis
Sports Co-Editor

8) *Say it, don't spray it*—Roberto Alomar turned the final days of the 1996 MLB season into a nightmare for league administration after spitting on umpire John Hirshbeck during a late-season game. Alomar received a minuscule five-game suspension which could be deferred until after the playoffs ended, prompting the AL umpires to threaten not to work postsesaon games. Alomar made amends for his childlike behavior, donating to some of Hirshbeck's charities and shaking hands with him during a home game last week, but the black stain remains on the hands of baseball's elite, who failed to realize the severity of Alomar's action.

7) *Queen of the nets*—Sixteen-year old Swede Martina Hingis had breathed much-needed enthusiasm into professional tennis, ripping the title of world's best women's player from Steffi Graf and Monica Seles, going undefeated to this point in tournament play. Last week, though, a saddle did what no player could—keep Hingis from the winner's circle. The phenom will miss at least three tournaments while recovering from knee injuries sustained during a fall from a horse,

6) *Holy...field*—After sitting through countless cupcake fights, Mike Tyson pay-per-view watchers finally got something for their $40 after watching former champ Evander Holyfield, a 12:1 underdog, TKO Tyson last year. Tyson will likely regain the title in the pair's August rematch, but the loss was the second blemish on the record of one of boxing's greatest ever.

5) *Not again, Roy*—More intriguing than the teams who were in this season's NCAA Final Four is the conspicuous absence of another team—the Kansas Jayhawks. Despite finishing the regular season with only one defeat, Roy Williams' club fell to eventual champion Arizona in the Regional Semifinals. Even though the were arguably college basketball's most dominant regular season team over the past four years, the Kansas seniors never made it to a Final Four.

4) *Quick recipe for success*—Years ago, it took years or even decades to sculpt a winner out of an expansion franchise. In the times of NFL free agency, though, that axiom is dead. Given extra draft choices and unlimited salary-cap room as terms of their entry into the league, both teams responded by coming within one win of the Super Bowl. Carolina defeated the defending champion Dallas Cowboys, while Jacksonville ripped into the team with the league's best regular-season record, the Denver Broncos. The teams' immediate success had a few NFL General managers irate about the sweet deal the expansion brothers received.

3) *Au revoir, superstar*—Doomed to spend his final season on an underachieving team, the Pittsburgh Penguins' Mario Lemieux ended his illustrious career in a 4-1 series loss to Philadelphia. The tributes to Lemieux are seemingly endless, but nothing captifies what he did for hockey in Pittsburgh better than his final home game. In the years before Lemieux, the Penguins were a league- and city-wide joke—the team couldn't draw crowds as big as those of the Pittsburgh Opera Company. Lemieux's last game, though, was a standing-room only sellout and scalpers were everywhere—My lovable if not too firmly-grounded family bought three seats for the final game at $150 a pop. (It turns out that they got a bargain—newspaper reports saw scalpers getting as much as $1000 for seats). Lemieux went out with a bang, finishing the 1996-97's leading scorer and likely regular-season MVP.

2) *Hear me roar*—For all of Tiger Woods' accomplishments, probably the most captivating is *Time* magazine's naming him one of the world's 25 most influential people. The title bestowed on Woods is well-deserved—he has brought golf to the masses, introduced minorities to the sport, and destroyed the competitive balance that has been the norm in pro golf since Jack Nicklaus' heyday. The price tag on Woods' success is equally staggering—the approximately $300,000 he received for winning the Masters pales in comparison to the endorsement deals he has received, deals which will pay him nearly $130 million over their lives.

1) *The Pack is Back*—And finally, one positive note which proves that money still isn't the *only* influence on success in sport anymore. The Green Bay Packers, a team located in a city which isn't even among the top 100 markets in the nation, won the Super Bowl over Bill Parcells and the New England Patriots. With the current trend to corporate ownership of franchises and stadiums which cater to the rich, the Packers are a breath of fresh air. The Packers play in mystical-if-not-so-high-class Lambeau Field and are owned by the residents of Green Bay. Long live the Pack!!!!

Women's lax finishes most successful season ever

By Haley Futterknecht

Cara Mickelsen--The Bucknellian

Lauren Coyne '99 and the women's lacrosse team finished the season with a school-record 13 wins.

The Bucknell women's lacrosse team closed the most successful season in school history this past week. The Bison extended the school record for victories in a season with a win over UMBC 15-8. Bucknell was leading 4-3 midway through the first half, then poured in five straight goals to gain the 9-4 halftime lead.

"We were nervous to play UMBC, because both games against them in the past two years went into overtime. We were prepared for tough competition, so we came out strong in the beginning to ensure our domination," remarked Jen Gallagher '98.

Heidi Hammes '99 led the goal barrage with four goals and one assist. Kate McIlvain '97 and Liz Murphy '99 contributed three goals each for the Bison. Alison Cox '97 added a pair of goals and one assist. Single goals were scored by Meredith Barrows '97, Meghan Hallahan '97, and Lauren Coyne '99.

Aly Toombs '97 turned away seven of the Retrievers' shots. Toombs ranks 16th in the nation in goals-against average at 7.92. The Bison outshot UMBC 33-16. Bucknell ranks 10th in the nation in winning percentage in the latest NCAA statistics.

"We are basically the same team as last year, but we enjoy the sport a lot more this year. Having a new coach provided a fresh start for the program which allowed us to set a precedent for years to come," Murphy stated.

Bucknell victoriously closed its record-breaking season at home against Columbia. The Bison led 11-2 at halftime.

"In both UMBC and Columbia, our passing was amazing. We were making the connections, which is what we have been concentrating on during the season," Hammes commented.

Bucknell's liberal substitution in the second half led to victory. The seniors were applauded as they were taken out so the future of the program could be put on the field to carry out the victory, 12-4.

Hammes' contribution of three goals puts her at 40 goals, the most ever by any Bucknell sophomore. She ranks fifth highest in goals per season in school history. Her career total of 64 goals places her tied for ninth for career goals with two more season left in her career.

In a game against Columbia, McIlvain contributed a pair of goals and one assist for the Bison. Jesse Eaton '97, Amy Green '97, Eaton, Cox, Barrows, Hallahan, Coyne and Murphy all added single contributions. Of the eight seniors, six scored against Columbia. Bucknell outshot Columbia 34-22.

"The fact that many different people score emphasizes how well-rounded our team is, which is extremely promising for the future. Barb [Jordon, coach] has coached us to rely on each other equally," Hammes remarked.

Murphy ended a phenomenal season this year. Coming from minimal playing time last season, she scored 30 goals this season and contributed five assists.

The defense was anchored by a veteran defense team featuring, Jen Rose '97, Toombs, Green and Gallagher. Toombs saved 12 shots for the Bison. Maureen Breslin '99 turned away four shots for Bucknell.

The seniors were definitely the backbone of the most successful team in history. Their efforts throughout their four years paid off in actual records made this season. The Bison enjoyed the best start and the longest winning streak in Bucknell history of 7-0. They celebrated with milestone wins over Cornell and Lehigh. They beat and extended the record for most wins ever by a Bucknell women's lacrosse team with a record of 13-3 overall.

"The seniors are leaving a team with great depth that contains the ability to take the program to yet another level. This season has been a nice way to end four years," Toombs commented.

"One of our goals was to be recognized in the Patriot League and at Bucknell. We posed a threat in the Patriot League and gained respect at Bucknell," Murphy stated.

Men's tennis holds true to seed at championships

By Jared Silliker

Jonah Half—The Bucknellian

Drew Thimme '97 and the men's tennis team finished fourth at the Patriot League Championships this past weekend.

Some parts of the Patriot League Tennis Championships went as Bucknell head coach Bob Hammerlee planned.

Others did not.

Hammerlee hoped his squad, seeded fourth, could replicate that win in the first round, having beaten No. 5 seed Lehigh during the regular season.

The Bison did just that, by the same score, but in an entirely different manner.

Next on the list, a matchup with No. 1 seed Army. Hammerlee indeed expected the 7-0 loss to the Cadets.

And finally there was the anticipated match for third place with Colgate, which was expected to and did lose to No. 2 seed Navy.

Here's where Hammerlee's plans became a little sketchy, as Bucknell had lost to Colgate, 5-2, in their regular season meeting back on March 21.

After losing the doubles point, including a tough 9-7 loss at No. 2, BU needed to win four of the six singles points.

With Justin Quandt '00 and Sean Galligan '98 having already collected singles wins, the score read, 3-2 Colgate. "We looked like we might get four wins with two matches left," Hammerlee said.

The two matches remaining—T.K. Kelly '00 at No. 1 and Adam Epstein at No.2. "T.K. was cruising along up a set and 3-1, and Adam was serving for the first set at 5-4," Hammerlee said.

Unfortunately for Hammerlee and the Bison, Epstein was broken, and eventually fell to Colgate's Ross Newman, 7-6 (8-6), 6-3. Kelly's match was halted once Colgate tallied four points.

"I don't want it to seem like just Adam's fault, though. A lot of things went wrong No. 2 and 3, as well as in doubles," Hammerlee said.

With the loss the Bison earned fourth place, improving one notch from last year.

As mentioned above, the first round Lehigh match developed in a much different way than the regular season match on April 15.

"They had a little stronger lineup this time around with their regular No. 4 back, and five and six at their normal spots," Hammerlee said. Consequently, numbers four, five and six singles all lost this time around after all notching wins in the April 15 match. Hammerlee would have to turn to the top of his lineup, except he didn't plan on No. 2 player Josh Plumb forgetting his racquets in his locker back in Lewisburg.

Plumb didn't seem to mind, though, as he, along with Steve Bomberger '99 and T.K. Kelly '00 all scored key singles wins to down Lehigh.

Plumb used "sheer guts and determination" according to Hammerlee to topple Lehigh's Scott Ackerman, 7-5, 5-7, 6-0.

Bomberger and Kelly both avenged losses—Bomberger downed Peter Berko, 6-3, 6-2, after losing 6-2, 6-3 back on April 15, while Kelly scored a 7-5, 6-4 win over Cameron Taylor. Kelly fell 7-5, 1-6, 6-4 to Taylor in their first meeting.

"Steve just turned it around and played a very smart game," Hammerlee said.

The No. 1 doubles team of Kelly and Bomberger also avenged an earlier loss, winning 8-2 over Taylor and Ackerman to secure the doubles point.

In other action, as predicted Army and Navy battled in the finals, with Navy edging Army in the finals, 4-3, for the second year in a row. "It was good to see two quality schools like Army and Navy battle it out," Hammerlee noted.

The Bison finished the season with a 14-8 record, matching their highest win total ever, equaling last year's mark.

Sports Trivia Quiz

1. What university has the most varsity sports?

2. What NBA coach has the most career playoff wins?

3. What National Hockey League goaltender has Mario Lemieux beaten for goals the most times?

4. Who holds the Kansas City Royals record for the most home runs in a season?

5. What is Michael Jordan's career high for points in a playoff game?

---

1. Harvard (41). 2. Pat Riley (100). 3. John Vanbiesbrouck (32 times). 4. Steve Balboni. 5. 69 points vs. Boston in 1986
